Admin Minnesota
DEPARTMENT OF ADMINISTRATION

MEMORANDUM

To: Sen. Sheila Kiscaden, Chair, State Government Budget Division
Rep. Marty Seifert, Chair, State Government Finance Committee
Legislative Reference Library

From: Dana B. Badgerow, Commissioner of Administration

Subject: Technology Inventory Reports (16E. 035)

Pursuant to M.S. 16E.035, the Department of Administration is to provide an inventory to the Legislature of technology owned or leased by state agencies by July 1 of each even numbered year. In June 2004, a year in which the inventory was to be provided, the Department of Administration notified the Legislature that the inventory would be delayed. The reason for the delay was that state agencies had just embarked on a comprehensive assessment of state agency business functions and technology assets. The first phase of that assessment is now complete.

An automated scan of agency technology assets produced a technology asset inventory data, summarized in the attached reports, as a step toward fulfillment of the requirements of 16E.035. The technology asset inventory data acquired during this first automated assessment, while accurate, is not complete. However, it provides a necessary baseline from which to build a sustainable store of data that will be used to ensure architectural compliance, proper procurement oversight and asset portfolio management. The inventory due to the Legislature in July 2006 will build on this baseline.

The business and technology assessments conducted in the Drive to Excellence were critical first steps toward establishing an information baseline that would allow for an action plan to deliver the strategic government reforms called for in the "Pawlenty-Molnau Plan: Minnesota's Drive to Excellence."

The Drive to Excellence business and technology assessment activities resulted in recommendations for dramatic and forward-thinking reforms in the ways that the state acquires, uses and manages its technology assets. The reforms are aimed at remedying the divergent

An Equal Opportunity Employer

technologies, limited sharing of common information and redundant technology projects of the past. The Governor by executive order and the Legislature by amending 16E in the 2005 regular session have already started to implement several of the reforms related to information technology (IT) governance.

The creation of the position of the State Chief Information Officer (CIO) as a Governor's appointment and merging the former Office of Technology and InterTechnologies Group into a new Office of Enterprise Technology (OET) under the direction of the CIO are among these significant reforms. The CIO will lead the effort to establish a technical architecture that is directive, ensuring that enterprise-wide IT is strategically sourced and managed, in reduced costs. The new enterprise-wide, rather than agency-centric, model will govern decision making for all IT spending and ensure that the enterprise IT strategy, plan and related spending drive IT budget priorities and agency IT budget planning. The business intelligence supporting the CIO in this effort will grow from the seed represented by the current technology inventory, promising to position the state for increased accountability in IT investments and management in the future.

Source DB - Analytics for bDNA

Report Title - ITG - bDNA:Application Verification - minimum applied

Source Report - bDNA: Application Verification

"Minimum instance counts applied" - bDNA base requirement from table - bDNA: AppsRollupLimits, column - MinOfCountOfRowID used in calculating totals. This means, for some agencies, a minimum count instances is required before detail is displayed in this report.

Hardware Asset Inventory

Classification	Patch Level	Hardware Descriptor	# CPUs:	CPU Speed (MHz)	Bytes of Memory	Installs Count

Architectural standards compliance

"What is the level of compliance with existing architectural standards?"
(Drive to Excellence Transformation Roadmap technical assessment survey question, T.2.9)

Of 61 agency responses, 53 rated their agency's level of compliance with existing architectural standards as either "high" or "medium."

Rating	Number of Agencies
High	22
Medium	31
Low	3
Very Low	1
Other: "Not Applicable"	3
Other "Deployment in Progress"	1

Office of Enterprise Technology (OET) Shared Services
Assumptions Regarding Potential July 1, 2005 Partial State Government Shut-Down
Action Plans

Assumptions:

- 95%+ of mainframe applications will be running
- Mainframe testing and application development will be minimal at non-funded agencies
- Wide Area Network (WAN) traffic will be near normal because major users are funded or have been designated essential services
- All video services will be continued
- Mail hub, virus scanning and SPAM filtering will continue
- Security to protect computing and WAN services will continue to operate
- Disaster recovery/business continuation planning work with non-funded agencies will be discontinued
- Harbor backup and restore services continued
- Data entry for funded agencies or essential services will be continued
- Construction of DHS, Ag & Health buildings will continue and services to support those efforts will be continued
- Consulting services for non-funded agencies will be discontinued
- Biggest exposure is Centron Line billings from carriers with no payment
- Centron voice and voice mail services will be operational; agencies will be advised how to suspend and re-activate Centron lines which will reduce cost 50% provided service is suspended for 30+ days
- Voice moves/adds/changes support limited; agencies trained in online system advised to use online system
- Contact Center MN (CCM) and Hosted Internet Protocol Telephony will be supported
- Product management functions will be deactivated for all services
- Customer liaison work will be reduced to a minimum
- Met Council co-location project will continue
- ARS development will be discontinued except for back-up implementation project
- Non-funded agencies T1 circuits bought through OET will not be disconnected unless an agency elects to have them disconnected (Agencies will be advised that disconnect would result in termination payments and reconnect delays and costs and that not disconnecting implies liability for costs)
- Clerical staff will be reduced
- NorthStar support will be reduced
- Billing services will continue
- Accounts payable will be reduced
- Procurement entry will be supported
- General accounting will be minimal
- Internal training activities will be discontinued
