Minnesota Employers' Association

The Minnesota Employers' Association, Inc. is the only statewide business association in Minnesota whose membership is composed of all types and sizes of business and industry.

As a non-profit corporation it has been serving business and industry in Minnesota since 1908. Its objectives are to gather and disseminate information for its members, promote favorable economic business conditions, assist in obtaining good relationships between employer and employee, and act as spokesman for Minnesota business and industry wherever business views are sought.

The Association issues this brochure to make it convenient for those interested to become acquainted with the people who will enact the laws, rules, regulations and taxes with which all Minnesotans will have to comply in the coming years.
