

Agency Purpose

The Board of Accountancy was established in 1909 and is mandated by M.S. 326.165-326.229. The board's is responsible for ensuring that persons engaged in public accounting meet and maintain the qualifications and standards required to competently practice public accounting in the state of Minnesota. The board fulfills its mission through the following:

- ◆ administering the Uniform Certified Public Accountant examination;
- ◆ issuing and renewing licenses to certified public accountants;
- ◆ renewing licenses to licensed public accountants; and
- ◆ regulates the profession.

Core Functions

The board regulates the practice of public accounting by enforcing its rules and applicable laws on ethics and by monitoring continuing, professional education requirements, quality review and investigating complaints. The board also follows M.S. 214 that generally governs boards and commissions charged with regulating certain occupations in Minnesota.

Operations

The board is comprised of five certified public accountants, two licensed public accountants, and two public members. Dennis Poppenhagen is the executive secretary of the board. Four full-time equivalent employees assist the executive secretary with licensing, investigation, exam preparation, and other duties.

The Department of Commerce provides administrative support to the board. Its duties include processing payroll and personnel transactions, allotting, encumbering, and disbursing funds, and maintaining the accounting records. The Department of Commerce records the financial activity in the state's accounting system, MAPS, while payroll activity is recorded in the state's human resources system, SEMA4.

The Department of Finance provides standard financial reports for the board. The executive secretary is responsible for reviewing the financial reports and working with the Department of Finance to resolve any discrepancies. According to M.S. 214.06 and M.S. 326.22, the board is required to collect sufficient fees to recover both its direct and indirect costs. The Department of Finance works with the board to ensure that fees charged recover board costs.

Budget

The board's biennial budget for FY 2002-03 is \$1.404 million. This funding is through a direct appropriation for the state's General Fund. The board recovers all of its costs through the collection of fees for licensing, disciplinary action, and examinations.

At A Glance

Biennial Budget for FY 2002-03 \$1.404 million
Recovers all its costs through fees

Business Functions:

- ◆ Licenses over 23,000 Certified Public Accountants;
- ◆ Reviews and processes over 3000 applications to sit for the Uniformed Certified Public Accountant examination biennially; and
- ◆ Issues fines and penalties based on board authorized disciplinary action.

The board has a staff of five full-time employees.

Agency Purpose

“Service First” to Minnesota and its citizens is the goal of the Department of Administration (Admin) and is expressed in Admin’s mission to improve the quality and productivity of Minnesota government. Admin strives to accomplish this through providing high-quality facilities, services, and infrastructure that will assist each agency in achieving its organizational and strategic goals.

Admin strategic goals include:

- ⇒ *Customer Focus* – Admin consistently delivers goods and services that support state agencies in meeting and/or exceeding citizen expectations and takes a leadership role in facilities and operations management.
- ⇒ *Employer of Choice* – Admin motivates and enables employees to develop and utilize their skills in support of Admin’s overall objectives in a positive work environment.
- ⇒ *Technology for the Future* – Provide citizens with more convenient, easy, fast, and cost-effective access to government information and services.

At A Glance

- ◆ Manages over 525 construction projects with a total value of \$260 million.
- ◆ Recycles over 2,000 tons of materials yearly.
- ◆ Manages 1,000 state leases and 4 million usable square feet of leased space.
- ◆ Administers the state building codes.
- ◆ Provides energy management services that result in annual savings of over \$125,000.
- ◆ Provides information technology services to Minnesota’s public sector around the clock.
- ◆ Processes 31 million pieces of mail and 5 million warrants and checks annually.
- ◆ Provides oversight of \$1 billion in annual purchasing and consolidates procurement activities, saving \$49 million a year.
- ◆ Coordinates strategic investments in information and communications technology.
- ◆ Home to North Star, the state of Minnesota’s Internet portal.

Core Functions

Admin is organized under five distinct bureaus.

- ⇒ **Operations Management Bureau (OMB)** is the state’s buyer, mail service, printer, bookstore, office supply store, insurance carrier, vehicle leasing agency, and surplus property auctioneer.
- ⇒ **Office of Technology (OT)** is state government’s technology window to today and tomorrow. OT provides statewide leadership and direction for the development, integration, and implementation of electronic government services and other technology initiatives and seeks to assure that state policy enhances the capabilities of Minnesota’s citizens, businesses, schools, and communities. OT also coordinates and maintains *North Star*, the state’s Internet portal.
- ⇒ **InterTechnologies Group (InterTech)** is the state’s electronic nerve center, providing information technology services to state agencies, higher education, counties, cities, and school districts. InterTech offers voice, data, and video telecommunications network services; business recovery; and computer network server support.
- ⇒ **Facilities Management Bureau (FMB)** is the state’s architect, building inspector, leasing and land acquisition/disposition specialists, landlord, gardener, and state building custodian.
- ⇒ **Management Services Bureau (MSB)** includes the agency’s legislative, communications, administrative, and inter-agency support and consulting functions as well as several specialized services that include fiscal agent and public affairs responsibilities.

Operations

Admin serves multiple customers, including state agencies and constitutional offices, political subdivisions, the legislature, government employees, and citizens of the state. Admin provides four types of services to its customers:

- ⇒ **Marketplace Services** include internal service fund activities. Customers have freedom of choice when selecting vendors for products or services and choose to do business with Admin when superior service and value is provided. These services include management consulting services, vehicle leasing, sale of office supplies, sale of surplus property, insurance services, printing, sale of state documents, micrographics, and records storage.

- ⇒ **Utility Services** are similar to cooperatives in that the aggregation of demand is one of the primary benefits the utility provides. These services include data processing, telecommunications, 911 emergency telephone services, maintenance and grounds services, parking services, and mail operations.
- ⇒ **Compliance Services** are those that work to achieve compliance with laws, rules, standards, norms, and other expectations. These include information policy analysis, internal financial, audit and some human resources services, professional and technical contracting, leasing and land acquisition/disposition, and building codes and standards.
- ⇒ **Leadership Services** are those that provide statewide leadership on various issues. Leadership expertise within Admin focuses on technology architecture, NorthStar web site, electronic government services, facilities siting and building construction, resource recycling/recovery services, energy management, state archaeologist, and assistance to disabled individuals throughout the state.

Budget

The Department of Administration is funded through various sources including general, special revenue, federal, agency, gift, and internal service/enterprise funds.

- ⇒ General funds are primarily used for operations with statewide significance, including functions such as procurement, energy management, resource recovery, building construction, information policy analysis, and pass through grants. The Minnesota Legislature appropriates these funds.
- ⇒ Special Revenue funds are fee based and include 911 emergency services funds collected through monthly statewide subscriber fees, and building codes permits and surcharges for plan reviews, inspections and licenses.
- ⇒ The Developmental Disabilities Council and the STAR Program secure federal funds through the U.S. Department of Health and Human Services, and the U.S. Department of Education. Gift funds are donations accepted for the Governor's Residence Council.
- ⇒ Agency funds are pass through funds from state agencies for postage and state employees for bus cards.
- ⇒ Internal Service/Enterprise funds are the largest source of funds for the agency. Internal Service funds come through fees charged to state agencies for internal support services including insurance, printing, consulting, computer services, telecommunications, and leasing of facilities under the custodial control of Admin. These activities prepare annual business plans and develop rate structures for product and service offerings. Enterprise funds come through fees charged to governmental entities, citizens and businesses bookstore, surplus property, and cooperative purchasing products and services.

Many challenges are faced with hiring and maintaining a highly qualified staff to operate the many and varied divisions of the agency. Staffing numbers are constantly changing, and in FY 2002, the agency had 956 employees.

Program Description

The purpose of the Operations Management Bureau (OMB) is to provide a broad range of operating support services to state government. These services are provided as cost-effective alternatives to decentralized administrative services. OMB strives to honor the agency mission by providing "services of such high quality and value that they are sought after by its customers."

Budget Activities Included:

- ⇒ Risk Management
- ⇒ Materials Management
- ⇒ MMD Central Stores
- ⇒ Travel Management
- ⇒ Communications Media

Further detail on each of these Budget Activities is included in subsequent pages of this budget document.

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: RISK MANAGEMENT

Narrative

Activity Description

The Risk Management Division (RMD), operating under legislative authority of M.S. 16B.85, provides three major areas of service to state agencies, departments, boards, and commissions:

- ◆ manage the Risk Management Fund (RMF), which operates as the state's internal insurance company providing property and casualty insurance coverage;
- ◆ purchase commercial insurance to meet agencies' needs when the placement of the insurance may not be appropriate in the RMF; and
- ◆ provide risk and insurance management consulting services on a wide variety of issues.

Activity at a Glance

- ◆ Serves over 100 state agencies, departments, boards, and commissions.
- ◆ Property values insured total more than \$7 billion.
- ◆ Insure 13,500 state vehicles.
- ◆ Handled 1,412 new claims in FY 2002.

Population Served

State of Minnesota agencies, departments, boards and commissions, and political subdivisions.

Services Provided

The RMD, through the RMF, offers five major lines of insurance. Those lines are auto liability, auto comprehensive and collision, general liability, property, boiler and machinery, and other miscellaneous lines that provide coverages that meet specific agency needs. Reinsurance is purchased to provide protection to the RMF against catastrophic or annual aggregation of property losses.

When unique types of coverage are needed, the RMD assists state agencies with purchasing appropriate insurance if self-insurance of the risk is not deemed appropriate for the RMF.

The RMD does not provide grants, regulate activity, or set or enforce standards.

The RMD has an Advisory Committee made up of representatives from state agencies, academia, and the private sector.

Historical Perspective

The legislature created the RMD in 1986 in response to the hard casualty insurance marketplace and the expectation that the state might not have been able to obtain auto liability insurance. The RMD started 1-01-87.

In 1988, the first commercial general liability insurance was underwritten by the RMF. In 1994, automobile comprehensive and collision insurance was offered. In 1996, the RMF started to offer a full line of property and casualty insurance coverages with the creation of Minnesota State Colleges and Universities (MnSCU) and their desire to have a comprehensive insurance program. Since that time, there has been a growing list of clients, which is now expanded (by legislation) to include political subdivisions.

The most critical issue facing the RMF is the uncertainty of the reinsurance market as a result of 9-11-01 terrorist attacks. The reinsurance market provides protection against catastrophic property losses and the aggregation of property claims in one year that could impair the financial integrity of the RMF. RMD was successful in obtaining coverage in FY 2003, but only after a cost increase of 286%. The rate increase to clients is 191%. The additional increase is being absorbed by the RMF. Continued uncertainty is expected because of a lack of terrorism insurance and the impacts of a weakening economy and major industry bankruptcies.

Key Measures

The goal of the RMF is to provide insurance at a lower cost than the traditional insurance market. One measure is to compare industry overhead to the RMF. Over the past five years, the performance has been as follows:

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: RISK MANAGEMENT

Narrative

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 |
|--|-------|------|------|------|-------------|
| Industry Average Operating Expense Ratio | 29.95 | 30.5 | 30.6 | 28.6 | 29.0 (est.) |
| RMD Operating Expense Ratio | 10.4 | 12.7 | 16.8 | 16.8 | 24.0 (est.) |

The large increase in the RMD operating ratio is a one-time event, in great part because of the development of a new Risk Management Information System that will be operational in FY 2003. Another key factor is the increase in reinsurance costs that reduces the revenue base, which results in a higher expense ratio.

Activity Funding

RMD operates as an Internal Service Fund, charging fees based on insurance options requested by customers. RMD had 10 *full-time equivalents* on 7-01-02.

There are no *loans from the General Fund, or proposed investments in technology or equipment of \$100,000 or more.*

Operating Losses/Increases in Retained Earnings:

The retained earnings decreased by \$55,763 in FY 2002 due to increases in claims.

Dividends represent the return of premium for superior loss and expense experience. Premiums collected are invested by the State Board of Investment (SBI). The difference between premium and investment, less deductions for losses incurred and administrative expenses, equals the amount of funds that are eligible for dividend declaration. In the event of unsatisfactory experience, it is possible that no dividend will be declared.

In 2002, the calculated dividend was \$1,451,374. Based upon the fact that the RMF was absorbing the increased reinsurance costs, higher deductibles, and aggregation of losses, it was the decision of the Risk Management Advisory Committee to withhold payment of the dividend in order to preserve the financial integrity of the RMF.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-----------------------|--------|---------|---------|--------|-------|----------|
| Rate Change (by line) | | | | | | |
| Auto Liability | .50% | (6.25%) | (9.23%) | 6.78% | .00% | (11.64%) |
| Auto Physical Damage | 18.20% | 59.00% | (4.95%) | 17.65% | 3.86% | .00% |
| General Liability | .00% | .00% | 14.45% | .00% | .00% | (6.12%) |
| Property | .00% | .00% | .00% | .00% | .00% | 191.31% |
| Other | .00% | .00% | .00% | .00% | .00% | .00% |
| Rate Change Average | 2.68% | 2.40% | 2.77% | 12.21% | 1.46% | 27.10% |

Factors contributing to changes in premium rates:

- ◆ loss experience variation;
- ◆ increased claim potential due to additional volume;
- ◆ increased need to be proactive in risk management, loss control, and computer security; and
- ◆ violent fluctuations of the reinsurance marketplace. (In FY 2003, reinsurance costs increased 286%.)

Impact of Rate Changes:

Assuming the same volume and mix, the five largest customers will pay approximately 31.32% more in FY 2003. Early indications in FY 2003 are that customers will decrease the amount of deductible and increase the amount of insured value, which will lead to premium increases. The five largest customers in FY 2002 were MnSCU and the departments of Administration, Natural Resources, Transportation, and Corrections.

|------------------------------------|------------|------------|------------|-------------|-------------|

Activity Description

The Materials Management Division (MMD) acquires goods and services and disposes of surplus property using methods that ensure the best value for the taxpayers' dollars and conform to the standards of public procurement. The division facilitates and oversees more than \$1.2 billion annually in state government purchases each year. The statutory framework for the division's activities is M.S. Chapter 16C – State Procurement.

Population Served

MMD operates in close partnership with state agencies to achieve a productive balance of centralized and delegated purchasing. Statewide and multi-state contracts negotiated by MMD currently serve more than 450 government entities, including 40 other states and Minnesota's political subdivisions. MMD also works with Minnesota and out-of-state businesses to ensure fair competition and resolve vendor performance issues.

MMD's Surplus Services operation serves a population including state agencies, political subdivisions, various nonprofit organizations, and – with respect to its auction and "garage sale" programs – the general public.

Services Provided

The division provides a mix of direct services and compliance activities:

- ◆ purchasing and contracting for goods, services, and utilities;
- ◆ recruiting and managing vendors;
- ◆ promoting environmentally sensitive purchasing;
- ◆ managing procurement functions through Minnesota Accounting and Procurement System (MAPS);
- ◆ reviewing and overseeing professional/technical contracts;
- ◆ monitoring compliance with state procurement law and policy;
- ◆ managing federal and state surplus property; and
- ◆ operating a cooperative purchasing program for Minnesota's political subdivisions and a pharmaceutical purchasing program on behalf of 41 states.

Historical Perspective

Minnesota's procurement laws attempt to balance numerous interests, including those of state agencies, vendors, small businesses, minority- or female-owned or economically disadvantaged businesses, environmental advocates, correctional industries, the visually impaired, and others. The legislature re-wrote Minnesota's procurement laws in 1998, reducing the number of mandates and moving from a "low-bid" to "best value" philosophy of procurement. MMD concurrently shifted to a less centralized approach where unlimited authority can be delegated to purchasing staff within agencies if they have demonstrated their competence and adherence to state standards. These changes have allowed MMD to reduce its role with respect to one-time, low-dollar-value purchases and to concentrate on the more complex procurements, including contracts that aggregate public purchasing dollars to achieve volume discounts.

Recent developments include heightened attention to professional/technical contracts and MMD's role in contract oversight. Both the Office of the Legislative Auditor and MMD (working with Administration's Management Analysis Division) have undertaken assessments of this issue.

Key Measures

Efficiency in procurement processing: MMD tracks the number of working days from an agency requisitioning a commodity or service to issuing a purchase order. During FY 2002, agencies indicated that they needed the order issued in an average of 44.72 days. MMD issued these orders in an average 13.15 days.

Activity at a Glance

- ◆ Oversees \$1.2 billion annually in state government purchasing.
- ◆ Negotiates volume discounts for more than 450 government entities, including Minnesota's political subdivisions. Purchases from these contracts exceed \$600 million annually.
- ◆ Reviews over 2,500 professional/technical contracts per year in an average of 2.76 days.

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: MATERIALS MANAGEMENT

Narrative

Efficiency in reviewing and approving contracts: MMD attempts to review 80% of all professional/technical contracts within five days of receipt. Through May of FY 2002, 78.35% met that standard. However, approximately 30% were approved on the day of receipt and the average processing time was 2.76 working days.

Availability of decentralized options to state agencies: MMD's goal is to make training available to 95% of all agency staff seeking delegated purchasing authority. The success rate was 96% in FY 2000 and rose to 100% in FY 2002.

Effectiveness in reuse of government property: Recycling surplus property meets both environmental and fiscal objectives. MMD's Surplus Services measures success by meeting its sales goals. The goal for FY 2002 was to meet or beat the record sales level of \$1,123,762 from the previous year. The goal was attained with net sales of approximately \$1,188,000.

Activity Funding

MMD's General Fund appropriation covers costs associated with delivery of centralized procurement services as well as oversight of delegated purchasing and professional/technical contracts. Surplus services and the division's cooperative purchasing programs are self-sustaining enterprise funds.

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: MMD CENTRAL STORES

Narrative

Activity Description

Materials Management Division (MMD) Central Stores is the state's distribution center for office supplies. Government entities benefit from one-stop shopping with pricing well below the competition plus free, prompt delivery.

Population Served

Central Stores provides products to the three branches of state government plus other governmental entities. Its largest customers are executive branch state agencies, accounting for 84.51% of sales. Central Stores also serves Minnesota cities, counties, and school districts. Its customers are not required to purchase through Stores.

Activity at a Glance

- ◆ Price comparison shows 39.8% savings to government on office products.
- ◆ Electronic orders via Central Stores web site now account for 42% of eligible purchases.
- ◆ Stores subsidizes chlorine-free, 100% recycled content paper and offers more than 3,000 other products with recycled content.

Services Provided

The following services are provided:

- ◆ sales and distribution of 948 stock items;
- ◆ catalog offering approximately 22,000 additional non-stock items at below-wholesale pricing;
- ◆ convenient "shopping cart" ordering through the Internet added to traditional fax and mail orders;
- ◆ free statewide delivery and central billing;
- ◆ product shows for customers; and
- ◆ guaranteed replacement for defective products or lost shipments.

Historical Perspective

Central Stores has been in business since 1939. It has not increased its markup rates since FY 1999.

Key Measures

Savings to state and local government: Central Stores conducts an annual price comparison with a major private sector competitor. The goal is to compare at least 45% of Central Stores' sales and demonstrate savings of 30% or more. In FY 2001, a market-basket comparison of 61% of the prior year's sales showed a cost savings to government of 31.4%. In FY 2002, the savings were calculated at 39.8% and compared 60% of the prior year's sales. Additionally, Stores has no add-on charges for shipping or minimum orders.

Efficiency in order processing: Stores implemented an Internet shopping cart service in May 2000. Staff members at both Stores and the agencies ordering office products benefit from the efficiencies of electronic procurement (less redundancy in forms and data entry, instant receipt of incoming orders, etc.). The goal of receiving 40% of Stores' eligible orders via the Internet in FY 2002 was exceeded by 2%.

Leadership in environmental stewardship: Central Stores attempts to grow the share of its sales for products containing recycled content. In FY 2002, 37.20% of stock and non-stock sales was for recycled content products. In FY 2001, that amount was 36.55%.

Activity Funding

Central Stores is an Internal Service Fund that receives no legislative appropriation and competes in the marketplace for its business. Operating costs are recovered and prices are determined by adding a markup to the cost of inventory purchased. In FY 2001, Stores sold \$8.5 million in products to government entities. In FY 2002, that number was \$7.7 million.

Stores operated with a staff of 12.65 *full-time equivalents* as of 7-01-02.

Central Stores does not have a *General Fund loan* or any *proposed investments in technology or equipment of \$100,000 or more*.

ADMINISTRATION DEPT**Program: OPERATIONS MANAGEMENT BUREAU****Activity: MMD CENTRAL STORES**

Narrative

Operating Losses/Increases in Retained Earnings:

Central Stores has experienced no operating losses. Central Stores' retained earnings increased by \$30,324 in FY 2002 and are expected to increase by approximately \$46,300 in FY 2003. Growth in retained earnings can be attributed to strong sales, low operating costs and -- primarily -- a five-year-contract offering substantial discounts on miscellaneous office products that will expire in May 2003.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|------|-------|-------|------|------|------|
| Change | 0% | 7.27% | 3.39% | 0% | 0% | 0% |

Impact of Rate Changes:

Stores' rates have remained quite stable. Assuming the same volume and mix of goods/services as used in FY 2002, Central Stores' customers will pay approximately the same in FY 2003. The five largest customers in FY 2002 were the Department of Transportation – Central Office; Department of Health; Department of Children, Families and Learning; Department of Transportation – Roseville Office; and the Department of Commerce.

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: TRAVEL MANAGEMENT

Narrative

Activity Description

The Travel Management Division (TMD) supplies vehicles to state programs for use in the conduct of official state business. TMD also supplies vehicles to political subdivisions. TMD supplies support services for these vehicles including maintenance, fuel, and insurance.

Population Served

TMD provides vehicles to all branches of state government and political sub-divisions including cities, counties, and school districts.

Services Provided

TMD operates a long-term rental program providing a wide variety of passenger vehicles and light trucks. These vehicles are packaged with vehicle services to provide a complete, easy to use transportation solution. Long-term rentals account for approximately 96% of the TMD fleet.

TMD operates a short-term rental program that provides basic passenger vehicles on a daily rental basis. Short-term rentals account for approximately 4% of the TMD fleet.

Historical Perspective

TMD was established in 1961 to help state agencies effectively meet transportation needs. It has grown and evolved over the years to more effectively address the growing and changing needs of state government. TMD has expanded the types of vehicles provided, moving into a greater variety of light trucks. Vehicle life cycles are now tailored to better meet varying customer work requirements.

Key Measures

TMD has an ongoing customer satisfaction survey effort in place. Over 1,100 TMD customers have responded to this survey covering timeliness, quality, courtesy, and ease of process. Ninety-five percent of respondents have indicated they are satisfied or very satisfied with TMD customer service.

Activity Funding

Travel Management operates as an Internal Service Fund. No money is appropriated to TMD from the state's General Fund. The current state budget crisis has caused TMD to refocus on core functions, dropping or reducing non-core functions. On-site vehicle shop services have been reduced to include only basic vehicle maintenance. All complex repairs are now farmed out to private vendors. TMD energy is focused on the core function, long- and short-term vehicle rental programs.

As of 7-1-02, TMD had a total of 20 *full-time equivalents* (FTEs). Four FTE positions have been eliminated in the process of reducing non-core functions.

General Fund Loans:

General Fund loans are used to refinance master lease loans so that the repayment schedules work within the division's cash flow constraints. The division purchases new vehicles on a regular replacement schedule throughout the year. Cash flow issues arise due to the need to pay for the purchase of fleet vehicles when received, but receiving reimbursement for use of the vehicle over an extended period of time. TMD's General Fund loan balance as of 6-30-02 is \$4,933,332 with payments scheduled through February 2003.

TMD does not have any *proposed investments in technology or equipment of \$100,000 or more*.

Operating Losses/Increases in Retained Earnings:

FY 2002 retained earnings decreased by approximately \$598,000 due to the increase in depreciation expense.

Activity at a Glance

- ◆ Provides long-term rental vehicles and vehicle support services to state program and political subdivisions.
- ◆ Operates a daily rental program serving state programs in the St. Paul area.

ADMINISTRATION DEPT**Program: OPERATIONS MANAGEMENT BUREAU****Activity: TRAVEL MANAGEMENT**

Narrative

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|-------|--------|--------|------|------|------|
| Change | 13.0% | (3.4%) | (1.5%) | 4.9% | 6.0% | 7.1% |

The TMD short-term rental program has a history of very low rates. In an effort to have this program become more self-supporting, rates were dramatically raised beginning in July. The average rate increase for FY 2003 was 48%.

TMD is implementing a new rate structure for all new long-term rental vehicles. Vehicle rates will be calculated on an individual vehicle basis, taking into account acquisition cost, fuel economy, and life cycle. This rate structure offers TMD customers more flexibility in managing vehicle expenses. It more closely resembles private long-term rental programs. Rates are designed to charge fairly for many different vehicle types, sizes, and uses. Along with improving customer service, this change will enable TMD to keep better pace with costs in the automotive industry.

Existing long-term rental vehicle rates were raised 6% beginning in July.

More information concerning TMD short-term and long-term rates can be found on the TMD web site, and in the FY 2003 TMD Business Plan.

Impact of Rate Changes:

Assuming the same volume and mix of services as used in FY 2002, TMD's customers will pay approximately 7.1% more in FY 2003. TMD's five largest customers are the departments of Human Services, Corrections, Agriculture, Health, and Minnesota State Colleges and Universities (MnSCU). These entities account for over half of TMD business.

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: COMMUNICATIONS MEDIA

Narrative

Activity Description

The Communications Media Division provides a variety of publishing and distribution services to state and local units of government through four major businesses: PrintComm, Minnesota's Bookstore, MailComm, and DocuComm. Division work is outlined in several sections of Minnesota Statutes: Chapter 14 (**State Register**); 16B.47 (DocuComm) 16B.49 (MailComm); 16B.50 (PrintComm) and 16B.51 & 52 (Minnesota's Bookstore).

Population Served

- ◆ State government
- ◆ Local units of government
- ◆ General public (Minnesota's Bookstore)

Activity at a Glance

- ◆ Minnesota's Bookstore will serve more than 70,000 customers during FY 2003.
- ◆ MailComm will generate nearly \$1 million in postage savings during FY 2003 though its automation services.
- ◆ PrintComm will continue to demonstrate its commitment to the environment through participation in the *Great Printers* project – 90% of printing will be on paper with a 30% minimum of post-consumer waste during FY 2003.

Services Provided

PrintComm (predominant customers are state agencies) provides a variety of graphic services to Minnesota government.

Minnesota's Bookstore (predominant customers are the general public) provides services to the general public and state agencies through

1. The Minnesota's Bookstore – a centralized publishing house for state agency-produced products located in the Ford Building near the State Capitol;
2. The State of Minnesota Mailing List Service – a centralized production and distribution outlet for the sale of selected state public licensing data to a national customer base; and
3. The **State Register** and the **Solicitation Announcements**.

MailComm provides a mailing service including metering and processing of all outgoing federal mail for agencies within the boundaries of St. Paul. This unit also provides inter-office services to all state agencies within St. Paul and has the responsibility for distributing the federal mail for the Capitol Complex. MailComm also provides addressing and inserting services (Internal Service Fund – predominant customers are state agencies) resulting in reduced postage costs to state agencies. During FY 2002, MailComm helped generate nearly \$1 million in postage savings through in-house bar coding and ink-jet addressing.

DocuComm (predominant customers are state agencies) provides document management services to state agencies and local units of government. These services include conversion of paper records to microfilm or compact disk, secure warehouse storage, retrievals of files and electronic back-ups, conversion of microfilm or electronic data to compact disk, and production of computer output microfilm.

Historical Perspective

State agencies are generally not required to use state operations for printing, addressing, inserting, and records management. Because of this, the division places great emphasis on customer service, timeliness, turnaround, quality, and competitive pricing. There is one exception – state agencies within the boundaries of St. Paul are required to use MailComm's mail handling and processing services for outgoing mail. This centralized operation allows small and large agencies to collectively achieve postage savings through the use of MailComm's bar-coding and ink-jet addressing equipment and also helps to realize operational efficiencies such as staffing, equipment, and space.

Key Measures

The division's measurable objectives include:

- ⇒ Maintaining printing prices that are at least 5% below private-sector pricing averages. A pricing study completed during FY 2000 showed PrintComm was, on average, 35.9% below the market on smaller jobs and

ADMINISTRATION DEPT

Program: OPERATIONS MANAGEMENT BUREAU

Activity: COMMUNICATIONS MEDIA

Narrative

27.75% below the market on larger jobs. A supplemental study completed during FY 2002 showed PrintComm quick-copying pricing to be lower than the average of eight private-sector vendors in 13 of 19 categories.

- ⇒ Producing at least 90% of printing work on paper with a 30% minimum of post-consumer waste. For FY 2002, the actual figure was 95%.
- ⇒ Processing 95% of First Class mail within 24 hours. For FY 2002, the actual figure was 95.3%.

Activity Funding

Virtually all funding for the Communications Media Division comes from the products and services it sells to its customers and operates through internal service and enterprise funds -- the only General Fund appropriation in FY 2003 is to operate the mail delivery portion of MailComm. Total *full-time equivalents (FTEs)* in the division are 69 as of 7-01-02.

The Communications Media Division does not have a *General Fund loan* or any *proposed investment in technology or equipment of \$100,000 or more*.

PrintComm is projected to generate annual revenue of approximately \$4.9 million during FY 2003 from state agencies and local units of government. The number of *FTEs* within PrintComm is 35.5.

Operating Losses/Increases in Retained Earnings: FY 2002 retained earnings decreased by \$751,000 because of an operating loss sustained during the fiscal year due to sales that did not meet projections. This loss was due to declining revenues associated with the state employee strike and budget shortfall and general economic conditions of the printing industry in Minnesota. PrintComm is projected to improve its retained earnings position by \$42,000 during FY 2003.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|-------|-------|-------|-------|-------|-------|
| Change | 0.00% | 1.60% | 0.30% | 0.20% | 1.60% | 1.00% |

Impact of Rate Changes:

Assuming the same volume and mix of goods/services as used in FY 2002, PrintComm's five largest customers (Human Services; Administration; Children, Families & Learning; Revenue; and the Attorney General) will pay virtually no more in FY 2003.

Minnesota's Bookstore is projected to generate annual revenue of approximately \$230,000 for the **State Register** during FY 2003. The revenue is generated from state agencies publishing material as well as subscribers. Minnesota's Bookstore and the Mailing List Service are projected to generate approximately \$2 million in revenue annually. Most of this revenue is from the general public. The number of *FTEs* within Minnesota's Bookstore is 12.5.

Operating Losses/Increases in Retained Earnings: FY 2002 retained earnings decreased by \$31,000 due to a **State Register** operating loss sustained during the fiscal year. Minnesota's Bookstore is projected to improve its retained earnings position by \$67,000 during FY 2003.

History of Rate Changes (State Register):

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|-------|--------|-------|-------|-------|-------|
| Change | 6.00% | 22.51% | 0.00% | 0.00% | 4.92% | 5.97% |

Impact of Rate Changes:

Assuming the same volume and mix of goods/services as used in FY 2002, the **State Register's** largest customers (Labor & Industry, Pollution Control Agency, Health, Human Services, and Administration) will pay virtually no more in FY 2003 since the overall increase in revenue from the rate changes is only \$12,000.

ADMINISTRATION DEPT**Program: OPERATIONS MANAGEMENT BUREAU****Activity: COMMUNICATIONS MEDIA****Narrative**

MailComm is projected to generate annual revenue of approximately \$760,000 during FY 2003 from state agencies and local units of government. The number of *FTEs* within MailComm is 15.

Operating Losses/Increases in Retained Earnings: FY 2002 retained earnings increased by \$62,000 due to increased revenues along with reductions in expenses during the fiscal year. MailComm is projected to reduce its retained earnings position by \$2,000 during FY 2003.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|-------|-------|-------|-------|-------|-------|
| Change | 4.00% | 2.40% | 2.30% | 0.90% | 7.70% | 5.90% |

Impact of Rate Changes:

The increase in the FY 2003 rate is mostly due to the increase in the postage surcharge, which is a large percentage increase with a small dollar impact. Assuming the same volume and mix of goods/services as used in FY 2002, MailComm's five largest customers (Public Safety, Human Services, Revenue, Public Employee Retirement Association, and Minnesota State Retirement Association) will pay virtually no more in FY 2003. These largest customers also receive larger volume discounts, which help offset the increase in rates.

DocuComm is projected to generate annual revenue of approximately \$1.3 million during FY 2003 from state agencies and local units of government. The number of *FTEs* within DocuComm is six.

Operating Losses/Increases in Retained Earnings: FY 2002 retained earnings decreased by \$113,000 due to an operating loss sustained during the fiscal year. This loss was due to declining revenues associated with the state employee strike and budget shortfall. DocuComm is projected to improve its retained earnings position by \$21,000 during FY 2003.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|-------|------|----------|-------|---------|---------|
| Change | 3.01% | 2.10 | (0.012%) | 3.00% | (5.29%) | (4.13%) |

Impact of Rate Changes:

Assuming the same volume and mix of goods/services as used in FY 2002, DocuComm's five largest customers (Administration, Human Services, Attorney General, Revenue, and Secretary of State) will pay approximately the same or slightly lower in FY 2003.

Program Description

M. S. 16E requires the Office of Technology (OT) to provide leadership and direction for state information and communications technology policy. The office's mission is to ensure that the state's use of information technology improves Minnesota's businesses, schools, communities, and the lives of the state's citizens.

Population Served

OT serves those who interact and do business with the state – citizens, businesses, educators, government entities, vendors, and employees – and the agencies that serve them.

Services Provided

The Office of Technology provides an array of core complimentary services designed to lead state government in a unified direction. Major services include:

A Common Statewide Architecture

OT leads an inter-agency effort to create an enterprise technical architecture for state government:

- ⇒ Minnesota Enterprise Architecture: This architecture provides the blueprint for state technology infrastructure, outlining the principles, practices, and standards for developing and delivering consistent information systems across state agencies. This is an iterative process that has been reported in corporate settings to save as much as 15% in overall information technology (IT) costs.
- ⇒ Research from a January 2002 study showed that "...focus group participants do not know (or care) which level of government provides a service or information, they simply want to be able to easily access it." North Star is that access point to over 250 state entities and is accessed by over one million visitors per month. Electronic government, through its services, improves and strengthens relationships between citizens and their government. With the release of the new North Star portal, Minnesotans will realize a significant change in communications from their state government. When compared with the costs for developing web portals in other states including Michigan and California, OT effectively saved Minnesota upwards of \$26 million on the transformation effort of North Star.

Planning Practices and Procedures

OT provides IT planning and project management tools to all agencies to help the state set priorities and to increase the accountability of individual projects.

- ⇒ Strategic Information Resource Management Planning (SIRMP): OT manages this benchmark planning tool for state agencies. OT's SIRMP review, is an integral component in the development of the state's budget for IT-related projects.
- ⇒ Request For Proposal (RFP) approval: OT reviews all agency IT RFP's over \$100,000.
- ⇒ The Enterprise Project Management Office (PMO): Industry-standard project management procedures are required for all funded state IT projects. OT provides project management planning tools, templates, oversight, and consulting services to agency projects, and offers a training academy.
- ⇒ Master Roster and Master Contract programs: The Master Roster is a list of vendors pre-approved to provide project-related services. The Master Contract program provides agencies with a wide variety of external skill sets to augment their internal resources. OT recently increased the number of participating vendors available to provide services to state agencies by 75% in one year.

Collaborative Leadership

OT provides leadership in developing collaborative, public/private partnerships that foster statewide solutions to common and strategic technology issues.

Program at a Glance

- ◆ Manages North Star state web portal and electronic services.
- ◆ Reviews and sets priorities for \$192 million in submitted information technology (IT) project proposals in 2002-2003 biennial state budget process.
- ◆ Provided project management methodology training to 10 state agencies and provided consulting services for 30 projects.
- ◆ Serves as the steward for the statewide "Enterprise Architecture" – the technology blueprint for the state.
- ◆ Created public/private partnerships to help set priorities, screen vendors, identify new technologies, and aggregate technology purchases for state agencies and educational institutions. The Minnesota Software licensing aggregate purchase project saved the state \$209,000 over standard contract pricing.

- ⇒ The Technology Enterprise Board: The board advises the legislature, the governor, and others regarding statewide IT and telecommunications architecture and strategic plans.
- ⇒ Education and Community Initiatives: OT leads policy discussions and forums on emerging technologies; provides public information on technology issues for K-12 and higher education; and facilitates aggregated buying programs. In the first three months of operation beginning June 2002, K-12 volume purchase projects saved Minnesota schools \$735,000 over standard state contract pricing.

Historical Perspective

OT has moved from its historically more policy-based unit to one that combines enterprise-wide strategies, standards, and training with a system of checks and balances. The result is a more service and results oriented agency that provides leadership and direction for government agencies, increases accountability for stakeholders, and enables wise IT investment on an enterprise level. By emphasizing a collaborative process, OT ensures that the state's vision and strategies serve all units of government while encouraging participation and buy-in.

Key Measures

As a result of OT's work, state agencies maximize their services and minimize resources by aligning to the defined standards, products, and procedures; the state benefits from an environment of interoperability, collaboration, and leveraging of complimentary services; and the state's citizens and business partners find government services closer, more accountable, and more convenient than ever before. Key performances measures include:

- ◆ an average of 1,198 monthly hits on North Star in 2002, up from 808 in 2000;
- ◆ provided 116 online secure financial transactions electronically in 2002 and provided 3,608 non-financial online services;
- ◆ in 2002, Minnesota was ranked 77.8 (the number one state was rated 88.9) and ranked eight in the Digital State Survey, compared to a rating of 84.78 in 2001 and a ranking of 22;
- ◆ Brown University gave Minnesota an overall E-Government ranking of 37 in 2002, compared to 32 in 2001; and
- ◆ Governing Magazine Performance Project 2001 gave Minnesota a grade of B.

Program Funding

This activity is funded primarily through General Fund appropriations. State government Special Revenue Funds also fund this activity.

Program Description

The purpose of the InterTechnologies Group (ITG) is to provide data processing and telecommunications services to other state agencies and public sector entities. The mission is to serve Minnesota's public sector by delivering value-added information technology services through a shared infrastructure.

Budget Activities Included:

- ⇒ Computer Services
- ⇒ Telecom Services
- ⇒ InterTech – Other Services
- ⇒ 911 Emergency Services

Further detail on each of these Budget Activities is included in subsequent pages of this budget document.

Activity: COMPUTER SERVICES

Narrative

Activity Description

Computer Services are provided by InterTech and used by public sector entities for central and distributed data processing. This activity is described in M.S. 16B.466; *"integrate and operate the state's centralized computer facilities to serve the needs of state government."*

Population Served

Computer Services serves public sector state agencies central and distributed data processing needs including: computing, disk and tape storage, printing, data security, electronic mail, data entry, and computer-output-to-microfilm.

Activity at a Glance

InterTech Computer Services provides for state agency data storage and central processing:

- ◆ 1,352,000 online transactions processed per day;
- ◆ 73,584,000 web pages served per year;
- ◆ 12,000,000 feet of printed output per month;
- ◆ identified and prevented 22,200 hacker attempts in FY 2002; and
- ◆ identified and eradicated 137,273 viruses in 2001 and 2002.

Following is a list of InterTech's Computer Services largest customers and their applications:

Department of Human Services: PRISM (the Child Support System) and MAXIS (the eligibility determination system for AFDC (Aid for Dependent Children), food stamps, Medicaid, and other social service programs) in all 87 Minnesota counties.

Departments of Finance and Employee Relations: Statewide procurement/accounting system (MAPS) and human resources/payroll system (SEMA4).

Department of Revenue: Income tax returns and refund checks, state sales tax, and property tax records and processing.

Department of Public Safety: Criminal Justice Information System (CJIS), which is used by state, city, county, and municipal police departments and sheriffs, correctional institutions, Department of Natural Resources, and others, with ties to the FBI and other national law enforcement systems.

Department of Transportation: Computer-assisted design (CAD) applications, and the department's PROFS (electronic mail) system.

Services Provided

In supporting customers' central and distributed data processing needs, InterTech provides a variety of services:

Z-Server Services: The primary products offered in this line of service include central processing unit (CPU) batch and customer information and control system (CICS) online transactions that are run on large Z servers (System/390 systems), disk and tape storage, and input/output services. Also included are applications operating interface support, production control and scheduling, security, disaster recovery, database design and administration, and technical support of system software and equipment.

Server Management Services: The primary products offered in this service line include NT storage, Administrator, and Domino Administrator Services. Also included are services such as Web Hoteling, Minnesota eCampus Course Hosting, Domino Server Hosting, WorkSpace Minnesota, WebSphere, and Server Co-Location.

Data Entry Service: This service provides the keying of data into machine-readable form to support requirements for central or distributed computer processing.

IT Risk Mitigation Services: This service is offered to reduce security and other information technology (IT) related risks. The primary products offered in this service include Common Web Authentication Framework, Encryption Activity, Business Impact Analysis, and IT Disaster Recovery Planning.

Key Measures

InterTech actively pursues strategies to be a competitive provider of computing, telecommunication, and related services with the understanding that state agencies may pursue other service providers. To determine InterTech's competitive position, InterTech contracted with a nationally recognized outside performance measurement company, Gartner Measurement Group, to measure its performance compared to other technology providers and to measure customer satisfaction with its services.

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: COMPUTER SERVICES

Narrative

Gartner conducted assessments of InterTech's Computing Services for FY 1998, FY 1999, and FY 2000-01. In these analyses, InterTech ranked among the top most efficient companies in Gartner's total database. InterTech's Computing Services has provided a year-to-date mainframe availability of 99.7%. In addition, services delivered against business system requirements shows that for the S/390 technology InterTech has done an outstanding job of matching services to customer application requirements scoring a perfect 1.0 for effectiveness.

Activity Funding

Computer Services' finances are managed through the InterTech Internal Service Fund. Annual rates are established for services, and customer agencies are charged fees for services delivered. Expenses for personnel, hardware, software, etc., are paid for with Internal Service Fund payments. At the end of each fiscal year, the accounting objective of the fund is to break even.

InterTech Computer Services had 184.94 *full-time equivalents* as of 7-1-02.

General Fund Loans: Computer Services does not have a loan from the General Fund. InterTech does not anticipate a need for a General Fund loan during the next biennium.

Proposed Investments in Technology or Equipment of \$100,000 or more: InterTech purchases capital equipment to support customer applications. Master lease funding is utilized for the capitalized asset purchases. Computer Services equipment such as mainframe, disk, and tape equipment is depreciated over three years; all other equipment is depreciated over four years. The depreciated portion of the total cost is incorporated into usage rates.

During FY 2004-05 processing will continue to grow from existing applications' transaction increases. PRISM and MAXIS continue to grow faster than expected. SEMA4 has begun an upgrade approved by the 1999 legislature that is projected to add 12% increased CPU workload. Growth in storage requirements will come from across the entire customer base. InterTech will continue a "just-in-time" strategy to provide storage when needed but not maintain an excess. Print volumes continue to decline as online viewing becomes more prevalent; thus, no significant upgrades to printers are anticipated.

Anticipated equipment purchases greater than \$100,000 needed to meet these customer application capacity needs include:

- ◆ additional processing capacity of 200 millions of instructions per second (MIPS) in both FY 2004 and FY 2005 at a cost of \$500,000 each year;
- ◆ \$100,000 in FY 2004 for the connection device, Enterprise System Connection (ESCON); and
- ◆ \$1,000,000 in FY 2004 for uninterrupted power service (UPS) battery replacement systems.

Operating Losses/Increases in Retained Earnings: During FY 1994, Computer Services and Telecom Services Internal Service Funds were merged into one fund. Retained earnings are managed at the InterTech level and are managed according to federal requirements. These requirements state that the retained earnings balance cannot exceed two months of operating expenses. The federal government does not recognize depreciation as an operating expense in its calculation. In FY 2002, depreciation expense for Computer Services was \$3.6 million.

InterTech's budget goal is to break even by the end of each fiscal year. However, if customer usage is higher/lower than forecasts, increases/decreases in retained earnings occur. Over the years, Computer Services' products have exceeded budget forecasts, causing increases in retained earnings. The earnings above guidelines have been refunded to InterTech's customers.

Computer Services Retained Earnings decreased by \$2.0 million from FY 2001 to FY 2002. The primary reason for this decrease was a payment to the federal government.

ADMINISTRATION DEPT**Program: INTERTECHNOLOGIES GROUP****Activity: COMPUTER SERVICES**

Narrative

History of Rates:

| | | | | | | |
|-------------|------|------|------|------|-------|------|
| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
| Change | 0% | (8%) | (9%) | (8%) | (13%) | (4%) |

Historically, major Computer Services rates, except for print, have continued to decrease. This is primarily due to increases in customer usage and decreases in equipment costs.

Impact of Rate Changes:

While most Computer Services' rates continue to decrease, total cost to customers increases as customer usage increases. Customers whose usage remains stable receive the overall benefit of lower rates. The five largest customers are departments of Human Services, Finance, Economic Security, Public Safety, and Revenue.

Activity Description

InterTech's Telecommunications Services connect public entities throughout Minnesota by transporting voice, data, and video transmissions over a shared network infrastructure. This activity is described in M.S. 16B.46: "... shall supervise and control all state telecommunication facilities and services-" and M.S. 16B.465 "... has the responsibility for planning, development, and operations of the state information infrastructure in order to provide cost-effective telecommunication transmission services."

Population Served

InterTech's largest Telecommunication Services users are: Minnesota State Colleges and Universities (MnSCU), the University of Minnesota (U of M), the departments of Human Services, Public Safety, Transportation, Economic Security, Corrections, and Natural Resources, and hundreds of Minnesota school districts and public libraries.

Activity at a Glance

- ◆ InterTech provides voice, data, and video telecommunications services for public entities, utilizing owned and operated hubs connected by circuits leased from private sector vendors.
- ◆ InterTech serves over 100 state agencies and boards, over 125 counties and municipalities, all of the MnSCU and U of M campuses, and hundreds of schools and libraries.
- ◆ The integrated statewide data network employs more than 850 routers.

Services Provided

The objective of the InterTechnologies Group (ITG) is to provide its customers telecommunication services that are secure and reliable at competitive rates. InterTech aggregates the needs of the public sector and negotiates favorable contracts with telephone providers and carriers to obtain volume discounts that lower costs to all users. Telecommunications Services aggregates and integrates usage to ensure efficient utilization of available capacities.

Voice: The voice product line includes local service, long distance, and enhanced voice services. The primary products for local service include Centrex, business lines, special circuits, and foreign language interpretation services. Long distance includes switched, dedicated, toll-free and 900 services, calling cards, and audio conferencing. Enhanced voice offers voice mailboxes, call processing applications, central office-based automatic call distribution (CO-ACD), and integrated services digital network (ISDN) service.

Data Network Services: The data network services product line consists of a suite of hardware, bandwidth, and Internet services that provide customers with wide area network solutions tailored to their data connectivity and computer applications requirements. Data services are provisioned over a secure and reliable leased-line network known as MNet. Network services include a range of leased-line and dial-up access services using internet protocol (IP) and asynchronous transfer mode (ATM) digital network connections to MNet; reliable and secure wide area bandwidth; 24x7x365 network monitoring and management; customer assistance for network design; and community router service access to state-run applications between state and local governments as well as shared access to the Internet.

Video Wide Area Network Services: The video network services product line offers a suite of video conference services and resources to enable interactive services on the same wide area network supporting data services. Services focus on integrating counties, agencies, schools, and higher education on a common, standards-based two-way interactive video network to enable cross-organizational real-time multimedia communications. The network supports over 10,000 video events annually that improve public service delivery in many ways. Interactive video conferencing boosts productivity, expands educational opportunities, speeds decision making, and reduces travel time and expenses. Service solutions include a common web-based conference scheduling service, multipoint video conference bridging, user training, interactive site information, and video conferencing support. In addition to two-way interactive video, web-based IP audio/video streaming services are also available to deliver live and recorded audio/video content available for viewing across the Internet.

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: TELECOM SERVICES

Narrative

Key Measures

InterTech actively pursues strategies to be a competitive provider of computing, telecommunication, and related services with the understanding that state agencies may pursue other service providers. To determine its competitive position, InterTech contracted with a nationally recognized outside performance measurement company, The Gartner Measurement Group, to measure InterTech's performance compared to other telecom service providers and to measure customer satisfaction with its services.

The Gartner Measurement Group reviewed three distinct areas of Telecommunications Services in FY 2001: Wide Area Data Network, Long Distance Network, and the statewide Centrex and Voice Mail Service. The cost-efficiency rating of the Wide Area Data Network is among the top 10% of organizations studied by Gartner. InterTech's actual cost to maintain the data network is 51% less than the peer group average of similar organizations would spend to support the same workload. The overall cost-per-minute for both outbound and inbound long distance calls is 20% less than that of the peer group average. The cost per Centrex phone station, including voice mail, is 45% less than the peer group average. The cost per software moves, adds, and changes to support Centrex phone stations is 28% less than the peer group average. InterTech plans an updated study for the fiscal year ending 6-30-02.

In FY 2002, the data network availability was 99.9%, and video sessions exceeded 97% on-time start.

Activity Funding

Telecommunications Services' finances are managed through the InterTech Internal Service Fund. Annually, InterTech establishes rates for services, and then InterTech charges customers for services delivered. Internal Service Fund payments cover the expenses for personnel, communications, hardware, etc. At the end of each fiscal year, the accounting objective of the Internal Service Fund is to break even.

InterTech Telecommunications Services had 111.48 *full-time equivalents* as of 7-01-02.

General Fund Loans: Telecommunication Services does not have a loan from the General Fund. InterTech does not anticipate a need for a General Fund loan during the next biennium.

InterTech purchases capital voice, data, and video network equipment to support customer applications and then depreciates the equipment over four years with the depreciation expense incorporated into the rates. Individual pieces of network equipment normally cost less than \$100,000. However, in aggregate, InterTech anticipates spending \$4.0 million during FY 2004-05 with depreciation (rate) impact of \$250,000 in FY 2004 and \$750,000 in FY 2005.

During FY 2004-05, InterTech does not plan any significant capital purchases for local, enhanced, and long distance voice services. However, the changing state of voice technologies is requiring InterTech to re-examine and reposition the portfolio of voice services offered by InterTech. This may result in new or eliminated services during FY 2004-05. ITG is aware of the current volatility in the telecom sector and closely monitors the changing situations on behalf of its customers. InterTech anticipates continued growth in the data and video network areas.

Proposed Investments in Technology and Equipment of \$100,000 or more:

- ◆ \$750,000 for upgrade of routers required to provide quality of service for H.323 video;
- ◆ \$550,000 for 200 upgrades of 2500-Series routers to 2600-Series routers required to provide quality of service for H.323 video; 2500-Series routers do not provide this feature;
- ◆ \$500,000 for optical fiber for backbone connections;
- ◆ \$275,000 for 200 channel service units/digital service units (CSU/DSUs) that will be used at new network sites due to general network expansion and the upgrade of 56 kb to T1 sites;
- ◆ \$250,000 for routers for new customers related to the new CSU/DSUs;
- ◆ \$300,000 for bridging H.323 to H320, using 1 Accord MCU (multipoint control unit) to provide a bridging and multi-point conferencing service to both types of video customers;

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: TELECOM SERVICES

Narrative

- ♦ \$150,000 for 8540 and 8510 switches for additional hubs and mini-hubs required by general network expansion;
- ♦ \$100,000 for optical fiber repeaters for backbone connection; and
- ♦ \$200,000 for core router additions related to 8540 switches and general network expansion.

Operating Losses/Increases in Retained Earnings: During FY 1994, Computer Services and Telecom Services revolving funds were merged into one fund. InterTech manages retained earnings according to federal requirements. These requirements state that the retained earnings balance cannot exceed two months of operating expenses. The federal government does not recognize depreciation as an operating expense in this calculation. In FY 2002, depreciation expense for Telecom Services was \$1.9 million.

Telecom Services has not contributed to InterTech's overall retained earnings balance.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|------|------|------|------|------|------|
| Change | 1% | 1% | (2%) | 2% | 0% | (5%) |

The market within the telecommunications industry, particularly for local and long distance services, is becoming increasingly competitive and complex, which puts additional pressure on InterTech's rate structure. InterTech's local telephone service and voice mail rates have continued to remain highly competitive with industry standards for similar business enterprise services. Long distance rates have continued to decrease. Rates for the integrated statewide data network have been flat or decreased.

Factors that contribute to rate changes include FCC-mandated fees and new vendor contracts. Rates are also impacted by service network complexity, bandwidth, and number of locations.

Impact of Rate Changes:

Customers whose usage remains stable receive the overall benefit of lower rates in FY 2003 by paying less. The five largest customers are MnSCU, and the departments of Human Services, Public Safety, Transportation, and Economic Security.

Activity Description

InterTech's Communication Center provides support and maintenance of the state of Minnesota's telephone directory database.

Population Served

General Fund services delivered by InterTech are used by public sector agencies, public and private K-12 and higher education institutions, local governments, libraries, and citizens.

Services Provided

The current funding is to support and maintain the telephone directory database of governmental organizations, locations, and telephone numbers through specialized database software and hardware. The current telephone directory database that is being maintained supports all the hierarchical relationship of an agency both in the metro and outstate Minnesota (blue pages) and outstate Minnesota state agency pages.

Electronic Government Services – Security Infrastructure - The implementation of Electronic Government Services (EGS) requires a common security infrastructure that will allow both government and citizen access to data currently stored on the state of Minnesota's shared mainframe computers and servers.

Electronic Government Services – Directory Services Technology - Directory Services defines the "what" in "what systems are available to different EGS users." Directory Services focuses on the data-specific aspects of EGS: the application of technology to identify individuals, ensure that they are authorized, verify their digital identity, direct them to the information required, and secure the information transferred during a transaction.

Key Measures

Maintain telephone directory hierarchical database for metro and outstate agencies.

Electronic Government Services accomplishments:

- ◆ Conducted security assessments that identified potential computer exposures and defined corrective actions to mitigate or eliminate exposures.
- ◆ Implemented multiple zones of firewall and intrusion detection systems technology on the S/390, LAN and WAN environments to increase the number of safeguards and level of security assurance.
- ◆ Implemented firewall and Intrusion Detection System technology for the Department of Trade & Economic Development and the Office of Technology (OT) hardware (North Star) housed at the data center to provide an additional layer of defense.

Electronic Government Services accomplishments:

- ◆ State of Readiness for the New Millennium: The project researched, reviewed and implemented virus prevention software for Directory Services during December 1999. This was part of the due diligence action for Y2K to safeguard the state e-mail environment. This proved to be a prudent and effective safeguard. This anti-virus software has identified, eradicated, and prevented 75,089 viruses from entering the state of Minnesota's e-mail environment during calendar year 2001.
- ◆ Common Authentication Framework for EGS Application Initiatives: This project included technical and business process discussions with potential technology providers in an effort to align the state's business and technical requirements with commercially available solutions. The project concluded with the selection, development and pilot deployment of common authentication services software as part of the state's EGS directory services infrastructure. Based upon the requirements defined, procurement and deployment of the solution began in the winter of 2001 for selected applications. InterTechnologies Group (ITG) is currently working with the Department of Human Services and OT to deliver this common authentication for their technology systems.
- ◆ EGS White Pages: ITG delivered a searchable database of all state employees, accessible through the North Star portal, and completed the "white pages" enhancement project. ITG built an ongoing process that allows technology to assist agencies with improving the accuracy of the data in SEMA4 and

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: ITG OTHER SERVICES

Narrative

eliminates manual updating previously required to create the printed phone directory. Staff collapsed the old manual updates of two sources into a single automated update of the SEMA4 system in April of 2001.

Activity Funding

The Communication Center is managed through the General Fund. A General Fund appropriation of \$1,400,000 was received in FY 2000 and made available until 6-30-03 for the EGS – Security Infrastructure. A General Fund appropriation of \$2,075,000 was received in FY 2000 and made available until 6-30-03 for the EGS – Directory Services Technology.

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: 911 EMERGENCY SERVICES

Narrative

Activity Description

The Minnesota Statewide 9-1-1 Program within the Department of Administration (1) oversees 9-1-1 system standards; (2) provides technical assistance to cities and counties to implement, maintain, and improve 9-1-1 systems; (3) manages the state's share of contracted wired and wireless 9-1-1 costs authorized by M.S. 403.11; (4) administers grant funds for 9-1-1 Public Safety Answering Points (PSAPs) in accordance with M.S. 403.113; and (5) distributes funds to the Metropolitan Radio Board in accordance with M.S. 473.901.

Activity at a Glance

The following activity statistics help illustrate the size and scope of the Minnesota Statewide 9-1-1 Program:

- ◆ 100% statewide 9-1-1 coverage;
- ◆ State Patrol answers about 30% of the wireless 9-1-1 calls in Minnesota; and
- ◆ 9-1-1 calls are answered at 119 PSAPs.

Population Served

The universal emergency 9-1-1 number is available throughout the state of Minnesota, even in the few border exchanges where callers draw dial tone from an adjoining state. Enhanced 9-1-1, with Automatic Location Identification (specific location of landline callers), covers over 90% of the Minnesota population. For wireless telephones, FCC rules (Title 47, CFR 20.18) require the wireless carriers to put all 9-1-1 calls through to a PSAP, even if the cellular caller is a non-subscriber. FCC required Phase I Enhanced Wireless 9-1-1 service (general location and callback number of the cellular 9-1-1 caller) is available from five wireless carriers in the Minneapolis-Saint Paul Twin Cities seven-county metropolitan area and from six wireless carriers in 49 counties in Greater Minnesota. Phase I service is not yet available in the other 31 counties pending county cell site selection decisions and wireless carrier readiness. Phase I is necessary to support FCC Phase II service (callers location in latitude and longitude).

Services Provided

For budget purposes 9-1-1 costs can be viewed as several related activities required by M.S. 403.11, 403.113, and 473.901:

About 58% of the costs are to pay 9-1-1 network, database, and wireless charges:

- ⇒ 9-1-1 Network and Database Costs – The recurring costs of delivering 9-1-1 calls, with the associated location information, to PSAPs operated by county and other government agencies.
- ⇒ Wireless Enhanced 9-1-1 Costs – The installation and recurring costs for integrating wireless 9-1-1 calls into the Enhanced 9-1-1 networks for Phase I service. Funding for Phase II service is not covered in existing statutes.
- ⇒ Part of the Department of Public Safety PSAP operating costs - These costs cover Minnesota State Patrol expenses for handling 9-1-1 emergency calls made from cellular phones. The State Patrol answers about 30% of the wireless 9-1-1 calls in Minnesota.

About 40% of the costs are to fund grants to Public Safety Answering Points and the Metropolitan Radio Board:

- ⇒ Enhanced 9-1-1 Grant Costs - Grants to county and other government agencies operating public safety answering points to implement, improve, and maintain 9-1-1 systems (currently 10 cents per month per access line).
- ⇒ Metropolitan Radio Board Grant Costs - A portion of the Metropolitan Radio Board budget is funded by the 9-1-1 Special Revenue fund (up to four cents of the fee per line).

About 2% of the costs fund salaries for four full-time equivalent positions and administrative expenses.

All Incumbent Local Exchange Carriers (ILECs) and nine existing wireless carriers are integrated into the 9-1-1 systems. The competitive local exchange carriers and new wireless carriers as market newcomers require connections to 9-1-1 networks as their networks expand and mature. Work continues to provide at least wireless Phase I Enhanced 9-1-1 (Currently in 56 counties) to all 87 counties and to move to Phase II in all 87 counties.

ADMINISTRATION DEPT

Program: INTERTECHNOLOGIES GROUP

Activity: 911 EMERGENCY SERVICES

Narrative

Key Measures

- ⇒ Phase I Enhanced Wireless 9-1-1 service is available from five out of the seven wireless carriers in the Twin Cities seven-county metropolitan area and from six out of the 20 wireless carriers among 49 of the 80 counties in Greater Minnesota.
- ⇒ Eighty-one PSAPs (plus 10 State Patrol PSAPs) have attained tandem selective router Enhanced 9-1-1 with Automatic Location Identification (ALI), where 9-1-1 calls are sent to PSAPs by a selective router switch, and the location of the caller is determined from a remote database that is automatically updated based on telephone subscriber records. There were 77 PSAPs with ANI/ALI in December 2001.
- ⇒ Twenty PSAPs have tandem selective router Enhanced 9-1-1 with ANI/LLI, where 9-1-1 calls are sent to PSAPs by a selective router switch. There were 22 PSAPs with ANI/LLI in December 2001.
- ⇒ Of the 109 local PSAPs, eight (operated by seven counties and the University of Minnesota) have Direct Automatic Number Identification/Local Location Identification (ANI/LLI), where calls are connected directly to the PSAP with callback number, and the location of the caller is determined from a local database. There were 10 PSAPs with Direct ANI/LLI in December 2001.

Activity Funding

This activity is funded through a subscriber fee in the state government Special Revenue Fund. Funds are collected through a monthly statewide subscriber fee that is not less than eight cents nor more than 33 cents per month on each customer access line, including cellular and other nonwire access services. The commissioner of Administration sets the amount of the subscriber fee (currently 33 cents) with the approval of the commissioner of Finance. M.S. 403.11 requires the commissioner to transfer an amount equal to two cents a month from the 9-1-1 fee assessed on wireless telecommunications services to the commissioner of Public Safety to offset State Patrol's wireless 9-1-1 costs. M.S. 473.901 requires the commissioner to send up to four cents of the 9-1-1 fee to the Metropolitan Radio Board. M.S. 403.113 authorizes the commissioner to dedicate part of the 9-1-1 fee amount to be sent as Enhanced 9-1-1 grants to agencies operating PSAPs.

Program Description

The purpose of the Facilities Management Bureau (FMB) is to manage some of the land and buildings owned or leased by the state. Through a participatory strategic planning process, agency long-term capital needs are identified and prioritized, with the overall goals of providing high quality, healthy, cost-effective, and serviceable facilities.

Budget Activities Included:

- ⇒ Real Estate Management
- ⇒ Plant Management
- ⇒ Building Codes & Standards
- ⇒ Building Construction

Further detail on each of these Budget Activities is included in subsequent pages of this budget document.

| Full-Time Equivalents (FTE) | 318.1 | 320.6 | 349.0 | 361.8 | 357.3 | | | |

Activity Description

This activity exists to provide real estate services to state agencies statewide that result in obtaining quality, efficient, and cost-effective property that meets the state's needs; and selling state surplus property in a manner that maximizes a return to the state of Minnesota. Real Estate services are provided in accordance with M.S. 16B.24, M.S. 16B.25, M.S. 16B.26, M.S. 16B.31, M.S. 16A.28 and M.S. 94.

Population Served

The activity provides direct real estate services to approximately 160 state agencies, divisions, boards, councils, and work units. Indirectly, the public using state programs is served in the spaces provided to agencies conducting their operations and providing the services. Properties and spaces are provided for offices, workforce centers, residential facilities, emergency services, training, environmental services, laboratory testing, probation offices, driver vehicle services, health programs, licensing centers, and public records.

Activity at a Glance

The Real Estate Management Division:

- ◆ maintains a total of 961 leases of nonstate-owned and state-owned real property;
- ◆ currently leases four million useable square feet on nonstate-state owned space and other real property at an annual cost of \$62.9 million;
- ◆ leases 1.5 million useable square feet of state-owned space under the custodial control of the Department of Administration to state agencies; and
- ◆ executes approximately 73% of all leases for nonstate-owned space and 27% of all leases for state-owned space to state agencies through the Department of Administration.

Services Provided

The activity:

- ◆ identifies state-owned and nonstate-owned real property that efficiently and functionally meets agency space needs;
- ◆ negotiates and drafts leases of state-owned and nonstate-owned real property to house state agencies in quality spaces at the most economical rent;
- ◆ provides space programming and monitoring of leasehold improvement construction in compliance with terms and conditions of leases;
- ◆ manages leases to assure compliance with terms and conditions including resolving day-to-day issues that may arise;
- ◆ provides relocation assistance including budgeting, capital budget requests, managing budgets, processing relocation requests, and coordination;
- ◆ generates revenue by leasing state-owned property temporarily not needed for state use, such as antenna space on communications towers;
- ◆ oversees building project financial analysis;
- ◆ assists agencies in site selections and oversees the due diligence process (appraisals, surveys, inspections, environmental assessments, and geo-technical reports);
- ◆ negotiates acquisition of required property;
- ◆ develops strategic plans for the disposition of state surplus real property that maximizes return to the state including obtaining appraisals, coordinating re-use studies, and working with stakeholders (i.e., agencies relinquishing property, local units of government, Minnesota Historical Society, and neighborhood associations) on relevant issues;
- ◆ develops and issues easements and permits, and transfers custodial control of property between agencies; and
- ◆ maintains databases of leases, floor plans, space management inventories, and state-owned land inventories for internal and external use.

Historical Perspective

In general, life cycle cost analyses on owning and leasing real estate have shown that it is more economical to own than lease facilities. Case-by-case life cycle cost analyses of owning and leasing facilities have been

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: REAL ESTATE MANAGEMENT

Narrative

historically used and will continue to be used to determine the most economic manner of providing space for state agencies.

Consolidation and co-location of agencies has been and continues to be a priority. The result of these efforts has been to conserve resources by sharing space, equipment, and staff. Consolidation and co-location also offer the public the ability to obtain products and services and to conduct more than one transaction at a visible, accessible, easily identifiable location. Consolidation and co-location also facilitate transportation pools that lead to conserving resources, better accessibility, reducing pollution, and controlling parking development costs.

There has been an increase in nonstate-owned space leased from 2.1 million square feet in 1988 to four million square feet in 2002.

Key Measures

1. Measure: Attain at least 4% savings on negotiated transactions through reduced rental cost.

| Performance | FY 2001 | FY 2002 |
|----------------|-----------|-------------|
| Percentage | 10.5% | 9% |
| Dollar Savings | \$391,461 | \$1,240,256 |

2. Measure: Maintain an 85% or better customer satisfaction rating

| Performance | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 |
|-------------|---------|---------|---------|---------|---------|---------|
| Percentage | 86% | 88% | 86% | 94% | 98% | 96% |

The primary issue raised in customer surveys is the time it takes to complete transactions. Real estate negotiations and transactions have become more complex due to issues involving accessibility, code compliance, indoor air quality, hazardous materials, and risk management. Agencies expect services to include project management to ensure that spaces are delivered in accordance with lease terms and conditions.

Activity Funding

This activity is funded through a General Fund appropriation.

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: PLANT MANAGEMENT

Narrative

Activity Description

Plant Management (PMD) delivers consistent, quality services to ensure cost-effective, clean, safe, and environmentally sound buildings, grounds, and operations in accordance with M.S. 16B.24, 16B.32, 16C.14, 16B.58 and 115A.15.

Population Served

The majority of PMD's customers are state agencies and the legislature. Non-state agency customers include visitors and event participants, as well as:

- ♦ organizations leasing space or needing parking; and
- ♦ federal, regional, and local units of government needing resource recovery.

Activity at a Glance

Plant Management maintains:

- ♦ 3.7 million gross square feet;
- ♦ 22 buildings;
- ♦ 21 monuments/memorials;
- ♦ 38 parking facilities;
- ♦ 2,159 tons of material recycled in FY 2002; and
- ♦ 40 million gross square feet served by Energy Management.

Services Provided

Services provided by PMD include:

- ♦ housekeeping, engineering, building management, refuse removal, grounds maintenance, snow removal, trade and repair services, and environmental and fire/life/safety systems;
- ♦ maintenance of ceremonial grounds, monuments, and memorials as a showplace for all Capitol Complex tenants, visitors, and Minnesota citizens;
- ♦ operating the State Recycling Center to prepare recyclables for market and administering the State Government Resource Recovery Program providing waste reduction and recycling assistance and education;
- ♦ conducting energy efficiency improvements and retrofit projects in state-owned buildings;
- ♦ implementing public buildings benchmarking project pursuant to M.S. 16B.325, Minnesota Session Laws 2001, article 1, chapter 212, section 3 and amended by Minnesota Session Laws 2002, chapter 398, section 8;
- ♦ moving, equipment rental, and delivery services; and
- ♦ maintaining and managing parking facilities and contracts and providing alternative transportation services.

Historical Perspective

PMD has developed a prioritized Asset Preservation Program for facilities under Administration's custodial control. The overall goal of this program is that all facilities are operated, repaired, and maintained in a cost-effective manner to ensure the integrity of the facilities and provide a safe and comfortable environment for building tenants. Failure to continue to address deferred maintenance will cause serious structural damage, deterioration, and reduction in the life expectancy of the buildings.

Through a change in legislation in 1997, a segregated Facility Repair/Replacement account was established to enable Capitol Asset Preservation and Replacement Account/Americans with Disabilities Act (CAPRA/ADA) bond interest and building depreciation collected through the rental rates to fund major projects. For FY 1998-2001, \$1.6 million was transferred. In addition, 1999 legislation that went into effect on 7-1-01, required all building depreciation collected through the rental rates for bonded projects to be transferred to this Facility Repair/Replacement account. Receipts are estimated at \$13 million each biennium. With the exception of CAPRA/ADA, bond interest costs incorporated in lease rates would continue to be transferred to the General Fund. Beginning in FY 2002, the Facility Repair/Replacement account assists PMD in planning and budgeting for future cyclical repairs and replacements that extend the useful life of the facilities and reduce the reliance on the capital budget process. The policy objective of the law is that preventive maintenance and planned, coordinated repair and replacements are significantly less expensive than emergency repairs or full replacement of facilities.

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: PLANT MANAGEMENT

Narrative

Key Measures

Service delivery accomplishments include the following:

- ◆ leases preserved facilities and supported a quality environment for building tenants through building tours, facility condition audits, and computer-assisted facilities management program;
- ◆ Resource Recovery Program continued to exceed the 60% recycling goal in the Capitol Complex in FY 2001 and FY 2002 as required by M.S. 115A.15, even though there was a 4% reduction in discards recycled in the Capitol Complex between FY 2001 and FY 2002; the reduction occurred because agencies shipped fewer recyclables due to waste reduction activities, the potential government shutdown, the state strike, and the fourth quarter announcement that the State Recycling Center's services were being reduced due to General Fund budget reductions;
- ◆ Energy Management saved state agencies \$717,729 in FY 2001 and \$168,573 in FY 2002 through negotiated natural gas pricing and savings by burning fuel oil versus natural gas;
- ◆ Energy Management implemented a contract between the utility and the correctional facility at Rush City to provide distributed generation and load curtailment which saved Corrections \$201,635 in FY 2002; and
- ◆ Energy Management completed state agency energy retrofit projects in FY 2001 of 451,501 square feet resulting in annual savings of \$80,588 and in FY 2002 of 310,671 square feet resulting in annual savings of \$60,947 before loan payments.

Activity Funding

PMD's Internal Service Fund (ISF) is made up of three activities: Leases, Repair and Other Jobs, and Materials Transfer. The predominant customers are state agencies located in custodial control buildings that pay for space through lease rental rates. The goal of the ISF is to set rates as close to break-even as possible, while maintaining a two-month working capital. Expenditures include salaries/benefits, utilities, operating expenses, bond interest, and building depreciation.

The *full-time equivalents* as of 7-1-02 were 237.97 for Leases, 12.35 for Materials Transfer, and 2.66 for Repair and Other Jobs.

PMD does not have a loan from the General Fund nor proposed investment in technology or equipment of \$100,000 or more.

Operating Losses/ Increases in Retained Earnings:

Retained earnings for the Lease activity increased in FY 2001 and FY 2002 because of the inability to fill positions due to wage disparities and the state hiring freeze. In addition, there are fluctuations in the lease rate-setting process as rates are established during the biennial budget process (i.e., one to two years in advance).

Retained earnings for the Repair and Other Jobs activity decreased in FY 2001 and are projected to decrease in FY 2002 based on planned losses due to positive retained earnings.

Retained earnings for the Materials Transfer activity increased in FY 2001 due to the delayed purchase of a new truck. Retained earnings for Materials Transfer are projected to decrease in FY 2002 due to reduced services by its largest customers as a result of the state budget shortfall; in addition, resulting staff reductions has lead to less flexibility to meet customer needs.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-----------------------|--------|-------|--------|-------|-------|-------|
| Leases | 5.20% | 1.60% | 9.34% | 0.66% | 4.54% | 2.96% |
| Repair and Other Jobs | 1.83% | 7.83% | 10.10% | 0.00% | 1.90% | 2.26% |
| Materials Transfer | 22.32% | 3.27% | 0.49% | 0.27% | 0.31% | 4.70% |

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: PLANT MANAGEMENT

Narrative

Factors contributing to the change in Lease activity rates include increased bond interest and building depreciation due to major construction, and repair and replacement projects.

Factors contributing to the change in Repair and Other Jobs rates include small size of activity and continued return of positive retained earnings.

Factors contributing to the change in Materials Transfer rates include small size of activity and reduction in requested customer services.

Impact of Rate Changes:

Assuming the same volume and mix of goods/services as used in FY 2002, the five largest Lease customers will pay approximately 2% more. The five largest customers are the Minnesota Historical Society, the Minnesota Supreme Court, and the departments of Revenue, Transportation, and Administration,

Assuming the same volume and mix of goods/services as used in FY 2002, the five largest Repair and Other Jobs customers will pay approximately 2% more in FY 2003. The five largest customers are the departments of Administration, Health, and Military Affairs, the Revisor of Statutes, and the legislature.

Assuming the same volume and mix of goods/services as used in FY 2002, the five largest Materials Transfer customers will pay approximately 3% more in FY 2003. The five largest customers are the departments of Administration, Human Services, Commerce, and Children, Families and Learning, and the Secretary of State.

In addition to the ISF, this activity is funded by a General Fund appropriation and revenue from several fees. Planned changes in the financing of parking facilities related to the Capitol Complex may have a significant impact on parking rates.

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: BUILDING CODES & STANDARDS

Narrative

Activity Description

The division adopts the State Building Code, which sets minimum construction standards for building, mechanical, elevator, energy, accessibility, and manufactured structures to ensure the health, safety, and security of building occupants in accordance with M.S. 16B.59-.76 and M.S. 327B.01-12. The division administers the entire code in state-owned, state-funded, and state-licensed buildings, and school district projects over \$100,000, and administers manufactured structures statewide and elevators across the state except in Minneapolis and St. Paul. It also provides administrative assistance to all communities administering the State Building Code, including assistance during natural disasters such as the floods in Roseau or tornadoes in St. Peter and Granite Falls.

Population Served

The division provides interpretations on the adopted codes, gives information regarding building materials, and consults with municipal officials, design professionals, building contractors, and the general public on all types of projects throughout the state. Approximately 465 jurisdictions administer the State Building Code.

Activity at a Glance

- ◆ Investigative Section received 270 written complaints requiring formal investigations.
- ◆ Plan Review Section reviewed 299 plans for state-owned and state-licensed buildings with construction value of \$430,524,298.
- ◆ Education/Certification Section provided 80 seminars for municipal building officials, architects, engineers, and builders.
- ◆ Elevator Safety Section received 949 requests for permits and conducted 1,268 elevator inspections across the state.
- ◆ Manufactured Structures Section received 101 written complaints requiring formal investigation.

The State Building Code is administered in cities, townships, and counties where adopted throughout the state.

Services Provided

Education and Certification Section - This section assists division clientele in interpreting and applying the State Building Code. It also provides certification, training, and educational seminars for building officials, the design profession, and the construction industry.

Information, Rules, and Administrative Services Section - This section distributes information about administration of the State Building Code, updates the State Building Code through the Administrative Procedure Act, and amends specific sections to address legislation and geographic needs. This past year the division has maintained nine advisory committees made up of members of the construction industry to assist in updating the State Building Code with the latest model codes and assisted in providing state and local input into the national model code change process. The Administrative Services unit works with the Department of Commerce, Enforcement Division, for code-related issues, provides reviews of municipal building code departments throughout the state for compliance with the State Building Code, and investigates building code complaints.

Plan Review and Regional Services Section - This section reviews construction documents and does site inspections to ensure conformance with requirements of the State Building Code for buildings paid for by the state, public school district buildings, and buildings that are licensed by other state agencies, such as health care facilities and correctional facilities. Regional officials represent the division, assist municipalities, do inspections, and monitor contract inspectors from six locations geographically located throughout the state.

Manufactured Structures Section - This section regulates manufactured housing (mobile homes) and prefabricated buildings. It answers consumer inquiries and complaints regarding manufactured homes and prefabricated structures and provides training and educational seminars for building officials, manufacturers, dealers, and installers. It licenses manufactured home manufacturers and dealers and performs plant and dealer lot inspections.

Elevator Safety Section - This section reviews, permits, and inspects all new or altered elevators, escalators, and related transportation devices. It provides for inspection and investigation of reported accidents involving elevators and related transportation devices.

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: BUILDING CODES & STANDARDS

Narrative

Disaster Assistance - The division provides assistance to local jurisdictions in times of natural disasters. After consultation with the local officials, division staff respond to the communities by providing services they need to manage health and safety inspections during the disaster and administrative services needed to help in the recovering process. Services may include technical assistance, coordination of volunteers to conduct safety inspection and damage assessment, and onsite assistance with administrative procedures.

Historical Perspective

The laws of 1971 established the Minnesota State Building Code. The purpose was to provide uniform minimum standards for life safety and welfare of the public for buildings constructed in the state.

Effective 7-1-72, the Minnesota State Building Code superseded all municipal building codes. Before then, municipalities could apply any construction standards they chose to adopt. The net effect was 200-plus municipal construction standards in effect in the state. Designers, contractors, and material suppliers were confronted with different requirements when they worked in different municipalities.

The Minnesota State Building Code was initially, and continues to be, based on national model codes. State amendments to the national model codes have been incorporated to reflect legislative issues and geography.

Key Measures

Education Seminars

The division provides training and educational seminars to municipal officials, design professionals, state agencies, and contractors. The seminar programs have increased from 32 to 80 in the past year. Consistency and uniformity of construction and inspections are believed to be improved with expanded educational seminars, thus requiring fewer corrections in the field.

Seminar satisfaction ratings have remained consistently above the target performance goal of 85% with actual averages of 91% for the last two years.

Plan Review

The division is required by statute to review submitted construction plans within 30 days. The Building Codes & Standards Division's (BCSD) goal is to have them reviewed within 21 days. With plan reviewers' expertise needed to assist in code adoption and education, the 21-day goal was met 70% of the time with the remaining 30% done within 30 days.

Administrative Services

One of the responsibilities of the Administrative Services section is to provide consumer complaint assistance relating to municipal enforcement or contractor noncompliance.

Over the past year the division's target/goal for responding to formal complaints requiring an investigation of improper enforcement of the code at the local level or construction-related complaints referred to the division by the Department of Commerce, Contractor Licensing Section is to respond to all formal complaints within one week and set up on-site meetings if needed within two weeks. Of 43 files received by the section this past quarter, 98% were responded to within one week, and 98% site visits were scheduled.

Activity Funding

The Building Codes & Standards Division (BCSD) is funded by two main sources: a state surcharge fee, which is charged on every building permit issued by municipalities administering the State Building Code, and by construction permit and plan review fees for building, mechanical, accessibility, elevator, and manufactured structures.

These fees are fee-for service (user fees) paid by contractors, manufacturers, building owners, design professionals, and homeowners who benefit from the division's services that provide the following: adoption of a State Building Code providing uniform minimum construction standard for building projects across the state;

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: BUILDING CODES & STANDARDS

Narrative

training and assistance to the construction industry and municipal officials for uniform and consistent application of these standards; and review of construction plans and site inspection of state-owned or state-licensed projects and mechanical, accessibility, elevator, and manufactured structures.

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: BUILDING CONSTRUCTION

Narrative

Activity Description

The Division of State Building Construction (DSBC) delivers professional architectural, engineering, and construction resources designed to improve the physical facilities of Minnesota state government in accordance with: M.S. 115A.15, 16A.632, 16B.05, 16B.24, 16B.27, 16B.30, 16B.305, 16B.31, 16B.32, 16B.33, 16B.335, 16B.35, and 16C.14.

Population Served

DSBC customers are state agencies having custodial control over facilities, and the occupants and visitors to those facilities.

Services Provided

Services provided by DSBC include:

- ◆ building design and construction project management, including contract administration, predesign, designer selection and oversight, and construction administration for new, remodeling, and asset preservation building projects;
- ◆ managing Capitol Asset Preservation and Replacement Account;
- ◆ managing hazardous materials surveys and abatement projects;
- ◆ assisting state agencies with Capital Budget Review preparation and provide Administration's review comments;
- ◆ managing predesign process;
- ◆ providing statewide facilities management (Facility Condition Audit);
- ◆ providing staff support for State Designer Selection Board;
- ◆ providing staff support for Governor's Residential Council; and
- ◆ developing Building Design Guidelines with consultant checklist.

Activity at a Glance

DSBC provides planning, design and construction services:

- ◆ for over 20 state agencies;
- ◆ for almost 4,000 state buildings;
- ◆ for over 450 active remodeling/repair projects, and several major new buildings, all of which require the processing of over 300 pay requests and 100 contracts monthly; and
- ◆ for 200 hazardous materials surveys and over 200 abatement projects annually.

Historical Perspective

DSBC provides a centralized resource where state agencies can obtain comprehensive and consistent architectural, engineering, facility management, and hazardous building materials management services to support agency facility needs. The process of building design and construction has become increasingly more complex from both a systems and technology standpoint as well as from the users' performance expectations. Increased technology and regulatory needs, including safety codes, building codes, health regulations, indoor air quality, sustainability, and environmental regulations also come into play. DSBC continues to work toward integration of all these items so that project scope, cost, and schedule requirements are met in a consistent and high quality manner. Toward this end, they have developed a consultant procedure manual, standardize forms, project initiation procedures, design criteria, and related information, all of which is posted on the DSBC web site (see address below).

Key Measures

FY02 service delivery accomplishments include:

- ◆ completion of a predesign supporting the co-location of Health and Agriculture; project delivery for \$140 million for new facility is on schedule;
- ◆ completion of a predesign for Human Services; project delivery for \$100 million for new facility is on schedule;
- ◆ construction on schedule for new \$60 million Bureau of Criminal Apprehension (BCA) building in St. Paul; completion in fall 2003;
- ◆ minimizing construction change orders (supplemental agreements) to 5% maximum over bid was met (on work scope within our control);
- ◆ minimizing design time on projects (to allow earlier start date for construction notice to proceed) was met on over 50% of our projects;

ADMINISTRATION DEPT

Program: FACILITIES MANAGEMENT

Activity: BUILDING CONSTRUCTION

Narrative

- ♦ minimizing time to secure consultant services by implementing five year design roster, creating master request for proposals, modifying flowchart, and currently in process of revising methods for contract preparation ; and
- ♦ developing Design Guidelines to ensure quality and consistent standards for state facilities.

Activity Funding

The Division of State Building Construction receives operating funds from a General Fund appropriation. Funding for projects that DSBC manages is from general obligation bonds, General Funds, federal funds, matching grants, and gift funds.

Program Description

The purpose of the Management Services Bureau is to provide internal leadership to the agency in legislative, communications, administrative, and interagency support functions, as well as several specialized services including fiscal support to small agencies and public affairs responsibilities. In addition, statewide leadership is provided in many areas in conjunction with the diverse operating divisions of the agency.

Budget Activities Included:

- ⇒ Administrative Management
- ⇒ Financial Management & Reporting
- ⇒ Human Resources
- ⇒ Management Analysis
- ⇒ Information Policy Analysis
- ⇒ Office of the State Archaeologist
- ⇒ Developmental Disabilities Council
- ⇒ System of Technology to Achieve Results (STAR)

Further detail on each of these Budget Activities is included in subsequent pages of this budget document

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: ADMIN MANAGEMENT

Narrative

Activity Description

This activity provides both agency and statewide executive leadership and management support. The mission of the Department of Administration is to improve the quality and productivity of Minnesota government. The agency's vision is to be a leader in providing high-quality products and services to customers and to be an employer of choice for its employees.

Activity at a Glance

Admin Management is responsible for

- ◆ creating, communicating, and maintaining the agency strategic plan; and
- ◆ measuring quarterly performance results as reported by all internal divisions.

Population Served

Services and support are provided to all state agencies, councils, boards and offices, and the public.

Services Provided

The office has overall management responsibility of the agency. The commissioner of administration is the state chief information officer, and as such, provides technology leadership to the state. In addition, the Public Affairs unit coordinates the legislative and communications functions of the agency.

Key Measures

The Department of Administration has made customer satisfaction a major department-wide goal. There are 32 divisions within the agency that are working to devise meaningful measures of customer satisfaction to be used in improving the quality of services. Criteria have been developed to evaluate the extent to which all of these areas are tracking and measuring customer satisfaction.

Currently, nearly half of these areas are tracking customer satisfaction. By October 2002, 70% will be measuring customer satisfaction, and by March 2003, all areas are expected to have customer satisfaction measures in place. A customer satisfaction goal of 80% or higher is the minimum standard for divisions.

Employee satisfaction is also tracked. The current objective is to bring all performance reviews up to date by June 2003. This responds to employee concerns regarding regular contact with, and feedback from, supervisors.

Activity Funding

This activity is funded through a General Fund appropriation.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: FINANCIAL MGMT & REPORTING

Narrative

Activity Description

The mission of the Financial Management and Reporting Division (FMR) is to provide and promote financial management to the Department of Administration (Admin) and associated boards and councils.

Population Served

Financial services, information, and transactions are provided to all divisions within the agency, six boards and councils, the Department of Finance, the Legislative Auditors, the legislature, and vendors.

Services Provided

Services provided include all aspects of budgeting, accounting, internal auditing, transaction processing, financial reporting and analysis, and performance management consultation and reporting. FMR staff act as liaisons and financial consultants for Admin's operating divisions and the other customers. This activity strives to provide timely financial services and support while conforming to Generally Accepted Accounting Principles (GAAP). This facilitates the effective management of available resources as governed by laws, policies, and procedures of the accounting profession, and state and federal governments.

Key Measures

Agency Prompt Payment: M.S. 16A.124 requires state agencies to pay valid obligations to vendors within the vendor's early payment discount period, or in the absence of a stated period, within 30 days following receipt of the invoice for the completed delivery of the product or service.

| Fiscal Year | 2000 | 2001 | 2002 | 2003 (est.) |
|---------------------------------|--------|--------|--------|-------------|
| Prompt Payment goal: 97% | 97.53% | 98.08% | 97.16% | 98.00% |
| Number of payment transactions: | 48,528 | 44,633 | 41,848 | 40,500 |

Activity Funding

This activity is funded through a General Fund appropriation.

This activity also manages the agency internal allocation account. This account was established in FY 1998 to better manage certain costs that are distributed throughout all, or part of the agency. Allocations include agency-wide expenses such as a training coordinator and an internal auditor, and bureau or function-specific expenses such as an assistant commissioner and LAN support. Costs are allocated to activities based on budget, staffing, or user statistics.

Contact

Larry Freund, Financial Management Director, (651) 296-5857, Larry.Freund@state.mn.us
<http://www.admin.state.mn.us/>

Activity at a Glance

- ◆ FMR administers overall FY 2002-03 biennial agency budget in excess of \$460 million.
- ◆ FMR aids nearly 40 bureaus, divisions, agencies, boards, and offices in all types of financial matters.
- ◆ All FY 2001 financial statements received clean independent auditors' opinions.
- ◆ Ninety monthly, quarterly, and annual financial statements for business units produced per year.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: HUMAN RESOURCES

Narrative

Activity Description

The Human Resources Division provides human resources services to the employees, prospective employees, and management of the Department of Administration (Admin) by actively recruiting, hiring, developing, and retaining a productive, diverse, and highly competent workforce. The division's work is subject to compliance with federal and state law as well as internal policies and procedures.

Activity at a Glance

- ◆ 200 employee hires/transfers per fiscal year.
- ◆ 40 labor grievances per fiscal year resolved prior to arbitration.
- ◆ 60% of employees provided onsite or offsite training per fiscal year.

Population Served

The Human Resources Division serves 850 employees of Admin as well as 16 additional employees of the Council on Asian/Pacific Minnesotans, the Council on Black Minnesotans, the Chicano/Latino Affairs Council, and the Ombudsman for Families.

Services Provided

The Human Resources Division provides the following services:

- ◆ recruitment and staffing;
- ◆ fringe benefits enrollment and administration;
- ◆ labor contract administration/employee relations;
- ◆ employee training and development;
- ◆ performance management and wage/compensation administration;
- ◆ Worker's Compensation, Occupational Safety and Health Administration (OSHA) compliance, and general safety/wellness program administration;
- ◆ Affirmative Action/ADA (Americans with Disabilities Act) and Family Medical Leave Act (FMLA) oversight and administration; and
- ◆ consultation on human resources management issues.

Key Measures

Human Resources strives to continue the current 100% customer satisfaction rate related to the variety of services provided above. Each service provider within the division solicits feedback on services rendered through an automated internal customer survey. Each service provider is charged with maintaining satisfactory statistics both as an individual contributor and as a member of the Human Resources team.

An additional performance management measure includes ensuring that all Admin employees' performance appraisals are current and that each agency employee has an annual review. Managers and supervisors in non-compliance with this measure will not receive their own performance increase. Target date for full compliance is 6-30-03.

A third performance measure includes continuing to hire, train, and promote any and all employees with respect to the Affirmative Action goals of the department's plan. Over the past two years, the department's hiring statistics reflect 100% compliance with affirmative action goals. The Human Resource division intends to continue this measurement into the biennium with the intention of retaining 100% compliance.

Activity Funding

This activity is funded through a General Fund appropriation.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: MANAGEMENT ANALYSIS

Narrative

Activity Description

The Management Analysis Division (MAD) is the state of Minnesota's management consulting organization. MAD offers a wide range of consulting services to state and local governments and higher education in accordance with M.S.16B.36. MAD consultants have worked on hundreds of projects with all agencies, many boards, units of local government, and higher education.

Population Served

MAD provides management consultation to state agencies, the governor, the legislature, higher education, and local and federal governments. The division's services are available to all public sector organizations on a fee-for-service basis. The direct recipients are public sector managers and executives; however, the ultimate beneficiaries are the state agencies and other public entities, and the end users whose services are impacted by the improvements.

Services Provided

MAD's consulting services include organizational improvement, analysis, performance measurement, service quality improvement, customer relations, facilitation, organization, evaluation, and development, strategic planning, process flow or process mapping, process redesign, legislative studies, grant writing, surveys, transition services, contingency planning, and other executive branch coordination activities.

Clients see improvements such as increased productivity, clearer direction, better working relationships, additional grant income, better data for decision making, or increased cooperation with stakeholders and partners.

Historical Perspective

MAD began consulting activities in 1985. Since that time, the requests for services have become increasingly complex and reflect the funding, societal, and policy pressures on public entities. Budget pressures and public expectations have increased the necessity for accountability, streamlining, and cooperation.

MAD's consulting business began with seven engagements in 1985. It has expanded to 137 engagements in FY 2002. Over the five fiscal years from FY 1998 through FY 2002, the number of projects per year averaged 134. The division worked on four legislative projects in FY 2002. The average for the past five fiscal years is three. MAD reported 1,360 hours on legislative engagements in FY 2002, equivalent to 13% of all hours reported on internal service fund projects in the year.

Key Measures

MAD's key measure is customer satisfaction. As consultants and analysts, MAD staff provide analysis, facilitation, consultation, and technical assistance to address client needs. The degree to which those needs are satisfied is a key measure. Some work is quantifiable. For example, grant writing efforts in the past two years have yielded the state an estimated \$3.3 million. Other efforts – such as getting diverse and competing stakeholders to come to consensus – are not as easily quantified but are immeasurably important to the clients. MAD's goal is to achieve at least 80% satisfaction; actual result this fiscal year will be 95% or higher.

Activity Funding

Funding is two-thirds from Internal Service Fund revenues from consulting and analytical projects, and one-third from a General Fund appropriation. The General Fund covers activities such as: regulatory mandates (Cost Benefit Analysis on transportation projects and testimony on topics as requested by the legislature); cross-agency management improvement projects (staffing or participating on task forces on performance management; providing managerial training; addressing emerging needs such as downsizing with one-on-one coaching for

Activity at a Glance

The Management Analysis Division:

- ◆ provides consulting to state agencies, the legislature, local governments, the University of Minnesota, Minnesota State Colleges and Universities (MnSCU), and public K-12 institutions;
- ◆ averages 120 engagements per year; and
- ◆ provides consulting services at up to 50% less than comparable external providers.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: MANAGEMENT ANALYSIS

Narrative

managers and training co-facilitated with the Employee Assistance Program); and work on behalf of the state as a whole (conducting contingency planning for state operations; establishing a gubernatorial transition office).

Internal service fund information:

MAD has 16 *full-time* equivalents as of 7-1-02.

There are no loans from the General Fund, or proposed investments in technology or equipment of \$100,000 or more.

Operating Losses/Increases in Retained Earnings:

Retained earnings estimated increase from FY 2001 to FY 2002 returns the division to the recommended minimum retained earnings level equal to two months operating funds. This return was possible due to fiscal management that allows the internal service fund to react to anticipated gaps in service demand due to budget shortfalls experienced by client agencies.

History of Rate Changes:

| Fiscal Year | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
|-------------|------|-------|------|-------|------|------|
| Hourly Rate | \$80 | \$85 | \$85 | \$95 | \$98 | \$98 |
| Change | 2.6% | 6.25% | 0% | 11.8% | 3.2% | 0% |

Impact of Rate Changes:

Rates did not increase for FY 2003; the rate of \$98 has been stable since July 2001. Services remain available at the previous rate so there is no impact on client agencies. The five largest customers in FY 2002 were the departments of Administration, Economic Security, Human Services, Public Safety, and Children, Families and Learning.

Activity Description

The Information Policy Analysis Division (IPAD) is where government entities, private sector organizations, the legislature, and citizens come for answers to data practices questions; consultation on data practices issues; help with public policy development; assistance in understanding and complying with complex legislation regulating information; dispute resolution services as it relates to data practices appeals; and assistance in exercising rights regarding access to information, protecting privacy, and challenging inaccurate or incomplete information.

Both the Minnesota Legislature and the federal government have either enacted statutes or promulgated extensive rules that deal with a variety of information related issues. These statutes and rules include, among others, the Minnesota Government Data Practices Act, the federal Family Educational Rights and Privacy Act and related rules, M.S. 144.335 (the health records statute), the federal Health Insurance Portability and Accountability Act of 1996 and related privacy rules, the federal Freedom of Information and Privacy Acts, and the Minnesota Records Management Act. Historically, the executive branch and the legislature informally agreed that it made sense that expertise concerning those and other related laws should be available at no charge to both government entities and citizens. As a General Fund activity, IPAD offers that expertise to government entities and citizens through a variety of functions and services.

Activity at a Glance

On average, over the last five years, IPAD has annually:

- ◆ issued 66 advisory opinions;
- ◆ answered 3,609 phone* inquiries from government entities;
- ◆ dealt with phone* questions or requests for assistance from 2,532 citizens; and
- ◆ provided 1,448 phone* consultations to private and public attorneys.

In 2002, IPAD's web site had 9,279 visits.

*IPAD also receives inquiries by paper mail, e-mail, and personal contact.

Population Served

IPAD serves personnel of state and local government entities, private citizens, private sector organizations, public and private attorneys, and the legislature.

Services Provided

IPAD provides the following major types of services to the population served: answering questions about rights and requirements of various information laws; consulting on difficult information policy issues; providing staff services to the commissioner of Administration in performing statutory duties that include issuing advisory opinions, acting on appeals to challenges to government data, acting on applications for temporary classification of data and requests to make new uses of data, and establishing and operating a statewide records management program; preparing and distributing training, model compliance, and informational materials; developing, updating, and operating a publicly accessible web site that contains all advisory opinions and all informational materials prepared by the division; offering training to state and local government entities; offering information sessions to citizens; providing training materials to enable government entities to do their own training; assisting citizens with answers to their inquiries and advice on how to exercise their rights; and working with the legislature, citizens, private sector groups, and state and local government agencies on the development of new information policy laws and changes to existing laws.

Historical Perspective

The Minnesota Government Data Practices Act began in 1974. Since that time, M.S. Chapter 13 has grown and has seen many revisions and additions as the data practices debate continues. Issues of information policy, such as data privacy, fair information practices, and the unauthorized destruction of the records of accounting and other organizations, continue to receive widespread discussion. Statewide responsibility for establishing and maintaining the infrastructure that assists government entities and the public in dealing with these issues has been assigned to the commissioner of administration and in turn to IPAD.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: INFO POLICY ANALYSIS

Narrative

Key Measures

Timeliness of responses from IPAD to clientele is critical to effectively serving the clientele. In line with that objective IPAD has used the following performance measure for several years.

Eighty-five percent of all phone and e-mail inquiries and requests for assistance will be responded to no later than the end of the next business day.

Historically, IPAD has met this goal in every year since 1998.

Beginning in the fall of 2003, IPAD will apply this response goal to all inquiries, including those received by paper mail and e-mail.

Activity Funding

This activity is funded through a General Fund appropriation.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: Office of the STATE ARCHEOLOGIST

Narrative

Activity Description

The Office of the State Archaeologist (OSA) manages the state's archaeological resources, including sites and data, on behalf of the citizens of Minnesota, under provisions of M.S. 138.31-138.42 (the *Field Archaeology Act*) and M.S. 307.08 (section of the *Private Cemeteries Act*). In addition to extensive federal legislation addressing cultural heritage resource management, other state statutes, including M.S. 86A (the *Outdoor Recreation Act*) and M.S. 116B (the *Minnesota Environmental Rights Act*), also speak to issues of archaeological resource management.

Activity at a Glance

Key activity statistics related to OSA program activities (most recent year's data) include:

- ◆ 282 reviewed/licensed archaeological projects
- ◆ 281 evaluated/accepted site data forms
- ◆ 59 burial site investigation cases

OSA review processes under these statutes are critical to controlling public and private development costs, which derive in part from federal, state, and local mandates. The laws require the identification, evaluation, and protection of archaeological (including burial) and other heritage resources.

Held annually each spring, Minnesota Archaeology Week is a key component of the OSA's public participation and education programming. The OSA assumes the lead role in organizing, coordinating, and promoting this statewide series of events that celebrate Minnesota's archaeological and historic heritage. In 2002, 5,279 individuals attended Minnesota Archaeology Week.

Population Served

OSA clients include, but are not limited to: local, state, and federal agencies; representatives of Minnesota's tribal communities; builders and development associations; cultural resource management firms; county historical societies; private homeowners; professional and avocational archaeologists; local heritage preservation commissions; educators and school districts; and other public and private agencies and individuals.

Services Provided

Major service categories include: *data management; consultation; licensing and project review; compliance and enforcement; research; and information dissemination*. Both integrated and interdependent, these program services function as a whole. As an example, the scheduling, cost, and progress of both public and private development projects depend on accurate and timely consultative services, which in turn require comprehensive data management and research capabilities.

Historical Perspective

OSA and the *Field Archaeology Act* were created by the legislature in 1963. In May of 1996, Executive Order (reorganization order no. 175), established OSA as a division within the Department of Administration.

Recent studies by the Management Analysis Division and the Office of the Legislative Auditor explored alternative funding options for the OSA. The Office of the Legislative Auditor's April 2001 OSA program evaluation report concluded that "... the Office of the State Archaeologist should continue to receive its funding primarily from a General Fund appropriation, (and) the Legislature should direct the office to determine the feasibility of charging fees to supplement its budget." In the March 2002 assessment of the feasibility of supplementing OSA's budget with fee-for-service funds, the Management Analysis Division of the Department of Administration concluded that "... a fee-for-service model does not appear to be in the best interest of the Office of the State Archaeologist or the state."

Key Measures

Turnaround time for project review and issuance of Field Archaeology licenses: target is "within 10 days" of receipt of application and related support materials (note: OSA response time is not sole variable in determining turnaround time). The goal is consistently met. Actual turnaround time for FY 2002 was 100%.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: Office of the STATE ARCHEOLOGIST

Narrative

Turnaround time for review/correction of site data forms and issuance of Smithsonian Site Designation Numbers (SSDN): target is "within seven days" of receipt of correctly completed site forms. Actual average turnaround time for FY 2002 was 100%.

Perhaps the most comprehensive measure of OSA's performance is described in the Office of the Legislative Auditor's recent OSA program evaluation report, which thoroughly documents the base of support for OSA program activities.

Activity Funding

The program operates through a General Fund appropriation.

Activity Description

The Governor's Council on Developmental Disabilities (GCDD), authorized under the Developmental Disabilities Assistance and Bill of Rights Act (DD Act)(P.L. 106-402) works to assure that people with developmental disabilities, and their families, receive the necessary support/services to increase their independence, productivity, self-determination, integration, and inclusion in the community (IPSII).

Population Served

The GCDD's primary customer group is comprised of people with developmental disabilities, who make up about 1.13% of the state's population or about 55,370 individuals, and their families. The other two customer groups are service providers and employers.

Services Provided

The GCDD is not a direct service provider. GCDD's business is information, education, and training for knowledge building, skills development, and attitude changes that lead to the IPSII results through three broad strategies – Partners in Policymaking®, Communications and Training, and Customer Focus and Quality Improvement.

At least 70% of the federal funds that GCDD receives each year are awarded primarily as grants to nonprofit organizations to carry out the following related sub strategies:

Partners in Policymaking®

- ⇒ Basic Partners Program: Competency/value based leadership training program for adults with disabilities and parents of young children with developmental disabilities; teaches how to develop positive partnerships with elected officials for systems change.
- ⇒ Partners Graduate Workshops: Advanced leadership training on topics such as negotiation and communication skills.
- ⇒ Longitudinal studies: Surveys conducted to track long-term results of Minnesota Partners graduates.
- ⇒ Cultural outreach programs: Outreach, basic leadership skills training, intro to concepts of the Partners program in the African American, American Indian, and Hispanic communities; expansion to Asian American community in 2003.
- ⇒ Partners for Employers: E-learning course on employment with tracks for people with disabilities and family members.
- ⇒ Self-Advocacy: Direct funding of a Minnesota self-advocacy organization to establish new self-advocacy groups and provide leadership training for self-advocates.

Communications and Training

- ⇒ Publications: Education/resource materials on best practices available to general public.
- ⇒ Electronic Government Services: Conversion of products and services to a web-based format; updating of GCDD web site; conversion of the Partners program to e-learning.
- ⇒ Training Conferences: Co-sponsorship funds awarded to agencies/organizations to support leadership training conferences.

Customer Focus and Quality Improvement

- ⇒ Customer Research: Determine customer needs, expectations, requirements on issues such as abuse/neglect, employer hiring practices, oral health care.
- ⇒ Application of Baldrige Framework: Increase knowledge, understanding, application of Baldrige to GCDD's business.

Activity at a Glance

- ◆ More than 9,000 Minnesota's Partners in Policymaking® program graduates nationally/internationally since 1987; includes more than 550 graduates of Minnesota's program.
- ◆ In the past funding year:
 - ⇒ -A total of 82 Partners graduates participated in four advanced leadership training workshops.
 - ⇒ -A total of 1,050 participants in five leadership training conferences.
- ◆ A total of 21,954 publications disseminated (nine months); evaluation scores average 9.3 out of 10.0.

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: DEVELOPEMENTAL DISABILITIES COUNCIL

Narrative

The GCDD does not regulate activities nor set or enforce standards.

Historical Perspective

In the 1970s, the GCDD provided demonstration grants that funded diagnostic clinics, early intervention, self-advocacy, group homes, day programs, and regional planning councils.

In the 1980s, the GCDD provided demonstration grants for respite care, case management, employment, regional planning councils, and deinstitutionalization studies.

In the 1990s, the GCDD provided grants for youth leadership, Partners in Policymaking®, cultural outreach, and publications.

Key Measures

The GCDD tracks and reports the results of three performance measures, compared with a targeted goal, on its Quarterly Operations Report to the Department of Administration:

- ⇒ 30/60/90 day action plans: The targeted goal is 95% on time or early completion of work activities. FY 2002 actual was 100%.
- ⇒ Cycle time of publication orders: The targeted goal is 90% of all publication orders filled within three days of the request. The industry standard for fulfillment is three days. FY 2002 actual was 93%.
- ⇒ Quality of publications: The targeted goal is 8.5 (scale of 1 to 10; 10 = highest). FY 2002 actual was 9.3.

Performance measures for the next fiscal year are established by the GCDD, identified in Requests for Proposals, and contained in GCDD's supplier contracts. Performance goals are tracked for each fiscal year for each supplier, and over time, through dashboards, IPSII measures, customer satisfaction, cycle time for reporting, progress meetings that correspond with quarterly reporting deadlines, mid-year performance reviews, and supplier final reports.

Activity Funding

The GCDD's annual allocation is part of a Congressional appropriation for the U.S. Department of Health and Human Services. The FFY 2002 allocation totaled \$1,025,295. The anticipated allocation for FFY 2003 is \$1,020,449. This federal allocation requires a 25% non-federal match, which is acquired through a General Fund appropriation and in-kind contributions. The GCDD has received additional federal funds for family support.

The GCDD's planning and budgeting processes are directly connected for grant activities (70% of budget) and administrative spending (30% of budget). Budget allocations for grant activities begin with the three broad strategies and related sub strategies in our Five-Year State Plan. These are translated into an annual plan, specific grant activities, a preallocations memo, allocation recommendations, and GCDD approval. This process is repeated on an annual basis.

Activity Description

The System of Technology to Achieve Results (STAR) program was established in 1989 as Minnesota's Federal Tech Act Project to plan and coordinate assistive technology (AT) information and services for the citizens of Minnesota with disabilities. The STAR Program serves as an advocate for federal and state assistive technology policy and legislation, builds assistive technology capacity in state government, and helps assure statewide assistive technology services for individuals with disabilities throughout the state.

Activity at a Glance

- ◆ Build Assistive Technology (AT) capacity throughout the state of Minnesota.
- ◆ An advocate for federal and state AT policy and legislation.
- ◆ Help assure access to statewide AT services.

An assistive technology device is any piece of equipment that is used to increase, maintain, or improve the functional abilities of a person with a disability.

Population Served

Minnesota has a disability rate of about 15%, or approximately 745,844 residents. Currently, over half of seniors 65 years old and older have a disability. These individuals need some assistance in performing daily activities or participating in community life. STAR conducts activities relating to the availability and benefits of assistive technology devices and services for these populations.

Services Provided

The STAR Program works at the state and national levels on legislation and policy for assistive technology. It informs and advocates for AT through training, information, and referral. STAR works closely with Minnesotans with disabilities and providers to develop a statewide network of resources related to technology assistance.

STAR works diligently to build collaborative relationships in the AT community. STAR, along with its nonprofit arm, is working with rural partners to assure statewide coverage of services. In addition, STAR works with state agencies and others in serving as a central clearinghouse for AT information, assessment, and application.

Historical Perspective

The STAR Program was established in 1989, and was identified as Minnesota's Tech Act Project. Working with the Governor's Advisory Council on Technology for People with Disabilities, the STAR Program worked closely with consumers to develop a statewide network of resources related to technology assistance.

STAR's accomplishments over the past 13 years include:

- ◆ distribution of over 100,000 copies of the *Directory of Funding Resources for Assistive Technology* (now in its fifth edition);
- ◆ completed over 1,000 training sessions, presentations, and displays on AT throughout the state;
- ◆ developed and distributed over 3,000 copies of *Guidelines for Assistive Technology in Post-secondary Settings*;
- ◆ served as a national model for states developing their own Tech Act sites;
- ◆ continued distribution of a quarterly newsletter (circulation of 8,000) to inform individuals and organizations of assistive technology news, opportunities and events;
- ◆ served as the state government's source for training and information regarding web site accessibility, as required by federal law (to date STAR has trained over 300 state webmasters);
- ◆ developed and implemented two statewide conferences on using assistive technology to assist individuals with disabilities move from dependency to self-sufficiency through employment;
- ◆ funded protection and advocacy services for individuals with disabilities who try to acquire assistive technology;
- ◆ developed and supported a statewide program of AT Networks (ATN) encompassing all of rural Minnesota working to increase out-state capacity to deliver assistive technology services;

ADMINISTRATION DEPT

Program: MANAGEMENT SERVICES

Activity: STAR PROGRAM

Narrative

- ◆ initiated outreach work and financial support to seven councils and organizations reaching over 12,000 individuals representing the communities of color in Minnesota;
- ◆ provided information on assistive technology and referral to sources requesting help averaging over 5,000 calls each year from throughout the STAR network;
- ◆ launched the Minnesota Assistive Technology Loan Network (MATLN), a program for short-term loan of AT devices; and
- ◆ provided funding for start-up programs, demonstration sites, laboratories, and projects working to serve the AT needs of Minnesotans with disabilities.

Key Measures

- ⇒ Advocate for federal and state AT policy and legislation:
 - ◆ conduct a consumer-based analysis of barriers to AT;
- ⇒ Assure statewide AT services and access to funding sources:
 - ◆ distribute, on average, 1,000 STAR Funding Directories per month
 - ◆ distribute a quarterly newsletter, *Constellations*, circulation 8,000
 - ◆ maintain an informational and interactive web site that identifies solutions to AT needs; and
- ⇒ Build AT capacity in state government:
 - ◆ conduct four training sessions for state webmasters on 508 accessibility requirements.

Activity Funding

Funding for the STAR Program is obtained from the Department of Education, National Institute on Disability and Rehabilitation Research, under the Assistive Technology Act of 1998 – P.L. 105-394. Federal funding is \$379,533 per fiscal year. STAR does not receive a General Fund appropriation.

Program Description

The purpose of the Fiscal Agent Program is to meet the administrative needs of the grant and other monies Administration (Admin) receives on behalf of multiple stakeholders. These funds are typically appropriated by the legislature for special projects. Admin distributes these funds to recipients, based on laws, statutes, policies, and procedures.

Budget Activities Included:

- ◆ Misc. Grants/Studies/Other
- ◆ Public Broadcasting
- ◆ In-Lieu of Rent

Further detail on each of these Budget Activities is included in subsequent pages of this budget document.

ADMINISTRATION DEPT

Program: FISCAL AGENT

Activity: MISC GRANTS/STUDIES/OTHER

Narrative

Activity Description

This activity has been established to administer certain grants and other monies the agency receives through legislative appropriations.

Population Served

Various grant recipients are served based on specific legislative intent.

Services Provided

Each of the activities within this activity are established and operated under specific state legislation. Emphasis is placed on fulfilling the intent of the specific legislation, which varies considerably with each activity. Processes are established and maintained to process financial transactions, track information, and report in various formats the information required and desired by various audiences. Contracts and agreements are an integral function of this activity. Administration (Admin) receives no operating funds for the administration of these grants and studies.

Activity at a Glance

- ◆ The Minnesota State Band has 65 volunteer members, who conduct about 10 performances annually.
- ◆ Two current LCMR Project grants.
- ◆ Eleven Construction Grants to Political Sub-Divisions currently in process.

Minnesota State Band

The Minnesota State Band is a volunteer band performing events free and open to the public. The band has received state funding in the form of grants or appropriations since its founding in 1898. Since 1979, this grant has been contained in the budget of Admin. The current annual \$2,000 General Fund grant has accounted for approximately 41% of the band's operating budget over the past three years. These funds are used for travel, postage, music, and other operational costs of the band.

LCMR Project Grants

Based on M.S. 4.071, "Oil overcharge money" received by the state as a result of litigation or settlements of alleged violations of federal petroleum pricing regulations, is used for projects recommended by the Legislative Commission on Minnesota Resources (LCMR), and appropriated by the legislature. Admin has been administering grants through this program since 1988. Current projects include: Improving Air Quality by Using Biodiesel Generators/University of Minnesota (\$90,000), and Accelerated Technology Transfer for Starch-Based Plastics/University of Minnesota (\$90,000).

Construction Grants to Political Sub-Divisions

The legislature appropriates state funding to Admin for grants to local governments for a variety of capital projects. Funding may be approved through the state bonding bill or other state appropriation bills, in the form of bond proceeds or General Fund appropriations. Capital projects are subject to requirements of the Minnesota Constitution, state statutes, language contained in the appropriation bill, and state accounting policies. Recent construction grants include: Children's Museum Rooftop Perspectives/City of St. Paul (\$500,000); Mash-Ka-Wisen Treatment Center/Minnesota Indian Primary Residential Treatment Center (\$300,000); Gillette Children's Hospital/Ramsey County (\$7,000,000); and Bayport Storm Sewer/City of Bayport (\$2,680,000).

Governors Residence Council Gift Fund

Based on M.S. 16B.27, the council develops an overall restoration plan for the governor's residence and surrounding grounds and approves alterations in the existing structure. The council may solicit and accept donated money to maintain and improve the quality of furnishings for the public areas of the building. The Governor's Residence Council was established in 1980. Over the past two years, \$40,000 has been donated to the council, and expenditures have included piano restoration, furniture, interior furnishings, and artwork.

Activity Funding

This activity is funded through a mix of state, gift, oil overcharge, and bonded funds.

ADMINISTRATION DEPT

Program: FISCAL AGENT

Activity: PUBLIC BROADCASTING

Narrative

Activity Description

Public broadcasting is the grant administration program carried out for the legislature under specific appropriation language and M.S.129D.11-16. The program oversees this grant authority, disbursing funds in accordance with legislative appropriations and direction, and ensures compliance with all statutory requirements and criteria.

Population Served

Television viewers and radio listeners throughout Minnesota are served by this activity.

Services Provided

Public Television

State funds are used by six recipient stations to sustain their ability to serve as a major community resource providing educational, cultural, economic development, public affairs, and children's programming to the public, governmental agencies, nonprofit organizations, business corporations, and educational facilities. State grants are made in a direct and matching basis, consistent with the criteria established in M.S. 129D.11-16. Public Television signals cover approximately 98% of the state. State grants provide between three, and 21% of the individual stations operating budget.

The legislature appropriated \$7,800,000 in FY 2002 from the General Fund for grants to noncommercial television stations to assist with conversion to a digital broadcast signal as mandated by the federal government.

Public Radio

State funds are used to support 12 public radio (AMPERS) stations that serve Minnesota residents through radio programming that is noncommercial, cultural, informational, ethnic, and educational in nature. It is programming designed to appeal to audiences not generally served by commercial broadcasters. Operational and equipment grants are made pursuant to criteria listed in M.S. 192D.11-16. The AMPERS stations cover approximately 95% of the population, and 80% of the geography of the state. State grants provide between two and 60% of the individual stations' total annual budget.

State funds are appropriated for an equipment grant to Minnesota Public Radio (MPR), a network of 31 stations providing local, regional, national, and international news and information programming, and classical music programming to listeners throughout the state and region. These state funds represent approximately 12% of MPR's FY 2002-03 capital budget.

Twin Cities Regional Cable Channel

State funds are used to provide grant-in-aid to Twin Cities Regional Cable Channel, Inc., a nonprofit organization operating the Metro Cable Network. These state funds provide for approximately 5% of the Metro Cable Network operating budget. The network appears on Channel 6 on all metropolitan area cable systems presenting a wide range of programs about issues and activities of regional interest and significance as mandated by state statutes and designated by the Minnesota Cable Communications Board in 1985.

Legislative Television

An additional appropriation is included in Public Broadcasting for Legislative Television. Funding is in the form of a grant for public information television transmissions of legislative activities. Senate Media Services and House Television programming raises public awareness of state issues, legislative activities, and state capitol events. Programming consists of live and taped coverage of senate and house floor sessions, select committee hearings, issue-oriented press conferences, public affairs programming, short documentaries, and civic-education programs. For the 2002 – 2003 legislative sessions, up to 3,298 hours of programming will be broadcast through two separate agreements. The legislature oversees this grant.

Activity at a Glance

- ◆ 1,032,000 people per week view programming of the Minnesota Public Television Association.
- ◆ 396,300 people listen one or more times per week to AMPERS radio stations.
- ◆ 706,000 people listen weekly to the radio programming broadcast by MPR stations.
- ◆ 600,000 cabled households in the seven-county metro area.
- ◆ Twin Cities legislative programming viewership between 3,000–4,000 daily, with peaks as high as 15,000.

Program: FISCAL AGENT

Activity: IN LIEU OF RENT

Narrative

Activity Description

This activity serves as a pass-through account for legislative General Fund appropriations for areas that do not enter into a lease agreement with Plant Management:

- ◆ Ceremonial Space – includes space in the Capitol Building such as the Rotunda, the Governor's Residence, the ceremonial grounds, and monuments/memorials in the Capitol area;
- ◆ Services for the Blind – space occupied by blind vending operators in the buildings (seven sites) under Plant Management Division's custodial control (M.S. 248.07, subd. 7); and
- ◆ Rent Waived – space occupied in the Capitol, State Office Building, and Veterans Services Building by the House of Representatives, Senate, Revisor of Statutes, Legislative Reference Library, and congressionally chartered veterans' organizations (M.S. 197.55 to 197.58).

Activity at a Glance

- ◆ 350,728 square feet of space maintained.
- ◆ 18 monuments and memorials maintained.

Population Served

Services and support are provided to the legislature and constituents, Services for the Blind vending operators, congressionally chartered veterans' organizations, and visitors.

Services Provided

Services provided include janitorial, maintenance, repair, trades, engineering, grounds, and utilities for the buildings and grounds mentioned above. The following is the breakdown of space (350,728 total square feet) serviced under this activity:

- ◆ Ceremonial Space – 34,060 square feet
- ◆ Services for the Blind – 9,297 square feet
- ◆ Rent Waived – 307,371 square feet

Activity Funding

This activity is funded through a General fund appropriation.

Agency Purpose

In 1976, the legislature established the Office of Administrative Hearings (OAH) as an independent executive branch agency responsible for conducting administrative contested case hearings whenever state or local law gave citizens the right to challenge state or local government action that adversely affected them. OAH was also given the responsibility of ensuring that state agency rulemaking and rulemaking proceedings conform to requirements of the law. In 1981, the legislature gave OAH the added responsibility of conducting hearings to resolve claims for workers' compensation benefits. And in 1998, the legislature added to that responsibility by transferring the functions of the Department of Labor and Industry's Judicial Services Unit to OAH. That gave OAH responsibility for providing certain alternative dispute resolution services to parties involved with workers' compensation benefit claims.

At A Glance

Annual Business Processes:

- ◆ Service to more than 80 state agencies and 20 local government units
- ◆ 584 administrative rulemaking and contested case proceedings per year
- ◆ 7,211 workers' compensation settlement matters disposed of per year
- ◆ 4,344 workers' compensation hearing matters disposed of per year

Core Functions

The agency's two operating divisions provide a variety of dispute resolution services to parties involved with administrative hearings and workers' compensation benefit claims, namely:

- ◆ providing persons adversely affected by state or local government actions with full and fair opportunities to be heard and to challenge those actions;
- ◆ ensuring that agency rules and rulemaking proceedings conform to the law and allowing the widest possible public participation in the formulation of agency rules;
- ◆ providing injured workers, their employers, and workers' compensation insurers with prompt and impartial resolutions of claims for workers' compensation benefits; and
- ◆ encouraging and assisting disputing parties to resolve their differences through settlement, arbitration, and mediation.

Operations

The administrative law judges (ALJ) assigned to the agency's Administrative Law Division serve and meet the administrative hearing needs of most state agencies and a number of local governments. Upon request, they also provide arbitration and mediation services to those customers. Administrative law judges also review all proposed agency rules and amendments for legality, necessity, and reasonableness and conduct public rule hearings when required. The compensation judges assigned to the agency's Workers' Compensation Division are responsible for conducting most pre-trial and all trial level functions associated with the disposition of claim petitions for workers' compensation benefits. Those functions include disposing of motions, conducting settlement and pre-trial conferences, conducting trials, and issuing awards and final decisions.

Key Measures

| | Statutory Requirement | 2002 |
|---|--------------------------|-----------|
| ⇒ Average time for ALJs to issue final decisions/recommendations after the record closes. | 90 days | 17 days |
| ⇒ Average time for compensation judges to issue final decisions after the record closes. | 60 days | 34.6 days |
| ⇒ Average time for compensation judges to issue orders on requests for discontinuance of benefits, medical and rehab requests. | 5 days | 3.4 days |
| ⇒ Percent of attorneys and parties who rated OAH judges as "excellent" or "good" in each of 21 categories. (See OAH website for more information on this survey.) | NA | 75%* |

* 1999 information – 2002 data will be available in January 2003.

Budget

OAH maintains a staff of 94 full-time equivalent positions, and its FY 2002-03 biennial budget totals \$17.3 million. The Administrative Law Division has a \$2.3 million biennial budget, which is funded by a Special Revenue Revolving Fund. Deposits into that fund are collected from state agencies and local governments through hourly charges for administrative law judges and staff attorneys. The Workers' Compensation Division has a \$15.0 million biennial budget funded by an appropriation by the legislature from the state's Workers' Compensation Special Compensation Fund.

Agency Purpose

The mission of the Minnesota Department of Agriculture (MDA) is to work toward a diverse agricultural industry that is profitable and environmentally sound; to protect public health and safety regarding food and agricultural products; and to ensure orderly commerce in agriculture and food products.

From the farm to your family, the MDA ensures that Minnesota agricultural products used in production or available for consumption meet or exceed regulatory standards. These standards are set by state and federal laws that ensure the quality of products and the safety of food. The MDA also helps sustain and enhance the economic and environmental conditions of the agricultural sector in a number of ways. Since Minnesota produces more food and agricultural products than its citizens can consume, it must focus on marketing strategies that encourage exports to other states and countries. The MDA plays a lead role in helping the state's farmers and agricultural businesses build trade relationships with potential customers in other states and countries.

Core Functions

The Protection Services Program provides regulatory oversight for agricultural products from the farm to retail stores. Many of these regulatory activities touch consumers' everyday lives. For example, the MDA protects consumers by inspecting food and dairy products, dairy farms, food processing facilities, grocery stores, and even food stands at the Minnesota State Fair. The MDA also regulates, inspects and analyzes animal feed, fertilizers and pesticides; it performs laboratory analysis on food products; and inspects grain and fresh produce moving into or out of Minnesota. The MDA helps protect the environment by monitoring surface and ground water for possible contaminants and by preventing the establishment of destructive tree and plant pests such as gypsy moth and Japanese beetle.

The Agricultural Marketing and Development Services Program helps sustain and enhance farmers' economic and environmental well-being through a number of services. The program develops and tests new farming practices that help minimize environmental impacts, educates farmers about these practices and encourages their implementation with education and technical assistance. It gives farmers updated information on plant pests during the growing season, helping them determine how and when to take action to protect their crops. The program also helps the state's agricultural community expand existing markets and develop new markets for Minnesota agricultural products. This includes developing international trade opportunities, offering educational programs on risk management, and encouraging value-added activities such as ethanol production.

The Administration and Financial Assistance Program provides leadership and administrative support to the agency, gathers important statistical information for the farm sector, and offers financial assistance to producers. This program provides overall leadership and coordination of agency efforts. It coordinates communication with internal and external stakeholders including farmers, media, and other government bodies. It provides fiscal oversight to the department and provides important information on employment and benefits to employees. Producers use the statistical information gathered by our joint federal/state division of Ag Statistics to learn about important trends in their industry. The publications provide valuable information on crop conditions, production statistics, and forwards information on Minnesota agriculture to the U.S. Department of Agriculture (USDA). Producers and rural lenders benefit from the Rural Finance Authority loan programs. These loans help beginning farmers get started and they help producers upgrade existing production facilities.

At A Glance

Why is agriculture vital to 21st century Minnesota? In addition to providing us with the world's most abundant and wholesome food supply, agriculture remains a cornerstone industry.

- ◆ Agriculture and its related industries account for nearly 20% of all Minnesota jobs
- ◆ Two-thirds of all agricultural jobs are off-farm, in processing, distribution, supply, and service sectors
- ◆ Every ag production job helps create another 3 jobs in other sectors
- ◆ The dairy sector alone employs more Minnesotans than Northwest Airlines, 3M and Target Corporation combined
- ◆ Exports of farm products bring in more than \$2 billion to the state each year
- ◆ Every dollar in agricultural and food export generates another \$2.5 in economic activities in other economic sectors
- ◆ More than half of the state's total land area is farmland

Operations

The department's main office is at 90 West Plato Boulevard, in St. Paul. However, since most of the regulatory and promotion services we provide require face to face contact with our farmers, producers, and consumers, almost half of our staff is scattered throughout the state in the areas they serve. Our inspectors are responsible for on-site inspections of facilities. These inspections ensure that the agricultural products and processes meet applicable standards for quality and integrity. For example, the fertilizer we use on our lawns must meet quality standards just as the fertilizer used in production agriculture. The pesticides we use in our homes are regulated just as those used by farmers. Milk is inspected at many points, from the farm to the milk plant to our supermarkets. Sustainable agricultural practices, such as biological control of weeds and pests, benefit not only the farmers but the shoppers in the urban shopping malls.

In addition to ensuring the safety and integrity of products, the department helps farmers and agribusinesses market those products in an increasingly competitive global marketplace. The MDA encourages value-added activities and the development of new domestic markets for existing ag products, and it works with other state offices to stimulate international exports of Minnesota-grown agricultural products. This is done to help keep Minnesota's agricultural community competitive in the world marketplace.

Budget

For the 2002-03 Biennium, MDA's budget is \$176,365,188

Expenditures by Program are::

| | |
|---------------------------------------|--------|
| Protection Services | 34.54% |
| Ag Marketing and Development Services | 14.78% |
| Ethanol Producer Payments | 39.20% |
| Admin and Financial Assistance | 11.47% |

Funding sources are:

| | |
|---|--------|
| General Fund | 23.77% |
| Open Appropriation-Ethanol | 39.20% |
| Dedicated-Special Revenue and Ag Fund | 27.14% |
| Environmental Fund | 1.30% |
| Federal Funds | 3.54% |
| Miscellaneous Funds | 0.13% |
| LCMR | 0.26% |
| Loans-Public Facilities and Rural Finance Authority | 4.66% |

During the 2002-03 Biennium, MDA reorganized Ethanol Producer Payments into a separate program.

Reorganizations for the 2004-05 Biennium are:

- ◆ Dairy Profitability and Enhancement moves from Dairy and Food Inspection Services to Grants and Claims; and
- ◆ Meat Inspection moves from Dairy and Food Inspection Services to Ag Marketing Services.

Program Description

The purpose of the Protection Services Program is to protect the state's citizens and environment by ensuring the quality, integrity, and safety of agricultural and horticultural products that are produced and used in Minnesota.

Budget Activities Included:

- ⇒ Agronomy and Plant Protection
- ⇒ Dairy and Food Inspection
- ⇒ Laboratory Services
- ⇒ Grain and Produce Inspection

Activity Description

Agronomy and Plant Protection (APPD) regulates pesticides, fertilizers, seed, commercial feed, noxious weeds, nursery stock, exotic pests, and agricultural export certification. This encourages fair competition, quality assurance for consumers, environmental and human health protection, and quality assurances for plant and grain exports.

Population Served

All citizens of the state, producers, and agricultural industries benefit from APPD activities. APPD activities directly affect agriculture, and the protection of land and water resources affects all within the state. Also, a significant amount of the regulated activities occur in urban areas. In addition, the division works directly with other states and countries to facilitate global trade through regulatory and export certification programs.

Services Provided

APPD has broadly diverse responsibilities in three broad categories:

- ◆ traditional farm input regulation;
- ◆ environmental regulation; and
- ◆ plant and plant pest regulation.

Regulatory strategies in all areas include education, training, monitoring, licensing, permitting, and promotion of voluntary practices along with inspection, investigation, and enforcement actions.

The traditional mission of the division has been to ensure that seed, fertilizer, commercial feed, and other farm inputs were properly labeled and met legal criteria. This provided fair competition for the industry and guaranteed product quality for farmers and consumers. This mission is still important, but there is an increasing emphasis on product use and sale in urban areas and all tasks have become increasingly complex. For example, urban lawn and garden fertilizer has come under increasing scrutiny; more regulatory attention has focused on the pet food product quality; and the threat of Bovine Spongiform Encephalopathy (BSE), or "mad cow" disease requires more complex inspections at feed manufacturing facilities.

The division conducts a variety of fixed facility inspections for pesticides, fertilizers, seed, feed, and plant pests. Products are registered; individuals, companies, nursery stock and export products are certified, licensed or permitted. Education and compliance workshops update and communicate legal requirements or voluntary practices to clientele. Water quality and invasive species are extensively monitored. When necessary the division also directly protects Minnesota natural resources through the control of pests such as gypsy moth. The division also administers remediation and response to agricultural chemical incidents utilizing state superfund or an industry-supported reimbursement program. Additionally, the division facilitates property transfers by the oversight of environment site assessments.

Historical Perspective

Since the mid 1980's environmental concerns regarding pesticides and fertilizers have greatly increased. The revision of the Minnesota Pesticide Control Law in 1987 and the passage of the Comprehensive Groundwater Protection Act of 1989 resulted in significant and broad new responsibilities for the division. Programs such as waste pesticide collection, emergency response, superfund, ag chemical cleanup reimbursement, water quality monitoring, and increased applicator licensing and certification of applicators added not only a heavy workload but a changed focus to the services provided by the division. These programs also require highly technical and scientifically based regulatory action.

Activity at a Glance

- ◆ Collected 179,027 pounds of waste pesticides
- ◆ Issued 30,000 pesticide licenses or certificates
- ◆ Permitted 1,186 chemigation sites
- ◆ Registered 11,000 pesticide products
- ◆ Set 15,342 gypsy moth traps
- ◆ Collected approximately 900 pesticide, water quality samples
- ◆ Provided \$2,624,785 in ag-chemical cleanup reimbursement
- ◆ Permitted 600 ag chemical storage sites
- ◆ Certified 38 manure testing laboratories
- ◆ Issued 3,196 export documents
- ◆ Responded to 304 agricultural incidents such as chemical spills

AGRICULTURE DEPT

Program: PROTECTION SERVICES

Activity: AGRONOMY AND PLANT PROTECTION

Narrative

In 1996, plant protection regulatory responsibilities were transferred to the division. Nursery inspection, plant pest monitoring and management, and export certification require very different services and technical capabilities. With increased global trade, these programs must address new pests from other parts of the world, high demand for services to expedite the shipment of Minnesota plant products and the regulation of a rapidly expanding nursery industry. Staff entomologists, plant pathologists, and horticulturalists are increasingly challenged to protect Minnesota's industries and natural resources by monitoring for and combating plant pests such as gypsy moths and karnal bunt, as well as conducting field inspections and certifying the pest-free status of shipments of a wide variety of products for foreign markets.

Increasing demands on the division's programs coupled with flat or decreasing funding in special services accounts and general funds are resulting in difficult project prioritization and reduced services. Programs such as Agriculture Chemical Response and Reimbursement Account (ACRAA) reimbursement program, waste pesticide collections, and ground and surface water monitoring programs, and BSE inspections are nationally recognized for their effectiveness and innovation. In addition, biological pests are increasing in prevalence due to recent expansion of global and interstate trade and to biological factors beyond Minnesota's control.

Activity Funding

Sources of funds for this activity are:

| Funds: | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|----------------|----------------|-----------------|
| General Fund | 17.59% | 16.85% | 17.22% |
| Dedicated-Special Revenue and Ag Fund | 69.78% | 64.33% | 67.03% |
| Federal | 7.91% | 6.64% | 7.27% |
| Environmental | 4.71% | 12.13% | 8.46% |
| Other | 0.02% | 0.04% | 0.03% |
| Total | 100.00% | 100.00% | 100.00% |

| Expenditures by Category by Fund: | Salaries | Operating | Pass Thru |
|--|-----------------|------------------|------------------|
| General Fund | 13.24% | 3.97% | 0% |
| Dedicated-Special Revenue and Ag Fund | 35.21% | 31.35% | 0.46% |
| Federal | 4.56% | 2.57% | 0.15% |
| Environmental | 1.94% | 6.52% | 0% |
| Other | 0% | 0% | 0.03% |
| Total | 54.96% | 44.41% | 0.64% |

Not included in the above totals is the \$200,000 per year transfer to Agriculture Utilization Research Institute (AURI).

Key Measures

Performance measures used to evaluate effectiveness are:

- ◆ The division will develop real-time electronic data sharing capability by making forms and databases available through the internet to interested parties and regulated clientele.

Activity Description

Dairy and Food Inspection works to ensure that the food and dairy products Minnesotans consume are safe and wholesome. This is accomplished through regulatory inspections and enforcement, surveillance sampling, special investigations, consumer protection, and educational outreach. The goal of these food safety programs is to prevent the sale or consumption of adulterated food and dairy products and to heighten awareness of proper biosecurity and food safety practices.

Population Served

The entire population of Minnesota, as well as visitors and tourists and those outside Minnesota who consume dairy and food products produced, processed, prepared or sold in the state benefit from the service provided by these food protection programs. Minnesota businesses that export food and dairy products benefit from certificates of free sale issued by the Minnesota Department of Agriculture (MDA) as well.

Activity at a Glance

- ◆ Inspected 6,788 dairy farms, 427 bulk milk trucks, 1,345 haulers, and 57 plants
- ◆ Inspected 1,697 food processing plants, 6,225 retail food stores, and 105 mobile concessions
- ◆ 3,718 dairy samples taken (average 4.5 tests per sample)
- ◆ 1,878 food samples taken (average 2.4 tests per sample)
- ◆ Issued 895 Certificates of Free Sale for export
- ◆ Leveraged resources with other inspection agencies: 15 partnerships, 2 contracts and 4 grants

Services Provided

Dairy inspectors routinely inspect and take samples from dairy farms, processing plants, and bulk milk trucks to make sure all milk and dairy products are produced and handled safely. Inspectors also test pasteurizer equipment for proper operation, certify bulk milk hauler-samples, review labels for accuracy, work with farmstead cheese processors, and provide information to dairy farmers and processors to help keep them current with the latest laws and regulations. Milk survey officers check that the dairy industry, milk laboratories, and the Dairy Program comply with the federal Pasteurized Milk Ordinance, allowing Minnesota dairy products to be shipped in interstate commerce.

Food inspectors conduct routine and follow-up inspections at food manufacturing/processing plants, canneries, warehouses, salvage operations, concession stands and retail food stores. They also conduct regulatory and surveillance food sampling to determine food safety trends and emerging pathogens and conduct inspections under contract with the U.S. Food and Drug Administration (FDA). Inspectors investigate complaints, conduct final inspections of new and remodeled facilities, and work with local health departments to ensure uniform inspection procedures across the state. In addition, they investigate food borne illness outbreaks to determine the cause, remedy the problem, and prevent similar problems in the future. They also work with the industry and the public on food recalls originating in Minnesota or elsewhere and work to verify that recalled products have been removed from sale. The inspectors respond to emergencies such as floods, fires, truck rollovers, and other emergencies where food is involved to determine if the food is safe and wholesome, and to prevent damaged and contaminated goods from reaching the public.

The Compliance Section supports the dairy and food inspection programs in law enforcement and compliance activities. Compliance officers conduct special projects and investigations, work with delegated local health agencies, review plans for newly constructed and remodeled facilities, and train inspectors, industry, and consumers on the latest food safety issues. Many of the projects and training efforts are developed in partnership with the Minnesota Department of Health (MDH), University of Minnesota (U of M), local health agencies and representatives of the food or dairy industry. The Compliance Section, with division management, also develops legislation and regulations to safeguard our food system.

Historical Perspective

The food and dairy programs are moving toward a risk-based inspection program, which allocates scarce resources to facilities that have a higher risk or potential of causing food borne illness. While ordinary operations still have oversight, more complex, high-risk operations processing or preparing foods often involved in food

AGRICULTURE DEPT

Program: PROTECTION SERVICES

Activity: DAIRY AND FOOD INSPECTION

Narrative

borne outbreaks receive more frequent inspections and, in many cases, assistance in developing and following Hazard Analysis Critical Control Point (HACCP) plans to address problems before they occur.

Food and dairy inspection has become a more complicated and expensive business. A food and dairy industry that is becoming more mechanized and computerized with more complex, engineered foods requires well-equipped, highly trained overseers. A global food supply with challenging import and export standards, lower detection limits for contaminants, and new concerns about antibiotics, pesticide residues and emerging pathogens makes a close working relationship with a state-of-the-art laboratory essential. Efficient inspection programs demand the best computer and information technology. Electronic inspections, access to summary data from anywhere in the state, and prompt electronic analysis of data are vital components of an effective program in the electronic age.

Finally, the terrorist events of last September 11th have added an entire new consideration for increased security, planning, and emergency response in case of a terrorist attack on our food supply. Food and dairy businesses, especially medium-sized and small businesses that don't have the resources themselves, look to the department for guidance in preparing for and responding to such events.

Activity Funding

Sources of funds for this activity are:

Funds:

| | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|---------|---------|----------|
| General Fund | 68.30% | 65.95% | 67.08% |
| Dedicated-Special Revenue and Ag Fund | 30.32% | 31.99% | 31.18% |
| Federal | 1.38% | 2.06% | 1.73% |
| Other | 0% | 0% | 0% |
| Total | 100.00% | 100.00% | 100.00% |

Expenditures by Category by Fund:

| | Salaries | Operating | Pass Thru |
|---------------------------------------|----------|-----------|-----------|
| General Fund | 57.42% | 9.67% | 0% |
| Dedicated-Special Revenue and Ag Fund | 22.40% | 8.68% | 0.10% |
| Federal | 0.95% | 0.78% | 0% |
| Other | 0% | 0% | 0% |
| Total | 80.77% | 19.13% | 0.10% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ⇒ Total number of inspections completed versus total number of inspections required (according to risk categories). For example, high, medium, and low risk of causing foodborne illness.
- ⇒ Total number of dairy and food samples collected with average number of tests done on each sample.
- ⇒ Number of partnerships, agreements, and grants initiated or continued to leverage resources.

Contact

For additional information on this activity, please contact Shirley Bohm, Division Director, at (651) 296-1590 or Shirley.Bohm@state.mn.us.

Additional information about dairy and food inspection activities are also available on the MDA's web site and the Dairy and Food Inspection Information/Complaint desk at (651) 296-1592.

Activity Description

Laboratory Services Division (Lab) provides analytical support and data that is critical to the protection of Minnesota's food supply, agricultural industry, and environment. Analysis results must be legally defensible in case regulatory action is taken.

Population Served

The laboratory protects all Minnesota citizens and those who use Minnesota agriculture or agricultural products by working to ensure a safe, secure food supply and to protect the environment from misuse of agricultural chemicals. Through partnerships, we serve the entire nation as we work with other states and federal agencies to identify and address problems of national concern and work to ensure the wholesomeness of Minnesota's food exports.

Services Provided

Laboratory Services performs chemical, microbiological, and physical analyses of food, dairy products, beverages, water, fertilizer, lime, feed, seed, plant material, pesticides, pesticide residues, and grain. These tests support inspection and enforcement activities of the Minnesota Department of Agriculture's (MDA) regulatory divisions. We also determine products' quality and conformance to state and federal laws and regulations, to provide legally defensible evidence in legal proceedings against violators.

Our mission includes routine analyses to ensure that products meet legally mandated quality standards, such as analyzing a fertilizer to see if it is contaminated by heavy metals (i.e. arsenic or lead). It also provides for forensic analysis to identify unknown agents in a suspect product. Beyond that, our lab's special analytical testing gives the department rapid and accurate data needed to respond promptly and effectively to environmental and food-borne crises, such as E. coli contaminated ground beef and pesticide residues in produce. The Lab develops and maintains new analytical capabilities as new problems or questions arise within the feed, food, and agrochemical industry. We also consult on analytical issues with inspectors, managers, private analytical laboratories, and regulated industries.

In addition to our services to MDA's regulatory programs, the Lab provides analyses for the U.S. Department of Agriculture (USDA), the Food and Drug Administration (FDA), the Environmental Protection Agency (EPA), and other federal and state agencies. It also administers a laboratory certification program for private and commercial testing laboratories as required by law.

Historical Perspective

Laboratory Services has served Minnesotans since 1887. The lab's first duty was to oversee our state's dairy industry. Over the years our services have grown to include seed quality analysis and ever more complicated analytical services such as microbiological, chemical and plant analysis of seed, feed, food, and dairy products. The 1989 groundwater protection legislation created a special need to expand the lab's analytical capabilities and technology to include testing for a vast array of pesticides and other agricultural chemicals. In 1995, the MDA integrated the Minnesota Department of Natural Resources (DNR) analytical services into MDA's operations. This allowed the DNR to close two laboratories while still providing their programs the quality data required for decision-making. In 1999, the closure of the FDA Minneapolis lab led to the first ever location of federal FDA staff in a state facility bringing additional expertise and partnerships to the laboratory. The newly funded lab facilities co-located with the Minnesota Health Department's (MDH) laboratory will help expand this unique partnership, and give Minnesota the capacity to better address emerging food security concerns and threats of terrorism.

Activity at a Glance

The Laboratory Services Division consists of a number of analytical units providing diverse analytical services to help ensure food safety/security while protecting the agriculture industry and our environment. These units include:

- ◆ Microbiology Analysis
- ◆ Food/Dairy Chemical Analysis
- ◆ Agronomy Analysis
- ◆ Environmental Analysis
- ◆ Seed and Plant Analysis
- ◆ Laboratory Operations
- ◆ Quality Assurance

AGRICULTURE DEPT

Program: PROTECTION SERVICES

Activity: LABORATORY SERVICES

Narrative

The laboratory will face growing pressures and challenges to address the significant changes occurring in analytical technology, laboratory information systems, ISO accreditation requirements, and laboratory safety and security concerns.

Activity Funding

Sources of funds for this activity are:

| Funds: | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|----------------|----------------|-----------------|
| General Fund | 51.85% | 51.21% | 51.53% |
| Dedicated-Special Revenue and Ag Fund | 39.67% | 39.83% | 39.75% |
| Federal | 8.48% | 8.96% | 8.72% |
| Other | 0% | 0% | 0% |
| Total | 100.00% | 100.00% | 100.00% |

| Expenditures by Category by Fund: | Salaries | Operating | Pass Thru |
|--|-----------------|------------------|------------------|
| General Fund | 31.33% | 20.19% | 0% |
| Dedicated-Special Revenue and Ag Fund | 21.67% | 18.08% | 0% |
| Federal | 3.63% | 5.09% | 0% |
| Other | 0% | 0% | 0% |
| Total | 56.64% | 43.36% | 0% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ◆ provide end users ready access to laboratory data through the new Laboratory Information Management system, so that analysts, decision makers, and interested individuals get the information they need.
- ◆ Percent of required real time Analytical Quality Control available to analysts in the laboratory.
- ◆ Minimize effort and resources when identifying analytical methods and trends in food safety and security through participation in the new ECam and E-LexNet data and method indexes.
- ◆ Percent of defined priority food safety and security agents reported to the new federal ElexNet system.

Contact

For additional information on this activity, please contact William Krueger, Division Director, at (651) 296-1572 or William.Krueger@state.mn.us.

Activity Description

The Grain and Produce activity has three program areas:

- ◆ Grain inspections and sampling analysis;
- ◆ Fruit and Vegetable inspections services; and
- ◆ Certified Seed Potato inspection services.

The inspection services provided are a combination of voluntary and mandatory activities to ensure fair marketing and appropriate end use of the product. This facilitates fair pricing of healthy produce and grain products. It also is used by clients to determine conformance with contract specifications of quantity and quality, which promotes fair trade practices.

Population Served

Grain Inspection:

- ◆ consumers around the world;
- ◆ elevators;
- ◆ exporters;
- ◆ processors;
- ◆ livestock feeders and grain farmers; and
- ◆ trading firms and those involved in the grain trade and transportation industry throughout the U.S. and its customers worldwide.

Fruit and Vegetable Inspection:

- ◆ consumers;
- ◆ produce brokers;
- ◆ wholesalers;
- ◆ processors;
- ◆ retailers; and
- ◆ exporters.

Certified Seed Potato Inspection:

- ◆ seed potato growers;
- ◆ processors and wholesalers of any kind, whether in or out of the state;
- ◆ consumers; and
- ◆ potato producers.

Services Provided

The Grain Inspection program provides neutral-party, accurate, repeatable, rapid quantity and quality determinations on grains. This service is provided under agreements with the U.S. Department of Agriculture's (USDA) Federal Grain Inspection Service. Services facilitate the marketing, storage and use of grain as well as promoting fair and competitive trade. The provision of these consistent professional weighing, sampling, testing, and grading services allows voluntary domestic and mandatory export customers the ability to trade with certainty of grain quality and quantity.

The Fruit and Vegetable program provides an unbiased third-party opinion on the quality and quantity of produce, ensuring that both are fairly reflected in the price to consumers. It allows shippers and receivers to operate in a fair market, with commodities that further ripen during shipment. Inspections occur at wholesale and delivery

Activity at a Glance

Grain Inspection:

- ◆ More than 77,000 inspections in FY 2001 of officially sampled and inspected grain equaling 468 million bushels. This does not count grain presented for submitted or commercial inspections or other weighing and tests. By comparison 1.2 billion bushels of corn, soybeans, wheat, and barley were grown in Minnesota in 2001.

Produce Inspection:

- ◆ Staff are licensed to inspect 85 different fruits and vegetables
- ◆ 43 million pounds of produce inspected in FY 2002
- ◆ 603 million pounds of potatoes at processing plants and 9 million pounds of table stock potatoes

Minnesota Certified Seed Potato:

- ◆ 9,330 acres enrolled in program with an estimated value of seed crops up to \$20,000,000
- ◆ 45 million pounds of certified seed potatoes given shipping point inspections

AGRICULTURE DEPT

Program: PROTECTION SERVICES

Activity: GRAIN & PRODUCE INSPECTION

Narrative

points, at the producer's sites for shipping point, and at the processing plants to determine market value and end use potential.

The Certified Seed Potato program markets, inspections, and tests seed potato lots to determine adherence to disease tolerance levels, freedom from certain diseases, and varietal purity of 75 different varieties of potatoes. It also provides recognition and increases market share by promoting the quality of the Minnesota Seed Potatoes.

Historical Perspective

Grain inspection revenue fluctuates with the level of commodity exports. The table below reflects Minnesota exports for the past three crop years.

| Commodity | September – August | | |
|-----------|----------------------------|----------------------------|----------------------------|
| | 2000-01 Million Bushels | 2001-02 Million Bushels | 2002-03 Million Bushels |
| Corn | 490 | 440 | 620 |
| Soybeans | 923 | 971 | 922 |
| Wheat | 32 | 22 | 10 |

Adding to the volatility of the program is the increasing demand for services in sampling and inspecting 110 rail car shuttle trains with a 12-15 hour completion requirement.

Seed Potato acreage enrolled in the Certified Seed Potato Program has fluctuated over the last five years. Acreage enrolled has gone from a high of 14,712 acres in 1998, to a low of only 9,030 acres in 2001. Current acreage is 10,135 acres.

Activity Funding

Sources of funds for this activity are:

| Funds: | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|---------|---------|----------|
| General Fund | 8.01% | 8.12% | 8.15% |
| Dedicated-Special Revenue and Ag Fund | 94.05% | 91.71% | 91.85% |
| Federal | 0% | 0% | 0% |
| Other | 0% | 0% | 0% |
| Total | 102.06% | 99.82% | 100.00% |

| Expenditures by Category by Fund: | Salaries | Operating | Pass Thru |
|---------------------------------------|----------|-----------|-----------|
| General Fund | 7.36% | 0.79% | 0% |
| Dedicated-Special Revenue and Ag Fund | 70.56% | 21.29% | 0% |
| Federal | 0% | 0% | 0% |
| Other | 0% | 0% | 0% |
| Total | 77.92% | 22.08% | 0% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ◆ Fruit and Vegetable Inspection provides inspection services within six hours of request or on-line as requested at processing facilities.
- ◆ Grain Inspection provides services within six hours of customer request.

Activity Description

Agricultural Marketing Services (AMS) assists in the orderly marketing of Minnesota's agricultural commodities and products; promotes Minnesota agricultural products in domestic and international markets; furnishes information and economic analyses related to marketing opportunities; provides promotional, informational and other marketing services for agricultural producers, processors, consumers, and others involved in the marketing process; and protects producers through programs related to the licensing, bonding, and certification in the sale and storage of agricultural products.

Included in AMS is the State Meat Inspection program which provides on-site inspection services at processing plants to the meat and poultry industry.

Population Served

AMS serves grain, livestock, vegetable, fruit, poultry, dairy producers, agri-businesses, manufacturers, processors, distributors, retailers, and exporters by protecting and promoting Minnesota agriculture. Consumers and end users benefit from the introduction and promotion of Minnesota agricultural products.

Currently the Meat Inspection Program has 60 processing plants under inspection. These processing plants plus the meat and poultry processors and livestock producers in Minnesota benefit from this program.

Services Provided

AMS helps diversify agriculture in Minnesota by promoting:

- ◆ Minnesota-Certified and Identity-Preserved Products, so producers can maximize their profits by differentiating what they produce from commonly produced commodity products.
- ◆ Risk Management and Dairy Options Pilot Program, so producers can protect themselves from market volatility.
- ◆ Dairy and Livestock development, so the state can maintain productivity in animal agriculture and maintain a diverse agricultural economy.
- ◆ Renewable fuel production and use, so Minnesota grain can help reduce air pollution and dependence on imported fossil fuels.
- ◆ Farmers markets, so producers can maximize their profits in the sale of fresh farm produce.
- ◆ Minnesota-Grown labeled products, so consumers can buy produce 2,000 miles fresher.

AMS protects producers by licensing, bonding, inspecting, and auditing:

- ◆ grain buyers and grain storage elevators;
- ◆ livestock dealers, markets and agents; and
- ◆ wholesale produce dealers.

AMS serves beekeepers by inspecting bee colonies to allow interstate shipment and bee colony inspections that track the health of Minnesota's honeybee population.

AMS helps commodity growers by overseeing the operations of the state's 12 commodity promotion and research councils.

The State Meat Inspection program provides on-site inspections during processing to 60 small- to medium-sized processing facilities. This program allows product to be sold at wholesale and retail in the state of Minnesota.

Activity at a Glance

This activity has three major functions:

- ◆ Help producers and agribusinesses add value to agricultural products by helping them find and capitalize on marketing opportunities.
- ◆ Protect producers of agricultural products by licensing, bonding, and auditing of persons and companies that buy grain, livestock and wholesale produce; registering and inspecting honeybee colonies; and accurately weighing of livestock.
- ◆ Provides State Meat Inspection program services, which allows producers and processors to direct market their product within the state of Minnesota.

AGRICULTURE DEPT

Program: AG MARKETING AND DEVELOPMENT

Activity: AG MARKETING SERVICES

Narrative

Historical Perspective

As farmers' productivity has outpaced Minnesota's population, the need for effective marketing and adding value has also increased. The globalization and consolidation of agriculture means that family farmers and local agri-businesses need help to sell their quality products locally, nationally, and internationally, and prosper in a changing economy. We help Minnesota consumers and producers connect locally through the Minnesota Grown program and connect Minnesota producers and agri-businesses with the world through trade missions and international cooperation. Licensing, bonding, and auditing programs are more important than ever when sellers and buyers are no longer neighbors but strangers. Producers in a changing landscape receive education on their rights under Minnesota and federal law, and Minnesota Certified Farm Risk Management Consultants help producers make fully informed business decisions.

In January 1999, the State Meat Inspection program started with one processing plant. That plant produced 100 pounds of inspected product during that first month. The 60 plants presently operating under state inspection produce more than 500,000 of product each month and slaughter more than 2,000 head of livestock. This creates more than \$40 million in of meat sales per year.

Activity Funding

Key Measures

Performance measures used to evaluate effectiveness are:

- ⇒ Ensure the orderly marketing of agricultural products through the licensing, bonding, and auditing of grain elevators, grain buyers, wholesale produce dealers, and livestock dealers.
- ⇒ New or expanding domestic and international markets are identified, analyzed, and developed.
- ⇒ Verify the wholesomeness of product processed under Minnesota State Meat Inspection program to ensure it meets and/or exceeds U.S. Department of Agriculture standards for meat processed for sale and sold wholesale.

Activity Description

Resources Management and Development supports the development of an agricultural industry that is profitable and environmentally sound by assisting producers with resource management and protection, conducting on-farm research, developing and transferring information and technology; and providing pest management and diversification options.

Population Served

Resources Management and Development primarily serves producers, and indirectly serves agricultural professionals, processors, suppliers and the general public. We work closely with researchers, local governments and state, local and federal environmental or developmental agencies to develop partnerships to address issues or opportunities.

Services Provided

Services include the following:

- ⇒ Reach out and inform producers and other stakeholders about new production methods, techniques, and options through forums, conferences, publications, and web sites.
- ⇒ Organize research and development partnerships with producers, researchers and others to address environmental protection measures, overcome production barriers and create opportunities.
- ⇒ Provide financial and technical assistance to producers to make investments in environmental protection.
- ⇒ Sponsor on-farm demonstrations and pilot projects to evaluate and transfer information and technology.
- ⇒ Identify pest infestations and provide biological control and integrated pest management (IPM) strategies.
- ⇒ Assist local governments and producers with rural planning and land management.
- ⇒ Provide information to producers on diversification options, including participation in value-added organizations.

Activity at a Glance

- ◆ Respond to producer and stakeholder information needs regarding environmental compliance, pest management, organic certification, and other issues.
- ◆ Administer a \$52 million Ag BMP Loan Program.
- ◆ Enter into research partnerships to evaluate feasibility, cost and environment benefit of practices or technologies.
- ◆ Disseminate weekly pest field data directly to all growers and agricultural professionals.
- ◆ With partners, maintain and harvest 1,600 insectaries for leafy spurge control agents.
- ◆ Provide planning assistance to local units of government on land use planning and agricultural development.

Historical Perspective

The Resources Management and Development division administers or supports several state laws that affect resources management and development. These include the:

- ◆ Environmental Policy Act (environmental review);
- ◆ Agricultural Land Preservation and Conservation;
- ◆ Sustainable Agriculture and Integrated Pest Management (including biological control);
- ◆ Agricultural Diversification;
- ◆ Feedlot and Manure Management Advisory Committee;
- ◆ Agricultural Best Management Practices (BMP) Loan Program; and
- ◆ Organic Production and Certification.

Some trends affecting the division's clientele and mission include:

- ◆ state and federal environmental policy on feedlots, non-point source pollution, pesticide use, and conservation;
- ◆ growing opportunities for new industrial and commercial uses of agricultural products, such as energy;
- ◆ growing consumer demand for organic, natural, and eco-labeled food products;
- ◆ demand from small and medium-sized producers for sound diversification options with which to integrate operations, including participation in value-added organizations;
- ◆ ongoing decline in Minnesota's livestock production, particularly in dairy;
- ◆ loss of agriculturally related businesses in rural Minnesota;

AGRICULTURE DEPT

Program: AG MARKETING AND DEVELOPMENT

Activity: RESOURCES MANAGEMENT AND DEVELOPMENT

Narrative

- ◆ rising consumer expectations about environmental and food quality, and
- ◆ globalization of agriculture and the resulting need to be cost competitive.

Activity Funding

Sources of funds for this activity are:

| Funds: | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|----------------|----------------|-----------------|
| General Fund | 93.56% | 97.41% | 95.47% |
| Dedicated-Special Revenue and Ag Fund | 1.80% | 1.17% | 1.49% |
| Federal | 3.85% | 1.25% | 2.56% |
| Other | 0.79% | 0.16% | 0.48% |
| Total | 100.00% | 100.00% | 100.00% |

| Expenditures by Category by Fund: | Salaries | Operating | Pass Thru |
|--|-----------------|------------------|------------------|
| General Fund | 64.79% | 21.03% | 9.65% |
| Dedicated-Special Revenue and Ag Fund | 0.99% | 0.50% | 0% |
| Federal | 0.16% | 2.40% | 0% |
| Other | 0% | 0.48% | 0% |
| Total | 65.94% | 24.41% | 9.65% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ⇒ Conduct up to 50 site-specific demonstration projects to evaluate the feasibility of on-farm implementation of practices or technology on production, environmental protection, or pest management.
- ⇒ Fund about 2,000 agricultural practices that protect or enhance water quality while keeping producers economically viable, such as feedlot upgrades, conservation tillage, or structural erosion control.
- ⇒ Publish weekly pest reports during the growing season to inform growers of pest infestations with economic significance so that they can implement effective and environmentally sound control measures.

Contact

For information regarding the division's overall mission and programs, agricultural development issues, and assistance to cooperatives, please contact Gerald F. Heil, Division Director at (651) 296-1486 or Gerald.Heil@state.mn.us.

For information regarding information on Ag BMP loans, environmental review, agricultural land preservation, and animal agricultural issues, please contact Paul Burns, Assistant Director at (651) 296-1488 or Paul.Burns@state.mn.us.

For information regarding information on sustainable agriculture, integrated pest management, pest surveys and organic programs, please contact Mary Hanks, supervisor, Sustainable Agriculture, IPM, and Biological Control at (651) 296-1277 or Mary.Hanks@state.mn.us.

Program Description

The purpose of the Administration and Financial Assistance Program is to provide leadership and direction to the functions of the agency, and to provide Minnesota agriculture with financial assistance.

Budget Activities Included:

- ⇒ Grants and Claims
- ⇒ Rural Financing
- ⇒ Administrative Services

Activity Description

Farm Advocates provide one-on-one assistance for Minnesota farmers who face crisis due to a natural disaster or financial problems. Farm Advocates understand the needs of agricultural families. They are trained and experienced to deal with agricultural lending practices, mediation, lender negotiation, farm programs, crisis counseling and disaster programs, and to recognize the need for legal and social services.

Farmers' Market Nutrition Programs (FMNP) promote farmers' markets and improve the diets of low-income children, pregnant women, and seniors. The program aims to increase direct sales of locally grown produce and encourage consumption of fresh produce among low-income and nutritionally at-risk people.

The Dairy Development Profitability and Enhancement program is a grant program to assist dairy producers in the enhancement of their operations. This is accomplished through grants to dairy producers across the state in collaboration with local representatives of the University of Minnesota (U of M), Minnesota State Colleges and Universities (MnSCU), and industry. There are currently seven regional teams involved in assisting producers including Sustainable Farming Association.

Activity at a Glance

Farm Advocates Program

- ◆ Offer one-on-one assistance to farmers
- ◆ Offer expertise and referral services to farmers facing adversity due to a natural disaster or financial programs.
- ◆ Assisted 366 families in FY 2002

Farmers Market Nutritional Programs

- ◆ Number of authorized farmers' market vendors: 335
- ◆ Number of FMNP-WIC recipients: 42,000
- ◆ Number of FMNP senior recipients: 2,765

Dairy Development Profitability and Enhancement Program

- ◆ 1,200 farms served to date
- ◆ Teams consistently produce a four to one return on grant funds
- ◆ 49 business planning grants closed in FY 2002

Population Served

Farm Advocates assist farmers who are entering negotiations with a lender, liquidating assets of the farming operation, seeking financial assistance, and/or are receiving an adverse decision from a state or federal agency.

Farmers' Market Nutrition Program helps program vendors (farmers who sell at local farmers' markets) and program recipients (low-income, nutritionally at-risk pregnant or post partum women, children under the age of five, and low-income seniors).

Dairy Development Profitability and Enhancement program provides assistance to dairy producers of Minnesota who wish to improve their management skills and their operations through a grant program funding local teams. Local teams are composed of U of M Extension and MnSCU employees as well as local veterinarians, feed nutritionists and financial lenders. Through this cooperative effort producers have been able to eliminate bottlenecks on their operations and accomplish business and family goals.

Services Provided

Key farm advocate services include: financial planning; lender negotiations; farm program advice; referrals for legal services; and referrals for Social and Human Services.

FMNP issues checks to FMNP-WIC recipients through the local WIC (Women, Infant and Children) agencies that can only be redeemed at authorized farmers' markets for locally grown, fresh, unprocessed fruits and vegetables. Seniors receive checks from the agencies that distribute NAPS (Nutrition Assistance Program for Seniors) commodities. The department authorizes markets and vendors to accept the checks and investigates to ensure that vendors comply with program requirements and redeem checks only for eligible items.

The Dairy Development Profitability and Enhancement program has two facets: Dairy Enhancement Team Grants and Dairy Business Planning Grants.

AGRICULTURE DEPT

Program: ADMIN & FINANCIAL ASSIST

Activity: GRANTS AND CLAIMS

Narrative

The Dairy Development Profitability and Enhancement Teams work one-on-one with producers to help them achieve greater profitability, productivity, and efficiency. This grant is available to all dairy producers, but the program prioritizes small to medium-sized producers.

The Dairy Business Planning Grant provides a 50% cost share, up to \$5,000 per producer, of the cost of completing a business plan. Options explored by these producers have included on-farm processing, expansion, transferring the farm to the next generation, and environmental upgrades.

Historical Perspective

The Farm Advocate program was founded in the mid-1980s.

Minnesota has had state funded FMNP since FY 1989 and has received federal funds since federal FY 1994. The senior FMNP started in Minnesota in federal FY 2001, the first year federal funds were available.

The Dairy Diagnostic program was established in 1996 to address low profitability on dairy farms. During the 2001 legislative session, funding was increased and the Dairy Business Planning Grants were added.

Activity Funding

Sources of funds for this activity are:

Funds:

| | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|---------|---------|----------|
| General Fund | 50.34% | 67.13% | 57.54% |
| Dedicated-Special Revenue and Ag Fund | 0% | 0% | 0% |
| Federal | 47.91% | 31.69% | 40.95% |
| Other | 1.74% | 1.19% | 1.50% |
| Total | 100.00% | 100.00% | 100.00% |

Expenditures by Category by Fund:

| | Salaries | Operating | Pass Thru |
|---------------------------------------|----------|-----------|-----------|
| General Fund | 3.12% | 7.87% | 46.55% |
| Dedicated-Special Revenue and Ag Fund | 0% | 0% | 0% |
| Federal | 0% | 3.85% | 37.10% |
| Other | 0% | 1.50% | 0% |
| Total | 3.12% | 13.22% | 83.65% |

Key Measures

Performance measures used to evaluate effectiveness are:

Farm Advocate

⇒ Four hundred farm families will be served annually by 15 Farm Advocates.

Farmers' Market Nutrition Programs

⇒ Fifty percent of all first time check recipients who spend FMNP checks will be new market customers.

Dairy Profitability

⇒ A minimum of 350 producers served annually by a Dairy Profitability and Enhancement Team.

Activity Description

The Agricultural Finance division administers programs designed to enhance Minnesota's agricultural production and processing capacity, provide opportunities for renewable energy, and protect the environment.

The Rural Finance Authority (RFA), a separate public body created under M.S. Chapter 41B and authorized to utilize state bonds to develop the state's agricultural resources, is included in this activity.

Population Served

Eligible farmers who wish to purchase a farm, construct improvements on their farm, participate in value added activities, reduce production costs or protect the environment; and rural land owners with septic system needs.

Services Provided

Four primary activities are administered by the Ag Finance division. They include:

- ◆ Rural Finance Authority;
- ◆ Sustainable Agriculture Loan Program, jointly with Ag Development division;
- ◆ Agricultural Best Management Loan Program, jointly with Ag Development division; and
- ◆ Minnesota Corporate Farm Law.

The RFA may purchase a participation interest in a financial institution's agricultural loan when the loan is made to an eligible farmer for an eligible purpose, such as purchasing a farm or constructing new production buildings. A 45% interest in the loan may be purchased; up to \$125,000 under the Basic, Seller Assisted, and Ag Improvement programs; \$150,000 under Restructure II; and \$250,000 under Livestock Expansion. The loan must be secured by a first real estate mortgage. The RFA participation is structured on a reduced interest rate that is fixed for up to 10 years to improve the farmer's cash flow and reduce risk. The RFA has signed participation agreements that establish a partnership with over 400 qualified lenders. Currently, the RFA manages a loan portfolio of more than \$53.6 million, serving 1,180 farmers. A loan loss reserve greater than 1% of outstanding loan balances is maintained to preserve the financial strength of the state's investment.

The Agricultural Development Bond (Aggie Bond) Program creates a federal tax exemption for banks, and a federal and state tax exemption on interest income to an individual seller in exchange for offering below-market interest rates to the buyer. No state funds go into these loans.

In 1988, the Minnesota Legislature established the Shared Savings Loan Program within the Sustainable Agriculture statutes. The loan program is supported by a \$1 million revolving fund, and is designed to accomplish two goals. First, to demonstrate and publicize agricultural practices that are energy efficient, protect the environment, and lower production costs. Second, the program provides low-interest loans to farmers as an incentive to adopt such practices.

The Agricultural Best Management Program (AgBMP) was created by the 1994 State Legislature to provide low interest financing to farmers, agribusinesses, and rural landowners for the implementation of agricultural best-management practices that reduce or mitigate non-point source pollution. The program assists an eligible borrower through low-interest (3%) loans to purchase conservation tillage, seal abandoned wells, install agricultural waste facilities, erosion control systems, and septic systems.

The division also enforces and facilitates compliance with the Corporate and Alien Farm laws. The law's stated purpose is to protect the family farm as a basic economic unit and promote the stability and well being of rural society by ensuring that non-farm corporations and foreign entities do not own farm land or engage in production agriculture. The Corporate Farm Law (M.S. 500.24) was recodified in 1997 and amended substantially in 2000.

Activity at a Glance

- ◆ 2,132 farmers assisted through RFA
- ◆ \$96.2 million RFA real estate participations closed
- ◆ 419 RFA financial service centers available
- ◆ 3,073 legal entities certified under Corporate Farm Law guidelines
- ◆ 4,293 practices implemented through AgBMP
- ◆ 305 sustainable ag practices financed

AGRICULTURE DEPT

Program: ADMIN & FINANCIAL ASSIST

Activity: AGRICULTURAL FINANCE

Narrative

Historical Perspective

The Rural Finance Authority was established in 1986 to administer a program under which state bonds are issued to develop the state's agricultural resources. The initial program was designed to help lenders and borrowers restructure farm real estate loans that had become undersecured. In response to identified financing needs for agriculture, additional programs were initiated. They included the Basic Farm Loan (1987) and Seller-Assisted (1989) to help finance beginning and low-equity farmers to purchase farm real estate, Agricultural Improvement (1992) for existing farmers that needed to make improvements to their property, Restructure II for existing farmers who were in good standing with their local lender but having cash flow problems due to an imbalance in their debt structure, and Livestock Expansion (1994) to create affordable financing for new, state-of-the-art improvements for livestock production; the Value-Added "Stock" Loan Program (1994) and the Methane Digester Loan Program (2002).

Activity Funding

Sources of funds for this activity are:

Funds:

| | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|---------|---------|----------|
| General Fund | 5.41% | 57.56% | 9.27% |
| Dedicated-Special Revenue and Ag Fund | 20.63% | 42.21% | 22.22% |
| Rural Finance Administration | 0% | 0% | 0% |
| Public Facilities Authority | 73.95% | 0% | 68.47% |
| Other | 0.02% | 0.23% | 0.03% |
| Total | 100.00% | 100.00% | 100.00% |

Expenditures by Category by Fund:

| | Salaries | Operating | Pass Thru |
|---------------------------------------|----------|-----------|-----------|
| General Fund | 7.26% | 1.01% | 1.00% |
| Dedicated-Special Revenue and Ag Fund | 0.33% | 0.28% | 21.62% |
| Rural Finance Administration | 0% | 0% | 0% |
| Public Facilities Authority | 0% | 0% | 68.47% |
| Other | 0% | 0.03% | 0% |
| Total | 7.59% | 1.32% | 91.10% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ⇒ To direct more than 60% of the RFA loan participation to Basic, Seller-Assisted, and Agricultural Improvement loan programs.
- ⇒ To underwrite credits that show capital, liquidity, and debt service capacity comparable to industry standards.

Activity Description

Administrative Services provides the leadership to the Minnesota Department of Agriculture (MDA) and its employees, and outreach to the agriculture industry and Minnesota consumers. It also provides department-wide support in the areas of Human Resources, Finance and Budget, and Information Services by assisting divisions in providing efficient and effective programs.

M.S. 17 provides the statutory authority for the commissioner of MDA.

Minnesota's agriculture industry is the 6th largest in the nation.

Population Served

In addition to supplying essential assistance to MDA employees and programs, Administrative Services also works with the legislature, producers and processors in the agricultural industry, citizens of Minnesota, and partner-state and federal agencies.

Activity at a Glance

- ◆ Commissioner's Office oversees and directs the activity of the 10 divisions in MDA
- ◆ Human Resources and Diversity assist over 500 employees with personnel matters
- ◆ Finance and Budget works to build and manage an \$83 million annual budget
- ◆ Information Services provides, maintains and updates MDA's hardware, software and network computer assets
- ◆ Agricultural Statistics is a state/federal partnership that collects, correlates, and analyzes agricultural data
- ◆ MDA has 317 employees located in the Minneapolis/St. Paul metro area, and 220 employees located throughout Minnesota in the areas they serve

Services Provided

Services are provided through the:

- ⇒ Commissioner's Office—provides leadership for the department, sets policy, and interacts with our stakeholders—federal, state, local, and international.
- ⇒ Human Resources –provides employee safety and health program, labor relations program, training program, and diversity program in order to maintain a flexible and diverse workforce that can meet the needs of a changing and demanding workplace.
- ⇒ Finance and Budget—provides centralized accounting, payroll, budgeting, mail, and copying services to the employees of MDA.
- ⇒ Information Services—provides services to all divisions for computer systems analysis, technical support, programming, project management, web design, graphic arts, and centralized licensing service and prepares for future technology needs.
- ⇒ Agricultural Statistics—a joint federal/state division that collects, analyzes, and disseminates statistical information useful to not only agricultural producers and processors, but also to economists.

Historical Perspective

During this administration, there have been many existing and new executive challenges and opportunities. Farm production and the economy continue to face formidable challenges; food safety and agriculture security requirements at the highest level in recent history; department's budget and human resources have been obligated to respond to numerous critical situations (i.e. budget reductions, state government shutdown, union strike, etc.).

In six short years, the department has made significant advances to align business needs with technology support, moving from a fragmented information technology infrastructure to a highly integrated system providing improved support/services to our employees, customers, and Minnesota citizens. The department has a proven track record of successfully managing and completing complex information technology projects on time and within budget.

Narrative

Activity Funding

Sources of funds for this activity are:

Funds:

| | FY 2002 | FY 2003 | Biennium |
|---------------------------------------|---------|---------|----------|
| General Fund | 57.39% | 52.87% | 55.19% |
| Dedicated-Special Revenue and Ag Fund | 41.90% | 46.75% | 44.25% |
| Federal | 0.71% | 0.38% | 0.55% |
| Other | 0% | 0% | 0% |
| Total | 100.00% | 100.00% | 100.00% |

Expenditures by Category by Fund:

| | Salaries | Operating | Pass Thru |
|---------------------------------------|----------|-----------|-----------|
| General Fund | 27.63% | 24.25% | 3.31% |
| Dedicated-Special Revenue and Ag Fund | 41.89% | 2.37% | 0% |
| Federal | 0% | 0.55% | 0% |
| Other | 0% | 0% | 0% |
| Total | 69.52% | 27.17% | 3.31% |

Key Measures

Performance measures used to evaluate effectiveness are:

- ⇒ MDA will partner with other state departments of agriculture to increase our presence at the national level to insure Minnesota's agriculture is represented and heard.
- ⇒ MDA is designing and completing technology projects that will insure that the projects goals are defined by business practices. Our projects will be completed on time and within budget.

Contact

For additional information on budgets, please contact Becky Leschner, Budget Director, at (651) 215-5770 or Becky.Leschner@state.mn.us.

For additional information on policy, please contact Amy Sobieski, Legislative Liaison, at (651) 296-2880 or Amy.Sobieski@state.mn.us.

Additional information, such as the Commissioner's Column is also available on the MDA's web site.

Program Description

The Minnesota Department of Agriculture (MDA) makes Ethanol Development Payments to Minnesota ethanol producers based on a formula found in M.S. 41A.09.

Population Served

Currently 13 ethanol plants located throughout Minnesota receive producer payments.

One plant no longer receives payments, and two more have their payments limited due to reaching the 10-year limitation on part of their production.

Services Provided

Each plant submits a quarterly report of gallons of ethanol produced to the MDA. These reports are independently audited, and payments are made in accordance with the statute. Payments are made November 15, February 15, May 15, and August 15.

Historical Perspective

This program was authorized by the state legislature in 1986. Each plant enrolled in the program is eligible for payment of 20 cents per gallon of ethanol produced up to a maximum amount of \$3 million for each of the 10 years they may participate in the program. The program expires June 30, 2010.

Laws of 2002, Chapter 220, reduced the payments from 20 cents per gallon to 19 cents per gallon, effective July 1, 2004.

Program Funding

Sources of funds for this program are:

Funds:

General Fund
Total

| FY 2002 | FY 2003 | Biennium |
|---------|---------|----------|
| 100.00% | 100.00% | 100.00% |
| 100.00% | 100.00% | 100.00% |

Expenditures by Category by Fund:

General Fund
Total

| Salaries | Operating | Pass Thru |
|----------|-----------|-----------|
| 0% | 0% | 100.00% |
| 0% | 0% | 100.00% |

Key Measures

Key measures for this program are specified in M.S. 41A.09, which provides for an annual production of ethanol from Minnesota plants of at least 240 million gallons. Current annual production is in excess of 260 million gallons.

⇒ MDA reviews, audits, and makes payments to producers eligible for payment under M.S. 41A.09.

Contact

For additional information on this activity, please contact Alan Dupay at (651) 296-1686 or Alan.Dupay@state.mn.us.

Program at a Glance

Ethanol Plants in Minnesota receiving producer payments:

- ◆ Agra Resources Co-op, Albert Lea
- ◆ Agri-Energy, LLC, Luverne
- ◆ Al-Corn Clean Fuel, Claremont
- ◆ Central MN Ethanol Coop, Little Falls
- ◆ Chippewa Valley Ethanol, LLP, Benson
- ◆ CornPlus, LLP, Winnebago
- ◆ Diversified Energy Co., LLC, Morris
- ◆ Ethanol 2000, Bingham Lake
- ◆ Heartland Corn Products, Winthrop
- ◆ Melrose Dairy Proteins, LLC, Melrose
- ◆ Gopher State Ethanol, St. Paul
- ◆ Minnesota Energy, Buffalo Lake
- ◆ Pro-Corn, LLC, Preston

Agency Purpose

The Agricultural Utilization Research Institute (AURI) was created by the legislature in M.S. 1160.09. AURI efforts are focused on developing and increasing value added processing opportunities on a statewide basis. This is accomplished by providing applied scientific assistance in the development of new products and expanded uses for Minnesota agricultural commodities. Assistance is usually provided at the very early stages of product or process development and focuses on feasibility issues. AURI services assist producers and processors to make better decisions about allocating scarce resources.

Mission: To identify new markets and expand existing markets for agricultural commodities, ingredients and products, and to develop new uses or value improvements for Minnesota agricultural commodities.

Core Functions

The Agricultural Utilization Research Institute provides technical and applied scientific services to individuals and organizations that are developing value added businesses across Minnesota. Core functions include:

- ◆ providing technical and feasibility assistance, laboratory and pilot plant services in support of the development of the value-added processing capacity in Minnesota;
- ◆ acting as the applied research and development service for small and medium-sized commodity processors; and
- ◆ promoting, educating and informing agricultural stakeholders about the risks and rewards of participating in value added processing

Operations

AURI services assist a variety of clients including producers, producer groups (e.g. cooperatives), small & medium sized commodity processors, and entrepreneurs. AURI field office staff assists with project development activities, while laboratory and pilot plant staff support the technical elements of project development. Pilot plant and lab activities assist clients with feasibility, testing, analysis and product scale-up activities. AURI's operations and facilities are statewide in scope and include:

- ◆ Crookston: field office; pilot plant processing facility; product development lab; state administrative headquarters
- ◆ Marshall: field office; fats & oils lab; analytic and process labs; meats lab
- ◆ Morris: field office
- ◆ Waseca: field office; co-products utilization lab and pilot plant
- ◆ St. Paul: helps link markets and businesses with rural clients and serves as a liaison to other organizations

Program Areas

Client services include laboratory operations such as analytical, process, meats, fats and oils labs, as well as pilot plant operations. This also includes project development activities, as well as development grants for projects.

Industry initiatives focus on broad impact areas and include biodiesel research, ethanol co-products projects, agricultural energy & side stream research, and other feasibility projects that have the potential to impact a large number of producers.

Pesticide Reduction Options (PRO) Program supports research and demonstration grants in development of on-farm pesticide reduction strategies.

At A Glance

- ◆ In the 1990's combined ag and value added sales increased by 24%; AURI programs helped support and sustain continued growth and development of value added processing.
- ◆ AURI services were delivered to over 400 projects statewide in the past biennium.
- ◆ Presented over 40 producer/processor information sessions, examples include: biodiesel, wheat/barley ethanol, oilseeds, meat processing and food safety.

Core Challenges in Operating Environment:

- ◆ Low commodity prices and high transportation costs necessitate a strategy to support value added processing opportunities at the point of production.
- ◆ Increasing demand for feasibility and product development information for value added processing initiatives.
- ◆ Ever-changing markets, technologies and food safety issues that force rural Minnesota-based processors and agricultural enterprises to keep pace, or not survive.

Hybrid poplar represents research and industry development activities for short rotation woody crops. **Administrative services** provide human resources and administrative support for the organization.

Key Measures

In the past two years AURI has assisted with the development of value added projects which have resulted in more producers being able to evaluate and participate in processing projects; enhanced the investment potential in new or existing processing facilities; and has led to increased job opportunities in the state. **Key indicator examples include:**

- ◆ over 14,000 producers impacted through assistance with project feasibility assessment and information;
- ◆ early-stage project feasibility and assessment services resulting in a combined infrastructure investment potential of over \$100 Million; and
- ◆ nearly 300 value added processing jobs from AURI project development and technical services activities, as reported directly from client estimates.

Budget

The budget for FY 2002-03 biennium is \$8.59 million. Organizational staff includes 29.5 full-time equivalent staff. Of the total funding for the biennium, \$7.2 million comes from the General Fund, which includes operating funds as well as the hybrid poplar funding. In addition, \$200,000 in funding for the Pesticide Reduction Options program comes from an agricultural fund account. Loan repayments of \$144,000*, commercialization repayments & interest of \$542,000*, and collaboration & match of \$330,000* account for the balance.

*Estimated for biennium.

Agency Purpose

The Minnesota statutes directs the Minnesota Amateur Sports Commission (MASC) to promote the economic and social benefits of sport for Minnesota citizens and organizations. The MASC contributes to the statewide system of amateur sports by:

- ◆ generating economic benefits through sport events;
- ◆ providing increased amateur sport opportunities; and
- ◆ improving infrastructure through developing new sport facilities.

Core Functions

The MASC provides strategic direction to the state's amateur sports community in order to increase the state economic benefits from amateur sport by increasing sport opportunities and supporting facility improvements. These core functions translate to:

- ◆ hosting major amateur sport tourism events;
- ◆ operating the annual Star of the North State Games; and
- ◆ administering major sport facility and local grant programs.

These functions support ongoing operating goals:

- ⇒ Identifying and bidding for major amateur sport events that can bring financial impact to Minnesota, such as the 2001 Women's World Ice Hockey Championships.
- ⇒ Creating and developing new "homegrown" amateur sport events, such as the Schwan's USA Cup.
- ⇒ Administering the annual state Olympic games and rotating the event to various regions throughout the state. For example, during the summer of 2002, the Star of the North State Games was staged in St. Cloud.
- ⇒ Overseeing MASC's National Sports Center (NSC) operations. The NSC has operated in the black without subsidy for 12 straight years.
- ⇒ Administering both major sport facility grant programs and local grant programs, such as the Mighty Ducks, the Mighty Kicks, and the Mighty Kids programs.

Operations

The MASC serves a varied customer base. The local, national, and international amateur sport participants and their families are the primary customers of the agency. Amateur sport athletes participate in MASC sport programs and at MASC affiliate facilities. Cities, counties, school districts, and other state agencies/public entities are secondary customers through sport facility grant programs, sport event partnerships, and sport education collaboration. The MASC also serves and partners with convention and visitors bureaus, chambers of commerce, and community organizations on sport tourism promotion.

Sport Event Research and Bidding - The MASC actively researches new event opportunities for Minnesota. Once an event is identified, the MASC will partner with local government units, facilities, convention and visitors bureaus, and amateur sport organizations, in order to host the event.

Creation of the New Sport Events - Staff of the MASC research new event concepts and work to develop new "homegrown" events for our state.

At A Glance

| | <u>2000</u> | <u>2001</u> |
|--|-------------|-------------|
| ◆ Out-state annual economic impact of amateur sports | \$51.8 mil. | \$55 mil. |
| ◆ Out-state annual economic impact of the NSC | \$30.1 mil. | \$35.8 mil. |
| ◆ Annual participants in MASC affiliate facilities & programs | 3.75 mil | 3.9 mil |
| ◆ Annual visitors to NSC | 2.5 mil. | 2.7 mi. |
| ◆ The NSC is the state's most visited sport facility. | | |
| ◆ Star of the North Games hosts up to 9,000 Minnesota athletes annually. | | |

Operating the state Olympic games and selecting event -The MASC partners with its Star of the North State Games Board to 1) identify cities through Minnesota to host the games, 2) host the selected annual state games event involving up to 9,000 athletes; and 3) establish and administer the policy of the games.

Research and develop major amateur sport facilities - Since 1987, the MASC has partnered with state and local government units to assist the development of the following facilities:

| | |
|---------------------------------|-------------|
| National Sports Center | Blaine |
| National Hockey Center | St. Cloud |
| University of MN/Aquatic Center | Minneapolis |
| Giants Ridge Golf & Ski Resort | Biwabik |
| National Kayak Center | Carlton |
| Ole Mangseth Memorial Ski Jump | Coleraine |
| John Rose Minnesota OVAL | Roseville |
| National Volleyball Center | Rochester |
| Range Recreation Civic Center | Eveleth |
| Minneapolis Sports Center | Minneapolis |
| Bush Lake Ski Jump | Bloomington |
| Sport Event Center (Planning) | Blaine |

Budget

The MASC's agency budget for the FY 2002-03 biennium is \$1.2 million and is appropriated from the General Fund. The commission has a total of eight full-time staff.

Agency Purpose

The Minnesota Board of Animal Health shall protect the health of Minnesota domestic animals (M.S. Chapter 35). The Board's mission is to protect and enhance the health of Minnesota domestic animal populations by preventing, controlling and eliminating animal diseases.

Core Functions

The core functions have been ever changing and increasingly challenging over the 100 years of service to the citizens of Minnesota. The Board of Animal Health supports both the livestock industry and animal health professionals in disease prevention and control. Our core functions are to:

- ◆ coordinate state and national animal disease control programs;
- ◆ monitor the health of imported animals;
- ◆ identify, locate, and control the movement of infected animals;
- ◆ educate the public about animal diseases;
- ◆ educate and train veterinarians in animal disease control programs;
- ◆ respond to disease outbreaks;
- ◆ coordinate the response to bio-terrorism and other emergencies involving animals;
- ◆ promote public health through animal health programs;
- ◆ coordinate programs with other agencies, the University of Minnesota, the federal government, and the legislature; and
- ◆ inspect domestic animal facilities to control diseases.

Operations

The Board serves a variety of customers. Livestock producers, veterinarians, pet owners, the University of Minnesota Diagnostic Laboratory and the United States Department of Agriculture are the primary customers. Services delivered include: monitoring the movement of livestock and poultry to prevent the spread of disease; providing updates on disease outbreaks; developing, implementing and enforcing animal health statutes and rules; and encouraging best management practices for bio-security.

Key Measures

The Board of Animal Health's success is measured by progress in disease eradication and control programs. Many of these diseases are zoonotic and affect humans. Examples of eradication programs include pseudorabies, brucellosis, tuberculosis, hog cholera, *Salmonella pullorum-typhoid*, *Mycoplasma gallisepticum*, *Mycoplasma synoviae*, scrapie, chronic wasting disease and all diseases foreign to the United States. Examples of control programs include rabies, salmonella, Johne's Disease, anthrax, anaplasmosis, avian pneumovirus, Lyme Disease, and equine infectious anemia.

Budget

The Board's FY 2002-03 budget totals \$6.1 million. Board staff includes 33 full-time equivalent employees.

Of the total budget for the biennium, \$5.9 million comes from General Fund dollars; \$220,000 comes from federal grants.

At A Glance

Two-Year State Budget:

\$5.9 million General Fund

\$6.1 million all funds

Annual Business Processes:

The environment is affected by the Minnesota legislative and executive branch of state government, the board members, the United States Department of Agriculture, the livestock industry, the poultry industry, practicing veterinarians, pet owners, as well as current and emerging disease threats. It is this delicate balance that provides oversight and guidance to the Board, while bringing together many different aspects striving for a common goal.

Program Description

The Minnesota Board of Animal Health shall protect the health of Minnesota domestic animals (Minnesota Statutes Chapter 35). The Board's mission is to protect and enhance the health of Minnesota domestic animal populations by preventing, controlling and eliminating animal diseases.

Population Served

Livestock producers, veterinarians, University of Minnesota Diagnostic Laboratory, United States Department of Agriculture Veterinary Services, multi state agencies, the public in general, as well as other states.

Services Provided

The core functions have been ever changing and increasingly challenging over the 100 years of service to the citizens of Minnesota. The Board of Animal Health supports both the livestock industry and animal health professionals in disease prevention and control. Our core functions are to:

- ◆ coordinate state and national animal disease control programs;
- ◆ monitor the health of imported animals;
- ◆ identify, locate, and control the movement of infected animals;
- ◆ educate the public about animal diseases;
- ◆ educate and train veterinarians in animal disease control programs;
- ◆ respond to disease outbreaks;
- ◆ coordinate the response to bio-terrorism and other emergencies involving animals;
- ◆ promote public health through animal health programs;
- ◆ coordinate programs with other agencies, the University of Minnesota, the federal government, and the legislature; and
- ◆ inspect domestic animal facilities to control diseases.

Key Measures

The Board of Animal Health's success is measured by progress in disease eradication and control programs. Many of these diseases are zoonotic and affect humans. Examples of eradication programs include pseudorabies, brucellosis, tuberculosis, hog cholera, *Salmonella pullorum-typhoid*, *Mycoplasma gallisepticum*, *Mycoplasma synoviae*, scrapie, chronic wasting disease and all diseases foreign to the United States. Examples of control programs include rabies, salmonella, John's Disease, anthrax, anaplasmosis, avian pneumovirus, Lyme Disease, and equine infectious anemia.

Program Funding

The Board's 2002-2003 budget totals \$6.1 million. Board staff includes 33 full-time equivalent employees.

Of the total budget for the biennium, \$5.9 million comes from General Fund dollars; \$220,000 comes from federal grants.

Agency Purpose

The Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design was established to safeguard life, health, and property and to promote the public's welfare. M.S. – 326.15 mandates that the board examine, certify, license and regulate individuals practicing architecture, professional engineering, land surveying, landscape architecture, professional geology, and professional soil science, and those who use the title certified interior designer.

Core Functions

The Board of Architecture, Engineering, Land Surveying, Landscape Architecture, Geoscience, and Interior Design protects the public at large through their regulation of the seven professions. Core functions support the policy making process and administration of the board. These core functions include:

- ◆ ensuring that those entering the professions meet standards of competency by way of education, experience, and examination;
- ◆ enforcing the laws and rules governing the professions in a fair, expeditious, and uniform fashion;
- ◆ educating the public on the requirements and exemptions to licensed practice; and
- ◆ ensuring that the professionals regulated by the board will continue to remain competent in their areas of practice through mandated continuing education and adherence to established standards of a code of conduct.

Operations

The board serves a diverse customer base. The licensees, certificate holders, and applicants are the primary customers of the licensing staff: application processing, verification of information, evaluation and examination.

Minnesota citizens, board members, legislators, building officials, fire marshals, other state agencies, and national councils, are provided information as part of the board's outreach program.

Budget

The board's FY 2002-03 budget totals \$1.932 million and the board staff includes nine full-time equivalent employees.

The board has four sources of revenue:

- ◆ Examinations
- ◆ Licenses
- ◆ Fines
- ◆ Filings

In addition:

- ⇒ Examinations are a pass through cost.
- ⇒ The board is funded by General Fund appropriations, and all revenues collected are returned to the General Fund.
- ⇒ The board's license fees are set in statute.

At A Glance

Annual Business Process:

Examination: Through the board, approximately 3,600 biennium examinations are conducted for those candidates meeting the board's education and experience requirements.

Licensure: The board licenses and certifies 15,000 individuals who meet the established qualifications, evaluates individuals, and issues approximately 800 new licenses annually.

Enforcement: During the 2002-03 biennium the board received 103 complaints alleging violation of its rules and laws. The board in conjunction with the Attorney General's office has continued to receive, file, and investigate complaints of violation of the statutes and rules.

New Program: June 2002 is the first mandated reporting period of continuing education. Administration of this program includes an audit process.

Agency Purpose

The Minnesota State Arts Board, through responsible stewardship, promotes the quality of life in Minnesota by making the arts accessible to all citizens, nurturing creative activities, encouraging the development of innovative forms of artistic expression, and preserving the diverse artistic heritage of the people.

The Arts Board was established in its current form in 1976, by M.S., Chapter 129D. However, it had several predecessor organizations that have been serving artists, arts organizations, and arts participants in Minnesota since 1903.

In order to achieve its mission, the Arts Board is pursuing the following goals as part of its current three-year plan:

- ◆ provide meaningful financial support to the arts in Minnesota;
- ◆ exercise prudent stewardship of the public interest;
- ◆ enhance arts education opportunities for Minnesota's school children;
- ◆ provide technical support for artists and arts organizations;
- ◆ build public awareness about the importance of the arts to the community;
- ◆ makes the Arts Board equally accessible in both non-metro and metro areas of the state;
- ◆ support arts opportunities for underserved cultural communities;
- ◆ maintain a productive, efficient organization while fostering a rewarding work environment for the staff; and
- ◆ be considered a national leader among state arts agencies.

Core Functions

The Arts Board provides grants and services to the statewide arts community through five programs: Artist Assistance, Arts Across Minnesota, Arts in Education, Folk Arts, and Institutional/Institutional Presenter Support. These programs support individual artists, schools, arts organizations, colleges and universities, communities, and organizations that sponsor arts activities.

The Arts Board also serves as the fiscal agent for 11 Regional Arts Councils (RACs) that comprise a statewide decentralized re-granting system. Regional Arts Councils provide grants and support services tailored to meet the needs of artists, arts organizations, and arts audiences in their particular areas of the state.

Operations

The Minnesota State Arts Board and Regional Arts Councils provide financial support and services to artists, arts organizations, arts educators, nonprofits, schools, and communities. Ultimately, Minnesota citizens are the primary beneficiaries of these activities.

The Arts Board employs a three-tiered grant review process to ensure that public funds are distributed wisely and fairly. First, Arts Board staff members review each application to ensure that it meets all eligibility requirements. Second, a peer panel of individuals from across the state who have expertise in the discipline/art form being considered, review and recommend which applications to fund. Finally, the 11-member Minnesota State Arts Board reviews the panel recommendations and makes final funding decisions.

At A Glance

- ◆ The arts are a \$1.3 billion industry in Minnesota.
- ◆ Minnesota is home to:
30,000 individual artists and
1,268 nonprofit arts organizations
- ◆ More than 19 million children and adults were served by Arts Board- and RAC-funded activities during FY 1999 and 2000.
- ◆ Five of Minnesota's top 25 tourist attractions are arts organizations: the Walker Art Center, Guthrie Theater, Ordway Center, Orchestra Hall, and the Children's Theatre.
- ◆ In the FY 2000-01 biennium, the Arts Board was able to fund 54% of the requests it received.

The Arts Board is a primary service provider to the Minnesota arts community. The agency provides technical assistance workshops and training sessions for artists, arts organizations, and arts educators annually in locations throughout the state. It is engaged in a multi-year statewide initiative to broaden, deepen, and diversify arts participation. Working in cooperation with Springboard for the Arts, it produces print and web-based exhibition, rehearsal/performance space, and grant guides for Minnesota artists.

Key Measures

Annually, the Minnesota State Arts Board accomplishes the following:

- ⇒ Provides general support to at least 110 Minnesota arts organizations. The funds stabilize the state's leading arts organizations and provide them with the flexibility essential to their growth and vitality.
- ⇒ Supports 600 weeks of residencies by artists in schools across the state. Through these activities, hundreds of thousands of children experience the arts, develop their cognitive skills, and achieve key competencies necessary to meet the state's graduation standards.
- ⇒ Provides timely, targeted support to 120 Minnesota artists. Supporting artistic and professional growth builds a strong foundation for a healthy arts community.
- ⇒ Provides support to at least 70 Minnesota communities, schools, and other nonprofit organizations to help present quality arts experiences for young people, residents, and visitors. These activities revitalize and stimulate community pride, bring people together, and enhance the quality of life for all Minnesotans.
- ⇒ Provides at least \$50,000 each year to arts activities in traditionally underserved communities. These activities effectively promote cross-cultural understanding and relationship building among all of Minnesota's citizens.

Budget

The Arts Board had a staff of 21 full-time equivalent employees in FY 2002; that number will decrease to 18.5 in FY 2003. Over 90% of the Arts Board general fund appropriation is awarded as grants to local arts organizations.

Agency Purpose

The Council on Asian-Pacific Minnesotans ('Council' or 'CAPM') was created by the Minnesota State Legislature in 1985 to fulfill the following primary objectives: advise the governor and state legislators on issues pertaining to Asian Pacific people; ensure Asian Pacific Minnesotans are more incorporated and engaged in the governmental and policymaking process; see that residents of Asian Pacific descent have sufficient access to state government services; promote the talents and resources of Asian Pacific people where appropriate; and act as a broker between the Asian Pacific community in Minnesota and mainstream society.

Serving as a conduit to state government for Asian Pacific organizations and individuals, the council recommends bills to the governor and state legislature designed to improve the economic and social condition of all Asian Pacific Minnesotans. Furthermore, the council may provide comment and/or recommendations regarding any application for federal funds submitted by state departments or agencies that stand to impact programs pertinent to Asian-Pacific Minnesotans.

Minnesota Statute, Section 3.9226

Core Functions

On behalf of this population, the council plays the role of advisor, advocate, and broker. In these capacities it deals with, among other things, problems unique to non-English speaking immigrants and refugees; administrative and legislative barriers blocking Asian-Pacific people's access to benefits and services; creating opportunities for affordable housing and health care; and taking appropriate measures to increase Asian Pacific peoples' level of preparedness for, and overall presence in, the state's ever-evolving workforce.

The council may perform its own research or contract for studies to be conducted which lead to policy recommendations intended to benefit the Asian Pacific community. Areas of focus may include education; work-force development; human rights; mental health; affordable housing; economic development; violence prevention/intervention; immigration and refugee issues; social welfare; or any other timely subject matter. For a more thorough understanding of these issues or to facilitate a community dialogue, the council frequently hosts roundtable discussions, forums, and workshops. It also convenes workgroups, taskforces, and special committees focusing on issues of particular importance — ones requiring more detailed examination or ones where the need for solutions is conveyed with a sense of urgency by the community.

Operations

The Council on Asian-Pacific Minnesotans consists of 23 members, 19 of which are appointed by the governor and subsume a broad representation of the Asian-Pacific community. In addition, two members of the House of Representatives and two members of the state senate are appointed under the rules of their respective bodies. They serve as non-voting members. The council maintains a staff of four under the leadership of the executive director.

At A Glance

The number of Asians and Pacific Islanders almost doubled during the 1990s, rising from about 78,000 to more than 144,000. An additional 24,000 people said they were part Asian or Pacific Islander. When those mixed-race people are apportioned among their races, the Asian population grew 108%.

| Statewide | 144,000 | 3% |
|------------------|----------------|-----------|
| Hennepin County | 54,086 | 4.8% |
| Ramsey County | 45,159 | 8.8% |
| Dakota County | 10,450 | 2.9% |
| Olmsted County | 5,346 | 4.3% |
| Anoka County | 5,102 | 1.7% |

Refugee Experience Background

Approximately 55% of the community has a refugee background, meaning having fled their war torn countries due to persecution based on one of the following five criteria: religion, political opinion, membership in a social group, race, or nationality.

Young Community

Agency Purpose

The attorney general is the chief legal officer for the state. The duties of the office arise from the Constitution, state statutes, and common law. Every board, commission, and agency of the state of Minnesota receives legal counsel and representation in the courts by the attorney general. The attorney general also acts in a *parens patriae* capacity on behalf of the people of the state. Minnesota's attorney general is elected by the state's voters and serves a four-year term.

Core Functions

The attorney general has jurisdiction to:

- ◆ initiate legal actions to enforce civil laws;
- ◆ provide legal representation for state agencies;
- ◆ prosecute criminal actions at the request of local prosecutors;
- ◆ serve as the state's chief consumer advocate; and
- ◆ provide education, information, and mediation to agencies and citizens of the state.

At A Glance

- ◆ The office, through its citizen protection section, obtained settlements of over \$8 million in FY 2001 for state government and more in restitution for individual consumers.
- ◆ In 2001, staff mediated over 20,000 consumer complaints.
- ◆ At the current rate, the AGO during the 1999-2002 term will prosecute over twice as many murder cases as any previous term, 50 white-collar crime cases and over 100 drug cases.
- ◆ Since 1999, approximately 4,200 "implied consent" cases relating to drunk driving arrests were prosecuted, a number that has doubled since 1996.
- ◆ During the past biennium, the AGO saved the treasury over \$1 billion by successfully defending claims against the state.

Operations

The Attorney General's Office (AGO) is divided into five sections, each headed by a deputy attorney general, and an administrative support section. Sections are divided into divisions specializing in fields such as criminal, health, transportation, consumer protection, antitrust, finance, human services, agriculture, environment, utilities, public safety, and occupational licensing. The Chief Deputy/Solicitor General is state government's chief legal advocate as well as being the top deputy. The office has 431 full-time equivalent employees

The Attorney General's Office has direct and ongoing interaction with state agencies and officials, the legislature and staff, government entities as well as individual citizens. Much of the work of the office involves appearances before the courts and administrative agencies. The attorney general's work is categorized as follows.

Citizen Protection

- ⇒ Enforcing laws governing consumer protection, charities, Medicaid, anti-trust, and unfair business practices.
- ⇒ Assisting citizens in resolving consumer complaints through education, information, and mediation.
- ⇒ Providing education and information to help citizens avoid consumer fraud through presentations to community groups and distribution brochures on issues such as home buying, health care, privacy, and consumer credit.
- ⇒ Advocating interests of residential and small business utility customers before the Public Utilities Commission (PUC).

Law Enforcement

- ⇒ Assisting county attorneys in prosecuting serious crimes such as murder, gang operations, drug dealing, and drunken driving.
- ⇒ Representation in the appellate courts.

Attorney General Representation

- ⇒ Protecting the public from unsafe health care, sexual predators, and unscrupulous licensed professionals.
- ⇒ Protecting the state's natural resources.
- ⇒ Protecting taxpayers' dollars and enforcing state laws.
- ⇒ Providing opinions on legal issues to attorneys of local governments and school districts.

Defense of Claims

- ⇒ Defending the state against claims and using alternative dispute resolution methods to save on legal costs.
- ⇒ Advising state agencies on legal issues to limit litigation.

Budget

Of the total operating budget for the FY 2002-03 biennium, 62.4% comes from the general fund; 24.7% is received from other state entities through partner agreement billings for legal services; 5.9% is received from other appropriations (Fund 170, Fund 330, and Fund 370); and 2.4% is received from federal and special revenue funds. An additional 4.7% is also received as pass-through funds for restitution and/or settlement payments.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: GOVERNMENT OPERATIONS

Narrative

Activity Description

Provide a wide range of cost-effective, efficient legal services to state agencies.

Population Served

- ◆ Department of Human Rights
- ◆ Department of Human Services
- ◆ Department of Public Safety
- ◆ Agencies connected with gambling
- ◆ Department of Finance
- ◆ Department of Administration
- ◆ State boards (non-health professions)
- ◆ Department of Transportation
- ◆ Department of Commerce (utilities issues)
- ◆ Department of Labor and Industry
- ◆ Department of Economic Security

Activity at a Glance

- ◆ Provide expert legal advice and representation to state agencies
- ◆ Handles over 5,000 implied consent cases (drunk driver license revocations) annually

Services Provided

- ◆ Expert legal advice and representation to state agencies.
- ◆ Litigates human rights cases.
- ◆ Litigates workers compensation cases.
- ◆ Handles over 5,000 implied consent cases (drunk driver license revocations) annually.
- ◆ Handles drunk-driving-related appeals of convictions.
- ◆ Defends state agencies against litigation brought by various parties.
- ◆ Brokers settlements in lawsuits brought against state agencies when warranted.
- ◆ Provides eminent domain representation to the Department of Transportation.
- ◆ Provides representation for Department of Commerce on behalf of utility ratepayers before the Public Utilities Commission.
- ◆ Litigates OSHA workplace safety cases.

Historical Perspective

- ⇒ Obtained compensatory relief for Minnesota citizens in the amount of \$1,570,000 resulting from claims of discrimination filed with the Department of Human Rights.
- ⇒ Litigated to enforce occupational safety and health standards. In FY 2002 the AGO obtained \$235,000 in OSHA fines.
- ⇒ Represented the Department of Human Services on issues involving public assistance, child support, licensing, health care, child welfare, and mental health. Handled a large volume of licensing litigation under new licensing statutes that became effective in calendar years 2001 and 2002.
- ⇒ Facilitated bond issuance for state agencies - over \$1.51 billion.
- ⇒ Advised state agencies in connection with implementation of various communications and technology programs including MN Link, iSeek, CriMNet and MetNet.
- ⇒ Defended the state in litigation over contract and lease issues and data practices challenges.
- ⇒ Defended the state against challenges to DWI statutes.
- ⇒ Handled over 4,000 district court implied consent proceedings that challenged revocations of driving privileges.
- ⇒ Worked extensively with business and consumer advocates to develop a performance assurance plan for Qwest's provision of local wholesale performance.
- ⇒ Investigated anti-competitive conduct of a telecommunications provider.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: GOVERNMENT OPERATIONS

Narrative

- ⇒ Monitored and enforced terms of the merger between NSP and New Century (Xcel Energy).
- ⇒ Investigated natural gas purchasing practices.
- ⇒ Litigated eminent domain actions and appeals.
- ⇒ Represented Mn/DOT in its statutory prevailing wage enforcement responsibilities.
- ⇒ Successfully represented Mn/DOT in litigation involving Light Rail Transit.

Key Measures

- ◆ Claims brought against the state are defended.
- ◆ Interests of state agencies are advanced.
- ◆ Implied consent cases are prosecuted vigorously.
- ◆ Challenges to DWI laws are defended effectively.
- ◆ Utility mergers and acquisitions are monitored so that Minnesota's interests are represented.
- ◆ The AGO provides quality advice regarding the legal aspects of state transportation projects.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: GOVERNMENT SERVICES

Narrative

Activity Description

Provide a wide range of legal services to state agencies and citizens of Minnesota.

Population Served

- ◆ Department of Natural Resources (DNR)
- ◆ Department of Agriculture
- ◆ Pollution Control Agency
- ◆ Department of Health
- ◆ Board of Medical Practice
- ◆ Health-related Licensing Boards
- ◆ Consumers and small businesses who are customers of utility companies
- ◆ Consumers and businesses that need protection from unfair practices in the marketplace

Activity at a Glance

- ◆ Provides legal services to state agencies
- ◆ Litigates on behalf of the state

Services Provided

- ◆ Provides client advice and legal representation to state agencies in the application and enforcement of state laws.
- ◆ Assists client agencies to recover fines, penalties and restitution.
- ◆ Provides client defense in suits brought against state agencies.
- ◆ Provides legal advice regarding Indian Law.
- ◆ Provides investigative services to health-related licensing boards.

Historical Perspective

- ⇒ Provided legal support to the Department of Natural Resources in the area of ecological services, enforcement, fish, forestry, Indian law issues, minerals, real estate acquisitions, and real estate land exchange.
- ⇒ During FY 2002, the AGO provided legal advice including drafting, review of and approval of, approximately 800 DNR transactions valued at approximately \$29 million.
- ⇒ The AGO provided legal assistance to the Pollution Control Agency in the areas of environmental law enforcement and environmental review litigation.
- ⇒ Provided legal services to the Department of Health including handling more than 25 cases concerning maltreatment of vulnerable adults in nursing homes and other healthcare facilities.
- ⇒ Initiated legal action against drug manufacturers for engaging in anti-competitive and illegal acts.
- ⇒ Investigated the Minnesota gasoline supply chain to determine the causes of recent gasoline price spikes and to identify legislative options that may address some of the problems experienced in Minnesota.
- ⇒ Initiated legal action with respect to the acquisition of certain assets of Potlatch by Sappi, Ltd.
- ⇒ During FY 2002, the AGO provided legal representation and investigative services to 15 health-related licensing boards.
- ⇒ During FY 2002, consumer analysts in the AGO's Residential Utilities Division (RUD) handled approximately 4,000 complaints from residential and small business consumers.
- ⇒ RUD represented the interests of consumers and small businesses in issues before the Public Utilities Commission, including challenges to certain practices of Xcel Energy, Qwest Communications and Reliant/Minnegasco.

Key Measures

- ◆ Effective and efficient legal advice is provided to state agencies.
- ◆ State agencies receive expert representation in all litigated matters.
- ◆ Investigations conducted are focused, thorough and timely.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: GOVERNMENT SERVICES

Narrative

Key Measures (Continued)

- ◆ The rights of consumers and small businesses are protected in the purchase of and payment for services from utility companies.
- ◆ Prompt action is taken against those who engage in anti-competitive practices in the marketplace.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: CIVIL ENFORCEMENT

Narrative

Activity Description

Provide enforcement of Minnesota consumer and non-profit laws. Represent Department of Commerce.

Population Served

- ◆ Consumers and citizens of the State of Minnesota
- ◆ Department of Commerce

Services Provided

- ◆ Enforce the State's consumer protection laws.
- ◆ Educate and advise consumers of their rights.
- ◆ Register and provide oversight of charities and non-profit organizations.
- ◆ Provide legal advice and representation to the Department of Commerce.

Activity at a Glance

- ◆ Received 25,000 written complaints and inquiries from Minnesota citizens
- ◆ Received 200,000 telephone inquiries from Minnesota citizens
- ◆ Recovered \$11 million in FY 2002 for Minnesota consumers resulting from complaints filed by them

Historical Perspective

- ⇒ During FY 2001-02 recovered over \$5 million in restitution for Minnesota consumers.
- ⇒ Successfully settled an investigation of U.S. Bancorp Investment resulting in the payment of \$1.1 million to Minnesota consumers.
- ⇒ Required Fleet Mortgage Corporation to make full restitution to Minnesota consumers for mortgage account charges resulting from telemarketing calls.
- ⇒ Resolved a consumer fraud lawsuit against WorldCom, Inc., regarding deceptive advertising.
- ⇒ Entered into agreements with two large Minnesota auto dealers related to the sale of extended warranties to Minnesota consumers.
- ⇒ Received 25,000 written complaints and inquiries from Minnesota citizens.
- ⇒ Received 200,000 telephone inquiries from Minnesota citizens.
- ⇒ In FY 2002 recovered \$11 million for Minnesota consumers resulting from complaints filed by them.
- ⇒ Represented the Commerce Department and obtained over \$800,000 in civil complaints and settlements with entities the department regulates.
- ⇒ Successfully defended a class action lawsuit challenging the 2000 legislation that directed the transfer of \$460 million in excess surplus from the Workers Compensation Assigned Risk Plan.
- ⇒ Maintained public registration information about 5,731 charitable organizations, 2,357 charitable trusts, and 227 professional fundraisers.
- ⇒ Audited Allina Health System and, based on findings, required it and its subsidiaries to adopt strict policies concerning executive compensation, travel and entertainment, conflicts of interest, etc. Numerous other Minnesota nonprofit organizations are adhering to these regulations following the conclusion of this audit.

Key Measures

- ◆ Minnesota's citizens are protected from wrongful acts and illegal conduct.
- ◆ Minnesota's citizens are educated about their rights and responsibilities in the marketplace.
- ◆ Charities and non-profits registered in Minnesota comply with state law.
- ◆ The Department of Commerce receives effective and efficient legal representation.

ATTORNEY GENERAL

Program: ATTORNEY GENERAL

Activity: PUBLIC PROTECTION

Narrative

Activity Description

Prosecute violent and serious crimes statewide. Defend felony convictions upon appeal. Obtain civil commitment of sex offenders. Criminal prosecution and civil enforcement of Medicaid Fraud violations including abuse or neglect of vulnerable adults.

Activity at a Glance

- ◆ Handled 172 criminal appeals
- ◆ Prosecuted violent and serious crime
- ◆ Trained law enforcement officers and prosecutors throughout the state

Population Served

- ◆ Minnesota citizens
- ◆ Minnesota counties
- ◆ Gang strike force
- ◆ Vulnerable adults

Services Provided

- ◆ Prosecutes violent and serious crime.
- ◆ Prosecutes gang crimes statewide.
- ◆ Prosecutes drug and white collar crime statewide.
- ◆ Provides training and prosecutorial assistance to local prosecutors throughout Minnesota.
- ◆ Defends felony conviction upon appeal.
- ◆ Obtains civil commitment of sex offenders under psychopathic personality and sexually dangerous person statutes.

Historical Perspective (optional)

- ⇒ In FY 2002 the AGO's Appeals Division handled 172 criminal appeals.
- ⇒ The AGO's Medicaid Fraud Division opened 31 abuse and neglect investigations.
- ⇒ The Medicaid Fraud Division reviewed 359 vulnerable adult cases in the Department of Health and 339 cases in the Department of Human Services.
- ⇒ In FY 2002 the Medicaid Fraud unit recovered Medicaid funds from providers who fraudulently billed the program for services provided. Over \$16 million was recovered for Medicare and Medicaid programs.
- ⇒ The AGO's Trial Division prosecuted violent and serious crime including first-degree, second-degree and first-degree premeditated murder cases throughout the state.
- ⇒ The AGO prosecuted methamphetamine and other drug cases referred to it by county attorneys obtaining 75 convictions in 20 counties in FY 2002.
- ⇒ The AGO handled more than a dozen sexually dangerous person/sexual psychopathic personality commitment cases in FY 2002.
- ⇒ The AGO trained law enforcement officers and prosecutors throughout the state on law-enforcement related issues.

Key Measures

- ◆ Prosecutions are successful.
- ◆ Citizens are protected from criminal activities.
- ◆ Vulnerable adults are protected.
- ◆ Medicaid Fraud regulations are enforced.
- ◆ Top quality prosecution resources are provided to county attorneys across the state.
- ◆ Criminal convictions are upheld.
- ◆ Respond effectively to crime growth areas.

Agency Purpose

The Board of Barber Examiners was created in 1897 to protect the public's health and welfare while maintaining a high quality of barbering services to the public. Currently, M.S. 154 and Rules 2100 authorized the board to examine and regulate the barbering profession.

Core Functions

The board is responsible for the following:

- ◆ administering examinations;
- ◆ regulating the practice and registration of all individual barbers, barber shops, and schools; and
- ◆ conducting inspections of barber shops and schools on an annual basis to ensure that all sanitary statutes and rules are complied with. As a result of these inspections, the public can be assured of a clean and sanitary environment.

Operations

The board's operations for the most part directly affect the licensees, however, the public also can be affected by the processing of complaints and receiving of information. Services are delivered through examinations, licensing, inspections, regulation, processing of complaints, and giving information to individuals requesting it.

Budget

The board's FY 2002-03 budget totaled \$312,000. There are two full-time employees. The board is totally funded with a General Fund appropriation. The board recovers all operating costs through fees charged for examinations and licenses.

At A Glance

Factors affecting the board are school enrollment and the number of individuals, shops, and schools that are licensed on an annual basis.

Budget for FY 2002-03 biennium is \$312,000

Agency Purpose

The State Council on Black Minnesotans addresses the needs for people of African heritage to fully and effectively participate in and equitably benefit from the political, social and economic resources, policies and procedures of this state.

With the insistence and support of the African American community, the council was created by the Minnesota legislature in July 1980 (M.S. Section 3.9225). It has as its primary purpose to advise the governor and legislature on the nature and intensity of issues confronting the state's Black populations. The formation of the council was critical for Black Minnesotans because, historically, this population has been, and continues to be, underrepresented in the legislature and has had little access to the office of the governor or other policy makers.

The council is a policy-oriented agency that uses a community mobilization and involvement model. Prior to the creation of the council, there was no state or local agency with the responsibility for advising and educating policy makers, researching and analyzing the broad spectrum of issues affecting Black Minnesotans, and advocating on their behalf. And, there was also no agency or organization with the responsibility to educate and reeducate Black Minnesotans regarding specific policy issues and the value of political and policy participation.

The council's advice to policy makers must be well founded, accurate and representative of the will of its constituencies. To facilitate these functions, the council is made up of 13 public members appointed by the governor with the understanding that they must be broadly representative of Minnesota's Black communities. Four ex-officio legislative representatives are also members of the council and participate in setting the agenda and priorities of the agency.

Core Functions

The council operates as a liaison between state agencies, individuals and organizations seeking access to state government. Basically, it participates in policy making processes that affect the interests and welfare of Black Minnesotans. And, it recommends new laws or changes in existing laws to the governor and legislature which may benefit African Americans and Africans in the state of Minnesota. It also publicizes the accomplishments of Black Minnesotans and their contributions to the quality of Minnesota life. Specific functions of the council include monitoring government and private sector agencies, programs and policies to determine their impact on Black Minnesotans and other population of color. They also include conducting primary and secondary research and sponsoring and promoting issue/policy oriented educational programs.

In order to effectively advise the governor, legislators and other policy makers, the council has organized community legislative/policy dialogues. It also conducts primary and secondary research to get information on the extent to which Black Minnesotans benefit from current policies and programs. Conducting research has provided the council with information that allows it to identify existing community needs and resources and set organizational priorities. A significant barrier to the accomplishment of these functions is the current status of available data or information. Most agencies, state or local, public or non-profit, do not collect data in a manner

At A Glance

Minnesota's fast growing Black population is the council's primary client constituency and is the state's largest non-European ethnic/cultural group. According to the 2000 census, there are now about 171,731 residents who are Black Minnesotans – more than triple the state's Black population in 1980. The council's client constituency also includes one of the largest African immigrant populations in the United States. The vast majority of the council's constituencies, over 75%, are residents of the Twin Cities Metropolitan Area. Smaller Black communities can be found in and near Rochester, Duluth, St. Cloud, Moorhead and Worthington. Currently, rapid Black population growth is taking place in such Greater Minnesota counties as Carlton, Isanti, Chisago and Crow Wing.

The council also has an institutional constituency of health and human service organizations with similar values, concerns, target populations, and objectives.

Overall, the populations served by the council are disproportionately impoverished and have experienced a multitude of complex and inter-related problems; social, political and economic. These conditions are both caused and exacerbated by a lack of equal access and opportunity, and institutional and individual racism. The council was created to address the disparities associated with these conditions and be an instrument to create institutional and social change.

that would allow the council to determine in a precise fashion the extent to which Black Minnesotans participate in and benefit from existing programs and policies. Correcting this condition is a primary objective of the council.

The council has established programs to address the needs of its constituencies. Through collaboration and cooperation, it is involved in about 70 ongoing committees and organizations addressing such issues as out-of-home placement of children, teen pregnancy, hunger, health, affordable housing and homelessness, economic development, education, drugs, violence, childcare, HIV/AIDS, crime, the status of African American males, tobacco usage prevention/reduction, employment, the status of Black veterans, poverty, police community relations (including racial profiling) and the unique concerns of native African communities.

An annual function of the council involves managing and overseeing the observance of the Dr. Martin Luther King Holiday and celebration. Every year, since its inception in 1982, the council has planned and presented programs and events designed to promote the ideals of Dr. King.

Another important function of the council is to promote the representation, accountability and increased/effective leadership of Black Minnesotans in policy-making processes. This is accomplished through the identification of individuals, as community assets, and matching individual skills with volunteer opportunities on Boards, Commissions and Task Forces, etc.

Budget

Revenues: The total budget for the State Council on Black Minnesotans for budget year 2002, is \$342,000. The state of Minnesota was the council's sole revenue source for this year. Of this amount, \$25,000 (7.3%) was allocated specifically for the Dr. Martin Luther King Holiday and celebration. The remaining \$317,000 (92.7%) was allocated for agency personnel and operations.

Expenditures: Just over 70% (\$218,500) of the council's budget is being devoted to staffing costs for 4.0 full-time equivalents for 2002. The remaining \$93,500 (roughly 30%) funded traditional agency operations costs (e.g., rent, travel, communications, supplies and equipment).

Agency Purpose

The Campaign Finance and Public Disclosure Board is the service and regulatory agency that develops and implements administration and enforcement of M.S. Ch. 10A, the Ethics in Government Act. Agency staff supports a six-member bipartisan board, appointed by the governor for staggered four-year terms. The board's mission is to promote public confidence in state government decision making through development, administration, and enforcement of disclosure and public financing programs which will ensure public access to and understanding of information filed with the board.

At A Glance

In FY 2001, the board administered programs covering

- ◆ 744 candidate committees
- ◆ 336 political party units
- ◆ 345 political committees and funds
- ◆ 3,107 lobbyist registrations
- ◆ 1,355 reporting public officials
- ◆ \$3.3 million in public subsidy payments to candidates

Core Functions

Core functions of the Campaign Finance and Public Disclosure Board include administration and management of the:

- ◆ registration and public disclosure by state legislative and constitutional office candidates, political party units, political committees, and political funds;
- ◆ registration and public disclosure by lobbyists and their principals attempting to influence state legislative actions, administrative action, and the official action of metropolitan governmental units;
- ◆ disclosure of economic interests, conflicts of interest, and representation of a client for a fee under circumstances defined in M.S. Ch. 14 and M.S. Ch. 216B.243 for certain state and metropolitan officials; and
- ◆ distribution of payments from the state's public subsidy program that provides public funding to qualified state candidates and the state committee of a political party; and allows those candidates and parties to give political contribution refund receipts to certain campaign contributors.

Operations

The Campaign Finance and Public Disclosure Board assists clients in meeting the requirements of the law by:

- ◆ making all disclosure forms available in the board office, on the board's website, and mailing required forms to clients up to one month prior to the reporting date;
- ◆ conducting training classes to aid volunteer treasurers and candidates in record keeping, reporting, and using Finance 2002 campaign software;
- ◆ providing free campaign finance software to candidates for state and judicial offices to assist them in record keeping and enable them to file required reports electronically;
- ◆ maintaining an agency web site which provides forms and publications for downloading, board advisory opinions, board meeting agendas and minutes, board member and staff information, lists of clients, and summaries of past filings;
- ◆ maintaining an inbound voice line and fax line;
- ◆ providing client-use computers in the office for customers who do not have access to a computer or the Internet;
- ◆ providing a copier for client use in copying information from filed reports; and
- ◆ working with the legislature to make sure that the statute is understandable and easy to administer.

Agency operations directly affect candidates for state office, lobbyists, and public officials by assisting them in compliance with the statute. The general public and news media are benefited by timely, easy access to campaign information filed by candidates through agency web base applications.

Key Measures

- ⇒ Agency-developed campaign finance software was requested by and provided to 105 clients in 1998; software enhancements and additional training in 2002 added another 202 interested clients.
- ⇒ Agency interactive website information is updated daily to keep the public informed.

Budget

The board's operating budget is funded by a direct General Fund appropriation from the Minnesota Legislature.

Staff salaries currently include nine full-time (two vacant positions), one part-time, and one student worker position. Agency operations include all non-subsidy disbursements made to assist clients and are always higher in the second year of the biennium due to the elections cycle. The board's technology budget is used for the development and maintenance of its interactive agency website.

Agency Purpose

Minnesota Statutes 15.50 provide for the Capitol Area Architectural and Planning Board (CAAPB) to preserve and enhance the Capitol Area's unique aesthetic and historic character, and to plan and guide its future development by maintaining a framework for its physical growth. CAAPB was established by the 1967 legislature to ensure the architectural integrity of the Capitol, the buildings immediately adjacent to it, the Capitol grounds, and the Capitol Area.

Core Functions

As the planning and regulatory agency responsible for architectural design and long-range planning for the Capitol Area, the CAAPB has exclusive zoning jurisdiction and design review over both the state government complex and the surrounding commercial and residential neighborhoods.

Key Service Strategies:

- ⇒ *Initiate* funding requests, promoting timely design and maintenance of the Capitol Building.
- ⇒ Provide *framework* for the development and maintenance of the Capitol Mall and its memorials.
- ⇒ *Manage* internal agency operations, planning, and projects.
- ⇒ Provide planning tools and *guidelines* for future Capitol Area development.
- ⇒ *Coordinate* all historical documents for the Capitol Area.
- ⇒ Provide open *communication* and coordination with all clientele.
- ⇒ *Manage* the board's human resources effectively.

Operations

As overseer of Capitol Area development, the CAAPB's responsibility for public projects cover all phases of design and construction. Individual project planning occurs within a long-range framework for the area's physical development. The board's *1998 Comprehensive Plan* and the *Specific Actions for Implementation of the Comprehensive Plan* are the framework for its daily agenda, along with the *Zoning and Design Rules for the Capitol Area*, serving the 60 block area around Minnesota's Capitol, published in January 2000.

In overseeing and coordinating development in the Capitol Area, the CAAPB works closely with many state agencies, especially the Department of Administration, the city of Saint Paul, neighborhood planning district councils and development groups, and with private sector architects, engineers, and developers.

Board performance focuses on good design, thorough and coordinated long-range planning, and achieving more for the public dollar, whether it is federal, state, or city funding. Because the board is composed of gubernatorial, legislative, and city appointees, it often is in a position to coordinate and leverage public improvements in a cost-effective and result-orientated manner.

Key Measures

The board meets every two to three months to review or approve issues directly affecting zoning/planning development or design within the 60-block area of the board's jurisdiction.

Based on solid planning tools and guidelines developed in concert with the *Comprehensive Plan* and the *Zoning and Design Rules*, the board's influence has positive impact on the overall appearance of the Capitol Area and beyond. In recent years, the agency assisted in the design and construction of the Department of Revenue building, the Korean War Veterans Memorial, and the Woman's Suffrage Memorial, in addition to the ongoing

At A Glance

- ◆ The Capitol, built in 1905, will celebrate its centennial in 2005.
- ◆ Approximately 300,000 people visit the Minnesota State Capitol each year and another approximately 9,000 work within the Capitol Complex on a daily basis.
- ◆ Since 1986, capital budget appropriations totaling \$25.9 million have been dedicated to Capitol Building renovations and restoration.
- ◆ The Capitol Complex is comprised of a 60-block area that contains 15 state office (two million gross square feet of office, ceremonial, and public spaces), six blocks of commercial/retail space, 12 residential blocks, and one primary care hospital campus.
- ◆ The board is comprised of 10 members, chaired by the lieutenant governor, with both House and Senate representation as well as gubernatorial and city appointees.

restoration of the Capitol Building, including the "Rathskeller" cafeteria, the exterior and immediate grounds, and the completion of the *Predesign Study* for interior restoration of the building.

Based on the board's success in implementing a higher design standard, the advice of the Advisory Committee and staff is sought after by:

- ◆ other state capitols in their approaches to planning and development;
- ◆ the Saint Paul Design Center;
- ◆ surrounding district councils and citizen action groups;
- ◆ professional planning and architectural organizations interests; and
- ◆ nonprofit and community based initiatives; for example, Public Art Saint Paul, Summit Park redevelopment effort, Riverfront Corporation, and Saint Paul Farmers Market.

Budget

The CAAPB base budget is appropriated from the General Fund. The budget covers salaries for four permanent employees, plus per diems for the three-member Advisory Committee and the ten-member board. In FY 2002-03 a specific appropriation through the Department of Administration provided some additional funding for technology costs. The committee's level of activity, outside CAAPB control, is contingent upon others who need CAAPB review or approval for development projects. Legislative language passed in 2001 has allowed the CAAPB to begin charging for board, advisors, and staff time when the projects are pursuant to the Capitol Area and requiring board review or approval, but those costs are only reimbursable through FY 2003.

Agency Purpose

Minnesota statutes provide the Chicano Latino Affairs Council with a unique responsibility of “advising the governor and the legislature on the issues of importance to Minnesota’s growing Latino population. The Council’s mission is key to bringing the Latino issues to the forefront when legislation, rules and regulations are discussed and to advise as to the impact of government action with regards to the Latino population. There are other statutory functions that are key to the Chicano Latino Affairs Council as well:

- ◆ serve as a liaison between local, state and federal government and Minnesota’s Chicano Latino community;
- ◆ serve as an information and referral agency to ensure that Chicano Latinos in Minnesota are connected to the appropriate government agencies and community based organizations to address their concerns, which range from immigration and education to discrimination and social well being;
- ◆ educate legislators, agency heads, the media and the general public about the accomplishments and contributions of Chicano Latinos;
- ◆ raise general awareness about the problems and issues faced by the Latino community; and
- ◆ publish the accomplishments of Chicano Latinos in Minnesota.

Core Functions

These functions help the Chicano Latino Affairs Council carry out its mission:

- ⇒ Being a resource for legislators, the governor and state agencies that address problems and issues of impact to the Latino population in Minnesota.
- ⇒ Being a resource for city and county governments that implement legislation and create policies that have an impact in the Latino population in the state.
- ⇒ Being a resource for community based organizations that work with the Chicano Latino population.
- ⇒ Educating the new Latino immigrants in the state on legislation, rules and regulations.
- ⇒ Publishing a monthly newsletter in Spanish and English titled “Al Dia” which has statewide distribution and not only reports on the accomplishments of the Chicano Latinos, but serves as an informational conduit for the community.
- ⇒ Publishing and disseminating a bilingual directory which is a resource book for the community containing information about all the organizations, businesses, churches, media and networking groups that are either owned by, or serve, Minnesota’s Chicano Latino population.

Operations

The Chicano Latino Affairs Council consists of a fifteen-member board of directors, eleven of which are members of the Chicano Latino community and four of which are legislators. Of the 11 community members, there is a representative for each of the state’s eight congressional districts. There are also three at-large community representatives.

At A Glance

Two-Year State Budget:

\$741,824 from the General Fund

The Latino population is the ethnic group with the highest growth in the United States and in Minnesota. The 2000 Census show that, from 1990 to 2000, Minnesota experienced a growth in the Latino population of 166%, becoming the minority group with the biggest growth in the state. Approximately 145,000 Latinos are residents in Minnesota. Close to 20,000 Latino agricultural workers come to Minnesota to work in the farms and food industry each year. The Chicano Latino Affairs Council’s unique position within state government makes it possible to bring the voice of the Latino community in Minnesota to the policymakers, raising awareness of the issues that affect that population while at the same time serving the community as an educational conduit and liaison with city and county governments statewide.

All community members are appointed by the governor. Through the executive director, they provide a voice in all levels of government for the approximately 145,000 Latinos who reside in the state of Minnesota as well as the approximately 20,000 migrant agricultural workers that come to work in the state each year from the months of March through November.

M.S. 3.9223, mandates that the CLAC not only fulfills its primary mission of advising to the governor and the Legislature on issues that affect the Chicano Latino community, including the unique problems encountered by the Spanish-speaking migratory workers, but that it also:

- ◆ make recommendations to the governor and the legislature as to statutes or rules necessary to ensure that Chicano Latinos are well served in the state;
- ◆ recommend legislation to improve the economic and social status of Chicano Latinos in the state;
- ◆ serve as a conduit for state government agencies that serve the Chicano Latino people;
- ◆ oversee the performance of studies designed to accurately depict the situation of Chicano Latinos in the state with the goal of suggesting solutions to those issues, especially in the areas of education, housing, economic development, health, human rights, social welfare and related matters; and
- ◆ implement programs designed to solve the problems of Chicano Latinos when authorized to do so by statute, rule or order.

Agency Purpose

The Minnesota Department of Children, Families & Learning (CFL) provides leadership and works in partnership with communities, districts and service providers to support early childhood care and learning, the K-12 education system, lifelong learning and stable environments for families.

Seven agency goals provide a framework for implementing agency responsibilities.

- ⇒ Improve student achievement by ensuring that all children reach challenging academic standards taught by quality licensed educators.
- ⇒ Ensure that children receive targeted, coordinated services to improve performance, access, and equity in education.
- ⇒ Strengthen families and build a solid foundation for living and learning.
- ⇒ Create a culture of achievement and accountability.
- ⇒ Ensure that schools have financial resources to support safe, adequately maintained, and well managed schools.
- ⇒ Help children and adults become self-sufficient and successful in post-secondary education and training, productive employment, and community involvement.
- ⇒ Make CFL a high-performing organization with an efficient, effective infrastructure that emphasizes service quality, partnerships, customer service, and results.

At A Glance

- ◆ CFL's Customers: 851,384 Pre-Kindergarten – grade 12 students and their parents; 343 school districts; 69 charter schools; 62,475 licensed educators; 15,619 licensed child care providers; legislators and other policymakers; all Minnesota citizens.
- ◆ District/Charter Revenue processed annually (est. FY 2003)

| | | |
|---------|-----|---------------|
| Federal | 5% | \$0.4 billion |
| Local | 20% | \$1.7 billion |
| State | 75% | \$6.2 billion |
- ◆ State and federal grants administered annually: \$650 million.
- ◆ Public Access: Every year, CFL responds to over 3.5 million e-mails; 7,000 citizen letters; and 750 media contacts.

Core Functions

The following core functions define the agency's efforts:

- ◆ provide information, training, and technical assistance to schools, school districts, counties, and local service providers;
- ◆ administer state and federal aids, subsidies, and grants;
- ◆ calculate school district property tax levy limitations;
- ◆ license teachers and administrators;
- ◆ develop and administer statewide student and school performance/accountability systems;
- ◆ ensure compliance with federal and state laws that guarantee the individual rights of all learners; and
- ◆ establish and maintain information technology systems that gather and disseminate data about children, students, schools, services, and finances.

CFL provides support and assistance in the areas of:

- ◆ special education
- ◆ alternative education, including charter schools and open enrollment options
- ◆ standards-based curriculum and instruction
- ◆ lifelong and service learning
- ◆ adult basic education
- ◆ career and technical education
- ◆ statewide testing and assessment
- ◆ personnel licensing
- ◆ library services
- ◆ state and federal information technology
- ◆ financial and management services
- ◆ K-12 education funding
- ◆ desegregation/equity
- ◆ Indian education
- ◆ food and nutrition, early childhood, and school readiness
- ◆ violence and abuse prevention
- ◆ homelessness/self sufficiency
- ◆ compliance with state/federal requirements

Operations

The department serves a wide and varied customer base. Our primary customers are local school districts and schools, educators, local service providers, children, families, learners, citizens, and state policy-makers.

Teaching and Learning provides leadership and service in the design and implementation of standards-based reform for Minnesota's K-12 public education system and collaborates with institutions dealing with early childhood education, post-secondary, and other adult education programs. Efforts are directed towards issues related to special needs, lifelong learning, and assessment standards and measurement.

Community Services works with communities, school districts, counties, and family service providers to promote improved delivery of services for children and families through grant programs in the areas of early childhood, prevention, economic opportunity and nutrition.

Management Services administers the state's pre K-12 education data and funding systems, oversees library development and services, and provides human resources, information technology, and administrative support for the agency. The office collects, analyzes, and reports on student, staffing, and financial data for school districts and charter schools, calculates aid payments and levy limitations, and provides technical advice and assistance to local education agencies and state policy-makers.

Public Affairs and Policy Development coordinates policy and budget initiatives, communicates accurate, useful information to the public and policy-makers regarding the agency's work and priorities, enforces compliance with state, and federal laws applicable to local education agencies, oversees rulemaking activities, licenses educators and school administrators, and encourages equity in academic opportunities for all students.

Budget

In FY 2003, the agency will administer over \$6 billion in state K-12 and early childhood funding and calculate property tax limitations of \$1 billion annually. In addition to state and local funding, the agency administers over \$700 million in federal funds such as early childhood, prevention, self-sufficiency, education excellence, special education, facilities and technology, nutrition, and libraries.

Activity Description

Citation: M.S. 122A.61; 123A.27; 123B.05; 126C; 127A.47; 127A.51

General Education is the largest single item of state general fund spending, and also the largest resource available to school districts. The following is a description of the purposes, uses, history and measures of General Education as a funding source for school finance, as well as a detailed explanation of each of the component parts that make up total funding.

Activity at a Glance

- ◆ 853,000 pre-kindergarten – grade 12 students – FY 2003
- ◆ 343 school districts and 77 charter schools
- ◆ \$5.2 billion in state aid and \$0.2 billion in referendum levies for FY 2003 (est.)
- ◆ \$6,364 average revenue per pupil – (est.) FY 2003 Average Daily Membership (ADM)

The purpose of this activity is to promote a general and uniform, thorough and efficient system of public schools throughout the state by providing the following.

- ⇒ **Adequate and equitable core funding for students** – General education revenue provides sufficient funding to ensure that each student receives an adequate education (excluding unique needs funded through categorical programs). This includes a large base of funding on a uniform per pupil basis, and additional revenues for variations in 1) the cost of delivering equivalent educational programs and services to students; and 2) the cost of programs to meet the unique needs of different student populations.
- ⇒ **Equity for taxpayers** – Core educational programs are funded by the state with proceeds from uniform statewide taxes. Discretionary programs and services are funded with local operating referendum levies, which are equalized by the state to enable participation by districts with low tax base.
- ⇒ **Efficient use of resources** – This program encourages school districts to provide programs and services efficiently by allocating resources based on uniform formulas applied to demographic and economic factors that are beyond local control, and by giving districts flexibility in the use of funds.
- ⇒ **Limited local control** – The referendum levy permits local school districts to raise limited additional revenues, with voter approval, to supplement state allocations.
- ⇒ **Facilitate state priorities** – This program encourages the development of programs and services identified as priorities by the state, such as class size reduction, staff development, and basic skills.
- ⇒ **Stability** – This program provides stable funding to ensure continuity of programs for students and stability in tax rates for taxpayers.

Population Served

General education revenue is provided for all public school students in kindergarten through grade 12 and for pre-kindergarten students with disabilities. In addition to students attending schools operated by school districts, this includes charter school students, students in grades 11 and 12 attending Minnesota higher education institutions under the Post Secondary Enrollment Options (PSEO) program, students enrolled in private, nonsectarian schools that have contracted with a public school district to provide educational services (contract alternative), and students attending public schools on a part-time basis while also attending nonpublic schools (shared time).

The table below shows the estimated state total number of students served in FY 2003 by grade level grouping and program type. The student counts shown are average daily membership (ADM), or the average number of students enrolled throughout the school year.

| | Regular District | Charter School | PSEO College | Contract Alternative | Shared Time | Total ADM |
|------------------|------------------|----------------|--------------|----------------------|-------------|-----------|
| Disabled Pre-K | 5,111 | 5 | 0 | 0 | 5 | 5,122 |
| Disabled Kndgrtn | 3,377 | 24 | 0 | 0 | 28 | 3,428 |
| Regular Kndgrtn | 53,253 | 1,175 | 0 | 88 | 10 | 54,526 |
| Grades 1-3 | 177,376 | 3,628 | 0 | 178 | 156 | 181,338 |
| Grades 4-6 | 190,836 | 2,822 | 0 | 112 | 243 | 194,013 |
| Grades 7-12 | 404,480 | 4,880 | 3,592 | 2,526 | 326 | 415,804 |
| TOTAL ADM | 834,433 | 12,534 | 3,592 | 2,904 | 768 | 854,231 |

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

Historical and projected ADM state totals can be found on the Division of Program Finance web site. Historical ADM by school district is also available on the Division of Program Finance web site.

Services Provided

General education revenue is the primary source of general operating funds for school districts and charter schools. In FY 2003, it accounts for 84% of school district general fund state aid and levy revenues.

- ⇒ Programs supported by general education revenue include regular instruction, vocational instruction, special education, instructional support services, pupil support services, operations and maintenance of school facilities, pupil transportation, district and school administration, district support services, and capital expenditures.
- ⇒ The School District Profiles report, available on the Department of Children, Families & Learning (CFL) web site provides a breakdown of FY 2001 operating expenditures for each school district, as well as regional and state totals.

Most general education revenue is unrestricted, and can be used for any school operating purpose. Exceptions are as follows:

- ⇒ *Class-size reduction* (M.S. 126C.12). The additional basic revenue generated by the portion of the pupil unit weight for regular kindergarten students exceeding 0.5 and the portion of the pupil unit weight for students in grades 1 – 6 exceeding 1.0 is reserved for class-size reduction, beginning with kindergarten through grade three.
- ⇒ *Staff development* (M.S. 122A.61). An amount equal to 2% of basic revenue (\$92.02 per pupil unit in FY 2003) must be reserved for staff development. This requirement is waived for school districts in statutory operating debt, and may be waived by a majority vote of the school board and the teachers in any district.
- ⇒ *Basic skills* (M.S. 126C.15). This revenue, which includes compensatory education revenue and Limited English Proficiency (LEP) revenue, must be used to meet the educational needs of students who enroll under-prepared to learn and whose progress toward meeting state or local content or achievement standards is below the level that is appropriate for learners of their age. Compensatory revenue must be allocated to the buildings where the children generating the revenue are served; however, an amount up to 5% of the prior year's revenue may be allocated according to a local plan approved by the commissioner.
- ⇒ *Operating capital* (M.S.126C.10, Subd. 13, 14). This revenue must be used for facilities, equipment, or personnel costs directly related to the acquisition, operation, and maintenance of telecommunications systems, computers, related equipment, and software. For FY 2001 - FY 2003 only, \$5 per pupil unit of this revenue is set aside for telecommunications access.
- ⇒ *Class-size, all-day kindergarten, or special education* (M.S. 126C.125). In addition to the class-size reduction set-aside, \$11 per pupil unit must be reserved for class-size reduction, all-day kindergarten, or reducing special education student-to-instructor ratios.

Historical Perspective

The General Education program has undergone several changes since its inception in the late 1980s, including the following:

- ⇒ The General Education program was initiated in FY 1989, replacing the foundation program and numerous categorical programs, including teacher retirement aid, summer program aid and levy, gifted and talented aid, arts education aid, chemical dependency aid, programs of excellence grants, and the liability insurance levy.
- ⇒ In FY 1994, FY 1995, and FY 2000, the pupil weighting factors for regular kindergarten and elementary students were increased to provide additional funding for elementary class-size reduction.
- ⇒ Beginning in FY 1997, funding for regular transportation and operating capital is included in the general education program.
- ⇒ Beginning in FY 1998, compensatory education revenue is computed using building-level free and reduced-price lunch counts, instead of district-level Aid to Families with Dependent Children (AFDC) counts.
- ⇒ Beginning in FY 2000, additional funding is provided for districts with declining enrollments through the use of "marginal cost" pupil units, which reflect a mix of current and prior-year data.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

- ⇒ Beginning in FY 2001, district cooperation revenue was rolled into the general education formula, increasing the formula allowance by \$67.
- ⇒ Beginning in FY 2003, the general education levy is eliminated, and the general education formula is fully funded by the state. In addition, \$415 per pupil unit was transferred from referendum revenue to the general education formula.

Additional information on the history of [Minnesota School Finance](#) is available on the Division of Program Finance web site.

Key Measures

Indicators of the adequacy and equity of general education revenue include the following:

- ⇒ *Growth in Revenue per ADM.* The table below shows the change in general education revenue per ADM from FY 1996 through FY 2003 in current and constant (2001) dollars. Between FY 1996 and FY 2003, general education revenue per ADM increased by 30.5%. After adjusting for inflation using the consumer price index (CPI), the increase was 11.0%.

General Education Revenue per ADM, FY 1996 - FY 2003
(Including amounts rolled into General Education Revenue since FY 1996)

| | Revenue per ADM Current Dollars | | Revenue per ADM Constant (2001) Dollars | |
|------|------------------------------------|------------------------|--|----------------------|
| | Amount | Cumulative % Change | Amount | Cumulative Change |
| 1996 | 4,875 | NA | 5,523 | NA |
| 1997 | 4,946 | 1.5% | 5,450 | -1.3% |
| 1998 | 5,152 | 5.7% | 5,577 | 1.0% |
| 1999 | 5,294 | 8.6% | 5,635 | 2.0% |
| 2000 | 5,602 | 14.9% | 5,794 | 4.9% |
| 2001 | 5,844 | 19.9% | 5,844 | 5.8% |
| 2002 | 6,044 | 24.0% | 5,943 | 7.6% |
| 2003 | 6,364 | 30.5% | 6,129 | 11.0% |

Excludes revenues and pupils for PSEO College Shared Time and Contract Alternative Adjustments.

- ⇒ *Pupil – staff ratios.* Compensation for teachers and other district staff constitutes the districts' largest operating cost. The graph shows the ratio of ADM pupils to licensed professional staff. From FY 1990 to FY 1997 there was little variation in the ratio. Since then the ratio has decreased. For FY 2000 and FY 2001 the ratio was 13.9.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

⇒ *Disparity in revenue per pupil unit.* M.S. 127A.51 requires the department to report annually on the disparity in general education revenue per pupil unit, as measured by the ratio of the 95th percentile to the 5th percentile of general education revenue per pupil unit. The [General Education Disparity Report](#) can be found on the Division of Program Finance web site. Beginning in FY 2003, equity revenue is included in the analysis. Therefore, for comparison purposes, the numbers in the following chart have been adjusted to include equity revenue for all years. According to this measure, the disparity in general education revenue per pupil unit remained fairly constant between FY 1995 and FY 1997; then increased for FY 1998 and FY 1999. Since then, there has been a steady decline in the ratio.

⇒ *Other Measures.* Except for the portion of revenue attributable to compensatory revenue, which must be passed through to each school site, each local school board determines how to allocate the general education revenue among school sites and programs subject to certain legislative restrictions. Information on [school performance](#) and [school district spending](#) can be found on the department's web site.

Activity Funding

- ⇒ Funding is based primarily on the average daily membership (ADM) of students in pre-kindergarten through grade 12. ADM is computed by dividing the number of student membership days by the number of days school is in session.
- ⇒ To reflect cost differences; the ADM is weighted by grade level to determine the number of pupil units:

| | | | |
|-----------------------|-------|---------------|-------|
| Disabled Pre-K | 1.25 | Grades 1 – 3 | 1.115 |
| Disabled Kindergarten | 1.0 | Grades 4 - 6 | 1.06 |
| Regular Kindergarten | 0.557 | Grades 7 – 12 | 1.30 |

⇒ Most revenues are computed using adjusted marginal cost pupil units (AMCPU). "Adjusted" means that the resident pupil units have been adjusted by adding the pupil units generated by nonresident students served in the district under alternative attendance programs such as open enrollment, and subtracting the pupil units generated by resident students served in another district under an alternative attendance program. "Marginal cost" means that pupil units are computed using a mix of current and prior year data, recognizing that school districts have fixed costs that do not decline in direct proportion to enrollment decline. Adjusted marginal cost pupil units equal the greater of the adjusted pupil units for the current year or 77% of the adjusted pupil units for the current year plus 23% of the adjusted pupil units for the prior year.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

General education revenue includes several components, as shown in the table below. Beginning in FY 2003, all components except referendum revenue are funded entirely with state aid. Referendum revenue is funded with a mix of local property taxes, state referendum equalization aid, and state tax base replacement aid.

Spreadsheets showing general education revenue by component for FY 1999 – FY 2003 for individual districts, groupings of districts and the state are at [End of 2002 Session District Revenue Estimates by Strata and by District](#). Detailed [spreadsheets](#) showing the calculation of each revenue component for each school district and charter school for each fiscal year are on the Division of Program Finance web site.

General Education Revenue by Component – FY 2003 (est.)

| | Number of Districts | Number of Charter Schools | Amount (Millions) | Percent of Total |
|-----------------------------------|--------------------------------|--------------------------------------|------------------------------|-----------------------------|
| 1. Basic | 343 | 77 | \$ 4,513.5 | 83.1% |
| 2. Basic Skills: | | | | |
| a) Compensatory | 341 | 75 | 250.3 | 4.6% |
| b) LEP (incl. Concentration) | 209 | 22 | 51.0 | 0.9% |
| 3. Sparsity | 78 | 77 | 15.7 | 0.3% |
| 4. Transportation Sparsity | 343 | 31 | 56.6 | 1.0% |
| 5. Operating Capital | 343 | 77 | 199.2 | 3.7% |
| 6. Training & Experience | 216 | 77 | 17.7 | 0.3% |
| 7. Equity | 322 | 77 | 34.7 | 0.6% |
| 8. Alternative Attendance Adjust. | 218 | 73 | 2.0 | 0.0% |
| 9. Misc. Adjustments | | | | |
| a) Pension Adjustment | 342 | 77 | (46.6) | |
| b) PSEO-College | N/A | N/A | 18.8 | 0.3% |
| c) Shared Time | N/A | N/A | 4.1 | 0.1% |
| d) Contract Alternative | N/A | N/A | 17.6 | 0.3 |
| SUBTOTAL | 343 | 65 | \$5,134.6 | 94.5% |
| 10. Operating Referendum | 267 | 0 | 296.6 | 5.5% |
| GRAND TOTAL REVENUE | 343 | 77 | \$5,431.5 | 100.0% |

DETAIL OF REVENUE COMPONENTS. For FY 2003 and later, the components of general education revenue are as follows:

Basic Revenue

- ⇒ Basic revenue provides all districts with a uniform allocation per pupil unit.
- ⇒ Basic revenue for a district equals the product of the district's adjusted marginal cost pupil units times the formula allowance established in law.
- ⇒ The formula allowance for FY 2003 and later is \$4,601.
- ⇒ The change in the formula allowance is not a reliable indicator of the growth in school district revenue per student over time because of several factors, including changes in pupil weights, changes in formulas for allocating additional pupil units to districts with declining enrollment, transfers of various funding programs into or out of the general education formula, offsets to the formula for changes in other funding components, and changes in other funding components.

Basic Skills Revenue

Basic skills revenue includes compensatory revenue and LEP revenue:

Compensatory Revenue is based on the concentration of poverty in a school building.

- ⇒ A site's compensatory revenue for each eligible pupil increases as the concentration of eligible pupils at the site increases. The maximum compensatory funding per free-lunch pupil is 60% of the formula allowance in

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

sites where the free lunch count plus 1/2 of the reduced-price lunch count is 80% or more of the total enrollment. Funding is based on the October 1 count for the prior school year.

LEP Revenue is based on the number and concentration of LEP students enrolled in the district. There are two components to LEP revenue: regular LEP revenue and concentration aid.

- ⇒ For districts and charter schools with at least one LEP student, regular LEP revenue equals \$584 times the greater of 20 or the marginal cost number of LEP pupils enrolled in the district (greater of current year count or 77% of current year plus 23% of prior year).
- ⇒ LEP concentration aid provides additional funding of \$190 times the LEP enrollment, times the lesser of one or the ratio of the district's LEP concentration percent to 11.5%.

Beginning in FY 2004, an LEP pupil ceases to generate revenue in the school year following the school year in which the pupil attains the state cut-off score on the Test of Emerging Academic English (TEAE). This test is designed to provide information about how well students with limited English language proficiency are learning academic English required for achievement of the high standards in reading and writing.

Sparsity Revenue

- ⇒ This revenue funds the added costs of operating small schools that are too isolated to reduce costs by cooperating or consolidating. The smaller the enrollment, the greater the potential sparsity revenue per student. The greater the isolation, the greater the portion of potential revenue that is paid. Sparsity revenue is calculated on a school-by-school basis.
- ⇒ Separate formulas are used for elementary schools and secondary schools:

For a secondary school to generate sparsity revenue, it must have a secondary ADM (grades 7-12) less than 400, and an isolation index greater than 23. The isolation index equals the square root of 55% of the attendance area of the school district, plus the distance to the nearest other high school. The isolation index approximates the longest travel distance that would be necessary after consolidation.

For an elementary school to generate sparsity revenue, it must have an elementary ADM (grades K-6) less than 140, and be located at least 19 miles from the nearest other elementary school.

Transportation Sparsity Revenue

- ⇒ This revenue funds the added cost of pupil transportation in areas with low population density, supplementing the 4.85% of basic revenue, (\$223 per pupil unit in FY 2003), provided to all districts for transportation purposes. The transportation sparsity allowance for a district increases as the number of pupil units per square mile decreases.

Training and Experience (T & E) Revenue

- ⇒ This revenue adjusts for cost variations associated with differences in the training and experience of the faculty. It is being phased out as teaching staff employed in FY 1997 leave the district.

Operating Capital Revenue

- ⇒ This revenue, which is reserved for facilities and equipment purposes, equals \$173 per pupil unit, plus an adjustment of up to \$50 per pupil unit, based on the average age of the district's buildings.

Equity Revenue

- ⇒ This formula provides additional revenue for districts with referendum revenue per pupil unit below the 95th percentile for the region where the district is located (metro or rural).
- ⇒ Minneapolis, St. Paul, and Duluth are not eligible for this revenue.
- ⇒ For qualifying districts with no referendum levy, the revenue allowance is \$10 per pupil unit.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

- ⇒ For qualifying districts with a referendum levy, the revenue allowance is \$10 plus an amount up to \$55 per pupil unit, depending on how far the district's referendum revenue per pupil unit is below the regional 95th percentile (sliding scale).

Alternative Attendance Adjustment

- ⇒ Referendum equalization aid follows the student to the nonresident district or charter school the student attends. The resident district loses the aid generated by the student.
- ⇒ If the student enrolls in another school district, that district's aid is increased by the nonresident district's referendum equalization aid per pupil unit.
- ⇒ If the student enrolls in a charter school, the charter school's aid is increased by the amount subtracted from the aid paid to the resident district.

Miscellaneous Adjustments to General Education Revenue

- ⇒ *Post-Secondary Enrollment Options (PSEO) Aid* is paid to Minnesota higher education institutions for courses taken by 11th and 12th grade students for high school credit. For institutions granting quarter credit, the reimbursement per credit hour is 88% of the formula allowance times 1.3, and divided by 45. For institutions granting semester credit, the reimbursement per credit hour is 88% of the formula allowance times 1.3, and divided by 30. Additional information on this program can be found on the department's [PSEO](#) web site.
- ⇒ *Contract Alternative Aid* is paid to districts for students eligible to participate in the graduation incentives program who enroll in nonpublic, nonsectarian schools that have contracted with the serving school district to provide education services.
- ⇒ *Shared Time Aid* is paid to districts for students who attend public schools on a part-time basis while also attending private schools. Revenue for shared time pupils equals their full-time equivalent pupil units times the formula allowance.
- ⇒ *Pension Adjustment*. General education aid is adjusted to offset the impact of certain changes in employer contribution rates for members of the Teachers Retirement Association (TRA) and the Public Employees Retirement Association (PERA). General education aid is reduced by an amount equal to 2.34% of the FY 1997 salaries for TRA members, and is increased by an amount equal to 0.7% of FY 1997 salaries for PERA members. In addition to these adjustments, an adjustment is made for a 1984 PERA rate change.

Referendum Revenue

- ⇒ A school board may increase its revenue for general education, beyond the level otherwise provided by state law, by obtaining approval from district voters for a referendum levy.
- ⇒ A district's gross referendum revenue equals the allowance per resident marginal cost pupil unit specified on the ballot times the school district's resident marginal cost pupil units.
- ⇒ A district's referendum allowance per pupil unit may not exceed the greater of a) 18.2% of the formula allowance, (\$837 in FY 2003), or b) 116.2% of the district's referendum allowance in FY 1994 minus \$415. The referendum allowance cap does not apply to districts receiving sparsity revenue.

Referendum Aid and Levy

- ⇒ School districts receiving referendum revenue make an additional levy for this purpose. The levy is spread based on the referendum market value of property, which excludes seasonal recreational cabin property and agricultural land (the house, garage and one acre of farm properties are taxable).
- ⇒ The state funds a portion of referendum revenue with referendum equalization aid and tax base replacement aid. Beginning in FY 2003, a two-tiered referendum equalization formula is used. For the first \$126 of revenue per pupil unit, the local levy share equals the lesser of 100% of the revenue or the product of the revenue times the ratio of the district's referendum market value per resident marginal cost pupil to \$476,000. For revenue over \$126 per pupil unit, up to the referendum allowance cap, the local levy share equals the lesser of 100% of the revenue or the product of the revenue times the ratio of the district's referendum market value per resident marginal cost pupil to \$270,000. For districts qualifying for sparsity revenue, the referendum allowance cap does not apply, and the full referendum revenue over \$126 per pupil unit is eligible for equalization using the \$270,000 equalizing factor.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: GENERAL EDUCATION

Narrative

⇒ For districts with an FY 2002 referendum allowance levy exceeding \$415, the state pays tax base replacement aid equal to the unexpired portion of the district's referendum levy for taxes payable in 2002 attributable to the portion of the referendum allowance exceeding \$415 levied against seasonal recreational cabin property and agricultural land. Because tax base replacement aid is subtracted from referendum equalization aid, in FY 2003 it provides a net reduction in taxes only for 26 school districts where the tax base replacement aid exceeds the referendum equalization aid.

Replacements of General Education Revenue

A district's general education aid is reduced by the amount that it receives from the following sources:

- ⇒ *School Endowment Fund.* This fund is apportioned twice a year to all districts on the basis of the previous year's ADM (M.S. 127A.33). The School Endowment Fund distributes investment earnings transferred to it from the Permanent School Fund. The principle of the permanent school fund, which must remain perpetual and inviolate, has been generated by land sales, mining royalties, timber sales, lakeshore and other leases, and other miscellaneous sources.
- ⇒ *County Apportionment Deduction.* School districts receive revenue from the apportionment of certain county receipts (M.S. 127A.34). This revenue is derived from penalties on real estate taxes, taxes on transmission and distribution lines, liquor license fees, fines, and other sources.
- ⇒ *Taconite Aid.* Certain districts may receive a small portion of their general education revenue from various taconite taxes (M.S. 294.21-294.28; M.S. Chapter 298). Taconite receipts of a school district for a fiscal year exceeding the amount needed to offset the taconite levy limitation reduction recognized for that fiscal year are subtracted from general education aid under M.S. 126C.21, subd. 4.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: PROPERTY TAX SHIFT (info only)

Narrative

Activity Description

Citation: M.S. 123B.75, Subd.5

This accounting mechanism was first implemented in 1983 to help balance the state's budget and lessen cuts in education programs.

Activity at a Glance

Early Recognition Amounts

- ◆ FY 2000 \$135.1 million
- ◆ FY 2001 \$150.5 million

Population Served

This activity, in earlier years, provided benefits to both the state and its citizens by allowing the state to balance the state budget without making severe cuts in education aid. Districts benefit from current provisions of the law that allow districts to preserve fund balance created by historic early recognition of the specific levies including referendum, health benefits and insurance, and reemployment.

History

While property taxes are paid on a calendar year basis, school districts operate on a fiscal year that runs from July 1 to June 30. The first half of the property taxes payable for the calendar year are due in May and the second half are due in October or November.

Prior to FY 1983, all of the school districts' May property tax collections were held and recognized as revenue in the following fiscal year, beginning July 1. Beginning in FY 1983, the revenue recognition policy was changed so that a portion of the spring proceeds were recognized as revenue in the fiscal year of collection. The shift provision was structured to be revenue neutral to school districts¹ by adjusting state aid payments by the difference between the current year's early levy recognition amount and the previous year's early levy recognition amount. This accounting change provided the state with one-time savings in aid payments, without reducing the overall revenue recognized by a school district.

The state began repaying the revenue neutral portion of the shift in 1994. The following amounts were appropriated to eliminate the revenue neutral portion of the shift between FY 1994 and FY 1999.

| <u>FY 1994</u> | <u>FY 1995</u> | <u>FY 1996</u> | <u>FY 1997</u> | <u>FY 1998</u> | <u>FY 1999</u> | <u>TOTAL</u> |
|----------------|----------------|----------------|----------------|----------------|----------------|--------------|
| \$171,290 | \$710 | \$314,832 | \$180,000 | \$18,700 | \$90,200 | \$775,732 |

The referendum levy portion of the recognition change amount (along with several other smaller levies) is not revenue neutral and was not eliminated in FY 1999. Districts with first-time referendum levies recognized a portion of the levy a year early, while districts levying for the last time recognized only the balance not recognized the previous year. The continued early recognition of the referendum levy portion prevented school districts from experiencing a revenue loss when in the year the revenue neutral portion of the shift was eliminated. The continued early recognition of the other specified levies matches the timing of revenue recognition to district expenditure.

For FY 2000 school districts were required to recognize the lesser of 1) tax settlements received in May, June, and July, or 2) the sum of 31% of the referendum levy certified in the prior calendar year and 100% of levies for integration, reemployment insurance, health insurance, health benefits, retirement, and levy adjustments for retroactive formula changes.

Implementation of the education homestead and agricultural homestead credits reduced tax receipts for some districts to an amount less than the amount of the specific levies statute directs for early recognition. This resulted in revenue losses for some school districts, particularly those also receiving taconite property tax relief.

¹ Except for the referendum levy and other levies (such as health insurance) specified in law.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: PROPERTY TAX SHIFT (info only)

Narrative

The formula was changed so for FY 2001 school districts were required to recognize the lesser of 1) tax settlements received in May, June, and July ***plus general education aid received in July and August***, or 2) the sum of 31% of the referendum levy certified in the prior calendar year and 100% of levies for integration, reemployment insurance, health insurance, health benefits, retirement, and levy adjustments for retroactive formula changes. This prevents a one-time revenue loss to districts where the spring tax settlements are not large enough to cover the amount of levy to be recognized early.

For FY 2002 and later, school districts are required to recognize the lesser of 1) tax settlements received in May, June, and July ***plus general education aid received in July and August***, or 2) the sum of 31% of the referendum levy ***certified in calendar year 2000*** and 100% of levies for integration, reemployment insurance, health insurance, health benefits, retirement, and levy adjustments for retroactive formula changes. This change to the formula prevents a one-time revenue loss to districts where the referendum levy is reduced for taxes payable in 2002 and later due to the \$415 transfer of referendum authority to the general education formula, tax base replacement aid, and equalization aid provided on the remaining referendum revenue.

The continued early recognition of these categories 1) prevent school districts from experiencing a revenue loss in a year; or 2) match the timing of revenue recognition to district expenditure.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: GENERAL EDUCATION

Activity: STATE PAID PROPERTY TAX CREDITS (info only)

Narrative

Activity Description

Citation: M.S. 469.170; M.S. 273.1398

Information Only

Property tax credits and aids administered by the Department of Revenue provide a vehicle for property tax reform or relief for targeted real property classes. The effect of these state paid property tax credits and aids is to shift a portion of property tax burden for education from property owners to the state.

Activity at a Glance

- ◆ 7 credit programs in FY 2003
- ◆ \$81.4 million total amount of credits FY 2003

Population Served

All school districts in the state receive some form of state paid property tax credits. The number and the amount of state paid tax credits that districts and property tax owners in the district receive is dependent upon the local conditions.

Activity Funding

Current property tax credit and aid programs paid to school districts by Children, Families & Learning (CFL) affect property tax in one of two ways:

Programs reducing the property tax rate applied to the property value to calculate property tax.

- ⇒ Homestead and Agricultural Credit Aid became effective for taxes payable in 1990, replacing the homestead credit and the agricultural credit programs. It reduced the overall net levy and tax rate of a school district. It was eliminated in FY 2003.
- ⇒ Disparity Reduction Aid provides relief to high tax rate areas. The Department of Revenue calculates a reduction to the initial tax rate to reduce the rate as much as 10%.

Programs providing a reduction to the calculated property tax, (listed in the order applied to the tax).

- ⇒ Disaster Credit provides relief to homesteads located in declared disaster or emergency areas.
- ⇒ Agricultural Preserves Credit provides relief to owners of agricultural property in the seven county metropolitan area.
- ⇒ Enterprise Zone Credit provides relief to commercial and industrial properties in economically depressed areas designated as enterprise zones with the purpose of retaining business base and generating employment.
- ⇒ Disparity Reduction Credit provides relief to apartments, commercial, industrial, and public utilities in economically depressed areas located at Minnesota borders designated as enterprise zones.
- ⇒ Education Homestead Credit, the largest of the property tax credits, was implemented as a property tax reform measure for taxes payable in 1998. The credit targeted homesteaded property and replaced 83% of the general education tax, up to a maximum of \$390. It was eliminated in FY 2003 with the state takeover of the basic general education levy.
- ⇒ Education Agricultural Credit, the second largest of the property tax credits, targeted homesteaded agricultural property and was implemented for taxes payable in 2000. It replaces 70% of the general education tax for agricultural homestead property with a market value of up to \$600,000 and 63% for other agricultural and timberland properties. It was eliminated in FY 2003 with the state takeover of the basic general education levy.
- ⇒ Residential Homestead Market Value Credit, implemented in 2002, provides relief to residential homestead property, including the house, garage, and one acre of land for farm homesteads and certain resort homesteads. The credit is computed as 0.4% of the first \$76,000 market value of each homestead property. The maximum credit is \$304, and is phased out at a rate of .09% of the value over \$76,000.
- ⇒ Agricultural Land Market Value Credit, implemented in 2002 provides relief to agricultural homestead property, excluding the house, garage, and one acre. The credit is computed as 0.2% of the market value of each homestead property. The maximum credit is \$230.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: STATE PAID PROPERTY TAX CREDITS (info only)

Narrative

In addition to the property tax relief aids and credits listed above, school districts may receive others paid by the county, including power line credit, county conservation credit, and taconite homestead credit. Taconite homestead credit targets Iron Range homeowners with a credit of either 66% or 57%, depending on characteristics of the mining industry within the school district. The 66% credit has a maximum of \$315.10 per property. The 57% credit has a maximum of \$289.80 per property.

Key Measures

Open appropriations are provided for the following aids and credits paid to school districts by CFL. The amounts include credits and aids for mobile home properties. The Department of Revenue reports the property tax credit appropriation within its budget.

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: REFERENDUM TAX REPLACEMENT

Narrative

Activity Description

Citation: M.S. 126C.17, Subd. 7a

This activity ensures that the removal of agricultural land and seasonal recreational cabin properties from the referendum tax base beginning with taxes payable in 2002 will not increase tax burdens for other taxpayers in a district for the portion of pre-existing referendum authorizations that remain in effect for later years.

Activity at a Glance

| | |
|---------------------------------|-------------|
| ◆ FY 2003 State Aid Entitlement | \$8,347,239 |
| ◆ Districts Participating | 122 |
| ◆ Average Aid Amount | \$68,419.99 |

Population Served

Referendum tax base replacement aid provides property tax relief to property owners who would otherwise have experienced tax increases as a result of the removal of farmland and seasonal recreational cabin property from referendum market value. All else being equal, the removal of these properties from the referendum tax base would have increased tax burdens on other taxpayers in a school district.

Services Provided

School districts do not receive additional revenue as a result of this aid.

Key Measures

Participating Districts

State Aid Dollars

CHILDREN, FAMILIES, & LEARNING

Program: GENERAL EDUCATION

Activity: REFERENDUM TAX REPLACEMENT

Narrative

Activity Funding

The referendum tax base replacement aid for a district equals the amount of the FY 2002 referendum levy attributable to the portion of the referendum allowance exceeding \$415 per pupil unit that was levied against agricultural land and seasonal recreational cabin properties. When the FY 2002 referendum authority for a district expires, the corresponding referendum tax base aid also expires. Since all referendums in effect for FY 2002 will expire by 2012, all referendum tax base replacement aid will expire by FY 2012.

Because referendum tax base replacement aid is subtracted from referendum equalization aid otherwise due the school district, it provides a net reduction in property taxes only for 26 school districts where the tax base replacement aid exceeds the referendum equalization aid.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: OTHER GENERAL PROGRAMS

Activity: ENROLLMENT OPTIONS TRANSPORT

Narrative

Activity Description

Citation: M.S. 124D.03; 124D.09; 124D.10

This state aid program helps low-income students participate in the Post-Secondary Enrollment Options (PSEO), School District Enrollment Options (SDEO), and Results-Oriented Charter Schools (ROCS) programs by providing state aid to school districts that reimburse families for transportation expenses associated with these programs. (See Student Choice/Tax Incentives narrative for more information.)

Activity at a Glance

- ◆ 36 students served
- ◆ \$614 average reimbursement

Population Served

Low-income students participating in PSEO, SDEO and ROCS programs are served by this program.

Services Provided

State aid is paid to school districts to reimburse transportation costs to families whose income is at or below the federal poverty income guideline level.

Some students, because of disabilities, cannot participate in this program unless they receive district-provided transportation services. For disabled students participating in open enrollment, districts may be forced to travel beyond district boundaries to transport the students. Some charter schools, even though they elected to use district-provided transportation, may be forced to transport nonresident students with disabilities within those students' resident districts. In all these cases, these potentially high cost transportation services are not authorized for state special education transportation aid. This program assures that disabled students of low income families will not be discouraged from participating in options programs due to high cost transportation.

Historical Perspective

Beginning in FY 1999, the program was expanded to allow PSEO mileage reimbursement to students attending nonpublic schools (including home schools).

**Transportation Claim Amounts from
Low-Income Families**

Key Measures

All students meeting eligibility are reimbursed.

CHILDREN, FAMILIES, & LEARNING

Program: OTHER GENERAL PROGRAMS

Activity: ENROLLMENT OPTIONS TRANSPORT

Narrative

Activity Funding

The mileage reimbursement rate is set at 15 cents per mile and is limited to 250 miles per week. There is an exception to the 250 miles per week limit in the PSEO program if the nearest post-secondary institution is more than 25 miles from the student's home or high school. School districts and post-secondary institutions receive notification of this program on an annual basis. Students provide their own transportation in this program. PSEO students apply through their resident districts (or the post-secondary institutions, if nonpublic). Open enrollment students submit their applications to the enrolling districts. Charter school students apply to their charter schools.

The low eligibility threshold for this program (100% of federal poverty guidelines) excludes many students qualifying for other poverty-based measures (e.g., free and reduced-priced lunch).

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: OTHER GENERAL PROGRAMS

Activity: ABATEMENT REVENUE

Narrative

Activity Description

Citation: M.S. 126C.46; 127A.49, Subd.2

This state aid and local levy program maintains equity for students and taxpayers by replacing revenue to which the district was entitled but did not receive due to abatements.¹ The objective is to replace the revenue in the same proportion of aid and levy as the original entitlement.

Activity at a Glance

In calendar year 2001:

| | |
|-----------------------|----------------|
| ◆ Taxes Abated | \$12.4 million |
| ◆ Abatement Aid | \$2.8 million |
| ◆ Abatement Levy | \$9.6 million |
| ◆ Number of Districts | 258 |

Population Served

All eligible school districts in Minnesota participate in this program.

Services Provided

Abatement revenue is provided to school districts to prevent permanent revenue losses. The amount of abatement revenue for a school district is determined from data on net revenue losses as certified by the county auditors.

Historical Perspective

Funding for abatement revenue began in the late 1970s and was expanded in 1993 to include interest paid by the district on abatement refunds.

Key Measures

Educational funding policies that better enable schools, communities and local governments to manage fiscal resources for the most effective and efficient delivery of services are implemented.

- ⇒ A total of 258 school districts receive abatement revenue in FY 2003 for taxes abated in calendar 2001.
- ⇒ The following graph shows the amount of school taxes abated each year since 1990. These amounts would be losses to school district budgets without the abatement revenue formula.

Net Schools Taxes Abated

¹ Court-ordered net reductions in the tax capacity of the district after taxes have been spread by the county auditor.

CHILDREN, FAMILIES, & LEARNING

Program: OTHER GENERAL PROGRAMS

Activity: ABATEMENT REVENUE

Narrative

Activity Funding

Net revenue loss due to abatements is replaced with state aid and levy authority. The intent is to pay approximately the same amount in abatement aid as would have been paid to the district in general education and other equalized aids if the adjusted net tax capacity could have been adjusted to the lower level.

In general, school taxes abated in one calendar year are reported to the state in the following calendar year and included in the levy certified in the fall of that year for taxes payable in the next calendar year. For example, school taxes abated in 2001 are reported in the spring of 2002 and included on the 2002 payable 2003 levy.

A district may levy a year early for the net revenue loss incurred during the first six months of the calendar year (advance abatement levy) or choose to spread the levy over two years (three years with approval of the commissioner).

A district's aid entitlement is equal to its revenue loss multiplied by the ratio of: a) the amount certified by the district in equalized referendum, health and safety, and community education levies for which the district received corresponding state aid in the second preceding year, to b) the district's total certified levy in the preceding fall, plus or minus auditor's adjustments.

Abatement levy authority is the total of the three following components:

- ◆ the net revenue loss minus abatement aid after any proration is deducted,
- ◆ the net revenue loss for the first six months of the following calendar year, less any amount certified for the first six months of the prior calendar year, and
- ◆ an amount for any interest paid by the district on abatement refunds.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: OTHER GENERAL PROGRAMS

Activity: CONSOLIDATION TRANSITION

Narrative

Activity Description

Citation: M.S. 123A.485

The purpose of this state aid program is to support districts that have recently consolidated by providing funds for one-time reorganization costs and to foster conditions that better promote student success.

Activity at a Glance

| | |
|-------------------------------|-----------|
| ◆ Number of districts FY 2003 | 2 |
| ◆ FY 2003 State Appropriation | \$225,000 |

Population Served

Students and communities in eligible districts are served by this activity.

Services Provided

Voluntary school district reorganizations help to expand programs and services to students and families in greater Minnesota at a lower cost. This program provides an incentive for district consolidation and addresses some of the one-time costs associated with district consolidation. This program provides an alternative means of dealing with fiscal issues, such as staff reduction and operational debt reduction that often prevent permanent school district reorganization. Revenue may be used to cover district costs for early retirement incentives granted by the district under M.S. 123A.48, Subd. 23; to reduce operating debt as defined in M.S. 123B.82; to enhance learning opportunities; and to cover reorganization expenses.

A school district is eligible for revenue if it has reorganized under M.S. 123A.48 after 06-04-94, and has not received cooperation and combination revenue for at least six years. M.S. 123A.48 provides for the process of school consolidation, including approval procedures and timelines.

Historical Perspective

This program was enacted by the 1994 legislature. This revenue replaced the pre-existing cooperation and combination (C & C) revenue and transition and severance levies for consolidating districts.

Key Measures

While there are financial implications to consolidation, the primary reason for districts to consolidate is to address the academic needs of students. School districts that have consolidated through this program have reported that the consolidation has provided additional opportunities to meet student academic needs, increased efficiency in district operations, and improved the likelihood of long-term financial health of the newly formed district. The potential cost efficiencies that could be attributed to this program vary by district due to the unique financial, operating, and facility characteristics of the combining districts.

Jackson County Central ISD 2895 was formed by consolidation of two existing districts in FY 2001. On a per student measure, expenditures for the new district decreased by 22% for district support services, 11% for pupil support services, and 15% for operations and maintenance costs when compared to the sum of previous year expenditures for the two districts that combined. The savings are primarily due to the closing of the Sioux Valley school site.

Activity Funding

This program is funded with state aid and a local property tax levy. State aid is equal to \$200 times the actual pupil units in the first year after consolidation and \$100 times the actual pupil units in the second year after consolidation. A maximum of 1,500 pupils may be counted for the purpose of aid calculation. If consolidation transition aid is not sufficient to cover the eligible district costs, school districts may levy the difference, spreading the levy over up to three years.

Program: OTHER GENERAL PROGRAMS

Activity: SPECIAL PROVISIONS FOR SELECTED DISTRICTS

Narrative

Activity Description

The following state aid programs provide financial assistance to five public school districts with declining pupil units due to industry plant closings, natural disasters, or airport expansion, and to one district experiencing cash flow problems due to a large audit finding.

Population Served

All students and communities in selected school districts are served by these programs.

Services Provided

Declining Pupil Unit Aid – Albert Lea

Citation: Laws 2002, Chapter 220, Article 4, Section 10, Subd 1,2,3,4.

This program provides declining pupil aid to the Albert Lea school in the amount of \$300,000 in FY 2003, \$225,000 in FY 2004, \$150,000 in FY 2005, and \$75,000 in FY 2006. This program was implemented by the 2002 legislature in response to the anticipated loss of pupils and revenues in the Albert Lea public schools due to the closure of the Farmland Foods plant.

Declining Pupil Unit Aid – Mesabi East

Citation: Laws 2002, Chapter 220, Article 4, Section 11, Subd 1,2,3,4.

This program provides declining pupil aid for the Mesabi East school district in the amount of \$200,000 in FY 2003, \$150,000 in FY 2004, \$100,000 in FY 2005, and \$50,000 in FY 2006. This program was implemented by the 2002 legislature in response to the anticipated loss of pupils and revenues in the Mesabi East schools due to the closure of the LTV plant in Hoyt Lakes.

Richfield Airport Impact Aid

Citation: Laws 2000, Chapter. 489, Art. 2, Sec.36; Laws 2001, First Special Session, Chapter 6, Article 1, Section 36

This program provides financial assistance to the Richfield Public School District for the loss of students due to the Minneapolis-St. Paul International Airport expansion and the resulting demolition of residential housing. The airport expansion project requires the demolition of residential housing within the airport expansion zone which is defined in Laws 1999, Chapter 243, Art. 16, Sec. 35.

This aid program, authorized for FY 2004-08, will replace a portion of the revenues attributable to students residing in the airport expansion zone in the 1998-99 school year. For FY 2004-05, the statutory formula provides aid of 70% of the general education formula allowance multiplied by the 1998-99 pupil units attributed to the airport impact zone defined in Laws 1999, Ch. 243, Art. 16, Sec. 35. That percentage declines to 52.5% in FY 2006, 35% in FY 2007, and 17.5% in FY 2008, as the district adapts to the student losses. The program is eliminated in FY 2008.

Declining Pupil Unit Aid - Yellow Medicine East

Citation: Laws 2001, First Special Session, Chapter 6, Article 1, Section 49

This program provides declining pupil aid for the Yellow Medicine East school district in the amount of \$156,000 in FY 2002, \$117,000 in FY 2003, \$78,000 in FY 2004, and \$39,000 in FY 2005. This program was implemented by the 2001 legislature in response to the anticipated loss of pupils and revenues in the Yellow Medicine East schools due to the tornado destruction of homes in the district.

Program: OTHER GENERAL PROGRAMS

Activity: SPECIAL PROVISIONS FOR SELECTED DISTRICTS

Narrative

Little Falls Payback

Citation: Laws 2001, First Special Session, Chapter 6, Article 1, Section 54, Subd. 12

This program requires the Minnesota Department of Children, Families & Learning to allow the Little Falls School District five years to repay a \$500,000 state aid overpayment resulting from the district's miscalculation of pupil units in FY 1998 and FY 1999. The district must repay the aid in equal payments of \$100,000 each year on June 20. Repayments began on June 20, 2002.

Flood Enrollment Impact Aid – Roseau

Citation: Laws 2002, First Special Session, Chapter 1, Section 6

This program provides declining pupils aid to the Roseau School District. In FY 2003, the aid is equal to lesser of the general education formula allowance times the reduction, if any, in the district's adjusted marginal cost pupil unit decline between FY 2002 and FY 2003 or \$40,000. In FY 2004, the aid is equal to lesser of the general education formula allowance times the reduction, if any, in the district's adjusted marginal cost pupil unit decline between FY 2002 and FY 2004 or \$30,000. In FY 2005, the aid is equal to lesser of the general education formula allowance times the reduction, if any, in the district's adjusted marginal cost pupil unit decline between FY 2002 and FY 2005 or \$20,000. In FY 2006, the aid is equal to the lesser of the general education formula allowance times the reduction, if any, in the district's adjusted marginal cost pupil decline between FY 2002 and FY 2006 or \$10,000.

Key Measures

These programs address specific and unique financial circumstances for impacted districts. No specific measurement data is collected.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: OTHER GENERAL PROGRAMS

Activity: MISCELLANEOUS LEVIES

Narrative

Activity Description

Citation: See individual activities.

The following state programs exist to provide additional local property tax levy revenue to school districts to fund specific obligations of the district's general fund. School districts must meet statutory requirements for each levy program. Local school boards must annually approve each levy authority.

Activity at a Glance

◆ Number of Levy Programs 20

- ⇒ *Reemployment Insurance Levy* (M.S. 126C.43, Subd. 2). A school district may levy the amounts necessary to pay the district's obligations for unemployment insurance under M.S. 268.052, Subd. 1, and for job placement services offered to employees who may become eligible for benefits under M.S. 268.085.
- ⇒ *Statutory Operating Debt Levy* (M.S. 126C.42, Subd. 1). Only district 695, Chisholm; is still required to levy to retire the operating debt as of 06-30-77. (Last year of levy is Pay 03.)
- ⇒ *Operating Debt Levy* (M.S. 126C.42). Under the 1992 operating debt levy, a school district that has filed a statutory operating debt plan and has received approval by the commissioner may levy the lesser of
 - ◆ 1.0% of the adjusted net tax capacity of the district;
 - ◆ \$100,000; or
 - ◆ the amount needed to retire the deficit in the district's operating funds as of 06-30-92, reduced by any referendum revenue in the statutory operating debt plan.Payable 2003 is the last year of levy for districts under this authority.
- ⇒ *Judgment Levy* (M.S. 126C.43, Subd. 3 and 126C.47). A school district may levy the amounts necessary to pay the district's obligations for judgments against the district, including interest costs. The levy is limited to only the costs incurred since the last proposed levy was adopted.
- ⇒ *Health Insurance Levy* (M.S. 126C.41, Subd. 1 and Laws 1993, Chap. 224, Art. 8, Sec. 18). As an early retirement incentive, a school district may levy for health, medical, and dental expenses for certain eligible employees who retired between 05-15-92 and 07-21-92 and between 05-17-93 and 08-01-93. The levy is authorized for the retiree's expenses up to age 65. The levy is limited to the costs for the current fiscal year.
- ⇒ *Health Benefit Levy* (M.S. 126C.41, Subd. 2). A school district may levy for the district's obligations under the collective bargaining agreement in effect on 03-30-92 for health insurance and unreimbursed medical expenses of employees who retired before 07-01-92. The district levy authority may not exceed \$600,000. The levy is limited to the costs for the current fiscal year.
- ⇒ *Minneapolis Civil Service Retirement Levy* (M.S. 126C.41 Subd. 3). The Minneapolis school district may levy the amount levied for retirement in 1978, reduced each year by 10% of the difference between the amount levied for retirement in 1971 and the amount levied for retirement in 1975. Beginning in 1991, the Minneapolis school district may also levy an additional amount required for contributions to the Minneapolis Employees Retirement fund as a result of the maximum dollar amount limitation on state contributions to the fund.
- ⇒ *Minneapolis and St. Paul Additional Retirement Levy* (M.S. 126C.41, Subd. 3). The Minneapolis and St. Paul school districts may levy for the increased costs of Teachers Retirement Association contributions due to changes in the contribution rates.
- ⇒ *Minneapolis Health Insurance Subsidy Levy* (M.S. 126C.41, Subd. 4). The Minneapolis school district may levy 0.10% of the district's adjusted net tax capacity to subsidize health insurance costs for retired teachers who were basic members of the Minneapolis Teachers Retirement Fund Association, who retired before 05-01-74, and who are not eligible to receive the hospital insurance benefits of the federal Medicare program without payment of a monthly premium.
- ⇒ *St. Paul Severance Levy* (Laws of 1989, Chap. 329, Art 13, Sec. 18). The St. Paul school district may levy 0.34% of the district's adjusted net tax capacity to pay for severance costs.
- ⇒ *Crime Levy* (M.S. 126C.44). A school district may levy up to \$30 times the estimated adjusted marginal cost pupil units to provide a drug abuse prevention program in the elementary schools, to provide liaison services in the schools, to provide a gang resistance education program in the schools, to pay the costs for security on school property, and/or pay for other crime prevention, drug abuse, student and staff safety, and violence prevention measures taken by the school district.

CHILDREN, FAMILIES, & LEARNING

Program: OTHER GENERAL PROGRAMS

Activity: MISCELLANEOUS LEVIES

Narrative

- ⇒ *Ice Arena Levy* (M.S. 126C.45). A school district that operates and maintains an ice arena may levy for the net operational costs of the ice arena for the previous fiscal year. The school district must demonstrate that it will offer equal access for male and female students.
- ⇒ *Staff Development Levy* (M.S. 122A.62). A school district with a site that has implemented an ongoing outplacement program for teachers and a teacher mentorship program may levy up to \$8.15 times the number of teachers at the site.
- ⇒ *Reorganization Operating Debt Levy* (M.S. 123A.73, Subd. 9 and M.S. 123B.82). A school district that reorganizes under consolidation or dissolution and attachment may levy to retire the net negative undesignated fund balance in the operating funds. The levy may be spread over a period up to five years.
- ⇒ *Severance Levies* (M.S. 123A.30, Subd. 6; M.S. 123A.73, Subd. 12; M.S. 123A.444; M.S. 124D.05, Subd. 3). A school district that reorganizes under dissolution and attachment may levy the costs of severance pay or early retirement incentives for licensed and nonlicensed employees who resign or retire early as a result of the reorganization. A school district with a secondary agreement with another district must pay severance to licensed employees placed on unrequested leave and may levy for the expenses.
- ⇒ *Consolidation/Transition Levies* (M.S. 123A.76). A school district that reorganizes under dissolution and attachment may levy for transition expenses associated with the reorganization.
- ⇒ *Attached Machinery Aid Adjustment* (M.S. 273.138, Subd. 6). School districts that receive attached machinery aid have a corresponding negative reduction made to their general education levy. Attached machinery aid was enacted in 1973 to replace the revenue loss when attached machinery was exempted from real property taxation.
- ⇒ *Swimming Pool Levy* (M.S. 126C.455). Each year, a school district with its home office located in a county that has (i) a population density of ten or fewer persons per square mile according to the 2000 census of population; (ii) an international border; and (iii) more than one school district within its boundaries, may levy for the net operational costs of a swimming pool. The levy may not exceed the net actual costs of operation of the swimming pool for the previous year.
- ⇒ *Career and Technical Education Levy* (Laws 2001, 1st Special Session Chapter 6, Article 2, Section 75, Laws 2002, Chapter 220 Article 3, Section 5). FY 2002- For taxes payable in 2002, a district that receives revenue during FY 2001 under M.S. 1245D.453 may levy an amount equal to the districts FY 2001 entitlement for Career and Technical Education or \$7,500, whichever is greater. FY 2003 - for taxes payable in 2003, a district may levy an amount equal to the district's FY 2001 entitlement for Career and Technical Education or \$10,000, whichever is greater.
- ⇒ *Economic Development Abatement Levy* (M.S. 469.1812 through M.S. 469.1815). The governing body of a political subdivision may grant an abatement of the taxes imposed by the political subdivision on a parcel of property, or defer the payments of the taxes and abate the interest and penalty that otherwise would apply, if: (a) it expects the benefits to the political subdivision of the proposed abatement agreement to at least equal the costs to the political subdivision of the proposed agreement or intends the abatement to phase in a property tax increase; and (b) it finds that doing so is in the public interest. The political subdivision must add to its levy amount for the current year the total estimated amount of all current year abatements granted. No abatement aid is generated for these abatements.

Minnesota school districts will generate revenue to the extent needed for various general fund obligations, thereby contributing to their overall financial health. School districts will not need to allocate general education formula funding to these identified costs.

This state aid program provides every pupil in the state with equitable access to secular study materials and pupil support services.

Population Served

Services are provided to Minnesota students attending nonpublic and home schools.

Services Provided

Funding is allocated to public school districts for the benefit of nonpublic school students, and not directly to nonpublic schools, in order to maintain the separation of church and state as required by the First Amendment to the U.S. Constitution.

School districts are reimbursed for the costs of the educational materials loaned to the nonpublic pupil (textbooks, individualized instructional materials, and standardized tests) or for the costs of providing support services (health services and secondary guidance and counseling services) to the nonpublic pupil. School districts receive additional funds to cover administrative costs. This amount is equal to 5% of their total aid reimbursement amount.

There are three basic categories of nonpublic pupil aid supporting the following services

Textbooks, Individualized Instructional Materials, and Standardized Tests

⇒ Public school districts, upon formal request, must provide nonpublic pupils with instructional materials that are secular, neutral, nonideological, and not able to be diverted to religious use. These items are loaned to the nonpublic pupil and remain the property of the district.

Health Services

⇒ Public school districts, upon formal request, provide nonpublic pupils with student health services provided to public pupils. Health services may be provided to nonpublic students at a public school, a neutral site, the nonpublic school, or any other suitable location.

Guidance and Counseling Services

⇒ Public school districts, upon formal request, provide nonpublic secondary pupils with guidance and counseling services provided to public secondary pupils. This does not include guidance or counseling in the planning or selection of particular courses or classroom activities of the nonpublic school. Eligible services must be provided either at the public school, the nonpublic school, or a neutral site.

Key Measures

Textbooks, Individualized Instructional Materials, and Standardized Tests

⇒ The percentage of nonpublic school pupils participating in this category has increased from 89% in FY 1990 to 91% in FY 2002.

Health Services

⇒ The percentage of nonpublic school pupils participating in this category decreased slightly from 88% in FY 1990 to 85% in FY 2002.

Activity at a Glance

- ◆ Number of students participating (FY 2002):

| | |
|-----------------------|--------|
| Text Book/Materials | 87,837 |
| Health Services | 82,274 |
| Guidance & Counseling | 27,460 |
- ◆ Percentage of nonpublic students participating in program (FY 2002):

| | |
|-----------------------|-----|
| Text Book/Materials | 91% |
| Health Services | 85% |
| Guidance & Counseling | 86% |

(grades 7-12)
- ◆ FY 2003 rates per nonpublic pupil:

| | |
|-----------------------|----------|
| Text Book/Materials | \$63.93 |
| Health Services | \$49.32 |
| Guidance & Counseling | \$161.02 |
- ◆ All nonpublic students requesting materials and/or services by the statutory deadline have been and are being accommodated.

CHILDREN, FAMILIES, & LEARNING

Program: NONPUBLIC PUPIL PROGRAMS

Activity: NONPUBLIC PUPIL AID

Narrative

Guidance and Counseling Services

- ⇒ The percentage of nonpublic secondary school pupils participating in this category has increased from 76% in FY 1990 to 86% in FY 2002.

Activity Funding

Nonpublic Pupil Aid is funded exclusively with state funds.

Textbooks

- ⇒ The districts are reimbursed for the cost of purchasing and distributing eligible materials. This is calculated as an amount equal to the statewide average expenditure per public school pupil for similar materials in the second preceding school year, adjusted by the percent of increase in the general education formula allowance from the second preceding school year to the current school year, multiplied by the number of nonpublic pupils served. For purposes of this formula, kindergarten pupils are weighted at 0.5.
- ⇒ The formula for computing the per pupil rate is as follows for FY 2001:

$$\begin{array}{rclcl} \text{FY 2003} & & \text{FY 2001 Avg. Expend} & & \\ \text{Per Pupil} & = & \text{per Public Pupil} & \times & \frac{\text{FY 2003 Gen. Ed. Form. Allow.}}{\text{FY 2001 Gen. Ed. Form. Allow.}} \\ \text{Rate} & & \text{for like materials} & & \end{array}$$

Health Services

- ⇒ Each participating district is reimbursed for the cost of providing these services up to an amount equal to the statewide average expenditure per public school pupil for similar services in the second preceding school year, times the number of nonpublic pupils served.
- ⇒ For FY 2003, the maximum per pupil rate for health services is \$49.32.

Guidance and Counseling Services

- ⇒ Each participating district is reimbursed for the cost incurred in providing eligible services up to an amount equal to the statewide average expenditure per public secondary pupil for similar services in the second preceding school year, times the number of nonpublic secondary pupils served.
- ⇒ For FY 2003, the maximum per pupil rate for guidance and counseling is \$161.02.

Administration

- ⇒ A district may claim and receive an additional amount equal to 5% of the district's aid for administrative costs.

The chart below provides a breakdown of estimated Nonpublic Pupil Aid for FY 2001. Money is allocated based on the number of participating nonpublic students and actual program expenditures.

Narrative

Activity Description

Citation: M.S. 123B.92, Subd. 9, 123B.84, 123B.85, 123B.86 and 123B.87

This program exists to ensure that nonpublic school students receive the same level of transportation services as public school students receive and that the school districts are able to provide this transportation without significant cross-subsidy from the district's general fund.

Activity at a Glance

- ◆ FY 2001, 73,266 nonpublic students were transported to and from schools.
- ◆ FY 2001, 219 districts transporting students.

Population Served

Minnesota students attending nonpublic schools are provided transportation services.

Services Provided

School districts must provide equal transportation within the district for public and nonpublic school students. This means that the district where a non-disabled pupil resides must provide transportation for the nonpublic pupil within the district in like manner as that provided to the public school student residing in the district. If the district transports nonpublic students to a school in another district because there is not a suitable nonpublic school located within the district, the nonpublic school or the parents pays the cost of transportation outside the district boundaries.

Public schools must also provide nonpublic school pupils with transportation within the district boundaries between the private school and public school or neutral site for health and secondary guidance and counseling services provided to nonpublic school pupils. The public school district must also transport nonpublic school students on late activity bus routes if it provides that service for public school students.

Historical Perspective

Since FY 1997, funding for the transportation of nonpublic students has been calculated using a separate formula based on average second prior year costs and the number of current year nonpublic students transported. The following graph shows the number of nonpublic students transported to and from school for FY 1995-2002.

Nonpublic Students Transported To and From School

Key Measures

There are no measures for this program.

CHILDREN, FAMILIES, & LEARNING

Program: NONPUBLIC PUPIL PROGRAMS

Activity: NONPUBLIC TRANSPORTATION AID

Narrative

Activity Funding

Nonpublic Transportation Aid equals the sum of:

- ◆ for regular and excess transportation, an amount equal to the product of the district's actual cost per public and nonpublic pupil transported in the regular and excess categories for the second preceding year, times the number of nonpublic pupils receiving regular or excess transportation in the current year, times the ratio of the formula allowance for the current year to the formula allowance for the second preceding year; plus
- ◆ for non-regular (e.g., shared time, support services) and late activity transportation, an amount equal to the product of the district's actual cost in the second preceding year, times the ratio of the formula allowance for the current school year to the formula allowance for the second preceding year.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program Description

In 1991, Minnesota became the first state in the nation to authorize charter schools (then called Results Oriented Outcome-Based Schools). The law (M.S. 124D.10-11) permits teachers, parents and other community members to form and operate independent charter schools. To promote innovation, these schools are exempt from some statutes and rules governing school districts but held accountable for results. A charter school is a public school, part of the state's public education system.

The law requires that a charter school must meet one or more of the following purposes:

- ◆ Improve student learning;
- ◆ Increase learning opportunities for students;
- ◆ Encourage the use of different and innovative teaching methods;
- ◆ Require the measurement of learning outcomes and create different and innovative forms of measuring outcomes;
- ◆ Establish new forms of accountability for schools; or
- ◆ Create new professional opportunities for teachers, including the opportunity to be responsible for a learning program at the school site.

Establishing a School

Those wishing to start a charter school must obtain a sponsorship from a school board, intermediate district board, education district, eligible private college, community college, technical college, the University of Minnesota or an eligible charitable organization. A sponsor must obtain approval from the Commissioner of the Department of Children, Families & Learning to authorize a charter school.

In addition to starting a new school, a school board may convert one or more of its schools to charter school status if 60 percent of a school's teachers sign a petition approving conversion.

Organization

The parents of students enrolled in the school and staff employed at the school elect a Board of Directors in a timely manner after the school begins operation. Licensed teachers employed by the school must constitute a majority of the Board unless the Commissioner waives that requirement. The Board determines all aspects of the school's education program, management and administration.

Funding

Charter schools are eligible to participate in any state aid program that does not require a local levy. Since charter schools do not have the authority to levy property taxes, charter schools do not qualify for school revenue programs that require a local levy.

Like other school districts, General Education revenue provides the majority of charter school support. General Education revenue is earned by for each adjusted marginal cost pupil unit at the state formula amount. Basic skills revenue is calculated as for other school districts. Referendum aid equal to the referendum equalization aid adjustment allowance in the pupil's district of residence follows the charter school student. As a part of the general education formula, charter schools receive the state average per adjusted marginal cost pupil unit for sparsity aid, operating capital, training and experience and equity aid. Charter schools may also receive transportation revenue based on the amount per pupil received by the district where the school is located if the charter school provides the pupil transportation.

In addition to General Education revenue, charter schools are commonly eligible for state and federal special education funding, state charter school lease aid, state and federal charter school start-up aid,

state charter school integration aid, and state and federal school nutrition programs. Federal Planning and Startup Grant Funds may be awarded by CFL based on application from charter schools. Funds must be used for planning or startup purposes. Charter schools may also apply for funding provided by the various federal title programs.

For FY 2002, total state aid earned by students attending charter schools is estimated at \$80.7 million. Almost \$63 million of this amount is General Education aid. Charter School Lease aid is estimated at \$12.4 million. Special education aid is estimated at \$3.4 million..

Budget Activities Included:

- ⇒ Charter School Lease Aid
- ⇒ Charter School Startup Aid

Narrative

Activity Description

Citation: M.S. 124D.11, Subd. 4

This program provides funding to charter schools to access appropriate facilities for instructional purposes.

Population Served

All charter schools that lease a facility are eligible to participate in this program.

Activity at a Glance

- ◆ Pupil units served FY 2003 - 14,010
- ◆ Lease aid per PU (max) FY 2003 - \$1,500
- ◆ Average gross aid per PU FY 2003 - \$1,121

Services Provided

This program provides funding to charter schools to access appropriate facilities for instructional purposes. Charter schools may apply to the commissioner to receive additional funding for lease costs, after having determined that the total operating capital revenue under M.S. 126C.10, subd. 13 is insufficient for their capital financial needs.

Eligibility criteria are specified in M.S. 124D.11, subd. 4. Approval criteria include:

- ◆ the reasonableness of the price based on current market conditions;
- ◆ the appropriateness of the proposed lease in the context of the space needs and financial circumstances of the charter school; and
- ◆ conformity of the lease to the laws and rules of the state of Minnesota.

Historical Perspective

This program began in FY 1998 with 24 charter schools receiving aid; 67 schools received lease aid in FY 2002.

Key Measures

Charter School Lease Statistics

| | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 |
|--------------------|-----------|-----------|-----------|------------|------------|------------|
| Eligible Net Lease | 1,757,852 | 3,645,157 | 7,882,451 | 12,443,440 | 14,126,065 | 17,526,510 |
| Max Aid Per PU | 416 | 440 | 1,500 | 1,500 | 1,500 | 1,500 |
| Total Gross Aid | 1,141,177 | 2,093,894 | 6,904,968 | 10,705,174 | 12,449,958 | 15,705,210 |
| Average Aid | 330.68 | 386.11 | 822.31 | 1,031.23 | 1,081.76 | 1,121.00 |
| PU | 3,451 | 5,423 | 8,397 | 10,381 | 11,509 | 14,010 |
| Average Per PU | 509.37 | 672.17 | 938.72 | 1,198.67 | 1,227.39 | 1,251.00 |

Activity Funding

Aid is limited to the lesser of

- ◆ 90% of actual net lease costs, or
- ◆ \$1,500 times the charter school's pupil units served for the current year.

The maximum aid per pupil unit increased from \$416 in FY 1998 to \$440 in FY 1999 and to \$1,500 in FY 2000. FY 1998 and FY 1999 lease aid was limited to 80% of the actual net lease costs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: CHARTER SCHOOLS

Activity: CHARTER SCHOOL STARTUP AID

Narrative

Activity Description

State Citation: M.S. 124D.11, Subd. 8

Federal Citation: Title V, Part C Elementary and Secondary Education Act, CFDA 84.282A

This state and federal funded program provides start-up funding for charter schools. State funding is available for the first two-years of operation and federal funding is available for three years (typically one year for planning and the first two years of operations).

Population Served

This program serves charter school organizers, charter schools, students, and their parents.

Activity at a Glance

Charter School Start-Up

| | |
|-------------------------------------|--------|
| ◆ Number of Charter Schools FY 2003 | 77 |
| ◆ Number of Students Served FY 2003 | 12,534 |
| ◆ Number of Elementary Charters | 26 |
| ◆ Number of Secondary Charters | 30 |
| ◆ Number of K-12 Charters | 17 |
| ◆ Number of Middle School Charters | 5 |
| ◆ Number of Charters Receiving | |
| - State Start-Up FY 2003 | 20 |
| - Federal Start-Up FY 2003 | 40 |

Services Provided

State and federal aids for start up charter schools provide funding for the costs associated with start-up. State and federal start-up funds may be used for costs such as

- ◆ accountability/evaluation development,
- ◆ curriculum/instruction planning,
- ◆ student recruitment,
- ◆ staff development/governance training,
- ◆ minor facility renovation, and
- ◆ classroom materials.

Additionally, the federal program provides funding to charter schools in at least the fourth year of operation to support dissemination of charter school best practice.

Key Measures

| | Charter Schools Receiving for Start-Up Revenue | | | | | |
|---------|--|---------|---------|---------|---------|---------|
| | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 |
| State | 11 | 20 | 28 | 32 | 26 | 20 |
| Federal | 39 | 47 | 53 | 48 | 40 | 40 |

In addition, five charter schools received federal dissemination grants in FY 2000.

The best measurement for this program would be to collect data regarding the use of these funds and the impact on the long-term financial health of the charter. There are no specific requirements in law to collect or report this data.

Activity Funding

The state funded start-up aid is available for two years and for each year equals the greater of \$50,000 per charter school or \$500 times the charter school's pupil units for that year.

Federal Funding (Public Charter School Program) planning and start-up aid is available for three years of funding. Schools receive a first year planning award base of \$100,000. In addition, new charter schools are eligible for \$10,000 incentive grants. The first year operating grant is \$150,000. The second year operating grant is \$125,000.

Dissemination awards may total 20% of the total federal award, based on the total planning and start-up awards made. Awards may vary depending upon the grant award made to the state of Minnesota.

CHILDREN, FAMILIES, & LEARNING

Program: CHARTER SCHOOLS

Activity: CHARTER SCHOOL INTEGRATION

Narrative

Activity Description

Citation: 124D.11. Subd.6(e)

This state program allows charter schools to apply for grants consisting of the aid portion of integration revenue under M.S. 124D.86.

Population Served

Students attending eligible charter schools benefit from this program.

Services Provided

The majority of Minnesota's charter schools enroll students from districts eligible for integration revenue under M.S. 124D.86. The current level of funding provides limited resources for grants to charter schools to contribute to integration/desegregation efforts.

Key Measures

Activities funded included student field trips, staff training, transportation, training in conflict mediation, an intramural sports program and expansion of a library collection.

Six Twin Cities charter schools received a total of \$44,659 in FY 2002:

- ◆ Aurora Charter School,
- ◆ Excell Academy,
- ◆ New Visions Charter School,
- ◆ New Spirit Charter School,
- ◆ Skills for Tomorrow, and
- ◆ Twin Cities Academy.

Schools competing for grants must demonstrate that activities and pupil enrollment will advance desegregation or integration, such as through partnerships with a school district or other charter schools.

Activity Funding

Funds are distributed through a competitive grant process.

To apply for a grant, the schools must

- ◆ create a collaboration council to determine integration issues, develop integration/desegregation goals, and design activities to meet those goals;
- ◆ determine the educational justification for the integration/desegregation activities; and
- ◆ evaluate results.

This revenue first became available in FY 2000 and was not a grant program. No charter schools applied or qualified for the revenue in FY 2000. The 2001 legislature gave authority to the commissioner of Children, Families & Learning to distribute these grants through a competitive process. FY 2001 was the first year that charter schools received funding through this competitive grant.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Activity at a Glance

- ◆ Six Twin Cities charter schools received a total of \$44,659 for integration activities in FY 2002.
- ◆ Charter schools are exempt from the state's Desegregation Rule. Their participation in integration activities is voluntary.

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: INTEGRATION REVENUE

Narrative

Activity Description

Citation: M.S. 124D.86

The purpose of this state aid and local levy program is to promote racial integration, increase learning opportunities, and reduce the learning gap between learners living in high concentrations of poverty and their peers through programs established under a desegregation plan mandated by state rules or under court order.

Population Served

All students attending public schools receiving integration revenue are served by this program.

Services Provided

Integration revenue may be used in the following ways:

- ◆ additional operating costs for magnet/specialty schools or other methods used to achieve school district desegregation;
- ◆ desegregation transportation costs;
- ◆ staff development costs for preparing teachers to work with diverse populations in an integrated setting;
- ◆ development and implementation of strategies to meet the unique needs of specific cultural groups of students; and
- ◆ supplemental support services for unique students' needs in integrated schools.

Activity at a Glance

- ◆ Fifty-three school districts are required to have desegregation plans and generate integration revenue. Each of the plans is designed to provide voluntary strategies to reduce the racial isolation of 13 school districts from their neighboring districts.
- ◆ Nine Minnesota school districts also have a total of 36 schools within their districts that are racially isolated from the rest of the district's schools. Integration revenue supports plans to help the districts integrate within themselves.

Under State Board of Education Rule 3535, a desegregation plan is required in two instances.

- ⇒ When the percentage of protected students in a school exceeds the percent of protected students in the district and grade levels served by the school by 20 percentage points or more the desegregation plan must specify how the district will increase opportunities for interracial contact between students in the building.
- ⇒ When the percentage of protected students in a district exceeds the percent of protected students in any contiguous district by 20 percentage points or more the desegregation plan must specify how the district will increase opportunities for interracial contact between students in the district.

The Duluth, Minneapolis, and St. Paul school districts currently operate under authority of Rule 3535 and have had approved desegregation plans in place since the 1970s. In FY 2000, 19 more districts operated under desegregation plans. Effective FY 2002, districts that were not required to implement a desegregation plan under the State Board of Education Rule are eligible for integration revenue if they participate in a multidistrict integration collaborative. These districts are eligible to generate up to \$93 per adjusted pupil unit. By FY 2002, 53 districts had interdistrict desegregations and nine had intradistrict plans to eliminate racial isolation at specific school sites.

Historical Perspective

As shown in the table below, total enrollment in the Minneapolis and St. Paul school districts has increased significantly since FY 1995, and the concentration of students of color has increased significantly in all districts operating under a desegregation plan.

| | FY 1995 | FY 1997 | FY 1999 | FY 2000 | FY 2001 | FY 2002 |
|-----------------------------|---------|---------|---------|---------|---------|---------|
| Students Enrolled October 1 | | | | | | |
| Duluth | 14,056 | 13,970 | 13,023 | 12,758 | 12,430 | 12,135 |
| Minneapolis | 45,187 | 47,978 | 49,242 | 48,688 | 48,834 | 48,156 |
| St. Paul | 40,732 | 43,766 | 45,349 | 45,253 | 45,115 | 44,201 |
| Percent Students of Color | | | | | | |

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: INTEGRATION REVENUE

Narrative

The need for integration revenue will continue to increase due to growing concentrations of poverty and growing concentrations of students of color in urban core districts. The new desegregation rule requires greater collaboration among more districts in addressing integration issues.

Key Measures

Because the revenue can be used for a variety of activities, several potential measures of the program's success exist. One measure would be to survey parents and students who have participated in programs funded by the district's integration revenue on whether these programs have given them more opportunities to participate in multi-racial, multi-cultural environments. Another measure is whether students that have transferred to a nonresident district have been academically successful in their new environment. Yet another measure is whether new teaching strategies have proven successful in classrooms. Locally developed plans often make provisions for evaluation of the effectiveness of strategies.

Activity Funding

This program is funded with a combination of state aid and a local property tax levy, the sum of which is revenue. The percent of revenue from state aid has ranged from 54% in FY 1999 to 78% for several of the years covered, with the balance coming from local tax payers. Unlike most levies, for cities of the first class and for FY 2001 the entire amount levied is recognized as revenue in the fiscal year in which the levy is certified. Effective FY 2002 for other than cities of the first class, the revenue is recognized in the fiscal year following the levy.

Each eligible district must submit a budget detailing the costs of implementing the integration plan. At the end of the school year the district reports the actual expenditures related to implementation of the plan. For FY 2000 and later years, the maximum integration revenue is the lesser of the cost of implementing the district's plan or the statute-defined rate times the adjusted pupil units. The rates vary by district and, in some cases, by year.

Minneapolis

- ◆ \$536 through FY 2002
- ◆ \$446 effective FY 2003
- ◆ \$446 plus an additional levy amount of \$35 per adjusted pupil unit, effective FY 2004

St. Paul

- ◆ \$446

Duluth

- ◆ \$207

Other eligible districts

- ◆ \$93 for all other eligible districts through FY 2001
- ◆ \$93 effective FY 2002 for other eligible districts with an enrollment of protected students that does not exceed 15%
- ◆ \$130 effective FY 2002 for other eligible districts with an enrollment of protected students that exceeds 15%

Effective FY 2001, districts other than cities of the first class can generate alternative attendance integration aid providing a budget and reporting related expenditures. The state aid is equal to the lesser of the cost of the plan or the state aid portion of the revenue amount generated by residents of Minneapolis, St. Paul or Duluth.

Additional information on desegregation transportation is available in the Interdistrict Desegregation Transportation budget narrative.

Program: DESEGREGATION PROGRAMS

Activity: INTEGRATION PROGRAMS

Narrative

Activity Description

Citation: 122A.24; Laws 1994, Ch.647, Art 8, Sec. 29; 122A.64; 122A.65; 124D.89

This program provides state aid for four integration programs.

- ⇒ **Alternative Preparation Licensing, Minority Fellowship Grants** recruits people of color into teaching by providing fellowship grants to qualified people seeking alternative preparation for teacher licensure and site grants for program development management.
- ⇒ **Teachers of Color Program** increases the numbers of teachers of color in school districts with growing student of color populations.
- ⇒ **Minority Teacher Incentives** shares fiscal responsibility with eligible school districts to employ additional teachers and aides or educational assistants of color.
- ⇒ **Cultural Exchange Program** develops and creates opportunities for children and staff of different ethnic, racial, and cultural backgrounds to experience educational and societal change.

Activity at a Glance

- ◆ Five individuals completed their teacher education program through Minority Fellowship Grants during the 2001-02 school year. Fourteen candidates are still in school.
- ◆ The Teacher of Color program currently has 18 partnerships between school districts and teacher preparation programs. 165 students are preparing for licensure, with average grant awards of \$4,503.

Population Served

Individuals that are participating in these programs and districts that are partnering with associated programs and institutions are primarily served by this program. Districts, parents, and students report a need for more teachers of color to serve as educators and mentors for Minnesota's public school students. Minnesota's minority population is projected to show a 52% increase for the 15-year span 2000 to 2015. At the same time that Minnesota's demographic landscape is rapidly changing, the state faces large scale teacher retirements and, in selected subject areas, some significant teacher shortages.

Services Provided

The Minnesota Department of Children, Families & Learning uses the flexibility of the block allocation to fund programs where the greatest needs exist and where the opportunities for success are the greatest. Currently, the entire integration programs budget is split between Minority Fellowships and Teachers of Color grants.

Minority Fellowship Grants

- ⇒ The Minnesota Board of Teaching approves alternative preparation to teacher licensure programs that are funded through Minority Fellowship Grants. Each approved program is a collaborative effort between a school district, groups of schools, and a post-secondary institution that has a teacher preparation program. The program provides each candidate the support of a mentoring team that is responsible for the instructional phase before the candidate assumes responsibility for a classroom, formal instruction and peer coaching during the school year, assessment, supervision, and evaluation. Beginning in FY 1998, Minority Teacher Fellowship funds have also been used to support planning grants to post-secondary institutions to develop new models to recruit and retain teachers of color.

Teachers of Color Program

- ⇒ The Teachers of Color program provides grants for tuition, books, fees, and sometimes other expenses, to make it possible for traditional and nontraditional students to obtain the education necessary for teacher licensure. Award levels are determined after students have accepted all other available financial aid. Programs currently provide scholarships to both public and private teacher preparation programs in Minnesota. Participants must teach in sponsoring school districts for two years following licensure or risk being required to pay back the grants.

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: INTEGRATION PROGRAMS

Narrative

Cultural Exchange Program

⇒ The Cultural Exchange Program provides funding for locally developed programs between school districts that have desegregation plans and those districts that have no desegregation plans. The grants may be used for staff time including salary and benefit expenses, costs for substitute staff, travel expenses, and curriculum materials. In addition, the grant may also be used for transportation, board, and lodging expenses for students.

Minority Teacher Incentives

- ⇒ This program provides funding to districts that have a student of color enrollment of more than 10% or to districts that have approved comprehensive desegregation plans.
- ⇒ Districts receive one-half of an educator's salary and benefits, not to exceed \$20,000 per year, if they employ a person of color who has not taught in a Minnesota school district during the preceding year.
- ⇒ Districts retaining the educator a second year are guaranteed a second year of funding. Reimbursements are made for each year of the biennium. According to current law, reimbursements cannot be prorated.

Key Measures

The greatest demand for services through Integration Programs is for scholarships to prepare people for K-12 teacher licensure in high demand areas such as science, English as a second language, special education and mathematics. As school districts cut spending, training teachers for licensure in other areas where shortages are not present leads to likely layoff.

For the Teachers of Color Program in FY 2002, \$825,600 was awarded to 18 partnerships of school districts and teacher preparation programs. Four individuals completed licensure through this program in 2002.

Activity Funding

Flexibility is used in the allocation of the funds of this block-funded program. This allows funds to be allocated to areas where the greatest needs exist and where the opportunities for success are the greatest. In FY 2003 funds are being allocated for the Minority Fellowship program and for the Teachers of Colors grants. Funds are awarded to districts for these purposes on a competitive basis.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: MAGNET SCHOOL GRANTS

Narrative

Activity Description

Citation: Laws 1994, Ch. 647, Art. 8, Sec. 38; M.S. 124D.88; Laws 1997, 1 Sp. Ch. 4, Art 2, Subd.13

The purpose of this state aid program is to provide for integrated K-12 education that will encourage mutual understanding and provide programs, services, and facilities essential to meeting students' needs and abilities.

Population Served

Districts, students, and parents in participating programs or projects are the primary population served. However, districts not eligible for integration revenue under the Desegregation Rule are aware of the importance of developing integrated learning environments for students and look to Magnet Schools and Programs funding to meet integration needs.

Minnesota's minority population is projected to increase 52% between the years 2000 and 2015. Minnesota's public schools invest in integration programs and activities to meet the needs of their increasingly diverse students but also to prepare both majority and minority students to succeed in a global marketplace.

Services Provided

Magnet Schools and Program Grants are competitively available statewide for the development of integrated learning environments. Following is a list of costs eligible for the funding:

- ◆ salaries for teachers who provide instruction or services to students in a magnet school or magnet program;
- ◆ salaries for education paraprofessionals who assist teachers in providing instruction or services to students in a magnet school or magnet program;
- ◆ equipment, equipment maintenance contracts, materials, supplies, and other property needed to operate a magnet school or magnet program;
- ◆ minor remodeling needed to operate a magnet school or magnet program;
- ◆ transportation for all field trips that are part of a magnet school or magnet program curriculum;
- ◆ program planning and staff curriculum development for a magnet school or magnet program;
- ◆ disseminating information on magnet schools and magnet programs; and
- ◆ indirect costs calculated according to the state statutory formula governing indirect costs.

The establishing statutes require the commissioner of Children, Families & Learning, in consultation with the desegregation/integration advisory board, to award grants for planning, developing, and operating magnet schools that provide integrated learning environments. Public schools, charter schools, and joint powers boards are eligible recipients.

Key Measures

Since 1994, performance indicators have been 1) to develop and operate schools and programs that create greater understanding of diverse populations; and 2) to improve student achievement by using multiple strategies. Sixteen of the 19 projects that have been funded are continuing to operate in accordance with the Desegregation Rule adopted in 1999. The magnet school grants provided the start-up funds necessary to launch programs that can now be funded with integration revenue.

Activity Funding

The amount of funding for magnet school and magnet program grants increased from \$1.5 million in FY 1999 to \$1.75 million in FY 2000. Legislation adopted in the 2000 session reduced the magnet school and magnet program grants base budget to \$750,000 per year to provide funding for desegregation transportation costs projected for FY 2003.

Activity at a Glance

- ◆ 19 projects funded – 15 in Twin Cities, four in Greater Minnesota.
- ◆ 16 Projects continued beyond initial start up through use of integration revenue.
- ◆ Communities and school districts statewide wishing to provide integrated learning opportunities to students are able to apply for this competitive grant.

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: MAGNET SCHOOL STARTUP AID

Narrative

Activity Description

Citation: 124D.88, Subd. 4

This state grant program for metropolitan magnet schools is designed to provide for integrated K-12 education that will encourage mutual understanding and provide programs, services, and facilities essential to meeting students' needs and abilities.

Activity at a Glance

- ◆ Two magnet schools have received this grant since FY 2001.
- ◆ The funds help magnet schools with start up costs for two years.

Population Served

Magnet schools in their first two years of operation are eligible to participate in this program. During the first two years of a metropolitan magnet school's operation, the school is eligible for aid to pay for start-up costs and additional operating costs

Services Provided

Metropolitan magnet schools have strategies to

- ◆ create a sense of belonging for students and families in diverse school settings;
- ◆ create multicultural exchanges for teachers and students;
- ◆ create prototype schools that model interdistrict cooperation and collaboration;
- ◆ create curricula expertise and delivery system improvements;
- ◆ provide professional development related to understanding diversity;
- ◆ create a community of learners whose achievements are enhanced by diversity; and
- ◆ provide programming themes such as environmental sciences or the arts to attract students.

Key Measures

The metropolitan magnet school start-up aid has two performance indicators: 1) to operate schools that create greater understanding of diverse populations; and 2) to operate schools that improve student achievement.

Possible program measures include

- ◆ the degree to which the student body of the magnet school is racially and economically integrated compared to the sponsoring districts;
- ◆ the degree to which academic indicators show the school is closing achievement gaps relative to progress districts' are making on their own to reduce the gap; and
- ◆ the extent to which the magnet school is a popular choice for minority and majority students of all economic backgrounds.

The two districts that have received Magnet School Start-up grants show a diverse population. The percent of protected students is less than Minneapolis or St. Paul, but greater than that of other member districts indicating a successful mix of students served.

Activity Funding

Metropolitan magnet school start-up cost grant formula is based on \$500 times the magnet school's pupil units served for that year.

CHILDREN, FAMILIES, & LEARNING

Program: DESEGREGATION PROGRAMS

Activity: INTERDISTRICT DESEG TRANSPORT

Narrative

Activity Description

Citation: M.S. 124D.87

The purpose of this state aid program is to promote interdistrict desegregation and integration programs among school districts by providing state aid to cover unreimbursed student transportation costs.

Population Served

This program serves public school students attending interdistrict desegregation or integration schools or programs.

Services Provided

Transportation is provided between the student's home or school and the interdistrict program or school. School districts have entered into joint powers agreements to develop desegregation/integration programs and/or schools. Existing programs include the Metropolitan Learning Alliance School, the East Metro Integration District 6067, West Metropolitan Education Program (WMEP) Interdistrict Downtown School, WMEP Robbinsdale FAIR School, and the Crosswinds School. The WMEP St. Louis Park School is scheduled to open in FY 2004. Other programs exist that promote desegregation/integration, including Project Common Ground, Expo Middle, and Five-District Integration

Key Measures

The best measurement of this program would be to survey families on whether the transportation service to interdistrict programs have given them more opportunities to participate in multi-racial, multi-cultural environments.

Activity Funding

The state aid equals the difference between the transportation costs and the amount of general education revenue, which can be considered transportation revenue, generated by the participating students.

From FY 1996 through FY 2001, the state aids were first directed to districts providing transportation for interdistrict integration programs. Excess funds were available to fund costs of providing transportation of open-enrolled students whose enrollment contributed to integration. Beginning in FY 2002 funding is available on an equal basis for both interdistrict magnet programs and open enrolled students contributing to integration.

Effective with FY 2002 expenditures, the formula for this program is changed from a current funding basis formula to a reimbursement basis formula. Districts receive the reimbursement for actual costs. Districts qualifying for aid in the prior year are required to recognize the revenue in the year earned.

The number of districts participating in this program is slowly increasing each year. In FY 1999, 14 districts participated in this program, 16 districts participated in FY 2000, and 18 districts participated in FY 2001. Transportation needs will continue to grow as additional interdistrict desegregation and integration programs are developed and new interdistrict schools are constructed.

Beginning in FY 2002, the Minneapolis school district implemented the Choice is Yours program. In FY 2002, 500 students were transported to other school districts to increase integration efforts. This number is expected to increase annually by 500 students until FY 2006 when 2,500 students will be transported from Minneapolis to other school districts. The costs for this program is expected to increase the demand for state funding.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Activity at a Glance

- ◆ In FY 2001, 1,619 students were transported to and from interdistrict desegregation or integration schools at a cost of \$1,643,137.
- ◆ Other students were transported to a program or event at a cost of \$22,846 in FY 2001.

Program: AMERICAN INDIAN PROGRAMS

Activity: SUCCESS FOR THE FUTURE

Narrative

Activity Description

Citation: 124D.81

Success for the Future is a state grant program that combines and expands the best features of three discontinued grant programs. This grant program provides funding to grantees that develop comprehensive and collaborative plans to support academic achievement, lower the drop out rate and improve the school climate in a culturally appropriate manner for American Indian students.

Activity at a Glance

- ◆ 30 grants funded for five years with annual renewal of funds
- ◆ 9,454 American Indian students served

Population Served

Twenty-seven public school districts and 3 tribal schools receive "Success for the Future" grant funds.

- ◆ American Indian student population served: Urban – 4,834; Rural/Reservation 4,711

Services Provided

Success for the Future collaborative programs provide the following program services to increase student achievement and lower the dropout rates:

- ◆ targeted retention programs,
- ◆ academic and counseling services, as well as advocacy and liaison services,
- ◆ innovative curriculum based on technology, and
- ◆ best practices in teaching for American Indian students.

Key Measures

Decrease the dropout rate and increase student graduation rates for American Indian Students.

⇒ School districts that are funded by "Success for the Future" are able to provide programs that reduce dropout rates and increase graduation rates for American Indian students. Districts that participate in the program experience a 2% lower dropout rate and higher graduation rates for American Indian students than in districts not served. This is documented by completion studies that are conducted every four years to allow tracking of students.

Activity Funding

The grants are awarded for a five-year period with an annual renewal process. Because of this the annual statistics will remain constant through FY 2006.

CHILDREN, FAMILIES, & LEARNING

Program: AMERICAN INDIAN PROGRAMS

Activity: INDIAN SCHOLARSHIPS

Narrative

Activity Description

Citation: M.S. 124D.84

The state funded Minnesota Indian Scholarship Program (MISP) promotes partnerships between state government and tribal government to provide need-based financial assistance to American Indian students who would otherwise not have the opportunity to attend a post-secondary institution.

Population Served

American Indians residing in and attending Minnesota higher education institutions and who meet the following scholarship eligibility criteria can apply:

- ♦ be accepted by a higher education institution;
- ♦ be eligible for federal financial aid; and
- ♦ meet the definition of American Indian.

Activity at a Glance

- ♦ Provides scholarships to eligible American Indian students based on needs determined by the federal financial needs assessment process.
- ♦ An average of 1,000 students are funded each year.
- ♦ An average of 200 students are not funded due to lack of resources.
- ♦ Average student award is \$1,858 per year.
- ♦ Graduates an average of 150 students per year from certificate and technical programs, two, four, and graduate degree programs.

Services Provided

The MISP works with tribal governments and higher education institutions to provide scholarships for eligible American Indian students. MISP awards are:

- ♦ granted to students based on policies and procedures as adopted by Children, Family & Learning and the American Indian Education Committee;
- ♦ based upon the unmet need as shown by the higher education institutions recommended budget with the cost shared by tribal nations; and
- ♦ restricted to American Indian students of one-fourth or more American Indian ancestry, residing in Minnesota, and enrolled in an accredited Minnesota post-secondary institution.

Historical Perspective

This program was enacted in 1955 to encourage American Indians to attend post-secondary institutions. At that time, fewer than 10 American Indian students attended post-secondary institutions in Minnesota. In 2002 the MISP funded 1,002 American Indians enrolled in post-secondary institutions.

Key Measures

Increase educational opportunities for American Indian students.

| | FY 1999 | FY 2000 | FY 2001 | FY 2002 | Est. FY 2003 |
|----------------------------------|---------|---------|---------|---------|--------------|
| Students Funded | 1,015 | 1,014 | 935 | 1,002 | 1,000 |
| Graduate Students Funded by MISP | 40 | 27 | 40 | 27 | 35 |

Activity Funding

- ⇒ The average award in the FY 2001 and FY 2002 school year was \$1,858.
- ⇒ Since 1990 the MISP has provided scholarship assistance to approximately 1,000 eligible students per year.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: AMERICAN INDIAN PROGRAMS

Activity: INDIAN TEACHER PREP GRANTS

Narrative

Activity Description

Citation: M.S. 122A.63

The state funded Indian Teacher Preparation Grant program assists American Indian people to become teachers and provides additional education for American Indian teachers. This program provides a source of certified American Indian teachers to specific school districts with significant concentrations of American Indian students.

Population Served

Eligible American Indian students attending one of the four colleges or universities legislated to receive grants can apply for assistance through this program.

Activity at a Glance

These grants assist American Indian students become teachers or assist American Indian teachers gain additional education or certification.

- ◆ Grants are awarded to Augsburg College in collaboration with Minneapolis and St. Paul Public Schools, Bemidji State University in collaboration with Red Lake Public School, Moorhead Public School, and the University of Duluth in collaboration with Duluth Public Schools.
- ◆ The grants support approximately 24 students per year.

An American Indian person who meets one of the following criteria is eligible to participate in the program:

- ◆ a student who intends to become a teacher and is enrolled in one of the post-secondary institutions receiving grants;
- ◆ a teacher aide who intends to become a teacher and who is employed by a district receiving a joint grant; or
- ◆ a licensed employee of a district receiving a joint grant who is enrolled in a master of education degree program.

Services Provided

This program provides grants and loans to American Indian students who have the potential to complete a teacher-training program and have demonstrated a financial need. The student receives funding in the form of grants and loans. Loans are forgiven through service at the participating school district.

Historical Perspective

This program began in 1979 as a result of a collaborative effort between the state, tribal governments, public school districts, and post-secondary institutions.

| | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 |
|----------------------------|---------|---------|---------|---------|---------|
| Number of Grants | 4 | 4 | 4 | 4 | 4 |
| Number of New Participants | 21 | 22 | 25 | 21 | 25 |
| Number of Graduates | 6 | 0 | 6 | 4 | 7 |

- ⇒ There have been 46 graduates of the program since its inception.
- ⇒ 80% of the program's first graduates have repaid the loans through service in a sponsoring school. Other graduates have repaid by service in other Minnesota districts.
- ⇒ A total of 75 American Indians have participated or are participating in the program to date.

Key Measures

In conjunction with other programs focused on preparing a multicultural teacher workforce, this program helps achieve these goals:

- ◆ to diversify Minnesota's teaching staff to better reflect the children and families in our public schools;
- ◆ to increase cultural awareness among teaching staff and administration;
- ◆ to create a welcoming and understanding school environments for minority children and families; and
- ◆ to increase experience and exposure to a diversity of teachers for all of Minnesota's students.

CHILDREN, FAMILIES, & LEARNING

Program: AMERICAN INDIAN PROGRAMS

Activity: TRIBAL CONTRACT SCHOOLS

Narrative

Activity Description

Citation: M.S. 124D.83

This state aid program provides funding to promote equal education opportunity for students enrolled in tribal contract schools (as compared to public schools) by providing state funds to schools based on the difference between the amount of aid provided by the federal government and the state per pupil aid.

Population Served

Annually, each American Indian-controlled tribal contract or grant school authorized by the United States Code Title 25, Section 450F, that is located on a reservation within the state is eligible to receive tribal contract aid provided that the school

- ♦ plans, conducts, and administers an education program that complies with the requirements of either chapter 124 and chapters 120, 121, 122, 123, 124A, 124C, 125, 126, 129, and 268A or Code of Federal Regulations Title 25, Sections 31.0 to 45.80; and
- ♦ complies with all other state statutes governing independent school districts or their equivalent in the Code of Federal Regulations, Title 25.

Eligibility is limited to the 4 tribal schools in the state.

- ♦ Bug-O-Nay-Ge-Shig School, Leech Lake
- ♦ Circle of Life School, White Earth
- ♦ Nay Ah Shing School, Mille Lacs
- ♦ Ojibwe School, Fond du Lac

Services Provided

The funds are placed in the schools' operating budget to provide general education services and are not specifically set aside to meet any legislated goals.

The tribal schools report student data on Minnesota Automated Reporting Student System (MARSS) and have adopted graduation standards and state testing according to their comprehensive education plans. They also test students to be in compliance with Title I and Bureau of Indian Affairs regulations.

Key Measures

The appropriation is for the schools' general fund for educational services. In October 2002, the yearly report cards for each school will be collected and baseline data will be compiled for each school as to graduation standards, retention rate and test scores.

Activity Funding

State aid is calculated by:

- ♦ **multiplying** the formula allowance under M.S. 126C.10, Subd. 2 minus \$170 times the actual pupil units in average daily membership and the number of pupils for the current school year;
- ♦ **adding** compensatory revenue based on compensation revenue pupil units times the formula allowance minus \$300;
- ♦ **subtracting** the amount of money allotted to the school by the federal government through the Indian School Equalization Program of the Bureau of Indian Affairs;
- ♦ **dividing** the result in clause (3) by the sum of the actual pupil units in average daily membership plus the tribal contract compensation revenue pupil units; then,
- ♦ **multiplying** the sum of the actual pupil units in average daily membership plus the tribal contract compensation revenue pupil units by the lesser of \$1,500 or the result in clause (4).

Activity at a Glance

- ♦ 900 to 1,000 American Indian students attend the four contract/grant schools in Minnesota.
- ♦ The four schools participate in the Minnesota Graduation Standards – testing and Profile of Learning.
- ♦ Appropriation is for general education services.

CHILDREN, FAMILIES, & LEARNING

Program: AMERICAN INDIAN PROGRAMS

Activity: TRIBAL CONTRACT SCHOOLS

Narrative

| | Dollars in Thousands | | | | |
|-------------------|----------------------|----------------|----------------|----------------|----------------|
| | <u>FY 1997</u> | <u>FY 1998</u> | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> |
| Bug-O-Nay-Ge-Shig | \$375.8 | \$995.8 | \$747.1 | \$462.1 | \$636.8 |
| Circle of Life | 66.7 | 313.2 | 0 | 279.1 | 215.6 |
| Nay Ah Shing | 59.3 | 0 | 306.2 | 307.2 | 630.3 |
| Fond du Lac | 179.9 | 0 | 0 | 0 | 0 |

Federal aid to the tribal schools is based on school attendance during the fall count week, therefore, the schools do not receive federal funding for students transferring to the tribal school after that time. Although the schools receive state aid for students transferring midyear based on average daily membership, the amount does not make up for federal funding lost.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: AMERICAN INDIAN PROGRAMS

Activity: ECFE PROGRAMS AT TRIBAL SCHOOL

Narrative

Activity Description

Citation: M.S. 124D.83, Subd. 4

This state aid program provides funding to four eligible tribal schools to enhance the ability of American Indian parents to provide for their children's optimal learning and development through education and support that emphasizes cultural values and learning from birth to kindergarten age.

Population Served

Parents and children in the communities served by the Bug-O-Nay-Ge-Shig School in Leech Lake, Circle of Life School in White Earth, Fond du Lac Ojibwa School in Cloquet, and Nay Ah Shing School in Mille Lacs participate in this program.

The program provides an opportunity for tribal contract schools to establish and maintain early childhood family development programming that emphasizes cultural values and learning.

Services Provided

The programs use culturally appropriate materials and strategies to deliver the basic Early Childhood Family Education (ECFE) program, with an added emphasis on preserving American Indian culture.

The programs require the direct presence and substantial involvement of the children's parents and may include any or all of the following education services:

- ◆ programs to educate parents about the physical and mental development of the children;
- ◆ programs to enhance parents' skills in providing for their children's learning and development;
- ◆ learning experiences for children and parents;
- ◆ activities designed to detect children's physical, mental, emotional, or behavioral problems that may cause learning problems;
- ◆ activities and materials designed to encourage self-esteem, skills, and behaviors that prevent sexual and other interpersonal violence;
- ◆ educational materials which may be borrowed for home use;
- ◆ home visits or center-based activities; and
- ◆ other programs or activities to improve the health, development, and school-readiness of children.

Key Measures

Increase educational opportunities for American Indian children and their families.

Baseline data is due in October 2002 from each site on parent involvement and program goals. The Indian Education office will provide one training per school using the "Positive Indian Parenting" curriculum and will collect student and family data on the sites implementation of the curriculum.

Activity Funding

The processes for funding were revised in 2001 to more accurately represent the pre-K child count at the participating tribal schools.

| | <u>FY 2000</u> | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: STATEWIDE TESTING

Narrative

Activity Description

Citation: M.S.120B.30, M.S. 124D.59

These programs support improvements in teaching and learning with statewide testing in grades 3, 5, 8, 10 and 11, enhancements and development of reading and mathematics testing for grade seven and statewide testing for Limited English Proficiency (LEP) students in grades 3-12

Population Served

These programs serve all citizens of Minnesota and other interested parties by providing test results of students in grades 3, 5, 8, 10 & 11 as well as for LEP students in grades 3-12. Grade 7 test results will be available in FY 2004. All students attending public schools in Minnesota must participate in this program. Private schools may also choose to participate in this program.

Activity at a Glance

- ◆ 13 different test – BSTs, MCAs, and TEAE
- ◆ Reading, mathematics, and writing
- ◆ 65,000 students in each of grades 3, 5, 7, 8, 10, and 11
- ◆ 42,000 LEP students, grades 3-12
- ◆ Development of 7th grade testing in reading and mathematics
- ◆ Nonpublic and private schools may choose to participate

Services Provided

Statewide testing provides data and information across all schools in order to tell parents, teachers, and the public how well Minnesota students are meeting the state's Graduation Standards as measured by the following:

- ◆ **Basic Standards Tests (BST)**, which ensure that all students have basic literacy and math skills prior to graduating from high school;
- ◆ **Minnesota Comprehensive Assessments (MCA)**, designed to measure students' achievements in terms of the state's high academic standards; and
- ◆ **Test of Emerging Academic English (TEAE)**, designed to provide information about how well students with limited English language proficiency are learning academic English required for the state's high academic standards. TEAE test results are also used for funding and program evaluation purposes.

This program also provides funding for the development of statewide testing instruments for grade 7 in reading and mathematics. The grade 7 Reading and Mathematics MCA will be in field test mode in 2002-2003, with the first full tests scheduled for March 2004.

The current statewide testing program includes the following tests at the following grade levels

| Test | Content | Grades |
|-------------------------------------|----------------------|-------------------------|
| Basic Skills Test | Reading, Mathematics | First taken in grade 8 |
| Basic Skills Test/MCA | Writing | First taken in grade 10 |
| Minnesota Comprehensive Assessments | Reading | 3, 5, 7, 10 |
| Minnesota Comprehensive Assessments | Mathematics | 3, 5, 7, 11 |
| Minnesota Comprehensive Assessments | Writing | Grade 5 |
| Test of Emerging Academic English | Reading, Writing | 3-4, 5-6 & 7-12 |

For students who have not yet met basic standards, retake opportunities must be offered at least annually to students in grades 9 to 12 for the basic standards in reading and mathematics. For students in grades 11 to 12, retake opportunities must be offered for the written composition test.

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: STATEWIDE TESTING

Narrative

Since the statewide testing program was designed for native speakers of English, many LEP students with minimal skills in English will score poorly even though they may be making progress in acquiring English skills. The statewide assessment system must account for their annual progress in acquiring skills in English. The reading and writing tests for LEP students are designed to measure emerging academic literacy skills for non-native speakers of English.

Historical Perspective

In FY 1997, the legislature enacted the Statewide Testing Law that required comprehensive assessments correlated with the Graduation Rule's High Standards in 3rd, 5th, and 8th grades, and an unspecified high school grade. The 3rd and 5th grade MCA tests were first given in all public schools in the spring of 1998. The 10th grade MCA Reading Test and 11th grade MCA Mathematics Test were first given in all public schools in the spring of 2002.

Reading and mathematics testing for grade 7 MCA tests are being developed and will be field-tested in spring 2003.

Beginning with school year 1999-2000, all students must pass the BSTs in reading and mathematics prior to graduating from high school. Beginning with school year 2000-2001, all students must also pass the BST in writing before graduation. Students take the writing test for the first time in the 10th grade.

Under the federal Elementary and Secondary Education Act legislation (*No Child Left Behind Act 2001*), federal funds are being provided to support the enhancement of Minnesota's statewide accountability system, providing information about students' achievements in terms of high academic standards. During 2002-2003 these funds support development of benchmarked expectations for all tests and test specifications for the additional six tests needed to provide information about reading and mathematics attainment for all students in grades 3 through 8. In 2003-2004, these funds will support the field-testing of these new tests.

Key Measures

The percentage of schools identified as needing improvement.

⇒ In 2001-02, 79 (11%) of Title I schools were identified under the current definition of Adequate Yearly Progress were identified as needing improvement.

Beginning in FY 2003, the definition of adequate yearly progress will be redefined to meet state and new federal standards.

Children, Families & Learning (CFL) is presently developing benchmarked expectations in reading and mathematics for all grades 3 through 8 and high school that will include

- ◆ the number and percentage of students in grades 3, 5 and 11 who achieve benchmarked expectations in mathematics in FY 2003 and each year thereafter, and
- ◆ the number and percentage of students in grades 3, 5 and 10 who achieve benchmarked expectations in reading in FY 2003 and each year thereafter.

The results of MCA tests will be used in the statewide accountability program to provide information about the progress of all students, including LEP students. Test results, together with other quantitative and qualitative indicators, will be used to identify schools in need of improvement, and schools that are distinguished in their use of best curricular and instructional practices. Such information will be shared with the public through the Children, Families and Learning Continuous Improvement Process web site.

Additional information on student performance on statewide testing is available at CFL's [CLASS web site](#).

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: STATEWIDE TESTING

Narrative

Activity Funding

The funding supports contract vendors to supply test development, administration, and test scoring. To meet all the current requirements of the Statewide Testing Law and the Graduation Standards Rule Assessments, there are thirteen different tests. The three BSTs are each administered three times each year. The TEAE test has three forms (grades 3-4, 5-6, and 7-12). This means that a total of twenty-one test forms are needed each year, testing a total of about 894,000 students.

It is essential to sustain the validity, reliability and security of the tests each year. The FY 2003 state appropriations for these tests totaled \$9 million, with an average state appropriation cost of about \$10.07 per student tested.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: BEST PRACTICES SEMINARS

Narrative

Activity Description

Citation: Laws 2000, Chap. 589, Art. 7, Sec. 15, Subd. 4; Laws 2000, Chap. 500, Sec. 17

This state funded grant program provides funding for seminars and other professional development capacity building activities to assure proficiency in teaching and implementation of the graduation standards.

Population Served

This program serves teachers, school leaders, students and communities.

Services Provided

This project is designed to ensure that teachers have an understanding of and become advocates for research based effective professional development. Well-prepared teachers are the best indicators of student success. Best practices in curriculum, instruction, assessment, and professional development have been identified through research and practice.

Seminars and activities to support proficiency in teaching and implementation of Minnesota Graduation Standards included the following.

- ⇒ A grant was awarded to Education Minnesota to establish a network of trained teachers who are functioning as professional development advocates in their districts. Training includes information about Minnesota staff development policy as well as research regarding effective professional development.
- ⇒ Competitive grants were awarded. Effective professional development delivery systems were used to provide a wide variety of content to teachers. Content included specific, research-based curriculum and instructional strategies designed to increase the proficiency of teachers in the implementation of the graduation standards.
- ⇒ Competitive grants were awarded to districts for activities designed to support teachers during their 1st or 2nd year of teaching. All projects included some model of mentoring.
- ⇒ Grants to organizations specifically designated in the legislation were administered.

Historical Perspective

Seminars and activities as per legislation.

- ⇒ The Minnesota New Teacher Project was administered per Article 6, Sec. 42 of 2000 Minnesota Statutes (\$1 million in FY 2001 and FY 2002, reduced and integrated with other Best Practice proposals in FY 2003).
- ⇒ Arts via the Internet collaborative project between the Walker Art Center and the Minneapolis Institute of Arts received funding (\$1million in FY 2000, 2001 and 2002).
- ⇒ Grants issued to intermediate school districts Nos. 287, 916 and 917 to train teachers of special needs students under Laws 1998, chapter 398, article 5, section 42.
- ⇒ Grant issued to A Chance to Grow/New Visions School for the Minnesota Learning Resource Center.
- ⇒ During FY 2001, a grant was awarded to Education Minnesota that initiated the "Teachers as Learners and Leaders" project. All districts were invited to identify at least two teachers who would attend workshop sessions and advocate for effective staff development aligned with the National Staff Development Council's standards.
- ⇒ Competitive grants were awarded to schools, districts and other educational organizations focusing on the capacity of teachers to deliver the Minnesota graduation standards. All proposals reflect current research in content, pedagogy and staff development.

Activity at a Glance

- ◆ Competitive grants were awarded (29-FY 2002 and 16-FY 2003) to schools, districts and other educational organizations from a field of 70 proposals each year.
- ◆ Teachers from 256 districts acquired knowledge and skills regarding effective professional development as part of Teachers as Learners and Leaders (TALL).
- ◆ New teacher grants were funded to support 1st and 2nd year teachers in 28 districts.

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: BEST PRACTICES SEMINARS

Narrative

Key Measures

Teachers successfully implement standards-based curriculum and instruction that increases inclusive learning and supports high quality teaching.

- ⇒ **Education Minnesota** - Teachers as Learners and Leaders (TALL) project was established offering a two-phase training program to all districts. A total of 256 teachers participated the first year. As a result of the training, teachers and school representatives
 - ◆ reported increased personal knowledge about state policy on professional development, national standards for staff development and research supporting effective professional development;
 - ◆ assessed the local school districts policies, procedures and practices for staff development; and
 - ◆ developed an action plan for improvement of professional development practices.The Center for Applied Research and Applied Learning (CAREI) at the University of Minnesota conducted the evaluation of the TALL project. This evaluation presented findings on activities conducted as part of the grant as well as recommendations for the future.
- ⇒ **Intermediate Districts** - A curriculum framework document was developed that increases the capacity of low incidence special education teachers to integrate the graduation standards into curriculum and instruction for the students they serve. Additional teacher and staff training was provided through a web cast and an active web site.
- ⇒ **A Chance to Grow - New Visions School** - Academic training programs designed at the Minnesota Learning Resource Center at A Chance to Grow was refined and offered to schools throughout Minnesota. To date, 29 schools have been involved. As a result, teachers using new techniques report increased student readiness for school and increased ability to succeed in academic programs.
- ⇒ **Competitive Grants** - Each grant recipient reported the degree to which objectives of the project were accomplished. Evidence of increased teacher proficiency in the designated knowledge or schools was documented and submitted. Successful programs are being shared through a variety of venues including conferences and Best Practice Networks.

Each grant proposal includes a plan for evaluation of the project and dissemination of products and findings. Each evaluation plan describes the evidence that will be collected as a measure of success. This evidence is submitted as part of the final report to the Department of Children, Families & Learning. Wherever possible, existing networks are used to disseminate information regarding these projects.

Activity Funding

Competitive grants were awarded for seminars and other activities designed to enhance the instructional skills of teachers. State funding is distributed in the form of grants. Grantees are accountable for duties being carried out. Access to and proficiency in teaching and implementation strategies will increase the probability of student success in achieving the learning described in Minnesota's standards.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Activity Description

Citation: Minnesota Session Laws 2001, 1st Special Session, Chapter 6, Article 2, Section 64

This activity provides funding for the Minnesota School Academic and Financial Performance Evaluation Project to provide a tool to assist taxpayers, educators, school board members, and state and local officials in improving student achievement by evaluating the performance of the current public school system based on financial and achievement data analysis.

Activity at a Glance

- ◆ Connects education spending with learning
- ◆ Provides analysis and comparison among schools and districts on K-12 financial and achievement data
- ◆ Key decision source for K-12 Education
- ◆ Information resource for all Minnesotans

Population Served

All Minnesotans will have access to education performance evaluation data.

Services Provided

The Schools' Academic and Financial Performance Evaluation Project supports the agency's accountability initiatives and will be a module within the CLASS web site which connects learning with accountability. This evaluation will be conducted by an independent third party and the criteria will include the following six core categories for analysis:

- ◆ school district expenditures;
- ◆ students' performance outcomes based on multiple indices including students' test scores, attendance rates, dropout rates, and graduation rates;
- ◆ return on resources to determine the extent to which student outcomes improve commensurate with increases in district spending;
- ◆ school district finances, taxes and debt to establish the context for analyzing the district's return on resources;
- ◆ students' learning environment to establish the context for analyzing the district's return on resources; and
- ◆ school district demographics to establish the socioeconomic context for analyzing the district's return on resources.

Additionally, the following comparison data will be defined and reported:

- ◆ identification of allocations of baseline and incremental school district spending;
- ◆ connection of student achievement with expenditure patterns;
- ◆ tracking of school district financial health;
- ◆ observation of school district debt and capital spending levels; and
- ◆ measurement of the return on a school district's educational resources.

Historical Perspective

Funding for this project was first provided in the 2001 special session.

Key Measures

A contract with an independent third party was executed on 06-28-02 and the project will be completed on or before 06-30-03 as required by the legislation.

Activity Funding

The legislature appropriated funding of \$2.5 million for this project during the 2001 special session. During the 2002 session funding was decreased to \$1.5 million.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: ALTERNATIVE TCHR COMPENSATION

Narrative

Activity Description

State Citation: M.S. 124D.945; 124D.947

The alternative compensation aid program establishes a restructured teacher compensation system to provide incentives for teachers to improve their knowledge and skills and for school districts to recruit and retain highly qualified teachers. This program provides aid to districts that adopt an alternative teacher professional pay system to replace the steps and lanes system and encourage teachers' continuous improvement in content knowledge, pedagogy, and use of best practices.

Activity at a Glance

Five districts are participating in this program. The entitlements in FY 2002 were:

| | |
|---------------------|-------------|
| ◆ Minneapolis | \$2,213,760 |
| ◆ Rushford-Peterson | 106,140 |
| ◆ LaCrescent-Hokah | 252,150 |
| ◆ Marshall | 362,550 |
| ◆ Floodwood | 65,400 |

Population Served

Five school districts received alternative compensation aid for the two-year teacher contract period beginning 07-01-02. The number of teachers participating in the five districts in FY 2002 totaled 1,702 and the number of students enrolled in the five districts totaled 53,656 in FY 2002.

Services Provided

Applications are approved and funded for two years coinciding with the teacher contract period. Applications were approved for the two-year teacher master contract period (2001-02 and the 2002-03 school years). The annual amount of aid to a district was calculated at \$150 per pupil using the prior October 1 pupil enrollment count for the district or a percentage of that amount if less than all the teachers in a district participated in the alternative pay system.

Districts participating in the program are required to submit applications containing the information required in the law.

Key Measures

- ⇒ Five districts had alternative compensation schedules replacing the steps and lanes pay schedules in FY 2002 and FY 2003.
- ⇒ Although data is not currently available, funded districts are required to evaluate this program using key indicators such as increases in teacher's content knowledge, knowledge of pedagogy, and use of best-teaching practices. This valuation must be aligned with the district's educational improvement plan under M.S. 124D.945, subd. 2.

Activity Funding

For districts that place all of their teachers in the district or at a site on the alternative compensation schedule, the aid received equals \$150 times the district's or site's number of pupils enrolled on October of the previous year. For districts with at least 25% of the district's teacher participating in the alternative compensation schedule the aid received equals \$150 times the percentage of participating teachers times the number of pupils enrolled as of October 1 of the previous year. Approved districts receive the alternative compensation aid as a part of their metered aid payments.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: ACCOUNTABILITY & REFORM

Activity: MISC FEDERAL PROGRAMS

Narrative

Activity Description

This budget activity summarizes major federal programs that fund activities throughout Minnesota.

Innovative Programs (Title V Part A)

The specific purposes of this program are:

- ◆ to support local education reform efforts that are consistent with and support statewide education reform efforts;
- ◆ to provide funding to enable state education agencies and local education agencies to implement promising education reform programs and school improvement programs based on scientific based research;
- ◆ to provided a continuing source of innovation and educational improvement, including support programs to provide library services and instructional and media materials;
- ◆ to meet the educational needs of all students including at-risk youth; and
- ◆ to develop and implement education programs to improve school and teacher performance including professional development activities and class size reduction programs.

Activity at a Glance

The three major federal programs in this activity are:

- ◆ Innovative Programs
- ◆ Comprehensive School Reform
- ◆ Teacher and Principal Training and Recruiting

Dollars in Thousands

| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
|---------------------|----------------|----------------|----------------|
| Total Grant Amounts | \$6,454 | \$6,793 | \$6,612 |

Comprehensive School Reform (CSR) Program (Title I, Part F- Comprehensive School Reform)

This program was reauthorized as part if Title I of the Elementary and Secondary Education Act, removing the "demonstration" status of the program at the same time. This program provides renewable grants of at least \$50,000 to schools interested in adopting whole school reform efforts grounded in scientifically based research and effective practice to improve students achievement. Fifty-six Minnesota schools have been awarded grants have been awarded grants over the history of the program.

The CSR program targets high-poverty and low achieving schools, especially those receiving Title I funds by helping them to increase the quality and accelerate the pace of their reform efforts.

Dollars in Thousands

| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
|---------------------|----------------|----------------|----------------|
| Total Grant Amounts | \$2,860 | \$3,137 | \$3,750 |

Teacher and Principal Training and Recruiting (Title II, Part A)

The purposes of this program are to improve student academic achievement through strategies such as improving of teacher and principal quality. Recent changes in the law allow increased flexibility to allocated funds to class-size reduction and other innovative programs, eliminates the priority of separate Eisenhower mathematics and science grants, and provides for the recruitment of highly qualified staff from other fields into the education field.

Dollars in Thousands

| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
|---------------------|----------------|----------------|----------------|
| Total Grant Amounts | \$4,000 | \$6,000 | \$38,000 |

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: ADV PLACEMENT/INTL BACCALAUREA

Narrative

Activity Description

Citation: M.S. 120B.13; Section 1705, Title I, Part G, Elementary and Secondary Education Act of 1965 as amended by 2001 ESEA; 810(d)(1).

This state and federal program provides financial incentives for schools to begin or expand their Advanced Placement (AP) and International Baccalaureate (IB) offerings and to promote rigorous, challenging courses of study as part of the regular offerings for students in secondary schools by providing funding for teacher training and student exam fees.

Population Served

Public and nonpublic schools and students participating in the AP and IB programs are served by these programs.

Activity at a Glance

In FY 2002:

- ◆ 238 AP schools, including 36 nonpublic schools participated
- ◆ 11 IB schools participated
- ◆ 16,011 AP students took 24,578 exams
- ◆ 1,151 IB students took 2,585 exams
- ◆ 794 low-income students took 1,209 exams
- ◆ 297 AP teachers attended training
- ◆ 91 IB teachers attending training
- ◆ 30 students took online AP courses

| TOTAL AP | 208 | 217 | 233 | 254 | 238 |
| IB | 9 | 10 | 10 | 11 | 11 |

Services Provided

These programs provide an opportunity for high school students to earn college credit and/or advanced standing, thus saving students and their parent's time and money during postsecondary education. These programs, in addition to providing academic rigor, offer sound curricular design, accountability, comprehensive external assessment, feedback to students and teachers, and the opportunity for high school students to compete academically on a global level.

Most of Minnesota's public and private colleges and universities provide credit policies for AP and IB course credits for exams taken by students.

Schools have benefited from an AP or IB program in that it revitalizes teachers and departments, and indicates to the public that the school values intellectual achievement and academic excellence.

The AP and IB program provides financial incentives to support the following two program components:

Teacher Training and Support

- ⇒ Scholarships to train teachers to initiate or improve AP and/or IB courses are available for public and nonpublic schoolteachers.
- ⇒ Priority is given to teachers new to the programs.

Student Examination Fees

- ⇒ Exam fee subsidies are available to public and nonpublic students taking AP and/or IB exams.
- ⇒ Approximately 60-65% of the exam costs for all exams are paid directly to districts or nonpublic schools for AP and IB exams. All exam fees are paid for students from low-income families.

The AP Program receives 75% of the appropriation each year and the IB Program receives 25% of the appropriation. The department, in consultation with the AP and IB advisory boards, determines the amounts of the expenditures each year for examination fees and training and support for each program. \$375,000 of the

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: ADV PLACEMENT/INTL BACCALAUREA

Narrative

annual appropriation is reserved for teacher training. The amount of the subsidy is determined by the department in consultation with the AP and IB advisory boards.

Beginning in FY 2000, federal funds for the AP incentive programs became available. These funds are specifically for secondary students attending public school qualifying at a free and reduced lunch rate of 24% or greater. The focus is to increase the number of low-income students who participate in AP and/or IB courses. This is a three-year grant.

Key Measures

Based on FY 2002 data.

The number of AP and IB students testing and the number of exams taken will increase each year.

| | AP – IB Exams Taken | | | | |
|-------------------|---------------------|----------------|----------------|----------------|----------------|
| | <u>FY 1998</u> | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> | <u>FY 2002</u> |
| AP Students | 11,041 | 11,893 | 13,018 | 14,839 | 16,011 |
| AP Percent Change | 18% | 8% | 9% | 14% | 8% |
| AP Exams | 16,151 | 17,870 | 19,577 | 23,015 | 24,578 |
| AP Percent Change | 28% | 11% | 10% | 18% | 7% |
| IB Students | 876 | 1,023 | 977 | 1,043 | 1,151 |
| IB Percent Change | 7% | 17% | -4% | 7% | 10% |
| IB Exams | 1,911 | 2,013 | 2,283 | 2,215 | 2,585 |
| IB Percent Change | 14% | 5% | 13% | -2% | 17% |
| IB Diplomas | 70 | 85 | 87 | 74 | 96 |
| IB Percent Change | 15% | 21% | 2% | -12% | 29% |

The number of minority students participating in these programs and taking exams will increase each year.

Advanced Placement:

⇒ Students of color represent 13% of all Minnesota students tested in AP in FY 2002. These 1,973 students represent a 24% increase in participation from FY 2001.

The number of teachers trained will increase each year.

Advanced Placement:

⇒ A total of 295 teachers participated in weeklong summer training institutes: 187 at Carleton College, 17 at the College of St. Benedict, 72 at Augsburg and 19 out-of-state, a decrease of 12% for 2002.

⇒ 509 teachers participated in follow-up training, an increase of 2% for FY 2002.

International Baccalaureate:

⇒ A total of 91 teachers participated in three-day training during the school year and/or in one-two weeks during the summer in FY 2002, a 17% decrease.

⇒ 96 teachers participated in follow-up training, a decrease of 39% from FY 2002.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: FIRST GRADE PREPAREDNESS

Narrative

Activity Description

Citation: M.S. 124D.081

This state aid program provides the First Grade Preparedness (FGP) program funding to ensure that children in the state's highest poverty school have the opportunity before first grade to develop the skills and abilities necessary to learn to read and succeed in school, and to reduce the underlying causes that create a need for compensatory services and revenue in subsequent academic years.

Activity at a Glance

- ◆ Sixty-six sites funded in FY 2003
- ◆ Over 3,400 kindergarten students served in FY 2003

Population Service

All four and five year old students attending eligible schools participate in this program.

Services Provided

School sites have used these funds primarily to fund all-day everyday kindergarten programs for five year olds. Strategies to improve teaching and learning at the sites include quarterly meetings of site teams of administrators, teachers, and parents; and professional development in areas such as developmentally appropriate assessment, reading readiness strategies, and parent training. A formal evaluation of the program was required by the legislation in the first two years.

FGP programs, especially those for four-year-olds, must encourage and plan for parent involvement and must demonstrate collaboration with other providers of school readiness and child development services. The school board of a qualifying school site is required to approve a plan to provide extended day services to serve as many children as possible.

Historical Perspective

This program was created by the 1996 legislature: school year 1996-97 was the first year of operation. The state was divided into four geographical areas, with each area receiving 25% of the funding. The geographical areas are: Minneapolis, St. Paul, metro suburban and Greater Minnesota. School sites were ranked from highest to lowest poverty level and sites were funded in rank order in each geographic area until the funds were exhausted. In the first year of operation, \$3 million was distributed to 36 sites statewide. For the 2002-03 school year \$7.25 million will be distributed to 66 sites.

Historical Number Sites Funded by First Grade Preparedness Program

| | 1996-97 \$3 million | 1997-98 \$5 million | 1998-99 \$5 million | 1999-00 \$7 million | 2000-01 \$7.1 million | 2001-02 \$7.1 million | 2002-03 \$7.2 million |
|-------------------|------------------------|------------------------|------------------------|------------------------|--------------------------|--------------------------|--------------------------|
| St. Paul | 8 | 14 | 14 | 14 | 12 | 13 | 13 |
| Minneapolis | 7 | 14 | 15 | 14 | 17 | 16 | 14 |
| Suburbs | 5 | 11 | 11 | 11 | 13 | 13 | 11 |
| Greater Minnesota | 16 | 12 | 26 | 29 | 29 | 29 | 28 |
| TOTAL | 36 | 51 | 66 | 68 | 71 | 71 | 66 |

Key Measures

The second report to the legislature on FGP includes the following findings.

- ⇒ Approximately two-thirds of the kindergarten children received proficient ratings on 29 of the 41 indicators on a formal assessment instrument. This finding suggests that FGP children are demonstrating skills, behaviors and knowledge in areas of social development, language and literacy, and mathematical thinking that will support their transition to first grade.
- ⇒ Approximately 75% of the kindergarten children received higher ratings on all 41 indicators from the fall to the spring assessment. Most of the children rated not proficient in the fall demonstrated improvement by spring.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: FIRST GRADE PREPAREDNESS

Narrative

- ⇒ 90% of the children for whom first grade teacher assessments were obtained were assessed as doing well or making adequate adjustment to first grade.
- ⇒ 96% of the parents responding to the survey felt their child was prepared for their next level in school.
- ⇒ Approximately 75% of the parents indicated their child had changed in ways important to school success.
 - ◆ 82% said their child looked forward to school
 - ◆ 81% said their child is interested in books and stories
 - ◆ 81% said their child has improved communication skills
 - ◆ 75% said their child is more independent and self-confident

The most convincing data concerning the efficacy of all-day every-day kindergarten programming are the increases in the third grade reading scores of schools that have participated in FGP since FY 1996-97. Spring 2000 was the first time that students who participated in FGP all-day every-day kindergarten took the third grade Minnesota Comprehensive Assessments (MCAs). Of the eighteen metro and Greater Minnesota schools that participated in FGP in 1996-97, 12 schools showed significant growth from spring 1999 to spring 2000 in third grade reading scores. Nine schools showed growth from spring 2000 to spring 2001. All showed significant gains over the baseline scores of spring 1999. (Three of the schools had enrollments of fewer than 10 students and those scores were not reported.) Student mobility in the St. Paul and Minneapolis areas is so high that it is not possible to attribute any gains in these schools solely to FGP programs. For more information visit the [First Grade Preparedness Web site](#).

Activity Funding

This program is funded entirely with state aid. For the purposes of distribution, the state is divided into four areas - Minneapolis, St. Paul, suburban metro, and Greater Minnesota; each area receives 25% of the allocation. Schools in each area are ranked from highest to lowest based on the percent of students eligible for free or reduced-price lunch. Funds are distributed in rank order in each area based on the number of five year-olds attending kindergarten from the previous October 1 times 0.53 times the general education formula allowance. Funds may be used for start-up costs for new sites as well as for teacher salaries, fringe benefits, staff development, and parent involvement. Districts may also use the \$11 per pupil set aside as described in M.S. 126C.125 for all-day kindergarten.

Although the allocation for this program has more than doubled since its beginning in 1997, funds are not sufficient to fund all eligible schools in each area. All geographic areas except St. Paul are prorated in FY 2002-03 because current funding is insufficient to maintain previously eligible schools at full funding.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: READING COMPETENCY

Narrative

Activity Description

Citation: Laws 2001, Chapter 6, Art. 2, Sec. 70, 77, Subd. 27; M.S. 120B.12

This state grant is to an education organization to measure reading program results, to assist schools sites and charter schools in achieving reading competency by the end of third grade.

Activity at a Glance

- ◆ Information and assistance is provided by the grantee to other interested parties concerning the effectiveness of instructional methods and techniques in developing reading competency.

Population Served

An eligible organization must serve and provide education services to students and teachers in Kindergarten through Grade 3.

Services Provided

The grant provides an education organization with funding for reading intervention methods or programs to assist the student in reaching the goal of learning to read no later than the end of third grade. Reading-related skills that are research-based predictors of literacy are identified at the preschool level.

The education organization must assist school sites and charter schools, including sites where at least 25% of K-3 students are eligible to receive a free or reduced price lunch, in achieving children's reading competency by the end of third grade.

Historical Perspective

This legislation was adopted in 2001 and requires the education organization to:

- ◆ identify, before the end of the first grade, students who are at risk of not learning to read before the end of the second grade;
- ◆ provide a reading intervention method or program to assist each identified student in learning to read by the end of 2nd grade; and
- ◆ assess staff development needs and provide appropriate training for elementary teachers.

In addition, the Department of Children Families and Learning (CFL) is to recommend multiple assessment tools that assist districts and teachers identify students and to share examples for nationally recognized and research-based instruction methods or programs with districts.

Key Measures

90% of continuously enrolled children in participating sites are able to read by the end of third grade. Goals are set for each grade level.

- ⇒ Kindergarten - 90% of students will pass a phonemic segmentation accuracy test, and 90% of students will read lowercase letter sounds at a rate of 35 correct per minute.
- ⇒ 1st Grade - 90% of students will read end of first grade material at 60 words correct per minute.
- ⇒ 2nd Grade - 90% of students will read end of second grade material at 80 words correct per minute.
- ⇒ 3rd Grade - 90% of students will read at the end of third grade material at 90 per minute correct per minute. The average score of students in third grade on the Minnesota Comprehensive Assessments will be 1,420.

The education organization is required to report evidence of attainment of goals included in the proposal. Performance and measurement data from the FY 2002 grantee has not been received at the time of the writing of this document.

Activity Funding

In FY 2002, the legislature appropriated funds to the St. Croix Education District for this program.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: YOUTHWORX PROGRAMS

Narrative

Activity Description

Citation: M.S. 124D.36 to M.S. 124D.45

Federal Citation: National and Community Service Trust Act 1993

The state funded Minnesota Youthworks Program is in the eighth year of its partnership with the federal AmeriCorps. AmeriCorps is a "domestic Peace Corps" that provides Americans of all ages and backgrounds with education awards in exchange for a year or two of community service. Youthworks expands upon AmeriCorps by matching the federal effort with similar state support.

Activity at a Glance

More than a million hours of service provided to Minnesota communities by Youthworks and AmeriCorps members.

- ◆ 19 programs funded, plus additional sites that provided additional support
- ◆ 658 full-time equivalent members were supported earning thousands of dollars worth of future education expense credit

Population Served

This program serves students in schools and nonprofit organizations throughout Minnesota.

Services Provided

Youthworks members strengthen Minnesota communities by providing direct service in four priority areas: education, the environment, meeting unmet human needs, and public safety. This state program complements the federal AmeriCorps program and provides funding for youth to provide communities with a wide variety of services. The services provided by students can range from mentoring and tutoring, service-learning activities, mediation services to decrease violence, park safety, construction and rehabilitation of homes, environmental projects, and other community service projects.

Youthworks host agencies are educational institutions and local, state, and national nonprofit organizations.

The Youthworks activity is part of a coordinated effort of federal and state activities related to the implementation of a unified state plan for national and community service.

Historical Perspective

Youthworks began in 1994 with a governor-appointed Minnesota Commission on National and Community Service setting strategic direction and oversight. The Commission uses a competitive request for proposal process to select program sponsors.

Action by the 2002 Legislature transferred authority for the Minnesota Youthworks Program from the Department of Children, Families & Learning to a nonprofit corporation, ServeMinnesota!

Key Measures

A University of Minnesota cost-benefit analysis conducted in 1995 found the following outcomes:

- ◆ the average cost benefit ratio of Youthworks/AmeriCorps programs studied over a three-year period was \$2.30 in benefits for every \$1 invested;
- ◆ employability of young people who achieved their high school diplomas improved; and
- ◆ community property values were enhanced at an average of \$10,000 per house for the neighborhood served.

In 2001, 19 programs hosted 658 full-time equivalent (FTE) Youthworks members.

Youthworks members served local communities in 2001 by providing:

- ◆ 144,500 hours mentoring students to improve academic performance;
- ◆ 367,200 hours tutoring students to raise literacy levels;
- ◆ 146,200 hours in after-school programs assisting with homework, developing healthy relationships and supporting recreation activities;
- ◆ 76,500 hours in service-learning;

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: YOUTHWORX PROGRAMS

Narrative

- ◆ 76,500 hours teaching mediation skills to decrease violence;
- ◆ 11,900 hours in park safety to provide places for community members to gather;
- ◆ 66,300 hours constructing and rehabilitating homes;
- ◆ 59,500 hours in referral services, community education and services to low income residents; and
- ◆ 170,000 hours in environmental projects.

Activity Funding

For full-time service (1,700 hours per year), program participants (Youthworks members) receive:

- ◆ a modest living allowance (\$8,730);
- ◆ health care;
- ◆ childcare if qualified;
- ◆ training and experience; and
- ◆ a post-service education award of \$4,725 which may be used toward higher education costs or for college loan payments.

For part-time service (900 hours per year), program participants (Youthworks members) receive:

- ◆ a modest living allowance (\$4,622); and
- ◆ a post-service education award of \$2,363 which may be used toward higher education costs or for college loan payments.

AmeriCorps members receiving education awards provided by the National Service Trust have the potential of returning over \$1million each year to Minnesota higher education institutions.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: STUDENT CHOICE/TAX INCENTIVES (info only)

Narrative

Activity Description

INFORMATION ONLY

The purpose of these state programs is to provide learners with access to a wide range of educational opportunities by allowing them to choose a school or educational program either in or outside of their resident district. Learners and their families must play an active role in determining educational goals, the student's needs and interests, and the school's ability to provide an appropriate educational experience.

Activity at a Glance

- ◆ In FY 2002, over 196,700 students participated in various choice programs.
- ◆ In FY 2001, number claiming:
 - ⇒ Education Tax Credits 54,467
 - Average Amount \$343
 - ⇒ Education Tax Deduction 184,874
 - Average Amount \$1,108

Population Served

All students in Minnesota are eligible for one or more of these options.

Services Provided

Minnesota's choice programs include the following:

Open Enrollment: (M.S. [124D.03](#)) allows all public school-eligible pupils to apply to attend a school outside their resident district.

| | <u>FY 1995</u> | <u>FY 1996</u> | <u>FY 1997</u> | <u>FY 1998</u> | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> | <u>Est.</u> <u>FY 2002</u> |
|---------------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|-------------------------------|
| Open Enrolled Students | 18,596 | 18,916 | 19,936 | 21,842 | 24,165 | 26,227 | 28,077 | 30,019 |

Charter Schools: (M.S. [124D.10](#)) are public schools designed to meet one or more of the following purposes:

- ◆ improve individual learning;
- ◆ increase learning opportunities;
- ◆ use different and innovative teaching methods;
- ◆ measure learning results using innovative forms of measurement;
- ◆ establish new forms of accountability for schools; or
- ◆ create new professional opportunities for teachers, including the opportunity to be responsible for a learning program at the school site.

Charter schools are exempt from some state statutes and rules governing schools and school districts.

| Average Daily Membership (ADM) | 1,048 | 1,494 | 2,138 | 3,292 | 4,991 | 7,526 | 9,199 | 10,191 | 11,914 |

Additional information about charter school laws, school formation, and operation is available at the Department of Children, Families & Learning's [Minnesota's Charter Schools](#) web site.

Learning Year Programs: (M.S. [124D.128](#)) extends the educational program from the traditional 9-month calendar to a 12-month calendar. Students can accelerate their educational program allowing them to either graduate early or to make up courses. A learning year program may begin after the close of the regular school year in June. The program may be for students in one or more grade levels from K-12. A continual learning plan must be developed for each student.

| Sites | 3 | 6 | 4 | 10 | 19 | 27 | 22 |

Post-Secondary Enrollment Options: (M.S. 124D.09) allows high school juniors and seniors (both public and nonpublic, including home schooled) to take courses at eligible Minnesota post-secondary institutions. Students must meet the post-secondary institution's admissions requirements.

- ⇒ The program provides students with a greater variety of class offerings and an opportunity to pursue more challenging course work.
- ⇒ The tuition, fees, and required textbooks are provided at no cost to students.
- ⇒ The student earns secondary credit when courses are completed and earns post-secondary credit if they continue at a post-secondary institution that accepts those credit transfers after high school graduation.

| | <u>FY 1995</u> | <u>FY 1996</u> | <u>FY 1997</u> | <u>FY 1998</u> | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> | <u>FY 2002</u> |

| Participating | 6,668 | 6,385 | 6,552 | 7,074 | 7,115 | 7,136 | 7,099 | 7,194 |

State Approved Alternative Programs: (M.S. 123A.05, 123A.06, 126C.05, Subd. 15 124D.128) There are three categories of State Approved Alternative Program's; Area Learning Centers (ALC), Alternative Learning Programs (ALP), and Contracted Alternatives. Area Learning Centers offer a wider array of options/services (K-12), including the requirement to have a daytime school within a school or separate site program for middle level students. In contrast, ALP's can designate what grades they want to serve. Contracted alternatives are nonpublic, nonsectarian schools that have contracted with the serving school district to provide educational services

State Approved Alternative Programs are designed for students who need a different approach or are experiencing difficulty in the traditional school. Instruction is designed to meet the student's individual learning style and needs and includes applied academics, school-to-work, computerized instruction, and service learning.

Overview of State Approved Alternative Programs

- ⇒ To attend a State Approved Alternative Program, students must meet one of the criteria listed in the Graduation Incentives Statute (M.S. 124D.68).
- ⇒ Depending on the district, students K-Adult access alternative programming on a part/full-time basis.
- ⇒ ALC's must offer programming for the entire year (for ALP's this is an option) with the availability of extended day/year programming.
- ⇒ Whereas ALC's, by statute, have to give students the option of receiving their diploma from their district of residence or the district in which the center is located (M.S. 123A.06, Subd. 4) the ALP can choose to solely award the diploma from the district where it is located.
- ⇒ A school district may establish an ALC by itself or in cooperation with other districts, other agencies, foundations, partnerships, etc. Except for a district located in a city of the first class, an ALC must serve the geographic region of at least two districts.
- ⇒ ALC's must allow equal access, and collaborate with, other districts; ALP's have the option of serving students only from their district.
- ⇒ Aid and revenue are based on the total number of hours of educational programming for pupils in average daily membership for each fiscal year.
- ⇒ Financially, there is no distinction between an ALP and ALC.
- ⇒ For additional information refer to the State Approved Alternative Program web page at <http://cfl.state.mn.us/LOD/alp>.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: STUDENT CHOICE/TAX INCENTIVES (info only)

Narrative

Tax Credits: (M.S. 290.0674) were enacted by the 1997 legislature and first took effect for 1998.

- ⇒ Families with school-age children and incomes at or below \$33,500 per year may qualify for a tax credit of up to \$1,000 per child (\$2,000 per family) to reimburse them for certain educational expenses, including tutoring, academic summer camps, enrichment programs, textbooks and instructional materials, home computer hardware, educational software, and some expenses associated with individual schools.
- ⇒ Parents of any child educated publicly, privately, or at home may qualify for education tax credits.

| <u>Tax Year</u> | <u>Tax Credits Amount Claimed (000's)</u> | <u>Number of Claimants</u> | <u>Average Amount</u> |
|-----------------|---|--------------------------------|---------------------------|
| 1998 | \$14,348 | 38,766 | \$370 |
| 1999 | \$21,373 | 57,962 | \$369 |
| 2000 | \$21,329 | 55,941 | \$381 |
| *2001 | \$18,665 | 54,467 | \$343 |

*2001 is to date.

Source: Minnesota Department of Revenue, Tax Research Division, August 2002

Additional information is available from the Minnesota Department of Revenue web site:
<http://www.taxes.state.mn.us/individ/taxinfo/credits24.html>

Tax Deductions: (M.S. 290.01, subd. 19b) were first enacted in 1955 and were most recently modified by the 1997 legislature. They are available to all families, regardless of income and regardless of whether they itemize on their tax returns. This deduction can be used for certain educational expenses, including tutoring, academic summer camps, enrichment programs, textbooks and instructional materials, home computer hardware, educational software, and some expenses associated with individual schools.

- ⇒ In 1997, deductions for each dependent child in kindergarten through sixth grade were increased from a maximum deduction of \$650 to \$1,625; deductions for each dependent child in grades 7 to 12 increased from a maximum of \$1,000 to \$2,500.

| <u>Tax Year</u> | <u>Tax Credits Amount Claimed (000's)</u> | <u>Number of Claimants</u> | <u>Average Amount</u> |
|-----------------|---|--------------------------------|---------------------------|
| 1998 | \$165,677 | 150,588 | \$1,100 |
| 1999 | \$203,476 | 188,752 | \$1,078 |
| 2000 | \$236,815 | 209,224 | \$1,132 |
| *2001 | \$204,790 | 184,874 | \$1,108 |

*2001 is to date.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: MISC FEDERAL PROGRAMS

Narrative

Activity Description

This budget activity summarizes major federal programs that fund activities throughout Minnesota.

Learn and Serve America

Learn and Serve America supports service-learning programs in schools and community organizations that help nearly one million students from kindergarten through college meet community needs while improving their academic skills and learning the habits of good citizenship. Learn and Serve grants are used to create new programs or replicate existing programs, as well as to provide training and development to staff, faculty and volunteers. The Learn and Serve America formula allocation to Minnesota, awarded by the Corporation for National Service, is based on state population.

| | Dollars in Thousands | | |
|--------------------|----------------------|----------------|----------------|
| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
| Total Grant Amount | \$308 | \$304 | \$294 |

Community, Higher Education School Partnership

Community, Higher Education School Partnership (CHESP) is a three-year special initiative grant provided by the Corporation for National Service to build strong service-learning partnerships at the local level between community-based agencies, schools and institutions of higher education.

| | Dollars in Thousands | | |
|---------------|----------------------|----------------|----------------|
| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
| Federal Funds | \$222 | \$240 | \$219 |

Community-Based Service Learning*

The Community-Based Service Learning special grant (CEELS) is a three-year grant awarded through a competitive process to build the capacity of community nonprofit organizations to serve as partners in the transformation of communities through service-learning. Beginning in FY 2003, CEELS funds will be awarded to the nonprofit ServeMinnesota! rather than as a direct grant to Children, Families and Learning (CFL).

| | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
| Federal Funds | \$115 | \$125 | \$57 |

* The state of Minnesota is required to match dollar for dollar all CNS funds.

Title I Grants to LEAS (Title I, Part A)

Title I of the Improving America's Schools Act is the largest of the federal compensatory education programs. Almost every district in the state qualifies for Title I funds, and Title I services are in approximately 90% of the state's elementary schools. More than 110,185 public and non-public students participate in Title I programs annually. There are several parts to Title I: Basic Grants, Concentration Grants, Accountability Grants, Grants for Neglected or Delinquent Institutions, and Capital Expenses.

Minnesota's share of the national appropriation is based on the number of low-income children counted during the 2000 census. CFL adjusts these entitlements to provide the required set-asides for administration, for school support teams for low-performing schools, and for Charter Schools.

Activity at a Glance

Major federal programs in the activity are:

- ◆ Learn and Serve
- ◆ Community, Higher Education School Partnership
- ◆ Community-Based Service Learning
- ◆ Title I Grants of LEAs
- ◆ Even Start Family Literacy Programs
- ◆ Reading First
- ◆ Migrant Education
- ◆ Prevention and Intervention for Children who are Neglected, Delinquent or At-Risk
- ◆ English Language Acquisition Grants
- ◆ Rural and Low-Income Schools
- ◆ Refugee Children Impact Grant
- ◆ Byrd Honors Scholarship Program
- ◆ Reading Excellence Program
- ◆ School-To-Work

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: MISC FEDERAL PROGRAMS

Narrative

Specific objectives of the Title I Basic Grants to LEAs are

- ♦ to align Title I evaluation measures with the state student achievement and system performance measures;
- ♦ to identify and serve students who are most at risk of not meeting our state content and performance standards;
- ♦ to increase success in the regular classroom through coordination of supplemental services with classroom instruction and curriculum;
- ♦ to provide for the involvement of parents in the education of their children;
- ♦ to provide intensive and sustained staff development; and
- ♦ to coordinate with state and federal programs to maximize the services available for at-risk students and to increase the number of students receiving services.

Federal Allocations to Minnesota:

| | Dollars in Thousands | | | | |
|------------------------|----------------------|----------------|----------------|----------------|----------------|
| | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> | <u>FY 2002</u> | <u>FY 2003</u> |
| Title I Grants to LEAs | \$86,890 | \$86,890 | \$86,890 | \$93,000 | \$113,000 est. |

Funding for Title I will likely remain flat in the coming biennium. The FY 2003 entitlement will be impacted by the use of 2000 census data.

Even Start Family Literacy Programs (Title I, Part B)

Even Start is the early childhood and family literacy initiative of the Title I program. The state's allocation for Even Start is determined by the amount of the basic and concentration funds the state receives. Funds are distributed to districts on a competitive basis; grants are awarded for four years. Currently there are nine Even Start programs in Minnesota.

Specific objectives of the Even Start Family Literacy programs are

- ♦ to improve the educational opportunities by integrating early childhood education and adult education for parents into a unified program;
- ♦ to create a new range of services through cooperative projects that build on existing community resources; and
- ♦ to assist children and adults from low-income families in achieving challenging state content and student performance standards.

* Projections based on U.S. Department of Education estimate for FY 2000.

Reading First (Title I, Part B)

The Reading First program is a new federal education program aimed at improving K-3 reading instruction through the use of effective, research-based strategies and methods. This program will provide allow the state to make competitive sub-grants to school districts meeting specific eligibility criteria identified in the authorizing legislation. Grantees will use program funds to:

- ♦ provide preschool-age children with high-quality oral language and literature-rich environments;
- ♦ provide professional development that is based on scientifically based reading research knowledge of early language and reading development;
- ♦ identify and provide activities and instructional materials that are based on scientifically based reading research;

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

| Reading First | \$9,678 | \$10,750 | \$10,750 |

Migrant Education (Title I, Part C)

The specific purposes of the Migrant Education program under Title I, Part C are:

- ◆ to ensure that migratory children are provided with appropriate educational services (including support services) that address their special needs in a coordinated and efficient manner;
- ◆ to ensure that migratory children have the opportunity to meet the same state content and performance standards that all children are expected to meet;
- ◆ to prepare migratory children to make a successful transition to post-secondary education or employment by supporting high-quality educational programs to help them overcome educational disruption, cultural and language barriers, social isolation, various health-related problems and other factors, and
- ◆ to ensure that migratory children benefit from state and local systemic reform.

Federal Allocations to Minnesota:

| | Dollars in Thousands | | | | |

| Migrant Education | \$2,326 | \$2,612 | \$3,012 | *\$2,375 | \$2,375 est. |

*Funding for the Migrant Education program is projected to remain flat for the next biennium.

Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk of Dropping Out (Title I, Part D)

The specific purposes of the Neglected and Delinquent programs under Title I, Part D, include:

- ◆ to provide supplementary instruction to students, ages 5-21, who are neglected and have been placed in a locally operated residential institution for such students;
- ◆ to improve educational services to neglected or delinquent children and youth so that such children and youth have the opportunity to meet the same challenging state content and performance standards that all children will be expected to meet;
- ◆ to provide the targeted population the services needed to make a successful transition from institutionalization to further schooling and employment; and
- ◆ to prevent at risk youth from dropping out and to provide dropouts and youth returning from institutions with a support system to ensure continued education.

Federal Allocations to Minnesota:

| Neglected and Delinquent | \$235 | \$197 | \$197 | \$241 | \$184 est. |

English Language Acquisition Grants for Limited English Proficient Students Title III

This new program consolidates the 13 bilingual and immigrant education programs into a formula grant program and significantly increases flexibility and accountability. Minnesota previously received funds under the Title VII Emergency Immigrant program, while districts applied directly to the U.S. Department of Education for grants under other programs. This program maintains the current focus on assisting school districts in teaching English to limited English proficient students and in helping these students meet the same challenging state standards

| English Language Acquisition | \$4,900 est. | \$4,900 est. | \$4,900 est. |

Rural and Low-Income Schools Grant (Title VI, Part B)

This new program is designed to help rural districts that may lack the personnel and resources to compete effectively for federal competitive grants and that often receive federal grant allocations in amounts that are too small to be effective in meeting their intended purposes. This program serves a very small number of rural districts with high concentrations of poverty that are not eligible for a Small, Rural School Achievement grant from the U.S. Department of Education.

| | Dollars in Thousands | | |

Refugee Children School Impact Grant

This program provides funding to CFL to make sub-grants to districts serving large numbers of refugee children. The purpose of these sub-grants is to provide for some of the costs of educating refugee children incurred by local school districts in which significant numbers of refugee children reside. ten Minnesota school districts will receive funds to provide extended day and/or extended year programming as well as additional services. Minnesota expects to receive continuation funding for this grant in FY 2004 and FY 2005.

Reading Excellence Program

Minnesota received \$24.5 million in FY 2002 under the competitive Reading Excellence program for the U.S. Department of Education for the purpose of improving K-3 reading instruction, strengthening professional development, reducing referrals to special education because of reading difficulties, providing supplemental services for struggling students, and increasing access to family literacy programs. CFL has awarded two types of subgrants to 31 schools across the state. The Local Reading Improvement subgrants to 24 schools cover FY 2002-04 and are intended to provide the resources to allow the schools to implement a school-based reform focusing on improving K-3 reading instruction. The seven Tutorial Assistance subgrants cover FY 2003-04 and provide resources to schools to provide a choice of tutorial assistance to K-3 students at-risk of not reading on grade level by the end of third grade.

CHILDREN, FAMILIES, & LEARNING

Program: PRGS FOR SPECIAL POPULATIONS

Activity: MISC FEDERAL PROGRAMS

Narrative

School-To-Work

School-To-Work is a five-year federal initiative. The main purpose of Minnesota's School-To-Work initiative is to create a system that provide learners with options for receiving quality education and preparation for careers. Minnesota's School-To-Work initiative recognizes school-based learning, work-based learning, service-based learning, and connecting activities as system elements. The elements facilitate the comprehensive goals for Minnesotans to become lifelong learners, economic players, and responsible citizens.

| | Dollars in Thousands | | |
|---------------|----------------------|----------------|----------------|
| | <u>FY 2000</u> | <u>FY 2001</u> | <u>FY 2002</u> |
| Federal Funds | \$5,700 | \$3,800 | \$1,900 |

FY 2002 was the last year of funding. The state was granted a no-cost extension though 03-31-03, however, there will be no additional funding for this initiative.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Federal Citation: P.L. 105-17 IDEA

Special Education-Regular is a state aid program that provides specially designed instruction and related services for children and youth with disabilities ages birth – 21. Districts also receive additional federal Individual Disability Education Act (IDEA) funds to be used in the delivery of special education services.

Population Served

As shown in the following table, in FY 2001 Minnesota provided special education services to 114,017 children and youth, ages birth through 21. The following table shows the number of special education students by age and disability, as of 12-01-01.

Activity at a Glance

Special Education services, revenue, and expenditures for FY 2001:

- ◆ 114,017 students ages birth – 21 receiving services.
- ◆ 21,735 professional and paraprofessional staff employed.
- ◆ \$562,088,359 paid to districts.
- ◆ \$69,021,418 Federal Flow Through allocated to school districts.

Unduplicated Child Count by Disability and Age Group (click above for historical child count data) as of 12/1/01

| 14. Severely Multiply Impaired | 2 | 145 | 166 |
| TOTAL | 10,075 | 102,208 | 114,017 |

Students become eligible for special education services by meeting specific state eligibility requirements under one or more of 13 disability categories. Although some of the categories of disability clearly identify children with severe disabilities, even the disability categories that typically suggest mild impairment have students with disabilities that range from relatively mild to very severe.

Students must meet two general criteria to be eligible for special education services: 1) be found eligible through a multi-disciplinary assessment; and 2) be in need of specially designed instruction and related services. The eligibility criteria for each disability are defined in the [state education rules](#).

| Subtotal Ages Birth – 2 | 3,053 |
| TOTAL | 114,017 |

Services Provided

Special Education instruction and services are governed by state statutes (M.S. 125A.02; M.S. 125A.03; M.S. 125A.75); state education rules (chapter 3525); federal law [P.L. 105-17, Individuals with Disabilities Education Act (IDEA)]; and federal rules (CFR 300).

The combination of these laws and rules require the provision of a free appropriate public education (FAPE) for all eligible children and youth with disabilities. FAPE is defined as instruction and services that are:

- ◆ based on need as identified in a multi-disciplinary assessment;
- ◆ written into an individualized education plan (IEP), Individualized Family Service Plan (IFSP) or Individualized Interagency Intervention Plan (IIIP); and
- ◆ provided in the least restrictive environment appropriate to the student's needs and at no cost to parents.

Special Education is broad-based and focuses on areas of instruction that students without disabilities can generally accomplish without specific instruction directed to them.

The responsibility for Special Education services lies with the district in which the parents reside. Districts and parents determine the most appropriate means of delivering the necessary instruction and services to the students.

- ⇒ More than 279 smaller school districts have formed 43 special education cooperatives to deliver special education programs more cost effectively and efficiently.
- ⇒ In addition, districts can purchase services from service cooperatives, intermediate school districts, and cooperate with formal collaborative organizations such as children's mental health collaboratives, family service collaboratives, interagency early intervention committees, and community interagency transition committees.

Activity: SPECIAL EDUCATION-REGULAR

Narrative

The Division of Special Education and the Division of Accountability and Compliance are working with the school districts and cooperatives to implement self-assessment procedures known as Continuous Improvement Monitoring Process (CIMP). This process is for children with disabilities birth through 21 and their families, and has three major goals:

- ◆ to improve educational results for children and youth with disabilities through the provision of specialized instruction and related services;
- ◆ to improve educational benefit for children and youth with disabilities through the development and implementation of interagency delivery systems; and
- ◆ to assure free and appropriate public education and early intervention services through state and local implementation of required procedures for finding, evaluating, placing, instructing and supporting children and youth with disabilities.

Key Measures

Significantly increase the performance of students with Individualized Education Plans (IEP) on state assessment tests (SE).

- ◆ Student Performance as measured by the Minnesota Basic Skills Test

State Special Education Aids:

Special education revenue is based on expenditures in the second prior year (base year). State special education revenue for FY 2003 is based on expenditures in FY 2001.

The special education base revenue equals the sum of the following amounts computed using base year data:

- ◆ *Salary* - 68% of the salary of each essential staff providing direct instructional services to students;
- ◆ *Supplies and Equipment* - 47% of the cost of supplies and equipment not to exceed an average of \$47 per student with a disability;
- ◆ *Contracted Services* - 52% of the amount of a contract for instruction and services that are supplemental to a district's education program for students with disabilities. 52% of the difference between the amount of the contract and the general education revenue of the district for that pupil for the fraction of the school day the student receives services that are in place of services of the district's program; and
- ◆ *Transportation* - 100% of the cost of special transportation services.

The special education adjusted base revenue equals the base revenue times the ratio of the current year average daily membership (ADM) to the base year ADM. If the special education base revenue for a district equals zero, the special education revenue equals the amount computed above using current year data. A school district's special education revenue equals the state total special education revenue, minus new district revenue, times the ratio of the district's adjusted special education base revenue to the state total adjusted special education base revenue.

The state total special education revenue for FY 2000 and beyond equals: 1) the state total special education revenue for the preceding fiscal year times; 2) the program growth factor times; and 3) the ratio of the state total ADM for the current fiscal year to the state total ADM for the preceding fiscal year.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: SPECIAL EDUCATION-REGULAR

Narrative

For FY 1999 and earlier, special education revenue was funded with a combination of state aid and property tax levies. Beginning in FY 2000, this program is funded entirely with state aid.

Federal IDEA Funds:

IDEA, Part B funds are generated on a December 1 child count basis. School districts submit the number of individuals with disabilities, ages 3 to 21, who have an IEP and are receiving special education services on December 1. Pre-school incentive funds, Section 619 of IDEA, are generated on children ages 3-5 that have IEP's and are receiving services on December 1. The funding to school districts is referenced in the chart above.

The federal law requires that the state and local school districts maintain effort from one year to the next. Expenditures on a statewide basis or on a local district basis may not be decreased from the current year to the subsequent year, except under specific circumstances. Districts cannot supplant state and local expenditures for special education with federal funds. Federal funds are intended to expand and improve education services to individuals with disabilities.

Because of the maintenance of effort requirements of IDEA, districts have generally paid for related services staff, supplies, equipment, and tuition agreements with federal funds. Districts have somewhat more latitude to pay for non-reimbursed eligible costs with federal funds, rather than with state special education aids. The two aid packages are compatible and provide a complete package for local school districts.

CFL flows 86% of the federal funds to local education agencies. The department retains 2.3% of the funds for administration costs and approximately 11.7% for statewide set aside programs to implement Minnesota's State Improvement Plan.

Special education revenue, together with the general education revenue earned by students with disabilities for the time they are enrolled in special education programs, does not reimburse all of the expenses that districts incur for special education programs. Information on special education cross-subsidies is available at <http://cfl.state.mn.us/dpf/specialed.html>.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: CHILDREN W DISABILITIES AID

Narrative

Activity Description

Citation: M.S. 125A.75, Subd. 3

This state aid program provides funding for individuals who are placed in a state institution, a licensed residential facility, or foster facility for care and treatment and for whom no district of residence can be determined.

Activity at a Glance

For FY 2001:

- ◆ 140 students without disabilities were placed.
- ◆ 338 students with disabilities were placed.
- ◆ Total cost was \$2.25 million.

Population Served

Districts that serve individuals described above receive full payment for net education costs for students with and without disabilities who are served.

Services Provided

This activity ensures that individuals who are placed in a residential facility and for whom no district of residence can be determined receive a free and appropriate education. Pupils are eligible if no district of residence can be determined because:

- ◆ parental rights have been terminated by court order;
- ◆ parents cannot be located;
- ◆ no other district of residence can be determined; or
- ◆ the parent or guardian having legal custody of the child is an inmate of a Minnesota correctional facility or is a resident of a halfway house under the supervision of the commissioner of corrections.

This activity's objectives are the same as stated for regular special education. Special education programs and services are designed to benefit individuals with disabilities whose educational needs range from self care skills, to independent living skills, to preparation for sheltered employment or employment in the community. Students without disabilities are also eligible for this aid if they are eligible as noted above. This aid is for the costs of education and not for the costs associated with the care and treatment of the students.

Students eligible for this aid must be placed where the regular education program at the facility is approved according to section M.S. 125A.515.

FY 2001

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: CHILDREN W DISABILITIES AID

Narrative

Historical Perspective

This program began in the 1970s to include education costs for students with disabilities. The law was amended in 1999 to include all students, those with and without disabilities as eligible for aid if they meet the criteria stated above. Students without disabilities must have been placed by the courts to be eligible.

Key Measures

Key indicators and measures for special education programs are available in the Special Education -Regular budget narrative.

Additional information on special education key measures are available at:

CFL's Special Education Web Site: <http://cfl.state.mn.us/SPECED/>

Initiatives and Priorities: <http://cfl.state.mn.us/SPECED/initiatives.html>

Activity Funding

The aid equals 100% of the net costs of educating these individuals, including transportation costs, a proportionate amount of capital expenditures and debt service, minus the sum of basic general education revenue, special education aid, transportation aid, and any other aid earned on behalf of the child.

The students without disabilities have an average placement of 34.20 days while the students with a disability have an average placement of 77.40 days. In FY 2001, the average cost for a full-time equivalent student without a disability is \$6,077.60 while it is \$8,058.01 for a student with a disability.

The aid is paid as a reimbursement in the year following the year the services are provided.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: SPECIAL PROGRAMS

Activity: TRAVEL FOR HOME-BASED SERVICES

Narrative

Activity Description

Citation: M.S. 125A.75, Subd. 1; P.L. 95-17, 42 U.S.C. Part C

This activity is funded by state sources. The state aid activity provides funding to assist school districts with travel costs for early childhood special education staff delivering services to children and their families in the home and at early childhood education center based sites within the community.

Activity at a Glance

Home-Based Travel for ECSE staff to provide services in the home or center based programs.

- ◆ 10,075 ECSE children served in FY 2001
- ◆ \$135,806 paid to districts in FY 2001

Population Served

M.S. 125A.03 mandates special education services begin at birth for children with disabilities.

- ⇒ For very young children, special education services consist of consultation with parents and parent training, as well as direct services to the child.
- ⇒ Home-based travel aid assures that services are available in a variety of settings and that training and services can be delivered in the home or in settings most appropriate for the child and family.

Home based travel assists the parents to be more involved in children's learning, development, and readiness for K-12 education and it provides services in the child's more natural setting of the home or early childhood center.

Services Provided

Travel for home-based services assures that all individuals from birth through age four with disabilities, and their families, have access to early childhood special education (ECSE) intervention services.

Federal funding under the Individuals with Disabilities Education Act (IDEA), (P.L. 95-17) (Budget Activity 0301), the Preschool Incentive program (P.L. 95-17, Sec. 619) (Budget Activity 3201), and the Infants and Toddlers program (Budget Activity 0915) (42 U.S.C. Part C) may also be used for this purpose.

Key Measures

- ⇒ The number of children, from ages birth through age four, identified as having disabilities and receiving special education services increased from 6,901 in FY 1991 to 10,075 in FY 2001. The majority of these services are provided in the child's home or in a center-based site in the community.
- ⇒ There are 3,186 students age five who are in home-based, center, school-based and other settings, some of whom are eligible for home-based travel aid.

Key indicators and measures for special education programs are available in the Special Education -Regular budget narrative.

Additional information on special education key measures are available at:

CFL's Special Education Web Site: <http://cfl.state.mn.us/SPECED/>

Initiatives and Priorities: <http://cfl.state.mn.us/SPECED/initiatives.html>

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: SPECIAL EDUCATION-EXCESS COSTS

Narrative

Activity Description

Citation: M.S. 125A.79

This state aid program provides school districts with assistance for unreimbursed costs of special education and related services. These high costs have traditionally been subsidized by the general fund, reducing funds available for classroom education.

Population Served

All public schools in Minnesota that experience unreimbursed special education costs as defined by the aid formula receive benefits from state aid.

Services Provided

Special education excess cost aid promotes adequacy and equity in the general education program. Specifically, this activity helps students with a disability access free and appropriate public education without requiring school districts to subsidize special education costs excessively from general operating funds.

In small school districts, the unreimbursed costs of serving a few high cost students can have a severe impact on the district's general fund budget. High concentrations of special education students can create similar problems in larger school districts. The special education excess cost aid provides a safety net to mitigate the impact of unreimbursed special education costs on school district general fund budgets.

Historical Perspective

Since FY 1996, the total state special education revenue has been set in law. The growth in special education excess cost revenue since FY 1995 is largely attributable to faster growth in special education expenditures than in state total special education revenue during this period.

Beginning in FY 1999, transportation funding for students with a disability was rolled into the special education formula, and the excess cost of transporting these students was included in the excess cost formula.

Beginning in FY 2000, the revenue was increased from 70% to 75% of excess costs, and the threshold to qualify for revenue was reduced from 5.7% to 4.4% of general education revenue. The threshold was reduced to 4.36% beginning in FY 2001.

Key Measures

Key indicators and measures for special education programs are available in the Special Education -Regular budget narrative.

Additional information on special education key measures are available at:

CFL's Special Education Web Site: <http://cfl.state.mn.us/SPECED/>

Initiatives and Priorities: <http://cfl.state.mn.us/SPECED/initiatives.html>

Activity Funding

For FY 2001, a district's special education excess cost aid equaled the greater of

- ◆ 75% of the difference between the district's unreimbursed special education cost and 4.36% of the district's general revenue; or
- ◆ 70% of the difference between the increase in the district's unreimbursed special education cost between the base, and the current year and 1.6% of the district's general revenue.

Activity at a Glance

Excess Cost Aid provides a "safety net" for districts that experience high costs for special education services which are not reimbursed by regular special education aid.

- ◆ \$88.1 million in entitlements to Minnesota districts in FY 2001.
- ◆ 299 districts received excess cost aid in FY 2001.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: SPECIAL EDUCATION-EXCESS COSTS

Narrative

Beginning in FY 2002, the state total excess cost aid equals the product of the state total excess cost aid in the previous year, times the program growth factor, times the ratio of the state total average daily membership (ADM) in the current year to the state total ADM in the previous year.

The program growth factor equals 1.044 for FY 2002 and 1.02 for FY 2003 and later. A district's initial excess cost aid is computed using the formula in effect for FY 2001. A district's actual excess cost aid equals its initial entitlement times the ratio of the state target for excess cost aid to the state total initial excess cost aid.

Excess cost aid targets a portion of special education funding increases to districts with the greatest excess cost as a percentage of total general revenue. By considering the overall impact of unreimbursed special education costs on a district's general fund budget, this program is more effective in addressing excess costs than narrower programs such as the residential aid, court placement, and tuition revenue programs.

The table below shows the state total amount of excess cost revenue for FY 1995 through FY 2003, and the numbers of districts participating in the program each year:

Special Education Excess Cost Revenue

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: LITIGATION COSTS FOR SPEC EDUC

Narrative

Activity Description

Citation: M.S. 125A.75, Subd. 8

This state aid program provides additional funding for school districts for eligible litigation costs associated with special education.

Population Served

School districts with eligible special education litigation costs can participate in this activity.

Activity at a Glance

Provides districts with reimbursement for due process hearing costs relating to special education matters.

- ◆ 12 districts received \$132,568 in FY 2000
- ◆ 13 districts received \$337,518 in FY 2001.

Services Provided

This program increases the efficiency of special education programs by encouraging districts to make program decisions based on student educational needs and not based on fear of high litigation costs. Districts are eligible for reimbursement of administrative hearing costs. Attorney fees are not eligible for reimbursement.

The administrative costs of special education hearings, including the following items, are eligible for 100% reimbursement.

- ◆ hearing officer fees
- ◆ court reporter fees
- ◆ mileage costs
- ◆ independent evaluations ordered by the hearing officer
- ◆ rental of hearing rooms
- ◆ transcription fees
- ◆ interpreter and transliterator fees

Key Measures

Some school districts are pressured to provide more special education services than necessary to avoid significant litigation costs. By assisting districts with litigation costs, this program is intended to reduce the impact of potential litigation as a factor driving program decisions and to allow decisions to focus more directly on student educational needs.

| | <u>FY 1999</u> | <u>FY 2000</u> | <u>FY 2001</u> |
|--|----------------|----------------|----------------|
| Number of School Districts | 14 | 12 | 13 |
| Amount Paid to Districts | \$542,911 | \$132,568 | *\$337,518 |
| <i>*In addition 4 districts paid \$25,393 for hearing costs with federal funds in FY 2001.</i> | | | |

Activity Funding

This program is funded with state aid. If the amount appropriated is insufficient to fully fund the aid for hearing and litigation costs, the aid is prorated. All applications for funding are reviewed by the Division of Special Education and Division of Accountability and Compliance to assure "neutral funding" for due process procedures.

Beginning in FY 2002, this program was changed to reimburse school districts for prior year eligible costs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: TRANS PRGS-DISABLED STUDENTS

Narrative

Activity Description

Citation: M.S. 124D.454

The Transition Program for Students with Disabilities is a state funded program that provides additional funding for transitional career and technical (vocational) experiences/programs that provide career exploration, healthy work attitudes, specific career and academic knowledge, and job skills for students with disabilities.

Activity at a Glance

- ◆ 4,335 students served in FY 2002

Population Served

This program serves students who meet state disability eligibility criteria according to M.S. 125A.02 and whose individual Education Plans (IEP) includes work-based learning.

Services Provided

Examples of special services offered to aid in career and technical student success are assessment of aptitude, abilities, and support needs; interpreters; career assessment; community-based work experience; and technical tutors.

This program provides students with disabilities opportunities to:

- ◆ explore career choices;
- ◆ acquire entry-level academic and technical skills for employment;
- ◆ learn problem-solving and communication skills appropriate to the individual education plans and employment standards;
- ◆ gain experience in the use of equipment that will be used in their chosen fields of study; and
- ◆ gain work experience in a real-world setting.

A student with a disability may be served in his/her district of residence, by cooperative efforts with other districts, or through formally organized intermediate districts or cooperatives. Many students with disabilities meet transition goals through regular career and technical education programs.

- ⇒ Programs meet state program standards.
- ⇒ Programs are taught by appropriately licensed staff.
- ⇒ Programs address federal core indicators of academic and technical skill attainment, program completion, participant progress in post-secondary education or employment, and participation in opportunities not traditional to the gender.
- ⇒ Equipment and contracted services obtain state approval because need and effectiveness are demonstrated.
- ⇒ Programs address the wealth of opportunities available in business/industry settings.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: TRANS PRGS-DISABLED STUDENTS

Narrative

Historical Perspective

In the past, this program has been known as Secondary Vocational-Disabled, Secondary Vocational for Students With Disabilities, and School to Work for Students with Disabilities, and is now known as Transition Programs for Students With Disabilities.

Key Measures

Significantly increase the transition from education to employment for students with IEPs.

⇒ The agency is currently in the process of developing a data collection process that will be used to collect program data for this and other school-to-work programs. This data will be available beginning with data from the FY 2003 school year.

Activity Funding

School districts, intermediate districts, cooperatives, and other educational organizations must have program approval and must use appropriately licensed staff to qualify for program funding.

Per current law, the state total revenue equals the state total transition-disabled revenue for the previous year, times a growth factor, times the ratio of state total ADM for the current year to the state total ADM for the previous year.

A school district's transition-disabled revenue equals the state total transition-disabled revenue, less new district revenue, times the ratio of the school district's adjusted base transition-disabled revenue to the state total adjusted base transition-disabled revenue.

State transition-disabled revenue is based on expenditures in the second prior year (base year). The base revenue resulting from the base year expenditures equals the sum of the following:

- ◆ 68% of salaries of essential personnel providing direct instructional services;
- ◆ 52% of the difference between an approved contract for services and basic revenue for that student for the fraction of the school day the student receives services;
- ◆ 47% of necessary equipment;
- ◆ 47% of teacher travel between instruction sites or to/from community-based learning sites;
- ◆ 47% of supplies not to exceed an average of \$47 per student with a disability;
- ◆ 52% of the contract amount for services by an organization, other than a Minnesota school district or cooperative, that are supplemental to the district education program; and
- ◆ 52% of the contract for vocational evaluation of a student not yet enrolled in 12th grade.

The adjusted base year revenue equals the base revenue times the ratio of the district's average daily membership (ADM) for the current year to the district's ADM in the base year. If the district base year revenue is zero, the current year revenue calculation is based on formula percentages applied to current year expenditures.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: COURT PLACED SPEC EDUC

Narrative

Activity Description

Citation: M.S. 125A.79, subd. 4

This state aid program provides funding for school districts to pay the costs of providing special education programs to non-Minnesota students with disabilities when the providing school district is unable to collect tuition from the responsible state or agency.

Activity at a Glance

Court Place Revenue for Non-Minnesota Residents placed by the courts in Minnesota.

- ◆ 25 students were placed from out-of-state
- ◆ 10.84 ADMs were in placement
- ◆ \$141,667 was paid to districts in FY 2001

Population Served

Minnesota school districts receive aid that would otherwise be subsidized by the district general fund.

Services Provided

Minnesota school districts providing special education services to court-placed nonresident students with disabilities are assured that they will receive revenue for services provided if out-of-state agencies fail to pay tuition bills. In addition to the tuition bills, the district submits to the agency the documentation of the efforts to collect the tuition from the student's resident district and state.

Key Measures

FY 1999 was the first year of operation for this program, with 16 students eligible for the state aid under this program.

In FY 2001, twenty-five non-resident students (10.84 Average Daily Memberships) were placed in Minnesota by the courts for services that were not paid by the resident district or state with a cost of \$141,667.

Activity Funding

To be eligible for this revenue, districts must demonstrate that they have admittance procedures designed to identify the agency responsible for the education costs, and get commitment for payment of tuition from the agency prior to admitting the student into the program.

Beginning in FY 2002, this program was changed to reimburse school districts for prior year eligible costs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: OUT OF STATE TUITION-SPEC EDUC

Narrative

Activity Description

Citation: M.S. 125A.79, Subd.8

This state aid program provides education funding for Minnesota resident students placed in care and treatment facilities by court action in a state that does not have a reciprocity agreement.

Population Served

Districts receive education funding for students placed in care and treatment facilities by court action in a state that does not have a reciprocity agreement.

Activity at a Glance

Minnesota residents placed out-of-state for care and treatment summary for FY 2001:

- ◆ 82 students were placed out-of-state
- ◆ 51.19 ADMs were in placement
- ◆ \$267,766.94 paid to school districts

Services Provided

The resident school district submits the balance of the tuition bills, minus the sum of basic general education revenue, special education aid, and any other aid earned on behalf of the child to the Minnesota Department of Children, Families & Learning, Special Education Division for payment.

Historical Perspective

This provision was enacted in 1999 to pay the costs of providing special education programs to Minnesota students with disabilities who are placed in a care and treatment facility by court action in a state that does not have a reciprocity agreement.

Key Measures

The first year of operation of this program was FY 2001, and 82 students were placed out-of-state for care and treatment. The payment from this statute is made after all available aids such as general education revenue and special education revenue have been applied.

| <u>Number of Students in out-of-state placements</u> | <u>ADM</u> | <u>Total Expenditure</u> | <u>Special Education Revenue</u> | <u>Basic Revenue</u> | <u>Court Placed Funding</u> |
|--|------------|------------------------------|--------------------------------------|--------------------------|-------------------------------------|
| 82 | 51.19 | \$828,880 | \$290,080 | \$271,032 | \$267,766 |

Key indicators and measures for special education programs are available in the Special Education -Regular budget narrative.

Additional information on special education key measures are available at:

CFL's Special Education web site: <http://cfl.state.mn.us/SPECED/>

Initiatives and Priorities: <http://cfl.state.mn.us/SPECED/initiatives.html>

Activity Funding

Because data is not readily available prior to the end of the school year, this program was changed to reimburse school districts for eligible costs in the prior year beginning in FY 2003.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: SPECIAL PROGRAMS

Activity: FEDERAL SPECIAL PROGRAMS

Narrative

Activity Description

This budget activity summarizes federal programs for special populations that fund activities throughout Minnesota.

Special Education - Deaf/Blind P.L. 105-17 IDEA

To initiate and improve statewide educational services for children with deaf-blindness from birth to age twenty-two.

To provide transition services for Minnesota youth and young adults with deaf-blindness as they progress from secondary special education programs to post-secondary education, employment, and community living.

The specific program objectives are the same as stated under Special Education-Regular narrative. Special Education programs are designed to prepare individuals with disabilities whose education needs are basic, ranging from self care skills, to independent living skills, to preparation for sheltered employment, or employment in the community. Some will be prepared for and benefit from the full array of post-secondary education programs available.

Special Education State Improvement Grant P.L. 105-17 IDEA

The State Improvement Grant (SIG) is a five-year grant that was received through a competitive process among states. The purpose of the grant is to bring about systemic change in identified statewide need areas in special education. The grant currently focuses upon: 1) facilitating access to general education curriculum and achieving results for children and youth with disabilities; 2) fully implementing a coordinated, multidisciplinary interagency service system for children and youth with disabilities birth through 21 statewide; and 3) ensuring the availability of a qualified special education workforce in all regions and communities of Minnesota.

Special Education Self Improvement Grant P.L. 105-17 IDEA

The self-improvement grant is a one-year grant that was received through a competitive process to focus on self-improvement in five areas of need previously identified in the *Minnesota's Self-Assessment Process 2000*. These five areas include: successful student transitions, sufficient trained staff, access to mental health services, interagency coordination, and reducing system bias.

Title I Program for Neglected and Delinquent Children P.L. 100-297 Elementary and Secondary Education Act of 1965, Title I Chapter 1

Federal funds for use by state corrections facilities to provide education services to children at risk (academic) and support partnerships between schools and correctional facilities for the purpose of improving the at risk youngsters' quality of education in an effort to meet state performance standards that comply with guidelines of the Neglected and Delinquent Children's policies.

Future Bound: Outreach Project to Promote Secondary Transitional Opportunities for American Indian Students. (CFDA 84324R)

This grant program provides the four Dakota communities and other tribal nations and public schools in Minnesota with the funding for summer programs and curriculum to help special education/at-risk students make the transition from high school to postsecondary education.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Contact

Additional information is available from the Minnesota Department of Children, Families & Learning, Special Education Division, (651) 582-8264.

Activity at a Glance

The federal program in the narrative are:

- ◆ Special Education – Deaf/Blind
- ◆ Special Education State Improvement
- ◆ Special Education Self Improvement
- ◆ Title I Program for Neglected and Delinquent Children
- ◆ Future Bound: Outreach Project

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: HEALTH & SAFETY REVENUE

Narrative

Activity Description

Citation: M.S. 123B.57

The Health and Safety program is a state aid and levy program to address facility and grounds issues that impact safety and health concerns.

Population Served

Only school districts with levy authority are eligible to participate in this program.

Services Provided

Program revenue may be used for repairs in any existing public school building or site. However, the district must own or have contractually agreed to purchase (lease-purchase) any building or facility where program-funded improvements are being made. New construction and portable classrooms are not eligible for funding. In addition, (with the exception of calamity bonds) revenues cannot be used to make principal and/or interest payments on any other debt instrument.

Activity at a Glance

Estimated FY 2003:

| | |
|------------------------------------|--------------|
| ◆ H/S Revenue | \$94,500,000 |
| ◆ State Aid | \$9,500,000 |
| ◆ Local Levy | \$85,000,000 |
| ◆ Number Districts | 328 |
| ◆ Uses of Revenue (\$ in millions) | |
| Physical Hazards | \$24.9 |
| Fire Safety | \$21.1 |
| Hazardous Substance | \$5.1 |
| Environment Management | \$9.7 |
| Asbestos | \$15.3 |
| Indoor Air Quality | \$18.4 |

The program addresses a wide array of areas impacting environments, including the following:

- ◆ asbestos removal or encapsulation;
- ◆ hazardous substance, including provisions for fuel storage repairs, cleanup, or storage tank removal and lead removal;
- ◆ fire safety, including compliance with State Fire Marshal orders;
- ◆ environmental health and safety management; and
- ◆ physical hazard control, including indoor air quality.

Historical Perspective

The predecessor to the program began in 1985 as a hazardous substance removal program. The Health and Safety program, as it is now known, began in FY 1990 when the hazardous substance revenue program was expanded to include fire and life safety. Major changes to the program since that time have included expansion to cover costs related to

- ◆ environmental management and physical hazards (FY 1994);
- ◆ the Indoor Air Quality in Schools Act (FY 1990); and
- ◆ member district's share of the three intermediate (cooperative) district's health and safety costs (FY 2001).

Key Measures

The program has facilitated the removal or remediation of a variety of hazards from school facilities. A breakdown of health and safety expenditures by category is provided below.

CHILDREN, FAMILIES, & LEARNING

Program: **FACILITIES & TECHNOLOGY**

Activity: **HEALTH & SAFETY REVENUE**

Narrative

Health & Safety Expenditures Categories

FY 2003 Total: \$94.5 million (\$ in millions)

Activity Funding

Health and safety revenue is funded through a combination of state aid and local property tax levies. For FY 2003 and later years, the state and local shares of Health and Safety revenue are determined using an equalizing factor of \$2,935. The local share equals the product of the revenue times the lesser of one or the ratio of the district's adjusted net tax capacity per adjusted marginal cost pupil unit to \$2,935.

Program expenditures on hazardous substances and fire safety have leveled off in recent years. However, as an increasing number of school districts address indoor air quality issues, expenditures in this area are expected to continue climbing. Total revenues are expected to surpass the \$100 million dollar mark by FY 2003. Local taxpayers will bear the brunt of increasing program expenditures, as state aid will continue to fall with increases in the adjusted net tax capacity.

Activity: DEBT SERVICE EQUALIZATION

Narrative

Activity Description

Citation: 123B.53; 123B.55

Debt Service Equalization is a state aid and local levy program that ensures that all school districts, regardless of property wealth, can afford adequate educational facilities for their students. The equalization formula facilitates the betterment and/or expansion of school facilities by providing debt service aid to districts with a low to moderate tax base per pupil unit. Some districts with a relatively high tax base per pupil unit can still qualify for debt service aid if they have a relatively high debt burden.

Activity at a Glance

Estimated FY 2003

| | |
|---|-----------|
| ◆ Districts Receiving Aid | 127 |
| ◆ Average Amount of Aid Received by a District | \$259,684 |
| ◆ Percentage of Eligible Debt Service Revenue Paid by State Aid | 6.1% |

School districts must receive approval from a majority of those voting in a school bond referendum before issuing bonds to construct, acquire or improve school facilities. Exceptions include alternative facilities bonding, and special legislation for Minneapolis and St. Paul.

Population Served

This program serves all students attending public schools and taxpayers in districts with a relatively high debt service tax rate and low tax base per pupil unit.

Services Provided

The debt service program includes several components, and is financed through a combination of state aid and local property tax levies. The following table shows the state total and number of districts participating in each component for FY 2003 (taxes payable in 2002).

Debt Service Revenue by Funding Category, FY 2003

(\$ in Thousands)

| Funding Category | Total Amount | No. of Districts |
|---|--------------|------------------|
| A. Revenue Components | | |
| 1a. Required Debt Service Levy-Eligible ^{1 2} | 465,355 | 255 |
| 1b. Required Debt Service Levy-Ineligible | 23,588 | 31 |
| 2a. Maximum Effort Levy Above Required ² | 576 | 13 |
| 2b. Additional Maximum Effort Levy | 2,591 | 21 |
| 3. Req. Debt Service Levy for Equipment Bonds | 6,376 | 29 |

| B. Funding Sources | | |
| 1. Net Debt Service Equalization Revenue | 98,940 | 158 |
| 2. Debt Service Equalization Aid | 32,980 | 127 |

¹ Includes net taconite debt service levy. Excludes Alternative Facilities debt service levy (see line 6a).

² Included in computation of Gross Equalization Revenue

³ Net amount after alternative facilities aid – see Alternative Facilities Bonding narrative

⁴ Sum of lines 1a, 2a, 2b, 5a, 5c, 6, 7, 8, and 9.

CHILDREN, FAMILIES, & LEARNING

Program: **FACILITIES & TECHNOLOGY**

Activity: **DEBT SERVICE EQUALIZATION**

Narrative

Key Measures

Statewide debt service revenue continues to increase as shown in the table below. The table also illustrates the state/local share of debt service revenue. The unequalized local portion of debt service revenue (15% * district's ANTC) makes up the lion's share of total revenue. The equalized local portion is defined as the local share beyond the 15% * ANTC. This amount remained relatively constant over the years.

| | Dollars in Millions | | | | |
|----------------------------|---------------------|---------|---------|---------|---------|
| | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 |
| Unequalized Local Portion | \$265.9 | \$304.0 | \$343.0 | \$409.2 | \$440.1 |
| Equalized Local Portion | 67.8 | 65.1 | 58.1 | 51.3 | 66.0 |
| Debt Service Aid | 33.9 | 32.6 | 29.0 | 25.7 | 33.0 |
| TOTAL Debt Service Revenue | \$367.6 | \$401.7 | \$430.1 | \$486.2 | \$539.1 |

- ⇒ As a result of the new two-tiered equalization formula created by the 2001 legislature, total debt service aid reversed its downward trend in FY 2003.
- ⇒ In percentage terms, the state's share of eligible debt service revenue increased from 5.3% in FY 2002 to 6.1% in FY 2003. The state share of net debt service revenue eligible for equalization had declined from a high of 11.09% in FY 1997. From FY 1997 to FY 2002, this percentage naturally decreased with increases in tax capacity and an essentially constant debt-equalizing factor.
- ⇒ Legislative overhaul of the debt service equalization formula was accomplished in 2001. A new two-tiered equalization formula was created to target districts with low to moderate tax bases and/or districts with a relatively high debt burden.

Historical Perspective

- ⇒ Historically, facility acquisition and betterment was considered solely a local responsibility and no state aid equalization was provided. In 1992, a debt service equalization program was enacted. In 2001, a second tier was added to the debt service equalization formula to provide targeted tax relief to school districts with eligible debt service revenue exceeding 25% of district ANTC.
- ⇒ The graph below shows construction trends over the last eight calendar years. The top line on the graph is the total dollars proposed in that calendar year that received a positive review and comment. The bottom line is the dollar amount approved. The 1999 growth indicated in the table in the approved amount can be attributed to a) a few districts receiving voter approval for large bond issues; b) greater participation in the alternative facilities program; and c) projects funded with a lease levy (lease with an option to purchase). The upward trend in authorized construction project dollars is expected to continue due to a backlog of unmet needs and the higher level of state equalization aid.

⇒

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: DEBT SERVICE EQUALIZATION

Narrative

The change to the two-tiered debt service equalization formula has led to a noticeable increase in bond issue size. Much of this can be ascribed to the new equalization formula in combination with a less generous equalization factor for the health and safety aid program. These two factors provide incentives for districts to seek voter approval for a majority of facility needs in order to maximize debt service aid.

Activity Funding

Revenue Components

Required Debt Service Levy (M.S. 123B.55; 475.61).

- ⇒ A school district must levy for the principal and interest payments on its general obligation bonds, plus an additional 5% to cover potential tax delinquencies, for the following fiscal year. The required debt service levy for all years is established and approved by the local school board at the time that bonds are sold.

Maximum Effort Debt Service Levy (applies to Capital Loan Districts) (M.S. 126C.63, Subd. 8).

- ⇒ Districts with an outstanding state capital loan and/or debt service loan must levy for debt service a minimum of 32% or 40% of the latest ANTC (the 40% of ANTC applies only to capital loans issued after 2001, all others are 32%). This amount is referred to as a district's maximum effort.
- ⇒ The maximum effort debt service levy cannot exceed the amount beyond the required debt service levy that is needed to retire all outstanding state loans. If the maximum effort debt service levy is greater than the required debt service levy, then the difference is included in computing debt service aid.
- ⇒ If, after debt service aid is subtracted, the net eligible debt service levy is less than the maximum effort debt service levy, there is an additional maximum effort debt service levy, such that the net eligible debt service levy is not less than maximum effort debt service levy. The additional maximum effort debt service levy is not included in computing debt service equalization aid.

Required Debt Service Levy for Equipment (M.S. 123B.61).

- ⇒ A school district, with the approval of the commissioner and without voter approval, may issue certificates of indebtedness or capital notes to purchase capital equipment. The certificates or notes must be repaid within five years or less.
- ⇒ A school district must annually levy the amount needed to retire the certificates of indebtedness or capital notes. The district's general education fund levy is correspondingly reduced by the same amount. As an end result, districts do not receive additional revenue to repay these obligations.

Required Debt Service Levy for Facilities (M.S. 123B.62).

- ⇒ A school district, with the approval of the commissioner and without voter approval, may issue bonds to provide funds for capital improvements to facilities.
- ⇒ A school district must annually levy the amount needed to retire the facility bond or note. The district's general education levy is correspondingly reduced by the same amount. As an end result, districts do not receive additional revenue to repay these obligations.

Alternative Facilities Bonding and Levy (M.S. 123B.59, Subd. 1).

- ⇒ Large school districts with over 1,850,000 square feet of space and an average building age of 15 years or older, or over 1,500,000 square feet of space and an average building age of 35 years or older, and a 10-year facility plan approved by the commissioner, may issue bonds or annually levy for health and safety, disabled access, and deferred maintenance projects specified in the approved plan.
- ⇒ Debt Service levies made under this program are included in the computation of debt service equalization aid.
- ⇒ See the alternative facilities narrative for more information.

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: DEBT SERVICE EQUALIZATION

Narrative

Energy Conservation (M.S. 126C.40, Subd. 5).

- ⇒ School districts must levy for the amount needed to repay the annual principal and interest on state energy conservation loans and other loans approved on or before 03-01-98 under M.S. 216C.37. This levy is included in computing debt service equalization aid.
- ⇒ There is no levy authority for energy conservation loans approved after 03-01-98. Districts receiving these loans must annually transfer from the general fund to the debt redemption fund the amount needed to pay the principal and interest on the loans.

Lease Purchase (M.S. 126C.40, Subd. 2, Laws 1995, First Special Session, Ch. 3, Art. 5, Sec. 9).

- ⇒ Eligible school districts must levy the amount needed for payments on lease purchase agreements approved by the commissioner prior to 07-01-90. In addition, certain districts with a desegregation plan, may levy for lease purchase costs for more recent facility acquisitions. This levy is included in computing debt service equalization aid.
- ⇒ Selected districts have specific lease purchase levy authority that is ineligible for debt service equalization. Districts 622, 833, and 834 levy for the acquisition of the Valley Crossing Elementary School in Woodbury. District 622 has special legislation for a lease purchase levy.

Debt Excess (M.S. 475.61, Subd. 3).

- ⇒ The net debt excess in the debt redemption fund, other than for capital loan districts, is certified by the commissioner to the county auditor. The county auditor reduces the debt service levy by the amount of the debt excess certified.
- ⇒ With the approval of the commissioner, some districts may be authorized to retain all or a portion of the debt excess in the debt redemption fund.
- ⇒ Districts with outstanding capital or debt service loans are required to remit the debt excess amount to the commissioner as payment on their capital and/or debt service loans.

Debt Service Loan (M.S. 126C.68).

- ⇒ School districts with a very large debt service levy relative to their tax base may qualify for a debt service loan. The amount of the loan reduces the debt service levy of the district.
- ⇒ Districts receiving a debt service loan are required to levy each year an amount at least equal to the maximum effort debt service levy until the loan is retired.

Gross Equalization Revenue (M.S. 123B.53, Subd. 1).

- ⇒ For districts without capital loans, the gross equalization revenue equals the sum of the following.
 - ◆ the eligible required debt service levy
 - ◆ the gross annual (pay as you go) alternative facilities levy
 - ◆ the energy conservation levy
 - ◆ the eligible lease purchase levy
- ⇒ For capital loan districts the maximum effort debt service levy applies in addition to the components mentioned above.

Funding Source

Debt Service Equalization Revenue (M.S. 123B.53, Subd. 1).

- ⇒ A district's net debt service equalization revenue equals the gross equalization revenue from above, minus the district's local share (an amount equal to 15% of the district's ANTC).

Debt Service Equalization Aid (M.S. 123B.53, Subd. 1).

- ⇒ The current equalization formula has two different tiers of equalization. Prior to reaching the first tier, a district must levy 15% of its ANTC. The first tier is defined as 15%-25% of ANTC and the second tier as anything above 25% of ANTC.

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: DEBT SERVICE EQUALIZATION

Narrative

- ⇒ Once the eligible debt service revenue by tier has been determined, the equalization factors are applied to each tier. The first tier equalization factor is \$3,200 and the second tier equalization factor is \$8,000.
- ⇒ The equalization formula incorporates the equalization factors and is used to determine the levy ratio (or percentage) of eligible revenue in each tier to be paid by local taxpayers. The remaining percentage is paid by state aid. The formula is:

$$\frac{\text{Adjusted Net Tax Capacity}}{\text{Adjusted Pupil Units}}$$

Equalizing Factor (\$3,200 for Tier 1, \$8,000 for Tier 2)

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: ALTERNATIVE FACILITIES BONDING

Narrative

Activity Description

Citation: M.S. 123B.59

The Alternative Facilities program is a state aid and local levy program that enables large school districts to complete deferred maintenance, health and safety and disabled accessibility projects that cannot be completed with other available funds. Alternative facilities revenue may not be used for the construction of new facilities or the purchase of portable classrooms. Voter approval is not required.

Activity at a Glance

| | |
|--------------------------------|---------------|
| ◆ Number of Eligible Districts | 15 |
| ◆ Minimum Sq. Ft. Required | 1.5 million |
| ◆ Average District Revenue | \$4.4 million |

Population Served

School districts qualifying for the program are able to prevent deterioration of school facilities by performing maintenance.

The following districts are currently eligible and participating in the program. Districts that have issued debt under the program are designated with a number one (1). Districts making an annual pay-as-you-go levy are designated with a number two (2). In addition, districts marked with an asterisks (*) below, receive aid based upon their Payable 1997 levy for bonded alternative facility debt and/or aid based upon one-sixth of their Payable 1998 pay-as-you-go levy.

| | | | |
|---------------------------------|-----------------------------|-------------------------|-----------------------------|
| Anoka-Hennepin ^{2*} | Bloomington ^{1 2*} | Burnsville ² | Duluth ^{1 2*} |
| Minneapolis ^{1*} | North St. Paul ¹ | Osseo ² | Robbinsdale ^{1 2*} |
| Rochester ^{1 2*} | Rosemount ^{1 2} | St. Cloud ² | St. Paul ^{1*} |
| South Washington ^{1 2} | Stillwater ¹ | White Bear Lake | |

Districts must meet one of the following criteria:

- ◆ have at least 1.85 million square feet of space and an average building age of at least 15 years; or
- ◆ have at least 1.5 million square feet of building space and average building age of at least 35 years.

Stillwater has received special legislation allowing the district to participate in this program. FY 2004 will be the first year of participation for White Bear Lake.

Services Provided

To receive alternative bonding revenue, districts must submit a 10-year facility plan to the Department of Children, Families and Learning (CFL) for approval. The plan must describe eligible projects and the district's timetable for undertaking them. Once CFL approval is obtained, the district must decide if it will:

- ◆ issue bonds to finance improvements and retire them over time with a debt service levy,
- ◆ make an annual general fund (pay-as-you go) levy to fund projects on an annual basis, or
- ◆ some combination of these two options.

This program is funded by a combination of state aid and local property tax levies. Debt service levies under this program qualify for debt service equalization.

Historical Perspective

- ⇒ The program was originally enacted by the 1993 legislature. Initially, districts were allowed to apply their health and safety revenue alternatively toward facilities maintenance, health and safety, and disabled access projects.
- ⇒ For FY 1995, eligible districts were allowed to issue bonds and levy for debt service or make an annual pay-as-you-go levy up to the amount of their health and safety revenue for FY 1993.
- ⇒ The 1997 legislature authorized state funding equal to 100% of the districts annual alternative bonding debt service costs, not to exceed the amount of the debt service levy for taxes payable in 1997.

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: ALTERNATIVE FACILITIES BONDING

Narrative

- ⇒ The 1998 legislature authorized state funding for districts making an annual pay-as-you-go levy equal to one-sixth of the levy for taxes payable in 1998.
- ⇒ The White Bear Lake School District was added to the list of eligible districts as a result of 2001 legislative action that includes districts with 1.5 million square feet or more and a building age of at least 35 years.

Key Measures

The alternative facilities program enables districts to complete necessary facilities maintenance in a timely manner without the need for voter approval. The program facilitates a long-term approach to building upkeep and is intended to promote cost-effective scheduling of needed repairs.

Activity Funding

District revenue is determined by local school boards. Local decisions are impacted by building conditions, financial condition of the district, and local property tax impact.

A district's alternative facilities aid is the sum of:

- ◆ 100% of the district's annual debt service costs, not to exceed the amount certified to be levied for those purposes for taxes payable in 1997; and
- ◆ one-sixth of the annual pay-as-you-go levy certified for taxes payable in 1998, not to exceed 100% of the current annual levy.

The table below shows the breakdown of total alternative facility aid and levy by fiscal year. Note that the total alternative facility aid includes two components, general alternative facility aid and debt aid on bonded alternative facility debt levy. The general fund alternative facilities levy is reduced for debt service equalization aid.

Alternative Facilities Revenue

Alternative facilities aid is a reduction to debt service equalization revenue. The levies associated with the alternative facilities program are included in debt service equalization revenue.

CHILDREN, FAMILIES, & LEARNING

Program: **FACILITIES & TECHNOLOGY**

Activity: **MISCELLANEOUS FACILITIES LEVIES**

Narrative

Activity Description

Citation: See individual levies.

This budget activity summarizes six building and land lease/levy programs. The building and land lease levies provide districts with the opportunity to accommodate short-term needs for additional space. The other miscellaneous programs provide districts with levy authority to maintain and enhance the condition of their school buildings. These programs foster the delivery of quality educational services by providing districts with flexible local revenue sources to accommodate changing facility needs.

Population Served

All students in participating districts are served by these programs. Only eligible districts with levy authority may participate in these programs.

Services Provided

Minnesota school districts will generate additional revenue to the extent needed for various capital expenditure obligations. These programs are funded by local property tax levies.

Activity at a Glance

| In FY 2003: | | (\$ in Millions) |
|--------------------------------------|----------------|------------------|
| Program Name | # of Districts | Amount Levied |
| ◆ Building/Land Lease | 190 | \$39.3 |
| ◆ Building Construction Down Payment | 8 | \$7.2 |
| ◆ Cooperative Building Repair | 0 | 0.0 |
| ◆ Disabled Access | 16 | \$1.1 |
| ◆ Technology | 0 | 0.0 |
| ◆ Special Legislation | 3 | \$0.4 |

- ⇒ **Building and Land Lease** (M.S. 126C.40, subd.1). Districts may levy to rent or lease a building or land for instructional purposes, school storage, or furniture repair if the district determines that the total operating capital revenue authorized under section M.S. 126C.10, subd. 13, is insufficient for this purpose. The levy authority and amount must be approved by the commissioner, and cannot exceed \$100 per weighted resident average daily membership (WADM) unless approved by the commissioner. Some building additions to existing schools are funded with proceeds from this levy. Member districts may levy an amount up to \$25 per adjusted marginal cost pupil units (AMCPU) for the cost of an intermediate district lease for these same purposes.
- ⇒ **Building Construction Down Payment** (M.S. 123B.63). A school district may levy the tax rate approved by a majority of the voters on the question of providing funds for a down payment for an approved building construction project. All proceeds from the levy must be transferred to the down payment account in the building construction fund. This program has been used primarily for deferred maintenance and technology improvements to existing facilities.
- ⇒ **Cooperative Building Repair** (M.S. 126C.40, subd. 3). A school district that has a cooperative agreement according to M.S. 123A.30 or 123A.32, subd. 1 may levy for the repair costs, as approved by the Department of Children, Families and Learning, of a building located in another district that is a party to the agreement.
- ⇒ **Disabled Access Levy** (M.S. 123B.58). The 1990 federal Americans with Disabilities Act (ADA) facilitates the removal of architectural barriers for persons with disabilities in public schools and enables school districts to modify school buildings based on inspection by the State Fire Marshal. A school district may levy up to \$300,000 over a time period not to exceed eight years to provide disabled accessibility for all facilities. Some newly consolidated districts have maximum levy authority of \$450,000 or \$600,000. The commissioner must approve the levy amount. For most districts, the eight year time period has expired.
- ⇒ **Technology Levy** (Laws 1996, Ch. 412, Art. 12, Sec. 12). The Minneapolis School District was selected to pilot a Technology Incentives Program allowing the district to purchase computers through a lease purchase agreement for exclusive use by ninth grade students in selected school sites. The district could levy up to 1/4 the cost of the lease purchase agreement each year for four years. This levy expired for taxes payable in 2002.
- ⇒ **Special Legislation**. (Citations for FY 2003: ISD 181, ISD 204, ISD 319) Special legislation provides selected districts with additional capital revenue for specific purposes.

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: FEDERAL TECHNOLOGY PROGRAMS

Narrative

Activity Description

Citation: Elementary and Secondary Education Act, Title II, Part D

P.L. 107-110, the No Child Left Behind Act of 2001

<http://www.ed.gov/offices/OESE/asst.html#leg>

The purpose of the federal Enhancing Education Through Technology program is to promote initiatives that assist schools in effectively integrating technology with curriculum to improve student achievement and to provide staff development for teachers in the use of technology as a tool for instruction.

Activity at a Glance

Promotes the effective integration of technology as a tool for instruction. Promotes increased academic achievement for students.

- ◆ \$6.5 million appropriated in federal fiscal year 2003.
- ◆ Funding allocation via formula to all school districts and charter schools.
- ◆ \$3.1 million in competitive grant awards each year.

Population Served

All students attending public schools receiving federal Title I funding are served by this program.

Services Provided

The Enhancing Education Through Technology program provides funding to states that is intended to support the integration of technology with education to improve student achievement. The Department of Children, Families & Learning (CFL) administers this program designed to

- ◆ provide teachers, principals and administrators with the capacity to integrate technology effectively with curriculum that is aligned with the Minnesota Graduation Standards and student achievement standards;
- ◆ enhance professional development for teachers, principals, and administrators through initiatives that increase the knowledge, skills, and abilities of teachers in using technology as a tool for instruction;
- ◆ promote statewide implementation of a comprehensive system that effectively uses technology in schools to improve student academic achievement;
- ◆ support networks and other innovative delivery methods to provide specialized or rigorous academic courses for students in areas that would not otherwise have access to these types of educational opportunities such as distance learning technologies and other innovative delivery methods;
- ◆ provide for rigorous evaluation of programs funded, particularly the impact of these programs on academic achievement;
- ◆ support classroom, school, and school district based projects that focus on the integration of technology with curriculum to promote academic achievement;
- ◆ support local efforts to use technology to promote family involvement in education and communication among teachers, administrators, students, parents, community; and
- ◆ support infrastructure upgrades for school districts in need of equipment and peripheral replacements, enhancements, and upgrades.

Historical Perspective

Federal technology funding was provided each year through the former Technology Literacy Challenge Fund Grant Program (TLCF) that was awarded to school districts through a competitive grant process. The TLCF program was discontinued and replaced by the Enhancing Education Through Technology program by Congress in 2002. Funded through federal dollars, the new Enhancing Education Through Technology program under the No Child Left Behind Act is in the first year of authorization in FY 2002.

Key Measures

The primary goal of this program is to improve student academic achievement through the use of technology in elementary schools and secondary schools. Additional goals of this program are:

- ◆ to assist every student in crossing the digital divide by ensuring that every student is technologically literate by the time the student finishes the eighth grade, regardless of the student's race, ethnicity, gender, family income, geographical location, or disability; and

CHILDREN, FAMILIES, & LEARNING

Program: FACILITIES & TECHNOLOGY

Activity: FEDERAL TECHNOLOGY PROGRAMS

Narrative

- ◆ to encourage the effective integration of technology resources and systems with teacher training and curriculum development to establish research-based instructional methods that can be widely implemented as best practices by state and local educational agencies.

As part of the statewide assessment of this program, CFL must

- ◆ assess and determine methods for measuring the level of integration of technology within school districts and establish a relationship to how the level of technology integration impacts student achievement; and
- ◆ complete an updated statewide plan for technology in K-12 education. This will address areas of technology impacts on education in teaching and learning, educator preparation and professional development, school administration, and school district technology infrastructure. The state plan is expected to be completed by early 2003.

Activity Funding

Funding of federal Enhancing Education Through Technology is dependent upon Congressional action relating to continued operation and funding of the program. The state will receive further allocations of similar amounts based on statewide Title I shares in FY 2004 and FY 2005, depending on Congressional action.

The funding is to be distributed to school districts on a 50/50 basis, with 50% of the funding to be distributed to school districts through a formula distribution based on Title I shares, and the remaining 50% to be distributed through grant competitions.

Grant competitions will be periodically conducted and requests for project proposals will focus on the initiatives outlined above. Priority in competitions must be given to school districts that have schools identified as needing improvement, schools that have a high percentage of families living below the poverty line, and school districts that do not generate sufficient funding under the formula portion of the program to effectively deploy technology. Grant awards will be determined by volunteer panels composed of educators, administrators, higher education representatives, and business leaders. It is anticipated that approximately 10-15 grant awards will be made each year.

The formula funding section of the program will provide approximately \$3.1 million in allocations to school districts. Grant competitions will distribute approximately \$3.1 million in funding based on award limitations to be determined by CFL based on federal guidelines for the program. Five percent of the total allocation to Minnesota is retained at the state level to administer the program and foster statewide technology initiatives for all school districts.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES, & LEARNING

Program: NUTRITION PROGRAMS

Activity: SCHOOL LUNCH

Narrative

Activity Description

Citation: M.S. 124D.111; 124D.118

Federal Authorizations: National School Lunch Act, Child Nutrition Act

This budget activity includes federal and state lunch and milk programs. The National School Lunch Program (NSLP) and Food Distribution Program (FDP) safeguard the health and well being of Minnesota children and help ensure that students are ready to learn by giving them access to a nutritious lunch and improving eating habits through nutrition education. The After-School Snack component of the NSLP gives students in after-school programs access to a nutritious snack.

State school lunch funding helps to keep lunch prices affordable. Children from low-income families have access to free or reduced-price school meals.

The federal Special Milk Program (SMP) provides access to milk, an important source of nutrients including calcium, for students who do not have access to school meals (usually kindergarten or pre-kindergarten students). The Minnesota Kindergarten Milk Program (MKMP) provides state funds for kindergarten milk breaks.

Population Served

Students (pre-kindergarten through high school) in public schools, nonpublic schools, and residential childcare institutions such as group homes and juvenile correctional facilities are served.

Services Provided

Student health and learning readiness are improved through daily access to a nutritious school lunch. Students in after-school care programs receive access to a nutritious snack. Students without access to school meals, typically pre-kindergarten or kindergarten students, may receive milk at either no charge or at a nominal charge.

School lunch menus are planned according to federal guidelines. Commodities such as meat, cheese, poultry, fruits, and vegetables are donated by the United State Department of Agriculture (USDA) to contribute to the school lunch menu and support the American farmer.

Students from families with income under 185% of federal poverty guidelines receive free or reduced-price meals. Many low-income families are electronically certified for free or reduced-price meals based on household data from state agencies, eliminating the need for a paper application.

School lunch and milk programs are supported financially and administratively through:

- ◆ federal and state reimbursements for lunches, after-school snacks, and servings of milk that meet guidelines;
- ◆ surveys of school preferences for USDA commodities;
- ◆ notification to schools of students electronically certified for meal benefits, through statewide matching of student enrollment data and human services assistance data;
- ◆ assistance in meeting program requirements and improving the quality of the food service through administrative reviews, development of resource materials, workshops, and technical assistance; and
- ◆ "CLiCS," the Food and Nutrition Service interactive web site, which allows schools to meet their application, commodity, and claim requirements online and offers immediate access to program resources.

For more information access the following web sites

School Nutrition Programs 2001 Annual Report – "Meals for Learning"

School Lunch Fact Sheet

"Focus on the Future: What Eating at School Should Look Like" (A Student Perspective)

Activity at a Glance

In 2001:

- ◆ All public schools participated in school lunch.
- ◆ Sixty percent of enrolled students participated in school lunch.
- ◆ 93 million school lunches were served, one-half million each school day.
- ◆ One-third of school lunches were served free or at a reduced price to qualifying students.

Historical Perspective

The National School Lunch Act created the program in 1946 to improve the national defense in response to young recruits failing physical exams during World War II. By school year 2000-01, 93 million school lunches were being served at 2,000 schools.

Key Measures

- ⇒ Increase the number of school districts that have school policies in place to support a healthy school nutrition environment by 20% through training and technical assistance to local school administrators.
- ⇒ Increase by 50% the percentage of students determined eligible for free and reduced-price meals through the electronic certification process (compared to the number determined eligible with paper applications) by using additional sources of household data from state agencies.

Paper Applications vs. Electronic Certification - 2001

- ⇒ Increase the number of elementary schools participating in Fitness Fever, a program that promotes a combination of healthy food choices and physical activity, from 755 to 797 by 2003.

Number of Minnesota Schools Participating in Fitness Fever

CHILDREN, FAMILIES, & LEARNING

Program: NUTRITION PROGRAMS

Activity: SCHOOL LUNCH

Narrative

Activity Funding

State funding is required to provide matching funds to participate in the National School Lunch Program. The funding provided by the state in FY 2001 allowed the school districts to receive over \$70 million in federal reimbursement for school lunch programs. Under current law, the state must pay districts participating in the national school lunch program the amount of eight cents for each full paid, reduced, and free student lunch served to students in the district. A portion of the state funding is paid to districts for milk served to kindergarten students.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: NUTRITION PROGRAMS

Activity: SCHOOL BREAKFAST

Narrative

Activity Description

Citation: 124D.115; 124D.1156; 124D.117

Federal Authorization: National School Lunch Act, Child Nutrition Act

Federal and state School Breakfast Programs help ensure that students are healthy and ready to learn by giving them access to a nutritious breakfast at the start of the school day.

- ⇒ Any school may participate in the School Breakfast Program.
- ⇒ Elementary schools in low-income areas that agree to reduce school breakfast barriers such as social stigma, lack of facilities and transportation may receive additional state funding through the Fast Break to Learning breakfast program so that school breakfast can be available to all students at no charge.
- ⇒ State law requires schools to offer a breakfast program if 33% or more school lunches are served free or at reduced price.

Activity at a Glance

In 2001:

- ◆ 1,300 schools offered nutritious breakfasts through the School Breakfast Program. Two out of three schools that offer school lunch also offer school breakfast.
- ◆ Over 300 of these schools participated in the Fast Break to Learning breakfast program.
- ◆ Breakfast participation averaged 54% at Fast Break to Learning schools, compared to 10% at schools offering the regular breakfast program.

Population Served

Students (pre-kindergarten through high school) in public schools, nonpublic schools, and residential child care institutions such as group homes and juvenile correctional facilities are served.

Services Provided

Student health and achievement are improved through daily access to a nutritious school breakfast.

- ⇒ School breakfast menus are planned according to federal guidelines.
- ⇒ Students from families with incomes under 185% of federal poverty guidelines receive free or reduced-price meals, either upon being electronically certified based on household data from state agencies or upon the household completing an application on paper.
- ⇒ At elementary schools that participate in the Fast Break to Learning breakfast program, breakfast is available at no charge to all students.

School Breakfast Programs are supported financially and administratively through

- ◆ federal and state reimbursements for school breakfasts that meet guidelines;
- ◆ payment of additional state funds to Fast Break to Learning elementary schools so that all breakfasts may be served at no charge to all students;
- ◆ United States Department of Agriculture (USDA) commodity food items (earned through participation in the National School Lunch Program) available for use in school breakfasts;
- ◆ assistance in meeting program requirements and enhancing the quality of the food service provided through administrative reviews, development of resource materials, presentation of workshops, and technical assistance; and
- ◆ "CLiCS," the Food and Nutrition Service interactive web site, which allows schools to meet their application and claims requirements online and provides immediate access to program resources.

School Nutrition Programs Annual Report – "Meals for Learning"

School Breakfast Program Fact Sheet

CHILDREN, FAMILIES, & LEARNING

Program: NUTRITION PROGRAMS

Activity: SCHOOL BREAKFAST

Narrative

Historical Perspective

The federal School Breakfast Program began in 1966 with a focus on improving the health and school performance of low-income children. State funding began in 1993 with a per-breakfast rate of 5.1 cents.

The Fast Break to Learning breakfast program, established in 1999, provides additional state funding to assist elementary schools in low-income areas to provide breakfast access to all students at no charge, and reduce traditional barriers to school breakfast participation such as social stigma, facilities, and transportation. Elementary schools are eligible if at least 33% of school lunches have been served to students eligible for free or reduced price school meals.

Key Measures

⇒ Increase overall performance on the reading, writing, and math portions of the MCA at Fast Break to Learning schools by 4% per year.

Increase in Percent of Students Achieving at Level II or Above at Fast Break to Learning Schools (Between FY 2000 and FY 2001)

⇒ Increase the participation rate at Fast Break to Learning schools from 54% in FY 2001 to 60% by FY 2004.

⇒ Increase the number of Minnesota schools offering a school breakfast program by 5% per year.

CHILDREN, FAMILIES, & LEARNING

Program: NUTRITION PROGRAMS

Activity: SCHOOL BREAKFAST

Narrative

Activity Funding

School Breakfast

"Severe need" schools, which serve at least 40% free and reduced price school meals, qualify for the highest rates of federal reimbursement. Each school year, the state reimburses schools for the amount of 5.1 cents for each fully paid breakfast and for each free and reduced price breakfast not eligible for the "severe need" rate. In addition, each school year the state must reimburse schools 10.5 cents for each free and reduced breakfast served at school that had free/reduced price meal participation above 33% but not high enough to qualify for federal "severe need" reimbursement.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Fast Break to Learning

Each school year, the state reimburses schools for the difference between the per meal federal rate of reimbursement and the per meal state average cost. Meals that are reimbursed at a federal rate that is equal to or higher than the state average cost do not qualify for fast break to learning funds.

CHILDREN, FAMILIES, & LEARNING

Program: NUTRITION PROGRAMS

Activity: COMMUNITY NUTRITION PROGRAMS

Narrative

Activity Description

Citation: 124D.119

Federal Authorization: Child Nutrition Act and National School Lunch Act

Community Nutrition Programs safeguard the health and well-being of Minnesotans year-round by helping to ensure that young children and older adults receiving organized care services have access to a nutritious diet and improve their eating habits.

Summer Food Service Program (SFSP)

SFSP provides access to nutritious meals to children in low-income areas during the summer when school meals are not available. Most SFSP sites provide one or two meals per day, but may provide up to three meals a day. The annual state share of funding is \$150,000.

Child and Adult Care Food Program (CACFP)

CACFP provides nutritious meals at family child care homes, child care centers, school-age care sites, emergency shelters, and adult day care centers. After-school programs in low-income areas that provide educational or enrichment activities participate in the After School Snack component of the CACFP. The federal government provides all funding for the CACFP. Federal funding has increased at a rate of approximately 2% per year since 1998.

Population Served

SFSP primarily serves children who participate in organized summer programs at park and community sites and schools in areas where at least 50% of families have income within 185% of federal poverty guidelines. SFSP sponsors include public and private schools, residential summer camps, government units, colleges and universities, as well as nonprofit organizations.

CACFP serves 1) children in licensed child care centers and licensed family child care homes, 2) children attending after-school enrichment programs in areas where at least 50% of families have income within 185% of federal poverty guidelines, and 3) adults in licensed adult day care centers.

Services Provided

Health is improved through access to healthy meals and snacks.

- ⇒ Menus for healthy meals and snacks are planned according to federal guidelines.
- ⇒ Meals and snacks are provided at no charge to children in low-income areas through the SFSP. Most CACFP locations provide meals and snacks at no charge to all enrolled children.

Community Nutrition Programs are supported through

- ◆ federal and state reimbursements for meals and snacks that meet guidelines;
- ◆ federal administrative reimbursements to SFSP sponsors and CACFP sponsors of family child care homes;
- ◆ assistance in meeting program requirements and improving the quality of the food service through administrative reviews, development of resource materials, workshops, and technical assistance; and
- ◆ "CLiCS," the Food and Nutrition Service interactive web site, which allows sponsoring organizations to meet their application and claims requirements online and provides immediate access to program resources.

More information on Community Nutrition Programs:

Community Nutrition Programs Annual Report

Child and Adult Care Food Program Fact Sheet

Summer Food Service Program Fact Sheet

Activity at a Glance

- ◆ Over 11,000 family child care homes, over 400 child care centers, and 32 adult care centers participate in the CACFP.
- ◆ 121,000 children in child care receive meals supported by the CACFP. In a typical month, 5.6 million meals and snacks are served.
- ◆ In July 2001, 51 summer food sponsors of the SFSP served over 31,000 children per day at 394 sites.

CHILDREN, FAMILIES, & LEARNING

Program: **NUTRITION PROGRAMS**

Activity: **COMMUNITY NUTRITION PROGRAMS**

Narrative

Historical Perspective

The CACFP was initiated with the federal Child Nutrition Act of 1966. Participation of adult day care centers was added in 1989. After federal welfare reform in 1996, family child care homes were reduced by \$1.5 million per month, resulting in reduced participation in CACFP.

Key Measures

⇒ Maintain the number of family child care providers participating in the Child and Adult Care Food Program at over 11,000 family child care homes through outreach to new providers.

Family Care Providers Participating in CACFP

⇒ Increase the number of Summer Food Service Program sites by 5% through streamlining application and program requirements for sites.

Summer Program Increases 1990 - 2001

Activity Funding

Summer Food Service Program: Federal funds provide 96% of total funding and increase approximately 2% each year. In response to cuts in federal funding due to welfare reform in 1997, annual state replacement aid of \$150,000 was appropriated to maintain healthy meals during the summer.

Child and Adult Care Food Program: Participation of adult day care centers was added in 1989. A two-tier reimbursement system was instituted for family child care providers under federal welfare reform legislation in 1996. As a result, Minnesota lost about \$1.5 million per month in federal reimbursements for meals served to children since 1997.

CHILDREN, FAMILIES, & LEARNING

Program: LIBRARIES

Activity: BASIC SUPPORT

Narrative

Activity Description

Citation: M.S. 134.31; 134.32; 134.34; 134.35; 134.47

Library Basic Support provides state aid to public libraries for operations, interlibrary programs, and services.

Library Telecommunications Aid provides state aid to public libraries for data and video access costs, related costs to improve or maintain electronic access, and connect the library system with the state information infrastructure.

Population Served

This activity serves Minnesota citizens through 12 regional library systems. Participation in regional public library systems includes all Minnesota counties and serves 99.49% of the state's population. These systems are 1) Arrowhead Library System, 2) East Central Regional Library, 3) Great River Regional Library, 4) Kitchigami Regional Library, 5) Lake Agassiz Regional Library, 6) Metropolitan Library Service Agency, 7) Northwest Regional Library, 8) Pioneerland Library System, 9) Plum Creek Library System, 10) Southeastern Libraries Cooperating, 11) Traverse des Sioux Library System, and 12) Viking Library System.

Activity at a Glance

- ◆ 360 libraries are served through the program.
- ◆ In FY 2000, approximately 44 million items were loaned.
- ◆ In FY 2000, 22.2 million visits were made to a public library.
- ◆ In FY 2000, attendance at library-sponsored programs was 979,053.
- ◆ Approximately 5 million reference requests take place yearly.

Services Provided

The public makes heavy use of its libraries for self-sufficiency including financial and business decisions, education, self-development, and personal interests. This activity provides the following services to strengthen the ability of libraries across the state to continue excellent services to citizens:

- ◆ provides incentives for counties and cities to work together in regional public library systems extending service to all at the most reasonable cost;
- ◆ distributes funding between cooperating jurisdictions and encourages sharing the library materials within each region and statewide through library-to-library lending and reciprocal borrowing;
- ◆ maintains and improves the infrastructure for reading and lifelong learning through library programs, materials, and outreach to culturally diverse communities;
- ◆ strengthens library materials and media collections;
- ◆ supports automation, integration of new technologies and training, and community access to high-speed Internet links; and
- ◆ improves or maintains electronic access and connects the library system with the state information infrastructure administered by the department of administration.

Historical Perspective

State funding of regional public library systems is needed to ensure and raise the level of equitable library services across Minnesota. The telecommunications aid program began in 1996 to encourage interconnectivity and more equity of access. Previous legislation consolidated separate categorical grant funds for public libraries into this program beginning in FY 2000, which improved flexibility in the use of funds. Increases in funding have been due to the roll-in of categorical grant/aid programs into basic, including Regional Telecommunications Aid in FY 2004.

Key Measures

Quality library services are available for a Minnesotan of all ages.

- ⇒ The number of items loaned within public libraries increased 20.45% from 35 million in 1988 to 44 million in 2000.
- ⇒ Library to library requests filled within regional public library systems increased 61% from 152,000 in 1988 to 389,137 in 2000.

CHILDREN, FAMILIES, & LEARNING

Program: **LIBRARIES**

Activity: **BASIC SUPPORT**

Narrative

- ⇒ Minnesota's public libraries rank 13th among the states in per capita expenditures, 5th in the United States in public library lending per capita, and 4th in reference questions asked per capita.
- ⇒ Reciprocal borrowing across jurisdictional boundaries remains at high levels.

Activity Funding

The basic aid budget activity is funded with state aid distributed by a formula using population, area, equalized valuation of property, and a basic amount per system. The telecommunications aid budget activity is funded with state aid distributed on a pro-rated actual cost basis for system branches/members who meet the aid program criteria.

To qualify for basic aid, each participating city and county must meet a minimum level of support based on adjusted net tax capacity. The state appropriation is used to demonstrate state maintenance of effort in order to qualify for the one federal library program. Local, state, and federal funds are from public funds. The other sources of funds include foundation grants, gifts, and fundraising. The regional systems are required to apply for the federal E-rate discount program. The federal E-rate program provides discounts and/or reimbursements to assist eligible schools and libraries to obtain telecommunications and Internet access. The discounts or reimbursements depend on the level of poverty and the urban/rural status of the population served. The E-rate program is an unstable source of funding because funding is prorated based on demand. Costs by sites vary considerably across the state.

| Source | Dollar Amount | Per Capita |
|--------------|----------------------|----------------|
| Local | \$126,667,867 | \$25.75 |
| State | 12,821,584 | 2.61 |
| Federal | 1,099,636 | 0.22 |
| Other | 10,393,811 | 2.11 |
| TOTAL | \$150,982,898 | \$39.69 |

The state funding for Regional Telecommunications Aid was combined with the funding for Basic Aid beginning in FY 2004.

Activity: MULTICOUNTY MULTITYPE LIBRARY

Narrative

Activity Description

Citation: M.S. 134.351; 134.353; 134.354

The purpose of this state aid program is to improve library services to Minnesotans by fostering and supporting cooperation among libraries of all types.

Population Served

This activity serves the state of Minnesota through seven regional multicounty multitype library cooperation systems. Capacity-building and extending services through collaborative sharing of resources are the main strategies used. Currently, 1,236 members with almost 2,200 library outlets of all types in Minnesota work together. Only the very smallest and libraries not staffed do not participate.

Activity at a Glance

| | |
|---|-----------|
| ◆ Number of people served | 4,919,479 |
| ◆ Grants to seven multicounty multitype library cooperation systems | |
| ◆ FY 2003 Entitlement | \$903,000 |

Total participating library jurisdictions by system:

| | |
|--|-----|
| Central Minnesota Library Exchange | 287 |
| Metronet | 186 |
| North Country Library Cooperative | 82 |
| Northern Lights Library Network | 277 |
| Southcentral Minnesota Inter-Library Exchange | 99 |
| Southeast Library System | 108 |
| Southwest Multicounty Multitype Inter-Library Exchange | 197 |

Services Provided

This program supports the following services to improve library services.

- ⇒ Assists the development and implementation of strategic plans that address the needs of the region with the available library and information resources
- ⇒ Provides communication systems among participating libraries.
- ⇒ Operates and improves delivery services to facilitate sharing material and information among participating libraries.
- ⇒ Assists the development and uses of linked databases that support information sharing and exchange.
- ⇒ Helps with the organization and promotion of opportunities for continued staff development and expertise in new technologies and other services for the public.

Historical Perspective

Seven multicounty multitype library cooperation systems have been in existence since 1980. They are, 1) Central Minnesota Libraries Exchange, 2) North Country Library Cooperative, 3) Southcentral Minnesota Interlibrary Exchange, 4) Southwest Area Multicounty Multitype Interlibrary Exchange, 5) Metronet, 6) Northern Lights Library Network, and 7) Southeast Library System.

Key Measures

Quality library services are available for all Minnesotans of all ages

Existing funding does not allow all systems to do all the same things to an equal extent and as a result each system pursues priorities important to its members. Based upon their strategic plans, each system reports on goals accomplished on annual basis.

The following are examples of priorities of specific systems in FY 2000.

- ⇒ The Central Minnesota Libraries Exchange spent almost \$40,000 (35.6% of its budget) to fill 7,663 requests for materials and information.
- ⇒ Metronet spent \$17,469 (9.7% of its budget) to expand access to online bibliographic databases by metro area residents.

CHILDREN, FAMILIES, & LEARNING

Program: LIBRARIES

Activity: MULTICOUNTY MULTITYPE LIBRARY

Narrative

- ⇒ North Country Library Cooperative spent \$32,950 (25.5% of its budget) for resource sharing including underwriting 9,108 requests for information and materials through the Reference and Referral Center in Duluth.
- ⇒ Northern Lights Library Network spent \$25,293 (16.7% of its budget) to support its participation in a statewide multicounty multitype cooperation systems' project to establish and maintain an online statewide library directory.
- ⇒ Southwest Area Multicounty Multitype Interlibrary Exchange spent \$23,171 (20% of its budget) for resource sharing, including funding training and searching costs to increase access to online bibliographic databases.
- ⇒ Southeast Library System spent \$10,191 (9.3% of its budget) to underwrite a portion of operational costs to enable 23 school districts and 40 schools to have library materials delivered 2-3 times a week to meet student research needs.
- ⇒ Southcentral Minnesota Inter-Library Exchange spent \$21,227 (21.8% of its budget) to load bibliographic records from four school districts (232,136 records) and two history centers (1,444 records) to the Traverse des Sioux Library System's online catalog.

Activity Funding

A formula established by rule sets operating grant awards that allocate 60% of available funds equally among the systems, 20% of available funds in an equal amount per capita, and 20% of available funds in an equal amount per square mile. This aid program is supported totally with state funds.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Contact

Additional Information is available from the Minnesota Department of Children, Families & Learning, Information Technology/Library Development and Services Division, (651) 582-8881.

Program: LIBRARIES

Activity: FEDERAL LIBRARY PROGRAMS

Narrative

Activity Description

Citation: 20 US Code 9121-963

The purpose of the federal Library Services and Technology Act (LSTA) program is to improve services to targeted underserved populations and to build electronic linkages and networks that support library services.

Activity at a Glance

- ◆ Number of FY 2002 grant projects 57
- ◆ Population served 4,919,479
- ◆ Grants range in size from \$5,000 - \$650,000

Population Served

This activity serves the library community statewide to include all types of libraries. Enhancement or increased capacity in programs impact all residents of Minnesota.

Services Provided

The state plan for use of federal funds provides for carrying out state goals and priorities within the following federal purposes:

- ◆ to consolidate federal library programs;
- ◆ to stimulate excellence and promote access to learning and information resources in all types of libraries for individuals of all ages;
- ◆ to promote library services that provide all users access to information throughout state, regional, national and international electronic networks;
- ◆ to provide linkages among and between libraries;
- ◆ to promote targeted library services to people of diverse geographic, cultural, and socioeconomic backgrounds, to individuals with disabilities, and to people with limited functional literacy or information skills; and
- ◆ to electronically link libraries with educational, social, or information services.

The program requires a state plan for library services to include a plan for LSTA and goals to carry out the federal purposes. The state uses LSTA funds to carry out enhancement programs and capacity-building components in the Minnesota five-year LSTA state plan.

All libraries, which meet the criteria for the program, are eligible applicants. The state library agency can fund statewide library initiatives with federal LSTA dollars. Up to a maximum of 4% of the appropriation can be used annually for administration purposes at the state level.

Historical Perspective

Federal grants awarded by the state to eligible libraries under the previous five-year LSTA Plan (by state fiscal years).

CHILDREN, FAMILIES, & LEARNING

Program: LIBRARIES

Activity: FEDERAL LIBRARY PROGRAMS

Narrative

Goals and activities established under the first Minnesota LSTA Plan, 1998-2002.

- ⇒ Goal 1 – All types of libraries will be electronically linked for providing information.
- ⇒ Goal 2 – Minnesotans will have access to specialized resources because of partnerships between libraries and community agencies and organizations.
- ⇒ Goal 3 – Minnesotans will have access to full-text databases and other electronic resources.
- ⇒ Goal 4a – Minnesota library community will demonstrate leadership and partnerships to make maximum use of library resources to serve the information needs of Minnesotans.
- ⇒ Goal 4b – Library resources will be shared via effective and efficient systems for interlibrary request and delivery to serve the information needs of Minnesotans.
- ⇒ Goal 5 – Strengthen services to children and adults through better coordination between schools and public libraries.
- ⇒ Goal 6 – Increase public's understanding of libraries' shared activities, services and resources among libraries.
- ⇒ Goal 7 – Develop quality library service equitably statewide by establishing and implementing standards for all Minnesota libraries.
- ⇒ Goal 8 – People in every Minnesota locality will have an opportunity and the means to identify their needs for library services.
- ⇒ Goal 9 – Improve the skills of library staff and trustees in serving the needs of their communities.

Key Measures

In awarding grants, the department considers the following criteria:

- ◆ fulfillment of federal LSTA purposes and the Minnesota five-year plan goals, activities and measurements;
- ◆ adherence to Minnesota priority activity requirements;
- ◆ integration with and leveraging of other regional and state initiatives;
- ◆ congruence with strategic and technology plans pertinent to the applicant;
- ◆ outcomes of the proposed project;
- ◆ building upon or supporting collaboration with other libraries and non-library partners; and
- ◆ ability to continue the project after the initial grant.

Goals and activities established under the new Minnesota LSTA Plan – 2003 – 2007.

- ⇒ Goal 1A – Target programming for seniors.
- ⇒ Goal 1B – Targeted programming for individuals with limited English proficiency.
- ⇒ Goal 1C – Target programming for individuals with disabilities.
- ⇒ Goal 1D – Target programming to children living in poverty.
- ⇒ Goal 2 – Statewide initiatives and services.

Activity Funding

The federal act requires both a state match (34% of the federal award), and a state maintenance of effort (the difference between the match and LSTA funding allocated to the state). Library Development and Services reports the state appropriation for regional public library system basic aids and the multicounty, multitype library system aid to meet these requirements.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE ASSISTANCE

Narrative

Activity Description

Citation: M.S. 119B; P.L. 104-193, Title VI, P.L. 101-508

The Child Care Assistance Program (CCAP) provides financial subsidies to help low-income families pay for child care so that parents may pursue employment or education leading to employment. This program is supervised by CFL and administered by county social services agencies.

Population Served

Families who participate in welfare activities are served through the Minnesota Family Investment Program (MFIP) child care program which includes MFIP and Transition Year (TY) subprograms. Low-income families who are not connected to the cash assistance program are served through the Basic Sliding Fee (BSF) child care program.

Activity at a Glance

- ◆ In 2001, the MFIP Child Care Program served almost 12,000 families and over 22,000 children with a total of \$92 million in state, federal, and county funds.
- ◆ In 2001, the Basic Sliding Fee Program served over 14,500 families and over 24,000 children with a total of \$88 million in state, federal, and county funds.
- ◆ As of 05-31-02 there were 5,094 families on the Basic Sliding Fee program waiting lists in 30 counties statewide.

Services Provided

The CCAP helps families pay child care costs on a sliding fee basis. As family income increases so does the amount paid by the family. When family income reaches 75% of the state median income, family co-payments generally meet or exceed the full cost of care.

Minnesota Family Investment Plan (MFIP)

The following families are eligible to receive MFIP or TY child care assistance: 1) MFIP families who are employed or pursuing employment, or participating in employment, training, or social services activities authorized in an approved employment services plan; and 2) employed families who are in their first year off MFIP (transition year). Families on MFIP might also be eligible for child care assistance for social services activities. This is funded through a separate appropriation.

Basic Sliding Fee (BSF)

BSF child care helps pay the child care costs of low-income families not currently participating in MFIP and helps keep families off welfare. Families with incomes below 75% of the state median income who participate in authorized activities, such as employment, job search, and job training, are eligible for BSF child care.

At Home Infant Care (AHIC)

In 1997, the legislature created the At-Home Infant Care program (AHIC). The program took effect in FY 1999. AHIC allows BSF eligible families with infant children to receive a subsidy for a period of up to 12 months, while staying at home with their infant (and any other children). The family receives 90% of the amount that would be paid for infant care in the county of the family's residence. The BSF uses a full year's income as the basis for determining the level of assistance. Income for the AHIC program is calculated by annualizing only the amount a family receives while a parent is staying at home with a child.

Historical Perspective

The BSF program was developed in the 1970s as a pilot program serving 24 counties in recognition that child care was essential to the employment of low-income families. MFIP child care was called AFDC child care and funded by federal Title IV(a) funds prior to the 1996 federal welfare reform act. Demand for child care assistance has increased as parents participating in welfare reform now are required to be employed. The total number of families served has increased from 13,161 in FY 1992 to 26,555 in FY 2001. Total expenditures have increased from \$46.6 million to \$180.1 over those years.

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE ASSISTANCE

Narrative

Key Measures

With the implementation of Minnesota Electronic Child Care Information System (MEC²) the CCAP will begin to have the capacity to measure the effectiveness of the program statewide and specific measures will be reported in the next biennial budget request. The following indicators have been selected as points of discussion for the goals of the program.

Families have adequate economic resources to provide for their children and ensure family self-sufficiency.

- ⇒ Percent of families on the waiting list to receive BSF who enroll in the MFIP program.
- ⇒ Percent of CCAP families who exit off the program, by termination reason, who do not return to the program or the waiting list within 12 months.
- ⇒ Percent of families who maintain continuous employment while enrolled in CCAP.

All children have access to high quality and developmentally appropriate birth to kindergarten early childhood care and education services that help prepare them for school and access to quality school age care upon school entry.

- ⇒ Percent of providers used by families in the CCAP who are licensed.
- ⇒ Percent of parents who are able to obtain the care they prefer for their children (location, age slot, price-range, hours, special needs, cultural emphasis).
- ⇒ Percent of children who have more than one provider change in a year.
- ⇒ Percent of non-native English speaking children who are cared for by a provider who speaks the language preferred by the parent.
- ⇒ Number of provider training opportunities for child care providers.

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered.

Activity Funding

Child care assistance is funded by state general fund appropriations, federal Child Care and Development Fund (CCDF) monies, which include Temporary Assistance to Needy Families (TANF) transfer funds, county contributions, and child care support collections.

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE ASSISTANCE

Narrative

The CCDF program consists of three funding streams: mandatory, matching, and discretionary. The mandatory and discretionary funds do not require a state match. However, in order to receive the matching funds, the state must meet a maintenance of effort (MOE) requirement of \$19.6 million. State child care assistance expenditures are used to meet MOE requirements for both the federal CCDF and TANF funding. Expenditures will be matched at the federal medical assistance participation rate up to the amount of money available in the matching allocation. Minnesota consistently draws down all available federal dollars.

MFIP child care is a fully funded program. Counties are reimbursed for 100% of their expenditures. Counties receive an additional administrative allowance equal to 5% of their earnings. In both MFIP and BSF, counties are required to contribute a minimum direct service match and in many cases choose to contribute additional county funds. Counties receive an administrative allowance equal to 5% of their earnings. This allowance is capped at 1/21 of their allocation.

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE INTEGRITY

Narrative

Activity Description

Citation: Child Care Development Fund P.L. 104-193, 45 CFR 98 and 99

The federal funded Minnesota Electronic Child Care Information System (MEC²) is designed to support program integrity and meet the needs of the Child Care Assistance Program (CCAP) in Minnesota by providing automated support and process improvements at the state and county level. State funding is appropriated to enforce program integrity through a contract with the Department of Human Services for fraud prevention investigation.

Activity at a Glance

- ◆ MEC² is being implemented in all 87 counties.
- ◆ Approximately 1,000 state and county workers will use MEC² on a regular basis.
- ◆ Over 25,000 providers will receive payments every two to four weeks from this system.
- ◆ MEC² will be used to serve an annual average of 26,500 families and over 46,000 children.

Population Served

MEC² will be implemented in all 87 Minnesota counties and will be used by approximately 1,000 workers at the state and local level. System implementation is being phased in beginning in the fall of 2002. The system will be used to serve an average of 26,500 families per quarter and their approximately 46,000 children. In addition, MEC² will serve over 25,000 child care providers annually. These families, providers, and Minnesota taxpayers will benefit from improved services, more efficient administration of the program, and enhanced program integrity. The MEC² systems and the fraud prevention investigation activities support appropriate and efficient distribution of available resources to eligible families.

Services Provided

MEC² functionality includes the following: Family Management & Eligibility (pre-screening, waiting list, eligibility determination, case management and service authorization), Provider Management, Budget Tracking, Payment Processing, and Reporting. The system also will have the ability to print and distribute the appropriate forms and notices to families and providers.

MEC² is an information system with flexibility to manage the fiscal complexities of multiple CCAP subprograms and their various funding sources. It can also accommodate differences in county policy and includes interfaces to related employment and welfare systems serving the same individuals and families.

The Department of Children, Families & Learning (CFL) contracts with the Department of Human Services (DHS) for the fraud prevention investigation program. This program oversees county investigations of fraud prevention activities statewide.

Historical Perspective

The department has been working to increase program integrity in the child care assistance program since the programs were transferred to it in 1996. In 1999, disqualification periods and penalties for fraud were added to the statute. In 2001, the rule governing the program was revised to add provisions related to disqualification, requiring more documentation by applicants, giving families more warnings about the implications of not following the rules and giving providers more warning about treating CCAP and non-CCAP families the same. A statewide universal application was implemented in December 2001 that included a separate form stating rights, responsibilities, and consequences for noncompliance, and included an authorization to release information for fraud prevention investigation.

The MEC² Project was approved by the 1999 legislature. The legislature authorized the use of \$5.8 million from the federal Child Care and Development Fund (CCDF) to design, build and implement this system. In addition, ongoing maintenance funds were approved. The current base for these funds is \$771,750 per year. The project began in late 1999 with detailed planning and the gathering of the kinds of information the system would need to collect, develop and store. By mid-2000 a Request for Purchase (RFP) was issued to find a contractor who could develop the final requirements, design and construction, and a contract was awarded in September 2000. At that point, state staff and the contractor began a series of meetings with the consumers and users of the system to

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE INTEGRITY

Narrative

create a comprehensive and responsive system. System implementation was scheduled for May 2002. However, since that time, agency shutdown planning, state employee strike, agency budget cuts and hiring freezes have affected project progress. Consequently, implementation was delayed until September 2002. The system will be fully functional after all county workers have been trained and all existing cases are converted. This process will happen over a period of 9-12 months following initial implementation.

Key Measures

With implementation, MEC² will begin to have the capacity to measure the effectiveness of the program statewide. The following indicators have been selected as goals for the system:

- ◆ improve services to families and providers;
- ◆ decrease state and county administrative burdens; and
- ◆ ensure program integrity.

Specific measures under consideration include reducing system down time and reducing administrative errors.

Activity Funding

Federal funding for this program include

- ◆ FFY 2000 - \$5,800,000
- ◆ FFY 2001 - \$700,000
- ◆ FFY 2002 - \$735,000
- ◆ FFY 2003 and beyond - \$771,750

In addition, \$175,000 each year is appropriated to CFL and transferred to DHS for statewide fraud prevention activities.

The expenditures and budgeted amounts for state fiscal years 2001, 2002, and 2003 include carry forward of funds to support development and implementation of the system. In addition, the state fiscal year amount for 2003 includes funding for ongoing maintenance.

.0

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE DEVELOPMENT

Narrative

Activity Description

Citation: M.S. 119B; P.L. 104-193, 45 CFR 98 and 99

The Child Care Development programs promote school readiness, healthy child development, and family self-sufficiency by improving the quality and availability of child care for Minnesota.

Population Served

- ⇒ An estimated 696,800 Minnesota children ages 0 to 12 need some form of child care while their parent's work.
- ⇒ Approximately 222,000 of these children spend time in licensed child care arrangements.
- ⇒ 15,619 licensed child care providers serve these children.
- ⇒ Relatives and friends serve approximately 400,000 children in legally unlicensed arrangements.

Activity at a Glance

Services provided in FY 2000-01:

- ◆ over 52,000 child care referrals;
- ◆ almost 163,000 child care consultations;
- ◆ 3,093 child care grants to improve the quality and availability of care made to providers and programs;
- ◆ 79 facility loans for start-up or expansion made to child care programs;
- ◆ over 329,000 technical assistance consultations provided to child care providers; and
- ◆ 43,650 providers trained in ways to improve the quality of care provided.

Services Provided

Two primary program areas respond to needs for available, quality child care for families and a statewide infrastructure to assist communities in responding to these needs.

The first program area involves grants to both public and private agencies focused on:

- ◆ improving the quality of early childhood care and education programs;
- ◆ recruiting and training child care center staff and family child care providers; and
- ◆ developing special child care services, such as care for infants, school-age children, sick children, children with special needs, care during non-traditional hours, and culturally responsive care.

The second program area consists of 23 Child Care Resource & Referral (CCR&R) sites throughout the state that work to:

- ◆ build the supply and improve the quality of child care;
- ◆ help parents access appropriate care and information about available child care subsidy programs;
- ◆ work with employers, counties, and workforce centers; and
- ◆ coordinate community resources and information on child care supply, demand, and cost; and administer grants.

Other key elements of the child care development programs include:

- ◆ ongoing mechanisms for community-level input on programs and policies through advisory committees for major program components;
- ◆ use of research and evaluation to guide policy and program development and effectively target resources; and
- ◆ local control of grant priorities for grants administered by CCR&R sites.

Historical Perspective

The 1988 Minnesota legislature established the Child Care Development programs to respond to increased demand for quality child care and the need for a statewide infrastructure for parents and communities to respond to these needs. Since that time, Child Care Development programs have used statewide and local-level grants to:

- ◆ support child care providers in improving quality and expanding services;
- ◆ develop the child care infrastructure to provide referral services to parents and professional development, technical assistance and facilities improvements to child care providers; and

CHILDREN, FAMILIES & LEARNING

Program: CHILD CARE PROGRAMS

Activity: CHILD CARE DEVELOPMENT

Narrative

- ◆ conduct research and evaluation to identify needs and improve program effectiveness.

Key Measures

Quality early care and education programs have a documented long-term impact on children's success in school. Research also shows that families with the highest risk factors gain the most from high quality child care experiences. The North Carolina Abecedarian Project followed two groups of high-risk children for 20 years. The group of children that were in quality care settings showed significantly better outcomes than the control group. The study found that children in quality care were:

- ◆ more likely to be employed than the control group – 65% to 50%;
- ◆ more likely to attend college than the control group - 35% to 14%; and
- ◆ less likely to use special education services than the control group – 24% to 48%.

The percentage of families using child care referral services who report increased ability to seek and select quality child care.

- ⇒ Helping parents access quality child care is a core function of Minnesota's 23 child care resource & referral agencies. Child Care Resource and Referral programs report that 77% of the families they serve have indicated an increased ability to seek and select quality child care.

The percent of child care providers and staff who have college-level degree in child development.

- ⇒ Research shows that the education level of child care providers directly impacts the quality of care that children receive and is related to improvements in measures of school readiness for young children. Children, Families & Learning (CFL) is in the process of developing data collection methods for this indicator for providers and staff in licensed family child care homes and center-based child care settings.

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered. In addition, CFL is in the process of training early childhood teachers to use the "Ounce of Prevention Scale" with children ages 0-2 in order to determine the school readiness of children.

Activity Funding

Child care development is funded with state and federal child care and development funds. Eligible recipients of grant dollars include child care programs, tribal governments, school-based programs, and organizations developing child care services. In addition to required quality set-asides, the federal CCDF requires that a minimum of 4% of the total allocation be used by states to increase the quality and availability of child care.

Child Care Resource and Referral grants are allocated in each of the Governor's Economic Development Regions through a funding formula as designated in M.S. 119B.

Local CCR&R agencies administer grants for start-up/expansion, staff training, and facility and program improvement to family child care providers, center and school-based programs, and other child care organizations.

The federal child care development fund establishes earmarks for infant/toddler care, school-age care/CCR&R programs, and quality initiatives. Priorities and criteria for selection of grantees within the earmarks, and for additional state and federal funds, are established by local stakeholders. The CCDF plan receives review through a public hearing process.

In FY 2001, Child Care Development received grant fund requests totaling approximately five times the amount of available funding.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: SCHOOL READINESS

Narrative

Activity Description

Citation: M.S. 124D.15; 124D.16

The School Readiness program funds school districts to provide child development programs that promote future success in school. Participants are either referred through Early Childhood Screening or must participate in screening within 90 days of enrollment in School Readiness or the child's fourth birthday.

Population Served

Preschool children three and a half to four years old who are identified with health and development problems are priority participants in this program. A total of 40,047 children and 39,427 parents were served in 2001. In the 2000-01 school year, 131 districts reported that they served 5,326 children younger than three and one-half years of age. 280 districts reported that they provided 30 hours or more of School Readiness services to 21,921 three and one-half to five year old children.

The following are participant characteristics in 2001.

- ⇒ 5,369 children were identified with developmental delays and disabilities through an early childhood screening or special education evaluation process.
- ⇒ More than 24% of parents had no more education than a high school diploma/GED.
- ⇒ Over 24% of participating families had household incomes of less than \$30,000, including almost 4% of families who had household incomes of less than \$10,000.
- ⇒ Over 20% of participating families were headed by a single parent.

Services Provided

School Readiness provides a continuum of services for three and a half to four year old children based on needs. Services are provided directly by school districts or through district contracts or agreements with community based programs. Because this program requires close coordination and cooperation of various health, education, and human services providers, local service providers' strategies for delivering services to eligible children and families include both referrals and a wide array of coordinated or integrated services, such as:

- ◆ comprehensive Head Start and Family Literacy/English Language Learner programs;
- ◆ the addition of parent education and special needs services to preschool and center-based child care programs;
- ◆ staff development and consultation for family child care providers;
- ◆ "kindergarten connection" classes for children and parents;
- ◆ special nutrition education sessions offered through Minnesota Extension Services;
- ◆ coordination of referrals and follow-up to Early Childhood Screening;
- ◆ one or two days of child only activities added to Early Childhood Family Education; and
- ◆ Early Childhood Special Education and School Readiness integrated classrooms.

Historical Perspective

The School Readiness program was first enacted in 1991 for four year olds. It was expanded in 1993 to cover children ages three and one-half to kindergarten, and younger than three and one-half if necessary for program effectiveness.

Key Measures

- ⇒ Since 1994, Children, Families & Learning (CFL) has provided training on the use of the Work Sampling System of child assessment in order to measure child progress of participating children. Over 1/3 of the school districts currently report using Work Sampling.

Activity at a Glance

In 2001:

- ◆ 79,500 children and parents participated in the program.
- ◆ More than 22,000 referrals were made to and from other community services and programs.
- ◆ Almost 22,000 children received 30 or more hours per year of child/parent services.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: SCHOOL READINESS

Narrative

⇒ A CFL-sponsored study of a random group of School Readiness program participants found more than 85% of the study children demonstrated improved performance on indicators that enhanced their transition to school as reported by teachers.

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered.

Activity Funding

This program is funded entirely with state aid. School districts receive aid equal to: 1) the number of eligible four-year old children in the district times the ratio of 50% of the total school readiness aid for that year to the total number of eligible four-year old children reported to the commissioner that year; plus 2) the number of pupils enrolled in the school district from families eligible for the free or reduced lunch program times the ratio of 50% of the total school readiness aid for that school year to the number of pupils in the state from families eligible for the free or reduced school lunch program. The average district aid for 2003 will be \$30,754. The biennial state aid appropriation has remained constant at \$10,395,000 since 1999.

State law allows districts to maintain a School Readiness reserve, but limits the amount of School Readiness funds districts can carry forward to 25 percent of their prior year revenue, including aid and fees.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: EARLY CHILDHOOD FAMILY EDUCATION

Narrative

Activity Description

Citation: M.S. 124D.13; 124D.135; 124D.15

The Early Childhood Family Education (ECFE) program is funded by state aid and local levy. The program provides early childhood education, parent-child learning opportunities, and parent education that enhance the ability of parents to provide for their children's optimal learning and development.

Activity at a Glance

In 2001:

- ◆ over 300,000 children and parents participated; and
- ◆ approximately 43% of Minnesota's children, ages birth to kindergarten, and their families, were involved.

Population Served

All families with children ages birth to kindergarten are eligible for ECFE. Demand for program services is increasing as indicated by the growing number of families on waiting lists (approximately 4,000 reported in 2001) and the number of families needing more intensive services, e.g. family literacy and referrals for families with multiple stresses. ECFE served 143,000 children and 159,000 parents in 2001.

Services Provided

All ECFE programs are planned and implemented locally and typically include the following services. Services are provided directly by school districts or through district contracts or agreements with community based programs.

- ◆ parent discussion groups
- ◆ parent-child interaction
- ◆ play and learning activities that promote children's development
- ◆ home visits
- ◆ special events for the entire family
- ◆ information on community resources for young children and families
- ◆ libraries of books, toys, and other learning materials

Historical Perspective

⇒ ECFE began as a series of pilot programs from 1974-1983. In 1984, the legislature made it possible for any school district with a community education program to establish the program. ECFE was offered in all 343 school districts and the four tribal schools in Minnesota in 2001. There has been an increase of parent participants from 87,374 in 1989-1990 to 159,050 in 2000-01.

Key Measures

Increase the percentage of young children who are ready for school as measured by an observational performance assessment.

⇒ In a 1996 study of low-income participants in ECFE, parents reported that ECFE participation helped their children's school readiness in the following areas: increased independence (72%), better communication skills (68%), and improved relationships with other children (62%).

Increase the number of parents receiving the education and support they need to assist their children's development and learning.

⇒ In a 1999 study of parents with infants, parents reported that their ECFE participation resulted in improved understanding of how infants learn and develop (83%), learning how to support their infant's learning and development (81%), improved confidence as a parent (79%), improved understanding and response to their child's behavior (76%), and making connections with other parents (73%).

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: EARLY CHILDHOOD FAMILY EDUCATION

Narrative

Increase the percentage of parents involved in activities at home, school, and in the community related to their children's learning, development, and education.

⇒ A 1992 study comparing former ECFE participants to non-participants with children in second and fifth/sixth grades found that ECFE participating parents were more likely to make telephone calls to teachers (68% compared to 41%), participate in classroom activities (53% compared to 32%), work with their children on school work (48% compared to 29%), and take on leadership roles in PTA or parent advisory councils (27% compared to 11%).

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered. In addition, CFL is in the process of training early childhood teachers to use the "Ounce of Prevention Scale" with children ages 0-2 in order to determine the school readiness of children.

Activity Funding

This is a state aid and levy program. A district's state aid is the difference between the revenue and levy. The ECFE levy is the lesser of a fixed rate times the district's adjusted tax capacity, or the ECFE maximum revenue. A district's maximum revenue equals the ECFE allowance of \$120 times the greater of 150 or the number of children under age five residing in the district on October 1 of the previous school year.

State law allows districts to maintain an ECFE reserve, but limits the amount of ECFE funds districts can carry forward to 25% of their prior year revenue, including aid, levy, and fees.

Districts are required to have a sliding fee scale and formula funding may be supplemented with registration fees and funds from other sources.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: HEALTH & DEVELOPMENT SCREEN

Narrative

Activity Description

Citation: M.S. 121A.16; 121A. 17; 121A.19

Early Childhood Health and Developmental Screening promotes educational readiness and improved health of young children through the early detection of factors that may impede children's learning, growth, and development.

Population Served

All children must participate in Early Childhood Screening before entering kindergarten. This program targets children who are three and a half to four years of age. (Children who have had a comparable health and development screening through another provider are exempt from this requirement.) Districts typically notify all parents of children ages three and one half to four of the screening requirement and where the screening can be obtained.

Activity at a Glance

In 2001, a total of 58,500 children were screened. This included:

- ◆ over 19,000 children referred to health and education services for assessment;
- ◆ over 3,200 children placed in Early Childhood Special Education; over 4,400 children referred to the School Readiness Program; over 4,700 families referred to Early Childhood Family Education; over 1,500 children referred to Head Start; and
- ◆ over 260 parents referred to adult education/literacy.

Services Provided

Early Childhood Health and Development Screening include the following services: outreach, screening, referral, and follow-up.

- ⇒ Required screening components include 1) vision; 2) hearing; 3) height; 4) weight; 5) development (cognitive, social/emotional, fine/gross motor, and speech/language); 6) immunization review; 7) identification of risk factors that may interfere with learning; and 8) a summary interview with parents.
- ⇒ Optional screening components include 1) health history; 2) review of family factors that might affect development; 3) nutritional assessment; 4) physical and dental assessment; 5) blood pressure; and 6) laboratory tests.

The objectives of early childhood screening are to

- ◆ detect and seek solutions to conditions interfering with children's growth, development, and learning;
- ◆ increase parental awareness of physical health, development, and learning readiness connections;
- ◆ improve access to and encourage the regular use of preventive health services; and
- ◆ link families to a wide array of community services and programs.

Historical Perspective

The screening program began in 1977 in order to identify children who may have possible health or development concerns that could delay their future learning and to refer children to health, school, and other community services for further assessment.

In 1990, the legislature established a comprehensive health screening program. In 1992, it was replaced with a mandated screening prior to public school enrollment. The mandatory screening is less comprehensive than the screening established in 1990. Screening now targets children ages three and a half to four years, which allows for one year of intervention services prior to school enrollment.

Key Measures

Increase the percentage of children who receive the nutrition, physical activity, and health care that they need to arrive at school with healthy minds and bodies.

- ⇒ In 2001, 19,179 referrals were made for possible health or developmental problems identified at the time of Early Childhood Health and Developmental Screening. (Note: Children, Families & Learning (CFL) has implemented a web-based application for reporting annual aggregated Early Childhood Health and Development Screening data from school districts, including data on the status of children's immunizations, hearing, vision, growth, and access to health care coverage.)

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: HEALTH & DEVELOPMENT SCREEN

Narrative

Increased coordination and integrated screening efforts and follow-up process with county health and social services, school districts, and other providers are implemented through the

- ◆ provision of integrated regional staff development opportunities offered jointly by the Minnesota Departments of Children Families and Learning, Health (MDH), and Human Services (DHS);
- ◆ development of common screening forms for Early Childhood Screening, Child and Teen Checkups/EPSTD, and Head Start; and
- ◆ development of links between the [CFL Early Childhood and Family Initiatives web site](#) and the appropriate sites at MDH and DHS.

1999: Number of New Potential Problems Identified

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a [School Readiness Indicator Study](#) in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered.

Activity Funding

This program is funded with state aid and supplemented with in-kind funding from other education aid and community resources.

In 1998, the Minnesota legislature increased the reimbursement to school districts from \$25 to \$40 per child screened to more closely cover the actual average cost of \$50 per child screened. In FY 2001, the average actual cost for the required components was \$57 per child screened. State funding does not reimburse for optional components.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: WAY TO GROW

Narrative

Activity Description

Citation: M.S. 124D.17

Way to Grow promotes the intellectual, social, emotional, and physical development, and school readiness of children pre-birth to age six by improving access to community-based and neighborhood-based services that assist parents in meeting the health and developmental needs of their children at the earliest possible age.

Population Served

All children pre-birth to age six and their families in the grantee areas are eligible for Way to Grow.

Activity at a Glance

In 2001:

- ◆ Way to Grow was offered through five grants (four to school district ECFE programs and one to the City of Minneapolis Youth Coordinating Board).
- ◆ Over 5,700 children and 5,600 parents participated in Way to Grow.

Participants by Year

| | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 |
|-------------------------|---------|---------|---------|---------|---------|---------|
| # of Child Participants | 4,325 | 4,490 | 4,570 | 4,650 | 4,630 | 5,736 |

Services Provided

Way to Grow is a method of delivering services in a coordinated, extensive, and intensive approach to meet identified community needs. The funding is flexible and decision-making is community based. It allows public funds to be used strategically to leverage other public and private funding to support healthy and vital communities.

Depending upon community needs, programs may provide the following:

- ◆ services to pregnant women early in their pregnancies;
- ◆ establishment of networks and collaboration to promote culturally specific systems of services to families; and
- ◆ support to prevention and intervention programs for families with young children at risk of child abuse and neglect.

The program is designed around the following strategies:

- ◆ employing home visitors that link families at-risk with services and advocate for their needs;
- ◆ coordinating interdisciplinary resource teams of professionals that identify family needs and refer families to appropriate services;
- ◆ identifying and promoting local resources for families; and
- ◆ organizing neighborhood-based education and training.

Historical Perspective

Way to Grow began in 1989 in Minneapolis. St. Paul-Frogtown and Columbia Heights were added as grantees the next year. In 1991, the legislature funded two additional sites in St. Cloud and Winona.

Four of the five grantees are Early Childhood Family Education (ECFE) programs. The fifth grantee is the city of Minneapolis' Youth Coordinating Board.

Key Measures

Increase the number of parents receiving the education and support they need to assist their children's development and learning.

⇒ In a 1997 study of WTG:

- ◆ 96% of parents reported that their participation in WTG made a positive difference in their knowledge and understanding of child development;
- ◆ 93% reported increases in their confidence as parents; and

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: WAY TO GROW

Narrative

- ◆ 88% reported better understanding of programs and services for families and children and greater ease in obtaining services on their own.

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered. In addition, CFL is in the process of training early childhood teachers to use the "Ounce of Prevention Scale" with children ages 0-2 in order to determine the school readiness of children.

Activity Funding

This program is funded with state aid, and requires a 50% local match. Current program funding level is: Columbia Heights \$58,333; Minneapolis \$175,000; St. Paul \$125,000; St. Cloud \$58,333; Winona \$58,333. The matching funds come from school district funds, community based organizations, counties, and other early childhood programs. Contributions can be cash or in-kind.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: **EARLY CHILDHOOD & FAMILY SUPPORT**

Activity: **HEAD START PROGRAM**

Narrative

Activity Description

Citation: M.S. 119A.50-119A.54; 42 U.S.C.9801 et seq.

Head Start is a comprehensive family-oriented program with the overall goal of increasing the social competence and school readiness of young children in low-income families. Research has shown that families with the highest risk factors gain the most from high quality early childhood programming.

Population Served

Head Start primarily serves three to five year olds from low-income families. Some programs also receive funds to serve infants, toddlers and pregnant mothers. At least 90% of enrolled children must come from families who are living at or below the federal poverty level or participating in Minnesota Family Investment Program (MFIP). Ten percent of enrollment in Head Start is reserved for children with diagnosed disabilities. About 44% of the eligible population is currently being served.

Activity at a Glance

In 2001:

- ◆ 34 Head Start grantees enrolled almost 16,000 children; about 3,000 of these children were served with state funds.
- ◆ 12% of enrolled children had a diagnosed disability.
- ◆ 51% of participating families had annual incomes below \$12,000.
- ◆ Approximately 38% of Head Start families were participating in MFIP.

Services Provided

Head Start provides a comprehensive, individualized program of health, nutrition, education, parent involvement and social services to children and families. Education or employment training services were provided for 86% of the parents indicating a need for such services. Of the families needing counseling or information on mental health issues that place the family at risk, 80% received services.

Grantees provide required services that respond to local needs and available resources. Programs use a center-based, home-based and/or combination option with the most common design operating four to five hours a day, four or five days a week for nine months of the year. In response to changing needs of children and their families, most grantees also offer some full-day, full-year services through Head Start-child care partnerships. Other collaborative partners include public health, Early Childhood Screening, Early Childhood Special Education, Early Childhood Family Education, School Readiness, Adult Basic Education, family literacy, public school kindergarten, child support and other self-sufficiency programs.

Parent participation is integral to Head Start. Parents work in classrooms as volunteers and employees, participate in parent education activities and program governance, and work in partnership with Head Start staff. Former or current Head Start parents made up 29% of the staff and 48% of the 41,349 volunteers in 2001.

Historical Perspective

Head Start began as a federal program in 1965. In 1988, the Minnesota legislature first appropriated state funds. State funding has remained constant over the years. Federal funding has increased modestly to allow the programs to serve the same number of participants.

Key Measures

The percentage of children who complete all appropriate medical screenings and examinations within the last twelve months and the percentage of children who receive follow-up services for identified health and developmental needs.

⇒ In 2001, over 81% of all enrolled children completed all medical screenings.

⇒ In 2001, over 91% of children with identified health needs received treatment.

Increase the percentage of Head Start grantees providing all-day care.

⇒ The percentage of Head Start grantees involved in partnerships that provide full-day services to support family self-sufficiency.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: HEAD START PROGRAM

Narrative

⇒ The percentage of Head Start grantees involved in partnerships to integrate services resulting in expanded service offerings and all-day care.

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered.

Activity Funding

Federal Head Start funds flow directly from the federal agency to 34 local Head Start grantees (\$72 million in FFY 2001 and \$79 million in FFY 2002). At least 20% of the total cost of a Head Start program must come from local resources. In-kind contributions constitute much of this match through volunteer hours and donated space, materials and services. Only federally funded Head Start agencies in existence as of 1989 are eligible to receive state Head Start funds. The Minnesota legislature chose to use the existing programs, administrative structure and program performance standards already in place for Head Start. State allocation of funds is based equally on the grantee share of federal Head Start funds and on the proportion of eligible children in the grantee service area who are not currently being served.

State Innovative Funds - Up to 11% of the state funds appropriated annually may be used to provide competitive grants to local Head Start agencies for innovative programming. These programs are designed either to target Head Start resources to particular at-risk groups of children or to provide services in addition to those currently available under federal Head Start regulations.

Head Start Birth to Three – Since 1998, the Minnesota legislature has set aside \$1 million each year to be competitively awarded to Head Start programs to develop and implement full-year programming for children ages birth to three.

Minnesota Head Start Collaboration Project – Since 1992, Minnesota has annually received a \$100,000 federal grant from the Head Start Bureau in the U.S. Department of Health and Human Services for the Minnesota Head Start Collaboration Project. The purpose of the grant is to create significant statewide partnerships between Head Start and local communities in order to meet the challenges of improving services for low-income children and their families.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: INFANTS & TODDLERS-PART C

Narrative

Activity Description

Citation: M.S.125A.26-125A.48; Part C, IDEA (Individuals with Disabilities Act)

The Part C - Infants and Toddlers Program is a federally funded program that provides comprehensive interagency family-centered services to eligible children with disabilities, ages birth through age two, and their families, based upon identified need.

Population Served

Eligible infants and toddlers with disabilities birth to age three and their families as described in Minnesota Rule Chapter 3525 are served by the program. To be eligible, children must meet the eligibility criteria for early childhood special education.

Services Provided

The program assists and provides funds to the 96 local Interagency Early Intervention Committees (IEICs) through the IEIC annual application planning process ([ecfi/planinstructions.pdf](#).) IEICs are responsible for the development, coordination, and implementation of comprehensive local interagency early childhood intervention services for young children with disabilities and their families. IEIC members include representatives of school districts, county human service agencies, county boards, and early childhood family education programs, parents of young children with disabilities under age 12, and health care providers.

Early intervention services are offered in conformity with an Individual Family Services Plan (IFSP) and provided in natural environments including the home, child care setting, early childhood special education program, or other early childhood education settings.

Additional components of the Part C state and local system to enhance quality and accountability include:

- ◆ local staff development, including occupational therapists, Early Childhood Special Education (ECSE) staff, speech pathologists, physical therapists, physicians, nurses, nutritionists, and child care providers;
- ◆ technical assistance to local areas through the Minnesota Technical Assistance for Family Support, Early Hearing Detection and Intervention Network, Project Exceptional for inclusive child care, and the Autism Network;
- ◆ the development of web-based applications, such as the IFSP to enhance service coordination and family involvement and the Early Childhood Family Initiatives web site to serve as a resource for those interested in the health and development of young children with disabilities which includes the YOUR LINK newsletter;
- ◆ the central directory and the 1-800 number which provides parents with referral and resource information;
- ◆ the "Follow Along" program available in 84 of the 87 counties in Minnesota to track and follow young children at risk for early intervention services;
- ◆ local and state interagency agreements that include procedures for intra- and interagency dispute resolution, complaints, agency roles and responsibilities for child find, services, service coordination, financial commitments, and data collection;
- ◆ due process procedures for families and providers;
- ◆ analysis of IEIC self-study results for Child Find conducted during FY 2002, local referral sources, demographics and other data sources are examined and used to determine technical assistance to be provided; and
- ◆ coordination with child care providers and other early childhood care and education service providers is used to improve Child Find.

Activity at a Glance

In 2001:

- ◆ over 3,000 Minnesota children and families received services through an Individual Family Services Plan.
- ◆ 96 community coordinating committees design comprehensive intervention services for children with disabilities.

CHILDREN, FAMILIES & LEARNING

Program: EARLY CHILDHOOD & FAMILY SUPPORT

Activity: INFANTS & TODDLERS-PART C

Narrative

Historical Perspective

Minnesota has participated in Part C, IDEA (formerly Part H), a federal, interagency family centered change initiative for infants and toddlers with disabilities and their families since FY 1987.

The Minnesota Departments of Children, Families and Learning (CFL), (designated by the state as the lead agency), Health (MDH); and Human Services (DHS) work together with local interagency early childhood intervention Committees (IEICs) to provide coordinated interagency services and funding for each eligible child and family. The Governor's Interagency Coordinating Council on Early Childhood Intervention (ICC) serves in an advisory role.

The number of eligible children, birth to age three, with an IFSP on December 1 of each year has increased from 2,312 in 1993 to 3,053 in 2001.

| | Children and Families with an IFSP on December 1 | | | | | | | | |
|---|--|---------|---------|---------|---------|---------|---------|---------|---------|
| | FY 1993 | FY 1994 | FY 1995 | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 |
| Number of Children and Families Participating | 2,312 | 2,436 | 2,563 | 2,620 | 2,658 | 2,806 | 2,820 | 2,948 | 3,053 |
| Percentage of Children Age 0-3 Participating (est.) | 1.16% | 1.26% | 1.34% | 1.39% | 1.42% | 1.49% | 1.49% | 1.54% | 1.53% |

Key Measures

The percentage of infants and toddlers birth to age three (particularly under one year of age) and their families who have IFSPs is increased and is proportional to the general state population.

- ⇒ The percentage of all infants under age one who receive early intervention services as identified in an IFSP (the federal benchmark is 1%).
- ⇒ The percentage of all infants and toddlers age birth to three who receive early intervention services as identified in an EFSP (the federal benchmark is 2%).

The Early Childhood and Family Support Division in the Office of Community Services has adopted a single indicator as a focus around which to integrate individual early childhood programs. This indicator is to increase the percentage of young children who are ready for school as measured by an observational performance assessment. In the fall of 2002, CFL will pilot a School Readiness Indicator Study in which information about the school readiness of a random sample of approximately 2,000 kindergarten children will be gathered.

Activity Funding

Minnesota's federal allocation for Part C is based on the number of all children in the cohorts from birth through age two annually.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: FAMILY COLLABORATIVES

Narrative

Activity Description

Citation: M.S. 124D.23

Family Services Collaboratives provide incentives to communities that foster integrated services, encourage preventive services, promote service accountability, and improve outcomes for children and families. Collaboratives are provided up to five years of state funding to support needs assessment, planning, coordination, and pilot programs. Funding will be phased out by February 2004.

Population Served

The target population is children and adolescents ages 0-18, or birth through age 21 for individuals with disabilities, and their families.

Services Provided

Family Services Collaboratives (FSC) promote the development and maintenance of services including prevention, early intervention and outreach services, parenting services, family preservation services and culturally sensitive services. FSC have identified as priorities clearly defined outcomes and valid methods of assessment, effective service coordination, participation by the maximum number of jurisdictions and funding sources, integrated transportation and housing services and other local resources, and effective service coordination.

Collaborative governing boards must include at least one school district, one county, one public health organization, and one community action agency (CAA) or a Head Start grantee (if the CAA is not the Head Start grantee).

Historical Perspective

In 1993, the Minnesota legislature passed permissive language that allowed local communities to design flexible, comprehensive service systems and invest funds in locally determined services that focus on prevention and early intervention rather than crisis management. Communities that establish collaboratives must have a comprehensive plan for serving children ages 0-18, or birth through age 21 for individuals with disabilities, and their families. The plan must coordinate funding streams and commit resources to an integrated fund, and contain clear goals and outcome-based indicators to measure progress toward these goals.

The number of FSC has grown from 13 in 1994 to 80 as of 7-1-02.

Key Measures

Ensure that Collaboratives have established and implemented plans for improving outcomes for children and adolescents.

In the fall of 2000, a review focused on the first 28 FSC established in Minnesota. The review compared outcome measures averaged across these 28 FSC's counties, and compared these results to those of an average, or typical county in Minnesota (calculated by dividing state totals by 87).

On average, communities impacted by the work of the 28 FSC indicated better outcomes in the areas of early childhood development, education, healthy and caring communities. The 28 county averages show:

- ◆ fewer school transfers;
- ◆ higher rates of on-time immunizations; and
- ◆ higher academic achievement as measured by performance on the 8th Grade Basic Skills, Reading and Math Test as well as the 10th Grade Writing Exam.

Activity at a Glance

Family Services Collaboratives

- ◆ enhance local decision-making;
- ◆ encourage prevention and early intervention services;
- ◆ promote public accountability; and
- ◆ improve outcomes for children and families.

95% of Minnesota's children and families live in an area served by a Family Service Collaborative.

Program: PREVENTION

Activity: FAMILY COLLABORATIVES

Narrative

This report, "Targeted Family Services and Community-Based Collaboratives Review," is available for review at <http://cfl.state.mn.us/PUBRES.html>

Activity Funding

In 1999, the Minnesota legislature mandated that no new collaboratives be funded after 6-30-99 (2000 Session Law, Ch. 489, Art. 1, Sec. 30). As a result, there will be no state funding available to FSC after FY 2004.

Collaborative grants are funded for five years. Funding remains constant for the first three years then declines by 1/3 in each of the final two years.

In FY 2003, Children, Families & Learning will have 15 active FSC grants.

Collaborative grants state funding has leveraged over \$41 million in federal revenue enhancement in 2000 through participation in the Local Collaborative Time Study (LCTS) administered by the Department of Human Services.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: COMMUNITY EDUCATION

Narrative

Activity Description

Citation: M.S. 124D.18; 124D.19; 124D.20; 124D.21

This state aid and local levy program provides funding for community education programs to provide lifelong learning opportunities for all community members and allows access to school facilities for public use.

Activity at a Glance

- ◆ Every Minnesota school district operates a community education program.
- ◆ More than 100,000 activities offered in 2001.
- ◆ Programs serve participants of all ages from preschool through senior citizens.

Population Served

Every Minnesota school district operates a Community Education program. Programs may include (as specified in M.S. 124D.20, subd. 8)

- ◆ Adults with Disabilities,
- ◆ Adult Basic Education (ABE),
- ◆ Youth development,
- ◆ Youth service,
- ◆ Early Childhood Family Education (ECFE),
- ◆ School-Age Care,
- ◆ Summer programs for elementary and secondary pupils,
- ◆ Youth after-school enrichment programs, and
- ◆ Non-vocational, recreational, and leisure activities.

Participation in youth development/service activities increased to over 200,000 young people in 1999, a 5% increase from the previous year.

Services Provided

Community Education is a partnership between the community and the school district through which the resources of each are used for the continuing growth and betterment of both. Community Education provides services beyond the regular K-12 program as recommended by the Community Education Advisory Council and approved by the local school board (State Board Rule 3530.5600).

Community Education administers many popular programs, such as family literacy, ABE, School Age Care, and ECFE.

Local school boards establish Community Education advisory councils and hire local staff to promote and implement the program.

Historical Perspective

State funding for Community Education began in 1971 with the idea that the community should be able to use the public schools beyond the regular school day. Since that time, community education has grown rapidly and in many different directions depending upon the needs/desires of the local community. Many programs emphasize strong recreational opportunities while others focus on skill development. Others still emphasize general interest topics or provide opportunities to explore the arts. This local flexibility allows communities to build programs that meet their own interests and demands, but complicate efforts to maintain statewide support since there is no common understanding of what community education is.

Key Measures

Districts reported nearly two million participants in 2000-01, not including ECFE or ABE. New reporting procedures have been implemented in 2001-02 to ascertain expenditure data.

An annual Phi Delta Kappa poll found that offering activities that bring people into school buildings increases citizens' overall support for education.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: COMMUNITY EDUCATION

Narrative

Department staff recently completed work with the Center for Democracy and Citizenship at the Humphrey Institute on the Value of Citizen Work project to develop qualitative data about changes in individuals and communities that result from citizen involvement. Results from the Value of Citizen Work project show changes in the perception of community education from a series of classes to a system of citizen development and civic engagement. Pilot sites report expanded involvement in community education from a wider range of residents. The Value of Citizen Work project offers new operational models for community education and a revitalized theory and practice for the profession. The Value of Citizen Work project was funded by the Charles Stewart Mott Foundation.

Activity Funding

A district's maximum revenue equals the Community Education allowance times the greater of 1,335 or the population of the district. The Community Education allowance has remained at \$5.95 for the past 14 years.

Districts that have implemented a youth development plan and a youth service program receive an additional \$1 times the greater of 1,335 or the population of the district.

The Community Education levy is the lesser of a fixed tax rate times the district Adjusted Net Tax Capacity (ANTC) or the Community Education revenue. The district's Community Education aid is the difference between the revenue and the levy. The 1998 legislature reduced the tax rate from 1.09% to 0.41% of ANTC, increasing the state share from 4% in FY 1999 to 49% in FY 2000.

Formula funding is supplemented with registration fees and funds from other sources. General community education revenue is not used to subsidize the direct activity costs for adult enrichment programs (the cost of the activity leader or instructor, cost of materials, transportation costs, etc.). Funding commonly supports parenting education and parent/child classes, youth recreation and athletics, community meetings, and community service activities.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: ADULTS WITH DISABILITIES

Narrative

Activity Description

Citation: M.S. 124D.56

This state aid and local levy program provides funding to school districts to support activities that integrate adults with disabilities with other people in their community.

Population Served

The number of adults with disabilities participating in this program increased from approximately 9,000 in FY 1988 to 39,000 in 1999, and has remained relatively stable since that time.

Activity at a Glance

- ◆ 77 school districts are approved for Adults with Disabilities Program Aid.
- ◆ The number of participants supported has remained relatively constant since 1999.
- ◆ Many more adults with disabilities are served by community education than are supported by the program.

Services Provided

Community Education programs locally administer the Adults with Disabilities program. Thirty of 77 supported school districts are in the seven county metropolitan area. The local programs use the following service strategies to achieve their objectives:

- ◆ services enabling adults to participate in community activities, such as training for community members, one-on-one assistance, Braille and interpreter services;
- ◆ classes specifically for adults with disabilities;
- ◆ outreach to identify adults needing services; and
- ◆ activities to increase public awareness of the roles of people with disabilities.

Key Measures

Local Community Education teachers work with others to:

- ◆ identify and encourage adults with disabilities to enjoy community life;
- ◆ develop specific learning and leisure time opportunities for those with disabilities;
- ◆ teach community members how to include people with differing abilities; and
- ◆ raise awareness of contributions of people with disabilities.

Activity Funding

To be eligible for specific categorical revenue to serve adults with disabilities, a school district's community education program must receive approval from the Minnesota Department of Children, Families & Learning.

State aid formula provides the lesser of \$30,000 or one-half the actual expenditures. A district is required to match this aid amount from local sources. A district is permitted to levy the lesser of \$30,000 or the actual expenditures minus the amount of state aid for the program.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: HEARING IMPAIRED ADULTS

Narrative

Activity Description

Citation: M.S. 124D.57

This state aid program provides funding to districts and other organizations to assure access to educational opportunities for deaf and hard of hearing adults by paying for interpreter or note-taker services.

Activity at a Glance

- ◆ 32 sites received funding under this program in 2001-02 with aid ranging from less than \$20 to more than \$6,000.

Population Served

Both public and private agencies providing adult education classes to hearing impaired adults may apply to Children, Families & Learning (CFL) for reimbursement of the costs of providing interpreting services. Applications for aid are received on a first-come, first-served basis only to the extent that funds are available. Over estimation of need by some may prevent aid flow to others.

Services Provided

This program

- ◆ targets part-time adult students with hearing impairments;
- ◆ provides access to vocational education programs promoting educational growth and development; and
- ◆ enhances and encourages lifelong learning.

Services provided include interpretation, note-taking, and closed captioning.

Access to education programs for persons with disabilities is assured by the American with Disabilities Act (ADA). Providers are learning ways to cover the costs of interpreter services within their budget plans. Nevertheless, some providers still turn to this program for assistance with the one-time costs of interpreter and note-taker services. The aid allocation is not meant to support all the interpreter services for deaf and hard of hearing adult learners, but to help in unforeseen situations.

Key Measures

Approximately 70% of reimbursement requests come from school districts providing adult education. The remaining 30% come from other public and private organizations.

During 1999-2000, 45 different agencies received funds, ranging from over \$8,000 for Hearing Dogs of Minnesota to \$70 for a local school district to interpret a one-time community education class for one adult.

Activity Funding

CFL provides reimbursement of the actual costs of direct services. The cost of providing interpreter services to one person for an activity/program is the same as providing that service to a group of people. The average cost for an hour of American Sign Language interpretation, estimated by the Minnesota Council on Disability, is \$35 to \$50 per hour, with a two-hour minimum charge.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: VIOLENCE PREVENTION GRANTS

Narrative

Activity Description

Citation: M.S. 120B.22-120B.23

Violence Prevention grants integrate violence prevention education programming into existing K-12 curricula and help students learn to resolve conflicts and reduce violence at school.

Population Served

Students, kindergarten through senior high school, attending public schools are the targeted service population.

Services Provided

Districts conduct a needs assessment, select measurable goals to work towards, use best or promising practices and conduct evaluation to assess the effectiveness of their efforts. Services vary based on each district's needs assessment and plan but may include a comprehensive, accurate, and age appropriate curriculum on violence prevention, nonviolent conflict resolution, sexual, racial, and cultural harassment, and student hazing that promotes equality, respect, understanding, effective communication, individual responsibility, thoughtful decision making, positive conflict resolution, useful coping skills, critical thinking, listening and watching skills, and personal safety.

The Violence Prevention Program staff work with schools, policy makers, and community groups to develop and adopt effective ways to address conflict in schools, to improve school climate, and to implement policies and practices which support safe schools and equitable treatment.

The Violence Prevention Program works in conjunction with Safe and Drug Free Schools to reduce violence and promote school safety. School districts apply for funds in a single application that combines use of the federal Safe and Drug-Free School and Communities funds with state Violence Prevention Education funds to address common violence-prevention goals.

Key Measures

Increase the proportion of students reporting they feel safe at school on the Minnesota Student Survey result.

- ⇒ About 90% of youth surveyed in 2001 reported that they feel relatively safe at school.
- ⇒ Recent research from the National Adolescent Health Study has shown that feelings of safety and security at school and a positive school climate are one of the strongest protective factors associated with positive youth outcomes in a wide range of areas, including school-relates indicators of success.

Decrease the number or rate of incidents involving dangerous weapons in schools

- ⇒ The rate of dangerous weapons incidents (calculated based on reports by school administrators of dangerous weapons incidents, and number of enrolled students) has decreased each year since 1998 from 1.9% to 1.1% in 2002.

Activity Funding

Total statewide annual funding for program initiatives is \$1.45 million. There are no funds provided for administration. \$1.45 million is appropriated annually for distribution to school districts based on resident student counts from the previous school year, resulting in a distribution of funds of approximately \$1.50 per pupil unit. Funds are restricted to no more than \$3 per resident pupil.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Activity at a Glance

- ◆ All Minnesota public school districts are eligible to receive funding. Participation rate is between 98-100% annually.
- ◆ Violence prevention education programs include:

| | % of Districts |
|---|----------------|
| Peer Education | 47% |
| Youth to Youth Mentoring | 54% |
| Community Service | 53% |
| Conflict Resolution and Peer Mediation | 80% |

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: ABUSED CHILDREN

Narrative

Activity Description

Citation: M.S. 119A.20; 119A.21; 119A.22; 119A.35

Federal Citation: Victims of Crimes Act of 1984 (VOCA)

The Abused Children Program provides intervention services to children and adolescent victims of abuse and neglect, including victims of physical and sexual assault.

Population Served

Seventy percent of program participants are from greater Minnesota; 30% from the seven-county metropolitan area.

Activity at a Glance

- ◆ In 2001, almost 13,000 primary victims and 8,000 secondary victims were served in 53 programs statewide.
- ◆ Grants are co-administered by the CFL and the Department of Public Safety.
- ◆ 44 sites funded statewide, averaging \$47,000 annually.

Services Provided

The program provides a variety of intervention strategies including legal advocacy, support groups for children and non-offending family members, community awareness presentations, and outreach activities. Funds are made available through a competitive grant application.

Historical Perspective

The Abused Children Program began in 1987 with federal funds through the Victims of Crime Act (VOCA). In 1993, the advisory council identified a need for a statewide system of community-based services for children who have been abused or neglected. In 1994, the Minnesota legislature appropriated state funds to supplement the federal funds.

The Abused Children Program, in partnership with the Children's Trust Fund, supports the Children's Advisory Council. The Children's Advisory Council was created in 2001 when the legislature combined the previously existing Children's Trust Fund Advisory Council and the Abused Children Advisory Council into a single advisory body charged with identifying unmet needs and establishing goals for children abuse prevention and intervention resources in Minnesota. The Children's Advisory Council began meeting in the spring of 2002 with 22 representatives, 18 of who were appointed by the governor.

Beginning in FY 2002, CFL entered into an interagency agreement with the Department of Public Safety's Minnesota Center for Crime Victims Services (MCCVS) to administer this grant program. Because the interagency agreement allows MCCVS to have direct access to both state and federal Victims Of Crime Act (VOCA) funds that are used in this program, this agreement provides increased efficiency for the grantees and the agencies. MCCVS provides grant administration, monitoring, compliance, and technical assistance to local grantee programs.

Key Measures

Increase the number of child victims of abuse provided support services.

- ⇒ The number of child abuse victims served in Minnesota has doubled since 1995.
- ⇒ Research has shown that when child abuse is not addressed and the victims are not provided support and care, victims often demonstrate continuing, serious emotional and social problems throughout their lives.

Increase the number of secondary child abuse victims – individuals impacted but not experiencing abuse directly, such as siblings – provided support and education.

- ⇒ The number of secondary victims has more than tripled since 1995 as programs began to target services to everyone impacted by the violence of child abuse.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: ABUSED CHILDREN

Narrative

Number of Abused Children Served Through Abused Children Programs

Activity Funding

The federal VOCA funding results from fines, forfeitures, and other monies collected from federal offenders and is awarded in form of a grant to Department of Public Safety. Federal Victims of Crime Act funds may not be used to supplant state and local funds that would otherwise be available for crime victim services. Beginning in FY 2003, the federal dollars will be awarded directly to the Department of Public Safety. CFL retains administrative responsibilities.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program: PREVENTION

Activity: CHILDREN'S TRUST FUND

Narrative

Activity Description

Citation: M.S. 119A.10 to M.S. 119A.17; 119A.35

Community Based Family Resources and Support
Program Grants for Children's Trust Fund Title II Child
Abuse Prevention and Treatment Act 42 U.S.C. 5116

The Children's Trust Fund (CTF) helps to prevent child abuse and neglect by giving parents the tools and resources they need to parent their children effectively.

Population Served

From 2000-2002, the CTF awarded 45 grants based on principles of promising practice in preventing child abuse and neglect. The practices supported by grant funding include: parenting support and education, home visiting, and crisis nursery/respite care. Additionally, some grant funded programs focus on specific areas of high need including: ethnic/cultural populations, gender and/or geographic locations. The Department of Children, Families and Learning (CFL) awarded grants to 26 programs in greater Minnesota and 19 grants in the metro area.

Activity at a Glance

- ◆ Children's Trust Fund serves almost 15,000 families, and 16,000 children in 45 programs.
- ◆ Child Abuse Prevention Councils are located in 85 of the state's 87 counties.
- ◆ 98% of the programs have significant involvement of parents in the governance of the agency serving them.
- ◆ 112 grants statewide averaging \$45,800.

Services Provided

Programming ranges from parenting education and support activities, to respite care, to fathering education and support services and school-based programs for adolescent parents and their children. Grants are awarded with state and federal funds to nonprofit and public agencies providing child abuse and neglect prevention services, male responsibility and fathering programs, and adolescent pregnancy prevention programs.

The CTF creates and maintains a community-based prevention infrastructure through a network of authorized local Child Abuse Prevention Councils (CAPCs) in 85 of the 87 counties in the state. CAPCs are grass roots, community-based, volunteer organizations. Their purpose is to develop and promote educational campaigns designed to raise awareness of and prevent child abuse and neglect.

Historical Perspective

The Children's Trust Fund was established in Minnesota in 1986. In 1992, federal grants (CBFRS- Community Based Family Resource and Support) were made available to assist state in supporting their families with child abuse prevention programming. Minnesota has received the federal grant each year for the past decade.

The Children's Trust Fund, in partnership with the Abused Children Program, supports the Children's Advisory Council. The Children's Advisory Council was created in 2001 when the legislature combined the previously existing Children's Trust Fund Advisory Council and the Abused Children Advisory Council into a single advisory body charged with identifying unmet needs and establishing goals for children abuse prevention and intervention resources in Minnesota. The Children's Advisory Council began meeting in the spring of 2002 with 22 representatives, 18 of who were appointed by the governor.

Key Measures.

Maintain the number of school-aged youth reporting that they feel their parents' care about them as measured in the Minnesota Student Survey conducted every three years.

- ⇒ Data from the 2001 survey shows that a vast majority of students reported that they feel their parents care about them a great deal—88% of 12th grades, 90% of 9th graders, and 96% of 6th graders. These trends are relatively stable across the three points in time in which the survey was administered.

Decrease in the numbers of families with determinations of Child Maltreatment

- ⇒ As reported in a Department of Human Services (DHS) report titled "Minnesota's Child Welfare Report for 2000" in 2000, 24,680 reports alleging child maltreatment were taken by local Child Protection offices. Of those, 47% (or 11,845) were found to be cases where determination of maltreatment could be made.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: CHILDREN'S TRUST FUND

Narrative

- ⇒ Reports from DHS indicate a slight downward reduction in the maltreatment rate per 1,000. 1992 was a 10-year high with 9.1 children per 1,000 proven abused, while in 2001 the rate is 8.5 per 1,000.
- ⇒ The report documents racial and ethnic groups most at risk for maltreatment. African-American and Native American are seven times more likely to be victims of abuse.

Reduce the number of births by youth under the age of 18.

- ⇒ There were 1,790 births to teens in 2000. The rate of teen births has declined since 1993 for almost every region in the state and for the state as a whole.

Activity Funding

The program receives funding from three sources.

- ⇒ State General Fund: Included in this appropriation are funds to support child abuse prevention programs, male responsibility and fathering programs and adolescent parenting programs.
- ⇒ Federal: The annual federal grant award is based on a child population formula and totals \$1.945 million in federal FY 2002. The federal award can be expended over three years. The Minnesota CTF is the designated program to receive the Community Based Family Resource and Support Program (CBFTS) monies.
- ⇒ Special Revenue: CTF receives revenue from a \$3 surcharge on birth certificates and the interest earned on a trust account.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: PARENTING TIME CENTERS

Narrative

Activity Description

Citation: M.S. 119A.37; 517.08, subd. 1.c.(2)

Parenting Time Centers reduce children's vulnerability to violence and trauma related to family visitation (parenting time) and assist children in developing a relationship with an estranged parent, grandparent, or other family member.

Population Served

Centers serve children from newborn to 18 years of age. The majority of children served are six years old or younger.

Activity at a Glance

- ◆ Almost 1,600 children and 1,000 families were served in eight centers during 2001.
- ◆ 3,450 visitations were provided in 2001, an increase of 21% over the previous year.
- ◆ 4,000 exchanges were arranged in 2001, an increase of 26% over the previous year.

Services Provided

Parenting grants have been awarded to eight parenting time centers statewide. Centers serve residents of Becker, Carver, Crow Wing, Itasca, Kandiyohi, Hennepin, Mower, Otter Tail, St. Louis, Scott, and Stearns counties. These centers provide a safe place for non-custodial parents or parents of children in foster care to visit and/or exchange children. Many programs offer additional services, including parent education, child/parent groups, and toy and book lending libraries.

Parenting time and exchanges are often court ordered, but child protection workers, attorneys, or therapists may also refer families. Upon request, center staff provides courts and/or child protection with documentation of parent/child interaction observed during supervised visits.

Historical Perspective

The Minnesota legislature first funded Family Visitation Centers in 1992. During the 2000 legislative session, the name of the program changed from Family Visitation Centers to Parenting Time Centers.

Key Measures

Increase the number of children provided safe visitation and supervised visits annually.

⇒ 32% increase in number of children served in 2001 from previous year.

⇒ 23% increase in the number of families accessing Parenting Time Center resources last year.

Number of Visitation and Exchanges through Parenting Time Centers

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: PARENTING TIME CENTERS

Narrative

Activity Funding

The program has two sources of state funding: 1) general fund, and 2) \$3 in special revenue funds from the sale of each marriage license. Funds are distributed through competitive grant application to sites statewide.

M.S. 119A.37, subd. 1 requires local programs to provide a 25% state fund match. In FY 2001, sites reported a 138% match of state dollars with local cash or in-kind donations.

Some programs have purchase of service contracts with county child protective services. Courts sometimes order the offending parent to pay a fee to the center. Most centers have a sliding fee scale, but centers waive the fee for victims of domestic violence.

Beginning in FY 2002, CFL entered into an interagency agreement with the Department of Public Safety to administer this grant program because of the close association that Parenting Centers have in providing services to abused children and their families (see the Abused Children Narrative). Through this interagency agreement, the Department of Public Safety provides grant administration, monitoring, compliance and technical assistance to local grantee programs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: AFTER SCHOOL ENRICHMENT GRANTS

Narrative

Activity Description

Citation: M.S. 124D.221

The After School Enrichment is a state funded program with two goals: 1) to prevent at-risk behavior by children during out-of-school time hours; and 2) to enrich the development of children through involvement in quality programming.

Activity at a Glance

- ◆ Participation in the 44 programs statewide increased by over 30% in the last reporting year to almost 59,000 youth.
- ◆ Participant contact hours averaged three hours per week during 2001.

Population Served

The program serves at-risk, school aged youth before-school, after-school, and in the summer with programming provided through partnerships that effectively utilize and build on existing community resources.

Services Provided

After School Enrichment provides funding for community-based partnerships to bring together school and community youth-serving organizations and provide a variety of activities for children and adolescents. Programming offered includes skill building in the use of computers, the arts, athletics, and other cultural enrichment programs that engage youth in constructive activities, as well as tutoring, homework help and other academic support.

After School programming includes before and after school, weekend, summer, and release time programming. The grants are designed to encourage local control and collaborative decision-making about allocating resources efficiently to the services communities identify as most important. Local After School grantees are selected through open competition with priority given to local partnerships with experience in providing youth programming and maximizing resources. These partnerships usually involve representatives of youth-serving organizations, schools, recreation departments, local government, parents, and youth. In 2001, 59% of the grantees selected for funding in 2001 had previously received After School funding.

Three programs focusing on out-of-school time—School-Age Care, Minnesota's After School Enrichment Program and the 21st Century Learning Centers—work on promoting school connectedness. These programs provide complementary activities to what goes on during the school day. Activities include tutoring, recreational programs, and work in computer, sports and arts that help build well-rounded youth, particularly during key time periods during the day when youth lack adult supervision and opportunities to engage in structured activities.

Key Measures

Increase by 15% the number of at-risk youth participating in before, after school, and summer programming.

- ⇒ Programs reported a 31% increase in participation in 2000-01.
- ⇒ 38% report a decrease in juvenile crime.
- ⇒ 74% report that participants were involved in community service.

Maintain at-risk youth participation level at two hours or more per week.

- ⇒ Programs reported participation at three hours per week in 2000-01. A 1997 study by the U.S. Department of Health and Human Services showed that youth spending one to four hours per week in out-of-school time programming are less likely to use drugs and become teen parents than their peers who do not participate.

Improve academic achievement.

- ⇒ 76% of the 2000-2001 programs report increased academic achievement.
- ⇒ 47% report improved school attendance.
- ⇒ 82% reported on increased skill in technology.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: AFTER SCHOOL ENRICHMENT GRANTS

Narrative

Activity Funding

After School Enrichment funding is provided through a state general appropriation. FY 2003 funding is \$5.51 million. Grant requests consistently exceed available funding. In 1998, 111 programs requested \$17 million for After School Enrichment Grants. Of these requests, 24 programs received grants. In 2000, 148 programs requested After School Enrichment Grants. Of these requests, 34 programs received grants. In 2002, 160 programs applied from throughout the state and 44 programs were funded. Most applicants are funded at the level they request.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: 21ST CENTURY COMMUNITY LEARNING CENTERS

Narrative

Activity Description

Citation: Elementary-Secondary Education Act, Title IV, Part B, Sec. 4201-4026

The 21st Century Community Learning Centers is a federal program that funds academic, artistic and cultural enrichment programs during out-of-school time to help children and adolescents attending low performing schools or schools with concentrations of families in poverty improve academic achievement.

Activity at a Glance

- ◆ 21st Century Community Learning Centers was transferred from federal to state administration beginning July 1, 2002.
- ◆ Grants will be made to local school/community partnerships through open competition during the fall of 2002, with local programming beginning February 2003.

Population Served

School aged youth attending Title 1 schools with a rate of poverty of 40% and/or identified as "in need of improvement" and their families are targeted by this program.

Services Provided

Programs provide academic and cultural enrichment activities to support academic achievement before and after school, on weekends, summer breaks, and school early release times. Allowable activities include tutoring services, youth development activities, drug and violence prevention programs, counseling programs, art, music and recreation, technology education programs, and character education programs that are designed to reinforce and complement the regular academic instruction. Literacy and other educational opportunities may be offered for the families of eligible youth.

Historical Perspective

This program was funded and administered by the U.S. Department of Education from 1998 to June 30, 2002. Currently, 23 Minnesota programs receive these federal grant funds.

Three programs focusing on out-of-school time—School-Age Care, Minnesota's After School Enrichment Program and the 21st Century Learning Centers—work on promoting school connectedness. These programs provide complementary activities to what goes on during the school day and function to support the work of the schools. Activities of these "after school" programs include tutoring, recreational programs, and work in computer, sports and arts that help build well-rounded youth, particularly during key time periods during the day when youth lack adult supervision and opportunities to engage in structured activities.

Key Measures

Minnesota impact data is not currently available because the program was transferred from federal to state administration in July 2002. Minnesota impact data will be available in the fall of 2003.

- ⇒ Increase the percentage of youth meeting school district attendance goals.
- ⇒ Increase the percentage of youth meeting or exceeding local academic achievement standards in reading or math.
- ⇒ Maintain youth participation level at two hours or more per week as measured by average contact hour reports.

Activity Funding

Announcement of new funds available for local programming was made in July, 2002, by CFL with applications due October 30, 2002. Approximately 8 to 10 programs will be funded during this first year of state administration for up to five years of programming based on continued availability of federal funds.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: SAFE & DRUG-FREE SCHOOLS

Narrative

Activity Description

Citation: Elementary and Secondary Education Act, 2001, Title IV, Part A, Secs. 4001-4124, 4126; 20 U.S.C. 7111-7117

This program is funded by federal sources to assist and support programs to prevent violence in and around schools and to prevent the illegal use of alcohol, tobacco, and other drugs.

Activity at a Glance

- ◆ 846,000 children and youth are served annually in 364 districts and charter schools.
- ◆ Approximately 20 at-risk youth grants funded annually.
- ◆ All school districts receive enrollment-based allocation of approximately \$4 per student.

Population Served

Youth in grades kindergarten through twelfth grade are the targeted participants for Safe and Drug-Free Schools and Communities (SDSFC) programs. These funds are targeted through grants or contracts to school districts and charter schools, parent groups, law enforcement agencies, community action agencies, community-based organizations, and other public and private organizations to address violence and drug abuse problems in schools and communities.

Services Provided

The purpose of Safe and Drug-Free Schools and Communities funding is to:

- ◆ support research-based drug abuse and violence prevention and education programs that involve parents and are coordinated with related community efforts and resources programs;
- ◆ provide grants to local and intermediate educational agencies and charter schools to establish, operate, and improve local programs of violence and drug abuse prevention, early intervention, rehabilitation referral, and education in elementary and secondary schools; and
- ◆ provide grants to and contracts with community-based organizations for programs of violence and drug abuse prevention and education, early intervention, and rehabilitation referral for school dropouts and other high-risk youth.

Historical Perspective

The original Drug-Free Schools Act was passed in 1986 authorizing the U.S. Department of Education to provide funding to state to prevent substance abuse by youth. The most recent reauthorization of the Act occurred in 2001 as part of the "No Child Left Behind Act."

Key Measures

Increase the proportion of youth reporting they feel safe at school.

- ⇒ About 90% of youth reported in 2001 that they feel relatively safe at school – about 90% for each of grades 6, 9, and 12 based on the Minnesota Student Survey results. Recent research from the National Adolescent Health Study has shown that feelings of safety and security at school and a positive school climate are one of the strongest protective factors associated with positive youth outcomes in a wide range of areas, including school-related indicators of success.

Increase the number of youth remaining abstinent from alcohol, tobacco, and other drug use, while delaying the onset of experimentation with alcohol, tobacco, and other drugs.

- ⇒ Data from the Minnesota Student Survey show small but positive shifts relating to youth choosing not to use tobacco, alcohol, and marijuana between 1998 and 2001.

Reduce the number of youth engaging in high-risk patterns of substance use, such as binge drinking.

- ⇒ Data from the Minnesota Student Survey shows the pattern of binge drinking has stayed relatively stable across time, with small minimal decreases between 1998 and 2001. In 2001, 17% of 9th grade males and 15% of 9th grade females reported drinking 5+ drinks at a time within the past two weeks, as did 39% of 12th grade males and 25% of 12th grade females.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: SAFE & DRUG-FREE SCHOOLS

Narrative

Activity Funding

Minnesota receives the SDFSC under Title IV from the U.S. Department of Education. This grant is divided into two different categories: 1) state education agency (SEA), and 2) Governor's Safe and Drug-Free Schools.

Public school districts, regional education agencies, charter schools, and other school district consortia access funds through submission of a four-year application to Children, Families & Learning (CFL). The department requires that school districts submit a single application detailing the use of Safe and Drug-Free Schools funds and Minnesota Violence Prevention Education funds (M.S. 120B.22). School-based program funds are allocated according to an entitlement formula based 60% on the relative amount such agencies received under part A of ESEA Title I for the preceding year and 40% on public and nonpublic school enrollment with a district.

Community-based program funds – the Governor's Program – are targeted to impact youth at-risk of school failure and are awarded through the Prevention & Intervention competitive grant process. Eighty percent of the Safe and Drug-Free Schools funds received by the state are allocated to the school-based program; the remaining 20% is allocated to the Governor's Program.

Ninety-four percent of these funds are used for subgrants to local education agencies and community-based organizations. In accordance with federal law, 4% is used by the state agency for technical assistance, capacity building, training, evaluation and program improvement and coordination activities; and 2% is used for administrative costs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: SCHOOL AGE CARE REVENUE

Narrative

Activity Description

Citation: M.S. 124D.19; 124D.22

School-Age Care (SAC) Revenue is a state aid and levy program that supports after school programming for children with disabilities or children experiencing family or related problems of a temporary nature. While funding is provided only for these students, many districts offer school age programming funded primarily through parent fees to other students.

Activity at a Glance

- ◆ 195 school districts offered school age care programs in 2001.
- ◆ 141 school districts certified levies in 2001.
- ◆ Over 56,000 children participate annually.

Population Served

Services are for children with disabilities or who experience problems of a temporary nature and participate in out-of-school time programs while parents are at work are funded by this program.

Services Provided

Activities of these "after school" programs include tutoring, recreational programs, and work in computer, sports and arts that help build well-rounded youth, particularly during key time periods during the day when youth lack adult supervision and opportunities to engage in structured activities. Local school districts set the standards of the program which must include the following components:

- ◆ adult supervised activities while school is not in session;
- ◆ parent involvement in program design and direction;
- ◆ partnerships with K-12 system, and other public, private, or nonprofit entities;
- ◆ opportunities for trained secondary school pupils to work with younger children as part of a community service program; and
- ◆ access to available school facilities when otherwise not in use as part of the operation of the school.

Historical Perspective

The Minnesota Legislature created the school age care program (previously called Extended Day) in 1989. No authorized levy or state aid was appropriated at that time.

In 1992, the legislature authorized school districts to levy for programs to serve children with disabilities or children experiencing family or related problems of a temporary nature who participate in the school age care program. Problems of a temporary nature include events such as medical emergency, divorce, and behavioral changes due to a move. All state aid and levy funding goes to fund the additional costs of providing services for these children.

The number of districts authorized to levy has grown from 109 in 1995 to 141 for the 2001 school year.

Public schools age care programs have grown from 40 districts to 195 districts in 2001. Over 56,000 children participate in these programs.

Key Measures

Increase the number of school districts that levy for the SAC disabilities revenue and increase the number of children with disabilities served by the SAC programs.

⇒ FY 2000-01, 120 districts claimed levy expenditures serving 2,529 children.

Activity Funding

The School Age Care Revenue for a district equals the eligible additional cost of providing services to children with disabilities or who experience problems of a temporary nature and participate in out of school time programs while parents are at work. The levy authority equals the revenue times the lesser of one, or the ratio of the quotient derived by dividing the adjusted net tax capacity by the actual pupil units, to \$3,280. State aid equals the difference between the revenue and the levy.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: STATE INCENTIVE GRANT

Narrative

Activity Description

Citation: P.H.S. Act Section 501 (D)(5)

The purpose of this federally funded program is to reduce substance abuse among youth by developing and implementing a statewide prevention strategy grounded in research findings designed to improve community-based prevention efforts. This project is completing its final year of funding. No new funds will be received in FY 2003.

Population Served

In 1999, three-year grants were made through the competitive Prevention and Intervention grant process to community-based organizations across the state to implement research-based substance services for pre-adolescents and adolescents.

Services Provided

A multi-agency partnership including the state departments of Health (MDH), Human Services (DHS), Public Safety and Children, Families & Learning (CFL) established an advisory body comprised of state and local representatives to conduct a needs assessment regarding youth substance abuse prevention programs. This needs assessment will result in a plan for increased efficiency and impact that will be forwarded to the governor for review and implementation in fall 2002 for review.

State Incentive Grants (SIG) are testing a variety of youth and community-focused prevention strategies to demonstrate their effectiveness. Strategies include community-wide public health initiatives, school-based curricula, early intervention strategies, and culturally specific programs. Each SIG grant is required to document impact information with the results reported statewide and nationally. Process evaluation results are currently available. Outcome evaluation results will be available in 2003.

Historical Perspective

In 1998, Minnesota received a three-year partnership award from the federal Substance Abuse and Mental Health Services Administration/Center for Substance Abuse Prevention (CSAP). Four state agencies combined in leading this application and its implementation: CFL; MDH; Public Safety; and DHS.

The partnership is expected to coordinate, leverage, and/or redirect all substance abuse prevention resources toward promising preventive approaches that reduce use of marijuana and other drugs by youth.

In 1999, Safe and Drug-Free Schools Governor grant funds were folded into the SIG grant process to simplify application and reporting processes for local communities.

Key Measures

The Statewide Youth Alcohol, Tobacco, and Other Drugs (ATOD) Prevention Plan targets three goals for substance-use focused prevention programs across Minnesota.

- ⇒ Increase the proportion of youth who abstain from tobacco, alcohol, and other drug use.
- ⇒ Delay the onset of use of alcohol, tobacco, and other drugs among youth.
- ⇒ Reduce high-risk patterns of substance use among youth.

Data from the Minnesota Student Survey show small but positive shifts relating to youth choosing not to use tobacco, alcohol, and marijuana between 1998 and 2001. These changes reflect the results of a number of prevention initiatives going on in Minnesota, including the 21 projects funded through SIGs.

Activity at a Glance

- ◆ Numbers served through 19 SIG funded programs to date:
 - Youth – 33,000
 - Parents – 33,000
 - Families – 13,000
 - Teachers – 9,000
- ◆ Partnership between Minnesota Departments of Health; Human Services; Public Safety; Children, Families & Learning; and the U.S. Department of Health and Human Services Center for Substance Abuse Prevention.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: STATE INCENTIVE GRANT

Narrative

Activity Funding

The CSAP three-year grant totaled \$8.9 million, with a minimum of 85% of the funds restricted to community-based program implementation.

In addition to the CSAP funds, \$1.2 million in federal Safe and Drug-Free Schools and \$1.3 million in Bureau of Justice Assistance, Edward Byrne Memorial Formula Grant Program funds were included in the 1999 grant awards to Minnesota programs.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: COORDINATED SCHOOL HEALTH

Narrative

Activity Description

Citation: P.L. 101-381

Coordinated School Health (CSH) is a federally funded program promoting coordinated efforts among schools, communities and families to measurably improve the health and educational status of Minnesota's young children.

Activity at a Glance

- ◆ Over 1,500 teachers, school staff, and public health educators were trained on best-practice, science-based health curricula.
- ◆ Over 50% of Minnesota health teachers have used CSH school health resources.

Population Served

CSH works with school district and public health agency staff statewide to provide health education to children.

Services Provided

Coordinated School Health (CSH) is a partnership between the Department of Children, Families and Learning (CFL) and the Minnesota Department of Health (MDH). The partnership agreement requires implementation of strategies to

- ◆ build infrastructure in state and local agencies so policies, procedures and resources are in place to support school health programs;
- ◆ strengthen the health education curriculum in the area of these health behaviors: unintended injuries, alcohol and other drug use, sexuality/HIV/AIDS, tobacco, diet and physical activity; and
- ◆ assist school districts in providing effective HIV/AIDS/STD education (M.S.121A.23).

Currently, staff provide training for both school and public health audiences, produce and identify written materials for distribution, conduct statewide conferences and workshops, and provide technical assistance to customers. A coordinated school health resource center is maintained to review, purchase and distribute videos, curricula and other instructional material for use in prevention programs focusing on sexuality and HIV prevention. Over 50% of Minnesota health teachers have used resources provided through the program. A 23-member panel representing a cross section of Minnesotans and a student panel review materials for the resource center.

Historical Perspective

In 1987, the Centers for Disease Control and Prevention (CDC) established cooperative agreements with many of the nation's state education agencies to help them implement health education programs designed to prevent HIV infection among youth. Each state, including Minnesota, received \$240,000.

In 1995, Minnesota became one of 13 states to be funded for a new program in coordinated school health. This program expanded the HIV/STD/Unintended Pregnancy Cooperative partnerships to include other youth risk behavior areas identified as leading causes of death in young people, such as drug and alcohol abuse; tobacco use; poor dietary habits; sedentary lifestyles; and intentional and unintentional injuries. The partnership agreement requires staffing of four positions, a director at MDH and CFL, a training facilitator, and a HIV/AIDS specialist. Funding is restricted to activities and programs detailed in the partnership agreement.

In 1996, the state of Minnesota began a pilot program to develop regional training sites for HIV/STD prevention. The purpose of these sites is to assist school districts in implementing M.S. 121A.23. Two sites in greater Minnesota and one site in the metro area were established. In 1998, the legislature extended funding to those sites, and created two additional sites in greater Minnesota and an evaluation component.

Key Measures

Maintain the number of school districts incorporating education into classroom instruction relating to increasing youth health as reported in the School Health Profile report. Data collected from the 2002 School Health Profile report shows that of the 97% of Minnesota school districts requiring health education for 6th through 12th grade students:

- ◆ 99% reported teaching about positive dietary practices;
- ◆ 100% reported teaching about tobacco use prevention;

CHILDREN, FAMILIES & LEARNING

Program: PREVENTION

Activity: COORDINATED SCHOOL HEALTH

Narrative

- ◆ 98% reported teacher about alcohol and drug prevention;
- ◆ 98% reported teaching about prevention of sedentary lifestyles;
- ◆ 99% reported teaching about HIV prevention; and
- ◆ 98% reported teaching about preventing other sexually transmitted diseases (STD's).

Activity Funding

Funding for the Coordinated School Health Project is provided through a federal cooperative agreement with the CDC. Current annual funding is \$690,000 for two purposes:

- ◆ federal HIV/AIDS funding (\$250,000), and
- ◆ federal coordinated school health funding (440,000).

The department must apply every year to renew the five-year cooperative agreement with the CDC. This is a competitive grant process. Currently, CDC funds 21 states for this initiative. The block grant is up for reauthorization after FFY 2002. The state will apply for continued funding.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: MN ECONOMIC OPPORTUNITY GRANTS

Narrative

Activity Description

Citation: M.S. 119A.374-.376; Community Services Block Grant (CSBG) PL 97-35

Funding for the Minnesota Economic Opportunity Grant (MEOG) and the federal Community Services Block Grant provides low-income citizens with the information and skills necessary to become more self-reliant and to alleviate the effects of poverty in Minnesota.

Population Served

Approximately 200,000 economically disadvantaged households are served annually. Many of these households are working and still meet income eligibility guidelines for program services. The federal poverty guidelines are used.

Activity at a Glance

- ◆ Community Action Agencies (CAAs) serve 200,000 economically disadvantaged households annually statewide.
- ◆ The state Minnesota Economic Opportunity (MEOG) and the federal Community Services Block Grant (CSBG) serve as the base funding for CAAs and together leverage \$240 million in other federal, state, local, and private funds to break the cycle of poverty.
- ◆ 48,000 volunteers provide 1.5 million hours of service.

Services Provided

A statewide network of 40 Community Action Agencies (CAAs), including 11 Indian Tribal Governments, deliver the locally designed programs.

CAAs are locally governed. A unique feature of CAAs is that members of the low-income community must make up one-third of each local governing board. Local elected officials and representatives from the local private sector constitute the other two-thirds.

Each grantee assesses needs and assets, establishes priorities, determines strategies to respond to local poverty issues and delivers a broad range of services and activities to strengthen self-reliance. CAAs are known by the services they offer, which include:

Energy Assistance
Family Assets for Independence in Minnesota (FAIM)
Food Shelves
Head Start

Homeless Prevention and Housing
Senior Dining
Transportation
Weatherization

Minnesota Economic Opportunity Grant funds are used to support all of these services across the state. Activities are locally determined and designed to provide a range of services based on local needs and are delivered using a variety of different mechanisms. Services include:

- ◆ intervention programs designed to provide immediate assistance for basic needs to stabilize households in economic crisis;
- ◆ family support programs that partner with clients seeking to become more self-reliant and build assets;
- ◆ economic development initiatives and entrepreneurial projects; and
- ◆ community building and advocacy.

Because of their ambitious mission of alleviating the effects of poverty, CAAs have a strong tradition of partnering with other community services. By sharing resources and developing partnerships, these agencies realize both cost and timesavings in providing services. Clients benefit as the traditional barriers between agencies dissolve and everyone works together toward a common goal of helping to increase self-reliance.

Historical Perspective

CAAs are federally recognized organizations and were established in the 1964 Economic Opportunity Act to fight America's "War on Poverty." Funding for the state MEOG program began in 1976. Federal funding for community action began in 1965 and was block granted into the Community Service Block Grants in 1981 when the federal government created block grants.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: MN ECONOMIC OPPORTUNITY GRANTS

Narrative

Key Measures

One of the goals of Children, Families & Learning's Strategic Plan is to strengthen families and build a solid foundation for living and learning. One of the outcomes relating to this goal is that families and individuals are moved out of poverty and all families provide a stable environment for their children. This budget activity reports information on the indicator that "low-income people will be more self-sufficient."

Community Action grantees utilize results oriented management and accountability (ROMA), a national interagency initiative promoting outcome-based management strategies to continuously improve results at the more than 1,000 community action agencies nationwide. Additional information on ROMA can be found at www.romal.org.

As one part of their effort to measure outcomes, a Self-Reliance Achievement Scale was piloted with seven CCAs in September 2000. Preliminary results from the first year of the pilot indicate that participants are experiencing positive outcomes. Continued effort is necessary to learn whether or not the findings will hold true over time and to insure the reliability and validity of the data. Subsequent to the pilot, the Self Reliance Achievement Scale was implemented statewide.

Examples of the benefits provided by Community Action agencies to participants in the pilot based on the Self Reliance Achievement Scale include the following.

- ⇒ 43% of those with incomes inadequate to meet the costs of food and shelter at first observation reported that after receiving Community Action services, they were able to meet the costs of food and shelter.
- ⇒ 37% of those who received services related to employment increased their hours of employment by at least 10 hours or more.
- ⇒ 70% of those who were homeless or in emergency and/or transitional housing at first observation reported an increase in housing stability after receiving services such that they were in market rate or subsidized rental housing or were home owners at last observation.

Activity Funding

This budget activity includes the state MEOG as well as the federal CSBG.

Funding is allocated statewide using a statutory formula based on the number of people living in poverty in each grantee's community and a base amount.

CAA programs are funded with various sources: state, federal, and private funds.

While federal and state laws provide overall direction that govern MEOG and CSBG expenditures, the flexibility for local agencies in terms of the use of the funding has been essential. The need for access to flexible funds has been exemplified by emergency services that CAAs have provided to local residents affected by flooding, tornadoes, and other catastrophic events.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: TRANSITIONAL HOUSING PROGRAM

Narrative

Activity Description

Citation: M.S. 119A.43

The Transitional Housing Program (THP) provides housing assistance and support services to individuals and families experiencing homelessness. The program supports participants in moving into and maintaining independent, stable, permanent housing.

Population Served

Individuals and families who experience homelessness are eligible for transitional housing. This program serves varied populations including domestic violence survivors, veterans, single parent and two parent families, single adults, unaccompanied youth, migrant and seasonal farm workers, and people with HIV/AIDS, mental illness or chemical dependency.

Children represent the fastest growing segment of the homeless population. In 1985, the majority of persons using shelters and transitional housing were men. By 2000, children had become almost 50% of this population. The increase in the numbers of homeless families is partially attributed to the disparity between income and housing costs. Welfare reform and the recent economic downturn also contribute to problem of homelessness.

The percentage of persons using shelters who are employed has risen from 19% in 1991 to 41% in 2000. Tight housing markets have resulted in increasing rents, lower vacancy rates, fewer landlords accepting housing subsidies such as Section 8, and stricter screening of potential tenants for bad rental or credit histories. The 2000 Statewide Survey of Homeless Adults, Children, and Youth in Minnesota conducted by Wilder Research Center provides information about the causes and dynamics of homelessness.

Services Provided

The Transitional Housing Program funds housing in congregate facilities and scattered site apartments. Participants must pay at least 25% of their household income for rent, and program stay is limited to 24 months. Participants work with a case manager to develop an individualized plan to work toward self-reliance and permanent, stable housing. Participants work regularly with a case manager to overcome the obstacles preventing them from attaining and maintaining permanent housing. Services may include job search, job training, chemical dependency treatment, mental health treatment, transportation, child care, as well as others. THP programs also coordinate with other social services programs.

Historical Perspective

In the 1980s, transitional housing was developed to reintegrate an increasing number of homeless persons back into stable, permanent housing. The Minnesota Legislature established the State Transitional Housing Program in 1984. Over time, funding for this program has grown, but the number of persons in need of services has also steadily increased.

Key Measures

One of the goals of Children, Families & Learning's Strategic Plan is to strengthen families and build a solid foundation for living and learning. One of the outcomes relating to this goal is that families and individuals are moved out of poverty and all families provide a stable environment for their children. This budget activity reports information on the indicator "decrease the number of homeless people."

- ⇒ Almost 70% of participants moved into independent, permanent housing upon graduating from transitional housing programs.
- ⇒ 32% of the individuals receiving TANF at entrance into the program were no longer receiving these funds upon exiting transitional housing programs.
- ⇒ Transitional housing participants increased their full-time employment by 61% from program entrance to exit.

Activity at a Glance

- ◆ 65% of homeless parents and 60% of homeless single adults are homeless for the first time in their lives.
- ◆ 41% of all homeless adults and 43% of homeless parents are employed.
- ◆ 2,500 households in 2001 received housing and support services through the program.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: TRANSITIONAL HOUSING PROGRAM

Narrative

Activity Funding

The department awards state funding on a competitive basis to nonprofit transitional housing agencies. During the 2002-03 biennium, \$7.8 million was available from a combination of state aid (\$4.0 million) and federal TANF funds (\$3.8 million). In FY 2002-03, 81 service providers received funding with an average grant of \$60,000.

Transitional Housing Program funding is flexible to best meet the local needs of Minnesota communities. Funds are awarded on a competitive basis in conjunction with the following federal homeless programs funding.

- ⇒ The Emergency Shelter Grant Program (ESGP) provides federal funds to shelters and transitional housing programs for operating costs, essential services, and homelessness prevention. In the 2002-2003 biennium, \$2.2 million was awarded to 36 programs.
- ⇒ The Rural Housing Assistance and Stability Program (RHASP), funded under the federal Supportive Housing Program (SHP), provides supportive services to homeless people to move them into permanent housing. Supportive services may include first month's rent, damage deposit, assistance with down payment, transportation and child care costs, assistance with job search and self-sufficiency case management. The White Earth Indian Reservation, 20 rural Community Action Agencies, and an organization serving migrant farm workers agencies receive RHASP funding.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: FOOD SHELF PROGRAM

Narrative

Activity Description

Citation: M.S. 119A.44; 7 U.S.C. 612c, 42 U.S.C. 9910a, sec. 681A

The purpose of the program is to provide food to low-income individuals and families who have exhausted other resources to meet their basic nutritional needs.

Population Served

It is estimated that one in 22 Minnesotans received help from a food shelf in 2001, and half of those served were children under the age of 18.

- ⇒ In 2001, one-half of the individuals served at food shelves were children, 20% were seniors.
- ⇒ Eleven percent of the children served at food shelves are forced to skip meals because there is not enough food in the home; 43% of their parents are skipping meals also.
- ⇒ Forty three percent of the households statewide report paid employment as the family's major source of income. In the Twin Cities suburbs the number of working poor approaches 60% of the families served. The working poor is the fastest growing group of food shelf clients.
- ⇒ Sixty five percent of the households using food shelves report incomes below \$799 a month, less than \$9,500 a year.

The effects of welfare reform, low wages, and the high costs of child care, housing, and health care continue to leave many individuals and families hungry. In 2001, Minnesota's 320 food shelves distributed over 29 million pounds of food to 1.32 million individuals. High housing and prescription costs, and low wages are cited by these populations as reasons for increased reliance on emergency food sources.

Services Provided

Food banks, food shelves, on-site meal programs, and shelters provide food through the programs described below.

Minnesota Food Shelf Program (MFSP)

The department grants MFSP funds to Hunger Solutions Minnesota (HSM) for distribution to over 300 individual food shelves throughout the state. Food shelves use these funds to purchase nutritious foods and to offset operating costs. Each food shelf is a nonprofit organization that distributes food to individuals and families based on need. HSM allocates funds to food shelves semi-annually based on the number of individuals served by each food shelf during the previous six-month period.

The Emergency Food Assistance Program (TEFAP)

The department partners with HSM to distribute U.S. Department of Agriculture (USDA) TEFAP commodities. HSM is comprised of six regional Second Harvest food banks that provide a balanced distribution of commodities to all 87 counties. TEFAP commodities are allocated to the regional food banks based on the population and poverty level of their service areas.

Community Food and Nutrition Program (CFNP)

The CFNP is federally funded under the Community Services Block Grant to improve nutrition for low-income people. CFNP funds are awarded to public or private organizations to coordinate existing public and private food assistance resources.

Historical Perspective

Established in 1981, The Emergency Food Assistance Program distributes USDA food commodities through food shelves, on-site meal programs, and shelters to low-income individuals and families. TEFAP funds are used to cover costs associated with the distribution of USDA commodities, including warehousing, transportation, commodity tracking and allocation, and technical assistance. State matching funds are required.

Activity at a Glance

- ◆ In 2001, Minnesota's 320 food shelves distributed over 29 million pounds of food to 1.32 million individuals.
- ◆ This is an increase of almost 10% over the previous year and is the largest single year increase in more than a decade.
- ◆ One-half of the individuals served at food shelves are children, 20% are seniors.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: FOOD SHELF PROGRAM

Narrative

The state began funding food shelves in 1992 because the demand for food assistance could not be met without state help, and the legislature realized the importance of a stable diet for all Minnesotans.

Key Measures

One of the goals of CFL's Strategic Plan is to strengthen families and build a solid foundation for living and learning. One of the outcomes relating to this goal is that families and individuals are moved out of poverty and all families provide a stable environment for their children. This budget activity reports information on the indicator "low-income people will not go hungry."

HSM reports the following evaluation findings from FY 2001:

- ⇒ Those who used food shelves do so an average of 6 times a year. Nearly 40% used a food shelf only once or twice a year.
- ⇒ The six Second Harvest Food Banks distributed 5.5 million pounds of USDA TEFAP commodity food to over 250 food shelves and 500 on-site meal programs and shelters.

Activity Funding

This budget activity is funded with both state and federal funds.

TEFAP provided over \$600,000 in federal funds and approximately five and a half million pounds of food in 2001. State program administration funding is matched dollar-for-dollar by USDA.

Emergency Food Program Funding by Federal Fiscal Year

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: ADULT BASIC EDUCATION AID

Narrative

Activity Description

Citation: M.S. [124D.52](#); [124D.53](#) ;

Federal Citation: P.L. 105-220, Title II - The Adult Education and Family Literacy Act [Adult Education and Family Literacy Act of 1998](#)

This state and federal funded program provides education opportunities for adults who lack basic academic skills, and whose low educational levels are barriers to employment and to productive participation in their families and in our society.

Population Served

Adults are eligible to participate when they are at least 16 years old, are not enrolled in school (formally withdrawn or dropped out), and function below the high school completion level in basic skills. The 2000 U.S. census reports that 12% of Minnesotans over 25 lack high school equivalency - over 380,000 people. Over 200,000 Minnesota residents are immigrants or refugees in need of English skills. Enrollment in English as a Second Language (ESL) programs has doubled in the past five years. During FY 2002, over 37,000 adults enrolled in ESL classes and 46% of all enrollees in Adult Basic Education (ABE) were ESL learners.

Activity at a Glance

- ◆ 57 Adult Basic Education (ABE) consortia, 500 delivery sites statewide.
- ◆ 1,200 licensed teachers and 3,000 volunteers served over 82,500 learners in FY 2002.
- ◆ 1 out of every 6 diplomas issued in Minnesota during 2002 was a General Educational Development (GED) or Adult High School Diploma.
- ◆ 46% of all learners were English as a Second Language (ESL) students 66% were parents, and 19% were unemployed.
- ◆ Research shows that the average high school graduate earns about \$7,000 more per year than a drop out.

Services Provided

Adult basic education program options include the following choices.

- ⇒ **GED** (general education development diploma) - high school equivalency program [Minnesota Department of Children Families & Learning -- GED](#).
- ⇒ **Adult Diploma** - programs for adults leading to a Minnesota high school diploma.
- ⇒ **English as a Second Language** - for learners whose language is other than English.
- ⇒ **Family Literacy** - features instruction for adults in literacy and parenting, and children receive education services as well through other funding sources.
- ⇒ **Basic Skills Education** - for learners who need to brush-up on some specific basic skills, such as math or reading (typically related to their employment).
- ⇒ **Workforce Preparation** - literacy skills related to learners' need to obtain, retain or improve their employment. Instruction uses work-related content, often delivered at the learner's work site.
- ⇒ **U.S. Citizenship and Civics** - programs for legal non-citizens and immigrants to attain English and civic knowledge necessary for U.S. citizenship and democratic participation.

State ABE funding supports individual public school districts or groups of districts (consortia) and other eligible nonprofit providers including community-based organizations and correctional institutions. ABE is provided at over 500 sites located in every Minnesota county at public schools, workforce centers, community/technical colleges, prisons/jails, libraries, learning centers, tribal centers, and nonprofit organizations. Programs have voluntarily formed ABE consortia (57 administrative units) to maximize efficiency and to share resources.

A literacy "hotline" has been established to link Minnesota residents with ABE programs statewide. This site is also used to refer persons who are interested in becoming volunteer tutors [Hotline](#).

In 2001, the reported waiting list for ABE services was 2,071 adults.

Key Measures

Increase the percentage of Minnesota adults who currently lack basic skills to achieve their educational and economic goals through participation in adult basic education programs.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: ADULT BASIC EDUCATION AID

Narrative

| Selected Outcome Results | FY 1998 | FY 2002 | Percent Change |
|-----------------------------------|---------|---------|----------------|
| Enrollment | 48,220 | 82,778 | 72% |
| GEDs Earned | 6,270 | 11,268 | 80% |
| H.S. Diplomas Earned | 920 | 1,224 | 35% |
| Left Public Assistance | 132 | 156 | 18% |
| Entered Post-Secondary Education | 2,070 | 2,865 | 38% |
| Earned U.S. Citizenship* | 1,100 | 408 | -63% |
| Able to Assist Children in School | 1,045 | 1,895 | 81% |
| Gained or Better Employment | 1,895 | 2,477 | 31% |
| Annual Cost Per Learner | \$307 | \$473 | 54% |

*In FY 1998 and FY 1999, ABE received a \$2 million state grant to promote citizenship acquisition. That grant ended in FY 2000 resulting in reduced outcomes for that measure.

Activity Funding

Adult basic education aid is formula-based on the following factors:

- ◆ base population aid at the greater of \$4,000 or \$1.80 times the census population of the member district; and
- ◆ of the remaining funds available, 84% is distributed based on prior year contact hours, 8% is distributed based on the population of K-12 Limited English Proficient (LEP) learners in the member district, and 8% is distributed based on the census population of adults aged 20 and over who do not hold a high school diploma.

Under the state funding formula, two funding caps are in law: 1) programs are held to a 17% or \$20,000 growth cap (the greater of) on contact hour revenue; and 2) programs are held to a gross revenue per contact hour of four times the base contact hour rate. By law, the total state ABE appropriation each year is set at the previous year's level times the lesser of 1.08 or the percentage increase in learner contact hours. Therefore the appropriation may by law increase as much as 8% each year as long as the growth in the preceding year contact hours was 8% or higher. The increase in learner contact hours over the past three years is given in the table below.

| | FY 2000 | FY 2001 | FY 2002 |
|---|-----------|-----------|-----------|
| Contact Hours | 3,205,283 | 3,552,917 | 4,170,176 |
| % Increase in Contact Hours Over Prior Year | 42.0% | 10.8% | 17.4% |

Under the federal Adult Education and Family Literacy Act (P.L.105-220), federal funds are received by CFL and must be used to coordinate with and supplement other ABE funds. Federal maintenance of effort provisions exist to promote the existing level of state resources.

The Adult Education and Family Literacy Act (AEFLA) requires state to keep within 90% of recent spending levels for adult education and literacy activities in order to continue to receive their full allotment of AEFLA funds. States spending at less than 90% face a drop in their federal allotments.

Federal Temporary Assistance to Needy Families (TANF) funds are used to provide ESL services. This is a time-limited appropriation for fiscal years 2001 through 2003.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: ADULT GRADUATION AID

Narrative

Activity Description

Citation: M.S. 124D.54

This state aid program provides funds for the Adult Graduation program to provide adults age 21 and above with options and opportunities to earn their high school diploma.

Population Served

Adults age 21 and over who have not completed high school may complete their secondary education under this program. The individual must qualify under one of the following criteria:

- ♦ eligible for unemployment benefits or have exhausted unemployment benefits;
- ♦ eligible for and receiving income maintenance or support services; and
- ♦ eligible under the displaced homemaker program, state wage subsidy program, or any program under the Workforce Investment Act.

Most participants supported by Adult Graduation Aid are students in high school or a state-approved alternative program who reach the age of 21 before meeting high school graduation requirement.

Unlike adult basic education where participation is based on proficiency in basic skills, participation in the Adult Graduation Aid program is time-limited (no more than 14 years of public or nonpublic education from age five) and tied to eligibility for unemployment benefits or services under the federal Job Training Partnership Act.

Services Provided

Eligible individuals may enroll in area learning centers, public alternative programs, or any public high school. Individuals may access postsecondary courses under the Postsecondary Enrollment Options program if eligible under that program.

Enrollment is currently limited to two school years or until the adult learner completes the course work required for graduation, whichever is less. At the completion of the program, the individual receives a high school diploma. Many adult learners are part-time students. In FY 2001, 2,190 adults participated in the program, the equivalent of 609 full-time students.

The decline in participation since 1998 is indicative of improved efforts to assist learners to meet graduation requirements before reaching age 21, and of district decisions to focus efforts on younger learners, relying on adult basic education programs to address the over 21 population. Efforts have also been increased to enforce eligibility requirements of section 124D.68.

Key Measures

Provide increased access and effective programming to economically disadvantaged Minnesotans over 21 who desire to earn their high school diploma.

Activity at a Glance

| ♦ FY 2001 participating districts | 103 |
| ♦ FY 2001 pupils | 609 |
| ♦ FY 2001 graduates | 291 |
| ♦ Individuals who receive their high school diplomas earn on the average about \$7,000 more per year than a dropout. | |

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: ADULT GRADUATION AID

Narrative

Number of Participants (Average Daily Membership)

Activity Funding

The aid amount for each eligible pupil for FY 2002 equals \$2,338 times 1.3 times the Average Daily Membership (ADM) for the pupil. For this aid, ADM equals yearly hours in membership divided by the instructional hours for the district. The district may not count pupils for any other purpose other than adult graduation aid. Participation is expected to increase due to increased K-12 dropout rates and adults entering Minnesota who do not possess high school diplomas.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: GED TESTS

Narrative

Activity Description

Citation: M.S. 124D.55

This state aid program provides increased access for eligible individuals to complete the test of general educational development (GED) by paying a portion of the student's GED testing fees.

Population Served

To be eligible to take the GED exam and have the cost subsidized by the state, an individual must meet three criteria:

- ◆ be a Minnesota resident and have been so for at least 90 days;
- ◆ not be currently enrolled in a program leading to a high school diploma; and
- ◆ not have the testing fee paid by another government agency.

In FY 2001-02:

- ◆ 23.8 years = average age of GED examinee.
- ◆ 10.3 years = average years of education of GED examinee.*
- ◆ 16-18 year olds accounted for 2,370 of the graduates, 21.0 % of the total.

*This represents a decline by 10% in the past three years.

Services Provided

This budget activity provides supplementary funds to GED testing centers to help offset the cost of the testing for eligible students. As a result of this subsidy, fees for individual GED examinees are reduced. Minnesota GED Testing Centers. There are 60 testing centers in Minnesota including 10 at state correctional facilities.

The GED examination consists of a battery of five tests that measure major and lasting outcomes associated with a high school education. The five tests (Writing, Social Studies, Science, Reading, and Mathematics) employ a multiple-choice format with the two-part Mathematics test also using alternative format questions. The writing skills test requires an essay. Many GED candidates are from low-income backgrounds and cannot afford the full cost of the five-test GED battery. Minnesota Department of Children Families & Learning -- GED

Successful completion of the GED test battery results in the awarding of a state of Minnesota GED diploma by the Department of Children, Families & Learning. A high school diploma or GED is required by many employers, and virtually all of Minnesota's post-secondary educational institutions accept the GED as a valid high school credential for admission purposes. Minnesota GED Testing Centers

In FY 2001-02, 7,013 applicants received \$20 discounts toward the cost of the full GED test battery and 2,908 applicants received \$4 discounts toward the test of a single GED test.

Historical Perspective

State funding for the GED Testing Reimbursement program began in 1992 when the state began to pay the lesser of \$20 or 60% of the fee charged to an eligible individual for the full battery of the GED test. Nearly all GED applicants qualify for GED test free support. In 2001-02, GED testing centers received \$125,000, but discounted test fees by \$151,892. Because of this disparity, some test sites may discontinue this service. Test leasing fees established by the GED Testing Service have tripled in the past three years.

Minnesota's 11,268 graduates in 2001 represent an annual increase of 4,383, or 63.7%, the fifth highest percentage increase in the United States.

Activity at a Glance

- ◆ 60 GED testing centers.
- ◆ In FY 2002, 16,788 examinees took at least one GED test and 13,244 took all five tests.
- ◆ In FY 2002, 11,268 adults were granted GED diplomas.
- ◆ Individuals who receive their high school diploma or GED earn about \$7,000 more per year than a dropout.

Activity: GED TESTS

Narrative

Key Measures

Provide increased access for eligible individuals to complete the test of GED by paying a portion of the student's testing fees.

FY 2001-02 Statistics

- ⇒ Passing rate in Minnesota is 85.0 % (Top 10 in US).
- ⇒ In 2001, more than 1 of 7 high school credentials issued in Minnesota was a GED. This translates to 11,268 out of 71,786 total credentials (15.6%).
- ⇒ 67% of examinees wanted GED to be able to further education; 33% for employment; and 3% for entrance into the military. NOTE: Respondent could have given more than one answer, hence more than 100% total.

**All Candidates For the Test
All Graduates Passing the Test**

Activity Funding

The average GED test fee per participant is \$50. Test leasing fees established by the GED Testing Service have tripled during in the last three years.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: EMERGENCY SERVICE GRANTS

Narrative

Activity Description

Citation: MN Laws 1997, Chap. 162, Art. 3, Sec. 7 ; MN Laws 1999, Chap. 205, Art. 4, Subd. 12 ; MN Laws 2001, 1st Spec. Session, Chap. 3, Art. 3, Subd. 4

The Emergency Services Program (ESP) provides funding to shelters and nonprofit agencies to support the costs of emergency shelter and support services to homeless families and individuals.

Population Served

The program serves individuals and families who lack a regular and adequate nighttime residence. The program serves varied populations including, domestic violence survivors, veterans, single parent and two parent families, single adults, unaccompanied youth, migrant and seasonal farm workers, people with HIV/AIDS, mental illness or chemical dependency.

Children represent the fastest growing segment of the homeless population. In 1985, the majority of persons using shelters and transitional housing were men. By 2000, children had become almost 50% of this population. The increase in the number of homeless families is partially attributed to the disparity between income and housing costs. Welfare reform and the recent economic downturn also contribute to problem of homelessness.

The percentage of employed persons using shelters has risen from 19% in 1991 to 41% in 2000. Tight housing markets have resulted in increasing rents, lower vacancy rates, fewer landlords accepting housing subsidies such as Section 8, and stricter screening of potential tenants for bad rental or credit histories. The 2000 Statewide Survey of Homeless Adults, Children, and Youth in Minnesota conducted by Wilder Research Center provides information about the causes and dynamics of homelessness.

Services Provided

The ESP assists service providers in improving the quality of existing shelters, expanding the availability of emergency housing, meeting the operating and maintenance costs of shelter, and providing essential services to homeless persons. The ESP provides a range of support services including:

- ◆ case management;
- ◆ employment counseling and job placement;
- ◆ housing location, placement and rental assistance;
- ◆ substance abuse treatment;
- ◆ medical and psychological services;
- ◆ emergency childcare, voicemail, furniture, transportation, and other services to stabilize homeless persons in housing; and
- ◆ access to financial assistance from mainstream social services programs.

Historical Perspective

Homeless programs were developed in response to the increasing number of people experiencing homelessness. The Minnesota Legislature established the ESP in 1997.

Key Measures

One of the goals of Children, Families & Learning's Strategic Plan is to strengthen families and build a solid foundation for living and learning. One of the outcomes relating to this goal is that families and individuals are moved out of poverty and all families provide a stable environment for their children. This budget activity reports information on the indicator that "decrease the number of homeless people."

Activity at a Glance

- ◆ On any given night, an estimated 8,600 people are homeless in Minnesota. Nearly 50% are children.
- ◆ In 2001, nearly 2,000 households received emergency shelter and 28,000 received supportive services funded by ESP.
- ◆ In 2002, 35 service providers received funding with an average grant of \$47,000.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: EMERGENCY SERVICE GRANTS

Narrative

The program provides financial and technical assistance to provider agencies throughout the state. Through the provision of housing and support services, persons receive necessary protective shelter and services to meet their basic needs.

- ⇒ In 2001, approximately 30,000 households received emergency shelter or supportive services funded by ESP.
- ⇒ Individuals and families with children experiencing homelessness received critical services to meet their basic needs and to access permanent housing.

Activity Funding

ESP funding is flexible to best meet the local needs of Minnesota communities. Funds are awarded on a competitive basis and work in conjunction with the following federal homeless programs.

- ⇒ The Emergency Shelter Grant Program (ESGP) provides federal funds to shelters and transitional housing programs for operating costs, essential services, and homelessness prevention. In the 2002-2003 biennium, \$2.2 million was awarded to 36 programs.
- ⇒ The Rural Housing Assistance and Stability Program (RHASP), funded under the federal Supportive Housing Program (SHP), provides supportive services to homeless people to move them into permanent housing. Supportive services may include first month's rent, damage deposit, assistance with down payment, transportation and child care costs, assistance with job search and self-sufficiency case management. The White Earth Indian Reservation, 20 rural Community Action Agencies, and an organization serving migrant farm workers agencies receive RHASP funding.

In addition, the ESP received a time-limited appropriation of Federal Temporary Assistance to Needy Families (TANF) funding for fiscal years 2001 through 2003.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: LEAD HAZARD REDUCTION

Narrative

Activity Description

Citation: M.S. 119A.46

The purpose of this program is to reduce the potential for lead poisoning in the homes of children from low-income families.

Population Served

This program serves low-income families statewide. One in every six children, under six years of age, is lead poisoned which can lead to learning and behavioral problems, kidney damage, hearing deficits, speech and language problems, and poor attention span in children.

Exposure to residential sources of lead is the most common environmental health hazard to children under six years of age. Homes built prior to 1978 likely contain some levels of lead paint. In addition, leaded gasoline contributed to widespread lead exposure in soil, especially near busy roadways. The Third National Health and Nutrition Examination Survey estimates 12-15% of the population under age six have blood levels of 15 micrograms of lead per deciliter of blood (mg/dl) or greater (high risk of lead poisoning) and 1.1% have blood lead levels of 20 mg/dl or greater (lead poisoned). The social costs of health effects of childhood lead blood (Pb) exposure go beyond the personal suffering of the child and the family. They include direct societal costs (medical and educational expenses) and indirect costs (reduced future earnings of the afflicted children).

Services Provided

AmeriCorp member crews visit households identified as lead contaminated. The crews are trained to assess homes for lead levels, educate residents on measures to keep safe from lead, clean and repaint surfaces using special equipment to reduce lead dust levels to make the home lead safe for children, and provide assistance necessary to meet the residents immediate needs while lead hazard reduction services are being completed on their residence.

- ⇒ The program provides outreach and educational activities related to lead poisoning for 2,000 Minnesota residents each year.
- ⇒ Residential houses for the lead hazard reduction services are identified by the Minnesota Department of Health. Activities include: 1) lead hazard inspections and dust sampling; and 2) lead hazard reduction services, including treating windows, stabilizing paint surfaces and re-painting, and treating and recovering soil.
- ⇒ Sustainable Resources Center (SRC), the organization that receives the state funds, provides lead hazard reduction activities statewide. These funds are used to supplement federal funding. Federal funds require a dollar-for-dollar match. One million dollars was available for the 2002-03 biennium and a similar amount is anticipated for the next biennium.

Historical Perspective

The lead abatement program was originally funded in 1993 for a two-year period. The program was not funded from 1995 to 1997, but was re-established in the 1997 legislative session.

Key Measures

- ⇒ Lead hazard reduction services are provided at an average cost of \$2,000 each for an average of 50 households each year.
- ⇒ 100 homes receive lead hazard inspections and dust sampling each year.
- ⇒ 50 homes receive lead hazard reduction services.

Activity at a Glance

- ◆ One in every six children under six years of age is lead poisoned.
- ◆ 100 homes receive lead hazard inspections and dust sampling each year from this program.
- ◆ 50 homes receive lead hazard reduction services each year from this program.
- ◆ The program provides outreach and educational activities related to lead poisoning for 2,000 Minnesota residents each year.
- ◆ State funds provide the required match for federal funds.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: LEAD HAZARD REDUCTION

Narrative

Activity Funding

Sustainable Resources Center uses state funds to leverage other funds for the project including: federal funding through the Department of Health and Human Services, the city of Minneapolis, the Center for Disease Control (CDC), foundations, private donations, CLEARcorps National Project of Service to America Volunteers, and supplies and paint donated by paint manufacturers which together provide more complete education and community collaborative activities. Federal funding is contingent upon receipt of the state funding match.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: ABE AUDITS

Narrative

Activity Description

Citation: M.S. 124D.531; M.S. 124D.52

The purpose of this state funded activity is to begin a cycle of audits for all Adult Basic Education (ABE) consortia that receive state aid under M.S. 124D.52 beginning in FY 2003.

Population Served

The ABE audits will occur beginning in FY 2003 and will involve 58 programs statewide that serve approximately 82,000 learners per year. All programs will be audited in either FY 2003 or FY 2004. Thereafter, a cycle will be established to audit each program at least once every five years.

Services Provided

The ABE audits will determine if all state ABE revenue received was accounted for properly and used solely for ABE purposes. The contact hour audit component of the audit will determine if learner hours were counted in accordance with the ABE learner eligibility and contact hour policies. Approximately three-fourths of the state ABE appropriation is distributed based upon a program's prior year contact hours. In addition, the audits will ensure that state ABE funds are expended for ABE allowable services, materials and equipment and that learner contact hours which generate state aid revenue are collected and reported to Children, Families & Learning (CFL) in accordance with state law and applicable ABE policy.

Key Measures

Audit findings will address the fiscal accountability issues of:

- ◆ whether ABE funds were properly accounted for and used solely for the defined purposes; and
- ◆ whether contact hours collected and reported were in accordance with ABE learner eligibility and contact hour policies.

Programs that are found to be out of compliance with ABE fiscal accountability requirements will be required to return funding to the state and recommendations will be made for program accountability improvements and/or continued eligibility. Similarly, any programs who may have under-reported activity and underpaid will be paid the balance owed.

Activity Funding

The FY 2001 legislation appropriated \$175,000 for this activity for FY 2003 and FY 2004 to complete the initial round of audits for all programs, with a base of \$70,000 for FY 2005 and beyond to begin the cycle of auditing each program at least once every five years.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Contact

Additional information is available from the Minnesota Department of Children, Families & Learning, Lifework Development Division, (651) 582-8442.

Activity at a Glance

- ◆ New, mandated CFL activity for FY 2003
- ◆ 29 ABE programs must be audited by CFL during FY 2003
- ◆ Audits are scheduled to begin in January 2003

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: FAMILY ASSETS FOR INDEPENDENCE

Narrative

Activity Description

Citation: M.S. 119A.445; Assets for Independence Act (AFIA) P.L. 105-285, Title IV. 42 U.S.C. 604

The purpose of Family Assets for Independence in Minnesota (FAIM) is to help low-income working Minnesotans build assets and develop positive financial management habits and skills in order to achieve long-term economic self-sufficiency.

Population Served

FAIM serves 466 accountholders statewide. In order to be eligible for FAIM, households must have incomes at or below 200% of the federal poverty level and have a net worth of \$10,000 or less. Because savings must come from earned income, FAIM participants are considered the "working poor."

Evaluation of Minnesota's FAIM participants show the following characteristics:

- ◆ 86% of households have at least one child,
- ◆ 46% of participants have incomes below 100% of poverty,
- ◆ 79% have incomes below 150% of poverty,
- ◆ 64% are or have been "welfare" recipients (AFDC or TANF),
- ◆ 75% do not currently own a home, and
- ◆ 35% of FAIM participants are people of color.

Services Provided

Individual development accounts (IDAs) are subsidized savings accounts. Unlike other subsidized savings accounts such as Individual Retirement Accounts (IRAs) or 401(k) plans, IDAs are targeted to the poor, provide subsidies through matches rather than through tax breaks, and require participants to attend financial education. As Minnesota's IDA program, FAIM is delivered by a statewide multi-site collaborative of community action agencies (CAAs), Women Venture, Inc., the City and County Credit Union, and two tribal governments. A total of 28 local agencies participate in the program. Ramsey Action Program, Inc. (RAP) is the fiscal agent for the initiative. A FAIM Council made up of the collaborative partners provides oversight and monitoring of the program activities.

FAIM participants earn match at a rate of a 3:1 (half coming from state funds, half from non-state funds). Savings must be from earned income. Participants are encouraged to save regular amounts on a monthly basis (e.g. \$30 per month). Upon reaching their savings goal, participants use their accrued savings, interest and match to purchase a home, pursue post-secondary education, or start a small business.

Each FAIM participant receives 18 hours of general financial education to help them achieve their savings goals. They are also required to take 10 additional hours of asset-specific training.

FAIM agencies negotiate with local financial institutions to secure favorable banking arrangements for participants (e.g. no minimum balances, no service charges). Banks receive Community Reinvestment Act (CRA) credits when they provide financial contributions, mentoring, economic literacy, or other community services.

FAIM participants have the following savings goals: 16% for post-secondary education, 22% for micro-enterprises, and 62% home purchase.

Activity at a Glance

- ◆ 466 Minnesotans have accounts.
- ◆ Eligible savings goals include home ownership, postsecondary education and microenterprise.
- ◆ As of June 2002, accountholders had saved over \$300,000.
- ◆ Savings are matched at a 3:1 rate, half coming from state funding and half from non-state funding.
- ◆ FAIM accountholders also receive financial education.

CHILDREN, FAMILIES & LEARNING

Program: SELF-SUFFICIENCY & LIFELONG LEARNING

Activity: FAMILY ASSETS FOR INDEPENDENCE

Narrative

Historical Perspective

The first phase of Minnesota's FAIM operations began in 2000 and runs through 2003. FAIM is part of a national initiative to promote IDAs that emerged in the early 1990s. The concept of IDAs came from the recognition that poor and working-poor families are often excluded from financial opportunities for asset development traditionally available to middle- and upper-income families (e.g. mortgage interest deduction, capital gains, IRAs).

Data on income inequality show that incomes (adjusted for inflation) from the late 1970s to the late 1990s showed no growth for the poorest 20% of Minnesotans. This compared to 16.6% growth of incomes for the middle 20% of Minnesotans, and 42.6% growth of incomes for the richest 20% of Minnesotans. (Minnesota Budget Project, January 2000.) Differences in the distribution of economic gains are even more pronounced for asset accrual than for income.

Key Measures

One of the goals of Children, Families & Learning's Strategic Plan is to strengthen families and build a solid foundation for living and learning. One of the outcomes relating to this goal is that families and individuals are moved out of poverty and all families provide a stable environment for their children. This budget activity reports information on the indicator "low-income people will become for self-sufficient."

FAIM employs a combined strategy of financial assistance, mandatory participant education, and research and evaluation to achieve its goals. The Center for Social Development/Washington University in St. Louis published evaluation findings in September 2001 (http://gwbweb.wustl.edu/csd/Publications/IDAs_in_Minnesota.pdf). In addition, the University of Minnesota's Department of Family Social Sciences is conducting a qualitative analysis.

Key deposit and savings outcomes from the September 2001 FAIM evaluation of 27 FAIM sites and participants demonstrated the following:

- ◆ The average participant saved \$25 per month, and
- ◆ The average participant saved 9 out of every 12 months.

Information from MIS-IDA (the information management system used to collect information of all IDA programs receiving federal funding) showed the following statewide totals for Minnesota through June 2002:

⇒ 31 homes have been purchased, 18 businesses started, and 22 payouts for postsecondary education have occurred.

Activity Funding

Funding for FAIM includes the state appropriation, the federal Assets for Independence Act (AFIA) grant, and private support. State funds must be matched by nonstate funds on at least a 1:1 basis.

Funding is allocated to participating agencies according to a state statutory requirement of a 60/40 greater Minnesota/metro split.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Program Description

The mission of the Department of Children, Families & Learning (CFL) is to "increase the capacity of Minnesota communities to measurably improve the well-being of children and families." (M.S. 119A.01)

Population Served

The agency provides services to a broad range of customers throughout the state, including:

- ◆ 851,384 Pre-kindergarten – grade 12 students and their parents;
- ◆ 343 school districts;
- ◆ 69 charter schools;
- ◆ 62,745 licensed educators;
- ◆ 15,619 licensed child care providers;
- ◆ nonprofit community organizations and CAP agencies;
- ◆ legislators and other policymakers; and
- ◆ all Minnesota citizens.

Services Provided

The agency provides the following set of core services to its customers throughout the state:

- ◆ provides information, training, and technical assistance to schools, school districts, counties, and local service providers;
- ◆ administers state and federal aids, subsidies, and grants;
- ◆ calculates school district property tax levy limitations;
- ◆ licenses teachers and administrators;
- ◆ develops and administers statewide school performance/accountability systems;
- ◆ ensures compliance with state and federal laws; and
- ◆ establishes and maintains information technology systems that gather and disseminate data about children, students, schools, services, and finances.

Key Measures

The functions and activities of the agency and its staff are broad. Outcome measures are presented throughout this budget to illustrate the impact of the programs the agency provides for learners in Minnesota. The agency program includes all state-paid staff positions throughout the department, as well as the support and infrastructure needed to maintain those positions and the activities they staff. Staff oversee a range of functions. Some are compliance related, to ensure that all state and federal monies are properly accounted for and administered within the provisions of state and federal law, including grant administration, aid calculation and payment, and audits. Others provide direct services to students, parents and schools/districts in the areas of curriculum development, special education, financial management and school/district administration and funding. Some key areas of service are presented here as examples of the critical services the agency provides for children and families in Minnesota.

- ⇒ Curriculum specialists, special education specialists and agency subject matter experts work with educators throughout the state to provide professional development so that teachers can learn new tools, techniques and strategies to better serve all categories of learners. Over 10,000 teachers are trained annually at CFL professional development workshops.

Program at a Glance

- ◆ District/Charter Revenue processed annually (est. FY2003):

| | | |
|---------|-------|----------------|
| Federal | (5%) | \$0.4 billion; |
| Local | (20%) | \$1.7 billion; |
| State | (75%) | \$6.2 billion. |
- ◆ State and annual federal grants administered annually: \$650 million.
- ◆ Public access: CFL responds to 3.5 million e-mails, 7,000 citizen letters and 750 media contacts each year.

CHILDREN, FAMILIES, & LEARNING

Program: AGENCY

Narrative

- ⇒ Staff in teacher licensure provide assistance to teachers and schools seeking information about licensure and licensed educators. During the 2002-03 biennium, the Teacher Licensure Division automated the application process for a license and reduced processing time for a license from 12 weeks to 4 weeks, a reduction of 66%.
- ⇒ The agency partners with schools, local units of government and nonprofit community organizations to facilitate collaborative programs for substance abuse prevention, effective early childhood education for all children, anti-poverty programs and after-school enrichment opportunities. The effect of such collaborations is to leverage, local, state, federal and private funds to ensure that effective strategies can be formulated for each community to ensure that their unique needs are met.
- ⇒ The Financial Management Team provides training and technical assistance to Minnesota school districts and charter schools on financial management, administration and accountability. Over 1,000 school officials received training each year. Participants rated the workshops as a 4.5 on average (on a 5.0 scale) for meeting their training needs in financial management. In addition to the formal workshops, hundreds of site visits and on-site training activities are conducted throughout the state for newly opened charter schools, schools in statutory operating debt, and new superintendents and business managers in school districts and charter schools.

Program Funding

This program is funded with both state and federal monies. Approximately 51% of the agency's personnel are paid from federal funds and 49% from state funds.

The amounts in the narrative may differ when compared to the fiscal summary due to timing of the state fiscal year-end close and forecast changes.

Agency Purpose

The Minnesota Board of Chiropractic Examiners (MBCE) was created by legislative act on 3-13-19. It was originally created and currently exists to protect the public's interest through the regulation of chiropractors in the state of Minnesota. Minnesota Statutes 148.01-148.106 and Minnesota Rules 2500 give the board power to regulate, to license by examination and renewal, and to investigate complaints.

Core Functions

The board accomplishes its mandate by:

- ◆ examining practitioners prior to licensure to ensure that they meet or exceed baseline competence;
- ◆ responding to complaints about chiropractors and enforcing the laws governing the practice of chiropractic in Minnesota; and
- ◆ establishing continuing education (CE) requirements and monitoring compliance with those requirements.

To meet these core functions the MBCE operates under the following four key service strategies while protecting the public and providing services in an efficient and cost-effective manner with a focus on public accessibility:

- ◆ maintains an integrated database of licensee information, registrations, discipline, and complaints;
- ◆ conducts regular board meetings where citizens have input into the review of operations and rulemaking efforts;
- ◆ responds to public requests for information on chiropractors, continuing education sponsors, and licensee's status; and
- ◆ manages funds soundly.

Operations

The seven-member board, appointed by the governor, meets approximately five times a year. The board operates through its committees, most of which meet monthly, and are as follows: executive; rules; three complaint panels; and any additional committees formed only when necessary to address items of policy-making guidance. Meetings are conducted in accordance with the open meeting laws.

The board's office operates with a five member staff whose mission is on a daily basis to:

- ◆ license applicants;
- ◆ approve registrations for: acupuncture, professional firm, graduate preceptorship, and independent examiner;
- ◆ manage funds received;
- ◆ manage continuing education; and
- ◆ investigate complaints.

The board makes much of the information it gathers available to the public at no cost via publication on its web site.

Budget

The board's total direct and indirect expenses for FY 2002-03 biennium are \$1.378 million. The board staff includes five full-time equivalent employees.

Of the total budget for the biennium, \$1.136 million is collected as non-dedicated revenue which is deposited into the state government special revenue fund. The board collects fees charged to applicants, prospective applicants, licensees, and sponsors of continuing education programs approved by the board. The board is responsible to collect enough revenue to recover all direct and indirect costs.

At A Glance

Biennial Budget – FY 2002-03:

Total Expenses: \$1.378 million

Total Revenues: \$1.136 million

Staff: 5 Full-time equivalent employees

Minnesota Licensed Chiropractor Statistics

(As of June 30, 2002)

Total Licensed: 2,520

The board is responsible for the costs of services received from the Attorney Generals' Office, Health Professional Services Program, and the Administrative Services Unit. A direct appropriation is given to each of these programs from the state government special revenue fund. The board must ensure that sufficient revenue is collected through its fees to fund their portion of these program costs.

Agency Purpose

The Minnesota Department of Commerce ensures secure, stable, reliable, and equitable commercial, financial, and utility services and transactions. To provide this assurance to the people of Minnesota, the department:

- ◆ Advocates to ensure equitable and reliable services;
- ◆ Regulates business activity to ensure compliance, responsible business conduct, security and stability;
- ◆ Investigates and resolves consumer complaints;
- ◆ Safeguards consumers' rights and investments; and,
- ◆ Expands economic opportunities while working to improve our environment and quality of life.

Core Functions

The Department of Commerce regulates utilities, financial institutions, licensed businesses, licensed individuals, retail businesses, and commercial activity without respect to the specific interests of either the regulated businesses or the clients they serve. The department's regulatory decisions maximize the net benefits to all residents and regulated businesses, while safeguarding the rights of consumers, and protecting policyholders and investors from financial failure.

Operations

The department enforces laws and rules, advocates on behalf of the public, and provides services to promote the financial well being of a broad constituency of individuals and businesses. To carry out its mission, the department must assess the significant consequences of every regulatory decision and enforcement action, including the impact on consumer costs, financial stability, reliability of service, the environment, and economic development. This carefully designed regulatory balance effectively protects the broad financial interests of Minnesota's businesses and consumers.

Energy Division:

- ◆ Advocates on behalf of consumers and ratepayers in proceedings relating to regulated gas and electric utilities.
- ◆ Promotes energy efficient building, conservation, alternative transportation fuels, and modern energy technologies.
- ◆ Oversees conservation improvement programs operated by public, municipal, and cooperative utilities.
- ◆ Administers the Low Income Home Energy Assistance Program and the Weatherization Assistance Program.

Enforcement Division:

- ◆ Enforces compliance and responsible business conduct across a broad range of licensed occupations, including insurance agents, stock and investment brokers, realtors, builders, and cosmetologists.
- ◆ Evaluates insurance policies and rates to ensure fair rates and to ensure compliance with Minnesota law.
- ◆ Registers securities sold in Minnesota.
- ◆ Ensures that telemarketing firms comply with Minnesota's "Do Not Call" statutes.

Financial Examinations Division:

- ◆ Licenses, examines and regulates insurance companies, credit unions, state chartered banks, mortgage companies, finance companies and other financial institutions to ensure that they remain safe and financially solvent.

At A Glance

FY2002 - 2003 Budget:

\$54.2 million General Fund

\$223.4 million all funds

98% of General Fund appropriations recovered through fees and assessments

Annual Business Processes:

| | |
|--------------|---|
| 348,000 | Consumer contacts received |
| 10,215 | Enforcement Division investigations |
| \$6,300,000 | Recovered by Enforcement Division |
| 232 | Financial institutions examined |
| 2,004 | Utility and telecom cases completed |
| 130 MW | Electricity demand reductions |
| 109,000 | Low income households served by LIHEAP and Weatherization |
| \$63,000,000 | Federal funds disbursed to low income households |
| 69,000 | Weights and Measures inspections |
| 125,000 | Licenses issued |

Petrofund:

- ◆ Provides reimbursement to underground petroleum storage tank owners and operators for the cost of investigating and cleaning up petroleum tank releases.

TAM:

- ◆ Funds telecommunications access services for deaf and hearing impaired citizens.

Telecommunications Division:

- ◆ Advocates on behalf of consumers and ratepayers in proceedings relating to regulated telecommunications companies.
- ◆ Promotes real competition among telecommunications companies in Minnesota.

Weights and Measures Division:

- ◆ Ensures the accuracy in all transactions based on weight or measure.
- ◆ Ensures consistent quality of petroleum products.
- ◆ Provides precision mass, temperature, density and volume measurement services to businesses.

Administration:

- ◆ Leads and directs the department, manages day to day operations, manages financial and human resources operations.
- ◆ Licenses businesses and individuals according to Minnesota statutes.
- ◆ Provides unclaimed property reclamation services to the people of Minnesota.
- ◆ Provides information management services and technical support to the department.

Budget

The department's FY 2002-03 budget totaled \$223.4 million. 98% of General Fund costs are recovered and repaid to the General Fund. Department staff includes 356.4 FTE. The FY 2002 budget increased over the previous fiscal year because the 2001 Minnesota Legislature transferred the LIHEAP and Weatherization programs to Commerce.

Program Description

The Financial Examinations Division assures safe, sound, and solvent financial services in Minnesota. -- an assurance that consumers and businesses cannot realize without the intervention of an independent regulator like the division. Additionally, by maintaining the soundness and solvency of a large number of financial institutions, the program assures consumers and businesses that they will have access to a broad range of financial products and services at competitive prices. The Bank and Credit Union Examination unit examines all state chartered banks, trust companies, credit unions, certificate investment companies, thrift companies, and consumer credit companies. The Insurance Examination unit is designed to monitor the financial stability of insurance companies. If a company becomes financially unstable, action is taken to provide a mechanism for a return to solvency.

Program at a Glance

In FY 2002, the Financial Examinations Division regulated:

- ◆ \$32.6 billion in bank, credit union and finance company assets.
- ◆ \$153 billion in insurance company assets.

Population Served

The Financial Examinations Division serves all Minnesota consumers and businesses that rely on banks, credit unions, finance companies and insurance companies for financial products and services.

Services Provided

Bank and Credit Union Examinations

The unit conducts on-site examinations at all state-chartered banks, trust companies, credit unions, certificate investment companies and thrift companies on a 12 to 18-month cycle (determined by institution rating). Examinations are shared between the Federal Deposit Insurance Corporation (FDIC), Federal Reserve Bank and the National Credit Union Administration (NCUA).

The unit also examines consumer credit companies. Examinations are generally conducted on an 18-month cycle. Examinations focus on compliance issues rather than solvency or safety and soundness. There is no comparable federal regulation of the consumer credit industry.

The unit licenses residential mortgage loan origination and servicing companies. These companies are subject to market conduct requirements, but not to routine on-site examinations. In addition to the examinations, the Bank and Credit Union unit performs compliance reviews of various applications from regulated entities. Action is taken to approve or deny applications.

The Division encourages the growth of state-chartered institutions. Growth fosters competition and ensures numerous choices for consumers and business. Competition drives down the cost of financial services. Several new financial products originated in state-chartered institutions and have spread nationwide.

Insurance Company Examinations

The unit's primary focus is to ensure the financial soundness and solvency of every insurance company doing business in Minnesota. If domestic companies are financially insecure, it is Minnesota's responsibility to formulate a plan to effect compliance or close the business. If a foreign company becomes unstable, Minnesota would restrict the business they are allowed to do within the state. If an insurance company failure is unavoidable, it is the unit's responsibility to manage the transition and to minimize any negative impact on Minnesota policyholders. The goal is to give the consumer the comfort that the company they purchase insurance from will have the resources available to pay a claim.

Insurance regulation is a state responsibility because, historically, insurance was largely a local endeavor. Today, insurers are large, multi-state, multi-jurisdictional concerns, but regulation is still accomplished at the state level. There is no federal regulation of the insurance industry. The Insurance Examination unit participates in the proceedings of the National Association of Insurance Commissioners (NAIC). The NAIC generally puts forward model regulatory standards for each state to adopt. However, the department tailors these model acts and adapts them to conditions unique to Minnesota.

The unit performs two types of examinations -- the desk audit and the on-site field audit. Desk audits are based on quarterly and annual financial reports submitted by insurance companies. Auditors evaluate information, and develop a financial profile of every company doing business in Minnesota. The staff monitor each profile for change. If change occurs, an action is taken to ensure that the company will remain solvent. The second method of monitoring solvency is the tri-annual on-site examination of domestic insurers. Examiners review insurance company books and records at the company headquarters. The examination is a full and complete review of financial condition. The examination is completed by staff or by special examiners (generally accounting firms). Additionally, the unit employs an actuarial staff to calculate and verify reserve adequacy at regulated insurance companies, and in various workers' compensation issues that the unit deals with.

Historical Perspective

With respect to insurance companies, the program is partially supported by an appropriation from the General Fund. Operating costs are also paid from the insurance examination revolving fund. The balance of the revolving fund cancels at the end of every fiscal year to the General Fund. Revenues generated by this program are a result of examination fees, registration fees, licensing fees, and transaction fees.

With respect to banks, credit unions and finance companies, the program is funded by appropriations from the General Fund, but all costs are recovered by assessments and examination fees charged to regulated entities. The assessment is billed at the beginning of a fiscal year at 103% of operating, agency indirect and Attorney General cost. The examination fee is set based on a formula calculating examiner salary and billing hours. Fees are also charged for applications relating to charter and license activity.

Program Description

The Petroleum Tank Release Cleanup Fund (Petrofund) ensures a cleaner environment, and prevents additional pollution of Minnesota's soil and water by providing eligible applicants with the financial wherewithal to investigate, cleanup, and stop leaks from petroleum storage tanks.

Program at a Glance

- ◆ Over \$318 million provided in reimbursements since 1987.
- ◆ 9,301 eligible applicants have received reimbursement.

Population Served

The Petrofund directly serves owners and operators of petroleum storage tanks, owners of property where a petroleum tank release occurred, and applicants who are ordered by the Minnesota Pollution Control Agency (MPCA) to take corrective action. Indirectly, the program serves all Minnesotans because it ensures a cleaner environment.

Services Provided

The Petrofund:

- ◆ Reimburses eligible applicants for the costs associated to remediate petroleum leaks in the most cost-effective manner possible.
- ◆ Generally, evaluates and processes reimbursement applications within 30 days of receipt.
- ◆ Provides money to reduce health risks and physical dangers caused by petroleum tank releases.

Historical Perspective

The Petrofund was created by the 1987 Minnesota Legislature to reimburse underground petroleum storage tank (UST) owners and operators for the cost of investigating and cleaning up petroleum tank releases. To meet the U.S. Environmental Protection Agency's (EPA) financial assurance requirements, UST owners and operators must document their ability to pay up to \$1 million for such costs. Minnesota, and 47 other states, established a state-financed reimbursement program to relieve UST owners and operators of this financial obligation.

By 1987, private insurance for old USTs had become scarce and expensive. Many tank owners were unable to afford the EPA mandated financial assurance requirement. The Petrofund was created to provide the necessary financial assurance. The program has helped to improve the environment for all Minnesotans by encouraging tank owners and operators to investigate and remediate petroleum contaminated soil and groundwater.

Installed or upgraded USTs must now meet or exceed federal requirements for leak detection and corrosion resistance. As a result, the insurance industry may begin to take a more active role in providing UST owners and operators with the required financial assurance. However, no one knows how the insurance industry will view historical contamination, or what premiums insurance providers will charge for coverage. In response to these concerns, the 1997 legislature extended the Petrofund's sunset date by five years. The statutory sunset date is now 6-30-05.

The EPA deadline for upgrading or replacing underground storage tanks expired on December 22, 1998. Demand on the fund will continue for several years due to continuing investigation and cleanup activities at many sites. MPCA's November 2003 compliance deadline for above ground storage tanks will cause continuing demand on the fund as owners and operators continue working to meet the new rules. The Petrofund's administrative costs should decrease after 2004.

The program is completely funded by an appropriation from the Petroleum Tank Release Cleanup Fund. Revenue into the fund is generated a \$.02 per gallon fee on wholesale petroleum products. The fee is imposed and collected by the Department of Revenue only when the fund balance falls below \$4 million (see M.S. 115C.08). Revenue is also received from investment earnings on the fund balance.

Key Measures

The annual number of reimbursement applications received by the program has remained fairly steady from FY 1997 through FY 2000.

Program Description

The Administration program includes the commissioner's office, the department's central management and support functions, and the department's licensing and unclaimed property operations. The program ensures that all department operations are managed and implemented in a manner consistent with law and with the goals of the administration.

Population Served

- ◆ The Commissioner's office serves all Minnesotans who do business with the Department of Commerce.
- ◆ Licensing serves licensed individuals and businesses, and serves all Minnesotans who use the services of licensed individuals and businesses by assuring that the licensees have met professional standards established by law.
- ◆ Unclaimed property serves all Minnesotans who own abandoned property held by banks, former employers, retailers and other businesses.
- ◆ Central management and support functions facilitate the operations of the department's main programs.

Program at a Glance

Leads, manages and directs six divisions with diverse missions to:

- ◆ Regulate commercial, industrial, financial, utility, and retail activity in Minnesota.
- ◆ Provide technical services and support to Minnesota businesses.
- ◆ Provide energy assistance to low income households.
- ◆ Mitigate environmental damage from leaking petroleum storage tanks.
- ◆ Provide telecommunications services to the deaf and hard of hearing.
- ◆ License 276,000 professionals.
- ◆ Manage \$41 million in unclaimed property, and return \$10 million to rightful owners in FY 2002.

Services Provided

Administration:

- ◆ Leads, manages, and directs the department to ensure efficient operations.
- ◆ Develops and directs implementation of annual and long range objectives.
- ◆ Manages department finances and develops budgets.
- ◆ Provides personnel management according to Minnesota statutes, rules and policies.
- ◆ Provides administrative support services to all programs within the department.
- ◆ Manages information systems.
- ◆ Facilitates productive relationships with regulated businesses and individuals.
- ◆ Coordinates department activities with other government agencies, private sector businesses and the public.
- ◆ Provides consumer information to the people of Minnesota.
- ◆ Licenses businesses and individuals according to Minnesota statutes.
- ◆ Provides unclaimed property reclamation services to the people of Minnesota.

Licensing:

The unit responds to inquiries from licensees, applicants, and schools providing educational services to licensees. Additionally, the unit responds to consumer inquiries about license activity or status. The unit licenses the following industries:

- ◆ Real estate brokers, appraisers, salespersons, and abstractors;
- ◆ Residential building contractors, roofers, and remodelers;
- ◆ Manufactured home installers;
- ◆ Subdivided land agents;
- ◆ Campground membership salespersons;
- ◆ Insurance agents, adjusters, agencies, managing general agents, and reinsurance intermediaries;
- ◆ Notaries public;
- ◆ Cosmetologists, cosmetology salons, and cosmetology schools;
- ◆ Collection agencies and debt collectors; and,

Unclaimed Property

Abandoned property may include money from savings and checking accounts, wages, insurance proceeds, safe deposit box contents, stocks, bonds or dividends. All banks, insurance companies, corporations and government agencies operating in Minnesota are statutorily required to report, and turn over, abandoned property to the Department of Commerce. The Unclaimed Property unit receives and maintains the abandoned property until the rightful owner claims it. Names of abandoned property owners are published annually. The names are also published on the Department of Commerce web site. Tangible property from safe deposit boxes is sold at public sale every ten years. Auction proceeds are deposited in the general fund until claimed by the rightful owner. The department holds unclaimed stock for three years. After three years, the stock is liquidated and the sale proceeds are deposited in the general fund until claimed by the rightful owner.

Historical Perspective

This program is funded by an appropriation from the General Fund. Program costs are recovered, as management overhead costs, through the cost recovery systems of other programs within the department.

The Licensing unit was created in 1983 when the department was reorganized -- all licensing operations were combined into one group. The Unclaimed Property unit was created in 1969 following enactment of Minnesota's uniform disposition of unclaimed property act.

Key Measures

| <u>Licensing</u> | <u>FY2001</u> | <u>FY 2002</u> | <u>FY 2003</u> | <u>FY 2004</u> | <u>FY 2005</u> |

Program Description

The Enforcement Division includes two distinct operations:

- ⇒ The Investigations unit investigates complaints to determine whether regulated businesses or individuals have violated laws or rules. The unit also attempts to informally resolve disputes between consumers and the regulated industries.
- ⇒ The Registration and Policy Analysis unit reviews insurance forms to ensure compliance with Minnesota statutes. The unit ensures reasonable insurance rates, reviews financial offerings to ensure stable capital markets, and reviews the financial condition of companies that self-insure. This unit also licenses over 20,000 securities broker-dealers, agents, and investment advisors.

Program at a Glance

- ◆ 21 industries and occupations regulated
- ◆ 6,200 insurance form and rate filings per year
- ◆ 7,300 securities and franchise offerings reviewed each year
- ◆ 9,600 investigation files per year
- ◆ 650 disciplinary actions per year
- ◆ Monitors the activities of 276,000 licensed professionals on a complaint basis
- ◆ Plans to register more than 1,000,000 Minnesota residents on the No-Call list.

Population Served

The Enforcement Division serves:

- ◆ all Minnesota individuals and corporations that need insurance, have mortgages, buy or sell real estate, make investments, or otherwise do business with any of the industries licensed or regulated by the division.
- ◆ licensees and regulated businesses.
- ◆ other government and self-regulatory organizations, both in and out-state, that engage in similar regulatory activity or interact with the regulated industries.
- ◆ Minnesota residents who register for the No-Call list to reduce the number of telemarketing calls they receive.
- ◆ consumers of insurance, investments, and other financial products, as well as the individual licensees and businesses that offer these products.

Services Provided

Investigations. The unit investigates complaints in the following areas:

- | | |
|--|--|
| ◆ Insurance companies | ◆ Insurance agents and brokers |
| ◆ Insurance adjusters | ◆ Third party administrators and self-insurers |
| ◆ Notaries | ◆ Petroleum tank release cleanup fund |
| ◆ Real estate agents and brokers | ◆ Residential mortgage originators and servicers |
| ◆ Residential building contractors and roofers | ◆ Securities brokers, dealers and agents |
| ◆ Franchisors | ◆ Investment advisors |
| ◆ Currency exchanges | ◆ Collection agencies |
| ◆ Real estate appraisers | ◆ Wire transfer agencies (money transmitters) |
| ◆ Cigarette vendors | ◆ Abstractors |
| ◆ Athlete agents | ◆ Telemarketing companies |
| ◆ Viatical settlements | ◆ Cosmetologists, manicurists, and estheticians |

Registration and Policy Analysis:

- ◆ Reviews insurance policies and investment documents to determine whether they comply with applicable statutes and rules.
- ◆ Registers securities and franchise offerings, or certifies exemption from registration requirements.
- ◆ Licenses securities broker-dealers, agents, investment advisors, and viatical settlement providers.
- ◆ Develops and implements policies and procedures to expedite compliance with registration requirements.
- ◆ Promotes development and use of electronic registration and filing systems.
- ◆ Reviews rates charged for insurance products to ensure that rates are not excessive.
- ◆ Authorizes employers and other groups to self-insure.
- ◆ Develops and implements policies and procedures to expedite compliance with registration requirements.

Historical Perspective

Over the past five years the number of consumer complaints received by the division has increased by more than 43%, primarily in the insurance, mortgage originator, and building contractor industries. Over this same time period, the legislature has required the division to develop and administer five new regulatory programs. The following trends affect both the workload and performance of the Investigation unit:

- ◆ Consumer complaints and enforcement activity tend to fluctuate with changes in the economy.
- ◆ As lending rates change, there are corresponding changes in the number of complaints about real estate and building contractor licensees. Complaints have been increasing steadily.
- ◆ Stock market volatility increases complaints about securities and insurance issues.
- ◆ In addition to specific economic influences, the number of consumer complaints and inquiries is generally trending upward.
- ◆ The number of insurance investigations has increased in the last five years. At the same time, the complexity of insurance complaints has also increased. National trends indicate that complex, multi-state investigations will become more frequent.

Registration and policy analysis is a pro-active regulatory activity designed to prevent, rather than respond to, victimization of consumers in connection with insurance and investment transactions. This form of regulation attempts to balance an acceptable level of regulatory burden with the need for product credibility and consumer protection. State government began to regulate the investment business because, prior to regulation, companies offered investment products that did not provide the safety or the opportunity to earn that was represented in sales materials. Insurance regulation is the exclusive responsibility of the state pursuant to the McCarran-Ferguson Act of 1945. Contrary to historical trends, the number of filings and registrations has not decreased during the current economic downturn. The division continues to note an increase in the number and complexity of products filed for approval.

Key Measures

Complaint activity against regulated industries has increased steadily over the last five years, from 8,121 formal investigation files opened in 1998, to 11,685 in 2002. The number of administrative disciplinary actions taken against licensed entities rose from 571 in 1998 to 760 in 2002. This increase appears to be the result of a widespread change in corporate behavior and to financial instability in some business sectors.

Program Description

The Telecommunications Division enforces federal and state telecommunications laws, and develops and implements state policies designed to assure all Minnesotans of continued access to reliable, efficient, affordable, and state-of-the-art telecommunication services on a statewide basis.

Population Served

The Division serves all of Minnesota's residential, small business, and large business consumers of telecommunication services.

Services Provided

Telephone regulation in Minnesota involves a quasi-judicial process that includes administrative review of licensing requests, service quality, pricing of services, and the competitive practices of incumbent and competitive telecommunications companies that interact with each other in the joint provision of services to citizens.

The division's primary responsibilities are to develop statewide telecommunications policies that promote an orderly development of the telecommunications network in the state, and to advocate in the public interest all telecommunications rate structure and service policy matters before the Minnesota Public Utilities Commission.

The division's services include:

- ◆ Advocating for the public interest in all telecommunications rate structure and service policy matters before the Public Utilities Commission.
- ◆ Advocating for the interests of Minnesota citizens and businesses in proceedings of the Federal Communications Commission.
- ◆ Enforcing orders of the Minnesota Public Utilities Commission.
- ◆ Enforcing selected orders of the Federal Communications Commission (FCC).

Historical Perspective

All program costs are recovered through assessments charged to telephone companies operating in Minnesota. These assessments are first deposited into a revolving fund and are subsequently transferred to the General Fund as non-dedicated revenue.

The direct and indirect costs of utility regulation are assessed back to the regulated utility companies. The direct costs are billed to regulated utility companies semi-annually. The indirect costs are estimated and billed 30 days in advance of each quarter. The indirect costs are prorated to regulated utility companies based on their gross Minnesota jurisdictional revenues. The estimated indirect cost billings are reconciled and adjusted to actual costs after the close of the fiscal year. The receipts include the recovery of the department's administrative costs, statewide indirect costs and the cost of services provided by the Office of the Attorney General.

Program at a Glance

- ◆ The division enforces state and federal laws and regulations with respect to:
 - ⇒ 96 incumbent local telephone companies
 - ⇒ 161 competitive local carriers
 - ⇒ 418 companies offering long distance service
- ◆ The division evaluated and acted on approximately 1,798 individual dockets in FY 2002.

Key Measures

Average price for basic phone service

The department's goal is that prices for retail telephone lines will reflect the true underlying cost of providing service. If necessary, federal and state universal service subsidy programs will provide an explicit subsidy designed to achieve the goal of reasonable comparability between urban and rural rates. The department will work to rationalize subsidies and make them more explicit. Cost models and other strategies will help more closely relate price to cost.

Telephone company compliance with applicable minimum retail service quality standards.

The Department of Commerce collects corporate performance data as part of its effort to encourage competition in the telecommunications industry. The information is not readily available. There is an approximate 18 month delay in receiving the data for this table.

| | Qwest | | Frontier | | Sprint | |
|--|-------------|-------------|-------------|-------------|-------------|-------------|
| | <u>1999</u> | <u>2000</u> | <u>1999</u> | <u>2000</u> | <u>1999</u> | <u>2000</u> |
| Held orders | Fail | Pass | Pass | Pass | Pass | No Data |
| Missed installations on standard residential lines | Fail | Fail | Pass | Pass | Pass | Pass |
| Out-of-service reports not cleared in 24 hours | Fail | Fail | Pass | Pass | Pass | Pass |
| Missed repair appointments | Fail | Fail | No Report | No Report | Pass | Pass |

Note: "Held orders" are new primary line service orders not filled within 30 days after the customer submitted the request. The market for local telephone service continues to be dominated by monopoly, or near monopoly carriers. Without competition, there is no real incentive for a firm to provide high quality service to its customers. Regulation can play an important role in ensuring the benefits of competition. Historically, service quality has been problematic for larger telephone companies. The Department of Commerce receives very few, if any, service quality complaints from smaller "independent" telephone companies. Because of the historical problems larger telephone companies have faced, these companies are subject to regulatory standards and reporting requirements that allow the state to monitor service quality, and remedy problems.

The department will continue to monitor the telephone industry to improve the level of service quality, and enforce minimum service quality standards. There are more standards for each company than those reflected in the tables. Standards are negotiated with each company and approved by the Public Utilities Commission. The Commerce Department and the Attorney General's Residential Utilities Division have worked to achieve uniformity in service quality standards and reporting procedures over the past two years. As a result, for 2001, three of the four largest phone companies (Frontier, Citizens and Qwest) all operate under similar standards, and are required to report service quality performance on at least an annual basis.

Number of telephone exchanges or wire centers served where DSL is available

Note: Telephone companies provide high speed service primarily through digital subscriber line (DSL) technology. The availability of DSL service by exchange or wire center is an indicator of the level of availability of high speed service throughout the state. The Department of Commerce conducted statewide inventories of telephone exchanges asking whether DSL was available within each telephone exchange or wire center. (Some companies serve an entire exchange through a single "wire center" or central office. Larger companies may serve an exchange through a number of different wire centers.)

Numbers are expected to improve due to agreements reached between the Department of Commerce and the Office of the Attorney General Residential Utilities Division and certain large telephone companies to further deploy DSL in telephone exchanges throughout the state. The Department of Commerce continues to work on the goal of making broadband service available to every state resident.

Program Description

The Energy Division ensures that Minnesotans have, and will continue to have, access to reliable, reasonably priced, efficient, economically sound, and environmentally responsible energy services.

Population Served

The division serves all energy consumers, investors, producers, and distributors in Minnesota.

Services Provided

The Energy Division provides a broad range of energy-related services:

Energy Planning and Advocacy:

- ◆ Advocates for the broad public interest in natural gas and electric utility matters before the Minnesota Public Utilities Commission.
- ◆ Analyzes utilities' conservation improvement proposals and presents its analyses to the Commerce Commissioner.
- ◆ Participates as the consumer advocate in the development and operation of the regional electric transmission operator.
- ◆ Intervenes before the Federal Energy Regulatory Commission.

The Reliability Administrator ensures the reliability of Minnesota's electric transmission and distribution systems by:

- ◆ Providing independent energy reliability expertise to state energy regulators.
- ◆ Participating in the operations of local and regional transmission operating and planning organizations.

The State Energy Office:

- ◆ Promotes research and development of modern energy technologies.
- ◆ Promotes alternative fuels.
- ◆ Administers energy conservation loan and grant programs.
- ◆ Administers the low-income weatherization program.
- ◆ Monitors Minnesota's petroleum supplies.
- ◆ The Energy Information Center distributes energy conservation information to Minnesota residents.

The Low Income Heating and Energy Assistance Program (LIHEAP) provides financial assistance to help Minnesota's low income residents pay their energy bills.

The division also develops and implements statewide energy policies.

The division coordinates the actions, decisions, and plans of this broad group of energy-related functions to ensure that the department presents a clear and unified approach to energy regulation, reliability, conservation, planning, financial assistance, and information dissemination.

Additionally, the commissioner has direct regulatory authority over energy Conservation Improvement Programs (CIP) designed and implemented by gas and electric utilities.

Program at a Glance

- ◆ Conservation Improvement Programs save energy. In FY 2003, CIP will save:
 - ⇒ 296,000,000 kilowatt hours of electricity
 - ⇒ 1.15 billion cubic feet of natural gas
- ◆ Regulatory effectiveness holds down utility rates. Minnesotans pay:
 - ⇒ 10% less than the national average for electricity.
 - ⇒ 21% less than the national average for natural gas.
- ◆ The Low Income Heating and Energy Program provided \$59.5 million in heating assistance to Minnesota's low income households.
- ◆ In FY 2003, 637 wind turbines will produce 542 megawatts of electricity.

Historical Perspective

The direct and indirect costs of utility regulation are assessed back to the regulated utility companies. The direct costs are billed to regulated utility companies semi-annually. The indirect costs are estimated and billed 30 days in advance of each quarter. The indirect costs are prorated to regulated utility companies based on their gross Minnesota jurisdictional revenues. The estimated indirect cost billings are reconciled and adjusted to actual costs after the close of the fiscal year. The receipts include the recovery of the department's administrative costs, statewide indirect costs and the cost of services provided by the Office of the Attorney General.

The cost of some operations within the Energy Division is supported by federal funds.

- ⇒ LIHEAP operates almost entirely on funds provided by the U.S. Department of Health and Human Services.
- ⇒ Weatherization operates entirely on funds provided by the U.S. Department of Energy.
- ⇒ Loan and grant programs operate partially on funds provided by the U.S. Department of Energy.
- ⇒ The Energy Information Center operates entirely on funds provided by the U.S. Department of Energy.

Key Measures

The cost of electric energy in Minnesota is well below the national average even though residential consumption is increasing steadily. The Energy Planning and Advocacy group works to maintain reasonable rates by representing the interests of Minnesota ratepayers.

In the future, an increasing portion of Minnesota's energy needs will be supplied by alternative sources. The division promotes the use of alternative energy sources through its State Energy Office. The office has mapped Minnesota's wind energy resource, and continues to work to promote wind energy as a viable source for producing electricity. The office expects substantial growth in wind energy production within the next 12 years. If all currently planned projects are realized, the number of megawatts of electricity produced from wind sources will increase by more than 800%.

Program Description

The Telecommunications Access Minnesota (TAM) division of the Department of Commerce contracts with outside vendors for Telecommunications Relay Services (TRS) on behalf of Minnesota's telephone ratepayers. The Minnesota Relay allows a person using a specialized telecommunications device called a Telecommunications Device for the Deaf (TDD) or Teletypewriter (TTY), or an individual with a speech- or mobility-impairment, to communicate with a person using a standard telephone. The Minnesota Relay provides telephone access to Minnesotans who are deaf, hard-of-hearing, speech- or mobility-impaired, 24 hours per day, seven days a week.

Program at a Glance

- ◆ Minnesota Relay:
 - ⇒ Handled 1,408,345 calls in calendar year 2001.
 - ⇒ Offers 40 custom calling features.
- ◆ In FY 2001, the Telephone Equipment Distribution Program:
 - ⇒ Distributed 2,702 telecommunications devices.
 - ⇒ Conducted 241 presentations to customers.

TAM also contracts, through an Interagency Agreement with the Department of Human Service's (DHS) Telephone Equipment Distribution Program (TED Program), to provide a wide variety of assistive listening and telecommunications devices at no charge to eligible deaf, hard-of-hearing, speech- and mobility-impaired Minnesotans.

Population Served

TAM serves Minnesotans who are deaf, hard-of-hearing, speech- or mobility-impaired, and those with hearing that are involved in relayed conversations.

Services Provided

TAM serves its clients through two vendor contracts and an Interagency Agreement:

- ⇒ Contract with Communication Services for the Deaf (CSD). CSD provides the management and human resource components for the Minnesota Relay.
- ⇒ Contract with Sprint. Sprint is responsible for providing the relay facilities, maintenance and access to Sprint's fiber optic telecommunications network.
- ⇒ Interagency Agreement with DHS. DHS's TED Program provides special telecommunications equipment to eligible deaf, hard-of-hearing, speech- and mobility-impaired persons to enable them to access Minnesota's telephone network. DHS provides statewide coverage through its seven Deaf and Hard of Hearing Regional Service Centers. Equipment includes: Telecommunication Devices for the Deaf (TDD/TTY), telephone amplifiers, telephone ring signalers (visual, tactile or amplified), text telephones with large visual displays, Braille TTYs, and "hands-free" speaker phones.

Historical Perspective

- ⇒ The TAM program is funded by a surcharge on all wired and non-wired telephone subscriber lines in Minnesota. The surcharge is required by M.S. 237.52, subd. 2.
- ⇒ Funds from the surcharge are paid into an interest-bearing, dedicated special revenue account that funds:
 - ◆ The TAP program administrator and coordinator;
 - ◆ DHS/TED Program staff;
 - ◆ Special assistive telecommunications devices distributed by the TED Program;
 - ◆ The facility, equipment, and operations of the Minnesota Relay;
 - ◆ Department of Commerce administrative costs.
- ⇒ The Public Utilities Commission (PUC) approves the TAM annual budget and sets the surcharge at a level that will generate sufficient revenue to fund the program.
- ⇒ The surcharge is currently set at \$0.10 per month, per access line. The statutory maximum is \$0.20 per month, per access line.

Key Measures

- ♦ The Minnesota Relay handled 1,408,345 calls in calendar year 2001.
- ♦ Relay service greatly exceeded FCC call answering performance standards. On average, incoming relay calls were answered in two rings or less.
- ♦ The TED Program distributed 2,702 telecommunications devices and conducted 241 presentations in FY 2001.

Program Description

The Weights and Measures Division:

- ⇒ Provides the basis for physical measurement accuracy in Minnesota by maintaining the state standards for mass, length, volume, temperature, and density.
- ⇒ Extends standardization and accuracy to commerce in Minnesota by offering precision calibration services to large and small businesses, and individuals.
- ⇒ Enforces accuracy in commercial marketplaces by inspecting and testing all commercial weighing and measuring equipment in Minnesota.
- ⇒ Ensures the quality of petroleum products by sampling and testing gasoline, diesel fuel, heating fuels, and other products.
- ⇒ Enforces statutory gasoline oxygenation requirements by sampling and testing gasoline at all levels of distribution and sale in Minnesota.
- ⇒ Ensures the net weight and net volume accuracy of consumer commodities by inspecting and testing prepackaged goods in Minnesota.

Program at a Glance

- ◆ Weights and Measures affects more than \$23 billion in Minnesota commerce each year.
- ◆ The metrology laboratory is accredited under ISO 17025. It is one of the most highly regarded measurement laboratories in the nation.
- ◆ In FY 2002, the division's 17 petroleum and scale investigators tested and inspected:
 - ⇒ 49,000 gas pumps.
 - ⇒ 8,200 light capacity scales.
- ◆ In FY 2002, the division's six heavy capacity scale investigators tested and inspected:
 - ⇒ 1,600 vehicle scales
 - ⇒ 900 grain and fertilizer scales.
 - ⇒ 1,900 other heavy capacity scales.

Population Served

The Weights and Measures Division serves almost every person and business in Minnesota, including:

- ⇒ Minnesota citizens and businesses that buy or sell goods or services based on a measured quantity.
- ⇒ Businesses and individuals needing International Organization for Standardization (ISO) accredited calibration services to enable them to provide materials or services to other businesses in the United States, and throughout the world, and to enable them to compete in European Union nations.
- ⇒ Motor fuel, heating fuel, and aviation fuel consumers.

Services Provided

The division provides three distinct services:

- ⇒ Promotes accuracy in basic physical measurement by offering precision calibration services to Minnesota businesses and individuals.
- ⇒ Enforces Minnesota's weights and measures statutes to ensure the accuracy of gas pumps, grocery scales, prepackaged commodities, livestock scales, grain and fertilizer scales, and a broad range of other commercial weighing and measuring equipment.
- ⇒ Ensures the quality of gasoline, diesel fuel, heating fuel and other petroleum products.

Historical Perspective

The Weights and Measures Division is one of the oldest continuously operating units of Minnesota government. The division formally commenced operations in 1885 as part of the Railroad and Warehouse Commission.

The division has noted a continuing upward trend in the number of gasoline pumps in commercial use in Minnesota. The number has increased from approximately 21,000 in 1981 to 50,000 in 2002. Gasoline consumption, which declined in the 1970s and 1980s, and held fairly steady in the 1990s, is increasing again. Increasing gasoline consumption, and increasing gasoline prices, continue to increase demand for the division's inspection services.

Key Measures

The division's metrology laboratory has achieved and maintained accreditation under ISO 17025, the most recently adopted quality standards. Additionally, the metrology laboratory meets performance standards set by

the National Institute of Standards and Technology/National Voluntary Laboratory Accreditation Program and the NIST Office of Weights and Measures.

A comparison of measurement process uncertainties with other state and private metrology laboratories demonstrates that the Minnesota metrology laboratory consistently maintains the best measurement process uncertainties in the United States.

Enforcement operations have maintained high compliance rates for commercial weighing and measuring equipment despite the rapid increase in the number of gas pumps in use in for comparison purposes, there were about 20,000 gas pumps in use in Minnesota in FY 1980. Currently, there are approximately 50,000 pumps in use. In the last 22 years, the number of gas pumps increased by 250%, the division's staff decreased and its productivity more than doubled.

Petroleum quality enforcement operations maintained a 98% compliance rate for gasoline octane and oxygenation.

Agency Purpose

The Department of Corrections' primary purpose is public safety. The department's mission is to develop, provide, and promote effective correctional practices that contribute to a safer Minnesota. Its vision is that an offender's first time in the system is his or her last time. The values and goals of the department focus on personal responsibility and opportunities for self-sufficiency, accountability, and responsive and limited government.

Created by Minnesota law (Chapter 241) in 1959, the department operates secure prisons and provides community supervision of offenders with public safety as the ultimate goal. Prison programs are designed to prepare offenders for release so that they become contributing, law-abiding community members. Restoring the victim, community, and offender – is a key philosophical approach of the department.

Core Functions

The Department of Corrections' primary responsibilities include:

- ⇒ Secure and safe operation of seven prisons for adult male felons, one for adult female felons, and two correctional facilities for juveniles.
- ⇒ Provision of work, treatment, faith-based, and education programs that reduce the risk offenders present to the community after they are released.
- ⇒ Administration of the Community Corrections Act (CCA) that provides subsidies to 31 counties for local correctional services.
- ⇒ Supervision of adult offenders on probation, supervised release, and parole in the 56 counties that do not participate in the CCA.
- ⇒ Operation of programs that put non-dangerous offenders to work doing community service. This includes the Sentencing to Service program whereby offenders on probation clean up parks, roadways, and rivers; build recreation trails; and complete thousands of other improvement projects. Through the Institution Community Work Crew program, minimum-custody inmates build homes for low-income families.
- ⇒ Inspect and enforce standards in all jails throughout the state.
- ⇒ Administer and manage the department so that it operates as cost-effectively, efficiently, and productively as possible.

The department continues to address rapidly increasing offender populations both in prisons and on supervision in the community. Over the last decade, the prison population has more than doubled and the supervised offender population has increased over 80%. Population projections indicate continued increases through the FY 2004-05 biennium and beyond.

Operations

Since 2001, the department has been implementing sweeping budget reductions that are successfully reducing prison per diem and other department costs. By eliminating 200 positions and expanding bed capacities at existing prisons, the department's national ranking of costs per inmate has dropped from second to sixth.

Other initiatives - such as attaining self-sufficiency for MINNCOR prison industries, reducing staff positions and assigning their duties to other employees, and sharing of services among correctional facilities - have resulted in substantial savings.

At A Glance

10 Minnesota correctional facilities located at:

- ◆ Oak Park Heights
- ◆ Stillwater
- ◆ St. Cloud
- ◆ Rush City
- ◆ Faribault
- ◆ Lino Lakes
- ◆ Moose Lake/Willow River
- ◆ Shakopee
- ◆ Red Wing
- ◆ Togo (Thistledeew Camp)

Facility populations as of April 2002:

- ◆ 6,533 adult male inmates
- ◆ 414 adult female inmates
- ◆ 217 juvenile males
- ◆ 7 juvenile females

Offenders under community supervision as of April 2002:

- ◆ 126,000 offenders on probation, supervised release, and parole statewide
- ◆ 20,000 offenders supervised by the Corrections Department; others supervised locally

There are three operational divisions in the department: adult facilities, community and juvenile services, and management services.

Adult Facilities – The adult facilities division includes the department's eight correctional facilities that house adult male and female felons and support services such as offender education programs, religious programming, inmate transfer and classification, and building improvements and expansions. Additionally, units exist in the areas of investigations, correctional industries, and medical services.

Community and Juvenile Services – This division provides probation and supervised release/parole services and special programs including community service and work release. This division also coordinates juvenile services including oversight of two juvenile facilities operated by the department. Other responsibilities include:

- ◆ research and evaluation;
- ◆ administration of the Community Corrections Act, grants, and contracts;
- ◆ correctional facility/jail inspection;
- ◆ administration of offender transfer agreements with other states;
- ◆ planning for female offenders;
- ◆ sex offender/chemical dependency services;
- ◆ administration of the county probation subsidy;
- ◆ contracts with local programs; and
- ◆ restorative Justice.

Management Services – This division provides a broad range of management support services throughout the department. Units include policy and legal services, human resource management, diversity office, information technology, financial services and office services.

Budget

The department's biennial budget totals \$721.9 million, of which \$76 million is passed through to local entities in FY 2002. The department collects \$24 million annually from sales of products manufactured by offenders at correctional facilities and \$17 million in federal funds for chemical dependency and education programs, and facility construction and operation costs. Department staff includes 3,865 full-time equivalent employees.

Program Description

The Adult Facilities Division serves a dual-purpose by protecting the community through incarceration of the offender at one of the eight Minnesota adult correctional facilities and by providing industrial, vocational, academic, and therapeutic opportunities for inmates to maximize the probability they will return to the community as law-abiding citizens.

Population Served

Offenders committed to the commissioner of corrections to serve their term of incarceration make up the population served within correctional facilities. Minnesota prison populations have significantly increased since 1989, and projections indicate this trend will continue into the foreseeable future. In fact, most recent projections estimate offender population to increase approximately 550 beds over current prison bed capacity by the end of FY 2005.

Services Provided

The Adult Facilities Division houses adult male and female felons. Each correctional facility is classified utilizing a system with a six-level classification structure ranging from level 1, which is minimum custody, to level 6, which is maximum custody.

Central Office provides support services within facilities such as offender education programs, religious programming, inmate transfer and classification, and building improvements and expansion. Additionally, services in the area of investigation, correctional industries, and medical services are also provided. Each correctional facility provides the above-mentioned direct services to offenders.

Historical Perspective

During the past biennium sweeping budget reductions have reduced prison per diems and other department costs. Through an extensive internal review at each facility, the Department of Correction (DOC) has, or will be, increasing total capacity by over 500 at marginal costs. Also following a national consultants' recommendation regarding DOC staffing, the department has identified 192 positions that have been, or will be during FY 2003, eliminated. Expanding bed capacities at existing prisons by over 500 offenders and eliminating 192 positions has dropped the department's national ranking of cost per inmate from second to sixth.

Several other department initiatives have made a significant impact on this division and resulted in cost savings, such as: attaining self-sufficiency for MINNCOR prison industries, reducing staff positions and assigning their duties to other employees, and sharing management service activities among correctional facilities. As a result of these and other initiatives, the department's budget request did not include the \$18 million set aside by the Department of Finance for institutional caseload increases in FY 2002 and 2003. Instead, the DOC funded bed increases with operational savings resulting from the per diem reduction plan. This was the first time in the recent history of the department's budget that a caseload increase was not requested. Additionally, the DOC continues to explore more per diem reduction initiatives for the upcoming biennium through further shared services between facilities, centralizing programming, and expanding beds at marginal costs.

Program Funding

This program is primarily funded through General Fund appropriations.

Program at a Glance

8 Minnesota correctional facilities located at:

- ◆ Oak Park Heights
- ◆ Stillwater
- ◆ St. Cloud
- ◆ Rush City
- ◆ Faribault
- ◆ Lino Lakes
- ◆ Moose Lake/Willow River
- ◆ Shakopee

Facility populations as of July 2002:

- ◆ 6,533 adult male inmates
- ◆ 442 adult female inmates

Program Description

The Juvenile Services Unit plans and directs the department's legislative, policy, and interagency collaboration initiatives relating to juveniles, operates a juvenile correctional facility and a juvenile residential program; manages the juvenile female program for girls committed to the commissioner of corrections; provides transition and aftercare services to all juveniles committed and/or placed in the commissioner's care; and provides training, technical assistance, and administers various subsidies and grants to counties.

Population Served

Juvenile offenders committed to the commissioner of corrections, or admitted to a facility by a court order, to complete a juvenile program.

Services Provided

This unit provides statewide leadership in developing juvenile corrections policy, legislative initiatives, special studies and reports, interagency partnerships and revenue generation strategies specifically with the departments of Human Services; Children, Families and Learning; and Health. It provides technical assistance and training to counties and other juvenile justice stakeholders. It also administers the state-committed female adolescent contract and various detention grants and subsidies programs to counties.

The MCF-Red Wing provides programming for serious, chronic juvenile male offenders including assessments, treatment planning, cognitive restructuring, cognitive skill building and life skills, restorative conferencing, education, chemical dependency, sex-offender treatment, and mental health services.

Thistledew Camp provides a three-month residential and a three-week adventure therapy program for juvenile males from ages 13 to 17. Both programs incorporate restorative justice and cognitive skill-building components. The three-month program places emphasis on educational programming and transition back to the community. Thistledew incorporates risk assessment into program planning and also provides mental health screening and rule 25 evaluations.

The Transition/Aftercare Unit provides services to youth discharged from the MCF-Red Wing, Thistledew Camp, and the juvenile female contracted residential program. This unit provides transitional planning, which includes: restorative conferencing, community reintegration, vocational placement and support, educational transition, support-system enhancements, aftercare, and as individual and family counseling.

Historical Perspective

In the last two bienniums the Juvenile Services Unit has gone through dramatic structural changes such that it now accounts for less than 4% of the agency budget. Most significant was the closing of the Sauk Centre facility and the assumption of its specialized programming of chemical dependency, sex offender treatment, and mental health services by the MCF-Red Wing. The closing of Sauk Centre also necessitated the action of contracting with a private facility for juvenile females committed to the commissioner of corrections. The unit also experienced the loss of the Youth Experience Alternatives Program at Camp Ripley. There have been several new initiatives in this unit. There has been the creation of a juvenile services transitional unit, a 10-bed challenge "Endeavors" program at Thistledew Camp, and the opening of the Berglin Mental Health Center at the MCF-Red Wing. The reorganization of the administrative support unit has also added responsibilities for developing statewide interagency initiatives with the departments of Children, Families and Learning; Human Services; and Health. This support unit also administers specific grants and subsidies with local units of government. The

Program at a Glance

1 Minnesota correctional facility located at:

- ◆ Red Wing

1 Residential facility:

- ◆ Thistledew Camp

Facility populations as of July 2002

- ◆ 237 juvenile males
- ◆ 4 juvenile females

Juvenile Services functions

- ◆ Contracted residential programming for state-commit juvenile females
- ◆ State interagency policy and collaboration initiatives
- ◆ Transition/aftercare services
- ◆ Technical assistance and mandated training
- ◆ Administration of special grants/subsidies

CORRECTIONS DEPT

Program: JUVENILE SERVICES

Narrative

MCF-Red Wing and contracted juvenile female program generate revenues of 65% of actual cost of confinement (per statute). Thistledeew Camp remains self-sufficient.

Program Funding

This program is primarily funded through General Fund appropriations.

Key Measures

Goal: Community Safety

Key Measure: Reducing the risk of re-offending

Reduction in Risk Score Pre and Post
Youth Level of Service Inventory

Recidivism Rates

Program Description

The Community Services program exists to provide a broad range of correctional services in the community directly by employees of the department or through the program's oversight of state grants and subsidies. The objectives of these services are to protect the public, control offender criminal behavior, assist offenders in development of skills necessary to function in the community, provide fiscal accountability, and ensure compliance with standards governing the operation of local correctional facilities.

Population Served

This program serves offenders under community supervision. Additionally, this program has regular contact with correctional professionals on the local and national level, elected officials, courts, treatment providers, and the community at large.

Services Provided

The Field Services Unit is responsible for all Department of Corrections (DOC) programs providing direct services to offenders in the community. The Probation and Supervised Release activity of this program provides community supervision services to offenders in 56 counties not organized under the Community Corrections Act. These services are provided to adult felons in 56 counties and to adult misdemeanants and juveniles in 27 counties and include investigation services for the courts and the Department's Hearings and Release Unit. Agents of the DOC supervise monthly caseloads of approximately 20,000 adult and juvenile offenders, of which 90% are on court-ordered probation with the remainder on supervised release. The Intensive Supervision Program provides community supervision to the most serious offenders released from prison with face-to-face contacts, electronic monitoring, mandatory work or school, curfews, and random drug testing. Sentencing to Service (STS) provides a very specific sentencing option to the courts for non-dangerous offenders in lieu of, or in conjunction with, jail. The Institution Community Work Crew (ICWC) program provides supervised community work crews for select minimum-security inmates at the end of their institutional stay. The Affordable Housing Program, part of ICWC, utilizes minimum-security inmates to build homes for low-income families while teaching a marketable skill. Work Release provides a structured transition period for offenders returning to the community up to eight months prior to their scheduled release date. The program contracts with public and private agencies for residential work release services. The community phases of the Challenge Incarceration Program include intensive community supervision by specially trained agents, drug testing, electronic monitoring, chemical dependency counseling and other treatment programs.

The Administrative Services Unit of this program has four distinct and different functions. The Sex Offender/Chemical Dependency Services activity is responsible for a multifaceted system for the management of sex offenders that includes implementation of community notification, increased and improved treatment both in prison and in the community, development and monitoring of treatment standards, civil commitment referrals, and training and collaboration with the Department of Human Services (DHS) on the highest-risk sex offender. The Grants and Subsidies activity is responsible for administration and monitoring of all state funds appropriated for the delivery of correctional services in the community including direct subsidies, grants, contracts, or reimbursements.

Program at a Glance

Community Services Functions:

- ◆ Probation and Supervised Release
- ◆ (56 Non-CCA Counties)
- ◆ Intensive Supervision Program
- ◆ Sentencing to Service (STS) Program
- ◆ Work Release
- ◆ Affordable Housing Building Program
- ◆ CIP – Phases 2 & 3 Supervision
- ◆ Sex Offender/Chemical Dependency Services
- ◆ Interstate Compacts
- ◆ Facilities Licensing & Inspection
- ◆ Grants, Contracts & Subsidy Administration
- ◆ Program Support & Evaluation
- ◆ Technical Assistance
- ◆ Restorative Justice
- ◆ Jail Resource Center
- ◆ Female Offender Planning Unit

Offenders under community supervision as of January 1, 2002:

- ◆ 130,000 offenders on probation, supervised release, and parole statewide
- ◆ 20,000 offenders supervised by the Corrections Department; others supervised locally

Grant programs:

- ◆ Funds administered to partnerships that have been developed between state, county and nonprofit agencies to provide correctional services for adult and juvenile offenders

The Interstate Compact activity is responsible for administering adult and juvenile interstate compacts, which allow for the orderly transfer of probation and parole supervision to and from the state. This activity also is responsible for the return of juvenile runaways, escapees, absconders, and minors taken across state lines by non-custodial persons. The Licensing and Inspection activity is responsible for licensing all local correctional facilities in Minnesota and the certification of all out-of-state juvenile facilities that accept delinquent youth from Minnesota. This unit enforces standards, investigates complaints/unusual occurrences, and provides technical assistance to these facilities. In addition, the director of this unit provides overall coordination of division activity, assistance to the deputy commissioner, and acts as the division's legislative liaison.

The Research and Technical Assistance unit ensures that the foundational base, from which the department and other criminal justice agencies operate, is anchored in sound data and best practices. The research activity of this unit is responsible for providing multiple stakeholders, including the legislature, the federal government, department administration, staff, and the public with accurate data and comprehensive reports essential to funding, policy and program decision-making. The research unit also has responsibility for establishing key outcomes and evaluating program effectiveness including establishing a standardized and meaningful method for tracking recidivism across Minnesota. Federal law requires all research on offenders meet ethical human subject guidelines. The research activity fulfills this obligation by managing all research on offenders under state jurisdiction. The technical assistance activity of this unit provides information to the legislature and department administration as well as training to a variety of criminal justice organizations such as correctional facilities and field staff, county corrections staff, and sheriff/jail staff on effective offender intervention. The technical assistance activity brings together local service providers for collaboration, exchange of information, and to reduce redundancies in service delivery.

Program Funding

This program is primarily funded through General Fund appropriations.

Historical Perspective

The number of offenders under supervision in the community has grown steadily over the past decade, from 80,000 in 1992 to over 130,000 today. Activities required of probation officers have grown as well. Since 1992 greater emphasis has been placed on the supervision and programming of sex offenders. Some activities added over the past 10 years are sex offender registration, notification, and enhanced supervision programs. The Intensive Supervision Program has more than doubled since its inception in 1991.

DOC grants, contracts, and subsidies amounted to approximately \$32.4 million in 1992 and were administered by staff in numerous units throughout the department. In March of 1999, grants administration was merged into one unit, and total funds administered today have grown to over \$73.5 million. The Interstate Compact was enacted into law in 1939. During the 2002 legislature a new compact was enacted. In July of 1994 Minnesota was supervising approximately 1,500 offenders for other states and had approximately 1,000 Minnesota offenders in other states. In July of 2002 Minnesota was supervising over 2,500 offenders for other states and had over 2,300 of its offenders in other states. In the Sex Offender Services activity the addition of community notification, risk level assessment, a level III web site, DOC/DHS collaboration, and treatment research have all been added responsibilities.

In the fall of 2002 the Research and Technical Assistance activities of the department were consolidated into one unit to promote best practices within the state and respond to the ever-increasing demand of the legislature for information, data, and result-based evaluations.

Key Measures

Offenders satisfying court-ordered restitution

Percent of Offenders reconvicted of a felony while under supervision

Sex Offender Treatment Recidivism
Probation 2002 UpdateSex Offender Treatment and Recidivism
Prison Update 2002

- * This sample consists of all sex offenders placed on probation in Minnesota in 1987, 1989, and 1992
- * Re-offense checks done in June 2002; time at risk ranges from 9-15 years

- * This is the sample originally studied by the Legislative Auditor in 1997 report on Recidivism of Adult Felons
- * All sex offenders released from the DOC in 1992, except for female offenders and offenders civilly committed as Psychopathic Personalities
- * Offenders who entered treatment were more likely to have a prior sex offense felony than those who never entered (38% vs 17%).

Program Description

The Operations Support Unit provides direction and support that contributes to consistency across agency functions and enables all programs to accomplish the department's mission.

Population Served

Each Minnesota correctional facility and all field service offices are served by this unit as are all of the department's employees. All offenders are served by providing offender account services, adult and juvenile revocation hearings, offender policies, offender records, offender claim processing, and offender discipline review.

Services Provided

Support Services establishes the mission and major policy for the department and provides executive leadership. It also includes the Office of Diversity.

Policy and Legal Services is responsible for conducting offender hearings, developing policy, and providing direction and technical assistance on legal issues.

The Interagency Management Unit manages projects crossing local, state, and national criminal justice entities. Responsibilities include developing, piloting, and implementing the Statewide Supervision System (SSS) for probation and detention. Additionally, the unit develops integrated criminal justice information in collaboration with other state criminal justice agencies (CriMNet). Specific agency planning efforts, such as adult prison population projections and per diem reduction plans are also the responsibility of this unit.

Financial Services monitors and measures all fiscal activity within the department and reports the economic effect to managers and employees. It collects, classifies, records, and summarizes financial transactions and data. A primary responsibility is to provide managers with information necessary for planning and controlling operations on a day-to-day basis. This unit also provides offender account services.

Office Services provides support services to both central office and field services. These services include telecommunications, coordination of motor pool vehicle usage, physical plant and staff security, courier services, specialized forms, mail processing, printing and duplicating services, receptionist services, space planning, and maintenance of and improvements to the building.

Human Resources provides staffing, labor relations, management consultation and employee programs for the department. The primary goal is to partner with management in the recruitment, selection, management, and retention of a high-quality and diverse workforce. Services provided by the unit include recruitment, hiring assistance, job classification, benefit administration, labor contract negotiation and administration, supervisor training, affirmative action support, and human resource information systems. Employee Development provides pre-service and in-service training designed to develop and maintain employee skill levels.

Information Technology is responsible for supporting the department's mission by providing computerized data processing services to department operational and management staff.

Program Funding

This program is primarily funded through General Fund appropriations.

Historical Perspective

This unit has worked diligently the past three years to focus on system reengineering through shared services and/or centralization for cost-containment. The Human Resource Unit has been centralized. Financial Services

Program at a Glance

Management Services Functions:

- ◆ Support Services
- ◆ Policy and Legal Services
- ◆ Interagency Management Unit
- ◆ Financial Services
- ◆ Office Services
- ◆ Human Resources
- ◆ Employee Development
- ◆ Information Technology

Number of Employees as of July 2002:

- ◆ 3,716

Number of Offenders as of July 2002:

- ◆ 7,212 adults and juveniles

and Information Technology are sharing services department wide. Employee Development is the next unit to be centralized and this will take place over a two-year period. This reengineering process has created efficiencies and reduced a number of positions in this unit.

Key Measures

Goal: Operational Effectiveness

Key Measures: Improve/standardize data systems and practices

Maintain a diverse, well-trained staff

Use of Statewide Supervision System

Staff Turnover Rates

Agency Purpose

Minnesota's Court of Appeals is the state's intermediate appellate court, providing citizens with prompt and deliberate review of final decisions of the trial courts, state agencies and local governments.

This error-correcting court hears and decides cases in three-judge panels.

- ⇒ **Mission:** To provide the people with impartial, clear, and timely appellate decisions made according to law.
- ⇒ **Vision:** To be an accessible intermediate appellate court that renders justice under the law fairly and expeditiously through clear, well-reasoned decisions and promotes cooperative effort, innovation, diversity, and the professional and personal growth of all personnel.

Core Functions

The Court of Appeals has jurisdiction over all final decisions of the district court, except first-degree murder convictions, which are appealed directly to the Supreme Court. The Court of Appeals has jurisdiction to review interlocutory decisions, administrative agency decisions, and rules and decisions of the Commissioner of Economic Security.

In support of these core functions, the Court of Appeals:

- ⇒ Manages its cases to ensure prompt resolution within the statutory 90-day time limitation from oral argument to decision.
- ⇒ Enhances the knowledge and skills of its staff by regular training.
- ⇒ Explores the use of technology to improve its ability to provide timely and effective access to the court.

Operations

Through its decisions and administration, the Court of Appeals has an impact on all Minnesotans.

In their adjudicative roles, the judges of the Court of Appeals are assisted by law clerks. Administratively, they are assisted by the Chief Attorney's Office and the State Court Administrator's Office.

The Court of Appeals hears cases throughout the state as well as in St. Paul. The court has installed interactive video as an additional measure to provide timely access.

The Court of Appeals issues a published opinion, unpublished opinion, or order opinion on each case it considers. The judges also share responsibility for hundreds of special term opinions, orders on motions, and petitions filed with the court.

With the assistance of a computerized case management system, the court monitors the progress of every appeal to ensure that there are no unnecessary delays in processing. The court demonstrates the value of aggressive, hands-on management of its cases.

Budget

The Court of Appeals is funded 100% from General Fund direct appropriations.

At A Glance

- ⇒ The Court of Appeals has 16 judges and considers more than 2,000 appeals each year.
- ⇒ By law, the court must issue a decision within 90 days after oral arguments – the shortest deadline imposed on any appellate court in the nation.
- ⇒ The court expedites decisions on child protection cases, child custody cases, mental health commitments, and other requested matters.
- ⇒ Court of Appeals' decisions are the final ruling in about 95% of the appeals filed each year.
- ⇒ The Court of Appeals operates in a constantly changing environment.
 - ◆ Laws, case types and legal sanctions change annually.
 - ◆ Caseload volume is determined by the trial courts and by other branches of government.
- ⇒ The Minnesota Courts regularly review their effectiveness by monitoring:
 - ◆ Case filing trends
 - ◆ Case clearance rates
 - ◆ Elapsed case time from filing to disposition

Costs of non-judicial personnel use 46% of the resources of the Court of Appeals. Another 34% goes to the personnel costs of the judicial personnel. The remaining 20% is for operations (including items such as legal research materials and supplies.)

The Court of Appeals has 84.25 FTEs.

Agency Purpose

The separate Office of the Crime Victims Ombudsman was eliminated effective July 1, 2002, and funding originally appropriated to it for FY 03 was eliminated under legislation passed during the 2002 session. The legislation moved the functions of this Office to the Department of Public Safety under the Crime Victims Oversight Act. Subsequent to those actions, Reorganization Order No. 184 was issued with the approval of the Governor to move these functions to the Ombudsman for Mental Health and Mental Retardation in July 2002. A more detailed description of these functions is found under that agency's program profiles. Fiscal data through FY 02 is included under this agency profile.

Agency Purpose

Minnesota Statute 150A and Minnesota Rules chapter 3100 provide the Minnesota Board of Dentistry responsibility to act as the official licensure agency for dental professionals (dentists, hygienists, and dental assistants) whose fitness to practice has been tested, and whose training and other qualifications meet the specifications established by the legislature and the board.

The mission of the board is:

- ◆ to ensure that Minnesota citizens receive quality dental health care from competent dental health professionals;
- ◆ to protect the public at large by issuing licenses/registrations only to those who meet the minimum standards of practice;
- ◆ to provide timely and impartial resolution of complaints filed against dental professionals; and
- ◆ to demonstrate competency of regulated dental professionals through establishing and monitoring continuing education standards.

Core Functions

The purpose of the board is to protect the public by ensuring that licensed dental professionals comply by the board's rules and practice in a professional, legal, and ethical manner. The core functions are:

- ◆ regulating the dental professionals in Minnesota;
- ◆ establishing minimum standards for licensure/registration;
- ◆ ensuring that those who hold a professional dental credential from the board continue to meet those standards throughout the time they hold the credential;
- ◆ identifying those who fail to maintain the minimum standards needed to render quality care to patients safely;
- ◆ taking timely and appropriate disciplinary or corrective action when warranted; and
- ◆ providing accurate and current information to the public to enable them to make informed decisions about their dental health care.

Operations

- ⇒ The board consists of nine members appointed by the governor: five dentists, one dental hygienist, one registered dental assistant, and two public members.
- ⇒ The full board normally meets five times per year. The board also appoints several committees (e.g., executive, complaint, licensure by credentials, policy) that meet as needed.
- ⇒ The board benefits and affects the public by ensuring that dental professionals meet and maintain minimum standards of competence and practice.

Budget

Total direct and indirect expenses for FY 2002-03 biennium are \$2.634 million. The board staff includes 9.5 full-time equivalent employees.

Of the total budget for the FY 2002-03 biennium, \$2.205 million is collected as non-dedicated revenue that is deposited into the state government special revenue fund. The board collects fees charged to applicants, licensees, continuing education sponsors and professional corporations. The board is responsible to collect enough revenue to recover all direct and indirect costs.

At A Glance

Biennial Budget – FY 2002-03:

Total Expenses: \$2.634 million

Total Revenues: \$2.205 million

Staff: 9.50 Full-time equivalent employees

MN Board of Dentistry Statistics

(As of June 30, 2002):

Total Licensed: 11,975

The board is responsible for the costs of services received from the Attorney General's Office, Health Professional Services Program, Department of Health HIV/HBV/HCV program and the Administrative Services Unit. A direct appropriation is given to each of these programs from the state government special revenue fund. The board must ensure that sufficient revenue is collected through its fees to fund their portion of these programs costs.

Agency Purpose

Minnesota Statutes 148.621 – 148.633 and Minnesota Rules, chapter 3250 provide the Minnesota Board of Dietetics and Nutrition Practice authority to act as the licensure agency for the practice of dietetics and nutrition. It was established and currently exists to protect the public through the regulation of dietitians and nutritionists in the state of Minnesota. Regulation is accomplished through initial licensure examination, annual license renewal and required continuing education requirements.

The mission of the board is:

- ◆ promoting the public's interest in receiving quality dietetic and nutrition services from competent dietitians and nutritionists;
- ◆ protecting the public by ensuring that all licensed dietitians and nutritionists meet the educational and practical requirements specified in law; and
- ◆ protecting the public by setting standards for quality dietetic and nutrition services.

Core Functions

The board fulfills its mission by:

- ◆ reviewing and approving examination standards to insure knowledge of applicants for licensure as dietitians and nutritionists;
- ◆ reviewing of continuing education required to maintain knowledge for the safe practice of dietetics and nutrition;
- ◆ managing complaints alleging violation of board statutes and rules through initial committee review, thorough investigation, and disciplinary conferences with licensees to determine whether legal action against a dietitian or nutritionist is warranted; and
- ◆ providing accurate information about licensure requirements, standards of practice and disciplinary process to the public, licensees, and other interested parties.

Operations

The board serves consumers, licensed dietitians, licensed nutritionists, applicants for licensure, other governmental agencies, third party payers and sponsors of continuing education courses. Services are delivered through direct communication (telephone, mail, e-mail, and in-person).

Budget

Total direct and indirect expenses for FY 2002-03 biennium are \$232,000. The board staff includes 1 full-time equivalent employee.

Of the total budget for the FY 2002-03 biennium, \$173,000 is collected as non-dedicated revenue which is deposited into the state government special revenue fund. The board collects fees charged to applicants, prospective applicants, licensees, and sponsors of continuing education programs. The board is responsible to collect enough revenue to recover all direct and indirect costs.

The board is responsible for the costs of services received from the Attorney General's Office, Health Professional Services Program, and the Administrative Services Unit. A direct appropriation is given to each of these programs from the state government special revenue fund. The board must insure that sufficient revenue is collected through its fees to fund their portion of these program costs.

Agency Purpose

Minnesota Statutes (M.S. 256.482) provide the State Council on Disability (MSCOD) with the broad charge of giving attention to the needs of persons who have a disability and to advocate plans, programs and policies which serve the needs of people with disabilities. Statutes also direct the council to serve as liaison to the Office of Disability Employment Policy, which recently assumed all duties of the President's Committee on Employment of People with Disabilities. Within this broad charge, the council has focused its purpose by identifying four strategies that span all council activities: information and referral services; advisory recommendations; customer focus and quality improvement; and research and data collection.

⇒ MSCOD Mission: The MSCOD is an agency that collaborates, advocates, advises and provides information to expand opportunities, increase the quality of life and empower all persons with disabilities (Adopted 2/15/01).

Core Functions

The MSCOD links people with disabilities to those who are statutorily responsible for planning and delivering services to them, and supplements the efforts of disability advocacy groups in the private sector. These core functions are:

- ◆ providing aid and advisory services on matters pertaining to disability related public policy;
- ◆ providing disability related information and referral services on all disability related services and programs;
- ◆ providing technical assistance on laws, regulations and codes; and
- ◆ researching, formulating and advocating plans, programs; and policies serving the needs of people with disabilities.

Key Measures

To measure success and improve service quality, the council surveys satisfaction levels of participants at trainings, the usefulness of key publications, and information and referral services provided.

Operations

The council serves a varied customer base. People with disabilities and their families are the primary customers and benefactors of the council's services. The MSCOD also provides services to public officials, state agency personnel, local governments, employers, community organizations, disability related organizations, institutions, architects, builders, neighborhood groups and the broader public.

Aid and advisory services are provided formally, and informally, to public officials and state agency personnel. Direct disability related information and referral services are provided via telephone, e-mail, fax, and participation in public and private events to approximately 15,000 contacts each year. Disability related information, such as MSCOD's publications, frequently asked questions and answers (FAQs), fact sheets, and links are also available through MSCOD's website. Approximately 40 customized trainings are provided each year on disability issues to a wide array of audiences. MSCOD also provides information services, via two e-mail distribution lists, to approximately 200 disability related organizations throughout the state.

At A Glance

The MSCOD provides services to a person of any age, with any disability, as well as government officials, private agencies, builders, employers and the broader public.

The incidence of disability increases 25 percent after the age of 65. "By 2025, the number of Minnesotans age 65 and older is projected to be 80 percent larger than in 1995."*

Disability status among noninstitutionalized Minnesotans is 7% ages 5 – 20; 14% ages 21-64; and 37% age 65 and over. **

MN has the nation's highest percentage of people with a disabilities in the workforce at 65% compared to 57% nationally. An estimated 84% of Minnesotans are employed who have "no disability" compared to 77% nationally. **

* Faces of the Future, MN Planning, Sept. 1998

** Census 2000 Supplementary Survey

Budget

The council's FY 2002-03 budget totals \$1.4 million from the state's General Fund. Council staff include 10 full-time equivalent (FTE) positions. There are 21 council members appointed by the governor, with at least one member from each economic development region of the state. There are 10 ex-officio, non-voting members, representing various state agencies.

Agency Purpose

The purpose and mission of the Disabled American Veterans (DAV) is accomplished by:

- ◆ representing the interests of disabled veterans, their families, their widowed spouses, and their orphans before Congress, the White House, the Judicial Branch, as well as state and local government;
- ◆ providing free professional service to veterans and their families in obtaining benefits and services earned through military service provided by the U.S. Department of Veterans Affairs (VA) and other agencies of government;
- ◆ extending the DAV's mission of hope into the communities where these veterans and their families live through a network of the department and chapter outreach service programs; and
- ◆ providing a structure through which disabled veterans can express compassion for their fellow veterans through a variety of volunteer programs.

At A Glance

- ◆ There are approximately 420,000 veterans in Minnesota.
- ◆ In FY 2002, DAV representation before the U.S. Department of Veterans Affairs resulted in over \$43 million in benefits to Minnesota veterans.
- ◆ In FY 2002, the Transportation Network provided over 27,000 individual rides to VA medical appointments, comprising over 1.7 million miles traveled.
- ◆ Volunteer efforts by DAV chapters, county veteran service officers, and other veteran service organizations resulted in over 92,000 volunteer hours donated.
- ◆ Over 4,000 veterans were assisted with Thrift Store gift certificates for clothing needs.

Core Functions

The DAV service officers serve as representatives for veterans and their families in obtaining benefits to which they are entitled. The DAV also provides informational seminars and publishes articles to bring about an awareness concerning potential entitlements to benefits and services available through the DAV and U.S. Department of Veterans Affairs. The DAV provides direct assistance to veterans through its Older Veterans Assistance Program, its Thrift Store Gift Certificate program, its DAV Transportation Network program, and Veterans Service programs, all of which are of direct aid to veterans and their families in Minnesota.

Operations

The DAV has a Veteran National Service Office at Fort Snelling, staffed by four service officers and two secretaries. Services are rendered to individual veterans and are represented before the U.S. Department of Veterans Affairs to obtain entitled benefits. The Minnesota DAV department office is located in the Veteran Service Building in St. Paul with three personnel and has two other offices located at the Veterans Affairs Medical Center (VAMC) in Minneapolis and the VAMC in St. Cloud. All services are coordinated with the department and rendered to individual veterans and families.

Budget

The DAV receives a grant from the General Fund and uses it to benefit veterans primarily through the agency's transportation program. In the FY 2002-03 biennium, base funding for this grant was \$13,000 per year, and represented less than 3% of the DAV's total budget. In the FY 2002, DAV allocated 84.4% of all funds to veteran programs.

Agency Purpose

Minnesota's trial courts resolve citizens' criminal cases and civil disputes.

- ⇒ **Mission** – To provide justice through a system that assures equal access for the fair, competent, and timely resolution of cases and controversies.
- ⇒ **Vision** – The general public and those who use the court system will refer to it as accessible, fair, consistent, responsive, free of discrimination, independent and well managed.

Core Functions

The trial court has original statewide jurisdiction in all civil and criminal actions within district boundaries. There are 10 judicial districts and 271 district court judges. A family court division, juvenile court division, probate division, conciliation court division and a traffic and ordinance violations bureau exist in the district court.

In support of these core functions, the trial courts are implementing the following service strategies:

- ⇒ Set case processing and case management standards and institute monitoring programs for exceptions to ensure timely disposition of cases.
- ⇒ Develop programs to allow litigants meaningful access to the court process, e.g., court interpreter programs, free legal services for the poor, and self-help programs for persons who choose to guide their own litigation.
- ⇒ Explore ways to use technology to improve and expedite the work of the courts, including making justice more consumer oriented.
- ⇒ Develop programs and technologies to provide judges the critical information needed to make timely and sound case and policy decisions.
- ⇒ Delegate legal research and where possible draft decision writing to law clerks, freeing judges to spend more time hearing cases or directing the case dispositional activities.
- ⇒ Review and evaluate court practices and policies to identify the need for systemic improvement through the Conference of Chief Judges and committees established by the Supreme Court.
- ⇒ Explore greater integration and coordination with other justice and social service agencies.
- ⇒ Develop an adequate and stable funding base and transfer funding responsibilities from the counties to the state to ensure the uniform implementation of state mandates and policies.

Operations

With more than two million cases filed each year, the work of the trial courts has a substantial impact on Minnesotans.

Judges are assisted in their adjudicative work by law clerks (who perform legal research) and court reporters (who record trial proceedings). Court administration staff at the county and district level manage scheduling, case flow, finance, personnel, and juries.

At A Glance

- ⇒ Each year, there are more than two million cases filed in Minnesota's trial courts.
- ⇒ Trial court judges in Minnesota are among the hardest working in the country. They handle an average of 49% more cases each than do judges in states with comparable court systems.
- ⇒ From FY 1996-2001, filings of major cases statewide in trial courts increased twice as fast as expenditures on the judiciary.
- ⇒ Caseloads have increased dramatically (nearly 40% in the last decade, more than 700% in last 25 years) while time per case has dropped significantly.
- ⇒ The judiciary is in a state of massive transformation, moving from a county-funded to state-funded system.
 - ◆ There were 500 state court employees in FY 1992 and there will be 3,000 by FY 2006.
 - ◆ Western half of Minnesota is state funded. Eastern half will be phased in by FY 2006.
- ⇒ The judicial branch operates in a constantly changing environment.
 - ◆ Laws, case types and legal sanctions change annually.
 - ◆ Caseload volume is determined by other branches and levels of government.
- ⇒ The Minnesota courts regularly review their effectiveness by monitoring:
 - ◆ Case filing trends.
 - ◆ Case clearance rates.
 - ◆ Elapsed case time from filing to disposition.

The Conference of Chief Judges (CCJ) is the elected, policy-making body of the trial courts, responsible for budgeting and overall governance of administrative matters. It is assisted by the judicial district administrators and the State Court Administrator's Office.

Budget

Of the funding for the Trial Courts, over 99% is from General Fund direct appropriations. Federal (and other) grants represent a very small, but growing source of funding. Another small source of funding which will increase over time is reimbursements assessed for Guardian ad Litem services.

Of the Trial Court Expenditures, 74% is for personnel costs. Of this amount, 30% is judge costs and 44% is costs for non-judicial personnel. Mandated services (which include Guardian ad Litem, Interpreter, Psychological Exams and In Forma Pauperis) add up to 11% of the cost of the Trial Courts. This includes personnel costs for staff guardians ad litem and interpreters, as well as those paid on a contract basis.

The Trial Courts have 1449.11 FTEs.

Agency Purpose

The Minnesota Department of Economic Security (MDES) helps people help themselves. We increase Minnesotans' economic independence by providing a range of employment and training initiatives. Our statutes emphasize service to the unemployed, and those with special disadvantages in the labor market (e.g., people with disabilities). (M.S. 268, 268A, 248.)

Eight broad strategic goals help us achieve our purpose:

- ⇒ Minnesota's workforce is robust.
- ⇒ Minnesotans are self-sufficient.
- ⇒ Minnesota employers drive workforce development.
- ⇒ MDES has strategic relationships.
- ⇒ MDES models workforce development practices.
- ⇒ E-government provides workforce development services to all Minnesotans.
- ⇒ MDES is a wise steward of workforce development resources.
- ⇒ Through leadership, Minnesota's workforce development system is the best in the nation.

At A Glance

MDES provides "counter-cyclical" services: as the economy worsens, demand for our services increases.

The FY 2001-02 recession provides a clear example. In FY 2001, which started well for Minnesota, claims on Unemployment Insurance were about \$600 million, with the bulk being paid out late in the year. In FY 2002, with the recession in full swing, the estimated payments approach \$1 billion.

From an institutional perspective, imminent changes in federal workforce development and welfare legislation may impact the agency's mission and funding.

Core Functions

MDES has five interconnected branches that contribute to the agency's mission and goals.

The **Workforce Services** branch prepares specific populations – including at-risk youth, unemployed adults, older workers, public assistance recipients, and others – with direct and grantee services to help them compete for jobs that Minnesota employers offer. The branch also contains the Job Service program, which provides similar services to employers and the general population. Assistance goes through service providers and/or directly to individuals, depending on the program.

The **Workforce Rehabilitation Services** branch supports Minnesotans with disabilities with employment and training services, as well as help with wider independent living concerns. Assistance goes through service providers and/or directly to individuals, depending on the program.

The **State Services for the Blind** branch assists blind and visually impaired Minnesotans with employment and training services, as well as help with wider self-sufficiency concerns. Assistance goes through service providers and/or directly to individuals, depending on the program.

The **Workforce Wage Services** branch provides economic relief to individual Minnesotans, as well as economic stimulus to the state, through the payment of Unemployment Insurance (UI) benefits, and determines disability status for adults and children claiming Social Security Disability Insurance benefits.

The **System Support Services** branch includes the administrative operations of MDES such as human resources, technology, and finance; as well as the research and planning services that provide labor market information and system performance measurements.

Operations

The most tangible delivery system for MDES services is the set of 53 WorkForce Centers spanning throughout Minnesota. The Centers bring together state, local, and private nonprofit employment and training services under one roof. Centers can serve all of the following targeted populations: employers seeking qualified employees, unemployed persons, public assistance recipients working toward self-sufficiency, displaced homemakers, disadvantaged youth, senior citizens, disabled persons who need job training or seek to live independently, and blind or visually impaired people who need job training or seek self-sufficiency.

In addition, Centers have resource areas that are open to any member of the public – including employed workers, students exploring career options, or anyone else. These resource areas include computers, office equipment, and reference material to help find job leads, write resumes, and learn about career planning.

But the Centers are not the only, or even the largest, vehicle for delivering MDES services. Much of what MDES provides is pass-through money – grants to other service providers (e.g., Independent Living and Extended Employment), and direct payments to individuals (e.g., Unemployment Insurance).

The UI benefit system now offers easier access through both telephone (1-877-898-9090) and the Internet (www.mnwfc.org). This way, Minnesotans in stressful situations can begin to receive benefits as quickly and efficiently as possible and take the time to use WorkForce Centers and other resources for a thorough job search.

The web site www.mnwfc.org is also a gateway for jobseekers and employers to receive certain services, such as postings of job openings and resumes, labor market information, and access to www.iseek.org, which is a gateway to an even larger universe of career planning, education and training, employment and other information.

Our last set of customers includes the legislature, the media, academic institutions, other state agencies and others who desire timely and accurate economic information. This information includes data on wages, occupations, industry and unemployment and is available through the MDES web site and regular publications *Minnesota Economic Trends*, *Minnesota Employment Review* and *Minnesota Careers*.

Budget

The MDES budget for the FY 2002-03 biennium totals about \$550 million, with 1,720 FTEs. The large majority (about three-fourths) of funds are from the federal government – for example, the Workforce Investment Act. About one-fifth of funding comes from the state General Fund and Special Revenue Funds and the rest comes from non-governmental sources (e.g., private donations to a Communications Center for the blind). MDES is atypical of state agencies in the large amount of federal resources it manages.

Contact

For more information on MDES in general, contact Commissioner Earl Wilson's office at (651) 297-4336, or go to the agency's web site at www.mnwfc.org.

For more information on this MDES profile or for specific budget and/or performance measurement information, contact Anthony Alongi at (651) 282-5185, e-mail anthony.alongi@state.mn.us.

For information on how this agency measures whether it is meeting its statewide goals, please refer to <http://www.departmentresults.state.mn.us/>

Program Description

The WorkForce Services Branch provides a full complement of employment and training services to a wide range of category-eligible populations, as well as workforce exchange services to employers and broad services to the wider public. The branch recognizes both the statewide need to build a more skilled workforce, and the untapped potential of so many people who seek rewarding, well-paid work. The branch receives its authority from multiple subsections of M.S. 268 (including 268.89, 268.364, and several others) and several federal laws (most notably the Workforce Investment Act of 1998).

Program at a Glance

The WorkForce Services branch serves over 370,000 people through over 50 WorkForce Centers across Minnesota. About 94,000 of those people are in eligibility-based programs; the rest are members of the public who use the Centers' open Resource Areas and workshops.

The branch is renewing a focus on its employer customers, about 12,000 of whom already place ads in the Minnesota Job Bank.

Population Served

Economically disadvantaged youth, adults, older workers, veterans, public assistance recipients, and new entrants to the workforce all receive services with specific, dedicated funds. Customers served by those funds must pass specific eligibility criteria. A limited set of generic jobseeking and training services is *open to the public* through the Resource Areas and workshops at WorkForce Centers statewide. The department as a whole continually seeks ways to serve *Minnesota businesses* directly by connecting them with qualified workers; this branch's budget activities are critical to those efforts.

Services Provided

The range of services provided within this branch is wide – at least 19 distinct programs are spread across five distinct units (listed as budget activities in this narrative). These programs are listed below. The units – *Adult Training, Employment Transition, Youth Services, Job Service Employment Programs, and Job Service Field Operations* – all contain direct service components as well as grant-making to local governments and nonprofits.

The primary direct service vehicle for the department is the *WorkForce Center System*. This system, described in the overall agency profile, provides jobseeking customers with a "one-stop shopping" source for their employment and training needs.

This system will also soon pilot a dedicated Employer Service Center that would redirect a core of existing staff both knowledgeable about employer services across funding streams, and capable of serving as resources to employer customers and other WorkForce Center System staff. Employers already receive free, Internet-based labor exchange services through the *Minnesota Job Bank*. The Job Bank links job seekers and employers through the state's largest searchable electronic database of job openings and job seeker resumes.

The two primary local entities that provide services relevant to this branch are the 16 local Workforce Service Areas (WSAs), and the Job Service partners, as provided through the federal Workforce Investment Act.

Historical Perspective

The federal Workforce Investment Act has been critical to the branch's efforts to integrate services at the one-stop WorkForce Centers, to put more decisionmaking in the hands of local partnerships, and to make helpful resources available to the wider public. Since that time, focus group research has shown that both customers and staff of the Centers feel that the state's workforce development system is more responsive and customer-driven than the system that preceded it.

Program Funding

⇒ This branch mirrors Minnesota Department of Economic Security (MDES) as a whole in its heavy reliance on federal funding to meet the needs of Minnesota jobseekers and employers. The federal Job Service program has had flat funding for the past 20 years.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Narrative

Key Measures

Federal Fiscal Years (FFYs) run from October of the previous year through September of the named year. Individual customer satisfaction data for WorkForce Center programs is incomplete.

| MEASURE | FFY 1999 | FFY 2000 | FFY 2001 | FFY 2002 GOAL |
|--|---------------|----------|--------------------------------|----------------|
| Total jobseeking customers served by branch | Not available | 360,000 | 375,000 | 400,000 |
| Total employer customers using Job Bank | Not available | 13,433 | 11,629 | 14,776 |
| Percentage of jobseeking customers employed three months after completing a public workforce development program | 63% | 55% | 66% | 68% |
| Jobseeking customers' hourly wage after completing a public workforce development program | \$11.17 | \$11.65 | \$11.40 | \$12.24 |
| Satisfaction for individuals using WorkForce Center programs, indexed scale of 1 to 100. (Federal targets in parentheses.) | Not available | 73.5 | 74.6 (66.0) partial data | 76.0 (68.0) |
| Satisfaction for employers using WorkForce Center programs, indexed scale of 1 to 100. (Federal targets in parentheses.) | Not available | 70.3 | 77.2 (68.0) | 76.0 (70.0) |

NOTE: The placement and wage indicators work in tandem - looking at placement alone might encourage pushing any job, whether or not it leads to economic self-sufficiency. Measuring wages alone might result in a high average hourly wage but a low placement rate. These indicators reflect the success of those public workforce programs for which the relevant data was available, and for which employment is the desired outcome of the program (such as the Food Stamp Employment & Training Program, Workforce Investment Act Title IB Adults Program, and others).

Note also that the customer satisfaction data is based on the American Customer Satisfaction Index (ASCI), which is used extensively in both public and private sectors. Comparable state ACSI scores for workforce services range from 68 to 83 for individuals and 61 to 82 for employers.

Finally, note that many customers who come to WorkForce Centers are there for programs and services not in this branch (e.g., Rehabilitation Services).

In future biennia, we hope to have the following branch-level indicators available:

- ⇒ *Wage boost* – data exists on an individual program basis for wage boosts, and we are attempting to find a reasonable way to aggregate the data across very different customer pools.
- ⇒ *Employer satisfaction* – while the department does a limited employer survey now, we plan wider customer satisfaction polling across more intensive services in the very near future.
- ⇒ *Employer market penetration* – we hope to make a reasonable estimate of how many employers might make use of our services, and what percentage of those we are reaching.

Activity Description

The Employment Transition Services (ETS) budget activity addresses the needs of Minnesotans who require intensive services or training to obtain employment and self-sufficiency. Many of the customers of this activity's services are on public assistance. Some are also facing significant economic disadvantages as a result of basic skills deficiencies. The broad, common goal of all five programs contained within this activity is to place these disadvantaged customers in a satisfying and appropriate career path, and help keep them there.

The five programs are:

- ◆ the federal Welfare-to-Work Program (WtW);
- ◆ the Employment Services portion of the Minnesota Family Investment Program (MFIP);
- ◆ the Food Support Employment and Training (FSET) program;
- ◆ the Opportunities Industrialization Centers (OICs); and
- ◆ the Displaced Homemaker Program (DHP).

Authority for these programs comes respectively from: WtW Section 5001 of the Balanced Budget Act of 1997 and U.S. Code, Title 42, Chapter 603(a)(5); MFIP M.S. 256J.49 to 256J.73 and U.S. Code, Title 42, Section 603; FSET M.S. 256D.051 and U.S. Code, Title 7, Chapter 51, Section 2015(d); OICs M.S. 268.011, Subd. 4 and 268.871, Subd. 2; and DHP M.S. 268.96.

Population Served

There are differences in the customers within this activity from program to program:

WtW: Primary customers include long-term recipients of public assistance (MFIP). There are eligibility requirements based in long-term assistance status, exhaustion or near-exhaustion of benefits, and other strong at-risk factors. Seventy percent of Minnesota's federal allocation *must* serve long-term recipients or non-custodial parents.

MFIP Employment Services: The program's customers are Minnesota families currently on welfare. For most recipients, participation in this program is mandatory during their receipt of TANF (Temporary Assistance for Needy Families).

FSET: The program serves Minnesotans 18–55 years old in households not receiving other public assistance. There are work requirements for recipients.

OICs - Participants are unemployed, underemployed, and otherwise economically disadvantaged persons: minorities, welfare recipients, at-risk youth, refugees, and ex-offenders. This group is often not as well served by traditional employment providers.

DHP - Customers are women or men who have worked in the home for a minimum of two years caring for home and family but due to specific circumstances (separation, divorce, death, or disability of spouse or partner, or other loss of financial support) must support themselves and their family. Eligibility is based on income guidelines.

Activity at a Glance

A major purpose to Employment Transition Services (ETS) is to provide services to those experiencing significant barriers to employment:

- ◆ The Minnesota Family Investment Program, Food Support Employment and Training, and Welfare-to-Work programs primarily serve mandatory clients with a limited period of eligibility for assistance. The goal is placement, support, retention and job progression towards self sufficiency.
- ◆ The Displaced Homemaker Program and Opportunity Industrialization Centers provide specialized pre-employment and employment services to targeted populations.
- ◆ The ETS staff develops and facilitates enhancement and technical assistance programs such as Money Smart, nontraditional jobs for women, counselor training, fathers projects and specialized assessments.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: EMPLOYMENT TRANSITION SERVICES

Narrative

Services Provided

Services differ from program to program:

WtW and MFIP Employment Services: Given the common pool of customers across both programs, state and local partners work hard to align services statewide and leverage funds. These services include assessment, career planning, job search and retention skills training, wage subsidy, and work experience. Support services are provided on an individual basis as necessary. Employment services providers vary throughout the state and include the Minnesota WorkForce Center Partners, community action agencies, educational agencies, county agencies, and other non-profit entities. Through an interagency agreement, Minnesota Department of Economic Security (MDES) jointly administers the employment component of the MFIP program with the Department of Human Services.

FSET - Services include assessment, career planning, and job and skills training. Support services are provided on an individual basis as necessary. FSET services are administered statewide by counties, usually through service providers such as WorkForce Centers, community action agencies, and appropriate county offices. Through an interagency agreement, MDES jointly administers the employment component of FSET with the Department of Human Services.

OICs - Comprehensive services to customers include outreach/recruitment; counseling; remedial education; motivational and pre-vocational training; skills training; job development and placement. With over 90% of customers representing one or more minority populations, services are often specific to the needs and issues those populations face. OICs operate in Minneapolis and St. Paul, as well as on the Mille Lacs Indian Reservation and in Bemidji. The OIC State Council is the administrator of state funds to the OIC programs; it coordinates all state-level activities, provides technical assistance and resource development, and develops new OICs.

DHP – The Department administers the twelve programs that provide services to displaced homemakers statewide. Workshops, support groups and networking, one-to-one personal or vocational counseling, job-seeking methods, leadership development, decision-making skills, and assistance with action plans are among the resources available. Other services may include referral for remedial education, child care, legal assistance, and other support services. Transportation, child care, and work or school expenses are covered when funds are available.

Activity Funding

Employment Transition is one of the areas at the Department where state funding plays a critical role. Workforce Development Fund (WDF) and TANF appropriations support OICs and the Displaced Homemaker Program. FSET and MFIP ES administrative operations are conducted through interagency agreement with the Department of Human Services. Due to the availability of the required 50% state match, Minnesota was able to draw down all available WtW dollars.

Legislative action during the 2001 session reduced 2004-05 TANF base funding by \$827,000 for the Displaced Homemaker Program and \$100,000 for OICs.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: YOUTH SERVICES

Narrative

Activity Description

The Youth Services budget activity gives youth statewide important resources and skills for transition into the career they choose. This activity encompasses six specific grants/programs – Workforce Investment Act (WIA) Youth Formula Grant, Minnesota Youth Program (MYP), Minnesota YouthBuild, Juvenile Accountability Incentive Block Grant (JAIBG), Juvenile Justice, and Youth Intervention Program (YIP). Authority for this budget activity therefore comes from multiple sources: M.S. 268.30, 268.361–367, 268.56–561, and various federal laws including the Workforce Investment Act of 1998, the Juvenile Justice and Delinquency Prevention Act of 1974 (as amended), and the U.S. Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act of 2001

Activity at a Glance

Youth Services encompasses six specific programs that serve over 75,000 Minnesota youth and their families. These “high risk” youth face significant economic and other disadvantages; the department uses a mixture of federal and state resources to meet their needs.

Population Served

While specific age limits and eligibility criteria differ by program, this activity generally serves those youth in or just out of their teenage years who are economically disadvantaged and/or at risk of not completing their high school education. These youth often face hurdles such as homelessness, pregnancy or parenting, trouble with the law, abuse at home, basic skills deficiency, chemical abuse, and limited English proficiency. Statewide, there are approximately 10,000 at-risk youth on local waiting lists for employment and training services.

Services Provided

Services differ significantly by program:

WIA Youth Formula Grant – The program operates statewide through the local Workforce Service Areas and the local Workforce Councils. Services include assessment, work experience, basic skills training, follow-up, supportive services as needed, and providing mentoring and leadership skills to help youth develop as citizens and leaders. Individualized assessments determine the specific services provided to in-school and out-of-school youth between the ages of 14 and 21.

MYP - The program operates through the local Workforce Councils and is available in all 87 counties. Staff assess youth needs and use those needs as the basis of designing individualized service strategies. Youth customers (ages 14-21) can access work experience, basic skills training, work-based learning, career counseling, personal counseling, life skills training, mentoring, and peer support groups, as well as support services such as transportation and child care.

MYP serves high-risk youth with severe barriers to employment: 100% are economically disadvantaged, 50% are from families receiving public assistance, and 45% are at risk of involvement with the juvenile justice system. Other barriers may include (but are not limited to) pregnant or parenting youth, homeless, runaway, recovering chemically dependent youth and foster children. Many MYP participants fit into several of these categories.

Minnesota YouthBuild – The program provides construction skills training, work experience, job readiness training, leadership development, and basic academic skills to dropouts, youth offenders, and other “high-risk” youth between the ages of 16 and 24. The program then provides affordable housing to low-income families and homeless individuals. The program is available from twelve different providers located in the Twin Cities, Bemidji, Chaska, Detroit Lakes, Virginia, Monticello, St. Cloud, and Rochester.

JAIBG – Funds are used by units of general local government for activities such as: truancy reduction, expediting juvenile court cases, transitional services including employment and education for youth returning to the community, training, information-sharing programs, and restorative justice programs. Federal requirements are very clear and specify “program purpose areas.” Over 60 Minnesota counties, cities, and regional partnerships receive entitlement grants and have the flexibility to use JAIBG funds for activities which fit into the “program purpose areas.”

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: YOUTH SERVICES

Narrative

Activity Funding

Legislative action during the 2002 session reduced Minnesota Youth Program *base* funding by \$500,000.

Juvenile Justice - Examples of services for at-risk youth under the age of 18 include gender and culturally specific programs; diversion, intervention, and restorative justice programs that includes services to the offender, the offender's family, and the victim(s); programs delivering mentoring, tutoring, and other one-on-one experiences for youth to assist them in their maturation; and programs that assist at-risk youth to develop a focus on employment and training for career development. Providers include community based nonprofit organizations and units of local and tribal government, especially law enforcement and other justice agencies.

YIP - The program provides direct services to youth and families, including: youth development services (such as leadership development, mentoring, positive peer-centered activities, follow-up and support services); restorative justice services (such as restitution/community service supervision, family group conferencing, victim/offender mediation); pre-court diversion services; counseling services (including individual, family, and group counseling); educational programs related to specific offenses (such as theft, vandalism, alcohol, tobacco, and other drug offenses); and gender and/or culturally specific services. Public and private nonprofit agencies operate 52 community-based programs statewide. Twenty-nine programs operate in the Twin Cities metropolitan area and 23 serve youth in Greater Minnesota.

Key Measures

The WIA Youth Formula Grant provides outcome data for the Program Year that matches the state fiscal year, from 7-1-2000 through 6-30-02 data is estimated.

| MEASURE | PY 2000 | PY 2001* | PY 2002 (est.) |
|--|----------------------|------------------------|----------------|
| Total youth aged 14–18 served | 3,686 | 3,981 | (3,840) |
| Percentage of youth aged 14–18 who attain prescribed basic skills, work readiness skills, and/or occupational skills (goal in parentheses) | 85.0% (67.0%) | 86.6% (69.0%) | (71.0%) |
| Percentage of youth aged 14–18 who achieve placement and retention in post-secondary education/advanced training; military; unsubsidized employment, or qualified apprenticeship (goal in parentheses) | 70.4% (50.0%) | 76.6%** (52.0%) | (55.0%) |
| Total youth aged 19–21 served | 927 | 1,049 | (960) |
| Percentage of youth aged 19–21 who enter into unsubsidized employment (goal in parentheses) | 73.5% (60.0%) | 75.9% (62.0%) | (65.0%) |
| Percentage of youth aged 19–21 who remain employed for at least six months (goal in parentheses) | 80.3% (72.0%) | 71.3%** (74.0%) | (76.0%) |
| Average earnings over those six months, for those youth (goal in parentheses) | \$3,901 (\$2,850) | \$2,262** (\$3,000) | (\$3,150) |

*Based on preliminary data (as of 8-21-02).

**Preliminary outcomes based on only two quarters of data (10-1-00 – 3-31-01); additional outcomes pending.

MYP uses the standard state fiscal year. 2002 data is estimated.

| MEASURE | FY 1999 | FY 2000 | FY 2001 | FY 2002 (est.) |
|---|---------|---------|---------|----------------|
| Youth customers placed in jobs | 5,659 | 5,851 | 6,407 | 6,200* |
| Percentage of youth who increased reading and math skill levels | 82% | 77% | 79% | 80%* |
| Percentage of youth customers who received academic credit for their program experience | 49% | 47% | 45% | 50%* |

YouthBuild, YIP, JAIBG and Juvenile Justice programs use calendar years for program measures. 2002 data is estimated.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: WELFARE TO WORK SERVICES

Narrative

Activity Description

The Job Service Employment Programs and Job Service Field Offices budget activity combines two units and eight different programs of the WorkForce Services Branch, in an array of services to employers seeking qualified applicants and individuals seeking assistance in employment. The two units are combined on this narrative since they tend to reflect "headquarters" and "branch" aspects of the same programs.

While the primary program here is the federally funded Job Service, the activity also includes: Veterans Programs; employer incentive initiatives such as the Work Opportunity and Welfare-to-Work Tax Credits; global economy adjustment aids including Foreign Labor Certification (FLC) and dislocated worker assistance under the Trade Adjustment Act and North American Free Trade Agreement; information products and services including Career Information and Labor Market Information; and a statewide labor exchange in the Minnesota Job Bank.

While the federal Wagner-Peyser Act, Trade Adjustment Act (TTA), and North American Free Trade Agreement (NAFTA) all contribute to this activity's authority, we recommend <http://www.mnwfc.org/burgundy/index.htm> as a reliable, complete listing of all relevant federal and state statutes.

Population Served

The primary customers of the Job Service program and information products and services are Minnesota job seekers and employers. Special efforts are made to serve veterans, youth, seasonal migrant farm workers, and people with disabilities. Other public employment and training programs in Minnesota are important secondary customers. The other programs in this budget activity – veterans, trade adjustment, tax credit, enterprise zone, foreign labor certification – all have specific eligibility requirements.

Services Provided

Services differ by program:

Job Service – Job Service provides job preparation assistance and job placement assistance to job seekers at WorkForce Centers throughout Minnesota. Minnesota's Job Bank is an Internet-based labor exchange system that links job seekers and employers through the largest employment database in the state, and provides a direct seamless link to America's Job Bank. While job attainment is the principal focus, Job Service also provides other services to that end, such as jobseeking classes, employment counseling, referrals to community-based services, and a wide range of employer-focused services.

Veterans – Customers receive career assessment, preparation, and placement assistance through the WorkForce Center System, tailored to their specific needs.

Work Opportunity and Welfare-to-Work Tax Credits – Employers receive a federal income tax credit when they hire persons from targeted groups.

Foreign Labor Certification - The department assists employers with the application process to hire foreign labor, provides prevailing wage information, and pre-screens applications prior to submittal to the Department of Labor Regional Certifying Officer in Chicago.

Activity at a Glance

Job Service Employment Programs and Job Service Field Offices are the "headquarters" and "branches" of a variety of labor exchange programs. While some of these programs look similar to specialized programs elsewhere in the WorkForce Services Branch, others are unique employer incentives, and still others are critical information products and services that every Minnesotan can use.

Job Service forms the backbone of this budget activity, serving nearly 150,000 Minnesota job seekers and employers directly per year and many more indirectly.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: WELFARE TO WORK SERVICES

Narrative

Trade adjustment – Programs include several benefits and reemployment services – such as training, job search allowances, relocation allowances, and cash benefits called Trade Readjustment Allowances (TRA). TRA may be paid to eligible workers following their exhaustion of unemployment insurance.

Career and labor market information – Products and services are extensive, and can best be described through three web sites the department manages or contributes to: www.iseek.org, www.mncareers.org, and www.mnwfc.org/lmi/. Products and services are also available in print and other formats.

Employer services - Job Service provides employers with current labor market information, program information to reduce business and hiring costs, and recruitment assistance with finding qualified applicants for job openings. Specific services include (but are not limited to) on-site recruiting, on-site interview facilities, Internet recruitment training and publications, and on- or off-site educational presentations. See www.mnwfc.org/employers.htm for a detailed listing of employer services.

Key Measures

These measures use the regular state fiscal year. Note that Job Service is a strong contributor to measures found on the WorkForce Services Branch narrative. Also note that because of internal systems changes, data earlier than 2001 is not available (NA).

| MEASURE | FY 2000 | FY 2001 | FY 2002 | FY 2002 GOAL |
|--|---------|--------------------|-------------------|--------------|
| Number of jobseekers receiving reportable service from Job Service | NA | 141,974 | 181,122 | NA |
| Number of veterans receiving a reportable service from veteran-oriented programs | NA | 22,326 | 23,873 | NA |
| Percentage of veterans customers who gain new employment after receiving service | NA | 22% | 23% | NA |
| Total number (and value) of Work Opportunities and Welfare-to-Work Tax Credits provided to employers | NA | 6,521 (\$32.5M) | 6793 (\$33.4M) | NA |
| Percentage of reportable data produced on-time (by U.S. Bureau of Labor Statistics standards) | NA | 100% | 100% | NA |
| Average response rate to Labor Market Information surveys | NA | 75% | 90% | NA |

Activity Funding

All funding for this activity comes from federal sources, primarily from the U.S. Department of Labor. Job Service is the largest activity. TAA and NAFTA Adjustment services often go to supplement assistance given by the Dislocated Worker Program at the Department of Trade and Economic Development.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SERVICES

Activity: WORKFORCE EXCHANGE SERVICES

Narrative

Activity Description

The Adult Training budget activity provides employment and training assistance to adults to obtain and improve their employment, increase job retention, improve earnings, and earn occupational skill credentials. The activity encompasses two distinct programs – Workforce Investment Act (WIA) Title IB Adults, and the Senior Community Service Employment Program (SCSEP). Authority comes respectively from: the federal Workforce Investment Act of 1998, and Title V of the Older Americans Act of 1965 as amended by the Comprehensive Older Americans Act of 2000;

Population Served

Customers of WIA Title IB Adults are adults in Minnesota who want to improve their participation in the workforce. Although the program is designed to serve all adults, often the program's customers are individuals who are: economically disadvantaged individuals with disabilities, individuals with offender status, and/or are basic skills deficient. Customers of SCSEP are Minnesotans 55 years of age or older, with an income of less than 125% of the poverty levels established by the U.S. Department of Health and Human Services, who want or need additional income.

Services Provided

Services differ from program to program:

WIA Title I – Adult: Services available to assist job seekers include preliminary assessment of skill levels, aptitudes, and abilities; support services; occupational training; on-the-job training; job search assistance; placement assistance; and career counseling. Information is also available on a full array of employment-related services, including information about local education and training service providers, labor market information, job vacancies, and skills necessary for in-demand jobs. Sixteen local WorkForce Service Areas select the menu of services and the providers who deliver the services (WorkForce Center partners, city or county services, community-based organizations, or other vehicles).

SCSEP – Places low-income individuals 55 years of age and older in subsidized part-time employment in community service. Additional services may include annual physical exams, personal and job-related counseling, and job training. The goal of the program is to place a minimum of 20% of individuals into unsubsidized employment annually. The Department subgrants SCSEP operations to 15 local agencies that serve older workers in 60 counties throughout the state. In addition, five National sponsors provide services in the remaining counties. Together the local agencies and the national sponsors provide programs in all 87 Minnesota counties.

Key Measures

All measures are based on the regular state fiscal year. FY 2000 data is not available (NA) because of the timing of WIA's implementation. FY 2002 data is preliminary.

Activity at a Glance

Adult Training activities are based in two pieces of Federal Legislation – the Workforce Investment Act of 1998 (Title IB) and the Older Americans Act of 1965 (Title V) (as amended). In the year ending September 30, 2001, this activity registered about 3,500 customers across both programs. This total clearly understates the number of individuals who benefited from these programs since a large number of individuals utilize Title IB funded WorkForce Center services throughout the state without the requirement of registering.

Title IB puts a great deal of emphasis on not just immediate employment, but job retention and credentialing of skills. Federal authorities require annual reports; these reports are available from the department.

Program Description

The WorkForce Rehabilitation Services (RS) Branch helps Minnesotans with disabilities integrate into society. The branch's emphasis is on serving those with severe disabilities, and on encouraging the participation of all Minnesotans with disabilities in the social and economic life of their communities. Authority comes from M.S. 268A, the federal Rehabilitation Act of 1973 as amended, and the federal Social Security Act.

Population Served

RS provides services to those Minnesota employers seeking qualified workers; those Minnesotans with severe disabilities who wish to prepare for, secure, and maintain employment; and the wider community of Minnesotans with disabilities who wish to live with greater independence in their homes and communities. (Children and the elderly typically receive age-appropriate services from other departments.) According to 2002 Census data, the total number of Minnesotans aged 21-64 with a disability is a bit over 303,000, or 10.8% of the state's population.

Program at a Glance

The WorkForce Rehabilitation Services (RS) Branch uses three different budget activities to help Minnesotans with disabilities integrate into society. Seventeen different grant programs help over 41,000 such Minnesotans every year; and thousands of Minnesota employers, as well as the state as a whole, benefit from the increased role our customers can play as citizens, workers, and community members.

Services Provided

Four hundred branch staff and 140 state-certified community agencies provide services through three major programs, all available statewide (and detailed further on subsequent narrative pages). First, the *Extended Employment* program offers ongoing employment support services to individuals through a variety of employment settings – including manufacturing, service, and retail operations managed by community rehabilitation programs. The *Independent Living* program provides comprehensive services to people with severe disabilities who wish to live more independently and participate in their communities; the five sets of services include skills training, individual and systems advocacy, peer counseling, information and referral, and transition services for youth and young adults. The *Vocational Rehabilitation Services* program supplies basic services to customers including assessment, vocational evaluation, training, rehabilitation counseling, assistive technology, and job placement. Certain special services are also available, based on individual circumstances.

The branch provides services through the statewide network of WorkForce Centers and a variety of private, nonprofit service providers (including eight Centers for Independent Living).

Key Measures

The extent to which people with disabilities are employed reflects general economic conditions, the success of programs serving people with disabilities, and overall attitudes about employing people with disabilities.

Program Funding

The majority of RS funding is federal. State funding for RS activities is primarily pass-through money intended for service providers in Extended Employment and Independent Living Services. Significant matching funds (\$7.5 million) support Vocational Rehabilitation Services. State operations constitutes less than 2% of state funding.

Minnesota's employment of people with disabilities ranks *first* among the states and compares quite favorably to the national average of 49%.

| | 1990 | 2000 | 2003 Goal |
|--|------|------|-----------|
| Percentage of Minnesotans with disabilities employed | 48% | 65% | 66% |

Budget activity pages contain performance data specific to the three broad areas within this branch.

State of Minnesota

ECONOMIC SECURITY DEPT

Program: WORKFORCE REHABILITATION SVCS

Activity: VOCATIONAL REHABILITATION

Narrative

Activity Description

The Vocational Rehabilitation (VR) budget activity is the state's comprehensive, statewide program that assists persons with significant disabilities to seek, gain, and retain employment. Authority comes from M.S. 268A and the federal Rehabilitation Act of 1973, as amended

Services Provided

VR supplies basic services to customers including assessment, vocational evaluation, training, rehabilitation counseling, assistive technology, and job placement. Customers receive these services through 176 VR counselors located across the statewide network of WorkForce Centers and school districts. The department purchases many services from local, nonprofit community rehabilitation providers.

Activity at a Glance

Persons with disabilities are a valuable source of skilled labor for employers. Vocational Rehabilitation (VR)'s experience demonstrates that Minnesotans with severe disabilities are eager and ready to work – and Minnesota employers are eager and ready to hire them.

- ◆ Over 4,200 customers employed in 2001
- ◆ Over 2,600 employers employing them
- ◆ Active caseload of nearly 20,000

Historical Perspective

Funding for VR has been essentially flat for the last several years – in fact, due to funding formulas, Minnesota's proportion of allocated federal funds has actually decreased. During the same period, demand for VR services has increased dramatically because of the greater need for skilled workers and the growth in the number of our customers seeking employment. Finally, inflationary pressure has made resources even tighter.

The federal Rehabilitation Act stipulates that when there are insufficient resources to serve all eligible individuals, the state must put in place an "order of selection" to ensure individuals with the most severe disabilities are served first. An order of selection has been in effect in Minnesota since 1994. Absent a significant increase in federal funding for Minnesota's Vocational Rehabilitation program this year, the cumulative effect of the above factors will lead to a more stringent order of selection starting 10-1-02.

Key Measures

Measures are based on a federal fiscal year (October 1 of previous year through September 30 of listed year). Note that customers of this program often take more than a year to reach key milestones. As a result, comparisons between one measure and another are difficult.

Activity Funding

The clear majority of VR funds come from the federal government. However, these funds cannot come without critical state matching funds. Each state dollar appropriated for the VR Program brings 3.7 federal dollars for these services. (In FY 2003, the state is providing \$7.5 million from the General Fund.)

| MEASURE | FFY 1999 | FFY 2000 | FFY 2001 | FFY 2002 GOAL |
|--|----------|----------|----------|---------------|
| Number of new customers accepted for service | 8,579 | 9,678 | 10,297 | 10,500 |
| Number of customers completing an employment plan during the year | 6,000 | 6,658 | 6,409 | 6,500 |
| Number of customers with an employment plan attaining work during the year | 3,781 | 3,989 | 4,278 | 4,000 |
| Number of participating employers | 2,484 | 2,566 | 2,623 | 1,900 |

This past year the department began a new method of gauging customer satisfaction with many of its key programs. An independent contractor surveys a statewide sample of WorkForce Center customers each month and reports the results (see www.mnwfc.org/customersurvey/). The department calculates a Minnesota Customer Satisfaction Index from responses to questions on overall satisfaction. For the first six months of the survey (November 2001 - April 2002), the index for this program was 72.1 on a scale of 1 to 100. This number will contribute to the first year baseline data and will be critical in monitoring patterns of customer satisfaction over time. Future budget narratives will report these trends.

ECONOMIC SECURITY DEPT

Program: WORKFORCE REHABILITATION SVCS

Activity: INDEPENDENT LIVING

Narrative

Activity Description

The Independent Living (IL) budget activity is a non-residential program that helps people with disabilities live independently. Authority comes from M.S. 268.A11 and the federal Rehabilitation Act of 1973, as amended.

Population Served

IL customers are persons with significant disabilities who request services to help them live independently in their communities.

Services Provided

There are four core IL services: skills training, individual and systems advocacy, peer counseling, and information and referral. All eight Independent Living Centers offer these core services, as well as transition services for youth and young adults. IL services seek to maximize the leadership, empowerment, independence, and productivity of people with disabilities. Customers may be eligible to receive services in two ways: 1) through the state's Vocational Rehabilitation Program (VR) and its 17 VR/IL counselors; and 2) through the state's network of eight regional, private nonprofit Centers for Independent Living.

Activity at a Glance

Independent Living (IL) helps Minnesotans with disabilities develop and find the skills and resources to achieve their maximum potential as citizens, workers, leaders, and family members.

Engagement with customers is intensive: less than 6,000 customers generated almost 40,000 instances of high-quality service in the year ending 9-30-01.

Key Measures

| MEASURE | FFY 1999 | FFY 2000 | FFY 2001 | FFY 2002 GOAL |
|--|----------|----------|----------|---------------|
| Total IL customers served | 4,406 | 5,644 | 5,906 | 6,000 |
| Total instances of service (include duplicate customers) | 13,430 | 23,487 | 39,643 | 40,000 |
| Percentage of IL goals met across all customers (that is, IL goals set divided by IL goals attained) | 41% | 76% | 65% | 70% |

Activity Funding

IL funds provided from the state General Fund are primarily pass-through to local delivery, with a small portion dedicated to match federal dollars. Federal funding is from the U.S. Department of Education. This activity receives no state appropriation for administrative operations.

ECONOMIC SECURITY DEPT

Program: WORKFORCE REHABILITATION SVCS

Activity: EXTENDED EMPLOYMENT

Narrative

Activity Description

The Extended Employment (EE) budget activity makes it possible for persons with significant disabilities to maintain jobs and careers in the community. Authority comes from M.S. 268.A13–15

Population Served

EE consumers are Minnesotans with significant disabilities who require ongoing employment services and supports to maintain or advance their employment in the community. Portions of EE services are reserved for specific populations (e.g., persons with serious and persistent mental illness, or those who are deaf or hard of hearing), as detailed below.

Activity at a Glance

Extended Employment (EE) provides supported and center-based employment to Minnesotans with severe disabilities. Over 30 community rehabilitation programs (CRPs) are critical to the effort since they operate manufacturing, service, and retail enterprises.

Nearly 7,000 customers receive opportunities to work an average of 16 hours per week. Many of these customers include the public assistance system's "hardest to serve."

Services Provided

The basic EE Program provides funding for supported and center-based employment of persons with severe disabilities through a statewide network of 31 community rehabilitation programs (CRPs). *Supported employment* provides ongoing support for persons working in the larger community in a variety of employment settings. *Center-based employment* provides ongoing support for persons who work in manufacturing, service, and retail enterprises operated by the CRP.

Supported employment services are also provided to persons with serious and persistent mental illness who secure employment through the innovative Coordinated Employability Projects in collaboration with the Mental Health Division of the Department of Human Services. Similarly, supported employment services are also provided to persons who are deaf or hard of hearing through a grant to the Minnesota Employment Center for Persons who Are Deaf or Hard of Hearing.

Activity Funding

EE is one of the few budget activities at the department that is completely reliant on state funding. In addition, a portion of these funds draw down a federal match for exclusive use in the Vocational Rehabilitation budget activity. EE receives appropriations from the General Fund and Workforce Development Fund; General Fund cuts during the 2002 session did impact this program by \$192,000.

Historical Perspective

The program history of EE is tightly bound to its funding history. Over the past decade, EE funding has not kept up with increases in the Consumer Price Index. Community rehabilitation providers who receive EE funds experience significant staff turnover due to their inability to keep wages competitive.

Program Description

The State Services for the Blind (SSB) branch helps blind and visually impaired Minnesotans maximize their vocational and personal independence. Authority for the branch's services comes from M.S. 248, 160.28, and 273.13; Minnesota Rules, Chapter 3321 and 3325; and various federal laws and regulations.

Population Served

SSB serves blind, visually impaired, and print-impaired Minnesotans.

Services Provided

There are five sections within SSB (which serves as a single budget activity) – Workforce Development, Self-Sufficiency, Business Services, Assistive and Adaptive Technology, and Administrative Services.

Program at a Glance

State Services for the Blind (SSB) helps blind and visually impaired Minnesotans maximize their vocational and personal independence:

- ◆ about 100 customers annually find paid work as a result of workforce development programming;
- ◆ about 1,000 customers annually achieve their self-sufficiency goals;
- ◆ paid staff and volunteers produce 700,000–800,000 pages of Braille translation annually.

Workforce Development is the primary purpose of the federal program and receives funding under Title I of the Rehabilitation Act. Workforce Centers spread across Minnesota and an SSB office in St. Paul deliver services that emphasize adjustment to blindness, vocational counseling and training, and job placement.

Self-Sufficiency, funded largely by the state, primarily serves Minnesotans age 55+ who are not seeking employment and need to learn the skills necessary to regain or maintain their personal independence. Services are available throughout Minnesota through community hubs including field offices, senior centers, public libraries, churches, and a variety of community buildings. These services include information seminars on vision loss, solutions inventory, low vision evaluations, mobility instruction, household management instruction, and assistive devices.

Assistive and Adaptive Technology is federally and state funded and provides support to the Workforce Development section to deliver solutions for blind and visually impaired customers so they can have access to the printed word at work and in their daily lives. This section also conducts fund raising, as well as research and development in new technology that will assist all of our customers in being productive and independent citizens.

Business Services are federally and state funded and deliver access to the printed word through the Communication Center. The Communication Center produces Braille and tape transcription, radio programming (Radio Talking Book), 24-hour audio information (Dial-in-News and News-Line), and distribution of special equipment for the Library of Congress. Business Services also provides the certification of legal blindness for the Homestead Tax Credit. In addition, it manages and operates the Business Enterprise Program which promotes small business franchise opportunities to blind or visually impaired customers.

Administrative Services are federally and state funded and provide for policy development, case review, program evaluation, financial management, purchasing, contract management, staff training and development, and administrative and technical support.

Historical Perspective

In the 2002 session, the legislature adjusted the department's overall budget through across-the-board cuts. SSB accounts for \$2.32 million of the \$3.19 million defined by the legislature as available to the Department for cuts. While other branches were able to help minimize the impact to SSB (reducing this branch's share of the cuts to 46% instead of 73%), the \$416,000 cut faced by SSB required layoffs in multiple areas (including administrative staff), discontinuation of the Store, and reduced service levels at the Communication Center and Self-Sufficiency Program. In addition, a voluntary undertaking to assist the Department of Children, Families, and Learning with blind child rehabilitation is now limited to information and referral, instead of full counseling.

ECONOMIC SECURITY DEPT

Program: WORKFORCE SVCS FOR THE BLIND

Narrative

These cuts are among the most severe that SSB and its customers have ever experienced. The \$416,000 reduction represents 18% of the branch's budget for state operations.

Key Measures

Federal Fiscal Years (FFYs) run from October of the previous year through September of the named year. *FFY 2002 data is partial* (as of August 2002 only). Braille pages figure only is based on state fiscal year.

| MEASURE | FFY 2000 | FFY 2001 | FFY 2002 (partial) | FFY 2002 GOAL |
|---|-------------------|--------------------|-----------------------|------------------|
| Rate of customers exiting workforce development program who achieve paid work | 106-303 (35%) | 91-459 (20%) | 119-271 (44%) | 146 |
| Average hourly earnings in that program | \$9.93 | \$11.51 | \$13.60 | \$12.00 |
| Rate of customers exiting self-sufficiency program who accomplish all communication and self-care goals | 878-1284 (68%) | 1024-1224 (84%) | 935-1214 (77%) | (75%) |
| Braille pages provided (State Fiscal Year) | 753,236 | 815,788 | 715,883 | Not available |
| Customers accessing audio services | 14,631 | 14,507 | 14,670 | 14,700 |
| Blind vendors maintaining or improving income: number (and percentage of total) | 38 (59%) | 37 (60%) | Not yet available | 40 (65%) |

This past year the department began a new method of gauging customer satisfaction with many of its key programs. An independent contractor surveys a statewide sample of WorkForce Center customers each month and reports the results (see www.mnwfc.org/customersurvey/). The department calculates a Minnesota Customer Satisfaction Index from responses to questions on overall satisfaction. For the first six months of the survey (November 2001 - April 2002), the index for the SSB workforce development program was 67.6 on a scale of 1 to 100. This number will contribute to the first year baseline data and will be critical in monitoring patterns of customer satisfaction over time. Future budget narratives will report these trends.

Program Funding

SSB receives a single state appropriation, to be divided across various services. About half (\$2.2 million) of the appropriation must go to match federal dollars; another half million is direct customer support. The remainder (\$2.3 million for state operations) went to the Store, the Communications Center, the Child Rehabilitation support, and the Self-Sufficiency program.

Program Description

The WorkForce Wage Assistance Branch helps Minnesotans remain economically self-sufficient through unemployment and/or disability. The *Unemployment Insurance (UI)* budget activity manages the payment of benefits to unemployed Minnesotans; and the *Disability Determination Services (DDS)* budget activity determines if Minnesotans claiming disability under the federal Social Security Disability Insurance and Supplemental Security Income programs qualify for those benefits.

The UI activity receives its authority from M.S. 268.001 through 268.23 and U.S. Code, Title 42, Chapter 7; U.S. Code, Title 26, Chapter 23. The DDS activity receives its authority from U.S. Code, Title 42, Chapter 7, Subchapter II, Section 421.

Program at a Glance

The federally mandated programs in this branch provide critical self-sufficiency services to a large pool of Minnesotans suffering short- or long-term distress. About a quarter of a million Minnesotans require services from this branch annually:

- ◆ Unemployment Insurance (approx. 210,000)
- ◆ Disability Determination Services (approx. 40,000)

Population Served

The primary customers of the UI program are the 130,000 Minnesota *employers* subject to the UI Benefit Tax and their 2.7 million *employees*. Over 210,000 Minnesota employees applied for unemployment insurance during calendar 2001. The primary customers of the DDS are the 40,000 *Minnesota residents* each year who file applications for disability benefits or are reviewed for continuing eligibility for payments.

Services Provided

In UI, services consist of benefit application, eligibility determination, and benefit provision for individuals; and tax collection and information gathering for employers. Both workers and employers have access to fair and timely adjudication and appeals assistance. Service centers (651-284-3033 or toll free 1-877-504-5050) and the Internet (www.mnwfc.org/ui/index.htm) are the primary delivery mechanisms.

In DDS, services consist of eligibility determination and appropriate referrals to services elsewhere in the Department (especially Vocational Rehabilitation Services and State Services for the Blind), as well as to the Department of Health where children with special health needs are concerned. Customers apply for disability benefits by calling the Social Security Administration's 800 number, or by filing for benefits at their local Social Security office.

While benefit payment is a critical "bridge" for distressed Minnesotans, both activities in this branch depend on the WorkForce Center System for re-employment services so that families can regain long-term economic security

Key Measures

The two activities under this branch have their own distinct performance measures. Please see the UI and DDS budget activity pages for specific performance data.

Program Funding

UI is funded by employer-paid taxes that are maintained in specially-designated federal funds for benefit provision and administrative costs. UI Trust Fund figures are not shown here. DDS receives a federal Social Security Administration appropriation for its work. No activities in this branch receive allocations from Minnesota's General Fund or Special Revenue funds.

ECONOMIC SECURITY DEPT

Program: WORKFORCE WAGE ASSISTANCE

Activity: UNEMPLOYMENT INSURANCE

Narrative

Activity Description

The Unemployment Insurance (UI) program provides economic relief through the payment of unemployment benefits to unemployed Minnesotans. Authority comes from M. S. Section 268.029 through 268.23. See also U.S. Code, Title 42, Chapter 7 and U.S. Code, Title 26, Chapter 23.

Population Served

The primary customers of UI are the individuals who apply for unemployment benefits, in 2001, 210,000 Minnesotans. Of the persons who applied, over 165,000 received unemployment benefits. 130,000 Minnesota employers are also customers of the system; they pay into the UI Trust Fund through a special payroll tax on their 2.7 million employees. The amount of the tax is based upon their "experience" with unemployment.

Activity at a Glance

Unemployment Insurance (UI) is a federally mandated program that covers Minnesotans statewide. Virtually all Minnesota employers participate through payroll-based taxes, placed in a special trust fund used exclusively for the payment of unemployment benefits.

- ◆ \$675 million in regular unemployment benefits was paid in 2001.
- ◆ 210,000 individuals filed applications for unemployment benefits in 2001.
- ◆ 130,000 employers are involved in the UI program, covering 97% of all work performed in the state.

Services Provided

Each year, the UI program determines the tax liability of 130,000 Minnesota employers, each receiving an individually computed tax rate based upon the "experience" with unemployment. The program collects these revenues, audits employer accounts to ensure proper payments, determines benefit entitlement to applicants who apply for benefits, and pays weekly unemployment benefits to over 165,000 eligible applicants, provides impartial due process hearings for applicants and employers who wish to appeal UI decisions, and administers state and federal laws relating to unemployment insurance. (Such laws include special federal extended benefit programs, federal disaster unemployment assistance programs, and special state extensions.)

Service centers (651-284-3033 or toll free 1-877-504-5050) and the Internet (www.mnwfc.org/ui/index.htm) are the primary initial benefit delivery mechanisms.

Historical Perspective

The UI Trust Fund as of 6-30-02 had a balance of \$266 million. This balance is over \$260 million less than at the same time last year. The department expects unemployment benefit payouts in 2002 to exceed \$850 million and unemployment taxes to amount to \$440 million. Federal law does provide for borrowing from the federal treasury to pay unemployment benefits if necessary, and the department predicts the UI Trust Fund will borrow from the federal treasury in February 2003.

Even at its peak (\$750 million in March 2001), the UI Trust Fund did not meet federal solvency standards. An Office of Legislative Auditor report in January 2002 reinforced the department's concerns. During the 2002 session, the Minnesota legislature directed the UI Advisory Council to begin an analysis of steps necessary to ensure long-term solvency of the fund and to make specific legislative recommendations during the 2003 session. See Laws 2002, Chapter 370, Article 1, Section 8.

ECONOMIC SECURITY DEPT

Program: WORKFORCE WAGE ASSISTANCE

Activity: DISABILITY DETERMINATION

Narrative

Activity Description

The Disability Determination Services (DDS) budget activity determines if Minnesota applicants meet federal criteria for disability cash benefits under Social Security's Disability Insurance or Supplemental Security Income program. Authority comes from U.S. Code, Title 42, Chapter 7, Subchapter II, Section 421.

Population Served

The primary customers of the DDS are the approximately 40,000 Minnesota residents annually who file applications for disability benefits or are reviewed for continuing eligibility for payments. The secondary customers are the state and federal taxpayers who pay for these benefits and deserve an accurate determination process.

Activity at a Glance

Disability Determination Services (DDS) is bound by Social Security Administration regulations to determine the status of Minnesota applicants for Social Security Disability Insurance and/or Supplemental Security Income benefits.

- ♦ about 40,000 new applicants each year
- ♦ about \$67 million in federal benefits monthly

Services Provided

In addition to providing determinations on eligibility for disability payments, the DDS also refers disability applicants who may benefit from rehabilitation services to Vocational Rehabilitation Services, State Services for the Blind, and to the Department of Health's section of Children with Special Health Needs. Customers apply for disability benefits by calling the Social Security Administration's 800 number, or by filing for benefits at their local Social Security office.

Key Measures

(NA = Not applicable)

| MEASURE | CY 1999 | CY 2000 | CY 2001 | CY 2002 GOAL |
|---|--------------|--------------|--------------|--------------|
| Individuals receiving SSD | 115,000 | 118,000 | 121,000 | NA |
| Benefits paid (average monthly) | \$66 million | \$68 million | \$71 million | NA |
| New determinations reviewed | 39,386 | 40,111 | 42,000 | 44,600 |
| Days in decision making | 101 | 101 | 103 | 115 |
| Percentage of decisions accurate | 97% | 97.5% | 97.1% | NA |
| Percentage of cases reviewed (compared to federal target) | 108% | 105% | 105% | 100% |

Activity Funding

DDS is funded entirely by the Social Security Administration. The Chicago regional office of the Social Security Administration monitors spending. There is very little discretion with the funds.

| Full-Time Equivalents (FTE) | 150.5 | 150.1 | 150.0 | 150.0 | 150.0 |
|------------------------------------|--------------|--------------|--------------|--------------|--------------|

Agency Purpose

They exist to protect life and property from the hazards arising from the use of electricity by ensuring the qualifications of electricians through the electrical licensing requirements of M.S. Section 326.242 and the inspection of electrical wiring and equipment for compliance with the safety standards set forth in Section 326.243, as required by Section 326.244.

Core Functions

- ⇒ License individuals through an experience and examination process.
- ⇒ License businesses that perform electrical work.
- ⇒ Inspect installed electrical wiring.

Operations

- ⇒ License approximately 3,000 businesses that perform electrical wiring for others.
- ⇒ Issue over 15,000 personal licenses across 10 different classifications. Approximately 2,000 persons are licensed in more than one category.
- ⇒ Examine over 1,500 persons for personal licensure each fiscal year. Additionally, the board has a reciprocal licensing agreement with 11 other states that allows individuals to become licensed in participating states without additional examination.
- ⇒ During the biennium ending 6-30-02, the board received approximately 320,000 separate requests for inspection and completed a similar number of inspections requiring approximately 750,000 separate inspection trips, an average of 1,500 each business day.

Budget

The board collects revenues for electrical examinations and licensing, inspection charges, handling fees, civil penalties, and miscellaneous charges. These revenues are deposited in a special revenue account in the state treasury.

- ⇒ Electrical inspection fees are held in escrow and are used to pay inspection service expenses as individual inspections are completed. In FY 2002, 83% of the collected inspection fee was used to pay for inspection service with the remaining 17% used to offset associated operating costs, including anticipated future costs.
- ⇒ Electrical licensing fees are collected at the time of initial licensure and upon renewal. All licenses are based on a two-year term.
- ⇒ Revenue from inspection accounted for 89%, licensing fees for 9%, and sale of request for inspection certificate forms and other sources the remaining 2% of the board's total revenue for the 2001-02 biennium.

At A Glance

The board's level of activity is based on demand for service by its clientele, including citizens, license applicants, and licensees. The demand for license related service is relatively constant and has increased approximately 15% over the last 10 years. The demand for electrical inspection has increased 50% over the same 10-year period and is directly related to the level of construction activity.

Agency Purpose

Minnesota Statutes, sections 144E.001-144E.52 designate the Emergency Medical Services Regulatory Board (EMSRB) as the lead agency for emergency medical services (EMS) in the state. Its mission is to *provide leadership which optimizes the quality of emergency medical care for the people of Minnesota – in collaboration with its communities – through policy development, regulation, system design, education and medical direction.*

The EMSRB was created in 1995 legislation and began operations on 7-1-96. It was one of the first such independent EMS agencies in the nation and has served as a model for other states. Before its existence, EMS functions in Minnesota had been carried out in the Department of Health's EMS Section, dating to the 1960s when EMS was emerging here and nationally as a distinct public health component. The agency is governed by a 19-member board. Fifteen of those members are appointed by the governor from a variety of disciplines and areas comprising the EMS system. Additional members are a senator and a representative (both ex-officio) and the commissioners of Health and Public Safety.

The EMSRB also serves as the administering agency for the Health Professionals Services Program (HPSP). M.S. 214.31 to 214.37 charge (HPSP) with the responsibility to *protect the public from persons regulated by the [14 health-licensing] boards [and the EMSRB and Department of Health] who are unable to practice with reasonable skill and safety by reason of illness, use of alcohol, drugs, chemicals or any other material, or as a result of any mental, physical or psychological condition.*

At A Glance

- ◆ The EMS system in Minnesota is heavily dependent on volunteer ambulance services and on a diminishing pool of volunteers, particularly in rural areas.
- ◆ Low ambulance license fees and no fees for personnel certification (indicated by the voluntary makeup of EMS) prevent the agency from becoming fee-supported.

Core Functions

- ⇒ Licenses and regulates approximately 300 ambulance services.
- ⇒ Certifies more than 28,000 EMS personnel after they have completed the required training and testing.
- ⇒ Approves approximately 100 training programs that conduct training courses for EMS personnel.
- ⇒ Designates and funds eight organizations that provide EMS support on a regional level throughout the state.
- ⇒ Registers approximately 1,000 first responder units, on a voluntary basis, statewide. This is a new function authorized by 2002 legislation and effective 8-1-02.
- ⇒ Monitors (through HPSP) nearly 500 health professionals to enhance public safety in health care.

Operations

- ⇒ Receives, investigates and resolves complaints from the public and EMS professionals about ambulance services, training programs and EMS personnel, taking action as necessary to protect the public from unsafe EMS practice.
- ⇒ Administers funding for Comprehensive Advanced Life Support (CALS) courses that teach advanced emergency care skills to rural doctors, nurses and emergency room personnel.
- ⇒ Administers federal funding for the EMS for Children (EMSC) Resource Center which provides information and training on pediatric emergency care and child safety.
- ⇒ Administers reimbursements to volunteer ambulance services for expenses associated with initial training and continuing education for approximately 1,400 volunteer EMS personnel.
- ⇒ Administers a Longevity Award Program that provides one-time cash awards to qualifying volunteer EMS personnel upon retirement.
- ⇒ Performs (through HPSP) intake and assessment services to determine if monitoring health professionals is indicated.
- ⇒ Creates (through HPSP) contracts for health professionals and monitors their compliance with the contracts (e.g., review drug screens, treatment provider and work site reports).

Budget

The EMSRB portion of the agency's budget comes from a variety of sources: general fund appropriations, dedicated funds, federal grants and fines for seat-belt violations. Operation of the EMSRB accounts for 27% of its budget expenditures (16 full-time equivalent employees), with the remainder going to grants and other dedicated uses. The HPSP portion of the budget is generated by the participating boards. Each board pays an annual participation fee of \$1,000 and a pro rata share of program expenses based on the number of licensees they have in the program. HPSP has 7.0 full-time equivalent employees.

Agency Purpose

The Department of Employee Relations (DOER) assists in coordinating the state of Minnesota's Human Resource System. This is accomplished through a partnership with human resource professionals from all agencies who are committed to the continuous improvement of human resource products and services that support state government in providing exceptional service to all citizens.

DOER is governed by M.S. 43A, giving the department the responsibility for the administration of the state's civil service system, negotiating labor contracts for state employees, and providing insurance to state employees and their families.

Core Functions

DOER has two main functions: the first, human resource management, provides a wide variety of human resources products and services to state agencies. The second, the employee insurance division, develops, implements, and manages employee insurance benefits as part of an integrated total compensation package for state workers.

Operations

Administrative Services provides general administrative support that enables DOER to successfully accomplish its tasks, functions, and objectives. Internal support services including budgeting and accounting, central purchasing, human resources, office management, records management, and centralized statewide personnel files.

Information Services, within Administrative Services, provides DOER with a comprehensive information technology management program, while providing support for statewide information systems that design, develop, implement, and maintain the state's payroll, human resources, and employee insurance systems to ensure that it is cost effective and value added.

SEMA4/WARE, also within Administrative Services, establishes, maintains, and coordinates the statewide Human Resource Information Systems (HRIS) to enhance the capture of and access to information that improves enterprise-wide collaboration and to provide essential data needed for strategic planning and performance measurement. More specifically, the division collects, analyzes, compiles, and reports data from a variety of sources. It also, supplies HRIS with useful and accurate data about the state of Minnesota workforce and assists decision-makers in the development of policies and programs designed to accomplish goals in each agency.

Diversity and Equal Opportunity works with state agencies toward establishing systems, structures, and workplace cultures that attract and support diversity.

Labor Relations Bureau represents the State of Minnesota in negotiation and administration of collective bargaining agreements and labor plans for state employees.

Strategic Staffing ensures that a diverse pool of competent job applicants are available to meet state agency needs; provides information, consultation, training, and resources in job analysis, recruitment, selection, and workforce development; and manages, maintains, and integrates selection/recruiting technology.

Employee Insurance Administration develops and manages the State Employee Group Insurance Program (SEGIP) for eligible state employees, retirees and their dependents.

At A Glance

Annual Business Processes:

- ◆ Reached tentative agreement with five unions. Eleven labor contracts bargained biennially. Negotiated and administered bargaining agreements and labor plans for over 37,200 state employees.
- ◆ Created and implemented a new health insurance plan, affecting over 129,000 state employees and their families.
- ◆ Recovered more than \$1.2 million in workers' compensation third party settlements.
- ◆ Served 7,900 local government employee and families in the Public Employee Insurance Program with an increased enrollment of 14% for FY 2001.
- ◆ Processed 38,323 job applications and 12,500 resumes. Performed 632 job audits.
- ◆ Implemented Resumix database, conducted training and introduced Resume Builder, serving 120 state agencies human resource programs.
- ◆ Implemented a major upgrade to SEMA4 (the state human resources and payroll system) on time and on budget.

Public Employee Insurance Program (PEIP) offers local units of government group health, dental, and life insurance for their eligible employees, retirees and their dependents.

Worker's Compensation provides workers' compensation benefits to state employees; represents state agencies in workers' compensation court cases; and works with agencies to address workplace safety and health issues.

Employee Assistant Program (EAP) provides state agencies, employees and their eligible dependents with counseling and consultation regarding workplace, personal, and family problems that negatively affect employee performance and organizational effectiveness.

Budget

One and a half percent of the Department's FY 2002-03 budget is from the General Fund, with the other 98.5% composed of revenues and expenditures of the various insurance and state employee benefit programs that the department operates.

The General Fund portion of the budget covers operating expenses for approximately half of the agency programs and staff. These include Strategic Staffing, Information Services, SEMA4/WARE, Office of Diversity and Equal Opportunity, Administrative Services, and a portion of the Labor Relations/Total Compensation Program.

The remainder of the agency operations is covered by non-general fund dollars. This includes the State Employee Group Insurance Program (SEGIP), the Public Employee's Insurance Program (PEIP), the Workers' Compensation Program, and the Pre-Tax Savings programs.

The non-general fund dollars used to operate the SEGIP and PEIP insurance programs consist of premiums collected from state agencies, Independent Billing Units, COBRA, and other self-paid participants. In the PEIP program, the users consist of various local units of government employers and their employees. State agency fees and claim reimbursements for claim costs generate the revenue in the Workers' Comp program. Pre-Tax Program revenue consists of employee contributions for medical, dental, and transit expense reimbursements.

Program Description

The Department of Employee Relations' (DOER) Human Resource Management Program provides a number of centralized personnel services for the executive branch.

Budget Activities Included:

- ◆ Administration
- ◆ Diversity and Equal Opportunity
- ◆ Labor Relations
- ◆ Strategic Staffing
- ◆ Human Resource Non-Operating
- ◆ Conference Revolving Account

Historical Perspective

In 2001, DOER's Human Resource Management Program was instrumental in forming the statewide Human Resource Directors Partnership (HRDP) and the Alliance for Cooperation and Collaboration in Employment and State Services (ACCESS), organizations designed to bring state agency human resources and Diversity/Equal Opportunity leaders together with DOER personnel for the purpose of promoting greater consistency and effectiveness within the executive branch human resources system. Working with these organizations, DOER then published the state's five-year HR strategic plan.

Also in 2001, Human Resource Management Program performed strategic coordination, contingency and communications planning to assist executive branch agencies and employees in preparation for a potential shutdown of Minnesota's state government. Although the shutdown was averted, some of these preparations were useful in maintaining the critical functions of state government during the subsequent 10-day employee strike. Labor Relations ended the largest strike in Minnesota history by settling contracts within budget parameters set by the Administration and Minnesota lawmakers.

In 2002, various elements of DOER's Human Resource Management Program implemented a new web-based hiring system for state government, made significant progress on a project designed to reform the state employment classification system, and continued a major upgrade of the state's human resource data system.

Key Measures

- ⇒ Success in settling labor contracts within the budget parameters set forth by the Administration and the Minnesota Legislature during the upcoming FY 2003-05 collective bargaining negotiations.
- ⇒ Continued progress in maximizing cost effectiveness and efficiency, by shifting all activity related to filling state job openings to the new hiring process; and receiving all applications from job-seekers through the new online resume-scanning system.
- ⇒ Successful distribution of executive branch transition resources and information, providing facts and assistance regarding state government employment, procedures, insurance benefits, etc. to members of the new administration following the November 2002 general election.
- ⇒ The effectiveness of services furnished by the Human Resource Management Program – which combine to make the state of Minnesota a more desirable employer – is in part reflected by the relatively low turnover rate among Minnesota state employees, as illustrated by the graph below.

Program at a Glance

- ◆ Provides compensation, staffing, diversity, training and administrative services to all 120 executive branch state agencies (including Minnesota State Colleges and Universities), impacting 50,000 state employees;
- ◆ Provides labor relations services to all non-Minnesota State Colleges and Universities executive branch agencies, impacting about 37,200 state employees;
- ◆ Operates the state civil service system, first established in 1938;
- ◆ Works in cooperation with the state Human Resource Directors Partnership and the ACCESS Partnership.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: ADMINISTRATION

Narrative

Activity Description

The Department of Employee Relations (DOER) Administration activities support the wide range of operational infrastructures and organizational/internal services needed to assist the agency's personnel and execute departmental functions. DOER Administration activities are provided through the department's Information Systems division, SEMA4/WARE Division and the Administrative Services Division.

Population Served

DOER Administration supports and serves the agency's staff members, who in turn provide widely varied services to:

- ◆ state employees in the executive, legislative and judicial branches of state government;
- ◆ all 120 executive branch state agencies served by the statewide SEMA4 personnel data system; and
- ◆ members of the general public.

Activity at a Glance

- ◆ The program supports and serves DOER's staff members, who in turn provide widely varied services to state employees in the executive, legislative and judicial branches of state government.
- ◆ The SEMA4/WARE activity provides training, documentation and support to more than 2,000 designated SEMA4 users who serve state agencies.
- ◆ DOER's Information Services Division provides technical support for systems (such as SEMA4, payroll, Resumix, and GenComp) that serve 120 state agencies and up to 54,000 employees of the executive, legislative and judicial branches.

Services Provided

Information Systems Division:

- ◆ develops and implements information technology and web-based projects to assist operations within DOER and throughout the entire state agency Human Resource system;
- ◆ analyzes, purchases, maintains and upgrades desktop personal computer technology for all DOER employees; and
- ◆ analyzes, purchases, maintains and upgrades DOER's LAN and web servers to support a wide variety of business functions.

SEMA4/WARE Division:

- ◆ oversees and implements changes and enhancements to the HR portion of the State's Human Resource Information System, SEMA4;
- ◆ establishes, maintains and coordinates human resource information systems that enhance the capture of and access to information which improves enterprise-wide collaboration and provides essential data needed for strategic planning and performance measurement;
- ◆ ensures data integrity and furnishes data about the state's workforce to aid in policy development; and
- ◆ provides Workforce Analysis Reporting and Evaluation (WARE) functions on a statewide level to interested parties.

Administrative Services Division:

- ◆ provides department-wide information processing, transcription, records management, etc.;
- ◆ supplies department-wide fiscal services management, accounts payable/receivable, organizational purchasing, etc.;
- ◆ provides the department with operational support (human resources coordination, equipment management, space planning/management, mail room, etc.); and
- ◆ miscellaneous agency fees derived from Combined Charities Applications and Vacation Donation Program.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: ADMINISTRATION

Narrative

Key Measures

- ⇒ Successful implementation of Phase 2 of the SEMA4 system upgrade by April 2003 (expected to be on time and within budget). In partnership with the Department of Finance, this upgrade entails moving from the legacy Benefits system into SEMA4, adoption of the web-based PeopleSoft Version 8, reduction of the number of customizations which will reduce the effort and complexity of future upgrades, and creativity opportunities for the state to deliver self-service functions in the human resources, payroll, and benefits areas.
- ⇒ Successfully complete and support the enrollment technology requirements for DOER's state employee insurance Open Enrollment.
- ⇒ Completed development and delivery of plans for self-service access to public information.

Activity Funding

Funding for this activity is financed by appropriation from the General Fund. Costs for SEMA4 system upgrades are financed from the Insurance Administration Fund within the Employee Insurance Division.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: DIVERSITY & EQUAL OPPORTUNITY

Narrative

Activity Description

The Office of Diversity and Equal Opportunity (ODEO) exists to provide leadership and support to state agencies in compliance with Affirmative Action (AA) and Equal Employment Opportunity (EEO) laws. In addition, ODEO works with state agencies to coordinate efforts of recruitment strategies among agencies to address underutilization of protected group members as well as workforce planning for all employees.

Activity at a Glance

- ◆ ODEO serves approximately 5,300 state employees (minorities and persons with disabilities) who represent protected groups.

Population Served

The ODEO works with all state agencies to attract and retain highly qualified employees at all levels of each organization and in a fashion that mirrors the population of Minnesota; while developing strategies designed to encourage and allow state employees to thrive in and contribute to their organization. ODEO serves women, minorities and persons with disabilities throughout Minnesota's general population, by developing, implementing, and ensuring compliance with policies and programs designed to attract and retain protected group members to employment with state government.

Services Provided

- ⇒ Coordinate EEO/AA resources to address targeted areas of underutilization and to eliminate redundancies.
- ⇒ Provide state agencies with services to assure their compliance with state and federal laws governing affirmative action, equal employment opportunities, and other federal and state laws.
- ⇒ Work with state agencies to increase representation of protected group employees in all job classifications; and to help them develop plans through which they can effectively attract and retain a diverse workforce.
- ⇒ Ensure the turnover rate for protected group members is equal to the rate for non-protected group members.
- ⇒ Promote initiatives to allow culture change efforts, encouraging employees to work and contribute naturally to their organization.
- ⇒ Expand training efforts within state agencies as they relate to mentorship, affirmative action, recruitment and diversity.
- ⇒ Evaluate employee benefit programs to ensure that offerings are relevant to state workforce instead of to only the majority.
- ⇒ Provide support to ACCESS (Alliance for Cooperation and Collaboration in Employment and State Services) and the HRDP (Human Resources Directors Partnership) to accomplish equal employment opportunity, diversity, and affirmative action initiatives.

Key Measures

- ⇒ Increase current representation of protected group members in all state employee job classifications.
- ⇒ Ensure the turnover rate among state employees who are protected group members is equal to the turnover rate among state employees who are not members of protected groups.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: LABOR RELATIONS & COMPENSATION

Narrative

Activity Description

The Labor Relations/Compensation Bureau performs the duties assigned to the Department of Employee Relations (DOER) commissioner under the Public Employees Labor Relations Act (PELRA), including contract negotiations with the state employee unions. In addition, the Bureau is responsible for monitoring local government subdivisions to ensure their compliance with the Local Government Pay Equity Act.

Population Served

The Bureau works with and represents the management of 120 state agencies and boards, impacting about 37,200 executive branch state employees; and works closely with legislative committees. In addition, the Bureau's Local Government Pay Equity Division works with more than 1,508 local governments to achieve compliance with state statute.

Services Provided

Labor Relations Unit:

- ◆ negotiates and oversees collective bargaining with the exclusive representatives of executive branch state employees (except Minnesota State Colleges and Universities faculty);
- ◆ presents management's positions in interest arbitration (arbitrations involving employees with no right to strike);
- ◆ implements major portions of collective bargaining agreements;
- ◆ advises each state agency's management in their relationships with the exclusive representatives for state employees; and sets statewide policy for management's relationship with labor;
- ◆ interprets collective bargaining agreements;
- ◆ advises agency management on contract and human resources administration issues;
- ◆ trains supervisors and managers in contract administration; and
- ◆ administers grievances appealed to arbitration by unions.

Compensation Unit:

- ◆ provides an overall compensation framework for compensation and benefits other than insurance, (vacation, sick leave, holidays, expense reimbursement, etc.);
- ◆ provides policy development and research services to executive branch management in the areas of compensation and related programs;
- ◆ responsible for estimating the fiscal impact of collective bargaining proposals and providing policy and technical direction in the negotiation of collective bargaining agreements; and
- ◆ develop or approve compensation plans for unrepresented employees in all non-higher education agencies.

Local Government Pay Equity Unit:

- ◆ administers the compliance process for the Local Government Pay Equity Act, ensuring that all political subdivisions (including cities, counties, school districts and others) report to the DOER to confirm elimination of sex-based wage inequities in compensation;
- ◆ inform local governments of the act's requirements; and
- ◆ review reports received from local governments - determining compliance, assessing penalties and informing the legislature of the compliance status of local government units.

Historical Perspective

- ◆ In 2001, DOER and the Bureau represented the state during a ten-day strike by AFSCME & MAPE employees of the executive branch; and settled the contracts within the budget parameters set forth by the Administration and the Minnesota Legislature.

Activity at a Glance

- ◆ Serves 37,200 of the executive branch's 50,000 state employees
- ◆ Negotiates seven collective bargaining agreements biennially, impacting about 35,000 executive branch state employees
- ◆ Oversees and administers two unrepresented employee plans, impacting about 2,200 executive branch state workers

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: LABOR RELATIONS & COMPENSATION

Narrative

- ◆ In 2001, AFSCME Unit 8 (Correctional Guards) elected to use their right to interest arbitration regarding inequities. The work of the Bureau led to the arbitrator's decision in favor of the state, saving the taxpayers \$9.5 million.
- ◆ In 2001, the Bureau completed the audit process for all classes and Federal Labor Standards Act (FLSA) back-pay, developed FLSA basic course and presented it to state agency human resources personnel, supervisors and managers.

Key Measures

- ◆ success in settling labor contracts within the budget parameters set forth by the Administration and the Minnesota Legislature during the upcoming FY 2003-05 collective bargaining negotiations;
- ◆ continued biennial reduction of the number of state employee labor grievances, as demonstrated in the 2001-02 biennium:
 - ⇒ 952 total active grievances during the 2001-02 biennium (counting appeals).
 - ⇒ 50 grievances were decided by an arbitrator.
 - ⇒ 188 grievances were settled by the Bureau.
 - ⇒ 333 grievances were withdrawn.
 - ⇒ 381 active grievances are left from the 2001-02 biennium.
- ◆ reduction in the annual number of pay equity non-compliance determinations within Minnesota's public sector by providing technical assistance, training and job evaluation tools (such as the newly revised State Job Match) free to local government units.

Activity Funding

The department's General Fund appropriation finances the activities of the Bureau.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: STRATEGIC STAFFING

Narrative

Activity Description

The Strategic Staffing Division provides all state agencies with direction, development and maintenance of hiring, and training services in order to maximize state agency efforts to attract, hire and retain skilled employees.

Population Served

The Strategic Staffing Division serves Human Resource (HR) personnel, managers, supervisors, and lead workers at all 120 executive branch agencies. In addition, Staffing works with members of the general public interested in employment with the state of Minnesota.

Services Provided

The Strategic Staffing Division has the authority to make employee hiring decisions, while providing oversight and consultation as needed to many state agency HR offices.

The division retains responsibility for providing classification and hiring services to agencies that do not have the resources needed to handle HR functions, or when statewide coordination of services is necessary. Staffing's services include:

Consultation to state agency HR personnel, managers and supervisors in areas such as:

- ◆ coordination with all members of the Human Resource Director's Partnership (HRDP), a partnership developed by DOER to improve coordinated HR functions on a statewide basis;
- ◆ recruitment and marketing;
- ◆ selection process design and development; and
- ◆ strategic staffing, workforce planning and redeployment.

Administration of the division's Human Resources Information System (HRIS) tools to meet the current and future staffing needs statewide:

- ◆ evaluates and revises the staffing process, and researches new HRIS assessment, recruitment and selection tools to meet agency needs in today's labor market;
- ◆ analyzes various staffing metrics to identify staffing trends within specific agencies and on a statewide basis;
- ◆ provides user training to ensure consistency, best practices, and use of the selection tools;
- ◆ provides recruiting and marketing services designed to promote the state as a leading employer and to build a qualified, available and diverse recruitment pool;
- ◆ provides recruiting consultation services for hard-to-fill or under-represented areas; and
- ◆ establishes and maintains relationships with community organizations and schools to promote the opportunities and benefits of employment in state government.

Providing Applicant Services:

- ◆ ensures that resumes are quickly and accurately processed;
- ◆ answers questions from job-seekers regarding their application materials and the selection process;
- ◆ maintains the integrity of the *Resumix* applicant tracking database (a new resume scanning software) and, processes applications for state positions; and
- ◆ staffs and records data for the Job Information Line (public access point for information on state jobs), and processes all applicant information.

Activity at a Glance

- ◆ Serves HR personnel, managers, supervisors, and lead-workers at all 120 executive branch agencies; and
- ◆ Serves members of the general public who are interested in employment with the state of Minnesota.
- ◆ As of September 2002, the new hiring system had stored 40,000 active resumes in its database.
- ◆ As of September 2002, the new hiring system had advertised about 2,800 positions (all approved to fill under the State Hiring Freeze) on the state's employment web pages.

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: STRATEGIC STAFFING

Narrative

Provides Training Services:

- ◆ provides and coordinates training as required by statute to state managers, supervisors, lead workers, and HR personnel;
- ◆ provides resource/reference information to agencies seeking training in the areas professional development, performance management, project management, and leadership, for workforce development; and
- ◆ working on identification and implementation of a competency model for HR and managerial job classes, with eventual implementation for all state job classes. The competency model will have numerous applications in recruitment, selection, interviewing, and performance management, which will allow for strategic staffing of state agencies.

Key Measures

⇒ In March 2002, the Strategic Staffing Division adopted a new multi-source hiring process that uses web-based technology and a resume-scanning (*Resumix*) software to make the state's application and selection procedures more efficient and timely for both applicants and hiring managers. Under the new process, hiring managers may complete their job requisitions over the Internet, identify job seekers from a resume database, review resumes, and contact or track candidates. Job seekers may create, submit and update a single resume to be considered for all state job openings; search and apply for jobs; and retrieve job information through the web or other sources.

**Selection Process for Vacancies
For the Period March - September 2002**

**Resumes Received since
March 4, 2002 (Total: 27,907)**

EMPLOYEE RELATIONS DEPT

Program: HUMAN RESOURCE MANAGEMENT

Activity: STRATEGIC STAFFING

Narrative

Activity Funding

The department's General Fund appropriation finances the majority of activities on the program. The training functions are funded by a revolving fund with training participants paying for the classes. The revenue generated covers the program expenditures.

Program Description

The Employee Insurance Division (EID) administers employee insurance fringe benefits for the state of Minnesota's eligible state employees, retirees, and dependents.

Budget Activities Included:

- ◆ State Employees Group Insurance Program (SEGIP)
- ◆ Employee Assistance Program (EAP)
- ◆ Workers' Compensation Program
- ◆ Public Employees Insurance Program (PEIP)
- ◆ Health Risk Management Unit

Historical Perspective

Employer-administered fringe benefits have been an important part of state workers' total compensation for more than 55 years. Over time, the range, complexity, and expense of employee fringe benefits has increased greatly - particularly in the area of health benefits. To address such increases, EID developed the Minnesota Advantage Health Plan for state employees and launched the program in 2002. Advantage was implemented to help contain health benefit costs, provide greater flexibility and options, and preserve access to a wide array of health care providers for employees.

Program at a Glance

- ◆ Provides insurance fringe benefits for more than 129,000 state employees, retirees and dependents, with a total annual budget activity of over \$466 million;
- ◆ Provides Workers' Compensation Program for more than 57,000 for state employees, at an annual cost of over \$21 million; and
- ◆ Manages the Public Employees Insurance Program (PEIP) -- providing health, dental, and life insurance to 137 non-state public sector employer groups, with premium expenditures of over \$20 million annually.

Key Measures

- ⇒ In 2002, the new Advantage health benefits program saved \$8 million in premiums for the state and \$30 million in premiums for employees (compared to the projected costs if the previous employee health coverage program had been continued).
- ⇒ The overall cost of administering SEGIP health benefits is approximately 8% of total premium costs, which is below the industry standard of 10-15% of total premium costs.
- ⇒ The rate of new workers compensation claims has declined 6.6% since FY 1998.
- ⇒ The number of groups enrolled in PEIP has increased every year for the past four years, from 73 in 1999 to 137 in 2002, an increase of over 88%.

Program Funding

Funding for the Employee Insurance Division consists primarily of insurance premiums collected from state agencies and other participating groups, and from employees and retirees. These funds are principally pass-through funds to insurance carriers, third party administrators, and other vendors. Funds are also used to pay workers' compensation claims.

EMPLOYEE RELATIONS DEPT

Program: EMPLOYEE INSURANCE DIVISION

Activity: EMPLOYEE INSURANCE ADMINISTRATION

Narrative

Activity Description

The State Employee Group Insurance Program (SEGIP) administers the state of Minnesota's comprehensive employee insurance fringe benefits package.

Population Served

SEGIP provides benefits to eligible employees, retirees, and dependents in all three branches of state government, Minnesota State Colleges and Universities, and certain quasi-state agencies. This activity covers 129,000 individuals statewide.

Activity at a Glance

- ◆ SEGIP provides employee insurance to state employees, retirees, and dependents – over 129,000 covered lives statewide.
- ◆ Calendar year 2003 estimated total SEGIP budget activity -- \$466 million.

Services Provided

Current employee insurance benefits administered through SEGIP include health, dental, life, long and short term disability, and long-term care coverage, as well as pre-tax accounts. To administer these benefits, SEGIP provides the following services:

- ◆ planning, design, and implementation of benefits;
- ◆ accounting and audit services;
- ◆ support of the collective bargaining process;
- ◆ policy analysis;
- ◆ billing and enrollment;
- ◆ vendor selection and contract management;
- ◆ customer service; and
- ◆ risk management and Employee Assistance Program services.

Historical Perspective

The state of Minnesota is the largest single employer group health purchaser in the state, and it has long played a leading role in benefits design, purchasing, and administration. In 1989, SEGIP helped pioneer the health care delivery and financing concept of "managed competition" among competing health plans. Beginning in 2001, SEGIP's health benefits program became fully self-insured. In 2002, it successfully implemented a new employee health benefits concept known as Advantage. Advantage's innovative use of a three-tiered cost structure provides important signals and incentives to the health care system to contain costs and improve value, while maintaining choices, options, and a large network of available health care providers statewide.

In addition to more than a decade of health insurance purchasing landmarks, SEGIP added optional employee long-term care insurance in 2001, and coordinated and broadened its risk management function in 2002 to improve employee health and productivity while reducing claims costs. SEGIP has also increased the use of technology to more effectively, efficiently process transactions and serve customers. It is now partnering in completing a major upgrade to the state's computer system, to add Benefits Administration capabilities and integrate with human resources and payroll functions.

Key Measures

- ⇒ In 2002, the new Advantage employee health benefits program saved \$8 million in premiums for the state and \$30 million in premiums for employees (compared to the previous employee health coverage program).
- ⇒ The overall cost of administering health benefits remains well below the industry standard of 10-15% of the total, at approximately 8%.
- ⇒ The percentage of employees using online insurance enrollment has increased from 38% in 1997 to over 80% in 2001.

EMPLOYEE RELATIONS DEPT

Program: EMPLOYEE INSURANCE DIVISION

Activity: EMPLOYEE INSURANCE ADMINISTRATION

Narrative

Activity Funding

SEGIP insurance and claims costs are funded primarily through premiums collected from state agencies and other participating groups, and from employees and retirees. These funds are principally pass-through funds to insurance carriers, third party administrators, and other vendors.

SEGIP's administrative revenues are collected primarily through direct, per employee charges to state agencies and other groups.

EMPLOYEE RELATIONS DEPT

Program: EMPLOYEE INSURANCE DIVISION

Activity: PUBLIC EMPLOYEES INSURANCE PROGRAM

Narrative

Activity Description

The Public Employees Insurance Program (PEIP) is a statewide health-dental-life insurance pool managed by DOER and offered to local units of government. The program provides Minnesota's public employers (including counties, cities, townships, school districts, and other jurisdictions) the option to purchase an affordable, uniform package of health care and other benefits for their employees and their dependents and retirees.

Services Provided

The availability of PEIP helps public sector employers obtain competitive health insurance rates. In some cases, PEIP provides the lowest bid. In other cases, PEIP offers a bid that competing insurers will then attempt to match or improve upon in order to be selected. In these instances, even when PEIP is ultimately not the successful bidder, it helps local units of government negotiate with other carriers to obtain the best rates possible.

In addition, PEIP offers public sector employers and their employees a choice of health plans wherever possible, while the majority of employers in the state now contract with a single carrier or health plan for health insurance.

Historical Perspective

PEIP was launched in 1989. In 1998, PEIP experienced a noticeable downturn in enrollment when the program was perceived as no longer being competitive in the market. This was addressed by altering the program design from an insured model to a self-insured model, and through a new marketing plan. These changes provided for greater flexibility and stability in rating and premium setting, and greater awareness of the program. As a result, the number of public sector employer groups and employees served by PEIP increased in 1999.

Key Measures

⇒ PEIP's viability and overall impact in the market are determined to a large extent by the number of participating employee groups and the number of individuals covered by the program. Because the program is not mandatory, membership fluctuates.

This table shows the number of participants for the past eight years:

| PEIP | FY 1995 | FY 1996 | FY 1997 | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 |
|----------------------------|---------|---------|---------|---------|---------|---------|---------|---------|
| # of groups | 82 | 91 | 90 | 70 | 73 | 95 | 129 | 137 |
| % change vs. previous year | - | 11% | (1%) | (22%) | 4% | 30% | 36% | 6% |
| # of employees | 3,023 | 2,965 | 2,945 | 1,941 | 2,265 | 2,680 | 4,158 | 3,926 |
| % change vs. previous year | - | (2%) | (1%) | (34%) | 17% | 18% | 55% | (6%) |

⇒ At present, approximately 9,228 employees, retirees and dependents are covered under PEIP.

Activity Funding

PEIP is funded by employer group premiums. Premiums collected in excess of expenses are used to minimize the rates charged to employer groups. Premium investment income is used to offset administrative expenses.

Contact

DOER Assistant Commissioner for Employee Insurance, (651) 296-3159

PEIP Manager, (651) 296-4934

Activity at a Glance

- ◆ As of July 2002, 137 public sector employer groups in Minnesota participated in PEIP. These include 20 school districts, 70 cities, 14 townships, 3 counties and 30 other units of government (watershed districts, HRA's, etc.).
- ◆ The average number of employees per group is 28, with groups as large as 323 members and as small as one member.

EMPLOYEE RELATIONS DEPT

Program: **EMPLOYEE INSURANCE DIVISION**

Activity: **WORKERS' COMPENSATION**

Narrative

Activity Description

The purpose of Minnesota's self-insured workers' compensation activity is to provide workers' compensation benefits to state employees.

Population Served

The workers' compensation activity covers approximately 57,000 employees in the executive, legislative, and judicial branches of state government. In addition, the activity covers employees of quasi-state agencies, such as the Minnesota Historical Society and the Minnesota State Fair.

Activity at a Glance

- ◆ Serves approximately 57,000 employees in the executive, legislative, and judicial branches of state government (includes seasonal workers, student workers, etc.).
- ◆ In FY 2002, approximately 3,118 claims were filed.
- ◆ The rate of new claims declined 5.9% in FY 2002.

Services Provided

The workers' compensation activity provides services through four distinct units: claims management, legal services, disability management, and safety/industrial hygiene.

- ⇒ The claims management unit works with injured employees, agencies, the Department of Labor & Industry, rehabilitation and vocational specialists, medical providers and others to file, track, coordinate, service, and resolve state employee workers' compensation claims.
- ⇒ The legal services unit represents state agencies in workers' compensation court cases.
- ⇒ The disability management unit works with injured employees, agencies, rehabilitation and vocational specialists, medical providers and others to help state workers who have been hurt or disabled on the job to return to active employment as quickly and safely as possible.
- ⇒ The safety/industrial hygiene unit works with the statewide safety committee, individual safety committees in each agency to address widely varied workplace safety and health issues. These include materials handling, air quality, hazardous materials, blood-borne pathogens, biological hazards, office ergonomics, etc.

Historical Perspective

With cooperation from the statewide safety committee and individual agency safety committees, the Safety and Industrial Hygiene Unit has played a critical role in reducing the occurrence of workplace injuries over the past five years.

The active involvement of properly trained state agency personnel, in cooperation with the workers' compensation activity, has reduced the number of claims involving the loss of time from work during the past five years. The use of a certified managed care plan under contract with the workers' compensation activity has helped to control workers' compensation costs for state agencies.

Starting in FY 2003, the alternative cost allocation account was implemented to fund workers' compensation costs in small to medium-sized agencies. This account will help stabilize costs and provide a long-term strategic funding source for participating agencies.

Key Measures

- ⇒ In FY 2002, approximately 3,118 claims were filed. The rate of new claims declined 5.9% in FY 2002. Table 1 contains a breakdown of these claims.

Table 1

| | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 1998-02 | FY 2001-02 |

| Rehab- ilitation | 606 | 766 | 790 | 1,194 | 881 | 45.3% | (26.2%) |
| EE Atty Fees | 457 | 547 | 446 | 428 | 480 | (12.3%) | 12.1% |
| Totals | \$13,611 | \$14,720 | \$14,464 | \$15,524 | \$15,674 | 15.2% | 1% |

Activity Funding

- ⇒ Workers' Compensation is funded through an administrative fee assessed to all state agencies based on the number of employees, open claims, and the number of transactions for each agency. During FY 1998-2001, the annual fee remained \$2.7 million. In FY 2002, the annual fee was increased to \$2.9 million.
- ⇒ The managed care fee (Table 3, Line 2) is passed through to state agencies (on a per-employee basis) for workers' compensation certified, managed care services.

Table 3

| | FY 1998 | FY 1999 | FY 2000 | FY 2001 | FY 2002 | FY 2003 | FY 2004 | FY 2005 |
|----------------------|---------|---------|---------|---------|---------|---------|---------|---------|
| Administrative Costs | \$2.7M | \$2.7M | \$2.7M | \$2.7M | \$2.9M | \$2.9M | \$2.9M | \$3.1 |
| Managed Care | \$955K | \$1.0M | \$1.0M | \$1.0M | \$1.1 | \$1.2 | \$1.3 | \$1.5 |

- ⇒ The agency receives a General Fund appropriation to pay the state's annual Workers' Compensation Reinsurance Association (WCRA) premium.

EMPLOYEE RELATIONS DEPT

Program: EMPLOYEE INSURANCE DIVISION

Activity: INSURANCE DIVISION NON-OPERATING

Narrative

Activity Description

The Department of Employee Relations (DOER) is authorized by Minnesota Statute to administer the state's employee benefit program and workers' compensation program. The actual revenues and expenditures for the insurance benefits and claims costs associated with these programs are accounted for in the Insurance Division's Non-Operating accounts. These accounts are primarily pass-through funds paid in by agencies and employees.

Services Provided and Funding

The services provided are payments to third party administrators, insurance carriers, and other vendors who are under contract to pay claims, provide benefits, and related services. Benefit costs funded through this activity include:

- ⇒ The Insurance Program - premiums contributed by agencies and employees for health, dental, life, long and short term disability benefits.
- ⇒ Workers compensation - funds paid by agencies to cover workers' compensation insurance.
- ⇒ Pre-tax programs - pass-through employee contributions allowing pre-taxed expenditures for medical, dental, transit and daycare expenses.
- ⇒ Workers' Compensation Reinsurance Association (WCRA) - statutorily required premium payment on behalf of all state agencies.

Funding for the Insurance Division Non-Operating accounts consists primarily of funds collected from state agencies, other participating groups, employees and retirees. These accounts consist primarily of pass-through funds to insurance carriers, third party administrators, and other vendors. In addition, the funds are used to pay workers' compensation claims and employee pre-taxed benefits programs.

The Insurance Division Non-Operating revenues and expenditures are provided in the table below. Excess revenues and investment earnings for the insurance program are applied to the respective program and work to hold down future increases. The differences between workers' compensation revenues and expenditures are due to administrative fees, and the timing of claims payments and various third party reimbursements. The WCRA expenditures consist of General Fund appropriations while the revenues are refunds generated by high rates of investment returns. Due to budget reductions, the WCRA 2002 premium was paid through DOER's operating budget.

| Insurance Division Non-Operating (Dollars in thousands) | FY 2001 Actual | | FY 2002 Actual | | FY 2003 Budgeted | |

EMPLOYEE RELATIONS DEPT

Program: EMPLOYEE INSURANCE DIVISION

Activity: EMPLOYEE ASSISTANCE PROGRAM

Narrative

Activity Description

The State Employee Assistance Program (EAP) provides state employees and their eligible dependents with counseling and consultation regarding personal, family and workplace problems that negatively affect employee performance and organizational effectiveness. EAP also provides consultation to state agencies regarding organizational change and performance management problems.

Population Served

EAP is available to serve all of state government's 54,000 employees, including the Minnesota Legislature and the State Judicial Branch.

Activity at a Glance

- ◆ Serves all 54,000 employees of state government's executive, legislative and judicial branches;
- ◆ 87% of EAP clients report that their work performance has been negatively affected by the problems that bring them to EAP; and
- ◆ Utilization of program services has steadily increased over the past 10 years.

Services Provided

- ⇒ Counseling for employees experiencing work-related problems such as deteriorating performance, harassment, stress-management problems, conflict with coworkers, critical incidents, and threats of violence.
- ⇒ In-person assessment and counseling (maximum of two sessions) for state employees and their dependents experiencing personal or work-related problems. These problems, which may impact the employee's ability to function at work, include relationship difficulties, mental health problems, eldercare issues, parenting problems, grief and loss issues, alcohol or drug abuse, domestic abuse, legal or financial problems.
- ⇒ Consultation to managers and supervisors regarding organizational change, performance management problems, workplace communication, critical incidents, workplace violence, harassment, and work group problems.

Historical Perspective

Recent studies show that depression and anxiety rank first in prevalence and second in cost to the state among the top ten health problems that generate state employee insurance benefit claims. Depression and anxiety, along with many other behavioral health problems contribute significantly to the state's indirect costs associated with absenteeism and lost productivity. By developing and implementing policies and programs designed to directly address depression, anxiety and behavioral health problems in the state employee population, EAP has been successful in helping to keep state government's workforce healthy and productive.

Key Measures

EAP's recent Service Outcome Survey demonstrates a positive correlation between the use of its services and improvement in job performance among its customers. The program measures its success in part by tracking increases in the use of EAP services.

- ⇒ The number of new clinical cases increased 16% over the last biennium.
- ⇒ The number of organizational cases increased by 27% from FY 1999 to FY 2002.
- ⇒ Since FY 1999, the number of employees participating in EAP's training and other organizational services grew from 4,821 to 7,318, an increase of nearly 52%.

Activity Funding

The state EAP has previously been funded by a General Fund appropriation, and has seen increased supplemental funding from DOER's Employee Insurance Division (as authorized by M.S. 43A.30, Subd. 5).

Agency Purpose

The Minnesota Office of Environmental Assistance (OEA) is a state agency that works in partnership with businesses, local governments, schools, community groups, and individual citizens to apply innovative approaches to Minnesota's environmental issues. The OEA works with its partners to solve environmental problems and to further the state's economic and social priorities in an environmentally sound manner.

Our mission is to help Minnesotans make informed decisions and take actions that conserve resources and prevent pollution and waste to benefit the environment, economy and society.

The Office of Environmental Assistance is an organization that:

- ◆ works together with Minnesotans to address significant issues affecting human health and the environment;
- ◆ is a leader in developing innovative solutions to environmental challenges;
- ◆ incorporates environmental, economic, and social values into our approach to environmental issues;
- ◆ delivers services to Minnesotans in partnership with local, state and federal government; businesses; communities; schools; nongovernmental organizations and citizens;
- ◆ evaluates and measures the results of our work; and
- ◆ is a flexible, learning organization focused on positive environmental outcomes.

At A Glance

- ◆ Minnesota's recycling programs save 22 million BTUs, enough energy to power nearly all the homes in Ramsey County for one year.
- ◆ Our recycling industry created over 8,700 jobs, provided nearly \$93 million in tax revenues, and added \$1.6 billion to the state's economy.
- ◆ OEA's Minnesota Technical Assistance Program (MnTAP) has helped businesses reduce toxic waste by over 11 million pounds, reduce water use by over 90 million gallons and save over \$5 million by adopting pollution prevention and conservation practices.
- ◆ OEA reaches thousands of Minnesotans with education and waste reduction campaigns.
- ◆ OEA leads multi-state efforts to create national recycling/reuse programs for used carpet and used electronics.
- ◆ Awarded over \$10 million in grants for innovative environmental projects.
- ◆ Awarded \$14 million annually in grants to counties to support local recycling programs.
- ◆ Awarded \$6 million in solid waste processing credits.
- ◆ OEA environmental education web site accessed daily by over 2,000 people.

Core Functions

OEA's core functions support our mission to assure that human activities do not harm the environment, that resources are used with maximum efficiency and are replenished, and that environmental values are integrated into our economic and social systems. OEA's strategic goals are:

- ⇒ Minnesotans reduce and prevent pollution and toxicity.
- ⇒ Minnesotans use materials, products, and services in a manner that conserves resources and minimizes waste generation.
- ⇒ Our society recognizes and strengthens the interconnections between the environment, the economy and social structures.
- ⇒ Minnesotans understand and minimize the adverse environmental impacts of their actions.

To achieve these goals, the OEA:

- ◆ works with partners to develop consensus approaches to achieving our environmental goals and objectives;
- ◆ provides financial incentives with grants and loans;
- ◆ provides technical assistance to advance implementation of environmentally beneficial processes and prototypes; and
- ◆ provides environmental education and information to help Minnesotans make their own best decisions when interacting with the environment.

Operations

The OEA works with businesses, local governments, schools, community groups, and individual citizens to improve the quality of our natural environment:

- ⇒ **OEA's Policy and Grants Unit** identifies emerging environmental issues and develops innovative policies and programs to address those issues. These programs, which benefit all Minnesotans, include product stewardship, resource conservation research, and the environmental assistance grant program.
- ⇒ **OEA's Business Assistance Unit** focusing on waste prevention and toxicity reduction, offers technical and financial assistance to businesses to help them prevent pollution by implementing innovative technology and manufacturing processes; and encourages consumers to purchase non-hazardous and non-toxic products.
- ⇒ **OEA's Project Assistance Unit** offers financial and technical assistance to businesses and local governments to implement programs and policies designed to conserve and recover resources and energy, and safely manage any remaining waste. This assistance is provided by developing markets for recyclables, helping to finance and develop solid waste processing facilities and giving solid waste technical assistance.
- ⇒ **OEA's Local Government Assistance Unit** works with Minnesota counties and cities to plan and develop waste management systems that maximize the reduction, recycling and reuse of waste, as well as provides information and assistance on environmentally responsible building construction and purchasing of supplies, materials and equipment.
- ⇒ **OEA's Environmental Education Unit** works with educators, local government officials, and citizens to develop environmental education programs and provide information on making good choices for the environment. It operates web sites and the Education Clearinghouse, holds events and workshops, and provides sustainable development assistance to communities.

Budget

The OEA's 2002 budget is an estimated \$30.3 million. There are 69 full-time equivalent positions.

Included in the 2002 budget is 67% of appropriated General Fund money, and 12% Environmental Fund money which is primarily received from metropolitan landfill abatement fees. An additional 20% comes from the Solid Waste Fund and an average of 1% from the federal government and other sources.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSISTANCE

Activity: RESEARCH, POLICY ANALYSIS, PLANNING, and EVAL

Narrative

Activity Description

The Office of Environmental Assistance's (OEA's) research, policy analysis, planning, and evaluation activities provide strategic direction to state and local pollution prevention, waste management, energy and resource conservation, and environmental education programs. OEA research and policy development supports the evolution and development of OEA's programs. The result is the creation of new ideas to enhance current social and economic systems and improve the environment, economy, and society.

Population Served

The OEA's research, policy analysis, planning, and evaluation activities benefit all of Minnesota's citizens. The OEA works in direct partnership with businesses, other units of governments, schools, community organizations, and individuals to serve the entire population of the state.

Historical Perspective

The OEA has evolved significantly over the past 20 years to meet new challenges facing Minnesotans and the environment. The environmental issues we are now facing are diverse and complex. Pollutants in our air, water, and land come from many sources and many human activities, and existing regulatory programs alone are not adequate to protect our health and natural resources. OEA has responded, under its existing authority in pollution prevention, environmental education, and sustainability as well as its solid waste authority, by developing new programs and ideas to address today's environmental issues. Minnesota's economic challenges along with the environmental priorities of its citizens, make OEA's efforts at innovative environmental solutions even more important today.

Services Provided

Pollution prevention (P2). The OEA works with other states, U.S. Environmental Protection Agency (EPA), U.S. Department of Energy (DOE), and the National Pollution Prevention Roundtable to assure that OEA's pollution prevention activities will influence and leverage regional and national opportunities. For instance, OEA is helping to sponsor the first regional DOE Hydrogen Infrastructure Forum, which will be held in Chicago in the fall of 2002. To maximize our P2 program effectiveness, OEA surveys Minnesota manufacturers to determine evolving needs. Every even-numbered year, the OEA evaluates progress and opportunities in pollution prevention and submits a report to the legislature. The *2002 Pollution Prevention Evaluation Report* evaluates toxic release inventory, persistent bioaccumulative toxics, pesticide and greenhouse gas data to document progress in P2 and to direct future OEA P2 policy and programs.

Product stewardship. Seeking new ways to handle problem materials while also conserving energy and resources, OEA adopted the nation's first product stewardship policy in 1999. Product stewardship means all parties who have a role in designing, producing, selling or using a product shall assume responsibility for the environmental impacts of that product throughout its life. It shifts responsibility for the management and recycling of products from the public sector (government and taxpayers) to the private sector (manufacturers and purchasers). Under this voluntary, non-regulatory framework, the OEA works with manufacturers, retailers, recyclers, non-governmental organizations, and others to establish programs to collect and recycle products, thus diverting them from landfills and incinerators while conserving resources and reducing pollutants in the manufacturing process. OEA's major achievements to date are with used electronics and carpet.

The OEA will continue to lead national efforts and develop partnerships with other types of manufacturers to ensure that materials currently being managed as waste can be converted into resources that have economic value, including new national product stewardship initiatives for beverage containers, automobiles, and paint. The OEA is also working with the states of Massachusetts, California, Oregon, New York, and Florida to develop a national policy on product stewardship.

Activity at a Glance

- ◆ In January 2002, the OEA along with nine other states and U.S. EPA signed a landmark agreement with the carpet industry that establishes national recycling goals for discarded carpet.
- ◆ As a result of product stewardship efforts, Amazon Environmental, Inc., a paint rebblender and manufacturer, established a facility in Roseville, Minnesota in 1999.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSISTANCE

Activity: RESEARCH, POLICY ANALYSIS, PLANNING, and EVAL

Narrative

Waste as a resource. The OEA is committed to advancing a policy that treats waste as a resource. A multi-discipline technical work group mapped the complexities of the solid waste system and identified possible strategies that could be adopted to accomplish this goal. A Governor's Select Committee, comprised of the environmental leadership from the house and senate and other elected or appointed officials, is in the second phase of meetings to develop and recommend strategies to improve Minnesota's waste management system while reducing the environmental impacts of manufacturing products through life cycle management.

County waste management planning. Over the past 15 years, county waste management plans have changed solid waste management practices throughout the state. OEA's partnerships with local units of government, manufacturers and businesses, educators, and individual citizens have implemented an integrated system of solid waste management. OEA works directly with local government to prepare solid waste plans that guide the implementation of local and regional programs for solid waste reduction, recycling, processing, yard waste management, problem materials management, and construction and demolition materials management. Local governments, the waste industry, commercial and industrial enterprises, and the public all actively participate in formulating and implementing these plans. The plans serve as the foundation for the technical assistance offered by many OEA staff and emphasize building strong regional waste management systems.

Resource savings and greenhouse gas research. The OEA continues its research on ways to reduce waste, conserve energy, and avoid land use and air emissions. Preliminary results show that between the years 2000 and 2020, 16 to 26 million tons of greenhouse gases and 340,000 tons of sulfur dioxide emissions can be avoided and 1,000 acres of land (the equivalent of 10 major new landfills) can be saved as a result of managing our wastes according to state policy.

OEA program evaluation. In 1997, OEA established program priorities and began using a performance measurement system to track progress. Performance measurement allows the organization to gather input from stakeholders and employees, establish strategic program directions, and focus on priorities and results. This system allows for outcome-based budgeting and makes our strategic plan a living document.

Partnerships. The OEA partners with various levels of local, state, and federal government, nonprofit organizations, national and local businesses, environmental organizations, and citizens to accomplish its objectives. Three primary advisory bodies offer input and advice on OEA's policies and programs: the Prevention, Reduction and Recycling Advisory Council (PRRAC), Environmental Educational Advisory Board (EEAB), and the Solid Waste Management Advisory Council (SWMAC).

OEA partners with over 2,000 members of the Minnesota Sustainable Communities Network to promote and share resources on sustainable issues such as energy and resource conservation, as well as sponsoring an annual conference. OEA also works closely with the Department of Children, Families and Learning, the National State Education and Environment Roundtable, and 24 Minnesota schools who will combine best practices into a comprehensive educational framework that address content standards from multiple disciplines.

Key Measures

Midwestern Carpet Workgroup. In February 2000, OEA convened the Midwestern Carpet Workgroup, which includes the states of Minnesota, Iowa, and Wisconsin; carpet manufacturers; retailers; recyclers; local governments; and environmental representatives. In January 2002, the OEA along with nine other states and U.S. EPA signed a landmark agreement with the carpet industry to establish national recycling goals for discarded carpet. The states, with input from the carpet industry, also developed model procurement guidelines so that carpet purchasers can specify environmentally preferable carpeting. Minnesota is in the process of working with industry to implement the agreement, which will result not only in the reduction of carpet waste, but the development of new sustainable industry initiatives in Minnesota.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSISTANCE

Activity: RESEARCH, POLICY ANALYSIS, PLANNING, and EVAL

Narrative

National Electronics Product Stewardship Initiative (NEPSI). OEA's partnerships and projects with electronics manufacturers over the last three years helped lay the groundwork for the National Electronics Product Stewardship Initiative. NEPSI is a series of meetings involving electronics manufacturers, Minnesota and 10 other states, the federal government, and national environmental organizations. The purpose of the dialogue is to reach agreement on a national system for collecting, reusing, and recycling electronics such as TVs and computers, and on how that system will be financed. Negotiations are continuing into the fall of 2002.

Activity Funding

This activity is funded primarily from General Fund dollars.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSISTANCE

Activity: PROJECT IMPLEMENTATION

Narrative

Activity Description

The Office of Environmental Assistance (OEA) works with counties, cities, businesses, institutions, schools, and the public to implement activities and policies which:

- ◆ prevent air, land and water pollution, as well as waste.
- ◆ modify product design and manufacturing processes to have minimal impact on the environment.
- ◆ procure products, services, and materials that have the least environmental impact.
- ◆ recover materials and energy from waste through waste management systems that protect the environment and conserve resources.
- ◆ include community environmental considerations in economic and social decision making.

The OEA creates strong partnerships with public and private interests and provides technical expertise and financial incentives that otherwise would not be available to support sound environmental and economic policies.

Population Served

The OEA helps communities of all sizes, businesses and institutions, educators, and the general public implement policies and programs that protect the environment, conserve resources, and are cost-effective.

Services Provided

OEA's program implementation activities design and implement new system ideas, approaches, and technologies. On a strategic level, OEA's implementation program takes creative policy ideas from the conceptual to the tangible. OEA prioritizes assistance to manufacturing, commercial, and institutional sectors based on amounts and types of pollutants and/or waste they generate and the opportunities available to reduce those pollutants and/or wastes. OEA works to promote the use of least harmful products, prioritizing our efforts based on potential for risk and the availability of less-toxic alternatives. OEA partners with businesses, local governments, and communities to develop efficient materials and energy recovery systems for products that have reached the end of their useful lives.

Technical assistance activities

Pollution prevention (P2). Pollution prevention reduces the use and release of pollutants (both air and water) as well as waste and toxic chemicals at their source. Technical assistance currently focuses on increasing the use of P2 technologies in manufacturing, promoting products which are low or nontoxic, and piloting the use of a residential fuel cell. Over the last two years, OEA's Minnesota Technical Assistance Program (MnTAP) has saved businesses more than \$2 for every \$1 spent on the program, as well as reducing air emissions and water discharges.

Design for the Environment (DfE). Approximately 70% of a product's life-cycle costs are determined during its design. OEA provides on-site assistance for DfE and will continue to partner with manufacturers to implement specific projects that change the business designs and develops products. OEA's DfE program recently partnered with a company to make design changes which will save \$4 million per year in life-cycle costs.

Market development. The OEA works directly with businesses to develop manufacturing capacity for recyclable materials. OEA provides technical assistance in areas such as business development, recycled product development, and market research. This effort has contributed to the establishment of thousands of jobs in

Activity at a Glance

- ◆ Minnesota's recycling programs save 22 million BTUs, enough energy to power nearly all the homes in Ramsey County for one year.
- ◆ OEA's DfE Tool Kit was downloaded more than 9,000 times from the web site in 2001.
- ◆ OEA's MnTAP program saved Minnesota businesses over \$5.2 million, while eliminating 11.2 million pounds of air emissions, water discharges, and solid waste, and saving 90 million gallons of fresh water.
- ◆ In 2001, the OEA conducted a junk mail waste reduction campaign. Over 10,000 people filled out junk mail cards at the State Fair, and over 10,725 people downloaded the postcard from the web site. As a result, OEA estimates that over 1,400 trees were saved by diverting unwanted mail.
- ◆ OEA distributed over 30,000 brochures for its "Reducing Toxicity in Your Home" campaign, which provides information on how to reduce long-term exposure to potentially harmful substances. Toxicity reduction information continues to be disseminated at state and county fairs and events, presentations to organizations, expositions, and conferences.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSISTANCE

Activity: PROJECT IMPLEMENTATION

Narrative

recycling and collection industries, as well as industries that use recycled feedstock, bringing in an estimated \$35 million in tax revenues within the state.

Green buildings. OEA's Green Building program provides schools and state and local government with information on how to incorporate reduced toxicity, recycled content, reusable materials, and energy conservation into building design and construction. Green building continues to gain support in Minnesota as a more economically efficient, healthy, and environmentally friendly approach to building design and construction.

Waste reduction. Over the last three years, the OEA has worked with local governments, businesses, and consumers to increase waste reduction through the statewide campaign – *Reduce Waste: If not you, who?*

Purchasing. Recognizing state government's tremendous purchasing power and the influence it can have on what products are produced, the OEA and the Department of Administration have teamed up to promote the purchase of goods and services that have a reduced effect on human health and the environment. OEA is now routinely involved in adding environmental products to state purchasing contracts and educating agencies about new products.

Minnesota is the only state in the country to specify that all waste electronic materials generated by public entities, and managed under the state contract, shall be processed, used, reused, reclaimed, or disposed of only in Canada, Mexico, or the United States, not overseas.

Assistance to counties. OEA's technical assistance priorities for counties include implementing methods to reduce waste generation; improving the cost-effectiveness of recycling, composting, and recovery systems; expanding the public's understanding of resource conservation and environmental protection; and building stronger regional waste management systems. County solid waste plans serve as the foundation for these technical assistance priorities.

Financial assistance strategies

Competitive grant awards. Since 1985, the OEA has awarded more than \$10 million in grants to businesses, public entities, nonprofit organizations, schools, and others throughout Minnesota. From October 1999 to July 2000, OEA provided \$1.35 million to 28 projects, leveraging nearly \$1.5 million in matching funds. The program emphasizes environmental education, pollution prevention, waste reduction and reuse, source separation, recycling and market development of recyclables, and resource conservation.

Capital Assistance Grant Program (CAP). The OEA reviews and approves grants for integrated waste management facilities under the Solid Waste Processing Facilities Capital Assistance Grant Program. The state has funded 89 grants totaling \$46.6 million and has leveraged \$108 million in local contributions for the development of Minnesota's waste management infrastructure.

County assistance. The OEA provides financial assistance to counties through SCORE (Select Committee on Recycling and the Environment) grants and through the Metropolitan Landfill Abatement Account's Local Recycling Development Grant program to support and expand services to prevent waste generation, foster reuse of materials, and expand recycling. These programs contribute significantly to Minnesota's high recycling rate.

Key Measures

Procurement. OEA worked with the Department of Administration to include mercury component disclosure or phase-out requirements in the 2002 motor vehicle request for bids. In the summer of 2000, the OEA helped establish state contracts for recycled-content latex paint and for flooring. The flooring contracts set air quality standards for carpet, require vendors to recycle old carpet, and encourage vendors to bid carpet, tile, and rubber flooring made with recycled materials.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSIST

Activity: PROJECT IMPLEMENTATION

Narrative

Recycling. The state's recycling rate of 47% is the second highest in the country, fostering a recycling industry that added over 22,100 jobs (this includes direct, indirect, and induced jobs) and over \$2.74 billion in gross economic activity to Minnesota's economy in 2000. Over 20% of Minnesota waste is sent to resource recovery facilities, one of the highest rates in the nation; and a significant percentage of yard waste is composted.

Pollution Prevention. Since 1993, the amount of reported toxic chemicals released in Minnesota has decreased by 34% from 24 million to 16 million pounds.

Activity Funding

This program is funded primarily through the General Fund and environmental funds.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSIST

Activity: EDUCATION AND INFORMATION

Narrative

Activity Description

Office of Environmental Assistance's (OEA's) education efforts are key to assuring that Minnesotans have accurate and up-to-date information to understand and minimize the environmental impacts of their actions. Through its educational activities, the OEA can advance pollution prevention activities, modify the current waste management system, and encourage Minnesotans to practice resource conservation behaviors, as well as help them see the environmental, economic, and social connections of their activities.

Population Served

The OEA's education activities primarily serve educators, educational institutions, agencies, and organizations working to deliver environmental and sustainability information. Sustainability means meeting our needs today while ensuring that future generations can continue to meet their own needs, thereby ensuring that Minnesota can maintain its long-term cultural, economic, and ecologic health and vitality. Other educational activities of the OEA are focused on local governments, businesses, nonprofit organizations, and citizens.

Services Provided

The OEA educates Minnesotans through skill-building workshops, partnerships, communication and outreach efforts, and financial and educational resources. OEA focuses on developing effective leaders and educators who can implement environmental education programs at both the state and local levels. These education activities promote and support OEA's policy, planning, and program implementation efforts by researching and developing educational programs and tools, including interactive web sites, listservs, fact sheets, reports, directories, and videotapes.

The OEA continues to implement the *GreenPrint for Minnesota, Second Edition: State Plan for Environmental Education*, which offers guidance to individuals, organizations, and agencies that deliver or support environmental education (EE) in Minnesota. The *GreenPrint* is designed to foster and expand partnerships to produce and provide EE programs and materials to Minnesota citizens. Implementation of the *GreenPrint* will provide Minnesotans with the knowledge and skills they need to become active and engaged citizens who can help keep our communities healthy and vital.

Skill building. The OEA conducts monthly environmental education workshops which provide fundamental educational skills for scientists, technical specialists, and researchers and up-to-date education tools for the trained educators seeking assistance in honing their skills. Regional staff in Greater Minnesota provide local access to OEA's resources and workshops. These venues provide an interactive means of reaching OEA audiences and developing community networks for program implementation. One-on-one assistance is a critical component in improving Minnesotans' skills, especially in working on innovative sustainability issues. The OEA's NextStep web site and sustainable communities e-mail newsletter also disseminate important information and help to build skills for those interested in sustainability.

Partnerships. The OEA facilitates various education-based programming and partnerships statewide. OEA partners with a variety of organizations to provide an annual sustainability conference that participants have evaluated as an ideal event for acquiring sustainability skills and information. The Minnesota Sustainable Communities Network (MnSCN) and the Environmental Education Advisory Board (EEAB) are two forums the OEA works with to reach the citizens of Minnesota.

Activity at a Glance

- ♦ The OEA now has six regional offices to serve Greater Minnesota.
- ♦ In 2000, Clearinghouse staff provided information and resources to over 1,500 people in Minnesota.
- ♦ OEA's environmental education web site, SEEK, currently has 120 partners, including environmental and education organizations and agencies that post their resources on this interactive web site.
- ♦ Over 600 people representing state, local and federal government, nonprofits, business, consultants, and educators have participated in the OEA's capacity building workshops.
- ♦ The OEA's sustainable communities educational activities are well received, with an e-mail newsletter reaching over 2,000 and thousands of hits for the NextStep web site each month.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSIST

Activity: EDUCATION AND INFORMATION

Narrative

Communication. Waste Reduction Campaign's web site (<http://www.reduce.org>) is an online source for Minnesotans who want to know more about preventing garbage and reducing what they throw away. MnTAP (<http://www.mntap.umn.edu>) provides technical assistance to businesses, including information about its intern programs, a materials exchange program, etc. SEEK (Sharing Environmental Education Knowledge), Minnesota's interactive directory of EE resources for educators can be found at <http://www.seek.state.mn.us>. Two OEA e-mail newsletters offer information and resources, the SEEK Bulletin for environmental education and the MnSCN newsletter for sustainability resources, together serving over 2,500 subscribers. The OEA also distributes information at key conferences and events, including the State Fair and the Living Green Expo, and regular sustainable communities conferences.

Educational resources. OEA's Clearinghouse offers a wealth of hands-on resources, including one-on-one guidance, videos, fact sheets, curricula, and CD ROMs. The Clearinghouse provides resources to businesses, citizen and youth groups, families, governments and nonprofit organizations, students, teachers and nonformal educators, and religious groups. OEA also reaches Minnesotans via the Internet through its up-to-date and informative web sites. OEA's web site (<http://www.moea.state.mn.us>) offers resources for learning more about pollution prevention, reuse, recycling, responsible waste management, and sustainable practices. OEA's NextStep web site (<http://www.nextstep.state.mn.us>) which offers resources for finding and sharing information on sustainability. Grants are another tool the OEA uses to support educational activities. Many projects, programs and resources would not have been developed without grant assistance. From waste minimization programs on college campuses to environmental literacy research, these grants have made a difference

Key Measures

Monthly EE Capacity Building Workshops. Over 600 people representing state, local and federal government, nonprofits, business, consultants, and educators have participated in these workshops, with many return participants. Recent workshops have included Facilitation Processes, the Environmental Literacy Scope and Sequence, Credibility, Educating the Whole Person, Team Building, and Leadership Skills.

Environmental Literacy Scope and Sequence is a tool for educators that provides a systems approach to environmental education in Minnesota for pre-K through adult learners. It describes key concepts about the interaction of natural and social systems and a sequence in which they are to be taught. It provides a systems approach to environmental education that can focus the efforts of teachers and deliverers of environmental education to unify their many independent efforts to achieve the goal of environmental literacy. The OEA worked with the Department of Children, Families and Learning and the GreenPrint Council in the development of the Scope and Sequence, along with the workshops for environmental educators to learn it how to use it.

Environment as an Integrating Context for Learning (EIC). In partnership with the Department of Children, Families and Learning and the National State Education and Environment Roundtable (SEER), the OEA has worked with approximately 24 Minnesota schools that will focus on combining best practices into a comprehensive education framework that simultaneously addresses content standards from multiple disciplines. In essence, we have doubled the number of EIC schools in 4 years. EIC uses the school's natural and socio-cultural settings to engage students in schoolwork that they perceive as relevant to their daily lives, thus increasing their motivation for learning and academic achievement.

Sustainable communities education. The OEA has hosted well-attended sustainability events for the past seven years, with more than 600 people registered at the 2001 annual sustainability conference. The Minnesota Sustainable Communities Network's bi-weekly e-mail newsletter is received by over 2,000 individuals, and the NextStep web site receives thousands of hits every month. The last bi-annual survey of newsletter readers showed that 98% of readers found it very or somewhat valuable, and that 88% of readers found the information of such value that they forwarded it to others.

Activity Funding

This activity is primarily funded from the General Fund.

ENVIRONMENTAL ASSISTANCE

Program: OFFICE OF ENVIRONMENTAL ASSIST

Activity: SUPPORT SERVICES

Narrative

Activity Description

Office of Environmental Assistance (OEA) support services encompass management and clerical support, fiscal services, personnel and payroll, purchasing, computer services, and budgeting functions.

Population Served

OEA management provides leadership, expertise, and coordination of programs to staff and customers. Support services provide financial, personnel, computer, and clerical assistance to OEA staff and others.

Services Provided

Implementation of the OEA Strategic Plan allows management to focus on priorities, track and evaluate program implementation, and strategically allocate resources. OEA's support services:

- ◆ encourage and assist staff to follow OEA's core values;
- ◆ develop behavior models for staff to use when dealing with each other and with customers;
- ◆ assist staff, the public, and other customers in the most efficient and cost-effective manner possible;
- ◆ contract with Bemidji State University, the Minnesota Pollution Control Agency, and the Department of Natural Resources who provide regional office space and assistance, personnel services, and employee safety support;
- ◆ ensure that OEA's computer network is operational and available to staff;
- ◆ provide in-house computer software training to staff; and
- ◆ provide financial oversight to assure that taxpayer resources are protected and used in a responsible manner.

Key Measures

- ⇒ OEA has received exemplary audit reports from the Legislative Auditor's Office. The audits covered all policies, processes, and related control procedures.
- ⇒ OEA's local-area computer network continues to function optimally and is available for use 99% of annual hours. Downtime is on evenings or weekends.
- ⇒ OEA's prompt-payment record is 99.78% for FY 2002.

Activity Funding

Financing for OEA's support services is provided by the General Fund. Expenditures under this activity account for 4% of total spending and include salaries for 11 positions, a portion of building rent, and other office-wide expenditures not allocated directly to program activities.

Contact

David Benke, Strategic Directions Manager, (651) 215-0196. For further information about the OEA's activities and recent reports, visit OEA's web site at www.moea.state.mn.us.

Activity at a Glance

- ◆ OEA's local-area computer network continues to function optimally and is available for use over 99% of annual hours. Downtime is limited to evenings or weekends.
- ◆ OEA's prompt-payment record is 99.78% for FY 2002.
- ◆ OEA has received exemplary audit reports from the Legislative Auditor's Office. The audits covered all policies, processes, and related control procedures.

Agency Purpose

Minnesota statutes provide the Department of Finance responsibility for “*managing the financial affairs of the state.*” Given this charge, the mission of the department is twofold: to ensure the integrity of state fiscal resources, and to support and challenge state decision-makers to constantly increase the value per dollar of services provided to Minnesotans.

These objectives span all department activities:

- ◆ ensure the integrity of the state's financial resources;
- ◆ provide statewide governmental financial management leadership;
- ◆ accurately present the state's financial condition;
- ◆ facilitate informed decision making; and
- ◆ improve accountability and promote the prudent use of state resources.

Core Functions

The Department of Finance provides central statewide direction to financial management processes. This direction ensures adherence to standards, continuity, legal compliance, and financial integrity. Core functions support the policy making process and the financial management of state government. Core functions are:

- ◆ managing state financial processes and systems;
- ◆ providing historical and projected financial and program information; and
- ◆ providing financial analysis.

The results of these core functions are:

- ◆ financial and analytical information that is consistent, accurate, reliable, and useful;
- ◆ financial business processes that are cost effective and flexible;
- ◆ financial and program information that are accessible to managers and the public; and
- ◆ state employees that are trained and informed in state financial business practices.

Operations

State employees, vendors, individuals, school districts, and local governments receive payments through the accounting, payroll, procurement, and human resources business processes and systems managed for daily operations. The biennial budget, capital budget, fiscal notes, annual spending plans, and performance reporting are other key systems managed by the department.

The information management and analysis functions provide information to state agencies, the governor and executive branch management, the legislature and its staff, governmental and non-governmental organizations, the media, and the public.

Economic Analysis prepares the financial forecasts that identify projected state revenues and expenditures based on current law for the current biennium and future biennia.

Budget Services coordinates the production of the governor's operating and capital budgets and assists legislative committees in their deliberations. It also prepares reports, coordinates fiscal notes, and advises agencies.

Once the budget is passed, **Accounting Services** helps agencies manage their financial activities, administers the accounting and payroll systems, and reports on the state's financial condition.

At A Glance

Annual Business Processes:

- ◆ Accounting and budget management for the state's \$43 billion two-year budget including the \$27 billion general fund
- ◆ 140 state agencies provided financial direction and control
- ◆ 47,500 employees paid bi-weekly
- ◆ 120 separate state funds are managed through 14,000 separate accounts
- ◆ 4.5 million expenditure transactions
- ◆ 833,000 cash deposits
- ◆ 1.4 million checks issued
- ◆ 670,000 purchase orders processed
- ◆ Two bond sales conducted annually, with nearly \$3 billion in outstanding general obligation debt

Cash and Debt Management establishes banking services for state agencies, accesses the capital markets to provide financing for capital projects and equipment, and administers the state's tax exempt bonding allocation law.

Information Services provides technical support for the state's administrative information systems, which include the accounting and procurement system, the payroll and human resources system, and the information access system.

Management Services provides human resources and administrative support for the department and includes the agency leadership and staff in the Commissioner's Office.

Budget

The department's FY 2002-03 biennial budget totals \$48 million. Department staff includes 167 employees.

Of the total budget for the biennium, 65% comes from General Fund dollars. Another 31% is collected from state agencies through statutory billing authority that is based on the volume of transactions they generate in the accounting and payroll systems. The remaining 4% is the balance from a four-year FY 2000 appropriation to upgrade the statewide human resources and payroll systems. This includes funding for six project employees.

Program Description

The State Financial Management program provides the direct financial management services to support state operations. Operations include accounting, budget, cash and debt management, economic analysis, financial reporting and analysis, and payroll.

Population Served

The Statewide Financial Management program provides services to state agencies, the governor and executive branch management, the legislature and its staff, governmental and non-governmental organizations, the media, and the public.

State employees, vendors, individuals, school districts, and local units of government receive payments through the statewide accounting, procurement, and payroll systems.

Services Provided

Accounting Services:

- ◆ sets statewide accounting and payroll policies and procedures;
- ◆ directs and maintains integrity of the accounting and payroll systems;
- ◆ provides training and assistance to agencies on the state's financial systems;
- ◆ works with agencies to develop systems of internal controls, as well as monitoring compliance and integrity of internal controls;
- ◆ produces the state's Comprehensive Annual Financial Report (CAFR); and
- ◆ coordinates of state agency Accounts Receivable.

Budget Services:

- ◆ manages the state budget process;
- ◆ prepares and submits the governor's operating and capital budgets;
- ◆ coordinates financial forecasts and develops financial reports and analysis;
- ◆ provides oversight and monitoring of budget implementation to agencies; and
- ◆ provides financial information and analysis of state spending to the governor and legislature.

Economic Analysis:

- ◆ prepares Minnesota's economic outlook and forecasts major revenues (income, sales, motor vehicle sales, corporate income).

Cash and Debt Management:

- ◆ administers the state's tax exempt bonding allocation law;
- ◆ is responsible for establishment of all state depository bank accounts;
- ◆ manages actual sale of state general obligation bonds to finance capital projects; and
- ◆ manages the state's debt policies and provides debt capacity forecasting.

Historical Perspective

These functions have existed since the agency was created in 1973 to consolidate and modernize the financial management functions of state government. By statute, the commissioner is the state's controller and chief accounting and financial officer. The commissioner fulfills statutory responsibility for the state's accounting, payroll, financial reporting, budgeting, forecasting, and debt management functions through the State Financial Management program.

Program at a Glance

- ◆ Prepares governor's operating and capital budgets.
- ◆ Produces two forecasts annually.
- ◆ Issues state general obligation debt.
- ◆ Provides direction and control of statewide accounting and payroll functions.
- ◆ Produces Minnesota's financial statements.

The program remained relatively unchanged until the mid 1990s when the major statewide administrative systems were replaced. The data processing systems for accounting, procurement, payroll, and human resources were updated to provide better access to financial management information. At that time, staffing increased to manage the more complex systems.

Program funding is 100% a general fund direct appropriation. Compensations costs represent 89% of program expenditures, supporting 89 FTEs.

Increasing salary costs are attributed to general inflation and the competitive labor market for experienced and highly skilled employees. The core functions of the Department of Finance, such as setting statewide financial management standards, regulating state financial operations, and providing quality budget and financial policy analysis, cannot be performed adequately with entry-level staff.

Budget reductions in the current biennium resulted in 9.5 positions eliminated or held vacant, and reductions in excess of \$720,000 in non-salary expenditures through business process changes. An additional four functional positions will end in FY 2003, which were funded from a one-time appropriation to upgrade the Human Resources and Payroll System.

Key Measures

Respected organizations say that the state is fiscally well managed.

- ⇒ Continue to receive the Certificate of Achievement for Excellence in Financial Reporting from the Government Finance Officers Association. The department has received this award annually for the last 17 years.
- ⇒ Unqualified audit opinion from the Legislative Auditor for the past 18 years.
- ⇒ State bonds rated AAA by Moody's, Standard & Poor's, and Fitch's bond rating services since 1997.
- ⇒ State financial management rated A- by *Governing Magazine* (February 2001).
- ⇒ State capital management rated B+ by *Governing Magazine* (February 2001).

Program Description

The Information and Management Services program consists of the commissioner's office and the administrative services division, which provides technical staff responsible for the design, maintenance, and operation of the statewide administrative systems, statewide budget systems, computer network, and web services. This program is also responsible for human resources, accounting, budget, and general support.

Population Served

The information management and analysis functions provide information to state agencies, the Governor and executive branch management, the legislature and its staff, governmental and non-governmental organizations, the media, and the public.

State employees, vendors, individuals, school districts, and local governments receive payments through the accounting, payroll, procurement, and human resources information systems.

Services Provided

- ⇒ Manages the computer software applications that provide the state's accounting and procurement functions (MAPS), human resources and payroll processes (SEMA 4), and statewide budget planning (BIS).
- ⇒ Manages the state's information access data warehouse (IA) that provides access to detailed statewide accounting, procurement, payroll, and human resources data used by agencies for operations, analysis, and reporting.
- ⇒ Manages the Department of Finance's computer network, infrastructure, security, desktop computers, and web services.
- ⇒ Manages the internal accounting, payroll, human resources, clerical support services, and office management for the department.

Historical Perspective

The program has been and will continue to be engaged in keeping statewide systems secure and technologically current while providing ongoing improvements and additional electronic government services.

In 1988, Statewide Systems Project (SSP) planning began, and the Statewide Administrative Systems (MAPS, SEMA4, and IA Data Warehouse) were fully implemented in 1995. The 1988 needs assessment identified that the accounting, procurement, and payroll systems were over 15 years old, lacked critical functionality, and deficiencies had led to development of duplicative stand-alone systems in agencies. In addition, there was no automated system for Human Resources, and no central repository of timely data existed for agency use. The systems implemented in 1995 supported statewide processing of payroll and HR transactions, payment of bills, and ad hoc reporting. The last MAPS upgrade was completed in November 1998 and moved us to a Year 2000-compliant version of the software.

Over the past seven years, the value of these systems has consistently increased. Today, they provide financial information management through technological enhancements such as the Enterprise Management Reporting System (EMRS), Electronic Funds Transfer (EFT), MAPS Vendor Payments Web Site, and On-line Paycheck/Advice system. Use of the data warehouse has significantly grown, and it provides agencies with both ad hoc and operational reporting capabilities. The warehouse will continue to play a key role in delivery of information to its wide customer base as the program strategically moves away from mainframe-based reporting.

Program at a Glance

- ◆ Provides services and support to 6,625 Statewide Administrative Systems Users: MAPS 2,833; SEMA4 2,116; IA Data Warehouse 1,676.
- ◆ Manages the department's web site: An average of 500,000 pages are viewed per month.
- ◆ Provides a secure computer environment for Statewide Administrative Systems applications and the department's internal computer environment.
- ◆ Responsible for internal agency operations, including human resources, accounting, budget, and general support.

A SEMA4 technical upgrade project was completed on time and within budget in March 2001. This upgrade moved us to a supported version of the software (version 7.5) and kept the system compatible with other software and systems running within the state's system enterprise. The project was funded in 1999 through a four-year legislative appropriation in the amount of \$6,839,000.

In 2001 the departments of Finance and Employee Relations began a second phase of the upgrade project called SEMA4 Upgrade Phase II. This project involves the upgrade of the statewide SEMA4 HR and Payroll application, reduction of the amount of customizations the state has made to the base product from the vendor, and the addition of the benefits administration application. This upgrade will move the state from PeopleSoft software version 7.5 to version 8.3. The planned implementation date is in the spring of 2003.

Budget reductions in the current biennium resulted in 2.2 positions eliminated or held vacant, and expenditure reductions in excess of \$2.9 million in business processes, professional/technical contracts and technological changes made to statewide systems operations and services. Reductions in the SEMA 4 upgrade project will result in \$1.4 million in one-time savings in addition to the \$2.9 million saved in the operating budget. An additional two technical positions will end in 2003, which were funded with one-time appropriations to upgrade and support the HR and Payroll systems.

Key Measures

⇒ Percentage of users "Satisfied" or "Very Satisfied" with the statewide administrative systems.

Percentage of users "Satisfied" or "Very Satisfied" with the statewide administrative systems.

User Survey Note: To enable us to make comparisons to earlier surveys, we found it necessary to recalculate percentage by removing the uncertain/no change figures, as they were not an option in the 1999 survey. Please take this information into consideration when referring back to previous survey statistics.

⇒ Percentage of scheduled time that systems are available.

Percentage of scheduled time that systems are available.

Program Description

By statute, the Department of Finance manages several special statewide accounts that are not a part of its day-to-day operation. As a group, these accounts are referred to as Non-Operating accounts. These accounts deal with a broad range of subjects from higher education, to local pensions, to debt service, to tort claims, to general contingency accounts. This narrative will focus on three of the Non-Operating accounts traditionally addressed in the budget documents: Contingent Accounts, Tort Claims and Debt Service.

These accounts are not reflected in the agency wide financial summary presented earlier.

Services Provided, and Program Funding

Contingent Accounts: Contingent accounts are appropriations made from several state funds to provide supplemental funding for emergencies and other legally authorized purposes. The release and expenditure of this funding requires the approval of the governor after consultation with the Legislative Advisory Commission (LAC). The LAC provides legislative review of the use of these funds during interim periods when the legislature is not in session. With the approval of the governor, supplemental funding for specific purposes is transferred to individual agency budgets; thus, expenditure history appears in the affected agency's budget. As a result of Laws 2002, Chapter 220, the original general fund appropriation was reduced by \$2.6 million for FY 2002 and by \$3.0 million for FY 2003.

Tort Claims: This account pays tort claim judgments against a state agency that cannot be paid from that agency's appropriated accounts. As specified in M.S. 3.736, subd., 7, "a state agency, including an entity defined as part of the state in Section 3.732, subd. 1, incurring a tort claim judgment or settlement obligation shall seek approval to make payment by submitting a written request to the commissioner of Finance. If the commissioner of Finance determines that the agency has sufficient money in its appropriation accounts, the claim will be paid from these accounts. Otherwise, the payment will be made from the appropriation made to the commissioner of Finance for tort claim payments." As a result of Laws 2002, Chapter 220, the original general fund appropriation was reduced by \$114,000 for FY 2003.

| FUND (Dollars in Thousands) | FY 2001 | | FY 2002 | | FY 2003 |
|--------------------------------|------------------|------------|------------|------------|------------|
| | Appr | Spent | Appr | Spent | Orig Appr |
| General Fund | 275 ¹ | 435 | 275 | 145 | 275 |
| General Fund Highway | 600 | 420 | 0 | 0 | 0 |
| Trunk Highway (270) | 0 | 0 | 600 | 90 | 600 |
| Total All Funds | 875 | 855 | 875 | 235 | 875 |

Indirect Costs: Under M.S. 16A.127, state agencies operating activities with non-general funds (primarily federal) are obligated to prepare an agency wide cost allocation plan and submit it to their cognizant federal agency for approval. This plan must include agency indirect costs, which are administrative support costs that are not directly charged to a specific program. Agencies are required to reimburse the general fund for any portion of these costs that were originally funded by the general fund and that were used to support non-general fund activities. In addition, these non-general fund activities also rely on support from some of the centralized statewide systems financed by the general fund. The non-general fund activities must also reimburse the general fund for these statewide indirect costs. The commissioner of Finance prepares a plan each year that identifies

¹ Balance forward from FY00 covered additional expenditure.

FINANCE DEPT**Program NON-OPERATING ACCOUNTS****Narrative**

the sources and amounts of each agency's statewide indirect costs. The commissioner submits this plan to the cognizant federal agencies for approval, and provides copies to the governor and legislature. The commissioner also records all of the agency and statewide indirect cost reimbursements to the general fund.

Debt Service: This account pays principal and interest on general obligation long-term debt. On December 1 of each year, the commissioner of Finance must transfer to the Debt Service Fund an amount sufficient (with balance on hand and interest income) to pay all principal and interest on bonds due in the following 19 months. The Minnesota Constitution requires the State Auditor to annually levy a statewide property tax sufficient to pay debt service through this 19-month period. Historically, the legislature has made specific debt service appropriations to the commissioner of Finance in order to eliminate the need for levying the statewide property tax. Debt service appropriations are broken down into two categories: existing debt and new issues.

Agency Purpose

The Gambling Control Board regulates lawful gambling in Minnesota, so that citizens are assured of the integrity of the industry and non-profit organizations may continue to raise funds for charitable contributions.

Core Functions

The Gambling Control Board has the power to issue, suspend, and revoke licenses. Additionally, the board conducts periodic audits and compliance reviews involving over 3,000 charitable gambling sites in Minnesota. The audits and reviews help ensure the integrity of operations and accountability of an estimated \$1.4 billion in annual gross receipts. Training and education is provided to licensed organizations affecting over 24,000 registered employees.

Operations

The board is comprised of seven citizens and supported by 30 staff. It provides education, outreach, and guidance to the lawful gambling industry through:

- ◆ compliance reviews and site inspections;
- ◆ continuing education classes;
- ◆ gambling manager seminars;
- ◆ a comprehensive website and newsletter ; and
- ◆ mentoring program.

At A Glance

- ◆ The Gambling Control Board regulates five forms of lawful gambling: (Pull-tabs, raffles, bingo, paddlewheels, and tipboards.)
- ◆ Lawful gambling is a \$1.4 billion per year industry in Minnesota.
- ◆ Net state taxes on lawful gambling are estimated to be \$57 million in FY 2002.
- ◆ Charitable contributions will exceed \$73 million in FY 2002.
- ◆ Permits issued for over 3,000 gambling sites.
- ◆ Licenses/permits issues to
 - 1,450 nonprofit organizations
 - 2,500 exempt organizations
 - 1,000 excluded organizations
 - 12 bingo halls
 - 18 distributors
 - 8 manufacturers
- ◆ The board annually conducts:
 - Compliance reviews of 480 organizations
 - Site inspections of 1,100 gambling sites
 - 150 criminal investigations

Compliance conducts compliance reviews of licensed organizations and educates the industry using training classes, a newsletter, the website, and mentoring.

Investigations uncover theft and fraud in the industry by inspecting gambling products, investigating irregularities noted in compliance reviews, and through allegations made by players.

Licensing reviews license and permit applications for compliance with statutes.

Administration oversees the agency, providing rules coordination, and human resources and administrative support.

Board Expenses are payments to Gambling Control Board members for per diem and travel.

Budget

The agency is funded by a direct general fund appropriation and has a biennial operating budget of \$4.8 million. Though not part of the agency budget, approximately \$1.7 million in general fund receipts are collected by the board biennially in the form of license/permit fees, and penalties and fines. The fees are paid by manufacturers and distributors of gambling equipment, bingo halls, and non-profit organizations. In addition, the state collects approximately \$57 million in net lawful gambling taxes annually.

Agency Purpose

As chief executive, the governor oversees all operations of state government and takes the lead in shaping public policy by proposing ideas to the legislature.

Core Functions

The Governor's Office is organized to effectively administer the duties of the chief executive. Major duties of the governor are to:

- ◆ oversee and provide leadership for the day-to-day operations of state government, with emphasis on quality service delivery and state agency responsiveness to Minnesota citizens;
- ◆ appoint state department heads, people to state boards and commissions, and judges for all court systems when vacancies occur;
- ◆ chair the State Executive Council and the Legislative Advisory Commission;
- ◆ serve on the Land Exchange Board and the State Board of Investment;
- ◆ dispatch the National Guard for emergency duty;
- ◆ issue extradition papers;
- ◆ prepare comprehensive, long-range plans for the orderly, coordinated growth of the state;
- ◆ prepare and establish advisory committees to aid in developing legislative proposals and plans for executive action;
- ◆ inform the legislature of the general condition of the state, review the laws passed by the legislature, and call special sessions of the legislature when needed;
- ◆ develop the biennial budget and present it to the legislature;
- ◆ promote business development and help create new jobs with assistance and advice from legislators and business leaders;
- ◆ represent the citizens of the state at various functions at local, state, national, and international levels; and
- ◆ perform all other duties as specified by the laws of the state.

The lieutenant governor's chief duty is to assist the governor in carrying out the functions of the executive branch. The lieutenant governor serves as an extension of the governor, represents the governor, and is prepared to act in the governor's place in the event of the governor's absence or disability. The lieutenant governor is a key member of the governor's cabinet and is involved in major policy and budget decisions.

Part of the lieutenant governor's official duties include:

- ◆ chairing the Capitol Area Architectural Planning Board (CAAPB); and
- ◆ serving as a member of the State Executive Council.

Operations

The Governor's Office is organized by three program areas: Executive Operations, Governor's Residence, and the Washington Office. The Chief of Staff oversees all program areas, and Executive Operations includes four distinct departments: Citizen Outreach, Communications, Operations, and Policy Management.

Budget

The office is funded through a direct appropriation from the General Fund.

At A Glance

The governor and lieutenant governor, along with their staff:

- ◆ Report to and represent the 4.9 million citizens of Minnesota
- ◆ Manage 25 cabinet-level executive departments and 59 non-cabinet level, executive branch agencies that are comprised of 48,243 state employees (see <http://www.departmentresults.state.mn.us/>)
- ◆ Develop a \$41.6 billion state budget every two years
- ◆ Implement *The Big Plan*, a long-term plan for the state made up of 29 strategic initiatives and 189 results indicators (see <http://www.bigplanresults.state.mn.us.>)
- ◆ Consult with 201 state legislators during annual legislative sessions
- ◆ Appoint 1,000 citizens to 110 boards and commissions
- ◆ Appoint judges to the state's 10 judicial districts, the Court of Appeals, and the Supreme Court
- ◆ Respond to more than 100,000 citizen calls and contacts, conduct hundreds of media interviews, attend scores of meetings, and travel thousands of miles to promote the state of Minnesota.

Agency Purpose

The statutory mission of the Minnesota Department of Health (MDH) is to protect, maintain, and improve the health of all Minnesotans.

MDH is the state's lead public health agency and works with local public health agencies, federal health agencies, and other organizations to operate programs that protect and improve the health of entire communities, and programs that promote clean water, safe food, quality health care, and healthy personal choices.

Together, these programs are contributing to longer, healthier lives. As a result, Minnesota is consistently ranked one of the healthiest states in the country.

Core Functions

While MDH is perhaps best known for responding to disease outbreaks, the department's core functions are very diverse and far-reaching, and focus on preventing health problems in the first place.

- ⇒ Preventing Diseases: MDH detects and investigates disease outbreaks, controls the spread of disease, encourages immunizations, and seeks to prevent chronic and infectious diseases, including HIV/AIDS, TB, and cancer. The department's public health laboratories analyze some of the most complex and dangerous biological, chemical, and radiological substances known, employing techniques not available privately or from other government agencies.
- ⇒ Reducing Health Hazards: MDH identifies and evaluates potential health hazards in the environment, from simple sanitation to risks associated with toxic waste sites and nuclear power plants. The department protects the safety of public water supplies and the quality of the food eaten in restaurants. It also works to safeguard the air inside public places.
- ⇒ Protecting Health Care Consumers: MDH safeguards the quality of health care in the state by regulating many people and institutions that provide care, including HMOs and nursing homes. Minnesota has pioneered improvements in the health care system, including the development of policies that assure access to affordable, high-quality care which are models for the nation. The department monitors trends in costs, quality, and access in order to inform future policy decisions.
- ⇒ Promoting Good Health: MDH provides information and services that help people make healthy choices. The department protects the health of mothers and children through the supplemental nutrition program Women, Infants and Children (WIC) and services for children with special health needs. Minnesota was one of the first states to regulate smoking in public places, and has developed tobacco prevention strategies used nationwide. MDH programs also address mental health, occupational safety, and violence.
- ⇒ Achieving Success Through Partnership: Minnesota has a nationally renowned public health system built on well-articulated state and local government roles. MDH provides both technical and financial assistance to local public health agencies so they can provide programs and services meeting the unique needs of their communities.

Operations

Many core public health functions are carried out directly by MDH staff. Examples include:

- ◆ the scientists and epidemiologists who work in the laboratories and the cities and neighborhoods of the state to identify the nature, sources and means of treatment of disease outbreaks and food borne illness;
- ◆ the nursing home inspectors who make sure that elderly citizens are provided with safe and appropriate health care and treated with respect and dignity;
- ◆ the environmental engineers who work with cities and towns to assure that municipal water systems provide water that is safe for families to drink;

At A Glance

The Minnesota Department of Health (MDH) is one of the top state health departments in the country.

MDH has earned an international reputation for being on the cutting edge of disease detection and control and developing new public health methods.

MDH workforce of 1,300 includes many MD's, PhD's, nurses, health educators, biologists, chemists, epidemiologists, and engineers.

MDH program resources are deployed in the Twin Cities and seven regional offices statewide, to better serve the state population.

- ◆ the laboratory scientists who conduct sophisticated tests to detect treatable metabolic errors in all newborn babies; and
- ◆ the scientists and policy experts who collect, and evaluate information about environmental trends, the health status of the public, quality of health services, and other emerging issues, and carry out public health improvement programs.

MDH provides technical and financial assistance to local public health agencies, public and private care providers, non-governmental organizations, and teaching institutions. Technical assistance provides the department's partners access to current scientific knowledge and is commonly in the form of direct consultation, formal reports, and training.

While pursuing its core activities, MDH will focus special attention on the following strategic directions: eliminating disparities in health status among American Indians and populations of color; improving readiness/response capability for emerging health threats; supporting communities to raise healthy youth; and planning for the health care needs of the future.

Budget

MDH receives 79% of its funding from non-general fund resources—the federal government, the tobacco endowments, fees, the health care access fund, and other revenues. The General Fund accounts for the remaining 21% of the budget. Approximately 57% of the budget is “passed through” to local governments, non-profit organizations, community hospitals and teaching institutions in the form of grants; 23% represents the cost of the professional and technical staff that carry out the department's core functions; and 20% is for other operating costs, primarily for technology and space.

Program Description

The purpose of the Health Improvement Program is to improve health through bringing together diverse expertise and systems to effectively direct resources to measurably improve the health of individuals, families and communities, with particular attention to those experiencing health disparities.

Budget Activities Included:

- ⇒ Community Health
- ⇒ Family Health
- ⇒ Health Promotion and Chronic Disease
- ⇒ State Center for Health Statistics
- ⇒ Office of Minority and Multicultural Health

Activity Description

The Community Health activity provides responsive leadership to strengthen and mobilize systems to assure the health of all Minnesotans. This activity provides assistance to local public health agencies, increases access to health care for rural and other underserved Minnesotans, and develops and supports cooperative health partnerships among state and local governments, health care providers, other health-related organizations, communities and individuals. The Community Health activity also supports Minnesota's complex public health and health care delivery systems with a combination of technical assistance activities, grants programs, and cooperative policy development.

Activity at a Glance

- ◆ Administer 22 grant programs with grants to over 630 individual grantees.
- ◆ Assisted in 5,000+ local health disease investigations and 21 statewide outbreaks in 2000.
- ◆ Provided 258 rural communities with health-related financial or technical aid since 2000.
- ◆ Provide technical and financial assistance to the 50 health boards which serve all areas of the state based on locally established health priorities.

Population Served

The entire population of the state is served by this activity through its work with Minnesota's 50 local community health boards and its partnerships with statewide public, private and nonprofit health organizations. The activity also has a special focus on the state's 2.2 million rural residents and on its medically underserved urban population.

Services Provided

- ⇒ Help local health departments meet their public health responsibilities and priorities through administering a \$19 million public health subsidy, providing technical assistance to local health boards and staff, and providing public health training to local public health staff.
- ⇒ Monitor, analyze and support Minnesota's rural health system in order to maintain access to quality health care by targeting state and federal assistance to those communities whose health providers and systems are most in need.
- ⇒ Establish comprehensive and coordinated public health policies and programs in Minnesota's complex public health system by providing support to working committees representing the majority of the groups with key responsibilities in maintaining and improving public health.

Historical Perspective

Minnesota's decentralized public health system depends on local health departments for many day to day operating activities (e.g. maternal and child health, Women, Infants and Children (WIC), on the health care delivery system and local public health departments for disease surveillance and treatment, and on the state health department for a combination of expertise (e.g. specialized laboratory services), technical assistance (e.g. groundwater mapping and monitoring) and direct services (e.g. disease outbreak epidemiology). Maintaining these interlocking systems in a "state of readiness" so they respond rapidly and efficiently requires ongoing coordinated work among all areas. The public health system "state of readiness" has been tested repeatedly in recent years and has been able to respond without delay and without major infusions of highly targeted dollars because Minnesota has maintained an investment in the system. State and local public health have played major roles in identifying and controlling HIV/AIDS, in responding to flooding in several areas of the state, and in responding to numerous disease outbreaks, including the recent anthrax scare. As importantly, this decentralized system has helped prevent diseases and disability through programs such as those that increase immunization rates, reduce smoking, prevent and control diabetes, assure safety in restaurants and health care facilities, encourage wellness, support long-term care and home care and provide health education.

Minnesota began experiencing loss of its small rural hospitals and providers in the mid-1980s. Minnesota's early work in building a statewide rural health plan laid a strong foundation for MDH's current programs to reduce small rural hospital closures, strengthen the health care workforce, encourage regional cooperation among services and stabilize the rural health care system, which continues to face persistent challenges.

HEALTH DEPT

Program: HEALTH IMPROVEMENT

Activity: COMMUNITY HEALTH

Narrative

Key Measures

Protect public health by increasing the percentage of city and county public health agencies (n=91) that have completed a health annex to their local emergency response plans.

| History | Current | Target |
|------------|---------|--------|
| 1999 | 2001 | 2003 |
| 50% (est.) | 99% | 100% |

Source: MDH Community Health Division, Office of Public Health Practice

Maintain access to care statewide by monitoring, analyzing and supporting Minnesota's rural health system. A 1999 evaluation of the rural loan repayment program found that 100% of physicians in the program continued practicing in their communities after their loan practice obligation had been fulfilled.

Source: MDH Office of Rural Health and Primary Care

Ensure an effective state and local public health system by providing support to working committees representing groups with key responsibilities in making the public health system successful. A recent (2001) independent evaluation by the Board of Government Innovation and Cooperation stated that the State Community Health Services Advisory Committee (SCHSAC) was a "model to increase state-local government communication, cooperation, and understanding." This report also stated in its findings that not only was the SCHSAC a useful problem-solving/policy making group, but that the model resulted in fewer public health mandates on local government.

Activity Description

The Family Health activity protects and promotes the health and well-being of all Minnesota women, infants, children, youth, and families. Maternal and child health is an important reflection of the social and economic well-being of Minnesota families and a strong predictor of the health of our future generations.

Population Served

The population served includes women, infants, children and adolescents and their families, with a special focus on those most vulnerable and likely to be at risk for or experiencing poor health status: the homeless or hard-to-reach; those living in poverty; those from racial, ethnic and cultural groups with unique health care issues; and children who have special health care needs.

Services Provided

- ⇒ Provision of healthy foods, nutrition assessment and education and health care referrals to improve the health and nutrition status of pregnant and postpartum women, infants, young children and the elderly.
- ⇒ Assessment of needs, collaborative planning, technical consultation, professional education and training, public information and provision of grant funds to community health boards, Tribal Governments and other community-based and statewide organizations to improve pregnancy outcomes and the health status of children, youth, women and their families, with particular attention placed on those who experience disparities.
- ⇒ Specialty medical assessment and care in underserved areas of the state for children with chronic illness and disabilities.
- ⇒ Facilitation of interagency collaborative planning and provision of services to children and youth with disabilities at both the state and local levels.
- ⇒ Consultation, information, training, and on-site technical assistance to enhance collaborative efforts among schools, communities and families to improve the health and educational status of Minnesota's children and youth through a coordinated approach to school health.
- ⇒ Technical assistance, education, training and resources to support, in partnership with local public health, implementation of community strategies targeted at reducing risky health behaviors among adolescents and promoting healthy adolescent development.
- ⇒ Technical assistance, training and capacity building of communities in mental health promotion and suicide prevention.

Historical Perspective

Healthier mothers and babies, and family planning are both included on the list of Ten Great Public Health Achievements, 1900-1999 from the Centers for Disease Control and Prevention. Nevertheless, infant mortality and teen pregnancy rates are still higher here than in many industrialized countries. The core programs of Maternal and Child Health and Children with Special Health Needs have been supported through the federal government for almost 70 years, and the Women, Infants and Children (WIC) program was established over 25 years ago to improve health of women and children.

Although much has changed over these years, there remain significant needs that negatively influence the health of Minnesota families. Many of the health problems that women, infants, and children experience are preventable and require our ongoing attention. Preventive health care for children and adolescents is inadequate and/or unavailable for many. Injuries have become the leading cause of death for children aged 1 to 19 years. Adolescents have identified mental health services as their greatest need, yet accessible mental health services

Activity at a Glance

- ◆ Each month approximately 102,000 low-income pregnant women and children receive WIC supplemental food and nutrition services.
- ◆ In 2001, prenatal classes were provided to 23,000 women.
- ◆ In 2001, over 40,000 individuals obtained contraceptive services.
- ◆ Currently 80% of hospitals are screening newborns for hearing loss.
- ◆ Currently 13,600 women, children and elderly are provided with commodity food products.
- ◆ In 2001, over 26,000 children with special health care needs received services.

HEALTH DEPT

Program: HEALTH IMPROVEMENT

Activity: FAMILY HEALTH

Narrative

for children and adolescents are hard to find. Poor or unsafe childcare jeopardizes children's health, safety, and development. Understanding and support for unique health needs and issues of women remains insufficient.

Key Measures

Improve the health of newborns by reducing the percent of singleton infants born with low birth weight.

| | History | Current | Target |
|-------------|---------|---------|--------|
| Fiscal Year | 1998 | 2001 | 2005 |
| | 4.4 % | 4.5 % | 4.0 % |

Source: Minnesota Department of Health

Note: Low birth-weight infants are at higher risk of death or long-term illness and disability than are infants of normal weight. In addition, low birth-weight accounts for most of the disparity in infant mortality rates between African American and Whites.

Improve the health of infants by increasing the percent of mothers who breastfeed their infants at hospital discharge.

| | History | Current | Target |
|-------------|---------|---------|--------|
| Fiscal Year | 1997 | 2000 | 2005 |
| | 72 % | 76 % | 79 % |

Source: Minnesota Department of Health

Note: Extensive research has established that breastfeeding is the ideal method for feeding infants, imparting both short- and long-term benefits for both the infant and mother.

Improve the early identification of children with special health care needs by increasing the percent of newborns screened for hearing impairment before hospital discharge.

| | History | Current | Target |
|-------------|---------|---------|--------|
| Fiscal Year | 1997 | 2001 | 2005 |
| | 8 % | 75 % | 95 % |

Source: Minnesota Department of Health

Note: Hearing loss is the most common detectable disability in newborns. Research indicates that hearing-impaired infants who receive intervention by six months of age can develop normal cognitive, social and language skills.

Improve the health of youth by increasing the percent of adolescents who abstain from sexual intercourse or always use condoms if sexually active.

| | History | Current | Target |
|---|---------|---------|--------|
| | 1998 | 2001 | 2004 |
| 12 th graders who are abstinent | 50 % | 51 % | 53 % |
| 12 th graders who use condoms if sexually active | 40 % | 43 % | 45 % |

Source: Minnesota Student Survey

Note: The overall teen pregnancy rates in Minnesota have declined 17% in the past decade, and the STI rate has remained relatively stable. However, these numbers mask significant disparities in teen pregnancy and STI rates between Whites and African American, American Indian, Asian, and Hispanic populations.

Activity Description

The Health Promotion and Chronic Disease activity improves the health of all Minnesotans by providing leadership in the prevention and control of chronic diseases and injuries, conducting surveillance, and developing, implementing, and supporting public health interventions. The activity was created in 2002, in recognition that chronic disease and injury are the leading causes of death and disability in Minnesota.

Population Served

This activity serves the entire population of Minnesota, as over half of all deaths of Minnesotans under the age of 35, and more than three-fourths of all deaths of Minnesotans age 35 and older, are due to chronic diseases and injuries. Half of all Minnesotans alive today will develop a life-threatening malignancy in their lifetimes. Particular attention is focused on youth, when prevention efforts are most beneficial, on American Indians and populations of color, who are more likely to die from chronic diseases or injuries than are white Minnesotans, and on women, who are disproportionately disabled by chronic disease.

Services Provided

Reduce death and illness in Minnesota from cancers for which early detection saves lives.

- ⇒ Provide free breast and cervical cancer screening to women who are uninsured or underinsured.
- ⇒ Provide free or low cost colposcopy to women with cervical abnormalities needing follow-up.
- ⇒ Develop policy guidelines for finding and assisting women with breast and cervical cancer.
- ⇒ Coordinate health care provider and public information about identifying and treating persons at risk and affected by breast and cervical cancer.

Monitor the occurrence of cancer, injuries, and other chronic diseases.

- ⇒ Operate a statewide system of surveillance for all newly-diagnosed cancer cases in the state.
- ⇒ Respond to reports of chronic disease concerns.
- ⇒ Identify workplace hazards and injuries.
- ⇒ Examine farm-related injuries and investigate work-related deaths.

Improve health and prevent injury, substance abuse, and chronic disease.

- ⇒ Facilitate effective collaborations and partnerships.
- ⇒ Convene forums to identify common interests and foster action.
- ⇒ Translate health research and information into practice.
- ⇒ Develop and disseminate innovative and effective health promotion strategies.
- ⇒ Support health care providers and systems, public health agencies, and other community-based organizations in their prevention and evaluation efforts.

Eliminate exposure to secondhand smoke, prevent the initiation of tobacco use by youth, and eliminate disparities among populations at higher risk of tobacco use.

- ⇒ Fund and support community and school-based interventions.
- ⇒ Fund counter-marketing campaigns and youth development and empowerment programs.
- ⇒ Develop and advocate for policy changes.
- ⇒ Evaluate the effectiveness of program activities and monitor tobacco use in Minnesota.

Activity at a Glance

- ◆ In state FY 2002, 13,200 low-income women were screened for breast and cervical cancer at more than 300 clinics across the state.
- ◆ In calendar year 1999, according to the Minnesota Cancer Surveillance System, 22,200 invasive cancers were newly diagnosed in Minnesotans.
- ◆ In calendar year 2001, 4,355 persons with traumatic brain and/or spinal cord injury were offered resource and referral information.
- ◆ In state FY 2002, 750 elementary schools were assisted with conducting health promotion and educational programs.
- ◆ In state FY 2002, 100 grants were provided to organizations serving local communities and populations at risk for tobacco prevention and control activities.

HEALTH DEPT

Program: HEALTH IMPROVEMENT

Activity: HEALTH PROMOTION & CHRONIC DIS

Narrative

Historical Perspective

Chronic disease and injury result from the cumulative effect of several interacting risk factors. Many of the risk factors are related to lifestyle, modifiable, and affect more than one condition, including smoking, physical inactivity, obesity and poor nutrition, high blood pressure, and high blood cholesterol. As the number of Minnesotans over the age of 60 increases in the next 20 years, human suffering and health care costs resulting from chronic disease and injury will escalate rapidly. To reduce this impending burden, Minnesota's public health and health care systems must:

- ◆ encourage healthy behaviors and reduce the prevalence of unhealthy behaviors that put people at increased risk for chronic diseases and injuries;
- ◆ expand screening for early detection of chronic diseases and risk of injuries for which effective follow-up treatment exists;
- ◆ create opportunities and institute policies that promote good health;
- ◆ translate and disseminate best practices and develop scientific standards for effective community and medical interventions; and
- ◆ create and maintain adequate surveillance systems to measure the burden of chronic disease and injury, identify populations at risk, target program efforts, and evaluate program and policy effectiveness.

Key Measures

Reduce deaths from cancer by reducing the incidence rates for late-stage colorectal, cervical, and female breast cancer. (Rate is number of cases per 100,000 of late-stage cancer, by year of diagnosis, age-adjusted.)

| | History | Current | Target |
|------------|---------|---------|---------|
| | 1995-96 | 1997-99 | 2000-01 |
| Colorectal | 32.7 | 32.4 | 32.0 |
| Cervical | 2.8 | 2.5 | 2.5 |
| Breast | 42.7 | 43.7 | 42.5 |

Source: Minnesota Cancer Surveillance System

Note: Because of the delay between cancer occurrence and reporting, incidence data for a given year is not available until two years later.

Improve childhood health by increasing the percent of Minnesota children 10 and older who report eating five servings of fruits and vegetables on the previous day.

| | History | Current | Target |
|--------------------------|---------|---------|--------|
| | 1998 | 2001 | 2004 |
| 6 th graders | 22% | 22% | 26% |
| 9 th graders | 15% | 14% | 16% |
| 12 th graders | 13% | 11% | 11% |

Source: Minnesota Student Survey

Improve youth health by reducing the percent of Minnesota high school youth who report that they have used tobacco in the last 30 days.

| | History | Current | Target |
|---|---------|---------|--------|
| | 2000 | 2002 | 2005 |
| High school youth reporting tobacco use | 38.7 % | 34.8 % | 27.1 % |

Source: Minnesota Youth Tobacco Survey

Activity Description

The Minority Health and Multicultural activity exists to improve health status and to close the gap in health disparities of American Indians and populations of color in Minnesota. It also identifies and recommends policy changes needed to improve the health status of other minorities.

Population Served

This activity serves the 519,197 Minnesotans who are American Indians, African American, Asian and other non-white races and 143,382 Minnesotans who are Hispanic.

Table 1: Minnesotans Served by Race

| | Number | Percent |
|------------------------|---------|---------|
| Black/African American | 171,731 | 3.5% |
| American Indian | 54,967 | 1.1% |
| Asian/Native Hawaiian | 143,947 | 2.9% |
| Other | 65,810 | 1.3% |
| Two or more | 82,742 | 1.7% |
| Total | 519,197 | 10.5% |

Table 2: Minnesotans Served by Ethnicity

| | Number | Percent |
|----------------------|---------|---------|
| Hispanic (any race)* | 143,382 | 2.9% |

Source: US Census

* A person of Hispanic origin can be of any race, therefore, the totals for race and ethnicity cannot be added together to get a total number served.

Services Provided

Provide leadership to improve the health status of American Indians and populations of color in Minnesota.

- ⇒ Develop and implement a comprehensive and coordinated plan to reduce health disparities.
- ⇒ Promote collaboration and increase communication between state, local and tribal governments, non-governmental organization and communities of color.
- ⇒ Develop strategies, programs and policies to improve health status of people of color.
- ⇒ Build capacity to meet the needs of people of color in the areas of health promotion, disease prevention and health care system.
- ⇒ Coordinate Minnesota Department of Health (MDH) related to minority health issues.
- ⇒ Promote workforce diversity and cultural competency in workplaces and health care settings.

Support local efforts to improve the health status of American Indians and populations of color in Minnesota.

- ⇒ Award and manage grants and provide technical assistance to community organizations and tribal governments to address health disparities.
- ⇒ Assist communities to assess the public health needs of American Indians and population of color.
- ⇒ Convene health committees with each community of color and local community meetings regarding minority health issues.
- ⇒ Work with existing MDH grant programs to increase their impact on closing health disparities gaps.

Activity at a Glance

- ◆ Measurable outcomes to track Minnesota's progress in reducing health disparities have been adopted.
- ◆ In 2002, 19 grants were awarded to address immunizations for adults and children and infant mortality in American Indians and populations of color.
- ◆ In 2002, 30 grants were awarded to address breast and cervical cancer, HIV/AIDS and sexually transmitted infections, cardiovascular disease, diabetes, and unintentional injuries and violence in American Indians and populations of color.
- ◆ In 2002, 20 grants were awarded to reduce infant mortality through reducing the high rate of teen pregnancies in American Indians and populations of color.
- ◆ Mobilizes and works with populations of color and American Indians to take responsibility for their own health.

Ensure valid, available, and reliable data about the health status of American Indians and populations of color in Minnesota.

- ⇒ Assess risk behaviors associated with health disparities.
- ⇒ Establish measurable outcomes to track Minnesota's progress in reducing health disparities.
- ⇒ Support ongoing research and studies regarding health status and concerns of American Indians and populations of color.
- ⇒ Provide information on the health status of American Indians and population of color to interested parties.
- ⇒ Improve the recording and reporting of race/ethnicity health-related data.
- ⇒ Evaluate the efforts of MDH, community organizations and tribal governments to improve the health of American Indians and population of color.

Historical Perspective

The MDH established the Office of Minority in 1993 to assist in improving the quality of health and eliminating the burden of preventable disease and illness of populations of color. In 2001 it became Office of Minority & Multicultural Health to reflect the ethnic specific focus on health with a multicultural approach to eliminating health disparities in populations of color and American Indians. The office works collaboratively with other divisions in MDH, other state departments, community-based agencies, health plans and others to address the needs of populations of color and American Indians.

Disparities in health status between the European majority and other populations in Minnesota have existed for some time, and have, in some cases, been getting worse, not better. These disparities are a result of a complex interplay of many factors, including racism, access to health care, genetics, social conditions, and health behaviors. Minnesota's population is becoming increasingly diverse – in the 1990 census, 6.3% of Minnesotans identified themselves as non-white or Hispanic/Latino; in the 2000 census, 11.8% did so.

- ⇒ In the 2000 census, almost 172,000 Minnesotans described themselves as black or African American *alone*, while another 31,000 said they were African American *in combination* with some other race. Either number marks a sharp increase from 1990 when almost 95,000 Minnesotans identified themselves as black or African American (Source: Minnesota Planning). Compared to Minnesota's white population, African American: individuals are less likely to have health insurance; infants are much more likely to be born early or too small or to die during infancy; children are less likely to be immunized; girls are much more likely to become pregnant; youths are more likely to die as a result of firearms; individuals are more likely to develop AIDS/HIV; and individuals are more likely to die from diabetes and cardiovascular disease.
- ⇒ In 1990, there were 49,909 American Indians, Eskimos and Aleuts, most of them American Indians, living in Minnesota. In 2000, about 55,000 Minnesotans identified themselves as American Indian or Alaska Native *only*, but an additional 27,000 described themselves as American Indian or Alaska Native *in combination* with another race (Source: Minnesota Planning). Compared to Minnesota's white population, American Indian: individuals are less likely to have health insurance; infants are much more likely to die during infancy; children are less likely to be immunized; youth are much more likely to commit suicide; girls are more likely to become pregnant; individuals are more likely to develop AIDS/HIV; and individuals are more likely to die from diabetes and cardiovascular disease.
- ⇒ Almost 142,000 Asian *alone* residents lived in Minnesota in 2000. About 20,000 people were Asian *in combination* with another race. Clearly the number of Asians grew substantially since 1990, when there were about 77,000 (Source: Minnesota Planning). Compared to Minnesota's white population, Asian American: individuals are more likely to have health insurance, but less likely to use it; children are less likely to be immunized; and individuals are more likely to suffer from stroke.
- ⇒ Minnesota's Hispanic/Latino population grew 166% during the 1990s, from 53,884 to 143,382 (Source: Minnesota Planning). Compared to Minnesota's white population, Hispanic/Latino: individuals are less likely to have health insurance; children are less likely to be immunized; youth are more likely to be victims of violence; girls are more likely to become pregnant; are more likely to develop AIDS/HIV; and individuals are more likely to die from diabetes and cardiovascular disease.

Activity Description

The Center for Health Statistics (MCHS) activity measures assesses and reports on the health of the population of Minnesota. This is accomplished through the civil registration system for collecting, maintaining and disseminating vital statistics records and related data, the design and implementation of population-based surveys, the collection and analysis of other health related data, and the direction and leadership to partners to insure uniformity. The overall purpose of these activities is to provide the data and statistical information needed to develop policies and the programs to improve the health of all citizens of Minnesota.

Activity at a Glance

- ◆ Over 8,000,000 birth certificates and death certificates are maintained in a statewide computer system.
- ◆ Over 60,000 customer service transactions are completed per year for copies of birth or death certificates.
- ◆ Approximately 65,000 births and 40,000 deaths occur each year, which need to have certificates processed.

Population Served

This activity serves the entire population of Minnesota as citizens need copies of birth certificates or death certificates or participate in population-based health surveys. There are approximately 60,000 customer transactions completed through the statewide vital statistics system of birth and death certificates. Approximately, 4,000 Minnesotans participate in health surveys conducted by the Center for Health Statistics.

Services Provided

- ⇒ The State Registrar of Vital Statistics maintains a permanent file of birth and death certificates, which provides public health researchers with a statewide database, and provides citizens with records for legal purposes.
- ⇒ The Behavioral Risk Factor Surveillance Survey is a rigorous survey of adult Minnesotans, which monitors trends in health behaviors and health status.
- ⇒ The Center for Health Statistics publishes reports regarding health status and trends and provides technical assistance to others working on public health problems; examples include local health departments, managed care organizations and state and national researchers.

Historical Perspective

The birth certificates and death certificate have been maintained since 1908 as paper records in the Office of the State Registrar of Vital Statistics at the Minnesota Department of Health (MDH). MDH has recently completed the Vital Statistics Redesign Project, which has been a five-year project to implement a centralized vital records system using electronic technology to collect and report birth and death information in Minnesota. The new system connects local registrars to a centralized database from which they issue statewide birth and death records. This database is maintained by MDH and serves as the official record of birth or death within our state. The system provides for hospitals, funeral homes, medical examiners and physicians to input birth and death information directly into the database from their location via computer. Funding for the maintenance of the system is through the collection of a \$2.00 surcharge on each record issued.

Accurate population-based data are important to providing a scientific basis for allocating resources and measuring the state's progress in achieving public health goals. The Minnesota Center for Health Statistics has managed several key elements to this strategy, including reinvigorating health quality improvement efforts in Minnesota.

Key Measures

Promote health by providing accurate health data through the improvement of systems for collecting, maintaining, and disseminating vital statistics records and related data through a new statewide computer system.

Improve public health policy and practice by providing health status reports and vital statistics data.

Note: MNCHS issued or contributed to 20 major health reports in the last two years, including:

- ◆ Minnesota Health Statistics Annual Profile
- ◆ Minnesota County Health Profiles
- ◆ Population Health Assessment Quarterly
- ◆ Populations of Color Health Status Report
- ◆ Teens and Tobacco in Minnesota: Results from the Minnesota Youth Tobacco Survey.

Activity Description

The Health Policy and Systems Compliance (HP&SC) activity helps to promote access to quality health care at a reasonable cost for Minnesotans through data collection and analysis, policy development, education and oversight activities. As the health care system has become more complex and costly, HP&SC provides policymakers with information to assist in their decision making, provides consumers with information and methods to resolve conflicts regarding their health care, and enforces standards established by statute and rule that are aimed at assuring consumers that they are receiving safe and effective health care.

Population Served

This activity serves many different groups of people. Much of the research and analysis activities are designed to assist the legislature and policymakers while consumers and practitioners are served by the regulation of allied health occupations, managed care organizations and funeral service providers.

Services Provided

To assist state lawmakers and other policymakers, HP&SC collects data that is used in research and analysis that can be applied to policy decision-making. HP&SC monitors Minnesota's health care market and the economic effects on the cost of health care, access to health care services and insurance coverage. Activities include:

- ◆ Examine health care market conditions and competition, health care access, levels of insurance and uninsurance and insurance premiums.
- ◆ Estimate aggregate health care spending.
- ◆ Monitor health care market trends and major health care capital expenditures.
- ◆ Analyze public insurance and its impact on insurance coverage and access in Minnesota.
- ◆ Research and develop mechanisms to adjust risk for publicly funded prepaid medical insurance programs.

HP&SC protects the health of Minnesotans who receive health care services from allied health care practitioners, mental health counselors, complementary and alternative health practitioners, managed care plans and funeral service providers. Activities include:

- ◆ Regulate individuals who want to practice as audiologists, hearing instruments dispensers, speech language pathologists, alcohol and drug counselors and occupational therapists.
- ◆ Investigate complaints and take enforcement actions against non-credentialed mental health counselors and complementary and alternative health practitioners.
- ◆ Protect for appropriate access to quality health care services for the 1.4 million Minnesotans who are enrolled in managed care health plans.
- ◆ Regulate Funeral Service providers to ensure the proper care and disposition of the dead.

Key Measures

⇒ Access: Because research consistently shows that not having health insurance is one of the key reasons people either postpone obtaining medical attention or simply do not seek health care when they need it, the Governor's Office has chosen the rate of uninsurance to be part of its Big Plan results indicators. HP&SC measures the level of uninsurance to assist policymakers as they are faced with decisions about modifications in coverage and regulation. HP&SC conducts surveys of the uninsured population, monitors the provider and payer markets, and researches access to services. While the results of the research and surveys are published and available to the public, the most valuable use is in the many HP&SC staff

Activity at a Glance

Health Policy and Systems Compliance:

- ◆ Assists policymakers to better understand factors influencing health care costs, access and quality through research and analysis of Minnesotans' health care.
- ◆ Ensures appropriate access and quality of care for the 1.3 million Minnesotans enrolled in the 10 HMOs with revenues totaling \$3.7 billion;
- ◆ Supports training 2,873 students at 1,074 clinical sites by administering \$20 million in medical education grants; and
- ◆ Assures that over 8,000 allied health practitioners are qualified to practice and are providing appropriate services to Minnesotans.

HEALTH DEPT

Program: HEALTH QUALITY AND ACCESS

Activity: HLTH POLICY & SYST COMPLIANCE

Narrative

presentations to policymakers both in Minnesota and nationally, and in being an unbiased, ready resource for inquiries from policymakers, including legislators. The report, Minnesota's Uninsured-Findings from the 2001 Health Access Survey, was produced to assist policymakers in identifying and eliminating barrier to health care coverage.

- ⇒ **Cost:** By conducting research and applied policy analysis, HP&SC monitors changes in both health care premiums and services. The findings are used to assist policymakers better understand factors influencing health care cost and to provide technical assistance in the development of state health care policy. The success of this activity is measured by the health care community's many requests, including from the legislature, for publications and presentations explaining the research and analysis. During FY 2002, HP&SC estimates that staff made 50 presentations, based on reports and publication, to over 2,500 people. In addition, staff receive 4-5 inquiries per week (200-250 per year) requesting further information or permission to use information in its publications.
- ⇒ **Quality:** Health care quality problems reduce the effectiveness and drive up the costs of the health care system. While the vast majority of allied health care practitioners and managed care organizations provide quality care and service, HP&SC works to protect Minnesota consumers from those that violate state and federal laws. Violations include sexual contact and other boundary violations or breaches of confidentiality by unlicensed mental health counselors; inappropriate funeral service advertising, billing, cremation, embalming and financial trust account activities; inappropriate title use; inappropriate HMO denial of medical services and claims; inappropriate denial of eligibility or termination of coverage; issues of network adequacy, access to care and continuity of care; allegations of poor quality care and provider incompetence; inappropriate coordination of benefits, copays and coinsurance; use of unapproved premium rates; and inappropriate determinations of experimental, investigative or unproven services.

Activity Description

The Facility & Provider Compliance Division (F&PC) protects the health and safety of approximately 661,000 Minnesotans (40,000 Nursing Home residents, 16,000 Home Care clients, 29,000 Housing With Services recipients, 570,000 hospital patients, 6,000 supervised living residents) receiving long-term care and short stay health care services. Additional citizens are cared for by other health care providers including boarding care homes, supervised living facilities, ambulatory surgical centers and hospice providers. Quality of the services provided is assured through on-site surveys of facilities, complaint investigations, employee background checks, case mix assessments, physical plant plan reviews and consultation and education.

Population Served

Those served by F&PC are patients, consumers, providers and regulators of health care services. This includes federal, state and county agencies, advocates for patients, and persons requesting reconsideration of decisions that have disqualified them from working in a health care setting as a result of findings from criminal/maltreatment backgrounds checks.

This activity has seen the number of nursing homes decline in Minnesota from 450 in 1997 to 417 in 2002. In addition, many nursing and boarding care homes are reducing bed capacity. These reductions are in large part the result of a growing shift from providing longer-term care in an institutional setting to creating alternative services aimed at keeping persons at home or in a home-like setting. Evidence of this shift is seen in the dramatic increase in the number of home care, assisted living and housing with services providers whose number have grown from 589 in 1997 to 1,698 providers today. The Home Care Association is expecting the number of home care providers alone to increase by 40% or to approximately 2,377 over the next five years.

Services Provided

- ⇒ F&PC provides assurance to recipients of health care services that the facilities and health care services in Minnesota are providing quality care.
- ⇒ This activity conducts unannounced onsite inspections and surveys.
- ⇒ F&PC investigates complaints of abuse, neglect or maltreatment, and conducts criminal background checks.
- ⇒ This activity provides educational efforts that include clinical training on a statewide basis, personal consultation, information bulletins, and on-line web-based assistance.
- ⇒ F&PC also partners with providers and health care services to develop and/or revise rules so that they reflect the latest health care innovations and standards.
- ⇒ F&PC is the lead agency for the receipt and investigation of maltreatment reports in accordance with the Vulnerable Adult Act.
- ⇒ F&PC conducts annual reviews of all Medicaid recipients and private pay residents in certified nursing facilities.
- ⇒ F&PC approves all architectural and engineering plans for all new construction or remodeling of health care facilities to assure that the facilities' physical plants meet basic safety and health standards.

Historical Perspective

The number and percentage of Minnesotans aged 65 and older is increasing, as is the level of medical care they will require. Alternatives to traditional nursing home services are expanding statewide that will allow Minnesotans to receive cares and services in their own homes or in a home-like settings thereby enhancing the quality of life of

Activity at a Glance

- ◆ There are 5,251 health care providers whose delivery of services is monitored by F&PC for safety and quality.
- ◆ F&PC investigates complaints of abuse, neglect and maltreatment in health care systems.
- ◆ In state FY 2002, construction plan reviews amounted to \$200 million in capital investments for hospitals and nursing homes.
- ◆ Criminal background checks were processed on 109,630 applicants for employment in health care facilities.
- ◆ There are currently 48,455 nursing assistants on the Nursing Assistant Registry.

HEALTH DEPT

Program: HEALTH QUALITY AND ACCESS

Activity: FACILITY & PROVIDER COMPLIANCE

Narrative

our seniors. However, as society looks for cost effective ways to deliver health care services, it is important that the quality of those services is maintained.

Over the last three years, the Minnesota Department of Health and the Minnesota Department of Human Services worked together to design a new case mix system for Minnesota nursing homes. "Case Mix" refers to the system used in Minnesota for nursing homes to receive payment for the services provided and is based on a needs assessment of each resident. Currently, nursing homes perform one state required assessment for payment purposes and a different one required by federal law. Starting 10-1-02, information from the federal needs assessment system will be used to determine the Minnesota case mix classification and corresponding payment rate and the current state system will be deleted, thereby significantly reducing paper work for nursing facility staff.

The number of construction projects reviewed has steadily increased over the past several years. Many of the projects are more complex and the dollar value has increased commensurately. Several new hospitals have been constructed in the last three years, including the hospitals in Red Wing, Woodbury and Ada.

Key Measures

Improve the quality of life in nursing homes by reducing the percent of Minnesota nursing homes identified as having urinary incontinence deficiencies.

| | History | | Current | Target |
|------------------------------|----------|--------|---------|--------|
| | SFY 2000 | 2001 | 2002 | 2005 |
| Percent Deficiency Reduction | 22.43% | 19.16% | 16.01% | 12.0% |
| | (n=94) | (n=78) | (n=65) | |

Source: MDH annual surveys of nursing homes

Improve the quality of care in nursing homes by reducing the percent of nursing homes identified as having assessment of care deficiencies.

| | History | Current | Target |
|------------------------------|----------|---------|--------|
| | SFY 2001 | 2002 | 2005 |
| Percent Deficiency Reduction | 36% | 35.71% | 30.0% |
| | (n=148) | (n=145) | |

Source: MDH annual surveys of nursing homes.

Note: These two areas continue to fall within the top 10 deficiencies identified in annual surveys of nursing homes. To lower the number of deficiencies in these two areas, the department will focus on consultation and education on how to deliver quality cares, and provider support.

Improve the quality of in home care received by increasing the percent of home care providers in compliance with state regulations.

| | History | Current | Target |
|-----------------------|----------------------|-----------------------|----------|
| | SFY 2001 | SFY 2002 | SFY 2005 |
| Percent in compliance | 8.3 % (10 of 120) | 17.2 % (20 of 116) | 25 % |

Activity: FACILITY & PROVIDER COMPLIANCE

Narrative

Note: The number of home care providers fluctuates as this market continues to expand. The areas measured include any citation issued under quality of care, delivery of services, or a potential for serious harm. The F&PC activity assists home care providers to improve quality through one-on-one consultations and education, and periodic onsite surveys for new providers.

Program Description

The purpose of the Health Protection Program is to protect the public from dangerous diseases, exposures and events through monitoring and assessment of health threats; developing and evaluating intervention strategies to combat disease and exposures; monitoring and inspections of potential health problems; and providing scientific laboratory and epidemiological capacity.

Budget Activities Included:

- ⇒ Environmental Health
- ⇒ Infectious Disease Epidemiology Prevention and Control
- ⇒ Public Health Laboratory
- ⇒ Office of Emergency Preparedness

Activity Description

The Environmental Health (EH) activity protects Minnesota residents and visitors from exposures to environmental hazards in water, air, food, and land. This activity assures that Minnesotans have safe drinking water and food, and are protected from hazardous materials in their homes and in the environment. EH also identifies emerging environmental health issues, implements public health prevention activities for those issues that sound science indicates are a public health threat.

Population Served

EH serves the entire population of Minnesota by ensuring that all Minnesotans have clean drinking water, safe food, sanitary lodgings, and protection from hazardous materials in their environment.

Services Provided

Improve drinking water quality.

- ⇒ Monitor public drinking water systems.
- ⇒ Monitor and inspect water well construction and sealing.
- ⇒ Inspect swimming pool construction, and plumbing installations.
- ⇒ License professions whose work impacts drinking water.
- ⇒ Provide technical assistance and training to communities and citizens.

Improve food safety.

- ⇒ Inspect and monitor restaurants to ensure safe food handling.
- ⇒ Certify professionals in food safety to manage restaurants.
- ⇒ Monitor and provide technical assistance to local delegated food inspection programs.
- ⇒ Educate citizens regarding safe handling of food.
- ⇒ Develop guidelines for the safe consumption of fish from our lakes and streams.

Improve the health of children.

- ⇒ Provide training and technical assistance to school districts on developing and implementing indoor air quality management plans.
- ⇒ Establish health standards and specifying abatement methods for lead in paint, bare soil, dust, and water;
- ⇒ License professions who work with lead.
- ⇒ Educate citizens, communities and medical professionals on the dangers of lead.
- ⇒ Monitor the exposure of children and adults to lead across the state.
- ⇒ Issue guidelines on the screening, case management, and clinical treatment of children exposed to lead.
- ⇒ Increase focus and attention on children to ensure that they are protected from exposures to harmful chemicals and other environmental health hazards.
- ⇒ Partner with the legislature's children's environmental health working group, children's health care advocates, and Minnesota industry as we explore children's environmental health issues.

Activity at a Glance

- ◆ Minnesota is recognized nationally for our focus and attention on children's environmental health issues.
- ◆ The number of children with elevated blood lead levels declined between 1996 and 2002.
- ◆ The asbestos program's compliance rate for contractors is currently 96%.
- ◆ The x-ray inspection program inspects 25% of the x-ray equipment in Minnesota annually finding 20% of the equipment inspected needing repair.
- ◆ There are 8,300 public water supply systems that provide drinking water to Minnesota citizens and visitors. In 2001, we found only 31 systems with chemical levels that caused concern.
- ◆ In 2001, 99% of our community water supplies provided consumer confidence reports to citizens - one of the highest rates in the nation.
- ◆ In 2001, 75% of restaurants were inspected. Only 20% of violations observed were repeat violations.

HEALTH DEPT

Program: HEALTH PROTECTION

Activity: ENVIRONMENTAL HEALTH

Narrative

Historical Perspective

Protecting public health has been the mission of the Minnesota Department of Health since the first public health laws were passed in 1872. These early laws focused on providing safe drinking water, sewage disposal, waste water treatment, and milk sanitation. Our efforts to safeguard the quality of food and water were instrumental in controlling diseases like cholera and typhoid fever, which are spread by poor sanitation. These diseases are still a major problem in many parts of the world. Today, we continue our prevention efforts to ensure the health and safety of Minnesotans at home, at work and in public places.

EH has responded to many natural disasters, such as floods and tornados. Our primary role is to provide services essential for protecting and ensuring the well being of the people in those areas affected by the disaster, with an emphasis on prevention and control of communicable diseases. During the past decade, when Minnesota flood victims returned to their homes, they turned to EH for guidance. For example, we provided more than 5,000 free water test kits to make sure that drinking water from private wells was safe. We also provided information on cleaning homes, water plants, schools, restaurants, and other facilities to return them to a safe and sanitary condition. We are using this experience to strengthen and enhance the ability of the public health system as we prepare to respond to potential biological, chemical and radiological acts of terrorism.

Key Measures

Prevent ground water contamination by increasing the number of abandoned wells that are sealed.

| | History | | Current | Target |
|-------------------------------------|---------|--------|---------|---------|
| | 1987 | 1995 | 2001 | 2005 |
| Number of wells sealed (cumulative) | 3,275 | 77,375 | 155,607 | 204,000 |

Source: Well sealing records of licensed well contractors (reporting requirement)

Note: Minnesota has about 3/4 million abandoned wells. Sealing of abandoned wells often occurs as a result of a property transfer or when a new well is drilled (about 12,000 to 13,000 new wells per year). A question regarding abandoned wells is asked on disclosure forms used by realtors; educational materials are available on the EHD web site.

Improve food safety by increasing the percent of food establishments that have trained and certified food managers (CFM) and by reducing the percent of critical violations occurring in establishments with a trained and certified food manager.

| | History | Current | Target |
|--------------------------------|---------|---------|--------|
| | 2000 | 2001 | 2005 |
| Food establishments with a CFM | 0 | 74% | 90% |

Percent of food establishments with critical violations in the eight highest risk areas, 4/1/01 – 3/31/02.

| | |
|---|------------------|
| Non-CFM establishments with critical violations | 70.9% (n=203) |
| CFM establishments with critical violations | 52.4% (n=432) |
| Percent improvement | 18.5% |

Source: Environmental Health Division inspection report data

Improve school indoor air quality by increasing the percent of school districts that have developed and implemented district-specific Indoor Air Quality Management Plans.

HEALTH DEPT

Program: HEALTH PROTECTION

Activity: ENVIRONMENTAL HEALTH

Narrative

| | History | Current | Target |
|--------------------|---------|---------|--------|
| | 2001 | 2002 | 2005 |
| Schools with plans | <5% | 55% | 80% |

Source: MDH and DCFL survey of school districts

Note: About 20% of Minnesotans spend a significant amount of time in schools, where they may be exposed to indoor air contaminants that cause health problems or exacerbate existing conditions. M.S. 123B.57 requires all school districts to develop and implement indoor air quality plans. The EH division developed a model plan and provides training and technical assistance for school districts.

Activity Description

The Infectious Disease Epidemiology, Prevention and Control (IDEPC) activity provides statewide leadership to protect Minnesotans against the threats posed by infectious diseases. IDEPC conducts disease surveillance to detect outbreaks; investigates and controls epidemics; develops, implements and monitors the effectiveness of disease prevention and control programs for tuberculosis (TB), vaccine preventable diseases, sexually transmitted diseases (STD) and HIV infection; and educates both health care professionals and the public on the prevention and control of infectious diseases. IDEPC plays a central role in preparing for and responding to the threat of bioterrorism

Population Served

All residents of Minnesota. Specific target populations include infants and children; adolescents; adults at high risk for contracting HIV and other sexually transmitted diseases; the elderly; contacts of tuberculosis and meningitis cases; refugees, immigrants and other foreign born individuals; health care providers at risk for blood borne infections; restaurant workers, patients in hospitals and long-term care facilities. IDEPC supports school nurses and local public health agencies in their efforts to prevent and control disease.

Activity at a Glance

- ◆ Managed health response to anthrax events.
- ◆ Investigated intestinal disease outbreaks affecting 1,885 persons in 2001.
- ◆ Facilitated medical care for and provided counseling to 1,804 Minnesotans with HIV or sexually transmitted diseases in 2001.
- ◆ Coordinated programs to immunize 65,000 babies born annually against meningitis, measles and other serious infectious diseases.
- ◆ Managed treatment for 239 TB cases in 2001. Evaluated 1,450 contacts to cases.
- ◆ Investigated introduction of West Nile Virus, to Minnesota in 2002, responding to 4,000 calls from concerned citizens over two weeks.

Services Provided

Monitor disease trends.

- ⇒ Collect disease reports supplied by hospitals, laboratories, and physicians.
- ⇒ Prepare summary reports for health care providers, policymakers, and the public.
- ⇒ Conduct specialized studies on diseases of high concern to the public and the medical community.

Identify and control disease outbreaks.

- ⇒ Analyze data to detect outbreaks, identify the source and implement control measures.
- ⇒ Alert health professionals and the public about outbreaks, informing them on control measures.
- ⇒ Assist medical care professionals in patient management, including the interpretation of test results.
- ⇒ Consult with physicians on management of persons bitten by potentially rabid animals.
- ⇒ Maintain food borne illness hotline to receive citizen complaints and detect outbreaks.

Manage disease prevention and control programs.

- ⇒ Manage treatment of and provide medications for TB cases to prevent spread of disease.
- ⇒ Distribute publicly purchased vaccines for children whose families are unable to afford vaccines.
- ⇒ Provide leadership for development of a statewide immunization information collection system.
- ⇒ Investigate cases of HIV, STD, TB and other communicable diseases.
- ⇒ Conduct follow-up to facilitate treatment and counseling to prevent disease transmission.
- ⇒ Coordinate testing of persons in contact with persons who have TB or sexually transmitted diseases.

Develop policy guidelines for infectious disease prevention and control.

- ⇒ Modify and distribute national disease prevention and control guidelines.
- ⇒ Consult with health-care providers on treatment and prevention recommendations
- ⇒ Communicate with schools and health care providers on the school immunization law.

HEALTH DEPT

Program: HEALTH PROTECTION

Activity: INFECT DISEASE EPID PREV CNTRL

Narrative

Provide education for health care professionals and the general public on identification, prevention, transmission and treatment for persons at risk for or affected by disease.

- ⇒ Furnish information to medical providers on current management of infectious diseases. This information is provided on the web, through publications and by direct telephone consultation services.
- ⇒ Develop and implement health education programs for high-risk populations.
- ⇒ Provide information to the public on disease testing, treatment and prevention methods.

Provide grants to local public health agencies and nonprofit organizations.

- ⇒ Administer grant contracts, including 38 HIV/STD health education and risk reduction projects, 35 HIV and seven STD testing sites, and 19 grants to eliminate racial and ethnic health disparities.
- ⇒ Provide technical assistance to organizations receiving grants.
- ⇒ Evaluate performance of grantees based on performance standards.

Involve high-risk communities, the medical community and concerned citizens in assessing, planning, implementing, and evaluating solutions to infectious disease problems that affect them. Examples include:

- ⇒ The Immunization Practices Task Force advises the commissioner of Health on immunization policy.
- ⇒ An HIV/STD task force advises the commissioner on a comprehensive HIV prevention plan.
- ⇒ The Immigrant Health Task Force, jointly sponsored with the Department of Human Services, promotes quality, comprehensive, and culturally competent health care for recent immigrants in Minnesota.

Support work of local public health agencies to provide services to their populations.

- ⇒ Provide technical support to localities for dealing with local outbreaks or disease control issues.
- ⇒ Provide guidelines and technical assistance in developing local programs.
- ⇒ Provide guidelines and standards to develop preparedness and emergency response plans (including bioterrorism) for local health departments, hospitals, and other agencies.
- ⇒ Provide funds for local programmatic activities, through reimbursement and grants.

Historical Perspective

Emergency preparedness activities for this division include smallpox case investigation, contact tracing and mass vaccination programs. The following are some major trends in the division's activities:

- ⇒ In the 1980s, decreased federal funding for childhood immunization programs led to low immunization rates. A nationwide measles outbreak occurred in 1989-1991. Minnesota reported 559 measles cases with three deaths. With increased focus on immunizing every baby, only 54 measles cases have occurred in the last 10 years, most of whom were children born outside the U.S. or unvaccinated due to conscientiously held beliefs. Immunization prevents blindness, deafness, mental retardation and congenital heart disease, substantially reducing the need for state support for life-long care of the disabled. The Centers for Disease Control (CDC) estimates that \$14 is saved for every \$1 spent on measles, mumps, and rubella (MMR) immunization alone.
- ⇒ HIV prevention activities have contributed to the decline in HIV infections over the past 10 years, from 469 new cases in 1991 to 283 in 2000. Preventing HIV infection and AIDS cases provides enormous cost savings to both governmental and private health care funding sources. The annual cost of providing medical care in Minneapolis for an HIV infected person averages \$24,000. Society saves \$12 for every \$1 spent on detecting and treating sexually transmitted diseases.
- ⇒ The number of confirmed food borne disease outbreaks has increased substantially over the past 11 years, from 12 in 1990 to 39 in 2001. This increase is due to changes in food production, food processing, and eating habits as well as finding more outbreaks through improved disease surveillance and new laboratory testing methods. The Minnesota Department of Health (MDH) estimates that 450,000 cases of food borne illness occur each year in Minnesota. Eight Minnesotans died from food borne illness in 2001.
- ⇒ IDEPC has detected and controlled many outbreaks in the past, including the Schwan's salmonella outbreak and the Mankato meningitis outbreak. Recent disease outbreaks include the Cub Foods E.Coli outbreak, the cluster of deaths following knee surgery, the introduction of West Nile Virus and the anthrax attacks on the

HEALTH DEPT

Program: HEALTH PROTECTION

Activity: INFECT DISEASE EPID PREV CNTRL

Narrative

East Coast. Each outbreak generated high levels of public concern. IDEPC will continue to detect and control infectious disease outbreaks as they occur in the future.

Key Measures

Ensure children get a healthy start in life by increasing on-time immunization rates among all children. Delays in immunizations increase the risk of infection and complications from communicable diseases.

Activity Description

The Minnesota Public Health Laboratory (PHL) provides scientific expertise and data used by public health partners for critical intervention and policy decisions regarding biological, chemical, and radiological threats. In addition, the PHL certifies all laboratories that conduct regulated environmental testing in Minnesota and screens all babies born in the state for rare, life-threatening metabolic disorders that are preventable if detected and treated soon after birth.

Population Served

All residents of Minnesota are served by the PHL. Samples for environmental testing, specimens for newborn screening, infectious isolates for reference analyses, and specimens for diagnosing rare diseases are sent to the PHL from local public and private hospitals, laboratories, and other entities throughout the state.

Activity at a Glance

- ◆ Analyzed 86,342 clinical specimens for infectious bacteria, viruses, fungi, and parasites in FY 2002.
- ◆ Performed 87,697 tests to detect chemical and bacterial contaminants in water, soil, and air in FY 2002.
- ◆ Screened 68,157 newborn babies for more than 20 treatable, life-threatening metabolic conditions in FY 2002.
- ◆ Certified 190 public and private environmental laboratories to assure quality in FY 2002.

Services Provided

- ⇒ Analysis of air, water, wastewater, sludge, sediment, soil, wildlife, vegetation, and hazardous waste for chemical and bacterial contaminants.
- ⇒ Testing of hospital and clinic patient specimens for infectious bacteria, parasites, fungi, and viruses.
- ⇒ Application of high-tech molecular methods such as DNA fingerprinting, amplification, and sequencing for rapid, early detection of infectious disease outbreaks and for identifying specific infectious agents.
- ⇒ Testing of each Minnesota newborn for a variety of treatable rare metabolic diseases.
- ⇒ Reference and confirmatory testing of clinical specimens and environmental samples using scientific expertise and state-of-the-art methods not available in other laboratories.
- ⇒ Certification of public and private environmental laboratories that conduct testing for the federal Safe Drinking Water, Clean Water, Resource Conservation and Recovery, and Underground Storage Tank Programs in Minnesota.
- ⇒ Collaboration with public and private laboratories, public safety officials, and federal officials to assure early detection and rapid response to possible agents of chemical and biological terrorism.
- ⇒ Emergency response by trained chemical experts serving on the state's Radiochemical Emergency Response Team, in the event of a release of radioactive chemicals at Minnesota's nuclear power plants.

Historical Perspective

The Minnesota PHL was first established more than 100 years ago. This was during a time in history when the germ theory of infectious disease was first established and little was known about the impact of environmental contamination on the public's health. In the early 1900s, with development of more sophisticated methods and instruments, the PHL became the premiere laboratory in Minnesota with the ability to identify environmental hazards and diagnose epidemic infectious diseases. Today, the PHL focuses on surveillance for early detection of public health threats, identification of rare chemical and biological hazards, emergency preparedness and response, and assurance of quality laboratory data through establishment of collaborative partnerships with clinical and environmental laboratories throughout the state.

Key Measures

Protect the public's health by increasing the percentage of Minnesota laboratories able to recognize possible agents of bioterrorism that must be submitted to the State Public Health Laboratory for confirmation.

HEALTH DEPT

| 33% | 60% |

Source: Minnesota Department of Health

Note: The State Public Health Laboratory provides hands-on laboratory training to assure that Minnesota laboratories have the ability to recognize possible agents of bioterrorism. Possible agents are sent to the State Public Health Laboratory for further analysis and specific identification. Through this public-private partnership, Minnesota is able to detect and respond rapidly to a suspected terrorism.

Improve health outcomes for Minnesota newborn babies by increasing the number of treatable inborn metabolic disorders identified and confirmed as positive.

Number of newborns identified with treatable disorders

| Historical 1993-2000 | Current 2001 | Target 2002-2003 | Target 2004 |
|-------------------------|-----------------|---------------------|----------------|
| 32-50 (range) | 58 (actual) | 71 | 192 |

Source: Minnesota Public Health Laboratory

Note: In 2001, the PHL introduced high-tech tandem mass spectrometry to screen newborns for additional treatable inborn metabolic disorders. Early identification and treatment of these disorders is crucial for successful outcomes.

Activity Description

The Office of Emergency Preparedness (OEP) is the activity within the department established to give strategic leadership, direction assessment and coordination to activities to ensure statewide readiness, interagency collaboration local and regional preparedness for bioterrorism, other outbreak of infectious disease and other public health threat and emergencies.

Population Served

All residents of the state of Minnesota are served by this activity. The activity involves local health departments, Indian tribes, Emergency Management Agencies, National Guard, Emergency Medical Services, Office of Rural Health, police, fire departments, other rescue personnel, health care providers, associations of health professionals, Red Cross, volunteer agencies, and the hospital community in preparedness activities.

Services Provided

To carry out the assigned responsibilities, the OEP performs the following activities:

- ⇒ Set the strategic direction of health preparedness activities in Minnesota.
- ⇒ Facilitates cross-discipline planning and implementation
- ⇒ Assures compliance with requirements of grants from the Centers for Disease Control (CDC) and Health Resources Services Administration (HRSA).
- ⇒ Leads the planning for the health response to significant health threats, including the response plan to terrorist threats of smallpox, and the distribution plan for the National Pharmaceutical Stockpile
- ⇒ Conducts a variety of needs assessments of the public health system capacities related to bioterrorism, and other infectious disease outbreaks and emergencies.
- ⇒ Assesses statutes and regulations within the state and local public health jurisdictions regarding authority for implementing emergency public health measures.
- ⇒ Operates the Health Alert Network, the Minnesota Department of Health (MDH) tool for timely threat communications to local public health.
- ⇒ Oversees the development of education and training materials for building the capacity of local public health to respond to threats of terrorism and other infectious disease.
- ⇒ In conjunction with the MDH Community Health Division, OEP administers over \$5 million in grants to Community Health Boards and Tribes, and over \$2 million in grants to hospitals to build public health and health care preparedness.
- ⇒ OEP is accountable for bringing together staff located throughout MDH in implementing grant objectives, and responsible for working with local public health partners and others leaders in a variety of related fields to better prepare Minnesota for public health emergencies, and response to acts of bioterrorism.

Key Measures**Assessment and Training**

Assess state and local capacity to respond to a bioterrorism event or other health threat. Based on assessment, implement training and technical assistance to bring capacity to standards set by CDC Bioterrorism and Preparedness Grant Guidance and address Minnesota-specific needs. Build capacity of local public health for just-in-time training by the installation, testing, and use of distance learning technology.

Planning and Coordination

Develop and test plans for all aspects of local, regional and statewide incident response in consultation with partners including hospitals, tribal governments, local public health, emergency management, fire, police and others who may be involved in response to a health threat. Develop emergency preparedness and response

Activity at a Glance

The Office of Emergency Preparedness was created as a requirement of federal grants received by the department.

The department received a grant for over \$17 million for Public Health Preparedness and Response for Bioterrorism.

The department also received a \$2.2 million grant for Hospital Preparedness Program.

HEALTH DEPT

Program: HEALTH PROTECTION

Activity: OFFICE OF EMERGENCY PREPAREDNS

Narrative

systems to support epidemiology and surveillance systems, the public health laboratory, and risk communication efforts.

Communication

Operate the Health Alert Network and enhance the electronic systems that support it. Plan, implement, test, and support communication systems that include: MDH staff 24/7 alert, inter-departmental routine communication of grant related work, inter-agency communication including MDH, DEM, Minnesota Department of Agriculture (MDA), Minnesota Department of Natural Resources (DNR), and others as appropriate, 24/7 alert of local public health and hospital emergency departments, web-based secure site for vital information transactions during a health threat event and routine communication of grant related work.

Protect public health by increasing the percent of city and county public health agencies (n=91) with high-speed, continuous Internet access and an electronic connection to the Health Alert Network (HAN).

| | History | Current | Target |
|-----------------------------------|---------|---------|--------|
| | 2001 | 2002 | 2003 |
| Continuous, high-speed connection | 79% | 99% | 100% |

Source: MDH Health Alert Network survey of local public health agencies

Note: Local response to HAN messages is now less than two hours. (During September 11th, MDH issued a HAN message and all local departments had responded *prior* to the federal notification on the HAN by the Centers for Disease Control.)

Protect public health by increasing the percent of city and county public health agencies (n=91) that can be reached for emergency notification 24 hours a day, 7 days a week.

| | History | Current | Target |
|-------------------|---------|-----------------------------|--------|
| | | 2002 | 2003 |
| 24/7 notification | N/A | (assessment in October '02) | 100% |

Activity Description

The Finance and Administrative Management Activity provides internal business systems and central support services to all programs of the department in order to make maximum utilization of all agency resources. Critical responsibilities of this activity include the anticipation of and planning for the future. This activity continuously reviews the need for and quality of its services to assure they are provided in the most cost efficient manner.

Activity at a Glance

- ◆ Maintained 99.9% availability and functionality of core information technology infrastructure.
- ◆ Recruited 200 new employees annually.
- ◆ Paid 99.4% of all vendor invoices in 30 days or less.
- ◆ Implemented improved physical and systems/ data security at all office facilities.

Population Served

This activity serves all 1,350 employees of the department by providing facilities, human resources, financial, and information technology services; works with the vendors providing goods and services needed to carry out state public health programs; works with grantees receiving funds through the department; works with landlords providing space needed to carry out programs; and job applicants seeking employment with the department.

Services Provided

The departmental services provided by this activity are divided into four categories.

Facilities Management

- ⇒ Manages building operations of all Minnesota Department of Health (MDH) office facilities including physical security and parking.
- ⇒ Provides mail distribution, printing, duplication, warehouse, and other central services.
- ⇒ Provides administrative support in all MDH district offices across the state.
- ⇒ Manages a central conference center for use by MDH, local partners, and other state agencies.

Financial Management

- ⇒ Provides budget planning and development for all departmental resources.
- ⇒ Manages centralized budget management, accounting, reporting, and cash management.
- ⇒ Provides centralized procurement of goods and contract services.
- ⇒ Provides monitoring, financial reporting, and technical assistance required for federal grants.

Human Resources

- ⇒ Manages the recruitment, development and retention of qualified staff.
- ⇒ Manages all departmental labor relations, employee benefits, and health and safety activities.
- ⇒ Manages employee compensation and provides payroll services for all departmental staff.
- ⇒ Manages departmental equal opportunity and affirmative action activities.

Information Systems and Technology Management

- ⇒ Provides technical expertise, planning, and development of technology systems and data architectures.
- ⇒ Provides high level security for all departmental data, systems and communications.
- ⇒ Manages departmental communications networks and telecommunications systems.
- ⇒ Manages MDH central networks and infrastructure connecting all employees and 11 building locations.

Activity Funding

This activity provides the majority of it direct services to MDH programs and employees so that they may efficiently and effectively carry out their public health program responsibilities. The majority of the financial support for this activity is obtained through the assessment of an indirect cost rate to all programs. The current rate is 19.4% of all direct costs and has remained stable for the past several years. The demand for the services

HEALTH DEPT

Activity Description

The Commissioner's Office provides the vision and strategic leadership for creating effective public health policy for the state of Minnesota. It also oversees the management of the entire agency, including budget activities, administrative functions and the department's eight divisions. It carries out its mission in partnership with a wide range of external organizations that help to promote and protect the health of all Minnesotans.

Several key functions take place through the Commissioner's Office, including Planning Coordination and Performance Measurement, Government Relations, Library Services, and Communications.

Activities at a Glance

- ◆ Strategic leadership and planning
- ◆ Performance measurement coordination
- ◆ Budget and administrative management
- ◆ Government relations and policy development
- ◆ Library services
- ◆ Communications and public awareness

Population Served

The department's 1,300 employees work to protect and promote the health of all Minnesotans. The department carries out its mission in close partnership with other state agencies, elected officials, health care and community organizations, and public health officials at the federal, state and local levels.

Services Provided**Executive Leadership, Planning Coordination and Performance Measurement**

- ⇒ The Commissioner's Office develops and implements department policies and provides leadership to the state in developing public health priorities.
- ⇒ The Commissioner's Office directs the annual development of a set of public health strategic directions current, priority public health issues to provide guidance for agency activities and to more effectively engage the department's public health partners.
- ⇒ The Commissioner's Office also directs the development of meaningful performance measures for every major agency activity and works closely with the governor's office on department results and outcome measures for a citizen audience. .

Government Relations

- ⇒ Government Relations is responsible for leading and coordinating state legislative activities and monitoring federal legislative activities to advance the departments' priorities and mission.
- ⇒ Throughout the legislative session and during the interim, Government Relations is a contact for the public, other departments, legislators and legislative staff.
- ⇒ This activity works closely with the governor's office, department divisions, legislators, legislative staff, and other state agencies to communicate the department's strategies and priorities.

Communications

- ⇒ The Communications Office is responsible for leading and coordinating communications on statewide public health issues and programs.
- ⇒ The office works closely with the news media, including issuing an average of 75 news releases and responding to thousands of media inquiries each year.

Library Services

- ⇒ The Library Services is responsible for locating, organizing, sharing and distributing information; coordinating the purchase of books and journals; and assisting clients' research in library materials, databases and the Internet.
- ⇒ The R.N. Barr Library provides access to information for Minnesota Department of Health (MDH) staff, local public health agencies and school nurses. The public is welcome to use materials on-site. This library also distributes posters, pamphlets, brochures and other department publications.

HEALTH DEPT

Program: MANAGEMENT & SUPPORT SERVICES

Activity: EXECUTIVE OFFICE & COMM

Narrative

⇒ The Audiovisual Library has a large collection of videos on health-related subjects is available to the public through this library.

Key Measures

Improve agency performance by increasing the number of department activities that develop and communicate meaningful measures focused on results.

| | History | Current | Target |
|--|---------|---------|--------|
| | 2000 | 2002 | 2003 |
| Major department activities with quantitative performance measures | 38 % | 70 % | 90% |

Source: MDH Executive Office

Note: The Commissioner's Office has made measurable results a key emphasis in the agency's *Strategic Directions*. Five of 13 major department activities had measures that were included in the Governor's "Department Results" web site in 2001. The Commissioner's Office is currently working with each major agency activity to develop quantifiable indicators of performance that reflect outcomes important to the citizens of Minnesota.

Improve department effectiveness by increasing the percent of reports and other information that have a communications plan to ensure the information reaches the intended audiences. (Future measure: 2003 goal of 80% of publications with a communications plan.)

Source: MDH Communications Office

Improve effectiveness of department communications by conducting periodic on-line surveys and improving user satisfaction with department web site. (Future measure: 2003 goal of 75% satisfied users.)

Agency Purpose

The Minnesota Higher Education Facilities Authority (hereafter called the Authority) was created by the State Legislature in 1971 for the purpose of assisting nonprofit institutions of higher education within the State in financing or refinancing capital construction projects by issuing tax-exempt revenue bonds. Beginning in FY 1988, the legislature also asked that the Authority finance limited types of projects at certain public higher education institutions. The Authority receives no general fund tax dollars or any other legislative funding. The operating funds come from fees charged to the institutions that benefit from tax-exempt bonds.

Core Functions

The Authority operates under a board of ten members, eight of whom are appointed by the Governor with the advice and consent of the Senate. A representative of the Minnesota Higher Education Services Office and the President of the Minnesota Private College Council, are the two ex-officio members of the Authority.

The Authority issues tax-exempt revenue obligations and enters into agreements with higher education institutions to be responsible for the use of the loan proceeds and to repay the bondholders. The Authority has access to capital improvement funds only through borrowing directly. When a higher education institution needs funds for capital improvements, the Authority is able to provide more favorable interest rates because of its status as a government entity. Since the Authority is an agency of the State, the interest paid by the institution to the bondholders is exempt from both state and federal income taxes. The Authority has no liability to repay the bondholders.

Core functions support the goal of issuing tax-exempt revenue obligations in an efficient and cost-effective manner for higher education institutions. The core functions are:

- ◆ develop Authority expertise and educate institutions on financing options;
- ◆ provide analysis and consulting in developing institutional capital financing options; and
- ◆ manage Authority operations without increasing fees.

The functions support ongoing operating goals:

- ◆ provide a consistent and efficient process for obtaining tax-exempt financing;
- ◆ educate institutions through the application guide, newsletters and annual educational forum on market, legal and accounting considerations;
- ◆ provide specific analysis and consulting for institutional capital financing plans; and
- ◆ assist institutions with investor relations, post-closing compliance and rating agency reviews.

Operations

The Authority serves eligible higher education institutions throughout Minnesota by providing access to tax-exempt interest rates. Access to capital improvement funds is essential to long-term viability of institutions dedicated to educating Minnesota's workforce. Students benefit because lower borrowing costs reduce the pressure to increase tuition costs.

The Authority operates with the advice and leadership of a board of ten people and a staff of three people. The board meets monthly and acts incrementally on the application for financing and the financing structure of all bond issues. For each bond issue, a law firm to serve as bond counsel is appointed by the Attorney General. A

At A Glance

The Higher Education Facilities Authority assists nonprofit institutions of higher education in financing capital projects through the issuance of tax-exempt debt.

- ◆ The Authority is authorized to have a maximum total of \$650 million outstanding bond principal.
- ◆ In FY 2001, the Authority completed three financings for a total of \$34.7 million.
- ◆ The total bond principal outstanding at June 30, 2001 was \$464,942,557.
- ◆ 21 nonprofit, post-secondary institutions in Minnesota have utilized the program of the Authority and realized interest savings on financing their capital improvements.

financial advisor firm is retained by the Authority to advise on the financial feasibility and structure of each bond issue.

In general, except for payroll administration, the Authority's staff is responsible for all operations relating to the core functions. Staff receives minimal services from other state agencies (other than payroll and legal services). As a result, the Authority's operations have a neutral impact on the state's biennial budget and capital budget.

Budget

Operating expenses of the Authority are paid by a fee charged to each participating institution. The Authority receives no general fund tax dollars or other legislative funding. The Department of Finance administers the three-person payroll using dedicated receipts deposited monthly by the Authority.

Agency Purpose

The purpose of the Minnesota Higher Education Services Office (MHESO) is stated in the agency mission:

- ◆ achieve student financial access to post-secondary education;
- ◆ enable students to choose among post-secondary education options;
- ◆ protect and inform educational consumers;
- ◆ produce independent, statewide information on post-secondary education; and
- ◆ facilitate interaction among and collaborate with organizations that share responsibility for education in Minnesota.

Core Functions

MHESO's specific core statutory responsibilities are as follows:

- ◆ administration of state financial aid programs for students;
- ◆ negotiation and administration of statewide interstate tuition reciprocity programs;
- ◆ publication and distribution to students and parents of information about academic and financial preparation, including financial aid;
- ◆ approval, registration, and licensure of private colleges and career schools;
- ◆ oversight of statewide library service programs that improve access to information and support cost-effective library operations;
- ◆ administration of the Minnesota Education Telecommunications Council;
- ◆ collection, maintenance and analysis of student enrollment and financial aid data;
- ◆ administration of statewide federal programs; and
- ◆ prescribing policies, procedures, and rules necessary to administer the programs under MHESO's supervision.

Operations

Through delivery of its core programs, MHESO affects several primary constituencies including college students, students and families who are preparing for post-secondary education, colleges and universities that participate in providing distance learning opportunities and library services for students, researchers, and policymakers who use statewide post-secondary education data.

MHESO's programs and services are provided through different means including:

The Minnesota State Grant Program (which provides more than \$100 million in need-based aid to Minnesota students annually), and other student financial aid programs such as the Post-Secondary Child Care Grant Program, State Work Study Program, and the Public Safety Officers' Survivors Benefit Program. Other core programs are the Student Educational Loan Fund (SELF), the Minnesota College Savings Plan, and the Interstate Tuition Reciprocity Program. These programs enable thousands of Minnesota students to have financial access to, and choice of, post-secondary educational opportunities.

At A Glance

Two-year State Budget:

\$315.2 million General Fund
 \$242.5 million Student Loan Fund
 \$ 15.9 million Federal & Agency Funds

Over 90% of the general fund's appropriation is for student and school grants.

Annual Business Processes:

\$123 million in grants to 60,000 students
 \$100 million in student loans to 28,000 students
 \$ 12 million in work study to 10,000 students

32,000 students participate in the Interstate Reciprocity Program.

140 private institutions registered or licensed.
 300,000 requests per year for MINITEX library information resources.

MHESO's publications, videos, web page content, and direct contact with students and families enable the agency to provide outreach to communities of color, low income families, and families with no previous higher education experience. The Get Ready! Program working in tandem with the federally-sponsored GEAR UP (Gaining Early Awareness and Readiness for Undergraduate Programs) and Intervention for College Attendance Program Grants help to sustain a continuum of contact and service to low income students from 4th grade through high school as they prepare for college admission and attendance.

MHESO's web site includes information for students and parents; enrollment data which can be customized by the user; information concerning private post-secondary institutions licensed or registered by MHESO; on-line tuition reciprocity applications; and a financial aid estimator.

The MINITEX Library Information Network provides students, scholars, and residents of Minnesota and contiguous states with cost effective access to a wide range of library resources and information, including delivery of interlibrary loan materials, cooperative licensing, and access to electronic resources. The Minnesota Library Information Network (MnLINK) is a statewide virtual library that electronically links major Minnesota libraries. The MnLINK Gateway connects the online catalogs of 20 Minnesota library systems and selected commercial databases so that they appear to a user as a single source of information. The MnLINK Integrated Library System is being implemented as a shared library automation system for the University of Minnesota, Minnesota State Colleges and Universities, Minnesota state agencies and interested private college, public, school, and special libraries.

The Learning Network of Minnesota provides access to educational programs and library resources through telecommunications technology. The Learning Network enables students to have access to learning opportunities that otherwise would be unavailable at their college or in their geographic area.

Through state laws which undergird the registration and licensure of private colleges, universities, and career schools, MHESO provides students with consumer protection by assuring that private post-secondary institutions meet state standards in order to operate legally in Minnesota.

Budget

The agency's 2002/2003 budget totaled \$574 million. Agency staff include 113 full-time equivalent employees, of which 32 are state funded.

Of the total budget, \$315.2 million is from general fund tax dollars, \$8.3 million is from federal grants, \$242.5 million is from the student loan fund, and \$7.6 million is received from special revenue resources.

Program Description

Minnesota's financial aid policy, the Design for Shared Responsibility, enables people to enhance their self-sufficiency by facilitating financial access for residents, regardless of their economic status, to attend the institution that can best meet their educational needs. The Design for Shared Responsibility assigns responsibility for paying for post-secondary education to students, families, and taxpayers. Students, as primary beneficiaries, are assigned a significant payment responsibility. The remainder of the price is assigned to families and taxpayers. Assignments to families are based on their ability to pay.

Minnesota State Grants, working in combination with Federal Pell Grants, provide coverage of the Assigned Taxpayer Responsibilities, as necessary. Minnesota Work Study jobs assist students in earning money to help meet their assigned payment responsibilities. Minnesota Student Educational Loan Fund (SELF) loans, along with other federal and private loans, enable students and their families to defer part of their payment responsibilities until after the student completes his or her academic career.

For the 2002-2003 biennium, the objectives for student financial aid are to:

- ⇒ Enable residents of Minnesota to enroll in a post-secondary institution.
- ⇒ Support the ability of students to choose the post-secondary institution that best meets their educational needs, regardless of their financial circumstances.
- ⇒ Help pay for child care if students need such assistance to attend post-secondary institutions.
- ⇒ Expand work opportunities so that students can earn income to help pay for post-secondary education.
- ⇒ Encourage post-secondary participation by providing information about college and how to pay for college, especially to low-income families, and families of color.

To compete in today's global economy, most Minnesotans will enroll in some form of post-secondary education. As education has become more and more essential, Minnesota has enacted significant programs of financial aid and other assistance so that barriers to post-secondary education can be overcome. The activities under this program are part of the state's strategy to keep education affordable and accessible for all Minnesota families.

The important issues facing student financial aid services are to reach decisions that will:

- ◆ reflect accurate and increasing prices for post-secondary education so that students do not fall behind in their ability to pay educational expenses;
- ◆ maintain eligibility requirements for student aid that are consistent with enrollment patterns of today's students;
- ◆ expect a rigorous but reasonable investment by students in their own educations and provide flexible opportunities to meet this expectation through work and borrowing;
- ◆ meet obligations under interstate tuition reciprocity agreements that reduce the price of educational options available to Minnesota residents; and
- ◆ respond to changes in Minnesota's increasingly diverse population by providing information and other support mechanisms for low-income students and families to increase their awareness of post-secondary educational opportunities, and the steps they must take to prepare academically and financially to access such opportunities.

Budget Activities Included:

- ⇒ Minnesota State Grants (includes Post-Secondary Child Care Program, Safety Officers Survivors, and Summer Scholarships)
- ⇒ Interstate Tuition Reciprocity
- ⇒ State Work Study
- ⇒ College Savings Plan
- ⇒ Student & Parent Information
- ⇒ Student Financial Aid Services

HIGHER EDUCATION SVCS OFFICES

Program: STUDENT FINANCIAL AID SERVICES

Activity: STATE GRANTS

Narrative

Activity Description

The State Grant Activity provides financial aid to Minnesota residents attending Minnesota post-secondary institutions. Programs under this activity are funded from General Fund appropriations.

Minnesota State Grant Program M.S. 136A.121 The State Grant Program is the foundation of post-secondary financial aid assistance grants for undergraduate students.

In the 2002-03 academic year, students pay average tuition and fees of \$2,912 in the technical colleges, \$3,040 in community colleges, \$4,088 in state universities, \$6,430 at the University of Minnesota, and \$19,014 at private liberal arts colleges. State Grants help maintain an appropriate and reasonable distribution of the price of post-secondary education among students, families and taxpayers so that Minnesotans of all economic backgrounds can choose and attend Minnesota post-secondary institutions. The State Grant Program is designed to respond to actual charges for tuition and estimated living costs.

The program accommodates a wide array of undergraduate students and student choices. There are no age or educational program restrictions. Students may be enrolled for as few as three semester credits. Undergraduates may attend any Minnesota public post-secondary institution and most Minnesota private post-secondary institutions.

Minnesota State Grants are based on a policy called the Design for Shared Responsibility, which assigns specific responsibilities for paying the price of attendance to students, families, and taxpayers. Minnesota State Grants are determined by establishing a price of attendance and then subtracting the amount of that price assigned to students, families, and the amount paid by taxpayers through Federal Pell Grants.

The Design starts with a recognized price of attendance defined as tuition and fees plus a standard living and miscellaneous expense allowance. The allowance is established by legislation and reflects the prices of room and board, books, supplies, and miscellaneous expenses. For students attending public and private institutions, actual tuition and fees are used up to a tuition maximum that limits the recognized price. The price of attendance for each term is based on each student's actual tuition and fees (up to a tuition and fee maximum) and the living allowance. The tuition and fee maximum and living allowance are based on 15 credits and are proportionately reduced if the student enrolls for fewer credits.

Under the Design for Shared Responsibility, students are assigned a major part of the price of attendance, which can be covered by savings, earnings, loans, or assistance from institutional or private sources. The amount assigned to students should be rigorous, but reasonable for students to assume with work or borrowing if necessary. The current Assigned Student Responsibility is 46% of the price of attendance.

The remaining part of the price is assigned to families and taxpayers. The dollar amount assigned to families is based on the family's income and net worth. Some students who meet specific criteria are eligible to apply as independent students. These students are assigned a family responsibility based on their ability to pay similar to the way the state assigns payment responsibility to the parents of dependent students.

The policy assigns taxpayers the responsibility for covering the amount not assigned to students and families. Taxpayers' assignments are covered by a combination of Federal Pell Grants which students receive from the federal government and Minnesota State Grants from the state government. The basic strategy of the Design for Shared Responsibility is that Minnesota should set state policy for the appropriate responsibilities of students

Activity at a Glance

From 2001-02:

- ◆ Minnesota State Grants
Number of Awards: 71,281
Total Award Amount: \$125,646,035
- ◆ Minnesota Post-Secondary Child Care Grants
Number of Awards: 2,492
Total Award Amount: \$4,750,526
- ◆ Safety Officers Survivor Grants
Number of Awards: 12
Total Award Amount: \$38,191
- ◆ Minnesota Summer Scholarships for Academic Enrichment
Number of Awards: 304

Total Award Amount: \$191,001

Program: STUDENT FINANCIAL AID SERVICES

Activity: STATE GRANTS

Narrative

themselves, their families, and taxpayers for the accurate price of attending post-secondary education. Minnesota leverages the taxpayer-provided aid invested in the students through the Federal Pell Grant Program and appropriates sufficient state funds to help ensure that the remaining taxpayer responsibility is picked up by the State Grant for students who qualify.

Minnesota Post-Secondary Child Care Grant Program M.S. 136A.125

Minnesota students with young children face additional expenses associated with child care while attending school. To help offset the price paid for child care services, Post-Secondary Child Care Grants are made available to students who: have children 12 years of age and younger (14 years of age and younger if the child has a disability); do not receive assistance under the Minnesota Family Investment Program (MFIP); and who need child care assistance in order to attend an eligible Minnesota post-secondary school. A maximum grant award (\$2,600 per year, per child for a full-time student) is established in statute. Grant awards are based on family income and family size. Students may receive grant assistance for up to 40 hours/week per eligible child. The selection of recipients is made on campus from an allocation made to the institution from the state appropriation.

Summer Scholarships for Academic Enrichment M.S. 126.56

The Summer Scholarships for Academic Enrichment Program encourages talented Minnesota students in grades 7-12 to pursue academic development and exposure to post-secondary education opportunities during the summer. Low-income Minnesota students in grades 7-12, who attend eligible summer academic programs sponsored by Minnesota post-secondary institutions, are eligible for tuition grants. Students must have a B average overall or in the relevant subject area for the academic term prior to application. Grants for actual tuition costs, up to \$1,000, are made to students based on family income and household size. The program is publicized by Minnesota secondary schools, summer enrichment programs offered by Minnesota post-secondary institutions, the Minnesota Minority Education Partnership Inc., and the Academic Excellence Foundation.

Learn and Earn

The Office hold funds that were earned by one cohort of high school students under the Learn and Earn Program administered by the Department of Children, Families, & Learning. Students have until ten years after their graduation to use the funds for post-secondary expenses.

Advanced Placement/International Baccalaureate Grant M.S. 136A.124

The Advanced Placement/International Baccalaureate Grant Program is a new program, which provides an award for Minnesota high school graduates with a qualifying score on five or more AP or IB full-year tests and attend a Minnesota four-year post-secondary institution or a public two-year institution.

Public Safety Officers' Survivor Grant M.S. 299.45

The Public Safety Officers' Survivor Grant program honors public safety officers killed in the line of duty and assures that their survivors will be able to afford higher education tuition. Dependent children and surviving spouses may receive assistance under this program. The commissioner of Public Safety certifies that the applicant is a survivor of a public safety officer killed in the line of duty. Eligible applicants receive grant assistance to enroll in an undergraduate or certified program at a Minnesota post-secondary institution. The grant is equal to the tuition and fees charged by that institution up to the amount of the highest tuition and fees charged by a Minnesota public institution.

YouthWorks Post Service Benefits

One cohort of Minnesota high school students in FY 1996 which performed services to their community through the Federal AmeriCorps Program had their educational benefits funded by the state of Minnesota under the YouthWorks Program. The Minnesota Higher Education Services Office for up to seven years holds the funds. This will end FY 2003. The funds may be used to pay for college tuition, repay an educational loan, or pay for expenses incurred funding an approved apprenticeship. The 2001 legislature authorized "any appropriations remaining after final benefits are paid to YouthWorks grantees may be used for college early intervention programs."

Described above.

Key Measures

The Minnesota State Grant Program manages the impact of paying for post-secondary education on Minnesota students and families. It is a major way in which the state has supported student financial access to post-secondary education and the financial ability of students to choose among post-secondary options according to their educational needs. The current appropriation recognizes the actual prices paid by students attending public institutions, a legislatively determined tuition maximum, a livable allowance for living and miscellaneous expenses, and a manageable Assigned Student Responsibility.

Activity Description

The Minnesota College Savings Plan encourages individuals and families to save for post-secondary education.

A parent, grandparent, or other individual can establish an account for an account beneficiary who will attend college in the future. An account may be opened with a \$25 check or money order, electronic funds transfer, or automatic contribution plan. Account owners can also contribute \$15 per investment option per pay period using payroll deductions through participating employers. Three investment options are available to account owners: 1) an all equity option, 2) a managed, age-based, option with the investment becoming more conservative as the account beneficiary nears college attendance, and 3) a guaranteed option set at 4.70% through March 31, 2003. Account owners may transfer all or any portions of their funds invested in a particular investment option to another investment option once per calendar year or upon a change of the account beneficiary. There is a \$235,000 investment maximum. Earnings in the Minnesota College Savings Plan are tax deferred while invested and tax free when distributed for qualified higher education expenses. Qualified expenses are defined in federal law and include tuition and fees plus room and board if the student attends at least half-time and books, supplies, and equipment required for enrollment.

Activity at a Glance

- ◆ There were 13,723 Minnesota College Savings Plan accounts with nearly \$53 million invested on July 31, 2002.
- ◆ Through FY 2002, 773 account beneficiaries have received matching grants based on 2001 contributions.

Investment management, record keeping and other administrative expenses are paid by Minnesota College Savings Plan account owners through an annual fee equivalent to .65% of their account balances. There are no other fees or charges. The Minnesota Higher Education Services Office and the Minnesota State Board of Investment have contracted with TIAA-CREF, Tuition Financing, Inc. to manage the Minnesota College Savings Plan.

The state of Minnesota provides a matching grant to account beneficiaries from low- and middle-income Minnesota families. The matching grant is available to Minnesota resident account beneficiaries whose parent file a Minnesota individual income tax return with federal adjusted gross income \$80,000 or less. If the beneficiary's family income is \$50,000 or less, 15% of the contribution can be matched, up to a total of \$300 annually. If the beneficiary's family income is between \$50,000 and \$80,000, 5% of the contribution can be matched up to a total of \$300 annually. A minimum \$200 contribution is required in order to be considered for a matching grant. Matching grants must remain invested for a minimum of three years, cannot be transferred, and cannot be withdrawn for reason other than a qualified higher education expenditure as defined by federal law the matching grant is not an entitlement. The state of Minnesota retains ownership of matching grants until all requirements for the grant are met. Availability is limited by the amount of funds appropriated.

Population Served

The Minnesota College Savings Plan is available to any person as permitted under Section 529 of the United States' Internal Revenue Code. Minnesota College Savings Plan data from the end of the first quarter 2001 showed 96% of accounts were owned by Minnesota residents, and Minnesota residents held 92% of Plan assets. Non-Minnesota account owners are likely to be grandparents or relatives of a Minnesota resident account beneficiary.

Services Provided

Account owners are provided with a low-cost, tax-advantaged post-secondary education savings instrument. Accounts may be opened online. Account owners have online access to account data, investment performance, and account service forms at www.mnsaves.org. Account information and services are also available from a toll free telephone number, 1-877-338-4646. Account owners receive quarterly statements. Minnesota College Saving Plan marketing emphasizes the importance of financially planning for post-secondary education.

Historical Perspective

The Minnesota College Savings Plan opened on September 20, 2001.

Program: STUDENT FINANCIAL AID SERVICES

Activity: MN COLLEGE SAVINGS PROGRAM

Narrative

Key Measures

The Minnesota College Savings Plan supports the Minnesota Higher Education Services Office mission of helping students achieve financial access to and choice among post-secondary educational options.

Minnesota's 529 College Savings Plan was one of five state plans awarded "high achiever" status in recent *USA Today* analysis of 43 savings programs nationally. Minnesota's plan was praised for featuring low expenses and matching grants for low-income residents. The *USA Today* report, published July 8, 2002, indicated that all the top plans share one characteristic: below-average fees and expenses. The Minnesota Plan is among the least costly to account owners for a fully contracted college savings plan in the United States.

The Minnesota College Savings Plan received a "5 cap rating", with the state Plan receiving the top rating from a leading expert on College Savings Plans (www.savingforcollege.com).

Program: STUDENT FINANCIAL AID SERVICES

Activity: INTERSTATE TUITION RECIPROCITY

Narrative

Activity Description

Minnesota's tuition reciprocity agreements enhance student access by eliminating nonresident admission barriers and expand student choice by reducing non-resident tuition prices. Minnesota has ongoing tuition reciprocity agreements with Wisconsin, North Dakota, South Dakota, one institution in Iowa, and the Canadian province of Manitoba. The purpose of tuition reciprocity is the mutual improvement of educational advantages for the residents of Minnesota and other states or provinces with whom agreements are made (*M.S. 136A.08*).

Residents of the participating jurisdictions are considered residents for purposes of admission to public post-secondary institutions under tuition reciprocity. A Minnesota resident may enroll in an undergraduate or graduate program at a public institution in Wisconsin, North Dakota, South Dakota, Manitoba, or Iowa Lakes Community College without paying higher non-resident tuition rates, through tuition reciprocity. Similarly, residents of Wisconsin, North Dakota, South Dakota, Manitoba, and the Iowa Lakes Community College attendance area may enroll at Minnesota public institutions without paying higher non-resident tuition rates.

The Minnesota Higher Education Services Office is responsible for negotiating and administering tuition reciprocity agreements. The University of Minnesota Board of Regents and the Minnesota State Colleges and Universities Board of Trustees must ratify the agreements. Modifications to Minnesota's tuition reciprocity agreements are negotiated as needed.

Population Served

Student participation in tuition reciprocity has grown since Minnesota first entered an agreement with Wisconsin for academic year 1968-69. Over 36,000 tuition reciprocity students were enrolled in public institutions in the participating states and province in fall 2000.

Key Measures

Through its mission, the Higher Education Services Office is committed to helping students achieve financial access to post-secondary education and enabling students to choose among post-secondary educational options. Tuition reciprocity agreements support the mission of the Services Office by reducing price and admissions barriers at public institutions outside the student's state or province of residence.

Activity Funding

The state appropriation for tuition reciprocity meets Minnesota's financial obligation to Wisconsin and North Dakota. Agreements with South Dakota, Manitoba, and one institution in Iowa do not require interstate payment calculations.

Students and taxpayers share responsibility for financing tuition reciprocity. Minnesota's agreements with Wisconsin and North Dakota require each state to pay the marginal instructional costs of their resident students attending in the other state. Marginal instructional costs are defined in the agreements as 64% of instructional costs. Marginal instructional costs in the Minnesota/Wisconsin and Minnesota/North Dakota agreements exceed \$150 million annually. Student paid tuition is subtracted from marginal instructional costs to determine each state's net financial obligation. The state with the higher net financial obligation makes a payment of the difference to the other state.

Activity at a Glance

FTEs for 2000-01

- ◆ Interstate tuition reciprocity payments represent less than 5% of the total financial activity involved in the agreements.
- ◆ 16,396 Minnesota students participate in FY 2000.
- ◆ 5,125 North Dakota residents participate.
- ◆ 2,089 South Dakota residents participate.
- ◆ 92 Iowa residents participate.
- ◆ 60 Manitoba residents participate.
- ◆ 12,233 Wisconsin residents participate.

Program: STUDENT FINANCIAL AID SERVICES

Activity: INTERSTATE TUITION RECIPROCITY

Narrative

Three variables drive Minnesota's tuition reciprocity financial obligation: 1) marginal instructional costs, 2) reciprocity tuition rates, and 3) student enrollment choices. Minnesota's tuition reciprocity payments have varied as much as \$4 million between any two fiscal years as marginal costs, tuition rates, and student enrollment choices vary. Minnesota's interstate tuition reciprocity payments to Wisconsin and North Dakota totaled \$3.1 million in FY 2002.

Program: STUDENT FINANCIAL AID SERVICES

Activity: STATE WORK STUDY

Narrative

Activity Description

The State Work Study Program is campus based. Allocations are made to participating institutions that use the funds to make work-study awards to their students. Institutions are responsible for identifying on and off-campus job opportunities that allow students to earn their work-study awards. Direct appropriations cover up to 75% of the wages paid to work study students. The employers pay the remaining 25%. Institutions and other employers set wage rates for work-study positions.

The State Work Study Program plays a significant role in assisting many Minnesota students. Institutions that attract older students, part-time students, and other students who are likely to already be employed enroll proportionately fewer students interested in work-study positions. Each year, funds are reallocated from some institutions unable to utilize their allocations to other institutions with unmet demands for work-study jobs.

Activity at a Glance

- ◆ The State Work Study Program is popular with both students and institutions because it usually provides jobs that are convenient to students and helps integrate students into the campus community. In FY 2002, 12,018 students received \$12,949,544 in State Work Study funds as the 75% match to their state work-study wages.
- ◆ All State Work Study funds for FY 2003 were moved to the State Grant Program in order to make full State Grant awards.

As required by Minnesota Laws 2002, Chapter 374, The Minnesota Higher Education Services Office (MHESO) moved all the funds in the FY 2003 State Work Study Program into the State Grant Program in order to make full awards in the State Grant Program.

Population Served

The program serves Minnesota undergraduate and graduate students who demonstrate financial need and who are enrolled for at least six credits per term in an attending eligible Minnesota institutions.

Historical Perspective

The State Work Study Program was created in 1975 to assist students in paying for their education by providing opportunities to work on and off-campus. Most state work study jobs are on-campus, but the program has always allowed and encouraged institutions to arrange jobs with nonprofit community organizations, senior citizens, and persons with disabilities. In 1997, the statute was amended to permit the use of State Work Study funds for internship positions with for-profit businesses if the internship is directly related to the student's field of study.

Under Minnesota's financial aid policy, all students are expected to contribute 46% of their price of attendance. Work study earnings can help students fulfill their responsibility in paying their share of the price of attendance. For FY 2002 institutions were allowed to award State Work Study up to the Student Share used in the Design for Shared Responsibility calculation for the Minnesota State Grant. Only ten institutions used this new feature so 327 students received awards under this new method. Therefore, most State Work Study awards are restricted to students who show "financial need," and students' past earnings can restrict their eligibility.

Key Measures

- ⇒ Enable residents of Minnesota to enroll in a post-secondary institution.
