II. Commission of Administration and Finance - 1925

In 1925, the Legislature created a Department of Administration and Finance⁶ under the control of the Commission on Administration and Finance, which consisted of a Comptroller, a Commissioner of the Budget, and a Commissioner of Purchases,⁷ all appointed by the Governor for six-year terms, but subject to removal at any time without cause.⁸ It had essentially all the powers now assigned to the Commissioner of Management and Budget and the Commissioner of Administration, including personnel powers, plus the post-audit and program evaluation powers of the Legislative Auditor.⁹ The State Auditor continued to issue warrants and approve them for payment, but subject to review and reversal by the Comptroller.¹⁰

ĝ.

The law prohibited a state officer or agency from spending any part of an appropriation until an estimate of the amount needed for each quarter of the fiscal year had been submitted to and approved by the Commission of Administration and Finance.¹¹ For the first time, the Commission was given explicit authority to "modify or amend" an estimate it had previously approved.¹²

III. Reorganization Act of 1939

Following the recession of 1937, caused by the federal government attempting to balance the budget by raising taxes and cutting spending before the economy had recovered from the Great Depression, Governor Harold Stassen in 1939 faced a budget deficit for the coming biennium of about ten percent of state spending.¹³ He proposed to eliminate it by cutting spending almost four percent and increasing revenue by over six percent.¹⁴ This meant spending \$3 million less in the next biennium than the \$82 million spent in the last biennium.¹⁵ His spending cuts included \$600,000 from eliminating the three-headed Department of Administration and Finance and replacing it with

a single Commissioner of Administration and Accounting, "with definite quarterly allotment control and the encumbering of accounts for all liabilities when they occur, [to] avoid the recurring deficits which we have experienced."¹⁶ He added that, "It should also be mandatory to reduce allotments if revenues decrease¹⁷

Laws 1939, chapter 431, transferred the budgetary and purchasing functions of the Department of Administration and Finance to a single Commissioner of Administration¹⁸ and gave its post-audit functions to a new Department of Public Examiner.¹⁹ A separate bill, Laws 1939, chapter 441, gave its personnel functions to a new Department of Civil Service. As the Governor had proposed, the Commissioner of Administration was given authority to reduce allotments to prevent a deficit:

In case the commissioner shall discover at any time that the probable receipts from taxes or other sources for any appropriation, fund, or item will be less than was anticipated, and that consequently the amount available for the remainder of the term of the appropriation or for any allotment period will be less than the amount estimated or allotted therefor, he shall, with the approval of the governor, and after notice to the agency concerned, reduce the amount allotted or to be allotted so as to prevent a deficit. In like manner he shall reduce the amount allotted or to be allotted to any agency by the amount of any saving which can be effected upon previous estimates through a reduction in prices or other cause.²⁰

The allotment and encumbrance system did "not apply to appropriations for the courts or the legislature, nor to payment of unemployment compensation."²¹

A diligent search of records since 1939 by the Legislative Reference Library has not yet discovered any evidence that this unallotment authority (as distinguished from the normal modification of spending plans from time to time) was used before 1980.

IV. Department of Finance - 1973

In 1973, Governor Wendell R. Anderson proposed creation of a new Department of Finance. Laws 1973, chapter 492, transferred the duties of the Commissioner of Administration relating to the budget and the controller functions of the State Auditor to the Commissioner of Finance.²² The requirement that allotment periods be quarterly was stricken, and the fiscal year ending June 30 was substituted.²³ Agencies were required to submit a spending plan for the fiscal year to the Commissioner of Administration, who was authorized to approve or amend it after consulting with the Commissioner of Finance.²⁴

The authority of the Commissioner of Administration to reduce allotments to prevent a deficit was amended to add the Commissioner of Finance to the process. The Commissioner of Finance notified the Commissioner of Administration of the deficit, then the Commissioner of Administration was required to obtain the approval of the Governor and notify the agency concerned, and then request the Commissioner of Finance to reduce the allotment to prevent a deficit.²⁵ This circular procedure was stricken in 1978.²⁶

V. Budget Troubles of 1980-83

Al Quie campaigned for governor in 1978 on a slogan that, (paraphrasing) "If I can't cut taxes by ten percent and still make government run better, I won't make excuses, I just won't run again." He defeated Rudy Perpich for re-election and pushed his tax cut through the 1979 Legislature. By 1980, the economy was in recession and revenues were falling. In August 1980, Governor Quie became the first governor currently known to have used the 1939 allotment reduction authority enacted under Governor Stassen. He did it on his own, without first calling a special session or engaging in formal discussions with legislators, because, as he said, "I wanted to save Republican legislators from the pain of making the cuts or raising taxes."²⁷ He reduced allotments

by \$195.1 million, including \$89.5 million in aids to school districts, \$35 million in aid to higher education, \$20.9 million in aid to local governments, and \$49.4 million to state agencies.²⁸

Shortly after the new Legislature convened in 1981, the members showed their outrage at the Governor's action by removing the authority to reduce allotments of aid to school districts,²⁹ and requiring that the amounts not paid because of the unallotment in 1980 be paid to school districts no later than August 1, 1981, from revenue received in fiscal year 1982.³⁰ Their outrage was short lived, as the continuing deterioration of the state's finances compelled them to reduce aid to school districts in the 1981 Third Special Session,³¹ and they found it prudent to reinstate the authority to unallot aid to school districts.³²

In 1981, the Legislature acted to reduce the need for allotment reductions by prolonging the time a deficit might persist before it must be dealt with. The 1973 Legislature had changed the period that had to be balanced from a fiscal quarter to a fiscal year.³³ The First Special Session in 1981 changed it from each fiscal year to the biennium.³⁴ This gave the State longer to recover from the fiscal problem it was facing at the time, but it also enabled the Legislature and the Governor to avoid dealing with future fiscal problems until they got really, really big.

As the budget troubles continued, the Legislature attempted to forestall the need for allotment reductions by creating a budget reserve. It was to be financed by a transfer from the general fund surplus (the unrestricted balance) at the end of each biennium, if the surplus exceeded \$25 million, with the amount of the transfer capped at \$100 million.³⁵ Thereafter, one-half of the remainder of the unrestricted balance would be transferred until the balance in the budget reserve equaled 2.5

³⁵ Act of July 2, 1981, 2nd Spec. Sess. ch. 1, § 2, 1981 Minn. Laws 2587, codified as amended at Minn. Stat. § 16A.152, subds. 1a-2.

percent of appropriations from the general fund for the current biennium.³⁶ The budget reserve would be available to replace lost revenue, but only after the Commissioner of Finance had consulted with the Legislative Advisory Commission about its use.³⁷

The Legislature also wanted to be better informed about any allotment reductions that were made. The 1981 Third Special Session added a requirement that the Commissioner of Finance notify the Senate and House committees on Finance, Appropriations, and Taxes within 15 days after an allotment had been reduced or a payment delayed.³⁸

The 1983 Legislature changed the relationship between the budget reserve and allotment reductions. As enacted in the 1981 Second Special Session, the Commissioner of Finance had a choice of methods to eliminate a deficit: either transfer money from the budget reserve (after consulting with the Legislative Advisory Commission) or reduce allotments, or any combination of the two.³⁹ The 1983 Legislature changed that to give primacy to using the budget reserve: it required the Commissioner of Finance to first transfer money from the budget reserve (with the approval of the Governor and after consultation with the Legislative Advisory Commission) and then (with the approval of the Governor and after consultation with the Legislative Advisory Commission) reduce allotments.⁴⁰

The statute is silent on what happens if the Governor refuses to approve the use of the budget reserve. If so, presumably the Commissioner would have to reduce allotments. This makes sense, since a prudent fiscal manager would save the budget reserve for use late in a biennium, when it is too late to stop spending money that has already left the treasury or to collect new revenue before the biennium ends.

The 1983 amendments also authorized the Commissioner of Finance to "consider other sources of revenue available to recipients of state appropriations and apply allotment reductions based on all sources of revenue available."⁴¹ The purpose of this was to justify larger cuts to higher

⁴¹ Act of June 14, 1983, ch. 342, art. 18, § 1, 1983 Minn. Laws 2168, 2354, codified as amended at Minn. Stat. § 16A.152, subd. 4(d).

education systems, school districts, and local governments than to state agencies, since state agencies did not have the ability to increase tuition or property taxes to make up for the reduced allotments of state appropriations.

Finally, the 1983 amendments authorized the Commissioner of Finance to "delay payment of an amount up to 15 percent of an appropriation due to a special taxing district or a system of higher education in that entity's fiscal year for up to 60 days after the start of its next fiscal year."⁴² This was a way to ease the State's cash flow problems temporarily without necessarily having to reduce the allotment. If it proved necessary, the delayed amount was subject to allotment reduction.⁴³

VI. Revisor's Bill of 1984

Laws 1984, chapter 628, article 2, was a Revisor's Bill that rewrote and improved the style of Minnesota Statutes, chapter 16A, including the language on allotment reductions, without intending to change its meaning.⁴⁴

VII. Budget Troubles of 1985-87

The budget troubles of 1980-83 had caused Governor Al Quie to announce that he would not run again, and Rudy Perpich had been elected to his first full term as governor in 1984. But Republicans, led by Speaker David Jennings, had campaigned on the promise of a \$1 billion tax cut and had taken control of the House of Representatives at the same election.

The 1985 regular session ended without enacting the necessary budget bills. The last of them was enacted at a special session that ended June 21, 1985.

The 1985 First Special Session sorted the allotment reduction authority by fund, making the use of the budget reserve a tool only for balancing the general fund (as it was always assumed to be).⁴⁵ The same law changed the name of the budget reserve account to the budget reserve and cash flow account, to reflect the fact that not all the money in the budget reserve could be used to avoid the need for allotment reductions—some was needed to make payments in months when cash was

low.⁴⁶ It provided for the budget reserve and cash flow account to be replenished later in a biennium, after having been drawn down because of a revenue shortfall, if the Commissioner of Finance determined "that there will probably be a positive undesignated balance in the general fund at the end of the biennium."⁴⁷

The 1985 First Special Session also authorized the Commissioner of Finance to order the Commissioner of Revenue to delay the payment of property tax reduction aids and local government aids from November 15 to December 15 if necessary to avoid the State having to borrow for its own cash flow.⁴⁸ That authority was repealed in 1986.⁴⁹

The budget enacted at the 1985 First Special Session did not remain in balance for long. By the 1986 regular session, the State faced a \$734 million general fund budget deficit.⁵⁰ Speaker Jennings led the House to adjourn sine die in mid-March without the concurrence of the Senate and without having balanced the budget. A one-day special session in April produced a bill that addressed the tax issues⁵¹ and made cuts to K-12 education⁵² and higher education⁵³ but did not incorporate the cuts to state agencies that were pending in a conference committee, leaving a budget gap of \$109.8 million.⁵⁴ Governor Perpich closed that gap by reducing allotments to state agencies by \$43.9 million.⁵⁵ and to the Department of Human Services by \$42.6 million,⁵⁶ generally in accordance with the Senate position in conference committee. In addition, he canceled \$.5 million from appropriations made in prior fiscal years, returned to the general fund \$9.5 million that had

⁵⁶ Van Dyck.

been transferred to other funds in prior fiscal years, and canceled \$.2 million in appropriations from prior years that had been carried forward into fiscal year 1986, for a total reduction from prior years of \$10.1 million.⁵⁷

The 1986 First Special Session changed the terms used to describe the use of the budget reserve. Instead of saying that amounts were transferred from the budget reserve and cash flow account to the general fund, it said that the amount in the budget reserve and cash flow account was reduced.⁵⁸ This was to reflect the fact that the account was already in the general fund; it was just being used to restrict part of the balance in the general fund so that it would not be spent until necessary.

In May 1986, Governor Perpich sought advice from Commissioner of Finance Jay Kiedrowski on whether his unallotments could be restored. The commissioner told him "there is no precedent on restoration of unallotments" and that any positive balance shown in a new forecast would be allocated by statute to specific purposes, such as restoring the budget reserve.⁵⁹ He summarized his advice as follows:

- 1. Unallotments may be adjusted *within* an agency *anytime without* LAC consultation;
- 2. Unallotments may be adjusted among agencies *only before the next forecast with* LAC consultation provided the overall reductions remain the same; and
- 3. Unallotments may not otherwise be restored without changing current statute.⁶⁰

The 1987 Legislature explicitly authorized the Commissioner of Finance to make the reductions to "unexpended allotments of any prior appropriation or transfer" that Commissioner Kiedrowski had made in 1986.⁶¹ It also authorized the commissioner, "[n]otwithstanding any other law to the contrary... to defer or suspend prior statutorily created obligations which would prevent effecting such reductions."⁶² This was intended to clarify that, just because a statutory formula said,

for example, that a school district was entitled to be paid aid of so many dollars per student, that did not mean the aid allotment could not be reduced.

VIII. Separation of Cash Flow Account from Budget Reserve - 1995

The last significant change related to the authority to reduce allotments was made by the 1995 Legislature at it First Special Session. It separated the budget reserve and cash flow account into two separate accounts, so that the amount set aside for cash flow is not available to reduce a deficit in the general fund.⁶³

IX. Budget Troubles of 2003

In the fall of 2001, even before the November forecast was released, Governor Jesse Ventura's Commissioner of Finance, Pam Wheelock, announced that the general fund faced a serious deficit for the biennium ending June 30, 2003. The governor proposed a combination of spending cuts and tax increases to balance the budget. Legislative leaders, including both Senate Majority Leader Roger Moe, who was seeking the Democratic nomination for governor, and House Majority Leader Tim Pawlenty, who was seeking the Republican nomination for governor, preferred to balance the budget by making one-time transfers of money from other funds to the general fund and by excluding inflation from the spending side of the forecast. The plan of the leaders was enacted by overriding two of Governor Ventura's vetoes during the 2002 regular session.⁶⁴

Tim Pawlenty defeated Roger Moe in the 2002 governor's race, and took office in January 2003 facing a deficit of \$355.5 million for the biennium ending June 30, 2003.⁶⁵ After a conference committee failed to reach agreement on a bill to balance the budget, Finance Commissioner Dan McElroy, with the approval of Governor Pawlenty, drew down \$23.9 million from the budget reserve and reduced allotments of prior appropriations and transfers by \$273.4 million.⁶⁶ The Commissioner also persuaded the Legislature and the courts to voluntarily cancel \$8.2 million of their appropriations, and the Commissioner of Revenue delayed payment of \$50 million of refunds of sales taxes on capital equipment.⁶⁷ Those four actions, taken together, balanced the 2003 budget.

\$49 million of the unallotments was a transfer back of a prior year appropriation to the 21st Century Minerals Fund. That unallotment was upheld by the Minnesota Court of Appeals.⁶⁸

X. Budget Troubles of 2004

In February 2004, Commissioner of Finance Peggy Ingison forecast a general fund deficit of \$159.5 million for the biennium ending June 30, 2005.⁶⁹ The 2004 regular session provided for an automatic buyback of shifts in aid to school districts when revenue became available in the future, up to 90 percent of entitlements.⁷⁰ But when it adjourned without balancing the budget, Governor Pawlenty took "executive action" to do so. His action included reducing the transfer of revenue from the general fund to the health care access fund by \$110 million, reducing the sale of state bonds to save \$27 million in debt service, generating \$7.9 million in additional revenue from tax compliance activities, and imposing a three percent reduction in state executive agency operating budgets to cancel \$16.6 million.⁷¹ The commissioner and the governor did not seek the advice of the Legislative Advisory Commission or characterize the executive actions as allotment reductions under \$16A.152, subd. 4. They did not require, but requested, the Secretary of State, Attorney General, and State Auditor to make the same three percent reduction to their operating budgets as mandated for executive branch agencies.⁷²

XI. Budget Troubles of 2005

The State faced serious budget problems again in 2005. By the end of the regular session, only three of seven omnibus appropriation bills had been enacted.⁷³ State government suffered a

partial shutdown before a temporary appropriation bill was enacted July 9, 2005.⁷⁴ The remaining bills were enacted by July 14, 2005.⁷⁵ No allotment reductions were necessary.

XII. Budget Troubles of 2008-09

The November 2008 forecast projected a deficit in the year ending June 30, 2009, of \$426.3 million.⁷⁶ Commissioner of Finance Tom Hanson, with the approval of the governor, released \$154.9 million from the budget reserve and reduced allotments of prior appropriations and transfers by \$229.2 million on December 22, 2008.⁷⁷ Additional reductions of agency allotments in the amount of \$40 million, and voluntary reductions by the Legislature of \$2.2 million, were made as of February 26, 2009, thus balancing the budget for that biennium.⁷⁸

During the 2009 regular session, Governor Pawlenty eventually signed all the omnibus appropriation bills, with assorted item vetoes, but on May 14, 2009, he announced that he would veto the omnibus tax bill that raised about \$1 billion in revenue and shifted payments to school districts by almost \$1.8 billion to bring the budget into balance.⁷⁹ Rather, he said he would balance the budget by reducing allotments. On May 21, 2009, he made good on his veto threat.⁸⁰ On June 16, 2009, he announced allotment reductions and administrative actions of \$2.7 billion for the biennium beginning July 1.⁸¹

⁷⁸ *Final Report of FY 2009 Allotment Reductions*, Commissioner of Finance Tom Hanson to LAC members, Feb. 26, 2009.

⁷⁹ 2009 H.F. No. 2323, ch. 179.

⁸⁰ Message from Governor Pawlenty to Speaker Kelliher, May 21, 2009.

⁸¹ Proposed Unallotments & Administrative Actions, Dept. of Finance, June 16, 2009.

MINNESOTA STATUTES 2008

16A.152 BUDGET RESERVE AND CASH FLOW ACCOUNTS.

Subdivision 1. **Cash flow account established**. A cash flow account is created in the general fund in the state treasury. Amounts in the cash flow account shall remain in the account until drawn down and used to meet cash flow deficiencies resulting from uneven distribution of revenue collections and required expenditures during a fiscal year.

Subd. 1a. **Budget reserve**. A budget reserve account is created in the general fund in the state treasury. The commissioner of finance shall transfer to the budget reserve account on July 1 of each odd-numbered year any amounts specifically appropriated by law to the budget reserve.

Subd. 1b. **Budget reserve increase**. On July 1, 2003, the commissioner of finance shall transfer \$300,000,000 to the budget reserve account in the general fund. On July 1, 2004, the commissioner of finance shall transfer \$296,000,000 to the budget reserve account in the general fund. The amounts necessary for this purpose are appropriated from the general fund.

Subd. 2. Additional revenues; priority. (a) If on the basis of a forecast of general fund revenues and expenditures, the commissioner of finance determines that there will be a positive unrestricted budgetary general fund balance at the close of the biennium, the commissioner of finance must allocate money to the following accounts and purposes in priority order:

(1) the cash flow account established in subdivision 1 until that account reaches \$350,000,000;

(2) the budget reserve account established in subdivision 1a until that account reaches \$653,000,000;

(3) the amount necessary to increase the aid payment schedule for school district aids and credits payments in section 127A.45 to not more than 90 percent rounded to the nearest tenth of a percent without exceeding the amount available and with any remaining funds deposited in the budget reserve; and

(4) the amount necessary to restore all or a portion of the net aid reductions under section 127A.441 and to reduce the property tax revenue recognition shift under section 123B.75, subdivision 5, paragraph (b), and Laws 2003, First Special Session chapter 9,article 5, section 34, as amended by Laws 2003, First Special Session chapter 23, section 20, by the same amount.

(b) The amounts necessary to meet the requirements of this section are appropriated from the general fund within two weeks after the forecast is released or, in the case of transfers under paragraph (a), clauses (3) and (4), as necessary to meet the appropriations schedules otherwise established in statute.

(c) To the extent that a positive unrestricted budgetary general fund balance is projected, appropriations under this section must be made before section 16A.1522 takes effect.

(d) The commissioner of finance shall certify the total dollar amount of the reductions under paragraph (a), clauses (3) and (4), to the commissioner of education. The commissioner of education shall increase the aid payment percentage and reduce the property tax shift percentage by these amounts and apply those reductions to the current fiscal year and thereafter.

Subd. 3. Use. The use of the budget reserve should be governed by principles based on the full economic cycle rather than the budget cycle. The budget reserve may be used when a negative budgetary balance is projected and when objective measures, such as reduced growth in total wages, retail sales, or employment, reflect downturns in the state's economy.

Subd. 4. **Reduction**. (a) If the commissioner determines that probable receipts for the general fund will be less than anticipated, and that the amount available for the remainder of the biennium will be less than needed, the commissioner shall, with the approval of the governor, and after consulting the Legislative Advisory Commission, reduce the amount in the budget reserve account as needed to balance expenditures with revenue.

(b) An additional deficit shall, with the approval of the governor, and after consulting the legislative advisory commission, be made up by reducing unexpended allotments of any prior appropriation or transfer. Notwithstanding any other law to the contrary, the commissioner is empowered to defer or suspend prior statutorily created obligations which would prevent effecting such reductions.

(c) If the commissioner determines that probable receipts for any other fund, appropriation, or item will be less than anticipated, and that the amount available for the remainder of the term of the appropriation or for any allotment period will be less than needed, the commissioner shall notify the agency concerned and then reduce the amount allotted or to be allotted so as to prevent a deficit.

(d) In reducing allotments, the commissioner may consider other sources of revenue available to recipients of state appropriations and may apply allotment reductions based on all sources of revenue available.

(e) In like manner, the commissioner shall reduce allotments to an agency by the amount of any saving that can be made over previous spending plans through a reduction in prices or other cause.

Subd.5. **Restoration**. The restoration of the budget reserve should be governed by principles based on the full economic cycle rather than the budget cycle. Restoration of the budget reserve should occur when objective measures, such as increased growth in total wages, retail sales, or employment, reflect upturns in the state's economy. The budget reserve should be restored before new or increased spending commitments are made. Subd. 6. **Notice to committees**. The commissioner shall notify the committees on finance and taxes and tax laws of the senate and the committees on ways and means and taxes of the house of representatives of a reduction in an allotment under this section. The notice must be in writing and delivered within 15 days of the commissioner's act. The notice must specify:

(1) the amount of the reduction in the allotment;

(2) the agency and programs affected;

(3) the amount of any payment withheld; and

(4) any additional information the commissioner determines is appropriate.

Subd. 7. **Delay; reduction**. The commissioner may delay paying up to 15 percent of an appropriation to a special taxing district or a system of higher education in that entity's fiscal year for up to 60 days after the start of its next fiscal year. The delayed amount is subject to allotment reduction under subdivision 4.
