## 2009 Revenues, Expenditures, and Debt

## **Description of the Office of the State Auditor**

The mission of the Office of the State Auditor is to oversee local government finances for Minnesota taxpayers by helping to ensure financial integrity and accountability in local governmental financial activities.

Through financial, compliance, and special audits, the State Auditor oversees and ensures that local government funds are used for the purposes intended by law and that local governments hold themselves to the highest standards of financial accountability.

The State Auditor performs approximately 160 financial and compliance audits per year and has oversight responsibilities for over 3,300 local units of government throughout the state. The office currently maintains five divisions:

**Audit Practice** - conducts financial and legal compliance audits of local governments;

**Government Information** - collects and analyzes financial information for cities, towns, counties, and special districts;

**Legal/Special Investigations** - provides legal analysis and counsel to the Office and responds to outside inquiries about Minnesota local government law; as well as investigates allegations of misfeasance, malfeasance, and nonfeasance in local government;

**Pension** - monitors investment, financial, and actuarial reporting for approximately 730 public pension funds; and

**Tax Increment Financing** - promotes compliance and accountability in local governments' use of tax increment financing through financial and compliance audits.

The State Auditor serves on the State Executive Council, State Board of Investment, Land Exchange Board, Public Employees Retirement Association Board, Minnesota Housing Finance Agency, and the Rural Finance Authority Board.

## Scope and Methodology

---

This publication is intended to help local government officials, policy makers, and the public understand city financial operations. The report summarizes, through data tables and charts, the financial operations of the 847 Minnesota cities that provided their financial information to the Office of the State Auditor for calendar year 2009.<sup>1</sup> Minnesota cities are required to submit annual financial reports to the Office of the State Auditor pursuant to Minn. Stat. §§ 6.74-.75 and §§ 471.697-.698.<sup>2</sup>

The data tables presented in this report are divided into governmental funds and proprietary funds. The governmental funds consist of the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. The first section of the report provides an overview of all cities and compares cities over and under 2,500 in population. The second section of the report presents a detailed overview of the financial operations of cities over 2,500 in population. The third section provides a detailed overview of the financial operations of cities under 2,500 in population.

Following the overviews, Tables 6 and 7 present a summary of the activities in the governmental funds of all cities. Tables 8 through 11 present a summary of the governmental funds of cities over 2,500 in population. Tables 12 through 14 present a summary of the governmental funds of cities under 2,500 in population.<sup>3</sup> Tables 15 through 17 present the data by individual city.

Table 18 lists the bonded and other long-term debt outstanding as of December 31, 2009, by individual city. Other long-term debt refers to liabilities such as long-term lease agreements, installment purchase contracts, and notes.

Tables 19 and 20 present an analysis of the 2008 and 2009 unreserved fund balances in the General and Special Revenue Funds of all cities reporting on a modified accrual basis. Table 19 details the actual unreserved fund balances, the percent change in unreserved fund balances from 2008 to 2009, and a comparison to 2009 total current expenditures. Table 20 presents the fund balance data sorted by unreserved fund balances as a percent of total current expenditures.

Cities using a modified accrual basis of accounting report separate fund balances for all of their governmental funds and denote the amounts that are reserved and unreserved. Cities using a cash basis of accounting report a single cash balance for all governmental funds at the end of the fiscal year. An analysis of unreserved fund balances for cities using a cash basis of accounting is therefore not appropriate, and is not provided. Appendix A provides a more detailed discussion of fund balances.

---

<sup>1</sup> The number of Minnesota cities decreased from 855 in 2008 to 854 in 2009 because the City of Ronneby dissolved and became part of Maywood Township. The report only provides information on 847 of the cities because seven cities failed to provide their financial information to the Office of the State Auditor.

<sup>2</sup> Seven cities failed to comply with the reporting requirements of Minn. Stat. §§ 6.74-.75 and §§ 471.697-.698 (see page 2 for list of cities). Failure to comply with these reporting requirements results in the Office of the State Auditor decertifying a city's eligibility to receive Local Government Aid (LGA).

<sup>3</sup> Due to rounding, percentages shown for totals may not equal the sum of the individual percentages.

Table 21 shows municipal enterprises by city. Minnesota cities operate many types of public service enterprises. These enterprises furnish a variety of services and operate wholly or primarily with revenues derived from the sale of goods or services.

In addition to this publication, the Office of the State Auditor maintains an interactive database containing several years of data that can be accessed through the website at: [www.auditor.state.mn.us](http://www.auditor.state.mn.us).

<b>Cities Failing to Report Their Financial Information in 2009</b>				
Aldrich	Conger*	Funkley*	Hitterdahl	Iona
Lake Henry	Williams*			
* These cities also failed to report their 2008 and 2009 data.				

### **Accounting Difference for Cities Over and Under 2,500 in Population**

For cities in Minnesota, the classification as over or under 2,500 in population helps to determine the type of governmental accounting to which they must adhere. All cities over 2,500 in population must have a financial statement in compliance with generally accepted accounting principles (GAAP), which is a modified accrual basis of accounting. The modified accrual basis of accounting recognizes an economic transaction or event as revenues in the operating statement when the revenues are both measurable and available to liquidate liabilities of the current period. Available means collectible in the current period or soon enough thereafter to be used to pay liabilities of the current period. Similarly, expenditures are generally recognized when an event or transaction is expected to draw on current expendable resources.

Cities under 2,500 in population may opt to use a cash basis of accounting. In 2009, 355 of the 634 small cities that reported their financial information (56 percent) opted to use a cash basis of accounting.<sup>4</sup> Cash basis accounting provides for the recording of receipts (revenues) when received in cash and the recording of disbursements (expenditures) when paid in cash.

---

<sup>4</sup> There are 641 small cities but the figure listed here reflects only the 634 cities that provided their 2009 financial information to the Office of the State Auditor.

---

## Executive Summary

---

### Current Trends – All Cities

- Total revenues of the governmental funds for all Minnesota cities totaled \$4.65 billion in 2009. This represents a decrease of 0.3 percent from 2008 revenues. Total revenues of cities over 2,500 in population decreased 0.2 percent, and revenues of cities under 2,500 in population decreased 1.2 percent (pg. 5).
- Total expenditures of the governmental funds for all cities totaled \$5.38 billion in 2009. This represents a decrease of 3 percent from 2008. Total expenditures of cities over 2,500 in population decreased 2 percent, while total expenditures for cities under 2,500 in population decreased 6 percent (pg. 5).
- The largest expenditure categories for both groups of cities are streets and highways and public safety. For large cities, streets and highways accounted for 21 percent of total expenditures, and public safety accounted for 26 percent. For small cities, streets and highways accounted for 22 percent of total expenditures, and public safety accounted for 21 percent (pgs. 5-6).
- In 2009, unreserved fund balances as a percent of current expenditures averaged 102 percent for small cities (89 percent in 2008), compared to 50 percent for large cities (up from 46 percent in 2008) (pg. 6).

### Current Trends – Cities Over and Under 2,500 in Population

- For large cities, half of the revenue categories showed increases while half showed decreases. The categories showing the largest increases were state grants (6 percent) and taxes (3 percent). Those with largest decreases were interest earnings (-48 percent) and county and local grants (-17 percent). Within the taxes category, property taxes were the largest contributor, showing an increase of 5 percent (pg. 11).
- For small cities, four sources of revenue grew between 2008 and 2009: local grants (113 percent), special assessments (10 percent), charges for services (7 percent), and taxes (6 percent). The categories of revenues showing the greatest decreases between 2008 and 2009 were: interest earnings (-33 percent), federal grants (-24 percent), county grants (-22 percent), fines and forfeits (-12 percent) and licenses and permits (-11 percent) (pg. 18).
- In 2009, small cities carried long-term debt of \$1.23 billion, or \$3,020 per capita, compared to \$8.32 billion, or \$2,121 per capita, for large cities (pg. 6).

## Ten-Year Trends – All Cities

### Governmental Revenues

- Over the ten-year period of 2000 to 2009, an examination of city finances shows that when adjusted for inflation<sup>5</sup>, 2009 revenue levels are below 2000 levels. Inflation-adjusted total city revenues decreased 11 percent between 2000 and 2009 (pg. 7).
- Between 2000 and 2009, actual revenues derived from property taxes grew 100 percent, compared to 5.9 percent for revenues derived from intergovernmental sources. When revenues are adjusted for inflation, the ten-year period shows a 41.1 percent increase in property tax revenues, while intergovernmental revenues decreased 25 percent (pg. 7).
- Between 2000 and 2009, the proportion of total revenues derived from property taxes grew from 23 percent in 2000 to 37 percent in 2009. During this same time frame, revenues derived from intergovernmental sources decreased from 30 percent of total revenues to 26 percent (pg. 7).

### Governmental Expenditures

- Actual total city expenditures grew from \$4.12 billion in 2000 to \$5.38 billion in 2009. This represents an increase of 31 percent. Over the ten-year period of 2000 to 2009, an examination of city finances shows that, when adjusted for inflation, 2009 expenditure levels are below 2000 levels and decreased 8 percent over the ten-year period (pg. 9).
- Over the ten-year period, when adjusted for inflation, total current expenditures and total debt service payment grew 7 and 2 percent, respectively, while total capital outlays decreased 36 percent (pg. 10).

---

<sup>5</sup>“Adjusted for inflation” and “constant dollars” refer to data adjusted for inflation using the Implicit Price Deflator for State and Local Governments setting 2000 as the base year (N.I.P.A. Table 1.1.9, December 2009).

---

## Comparison and Overview

---

### 2009 Finances for All Minnesota Cities

#### Revenues

Total revenues of the governmental funds for all Minnesota cities totaled \$4.65 billion in 2009. This represents a decrease of 0.3 percent from 2008 revenues. Total revenues of cities over 2,500 in population decreased 0.2 percent, and revenues of cities under 2,500 in population decreased 1.2 percent.

There are two central differences between cities over and under 2,500 in population as to how they fund services. Cities under 2,500 in population (small cities) are much more dependent on intergovernmental revenues than cities over 2,500 (large cities). In 2009, intergovernmental revenues accounted for 39 percent of total revenues for small cities, compared to 24 percent for large cities. Among all cities, intergovernmental revenues accounted for 26 percent of total revenues.

The second difference is the reliance on tax revenues. Because large cities receive a much smaller portion of their revenues from intergovernmental sources, they more commonly utilize tax revenue streams such as tax increments, franchise, lodging, and local sales taxes. As a whole, tax revenue from all sources accounted for 50 percent of large city revenues, compared to 35 percent of small city revenues, in 2009. Large cities also utilize tax increment financing to a greater extent than small cities. Revenue derived from tax increment accounted for 3 percent of small city total revenues, compared to 7 percent for large cities.

Property taxes account for a similar share of total revenues for these two groups of cities. For large cities, property taxes accounted for 37 percent of total revenues, compared to 32 percent for small cities. For all cities, property taxes accounted for 37 percent of total revenues.

On a per capita basis, large cities had total revenues of \$1,074, and small cities had total revenues of \$1,067.

#### Expenditures

Total expenditures of the governmental funds for all cities totaled \$5.38 billion in 2009. This represents a decrease of 3 percent from 2008. Total expenditures of cities over 2,500 in population decreased 2 percent, while total expenditures for cities under 2,500 in population decreased 6 percent.

The spending priorities of cities under 2,500 in population differ from those cities over 2,500 in population. For example, small cities tend to direct a greater percentage of their resources to general government (17 percent) and less to culture and recreation (7 percent) than cities over 2,500 (10 percent and 12 percent, respectively). The largest expenditure categories for both

groups of cities are streets and highways and public safety. For large cities, streets and highways accounted for 21 percent of total expenditures, and public safety accounted for 26 percent. For small cities, streets and highways accounted for 22 percent of total expenditures, and public safety accounted for 21 percent.

## **Long-Term Debt**

Another area where small and large cities (under and over 2,500 in population) differ is in their use of debt. Overall, small cities tend to carry a greater debt burden than large cities. In 2009, small cities carried long-term debt of \$1.23 billion, or \$3,020 per capita, compared to \$8.32 billion, or \$2,121 per capita, for large cities. While there is no single reason for the higher level of indebtedness per capita among the smaller cities, a primary reason is that the high costs of projects such as wastewater treatment facilities and water and sewer line replacement are spread across fewer people.

## **Unreserved Fund Balances of the General and Special Revenue Funds**

A clear difference between the two city types is in the level of unreserved fund balances. Small cities maintain significantly higher fund balances than large cities. In 2009, unreserved fund balances as a percent of current expenditures averaged 102 percent for small cities (89 percent in 2008), compared to 50 percent for large cities (up from 46 percent in 2008).

Among the 281 small cities that reported a fund balance in 2009, 146 (52 percent) had an unreserved fund balance greater than 100 percent of total current expenditures. Among the 213 large cities, 44 cities (21 percent) had an unreserved fund balance greater than 100 percent of total current expenditures. In 2009, unreserved fund balances as a percent of total current expenditures among small cities ranged from -111 percent in Bigelow to 738 percent in Buffalo Lake. Among large cities, the range was from -20 percent in Caledonia to 246 percent in Waite Park.

The Office of the State Auditor recommends that at year-end, local governments maintain an unreserved fund balance in their General Fund and Special Revenue Funds of approximately 35 to 50 percent of operating revenues, or no less than five months of operating expenditures. If the local government's unreserved fund balance is less than or greater than this recommendation, the local government should be able to explain the reason for the difference.

The Office of the State Auditor recommends that each local government establish a formal policy on the level of unreserved fund balance that should be maintained in the General Fund and Special Revenue Funds. The policy should be set by the governing body and should provide both a time frame and a specific plan for increasing or decreasing the level of unreserved fund balance. If the fund balance does not match the policy, a plan should be developed by the governing body that will allow for compliance with the policy.

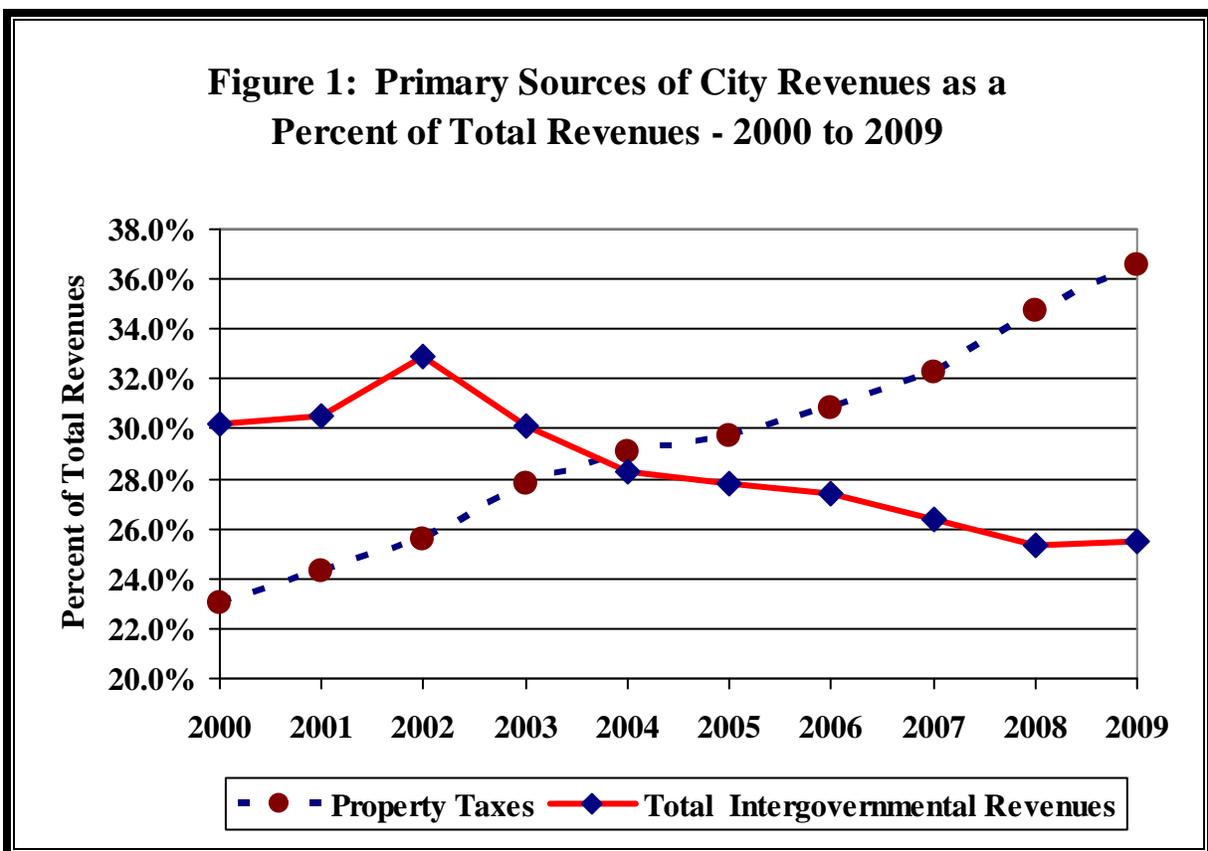

## Ten-Year Trends

### Governmental Revenues

Over the ten-year period of 2000 to 2009, an examination of city finances shows that when adjusted for inflation<sup>6</sup>, 2009 revenue levels are below 2000 levels. Inflation-adjusted total city revenues decreased 11 percent between 2000 and 2009.

Between 2000 and 2009, actual revenues derived from property taxes grew 100 percent, compared to 5.9 percent for revenues derived from intergovernmental sources. When revenues are adjusted for inflation, the ten-year period shows a 41.1 percent increase in property tax revenues, while intergovernmental revenues decreased 25 percent.

In addition, the proportion of total revenues derived from property taxes grew from 23 percent in 2000 to 37 percent in 2009. During this same time frame, revenues derived from intergovernmental sources decreased from 30 percent of total revenues to 26 percent. Figure 1 below shows that, as federal and state governments have reduced the amount of aid to cities, the result has been a greater reliance on revenues derived from property taxes.

<sup>6</sup>“Adjusted for inflation” and “constant dollars” refer to data adjusted for inflation using the Implicit Price Deflator for State and Local Governments setting 2000 as the base year (N.I.P.A. Table 1.1.9, December 2009).

An examination of city revenues from 2000 to 2009 shows that, in actual dollars, revenues grew from \$3.70 billion in 2000 to \$4.65 billion in 2009, an increase of 26 percent. When adjusted for inflation, 2009 revenues are 11 percent less than in 2000. Figure 2 below illustrates this trend.

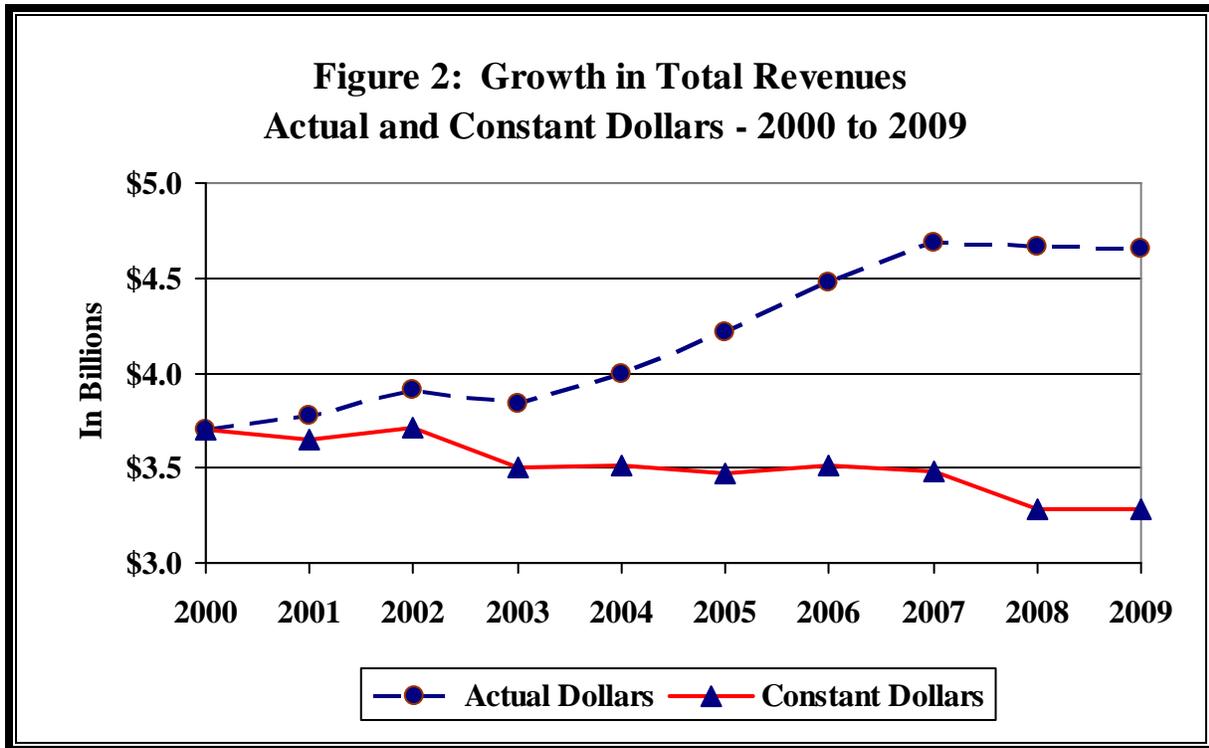

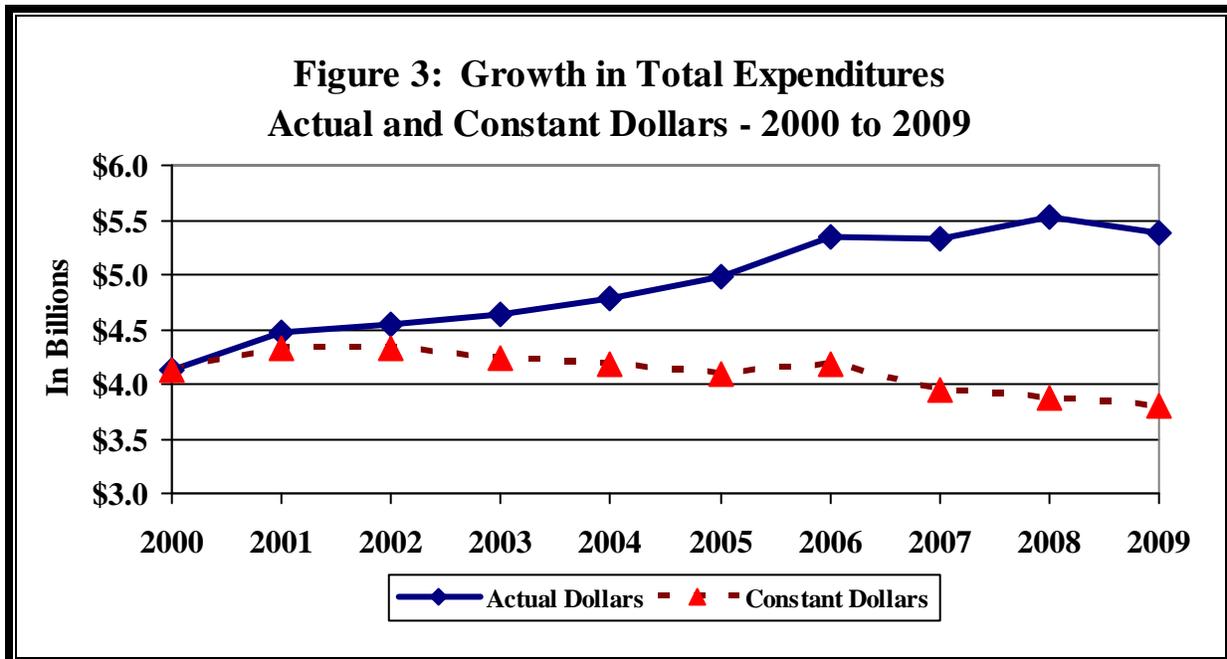

Table 1 on the following page provides a summary of the trend in city revenues from 2000 to 2009 when adjusted for inflation. Taxes and local unit grants were the only sources of revenues to show significant growth over this period, increasing 21 and 9 percent, respectively. Six categories of revenues showed double-digit declines over the ten-year period including interest earnings (-74 percent), all other revenues (-47 percent), licenses and permits (-33 percent), state grants (-32 percent), special assessments (-15 percent), and fines and forfeits (-15 percent).

**Table 1: Total City Revenues in Constant Dollars**

Revenues	2000	2004	2005	2009	2000 - 04	2005 - 09	10-Year
					5-Year	5-Year	
Taxes	\$1,316,978,113	\$1,416,891,780	\$1,417,586,087	\$1,595,049,165	7.6%	12.5%	21.1%
Special Assessments	238,100,604	251,571,314	240,434,483	202,705,463	5.7%	-15.7%	-14.9%

All Other Revenues	290,400,862	230,831,218	213,044,487	153,018,274	-20.5%	-28.2%	-47.3%
<b>Total Revenues</b>	<b><u>\$3,695,693,796</u></b>	<b><u>\$3,511,264,091</u></b>	<b><u>\$3,469,346,037</u></b>	<b><u>\$3,282,397,314</u></b>	<b>-5.0%</b>	<b>-5.4%</b>	<b>-11.2%</b>

### Governmental Expenditures

Actual total city expenditures grew from \$4.12 billion in 2000 to \$5.38 billion in 2009. This represents an increase of 31 percent. Over the ten-year period of 2000 to 2009, an examination of city finances shows that, when adjusted for inflation, 2009 expenditure levels are below 2000 levels and decreased 8 percent over the ten-year period. Figure 3 below shows the contrast between expenditures in actual and constant dollars.

When the three components of city spending (total current expenditures, total capital outlays, and total debt service) are looked at individually, total current expenditures and total debt service each showed growth when adjusted for inflation. Over the ten-year period, when adjusted for inflation, total current expenditures and total debt service payments grew 7 and 2 percent, respectively, while total capital outlays decreased 36 percent.

Table 2 below provides a summary of expenditures from 2000 to 2009 in constant dollars. Those categories showing growth were airports (7 percent), public safety (15 percent), and debt service (2 percent), while all other categories of expenditures decreased over this period.

<b>Expenditures</b>	<b>2000</b>	<b>2004</b>	<b>2005</b>	<b>2009</b>	<b>2000 - 04 5-Year Change</b>	<b>2005 - 09 5-Year Change</b>	<b>10-Year Change</b>
General Government	\$427,077,389	\$404,239,986	\$417,316,907	\$392,033,102	-5.3%	-6.1%	-8.2%

# Overview of Cities Over 2,500 in Population

---

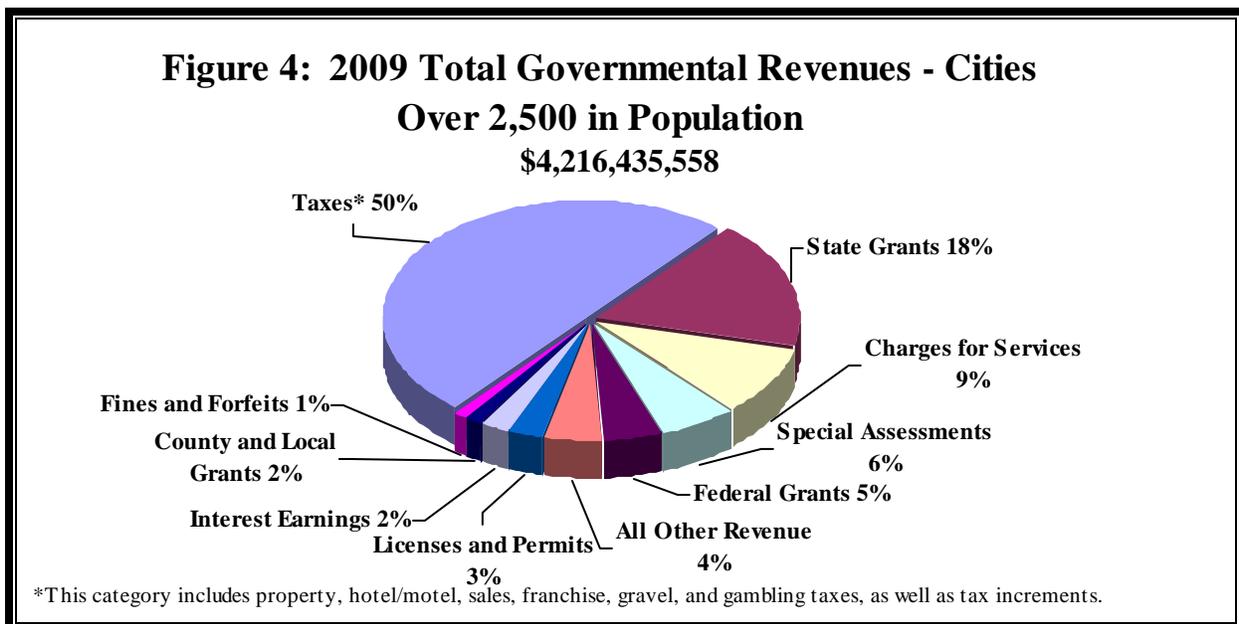

## Total Governmental Revenues

In 2009, cities over 2,500 in population, or large cities, had total governmental revenues of \$4.22 billion. This represents a decrease of 0.2 percent from 2008 levels. This was the second consecutive year of decreasing revenues. The primary revenue sources for cities were taxes and state aid, which accounted for 68 percent of all city revenues.

Among the various categories of large city revenues, half showed increases, while half showed decreases. The categories showing the largest increases were state grants (6 percent) and taxes (3 percent). Those with the largest decreases were interest earnings (-48 percent) and county and local grants (-17 percent). Within the taxes category, property taxes were the largest contributor, showing an increase of 5 percent. State highway grants, which increased 23 percent, were the primary factor in the state grants growth. The decline in interest earnings was widespread and was in part due to a very challenging investment environment. The decrease in county and local grants reflects the completion of projects in several cities that were in part funded by other local governments that benefitted from the improvement.

Although the relative shares of total governmental revenues generally change very little from year to year, a notable exception over the past several years has been the categories of property taxes and intergovernmental revenues. Over the past five years, property taxes as a percent of total revenues increased from 30 percent in 2005 to 37 percent in 2009, while intergovernmental revenues as a percent of total revenues decreased from 27 percent in 2005 to 24 percent in 2009.

Figure 4 below shows the relative shares of total governmental revenues by source. Underlying data for this figure as well as five-year trends can be found in Table 8 on page 28.

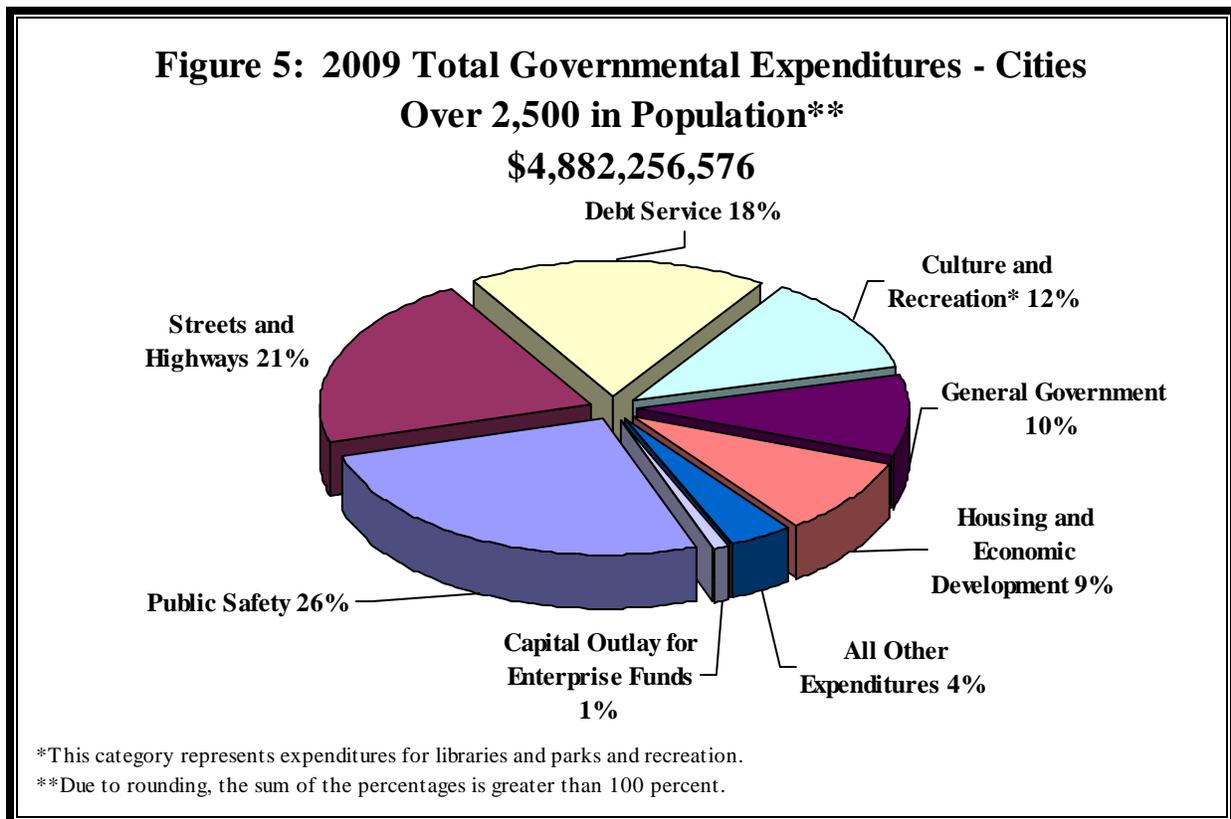

## Total Governmental Expenditures

Cities provide a variety of services. Most expenditures related to these services are accounted for in governmental funds. The governmental funds are classified as the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. In 2009, cities over 2,500 in population expended \$4.88 billion from these various governmental funds to provide city services. This represents a decrease of 2 percent from 2008 total governmental expenditures. Total governmental expenditures include current expenditures, capital outlays, and debt service. Current expenditures accounted for 60 percent of total governmental expenditures, while capital outlay accounted for 22 percent, and debt service accounted for 18 percent.

The largest category of current expenditures for cities over 2,500 in population was public safety, while streets and highways was the largest capital outlay expenditure. Public safety accounted for 40 percent of all current expenditures--more than triple that of any other category. Streets and highways accounted for 59 percent of all capital expenditures, over five times greater than any other category of capital outlay.

Figure 5 shows the relative shares of total governmental expenditures by function. The underlying data for this figure is detailed in Table 9 on page 29.

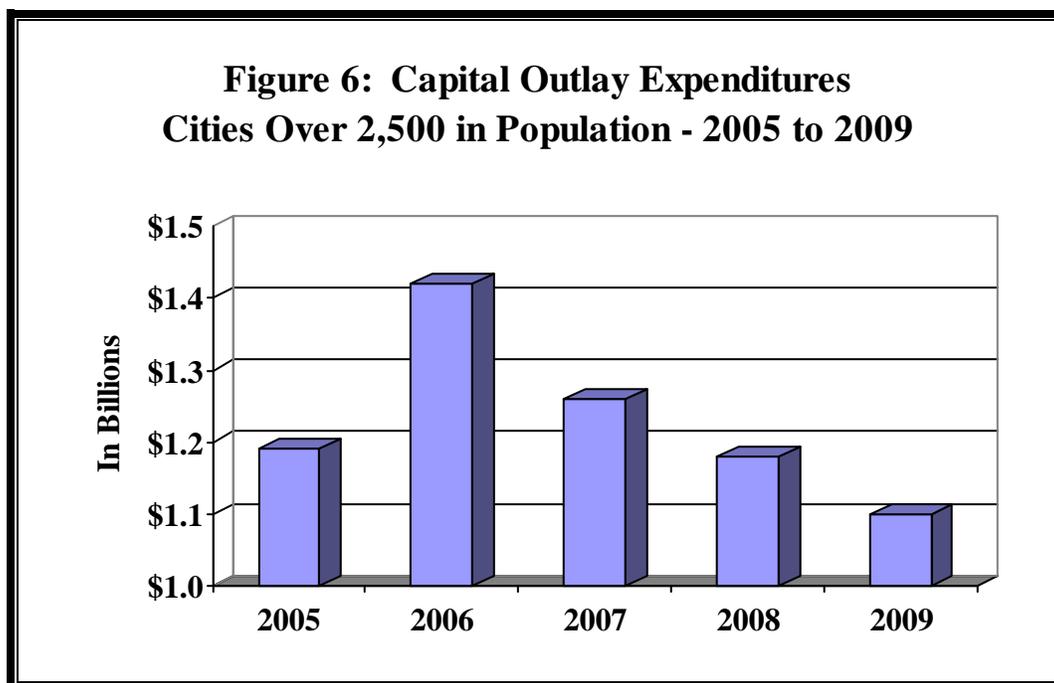

## Capital Outlay Expenditures

Cities over 2,500 in population expended \$1.10 billion on capital investments in 2009. This represents a decrease of 7 percent from the level expended in 2008. More than half (56 percent) of the 224 large cities reported a decrease in capital outlay expenditures between 2008 and 2009. Capital outlay expenditures are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size, but the associated costs are short-term. Table 3 below shows total capital outlays in actual dollars and per capita for large cities.

<b>Table 3: Total Capital Outlay Expenditures in Actual Dollars and Per Capita</b>		
<b>Year</b>	<b>Total Capital Outlay (actual dollars)</b>	<b>Per Capita*</b>
2005	\$1,194,717,585	\$315
2006	\$1,418,495,255	\$371
2007	\$1,258,328,908	\$328
2008	\$1,184,065,833	\$303
2009	\$1,097,801,667	\$280

\* Per capita amounts are based on the total population of cities with over 2,500 in population that reported their financial information.

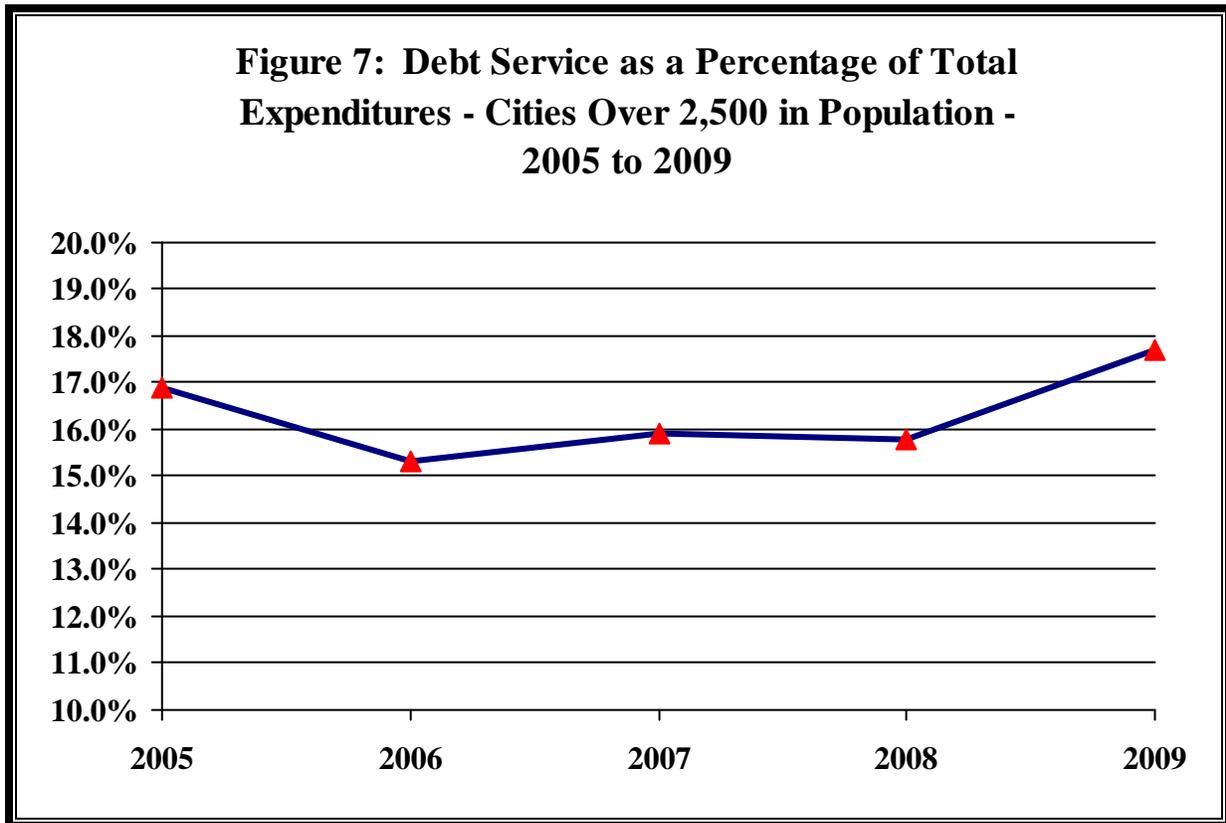

Figure 6 below illustrates the trend in capital outlay expenditures for the years 2005 to 2009.

## Debt Service

In 2009, large cities expended a total of \$862.6 million on debt service, which represented 18 percent of total expenditures. Debt service includes expenditures for the principal and interest payments of debt incurred by cities. Between 2008 and 2009, large city debt service expenditures increased \$72.5 million, or 9 percent. The large increase in debt service is primarily due to a number of cities issuing refunding bonds and making large principal payments to retire existing bonds.

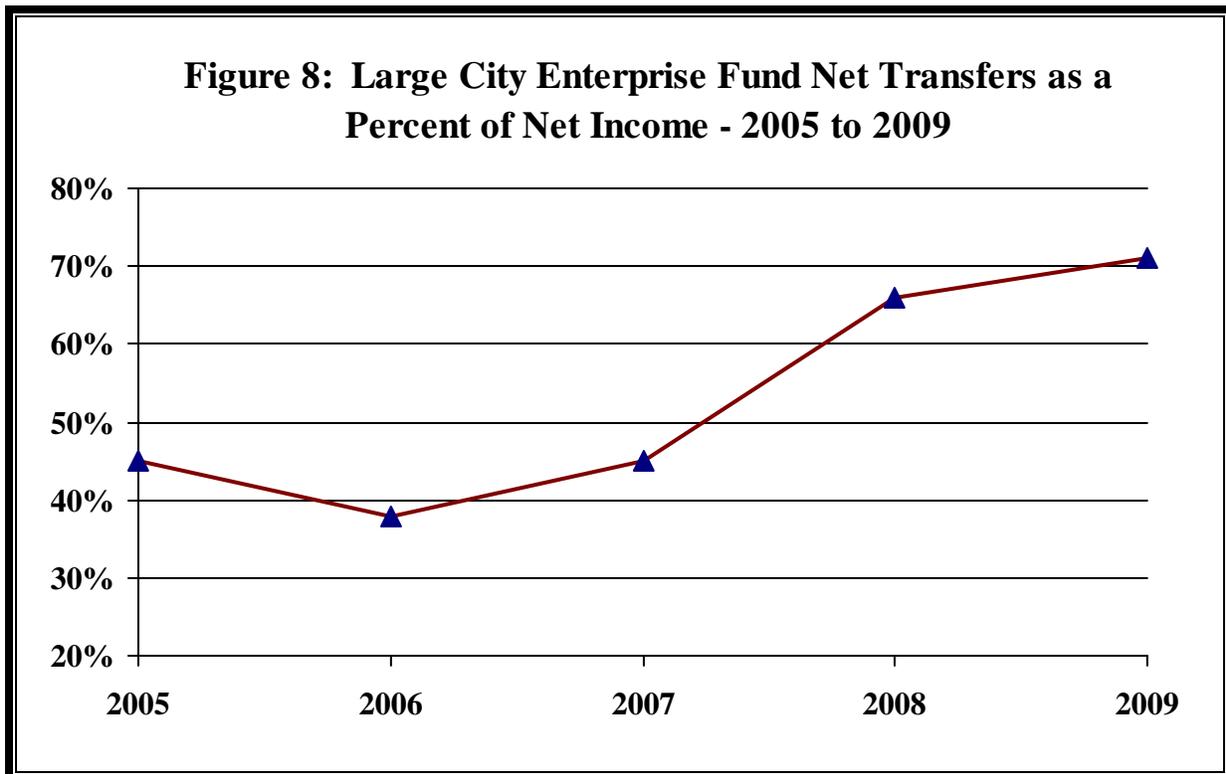

Figure 7 below shows the trend in the percentage of total expenditures allocated to debt service.

## Municipal Enterprises

In addition to governmental funds, many cities establish enterprise funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises generally are intended to be self-sustaining through fees and user charges. Although some enterprises may earn a net profit, most have the objective of breaking even. However, some municipalities choose to subsidize an enterprise that benefits the community as a whole. Enterprise fund accounting is also used to provide more detailed financial information on operations where there are public policy, accountability, management control, and other concerns. The most common enterprises created by large cities are for recreation, sewer, and water activities.

In aggregate, large city municipal enterprises reported a net income of \$213.7 million and net transfers (transfers out minus transfers in) of \$151.5 million in 2009. This represents an increase of 14 percent in net income and a 22 percent increase in net transfers. An example of this type of transfer is when city officials transfer excess reserves from the Water Utility Enterprise Fund to the General Fund. Overall, net transfers represented 71 percent of net profits among large city enterprises. Figure 8 below examines the five-year trend for large cities in net transfers from enterprise funds as a percent of their net income.

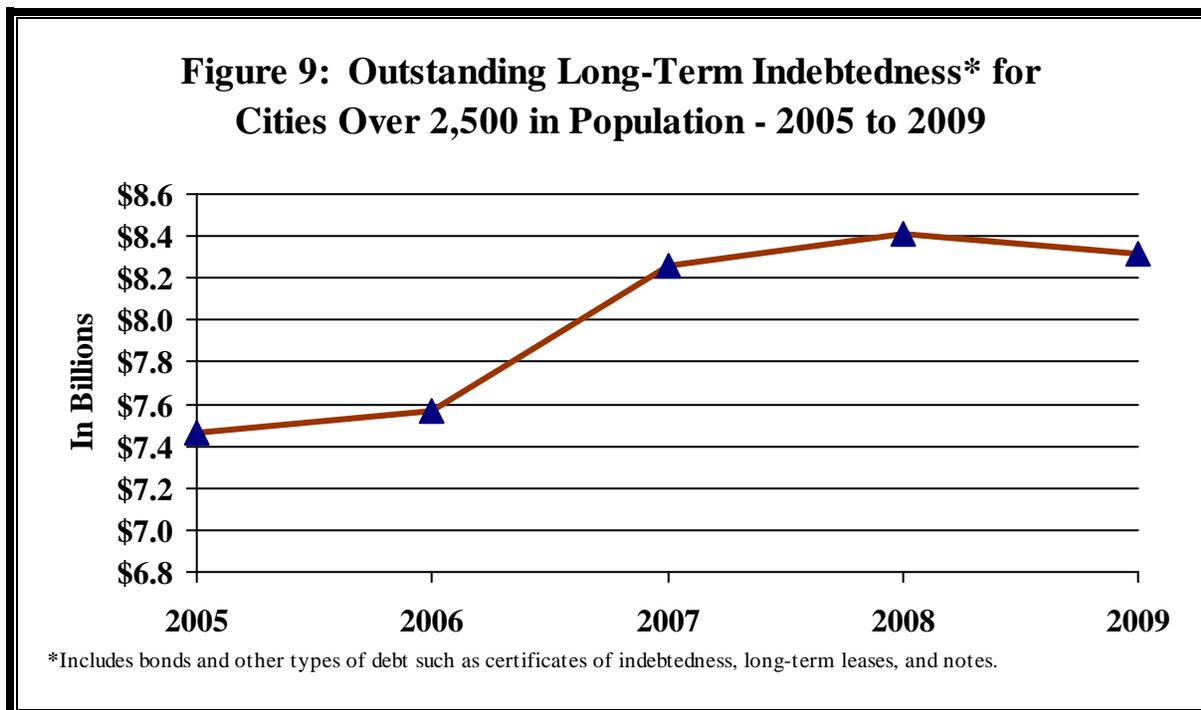

## Outstanding Long-Term Indebtedness

Cities over 2,500 in population carried long-term debt of \$8.32 billion, or \$2,124 per capita, at the end of 2009. This represents a decrease of 1 percent from the 2008 level. Cities incur long-term debt through various ways such as the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Cities may only borrow to finance capital projects and purchases but are restricted by law from borrowing for current expenditures. The amount of outstanding debt affects a city's current expenditures because cities must make principal and interest payments to service the debt. Table 4 below shows the outstanding bonded indebtedness for 2008 and 2009.

	<b>2008 Amount</b>	<b>2009 Amount</b>
General Obligation	\$1,187,618,687	\$1,333,996,584
General Obligation Tax Increment	721,859,631	685,069,012
Revenue Tax Increment	102,256,560	79,109,669
Special Assessment	2,031,875,405	1,980,401,260
General Obligation Revenue	2,022,836,410	1,931,452,951
Revenue	1,307,473,218	1,125,486,375
All Other	102,376,971	100,555,779
<b>Total Bonded Indebtedness</b>	<b><u>\$7,476,296,882</u></b>	<b><u>\$7,236,071,630</u></b>

Figure 9 below shows the five-year trend of outstanding long-term debt for cities over 2,500 in population.

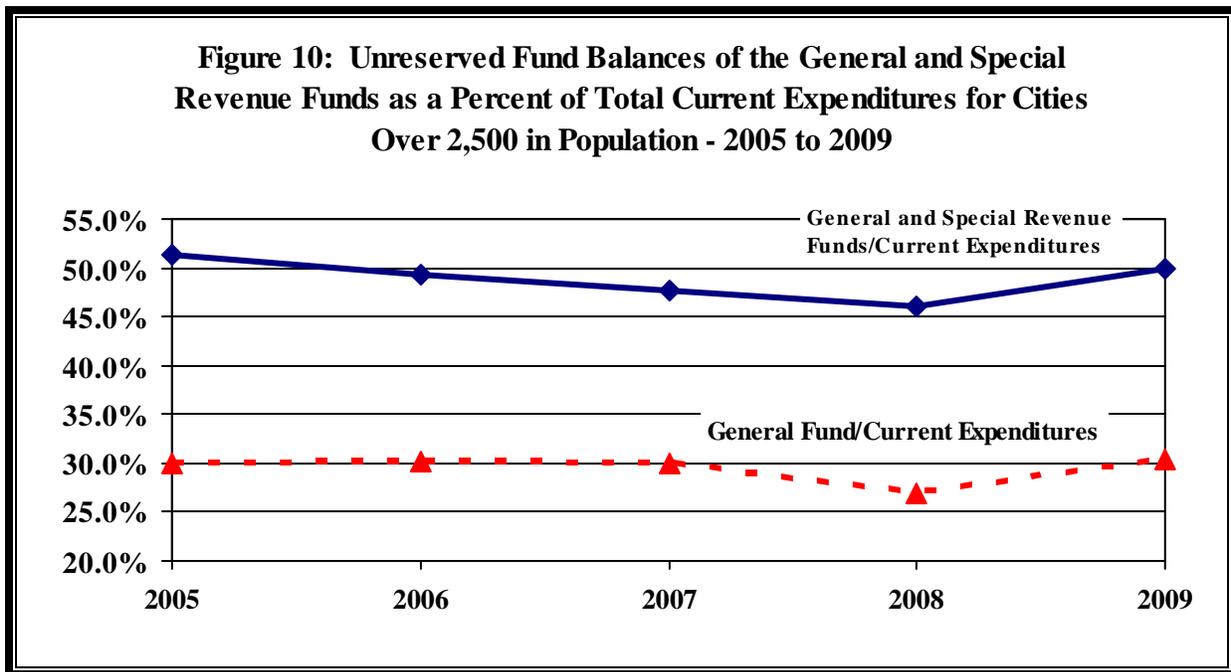

## Unreserved Fund Balances of the General and Special Revenue Funds

The unreserved fund balances of large cities' General and Special Revenue Funds totaled \$1.46 billion in 2009. This represents an increase of 5 percent over the level reported in 2008. Cities should have relatively large fund balances at the end of the year (December 31) because they must rely on them to meet expenditures during the first five months of the next fiscal year until they receive the first property tax and state aid payments. Appendix A on page 313 provides an in-depth explanation of city fund balances.

Comparing cities' unreserved fund balances to their total current expenditures helps put the fund balances into perspective and provides insight on the relative financial health of Minnesota's cities. Large city unreserved fund balances as a percent of total current expenditures averaged 50 percent in 2009, compared to 46 percent in 2008. The increase in the ratio of unreserved fund balances to total current expenditures was caused by a decrease in current expenditures coupled with an increase in unreserved fund balances. If cities in this category are divided into their class number, it is interesting to note that, as population decreases, the average increases. Class 1 (first class) cities average 28 percent of their unreserved fund balances as a percent of total current expenditures, while class 4 cities (populations 2,500 to 10,000) average 77 percent (see Appendix A for further information and recommendations on city unreserved fund balances).

Figure 10 below shows the five-year trend of the unreserved fund balances as a percent of total current expenditures for large cities. One line shows the combined unreserved fund balance of the General and Special Revenue Funds as a percent of total current expenditures, and the other shows only the unreserved fund balance of the General Fund as a percent of total current expenditures.

---

## Overview of Cities Under 2,500 in Population

---

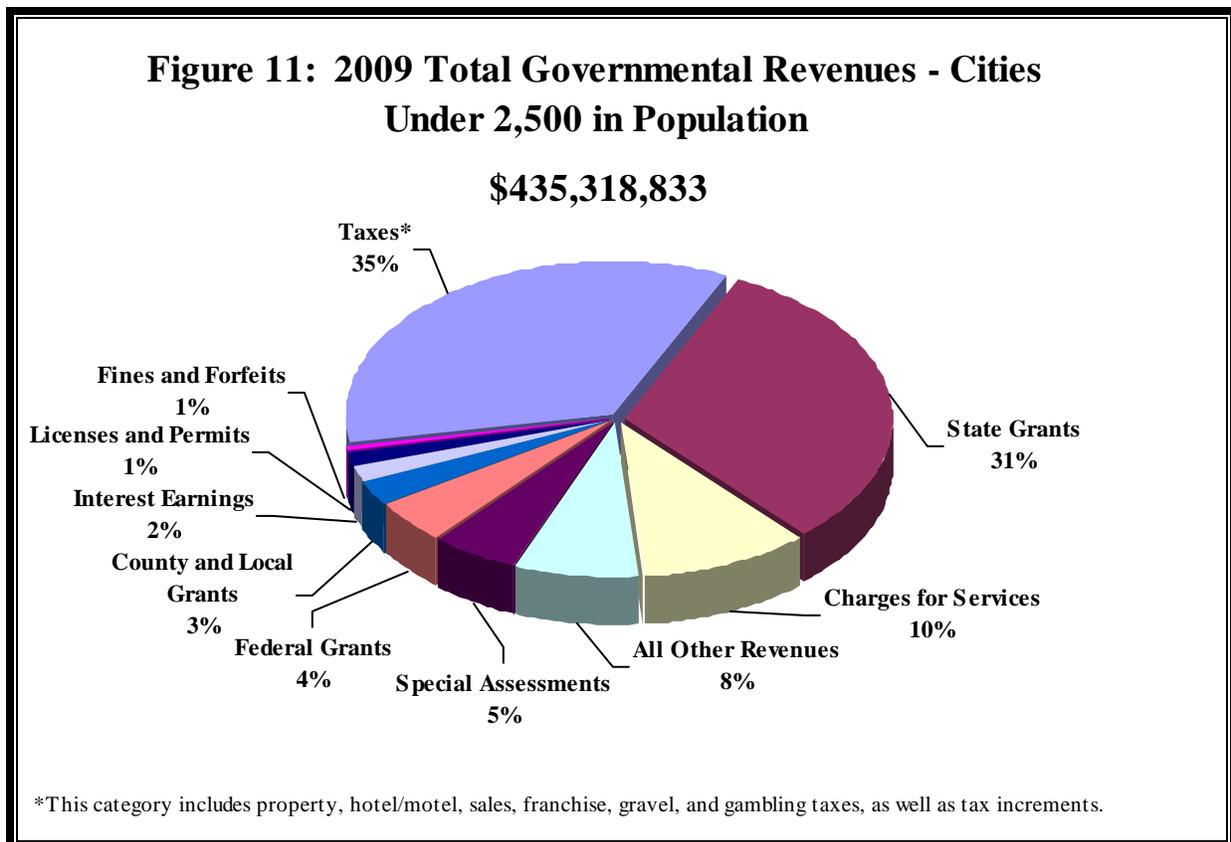

### Total Governmental Revenues

In 2009, cities under 2,500 in population, or small cities, had total governmental revenues of \$435.3 million to finance city services. This represents a decrease of 1 percent from the amount raised in 2008.

Four sources of revenue grew between 2008 and 2009: local grants (113 percent), special assessments (10 percent), charges for services (7 percent), and taxes (6 percent). The categories of revenues showing the greatest decreases between 2008 and 2009 were: interest earnings (-33 percent), federal grants (-24 percent), county grants (-22 percent), fines and forfeits (-12 percent) and licenses and permits (-11 percent).

The main sources of revenues for small cities in 2009 were state grants and taxes, which together accounted for 66 percent of all revenues. Both taxes and state grants increased at a rate greater than overall revenues, which resulted in their share of total revenues increasing relative to other revenue sources.

Figure 11 below shows the relative shares of total governmental revenues by source. The underlying data for this figure is in Table 12 on page 33.

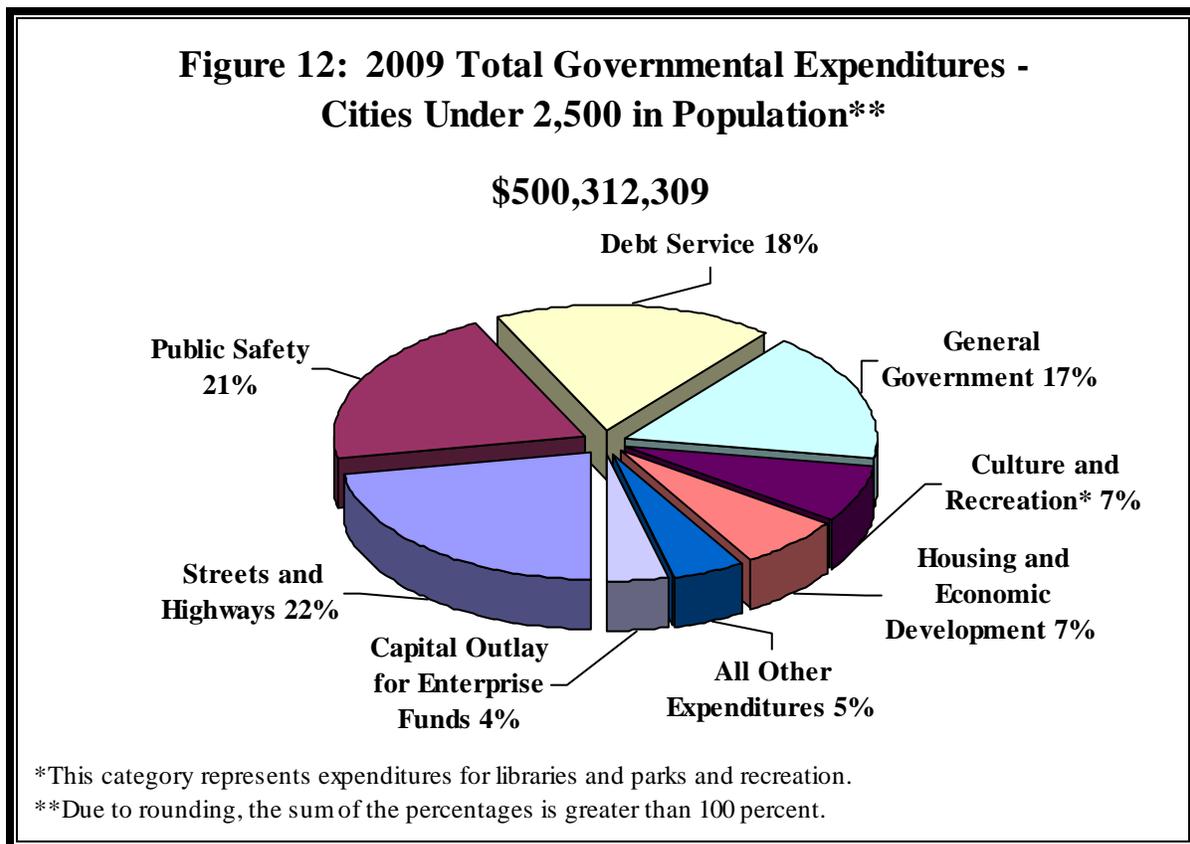

## Total Governmental Expenditures

Most city services are accounted for in governmental funds. The governmental funds are made up of the General, Special Revenue, Capital Projects, Permanent, and Debt Service Funds. In 2009, cities under 2,500 in population expended \$500.3 million from governmental funds to provide city services. This represents a decrease of 6 percent from 2008 total governmental expenditures.

In 2009, the categories of expenditures that grew at the fastest rate were: capital outlay for enterprise funds (173 percent), health (110 percent) and airports (54 percent). While these three categories grew substantially, together they accounted for just 6 percent of total expenditures. The categories showing the greatest decreases were: all other expenditures (17 percent), streets and highways (11 percent), and sanitation (11 percent).

In 2009, the four largest expenditure categories for cities under 2,500 in population were streets and highways, public safety, debt service, and general government. These four categories together accounted for 78 percent of all expenditures in 2009.

Figure 12 below shows the relative shares of total governmental expenditures of small cities by function. The underlying data for this figure is in Table 12 on page 33.

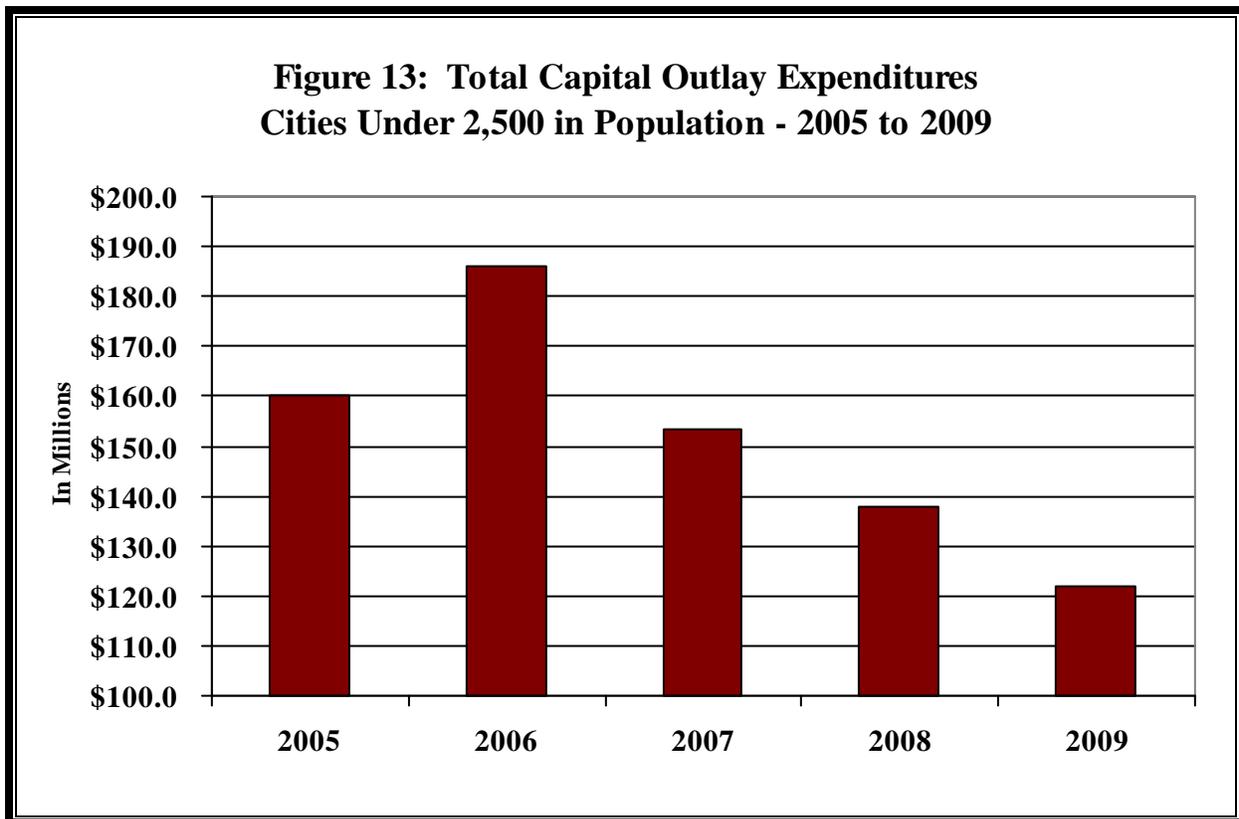

## Capital Outlay Expenditures

Capital outlay expenditures account for the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Small cities expended \$121.9 million on capital outlay in 2009. This represents a decrease of 12 percent from the level expended in 2008. This was the second consecutive year of double-digit decreases in capital outlay expenditures.

Capital outlay expenditures are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size, but the associated costs are short-term. Some of the factors that influence the level of capital investments include: demands for public meeting places and facilities; the need to replace aging infrastructure; public safety concerns; infrastructure improvements for new developments; and damage to public facilities caused by fire, floods, and storms.

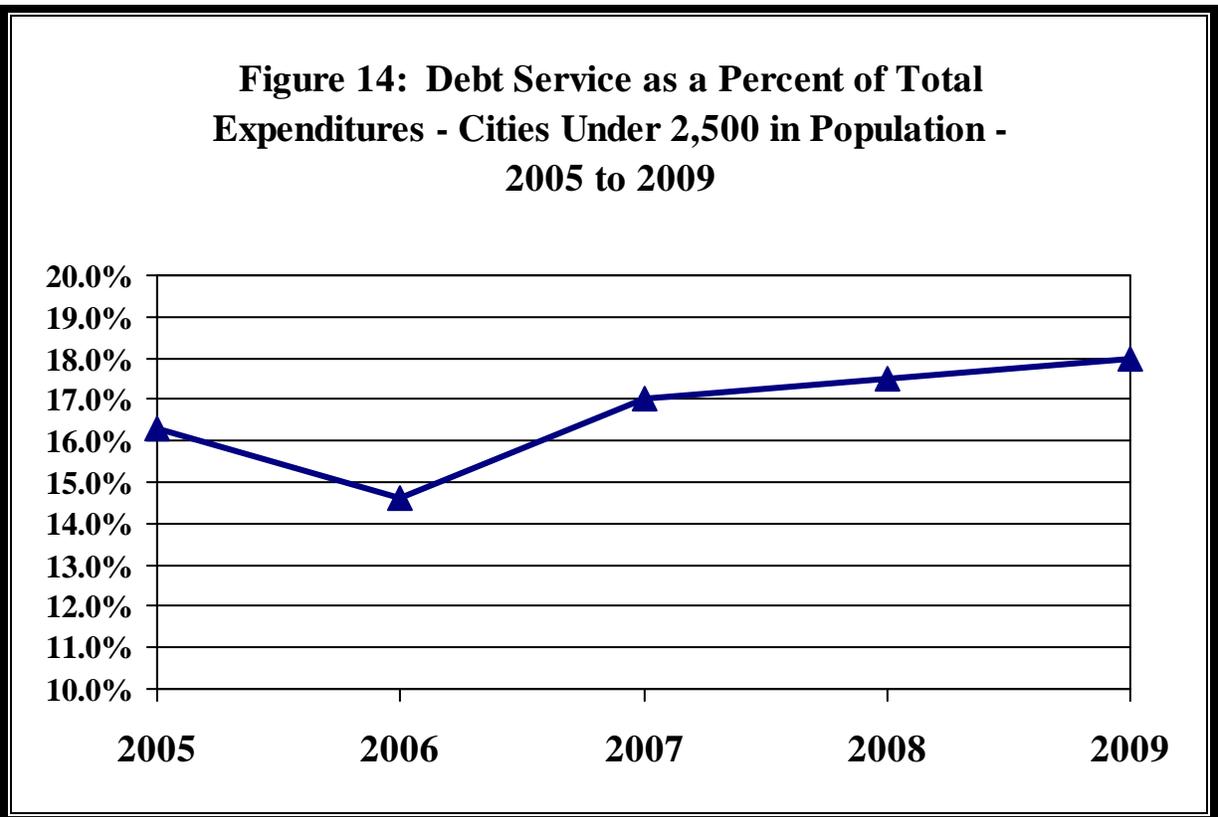

Figure 13 below illustrates the trend in capital outlay expenditures of small cities for the years 2005 through 2009.

## Debt Service

Debt service includes expenditures for the principal and interest payments on debt incurred by cities. In 2009, small cities expended a total of \$90.2 million on debt service. This represented a decrease of 3 percent from 2008. Overall, debt service expenditures accounted for 18 percent of total expenditures for small cities.

Figure 14 below shows the five-year trend in the percent of total expenditures allocated to debt service.

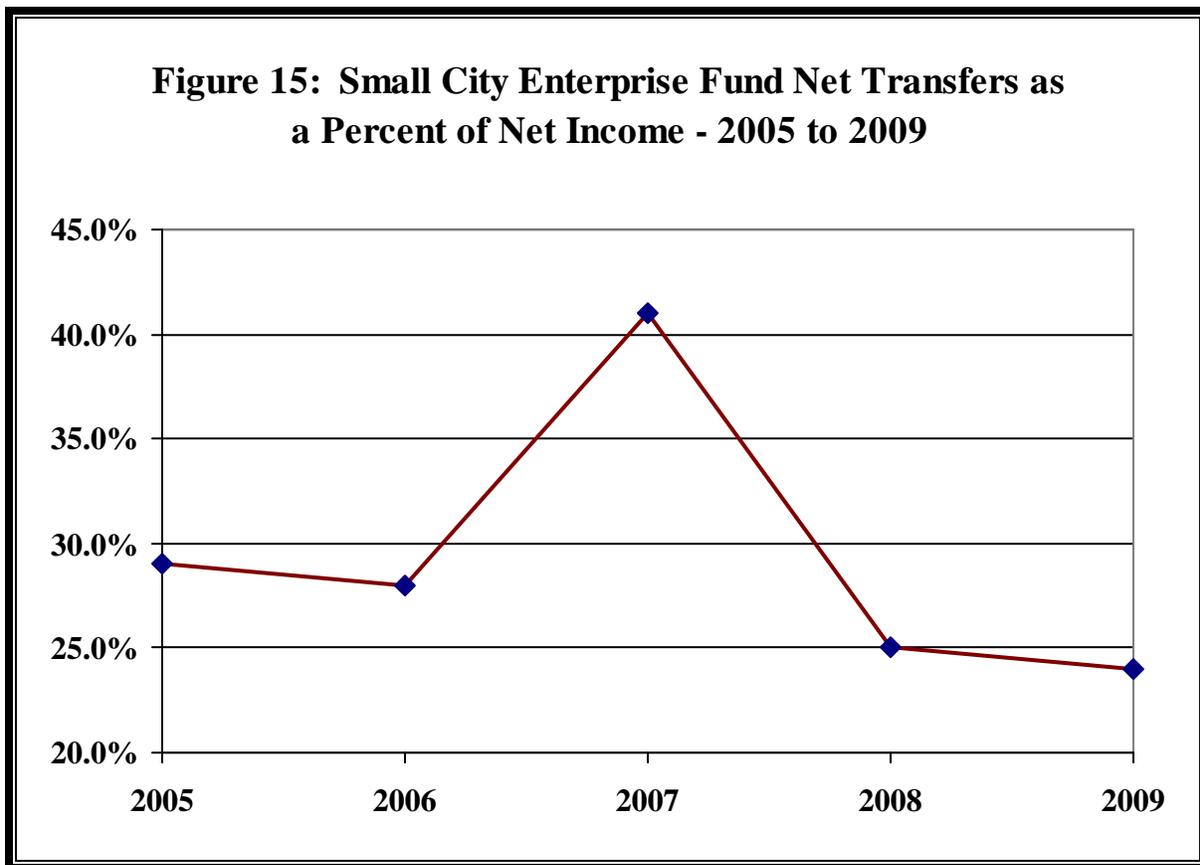

## Municipal Enterprises

The total net income of small city enterprises in 2009 was \$46.8 million, and the net amount transferred to other funds was \$11.2 million. This represents an increase in net income of 38 percent and a increase in net transfers (transfers out minus transfers in) of 31 percent between 2008 and 2009.

In 2009, the municipal enterprises of small cities transferred 24 percent of their net income to other funds, compared to 25 percent in 2008. There has been a general downward trend in this percentage over the last five years, except for a sharp spike in 2007 caused by the sale of a large enterprise asset and the subsequent transfer of the proceeds.

Figure 15 below examines the five-year trend in net transfers from enterprise funds as a percent of net income.

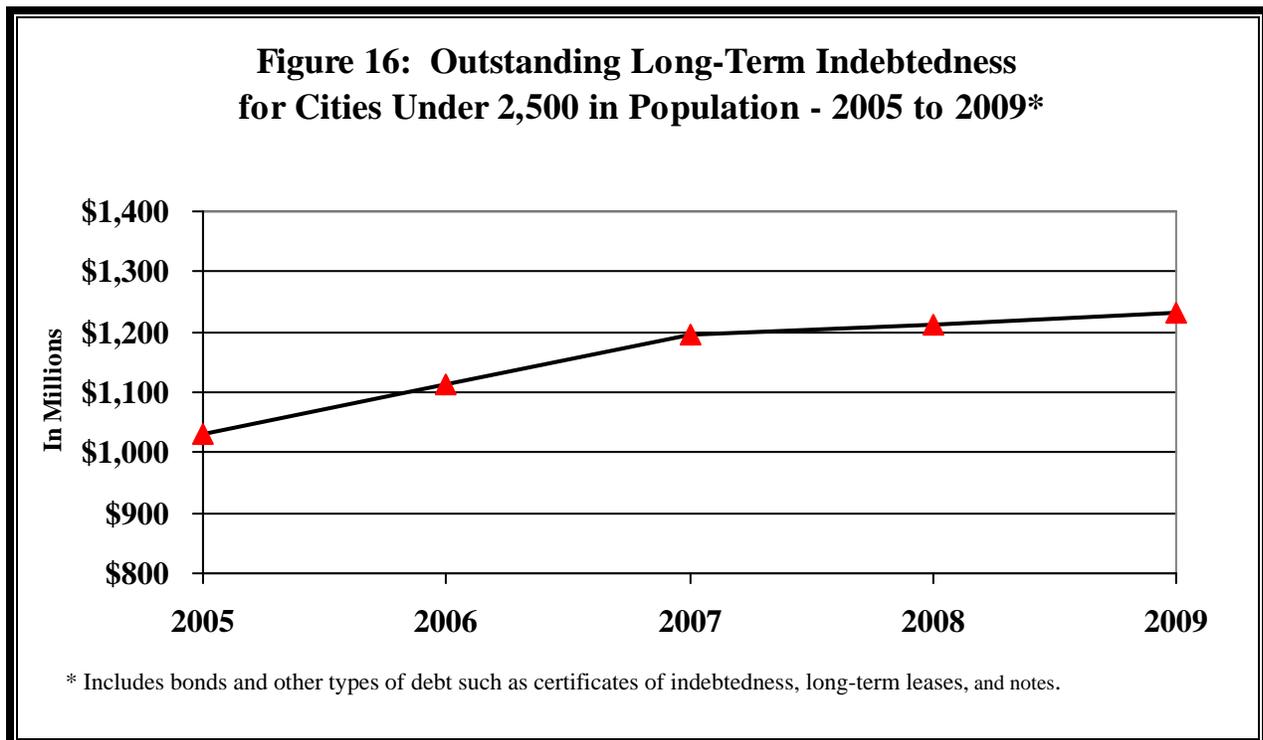

## Outstanding Long-Term Indebtedness

Cities under 2,500 in population carried long-term debt totaling \$1.23 billion at the close of 2009. This represents a 2 percent increase over the level in 2008. On a per capita basis, small cities carried \$3,020 in long-term debt, compared to \$2,121 for large cities. While there is no single reason for the higher level of indebtedness per capita among the smaller cities, a primary reason is that the high costs of projects, such as water and sewer line replacement, are spread across fewer people.

Table 5 below looks at outstanding bonded indebtedness for 2008 and 2009.

	<b>2008 Amount</b>	<b>2009 Amount</b>
General Obligation	\$102,536,429	\$109,540,314
General Obligation Tax Increment	31,216,377	28,926,582
Revenue Tax Increment	1,103,635	2,349,290
Special Assessment	333,908,419	329,502,777
General Obligation Revenue	360,041,534	361,263,861
Revenue	93,912,366	106,188,558
All Other	3,192,674	2,734,432
<b>Total Bonded Indebtedness</b>	<b>\$925,911,434</b>	<b>\$940,505,814</b>

## **ENTERPRISE FUND FOOTNOTES**

- [\*] The accrual basis of accounting is used; however, no depreciation is shown.
- [0] Information is taken from a cash receipts and disbursements statement.
- [1] The water utility operations include the sewer and refuse disposal enterprise fund operations.
- [2] The water utility operations include the refuse disposal enterprise fund operations.
- [3] The water utility operations include the sewer enterprise fund operations.
- [4] The electric utility operations include the water enterprise fund operations.
- [5] Water is purchased from the City of St. Paul.
- [6] The electric utility operations include the sewer enterprise fund operations.
- [7] The enterprise is a joint powers agreement.
- [8] The electric utility operations include the heat enterprise fund operations.
- [9] The electric utility operations include the gas enterprise fund operations.
- [10] The electric utility operations include the cable T.V. enterprise fund operations.
- [11] The hospital operations include the nursing home operations.
- [12] The enterprise fund fiscal year-end is April 30.
- [13] The enterprise fund fiscal year-end is June 30.
- [14] The enterprise fund fiscal year-end is September 30.
- [15] The operations were shown in the special revenue funds; an enterprise fund treatment is required.
- [16] The municipal liquor store discontinued on-sale operations during the current year.
- [17] The electric utility operations include the refuse disposal enterprise fund operations.
- [18] The sewer utility operations include the refuse disposal enterprise fund operations.
- [19] The debt payments are also shown in the governmental funds.
- [20] The facility is under construction.
- [21] The enterprise fund discontinued operations during the current year.
- [22] Non-operating income includes the gain on the sale of fixed assets.
- [23] The enterprise fund is shown on the modified accrual basis of accounting.
- [24] The operation was shown in the governmental funds. The Office of the State Auditor requires that this type of operation is shown as an enterprise fund.
- [25] The operations were transferred to the governmental funds.

## **ENTERPRISE FUND FOOTNOTES**

(CONTINUED)

- [26] The hospital operations include the clinic enterprise fund operations.
- [27] The water utility operations include the recycling enterprise fund operations.
- [28] The gas utility operations include Circle Pines and Lino Lakes.
- [29] The enterprise is a discretely presented component unit.
- [30] The electric utility operations include the refuse, sewer, and water enterprise fund operations.
- [99] This entity failed to report in time for this publication.

**APPENDIX A**

**FACTORS INFLUENCING GENERAL AND SPECIAL REVENUE  
UNRESERVED FUND BALANCES**

## **Appendix A - Factors Influencing General and Special Revenue Unreserved Fund Balances**

---

Minnesota cities report their fund balances at the close of their fiscal year (which runs concurrent with the calendar year). This creates an impression that cities have excessive amounts of revenue held in reserve. In reality, city fund balances should be relatively large at the end of the year because of local government cash-flow cycles. Cities must rely on their fund balances to meet expenses during the first five months of the next fiscal year, until they receive the first property tax payments (May) and aid payments from the state (July).

Unlike state government, which collects income tax withholding and sales tax receipts regularly throughout the year, Minnesota's cities do not have a constant flow of revenue from which they are able to fund local government operations. Property tax levies, state aid, and property tax credits comprise the majority of city discretionary revenues. Minnesota statutes govern the flow of these major revenue sources into city treasuries:

- Counties distribute the cities' share of the first half of property tax levies in late May and early June. Cities receive the first half of their state aid and property tax credits from the state in July of each year.
- Counties distribute the cities' share of the second half of property tax levies in late October and early November.
- Cities receive the second half of their state aid and property tax credits from the state in December of each year.

Given this state-controlled flow of revenue, city fund balances (which are measured on December 31) are the primary sources of funds available to cities for their operating expenses during the first five months of the next fiscal year. An adequate fund balance will provide a local government with the cash flow required to finance expenditures without short-term borrowing.

### **Unique Circumstances of Each Jurisdiction Determine the Size of Fund Balance Needed**

While cities must rely on the fund balances for cash flow purposes during the first five months of a year, the unique circumstances of each local government will determine the size of a fund balance that must be maintained to avoid the need for short-term borrowing and to operate effectively.

Numerous factors must be considered in determining the size of a fund balance necessary for a city to avoid short-term borrowing:

- If cities receive relatively large amounts of revenue from sources such as fees, fines, charges for services, other intergovernmental grants and aids, or interest on investments during the first five months of the calendar year, then they will be less dependent on their fund balances for cash flow purposes.
- Cities are often able to delay certain purchases until after the initial property tax and state aid payments are received. While payments for employee salaries, wages, and most benefits cannot be delayed during the first five months of the year, purchases of supplies and capital equipment may be delayed.

The individual cash flow needs of a city will determine the minimum fund balance that is necessary for a city to operate effectively. Cities that are able to generate significant revenues from sources other than property taxes and state aid payments may require relatively smaller fund balances to support their cash flow requirements. Conversely, cities that rely heavily on property taxes and state aid for the majority of their revenues will need larger fund balances to meet their cash flow needs from January through June of every calendar year.

While there are many factors that help determine the minimum fund balance needed to maintain financial health, the Office of the State Auditor recommends that at year-end, local governments maintain an unreserved fund balance in their General Fund and Special Revenue Funds of approximately 35 to 50 percent of operating revenues, or no less than five months of operating expenditures.<sup>7</sup> If the local government's unreserved fund balance is less than or greater than this recommendation, the local government should be able to explain the reason for the difference.

The Office of the State Auditor recommends that each local government establish a formal policy on the level of unreserved fund balance that should be maintained in the general fund and special revenue funds. The policy should be set by the governing body and should provide both a time frame and a specific plan for increasing or decreasing the level of unreserved fund balance. If the fund balance does not match the policy, a plan should be developed by the governing body that will allow for compliance with the policy.

---

<sup>7</sup>Although this section discusses only two types of fund balances, Minnesota cities actually report three different classifications of fund balances in the General and Special Revenue Funds. The ***unreserved, undesignated fund balances*** include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made, nor has the governing body passed a resolution designating those funds for a specific purpose. The ***unreserved, designated fund balances*** include all funds remaining at the close of the fiscal year for which no legally binding commitment has been made; however, these funds have been designated by the governing body for a specific future use. The ***reserved fund balances*** include all funds remaining at the close of the fiscal year for which there is a legally binding external commitment of those funds, such as a signed contract for services or equipment.

## **GLOSSARY**

This page left blank intentionally

## Glossary

**BORROWING** - These revenues reflect the sale of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Cities are restricted by law from borrowing for current expenses.

**CAPITAL OUTLAY** - These expenditures include the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Capital outlay varies from year to year based on the needs and resources of the cities.

**CAPITAL OUTLAY FOR ENTERPRISE FUNDS** - The expenditures from governmental funds for improvements to public service enterprises, such as sewer and water mains.

**CAPITAL PROJECTS FUND** - A fund created to account for the financial resources that are used for the acquisition or construction of a fixed asset.

**CASH BASIS OF ACCOUNTING** - The basis of accounting that recognizes transactions or events when related cash amounts are received or disbursed.

**CHARGES FOR SERVICES** - These revenues reflect fees for activities of the governmental funds. These include rent of city hall by individuals or organizations, police and fire contracts, fire calls, recreation fees, park dedication fees, etc.

**DEBT SERVICE EXPENDITURES** - These expenditures reflect the annual costs of servicing the outstanding debt of the local government. These costs include principal, interest, and some fiscal charges.

**DEBT SERVICE FUND** - A fund to account for the collection of resources and payment of principal and interest from long-term debt.

**ENTERPRISE FUND** - A fund established to account for operations financed and operated in a manner similar to private business. Examples include water, sewer, and electric utilities. The expenses of providing services are primarily financed by user charges.

**FINES AND FORFEITS** - These revenues reflect receipts from the payment of penalties for law violations, non-observance of contracts, and forfeited deposits.

**FRANCHISE TAXES** - These revenues reflect proceeds from taxes imposed on public utilities, usually involving elements of a monopoly (e.g., electric utilities, gas utilities, and cable T.V.), for use of public property.

**GENERAL FUND** - The fund used to account for all financial resources not required to be accounted for in another fund. This fund is the main operating fund.

**GENERAL GOVERNMENT EXPENDITURES** - These expenditures reflect the costs associated with running a local government. Expenditures in this category include salaries, wages, and benefits of legislative, judicial, and administrative personnel; supplies; and city hall maintenance.

## Glossary

**GOVERNMENTAL FUNDS** - The funds through which most governmental activities are financed. The five governmental fund types are: general, special revenue, debt service, permanent, and capital projects.

**GRAVEL TAX** - These revenues are derived from taxes imposed by the local government for aggregate material removal.

**HEALTH** - These expenditures are for the maintenance of vital statistics, restaurant inspection, communicable disease control, and various health services and clinics.

**HOUSING AND REDEVELOPMENT AUTHORITIES (HRA) AND ECONOMIC DEVELOPMENT AUTHORITIES (EDA)** - These expenditures are for development and redevelopment activities in blighted or otherwise economically disadvantaged areas. Activities may include low-interest loans to individuals and businesses, cleanup of hazardous sites, rehabilitation of substandard housing and other physical facilities, and additional types of assistance to those wanting to provide housing and economic opportunity within a disadvantaged area.

**INTEREST ON INVESTMENTS** - These revenues reflect interest earned on checking and savings accounts, CDs, money market funds, and bonds. This category also includes dividends. In addition, the net increase or decrease in the fair value of investments is recorded here.

**LICENSES AND PERMITS** - These revenues reflect receipts from liquor licenses, cigarette licenses, other business licenses, street use permits, building permits, and other non-business licenses and permits.

**MISCELLANEOUS EXPENDITURES** - These expenditures reflect the costs of activities that were not allocated to a specific function. Some activities included in this category are pension and insurance costs not allocated to a specific department.

**MISCELLANEOUS REVENUES** - These revenues refer to refunds, reimbursements, donations, and lease payments.

**MODIFIED ACCRUAL BASIS OF ACCOUNTING** - The basis of accounting where: (a) revenues are recognized in the accounting period in which they become available and measurable; and (b) expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term debt and certain similar accrued obligations, which should be recognized when due.

**NET TAX LEVY** - The city net property taxes, after adjustments for state property tax relief aids such as Market Value Credits are applied, which are required to be paid by the property owners of the city.

**OTHER FINANCING SOURCES** - The long-term debt proceeds, sale of fixed assets, and transfers from other funds.

**OTHER FINANCING USES** - This category includes activities such as transfers from one fund to another and transactions involved in the issuance of refunding bonds. For example, in an advance refunding, bond proceeds are deposited with an escrow agent and invested until they are used to pay principal and interest on the old debt at a future time.

## Glossary

**OUTSTANDING LONG-TERM DEBT** - This category refers to the long-term debt that a local government has incurred to finance its capital projects. Examples of long-term debt include various types of bonds and other obligations such as notes and long-term leases.

**PARKS AND RECREATION** - These expenditures reflect park maintenance, mowing, planting, and removal of trees. Recreation expenditures include festivals, bands, museums, community centers, cable T.V., baseball fields, organized recreation activities, etc.

**PUBLIC SAFETY EXPENDITURES** - These expenditures reflect the costs related to the protection of persons and property. This category combines several distinct city departments, including police, fire, ambulance services, and other protection. They are combined here because cities allocate similar responsibilities differently among these departments.

**SANITATION** - These expenditures reflect the costs of refuse collection and disposal, recycling, as well as weed and pest control. Some cities provide sanitation services through enterprise funds.

**SPECIAL ASSESSMENTS** - These revenues refer to levies made against certain properties to defray all or part of the costs of a specific improvement, such as new sewer and water mains, deemed to benefit primarily those properties. The amount includes the penalties and interest paid on the assessments.

**SPECIAL REVENUE FUNDS** - A fund used to account for the proceeds of specific revenue sources that are restricted to expenditures for a specific purpose.

**STREETS AND HIGHWAYS EXPENDITURES** - These expenditures reflect the costs associated with the maintenance and repair of local highways, streets, bridges, and street equipment. Common expenditures include patching, seal coating, and snow removal. Expenditures for road construction are not included in current expenditures but are accounted for as capital outlay.

**TAX CAPACITY** - The value assigned to the property used to calculate the property taxes.

**TAX INCREMENTS** - These revenues are what cities generate when they establish tax increment financing (TIF) districts. In a TIF district, the increase in property tax revenues in the redeveloped area are used to pay the costs of development and redevelopment in the district rather than the general services of the city, county, and school district.

**TAXABLE TAX CAPACITY** - This category represents the tax capacity, less the tax increment district value, less the fiscal disparities contribution value, plus the fiscal disparities distribution value.

**TOTAL CURRENT EXPENDITURES** - This category reflects the total of all expenses related to current operations.

**TOTAL EXPENDITURES** - This category includes current operating expenses, capital outlays, and debt service principal and interest payments.

## Glossary

**TOTAL REVENUES** - This category reflects all sources of revenue that increase the amount of available resources without creating a liability or a future payment. Borrowing and transfers between funds are not included in total revenues.

**TRANSFERS - ENTERPRISE FUNDS** - The transfer of available resources to or from public service enterprises. An example of this transfer is a water utility transferring money to the General Fund.

**TRANSFERS - GOVERNMENTAL FUNDS** - The transfer of money between governmental fund types.

**UNALLOCATED INSURANCE** - These expenditures refer to insurance premiums that are not allocated to a specific function of government.

**UNALLOCATED PENSION CONTRIBUTIONS** - These expenditures refer to contributions to pension plans that are not allocated to a specific function of government.
