

## Affordable Housing Production in the Twin Cities Region

November 2011

This annual report summarizes new affordable housing added each year by Twin Cities area cities and townships.

Through 2010, the Metropolitan Council determined a price-point for new owner-occupied housing that is affordable to households at 80 percent of area median family income, as calculated by the U.S. Department of Housing and Urban Development, at the prevailing home mortgage interest rates (estimated to be 4.75 percent for a 30-year fixed-rate home loan in 2010). This definition assumes that households earning 80 percent of the region's median income can afford mortgage costs (mortgage payments, taxes, insurance and related housing costs) without spending more than 30 percent of their income. The area median income (AMI) for 2010 was \$84,000; 80 percent of AMI was \$64,400. The Council considered owner-occupied units affordable if the price was \$233,100 or less in 2010.

For affordable rental price-points, the Metropolitan Council used the maximum monthly rents allowed by HUD in the Minneapolis-St. Paul metropolitan statistical area for households at 50 percent of AMI (\$735/month for an efficiency unit, \$787/month for a one-bedroom unit, \$945/month for a two-bedroom unit, \$1,092/month for a three-bedroom unit, and \$1,218 for a four-bedroom or larger unit).

For more information on the methodology, see Appendix A on p. 9. Data are available online at: [www.metrocouncil.org/data](http://www.metrocouncil.org/data).

### Highlights

- In 2010, there were 1,541 new affordable units (owner-occupied and rental units combined) added in the Twin Cities region, which was an increase from the 1,527 added in 2009. Twenty-five percent of all housing added in 2010 was affordable. This was a decrease from the 33 percent calculated in 2009.
- 758 new affordable owner units were added. This was the lowest amount on record (since 1996). Twenty-two percent of all new owner-occupied housing units added were affordable. This was a decrease from the 35 percent calculated in 2009.
- 783 new affordable rental units were added. More than half were in St. Paul and Minneapolis. Twenty-seven percent of all rental units added were affordable. This was a decrease from the 28 percent calculated in 2009.
- From 1996 through 2010, there were 52,041 new affordable units (owner-occupied and rental units combined) added in the Twin Cities region; 26 percent of all new housing added was affordable.
- From 1996-2010, 40,168 new affordable owner-occupied housing units were added, or 24 percent of all new owner-occupied housing units added.
- From 1996-2010, 11,873 affordable rental units were added, or 31 percent of all rental units added.

November 2011

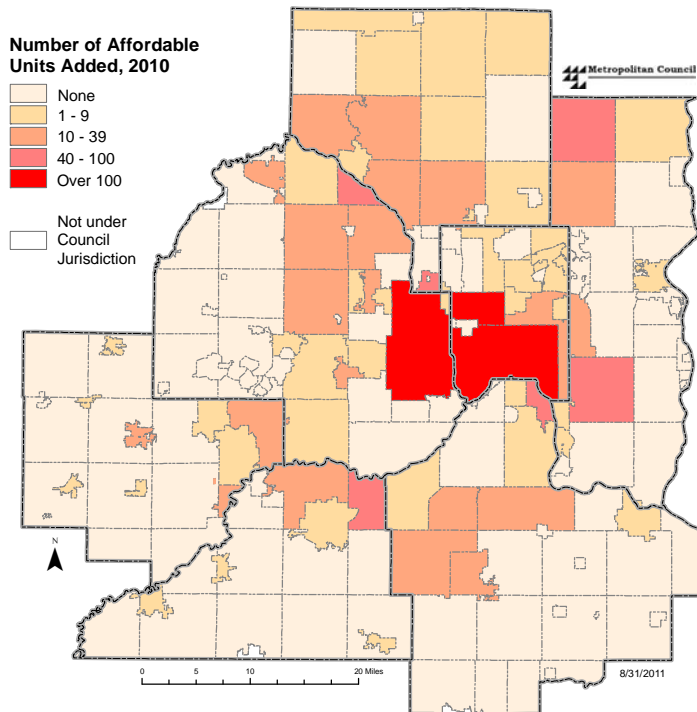

## Total New Affordable Housing in 2010

Overall in 2010, there were 1,541 new affordable units (owner-occupied and rental units combined) added to the Twin Cities region; 25 percent of the owner-occupied and rental housing built in 2010 was affordable. This was a decrease from the 33 percent calculated in 2009 but in line with the 26 percent calculated over the 1996-2010 period.

The number of affordable units produced by the region steadily decreased every year from 2003 to 2008. In 2009, this trend was halted. In 2010, the number of affordable units again increased, to 1,541 units, although at a modest rate (less than a one percent increase from the 1,527 added in 2009).

Thirty-eight percent of the new affordable units

St. Paul	270	South St. Paul	59
Minneapolis	188	Savage	53
Roseville	121	Champlin	44
Woodbury	85	Columbia Heights	42
Forest Lake	80	Rosemount	39

added were built in the developing suburbs with 584 units being added. The central cities had 458 new affordable units added or 30 percent of the regional total in 2010. The developed suburbs had 454 new affordable units added (29 percent). Rural centers and rural growth centers (rural centers) had 32 new affordable units added (2 percent) and the remaining rural area added 13 new affordable units or 1 percent of the regional total in 2010.

The top 10 communities producing combined new affordable rental and owner-occupied units during 2010 were:

# Affordable Housing Production in the Twin Cities Region

November 2011

## New Affordable Owner-Occupied Housing Added in 2010

Only 758 new affordable owner-occupied units were added in 2010, the lowest amount on record (since 1996) and one-sixth of the peak year of 2001. Over 22 percent of the new owner-occupied housing units added in 2010 were affordable (a selling price of \$233,100 or less) to households earning 80 percent of area median income (\$64,400 in 2010). This was a 13 percentage point decrease from the 35 percent calculated in 2009.

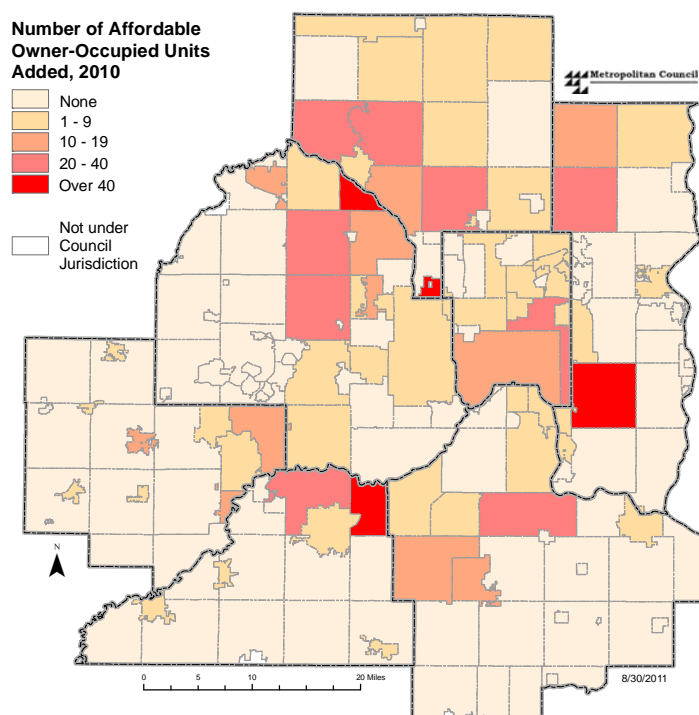

Thirty-six communities showed gains in affordable owner-occupied units from the previous year with only Woodbury (57 units) and Savage (53 units) producing 50 or more affordable owner-occupied housing units.

Of all the new affordable owner-occupied units added in 2010 (758 units), 64 percent (486 units) were built in the developing suburbs. The developed suburbs contributed 27 percent (203 units) of the total. Rural centers added 4 percent (32 units), central cities added 3 percent (24 units) of the total and the rural area added 2 percent (13 units).

The top 10 communities producing new affordable owner-occupied units in 2010 were:

Woodbury	57	Hugo	37
Savage	53	Shakopee	37
Champlin	44	Ramsey	32
Columbia Heights	42	Blaine	31
Rosemount	39	Maple Grove	31

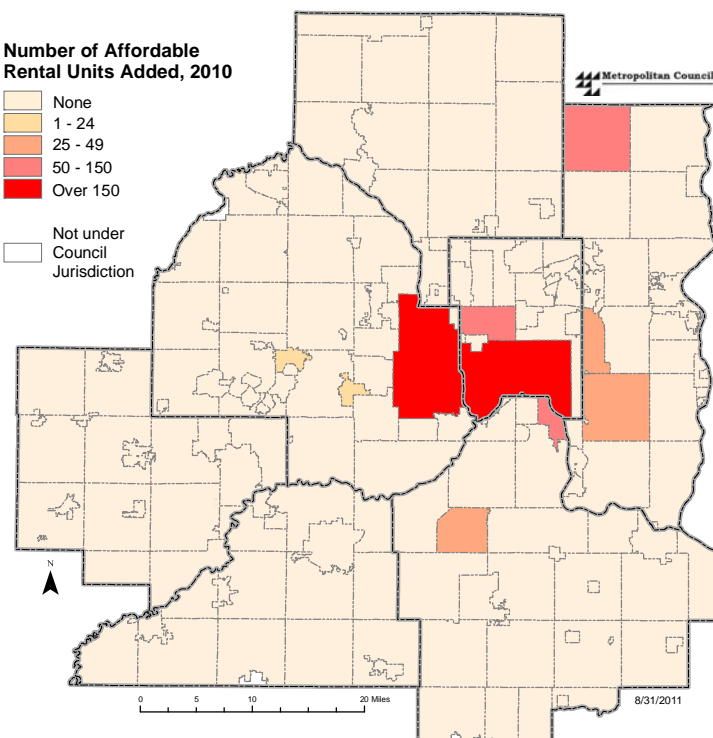

# Affordable Housing Production in the Twin Cities Region

November 2011

## New Affordable Rental Housing Added in 2010

The stock of new affordable rental units added in 2010 (783 units) was the highest amount since 2004 and followed the lowest output on record of 358 units in 2009. Of the 783 affordable rental units added in 2010, over half (55 percent) were built in the two central cities (434 units). The developed suburbs added 32 percent (251 units) of the total, while the developing suburbs were at 13 percent (98 units). Rural centers and the rural area added no affordable rental units in 2010.

There were only 10 communities that produced affordable rental units in 2010, with the largest number in St. Paul (252 affordable rental units). Seven communities showed gains in affordable rental units from the previous year

Over 27 percent of the rental housing units added in 2010 were affordable to households earning 50 percent of area median income. This was roughly the same as the 28 percent calculated in 2009.

The 10 communities producing new affordable rental units in 2010 were:

St. Paul	252	Oakdale	29
Minneapolis	182	Woodbury	28
Roseville	120	Apple Valley	25
Forest Lake	70	Hopkins	17
South St. Paul	54	Wayzata	6

# Affordable Housing Production in the Twin Cities Region

November 2011

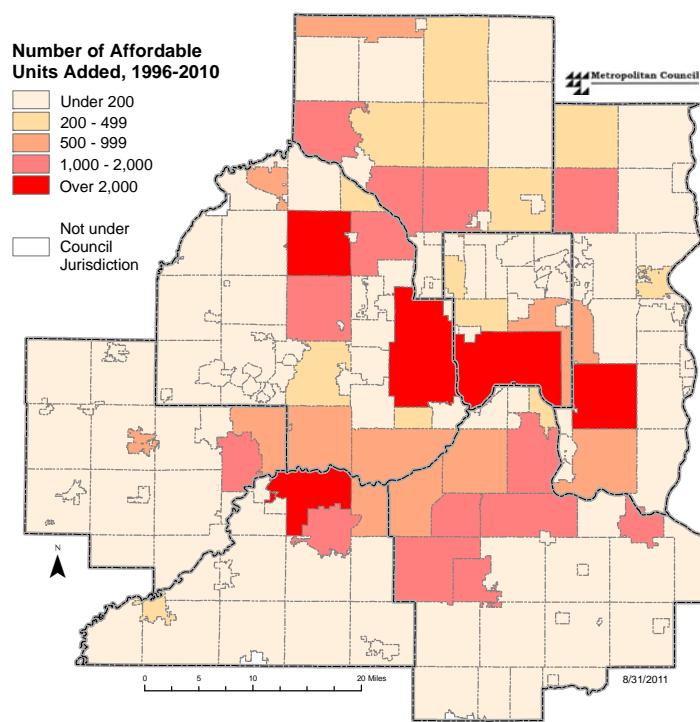

## Production of New Affordable Housing, 1996-2010

In their responses to the survey, communities reported permits issued for 203,391 combined new rental and owner-occupied units between 1996 and 2010. Of these, 52,041 were deemed affordable according to the Council's annual affordability limits. Almost 26 percent of the new housing units (rental and owner-occupied) reported from 1996 to 2010 were deemed affordable using the definitions updated each year. These units include 11,873 new affordable rental units out of the 38,249 total new rental units constructed, and 40,168 new affordable owner-occupied units out of the 165,142 total new owner-occupied units constructed.

The majority (55 percent) of the new affordable owner-occupied and rental units added from 1996 to 2010 were built in the developing suburbs, with 28,539 units being added. The developed suburbs had 12,798 new affordable units added or 25 percent of all new affordable units added. The central cities had 7,958 new affordable units added or 15 percent of all new affordable units added. The rural centers had 2,091 new affordable units added or 4 percent of all new affordable units added. The rural area added 655 new affordable units or 1 percent of all new affordable units added.

The top ten communities producing new affordable rental and owner-occupied units since 1996 were:

Minneapolis	5,188
Shakopee	2,867
St. Paul	2,770
Maple Grove	2,296
Woodbury	2,237
Blaine	1,712
Lakeville	1,695
Farmington	1,692
Inver Grove Heights	1,444
Hugo	1,426

# Affordable Housing Production in the Twin Cities Region

November 2011

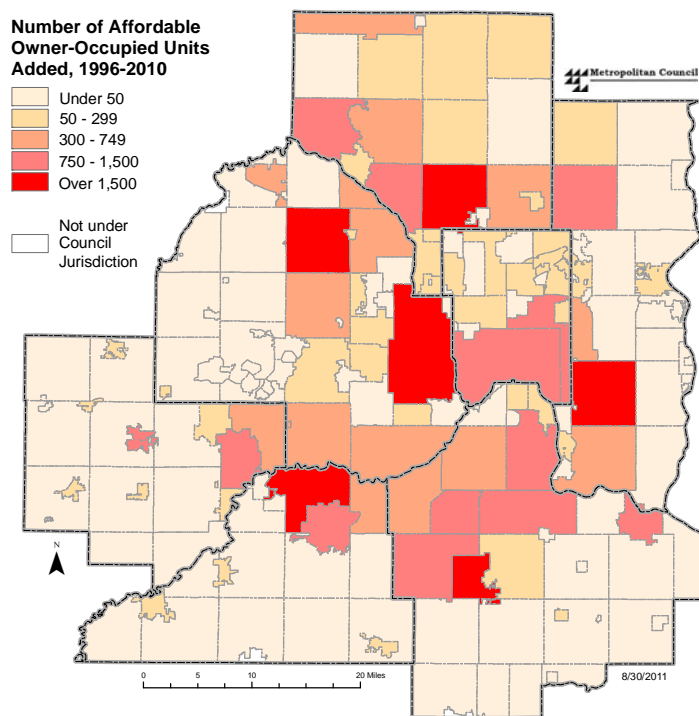

## Production of New Affordable Owner-Occupied Housing, 1996-2010

Twenty-four percent of the new owner-occupied housing units reported from 1996 to 2010 were estimated to be affordable.

Of all the new affordable owner-occupied units added to the region (40,168 units) from 1996 to 2010, 63 percent (25,158 units) were added in the developing suburbs. The developed suburbs contributed 23 percent (9,089 units) of the total while the central cities added 8 percent (3,359 units) of the total. The rural centers added 5 percent (1,942 units), and the rural area added almost 2 percent (620 units) of the new affordable owner-occupied units during these years.

The top ten communities producing new affordable owner-occupied units since 1996 were:

Shakopee	2,719
Minneapolis	2,153
Woodbury	2,001
Maple Grove	1,952
Farmington	1,591
Blaine	1,578
Lakeville	1,433
Hugo	1,426
Ramsey	1,281
St. Paul	1,206

# Affordable Housing Production in the Twin Cities Region

November 2011

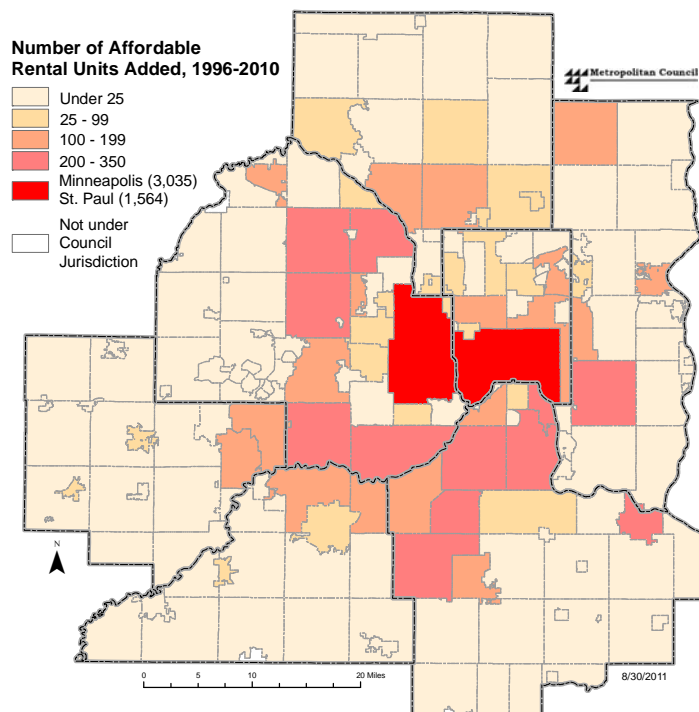

## Production of New Affordable Rental Housing Added, 1996-2010

Thirty-one percent of the new rental housing units added from 1996 to 2010 were deemed to be affordable.

Of all the new affordable rental units added (11,873 units) from 1996 to 2010, 39 percent (4,599 units) were built in the central cities. The developed suburbs contributed 31 percent (3,709 units) of the total, while the developing suburbs added 28 percent (3,381 units) of the total. Rural centers added 1 percent (149 units) of the total, while the rural area added a negligible amount (35 units or less than 1 percent).

The top ten communities producing affordable rental units since 1996 were:

Minneapolis	3,035
St. Paul	1,564
Brooklyn Park	349
Maple Grove	344
Apple Valley	331
Inver Grove Heights	306
Eden Prairie	290
Plymouth	284
South St. Paul	270
Lakeville	262

## Affordable Housing Production in the Twin Cities Region

November 2011

## Regional Goals and Production Levels of Affordable Units, 1996-2010

Participants in the Livable Communities Act (LCA) program negotiated goals that represent the addition of 100,821 affordable units for the region from 1996 to 2010 (84,981 owner units and 15,840 rental units).

These numbers were intended to help communities understand the significant number of new affordable owner-occupied and rental units that would need to be added to achieve their 2010 LCA housing goals. For some communities, these goals were unattainable as the overall production of new housing units has decreased to historical lows. However, the negotiated LCA goals numbers are a useful reminder that communities should facilitate efforts to develop medium-and-high density multifamily homes that offer the greatest opportunity for affordability and life-cycle housing choices.

Affordable Housing Units	New Affordable Units Reported, 1996-2009	New Affordable Units Reported, 2010	Total New Affordable Units Reported, 1996-2010	1996-2010 Goals	Units Needed to Reach Goals
Owner-occupied	39,410	758	40,168	84,981	44,813
Rental	11,090	783	11,873	15,840	3,967
All	50,500	1,541	52,041	100,821	48,780

The final results from the 2010 Affordable Housing Production Survey show that the region fell short of its affordable housing goals by significant amounts. The region fell short of its negotiated LCA goals of nearly 85,000 owner-occupied affordable units by 53 percent or 44,813 units. The region also fell short of its negotiated LCA goals of nearly 16,000 affordable rental units by 25 percent or 3,967 units. Combined, the region fell short of its negotiated LCA affordable goals by 48 percent or 48,780 affordable units.

These results are not surprising given the reduced levels of overall housing production, which decreased every year from 2004 to 2009. In fact, historical lows in housing production were recorded in consecutive years from 2007 to 2009. In 2010, this trend was reversed but was still the 3rd lowest on record. During this 15-year period (1996-2010), the region averaged 3,469 affordable units per year. To reach the negotiated goals during this same period the region would have needed to average 5,665 affordable units per year. The region has not permitted this many housing units since 2007.

### Appendix A. Data Sources and Definitions

---

#### Data Sources

*Metropolitan Council's Annual Residential Construction Survey:* The Metropolitan Council conducts an annual survey of each city and township in the Twin Cities to track the number of units by type (single-family, townhouse, duplex and multi-family) that are permitted. This survey includes questions about units that have been removed from the housing stock each year. This survey has nearly a 100 percent response rate.

*Affordable Housing Production Survey:* Data on the number of new permitted units that are affordable and the number intended for owner or renter occupancy are collected through the Metropolitan Council's annual Affordable Housing Production Survey.

*Other Sources:* The Metropolitan Council utilizes various sources of data to monitor residential building activity. In addition to the Annual Residential Construction Survey and the Affordable Housing Production Survey, other sources of data include monthly residential building reports from the U.S. Department of Commerce, sales of existing units from the Minneapolis Area Association of Realtors (MAAR), rental data from HousingLink, Service Availability Charges (SAC) from the Metropolitan Council, parcel data from the MetroGIS Regional Parcel Dataset, GVA Marquette and the Dakota County Community Development Agency (CDA).

#### Methodology for Identifying Affordable Units

Each year, respondents to the Affordable Housing Production Survey are asked to estimate how many of the new units built in their jurisdiction are rental or owner-occupied. From 1996 to 2007, the respondents to the survey were asked to estimate how many of the new units built met the Metropolitan Council's affordability limits. These numbers were then verified by Metropolitan Council staff. Some were able to provide sale price information, but others could not. Starting in 2008, survey respondents were not asked to estimate the affordability of the new units. Instead Metropolitan Staff calculated the number of affordable rental and owner-occupied housing using the various methodologies listed below.

In 1996 and 1997, many communities filling out the survey utilized building permit valuations as indicators of affordability status. These valuations were readily accessible for the communities, but they often excluded the price of lots, and some finishing costs, such as landscaping and wall and floor coverings. Therefore, the building permit valuations did not represent the value of the housing unit.

In 1998, communities completing the survey were asked to add an average lot price to permit valuations in order to estimate the final cost. While these adjusted costs were not exact, they more closely reflected the market value of new homes. This practice of applying an additional lot price to the permit value was applied until 2001.

Beginning in 2002, county assessor data were used to estimate the price of each new housing unit added. The county assessor data contain many attributes regarding residential and commercial properties, including the selling price or market value of each housing unit within the county. The selling price was used first, and if it was not available, the market value was then used. These two attributes were used extensively to establish whether a unit met the affordability threshold or not.

Starting in 2004, the Minnesota Housing's Tax Credit Programs—Funded Developments data and HousingLink's Housing Counts were used to estimate the number of affordable rental units added. These databases include many attributes including the total number of tax credit units by municipality, development name, project type, and project inception date. These fields were used to validate the number of rental units that met the affordable rental thresholds.

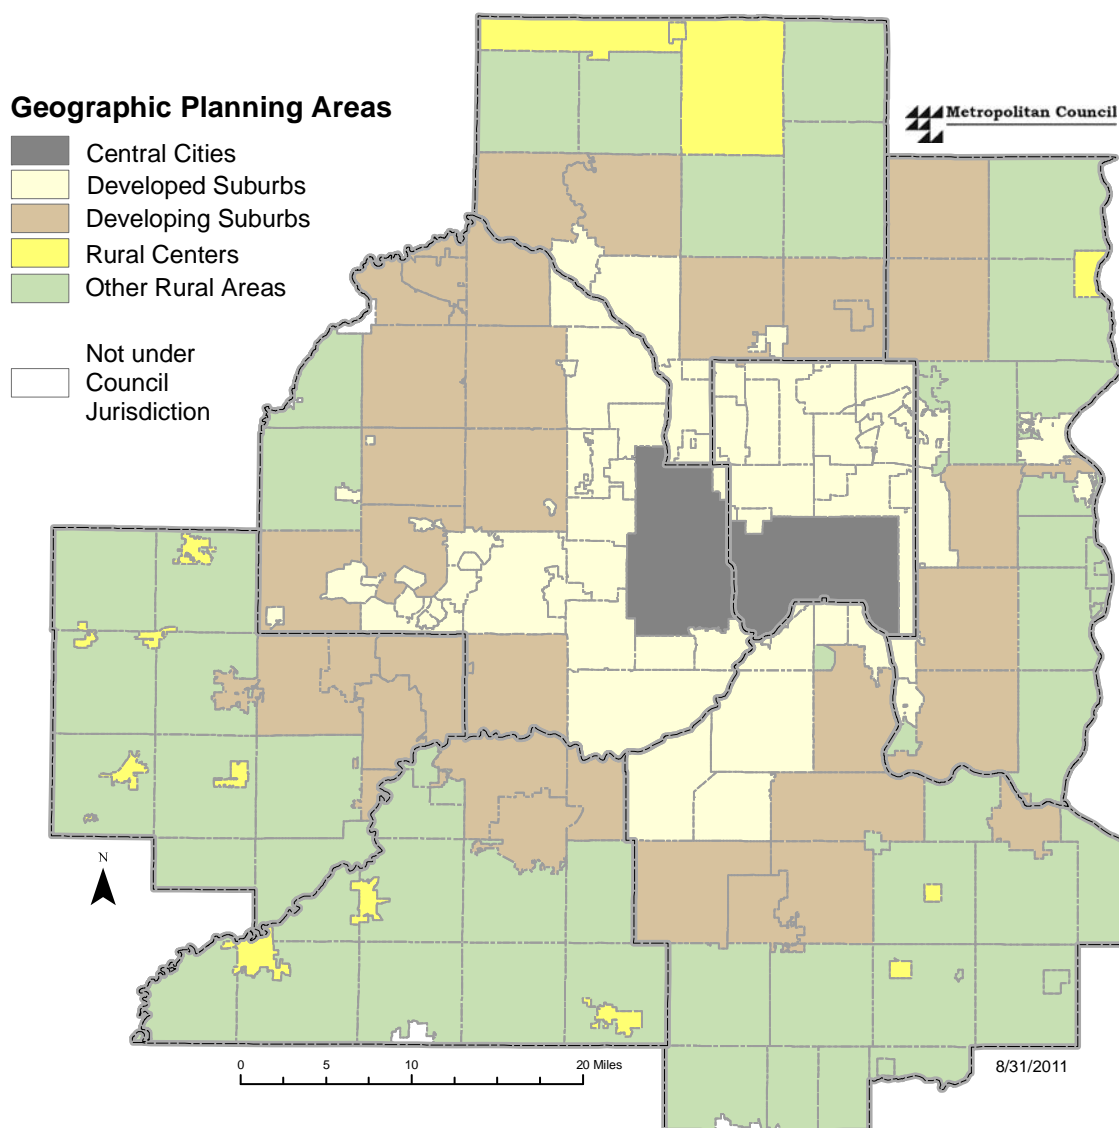

In general, these affordable housing numbers can be fluid from one year to the next. Changes in the numbers are reflective of not only market activity but also the input of new data sources. As new data sources become available, better quality of data can be presented in this report.
