VI. Waiver Reports Appendix .....	18

## **Executive Summary**

For more than two decades, Minnesota has made home and community-based services (HCBS) available to people with disabilities. To support more community-based service options, the Minnesota Department of Human Services (DHS) operates the following HCBS waivers for people with disabilities:

**Brain Injury (BI) Waiver**, established on April 1, 1992, is a community alternative for people with acquired or traumatic brain injuries who need the level of care provided in a nursing facility (NF) that provides specialized cognitive and behavioral supports or a neurobehavioral hospital (NB). The name changed from the Traumatic Brain Injury (TBI) waiver with the 2011 waiver renewal with the Center for Medicare and Medicaid Services (CMS).

**Community Alternative Care (CAC) Waiver**, established on April 1, 1985, is a community alternative for people who are chronically ill or medically fragile and need the level of care provided in a hospital.

**Community Alternatives for Disabled Individuals (CADI) Waiver**, established on October 1, 1987, is a community alternative for people who need the level of care provided in a nursing facility.

**Developmental Disabilities (DD) Waiver**, established on July 1, 1984, is a community alternative for people who need the level of care provided in an intermediate care facility for people with developmental disabilities (ICF/DD).

HCBS waivers provide necessary services and supports so that people with disabilities can continue to live in their communities. Services are designed to be meaningful to the person receiving them.

As Minnesota's experience with these four waiver programs for people with disabilities has matured, DHS has focused on the following:

- Expanding participants' choice of community living options
- Developing more person-directed services
- Building partnerships with communities
- Offering a variety of employment options
- Creating more information, referral and assistance services
- Improving the quality of services
- Strengthening participant safeguards

In 2009, Minnesota began two initiatives that respond to conditions required by the Centers for Medicare & Medicaid Services (CMS) for continued approval of the disability waiver. These two initiatives will establish provider standards, provider enrollment processes and payment methodologies that are consistent across the state. The planned implementation for these initiatives begins on January 2014, with some phased implementation.

In 2011, Minnesota was awarded the Money Follows the Person (MFP) Demonstration Program grant from the Centers for Medicare and Medicaid Service (CMS). Minnesota will leverage an award of up to \$187.4 million in federal funds over 5 years to improve community services and support people in their homes rather than institutions.

This report provides the Minnesota Legislature with:

- Data regarding the demand for and the available resources for HCBS waiver programs for persons with disabilities in Minnesota
- Information on changes to the service delivery system to make it more sustainable into the future

### **Data Resources**

All data in this report were obtained from the following sources:

- 372 reports for CMS
- Medicaid Management Information System (MMIS) Screening, Service Agreement, and Claims Data
- [Public reports on the DHS website](#)
- Waiver Management System

## I. Legislation

This report was prepared for the Minnesota Legislature in accordance with Minnesota Statutes §256B.0916, Subd. 7 and Minnesota Statutes §256B.49, Subd. 21. The statute requires the Commissioner of the Department of Human Services to issue a report on county and state use of available resources for the following home and community-based service (HCBS) waiver programs:

- Brain Injury (BI)
- Community Alternative Care (CAC)
- Community Alternatives for Disabled Individuals (CADI)
- Developmental Disabilities (DD)

Minnesota Statutes §256B.0916, subdivision. 7. **Annual report by commissioner.**

Beginning November 1, 2001, and each November 1 thereafter, the commissioner shall issue an annual report on county and state use of available resources for the home and community-based waiver for persons with developmental disabilities. For each county or county partnership, the report shall include:

1. The amount of funds allocated but not used.
2. The county-specific allowed reserve amount approved and used.
3. The number, ages and living situations of individuals screened and waiting for services.
4. The urgency of need for services to begin within one, two, or more than two years for each individual.
5. The services needed.
6. The number of additional persons served by approval of increased capacity within existing allocations.
7. Results of action by the commissioner to streamline administrative requirements and improve county resource management.
8. Additional action that would decrease the number of those eligible and waiting for waiver services.

The commissioner shall specify intended outcomes for the program and the degree to which these specified outcomes are attained.

Minnesota Statutes §256B.49, subd. 21. **Report.** The commissioner shall expand on the annual report required under section 256B.0916, subd. 7, to include information on the county of residence and financial responsibility, age, and major diagnoses for persons eligible for the home and community-based waivers authorized under subd. 11 who are: (1) receiving those services, (2) screened and waiting for waiver services; and (3) residing in nursing facilities and are under age 65.

## II. Overview of Waiver Programs

### A. Waiver Background

The goal of HCBS waiver programs is to provide necessary services and supports to people living in their communities who would otherwise require the level of care provided in an institution. Congress first allowed waiver programs in 1982, and opened the door in Minnesota for deinstitutionalization of persons with developmental disabilities. In the late 1990s, there were renewed efforts to provide home and community options for people with all types of disabilities choosing to move from nursing facilities. In 1999, the U.S. Supreme Court's Olmstead Decision affirmed the right of individuals who are eligible for Medicaid services to receive those services in the least restrictive setting in accordance with the Americans with Disabilities Act.

To continue to provide community alternatives to institutionalization, the Continuing Care Administration (CCA) of the Department of Human Services (DHS) has adopted these goals:

- Community membership
- Health, wellness and safety
- Own place to live
- Important long-term relationships
- Control over supports
- Employment earnings and stable income

Minnesota makes home and community-based services waivers available with federal financial participation. In order to obtain federal participation, Minnesota submits waiver plans that CMS approves initially and every five years.

Each of the Minnesota home and community-based waiver programs has been developed to meet federal guidelines, which includes the obligation to meet specified federal assurances in six areas:

1. Level of care
2. Service plan
3. Qualified providers
4. Health and welfare
5. Administrative authority
6. Financial accountability

Services authorized under all waiver program plans must:

- Help a person avoid institutionalization and be an appropriate alternative to institutionalization
- Help a person function with greater independence in the community
- Be necessary to assure health, safety and welfare of the person
- Meet the unique needs and preferences of the person
- Have no other funding source
- Have a cost that is considered reasonable and customary

**B. Waiver Overview Data**

The following three tables present statewide data on Minnesota’s disability waiver programs:

**Table 1: Cost-Effectiveness of Community over Institutional Settings**

CMS requires waiver services to be cost-neutral when compared with institutional care. Minnesota chooses to strive for cost-effectiveness of the waivers, which continues to provide long-term savings to the state. Table 1 compares waiver costs to institutional costs to show the cost savings of the waivers for people with disabilities.

The sources of the data in Table 1 are the reports prepared by DHS for CMS, called 372 reports. These reports compare annual per capita Medicaid costs for an HCBS waiver population and a corresponding institutional population. The waiver and state plan services are included to determine the total waiver costs. The comparison periods are:

BI	04/01/09 to 03/31/10
CAC	04/01/09 to 03/31/10
CADI	10/01/08 to 09/30/09
DD	07/01/08 to 06/30/09

**Table 1: Cost-Effectiveness of Community over Institutional Settings – Average Annual Spending Per Recipient**

HCBS Waiver	Level of Care	HCBS Waiver Costs			Institutional Costs			Savings HCBS Waiver over Institutional
		Waiver Services	State Plan Services	Total Waiver	Institutional	State Plan Services	Total Institutional	
BI	Nursing Facility and Hospital	\$61,561	\$12,615	\$74,176	\$124,781	\$20,172	\$144,953	\$70,777
CAC	Hospital	\$52,375	\$126,347	\$178,722	\$241,911	\$183,930	\$425,841	\$247,119
CADI	Nursing Facility	\$24,152	\$16,205	\$40,357	\$45,665	\$6,315	\$51,980	\$11,623
DD	Intermediate Care Facility (ICF/DD)	\$65,178	\$6,674	\$71,852	\$98,286	\$4,781	\$103,067	\$31,215

**Table 2: Summary of Waiver Populations** provides an overview of the number of persons served, eligibility requirements and benefit levels for each of the waivers for people with disabilities.

**Table 3: Case Load Summary Report for State Fiscal Year 2010 - Statewide** provides a statewide caseload summary for the four disability waiver programs.

**Table 2: Summary of Waiver Populations**

Waiver	Persons Served		Eligibility	Benefit Level
<b>CAC</b>	* Average no. recipients/month	316	* Eligible for Medical Assistance * Certified disabled by the State Medical Review Team (SMRT) or the Social Security Administration (SSA) * Under age 65 at time of application * Determined through an assessment to need hospital level of care	* Services identified in a community support plan completed by lead agency case manager * Funds managed on an aggregate basis across the BI, CAC and CADI waivers at the local level by the lead agency
	* Monthly cost per recipient	\$5,243		
	* Total annual spending	\$20m		
	* Some enrollee support costs are found in the MA Home Care section of the forecast			
<b>CADI</b>	* Average no. recipients/month	15,610	* Eligible for Medical Assistance * Certified disabled by the SMRT or the SSA * Under age 65 at time of application * Determined through an assessment to need nursing facility level of care	* Services identified in a community service plan completed by lead agency case manager * Funds managed on an aggregate basis across the BI, CAC and CADI waivers at the local level by the lead agency
	* Monthly cost per recipient	\$2,515		
	* Total annual spending	\$471m		
	* Some enrollee support costs are found in the MA Home Care section of the forecast			
<b>DD</b>	* Average no. recipients/month	15,158	* Eligible for Medical Assistance * Determined to have a developmental disability, as defined by Minnesota Statute * Determined through an assessment to need ICF/DD level of care	* Services identified in an individualized support plan completed by lead agency case manager * Funds managed on an aggregate basis at the local level by the lead agency
	* Monthly cost per recipient	\$5,588		
	* Total annual spending	\$1,016m		
	* Some enrollee support costs are found in the MA Home Care section of the forecast			
<b>BI</b>	* Average no. recipients/month	1,353	* Eligible for Medical Assistance * Certified disabled by the SMRT or SSA * Documented diagnosis of traumatic or acquired brain injury or degenerative brain disease * Experience significant to severe cognitive and behavioral impairments related to the brain injury * Under age 65 at time of application * Determined through an assessment to need nursing facility or neurobehavioral hospital level of care	* Services identified in a community service plan completed by lead agency case manager * Funds managed on an aggregate basis across the BI, CAC and CADI waivers at the local level by the lead agency
	* Monthly cost per recipient	\$ 5,963		
	* Total annual spending	\$97m		
	* Some enrollee support costs are found in the MA Home Care section of the forecast			

**NOTE: Data for FY 2011; Waiver costs do not include home care costs; Source: November 2011 forecast**

Data does not include individuals receiving services through managed care programs

### III. Legislation That Affects Waiver Growth

Legislation over the past several years has affected the growth of the disability waiver programs. The BI, CADI and DD waivers have had growth limits imposed by legislation at various times over the past several years. The allocations for the CAC Waiver, and at times the BI Waiver, have been managed through a statewide pool that lead agencies can access when needed. Prior to the 2009 legislative session, the access to a statewide pool of allocations was available for individuals moving out of institutions into the community for the BI and CADI waiver programs. Since the 2009 session, this availability to the statewide pool of allocations was changed for the BI and CADI waivers to individuals moving out of institutions when there is a planned closure or downsizing of an institution. This change has assured consistency across the BI, CADI and DD waivers.

**Table 4: BI and CADI historical waiver limits** provides a historical summary of the allocation limits for the BI and CADI waivers, by fiscal year. Table 5: DD historical waiver limits provides a historical summary of the allocation limits for the DD waiver, by calendar year.

**Table 4: BI and CADI historical waiver limits**

<b>Fiscal Year</b>	<b>BI waiver (new allocations per year)</b>	<b>CADI waiver (new allocations per year)</b>
2004	150	1140
2005	150	1140
2006	150	1140
2007	150	1140
2008	150	1140
2009	No limits	No limits
2010	150	1140
2011	72	720
2012	No limits	720
2013*	No limits	720
2014*	No limits	1020
2015*	No limits	1020

\* these are future limits that passed during the 2011 legislative session

**Table 5: DD historical waiver limits**

<b>Calendar Year</b>	<b>DD (new allocations per year)</b>
2004	50
2005	50
2006	50
2007	50
2008	50
2009	No limits (forecasted 300)
2010	180
2011	72
2012 (fiscal year)	72
2013 (fiscal year)*	72
2014 (fiscal year)*	180
2015 (fiscal year)*	180

\* these are future limits that passed during the 2011 legislative session

During the 2011 session, the legislature implemented other measures that will affect the growth of the disability waiver programs. This legislation included:

- Reduction in capacity of corporate foster care when an individual receiving BI or CADI waiver services chooses to move to a community living setting, as defined in 256B.49.
- Rate reductions for waiver service providers, including:
  - 1.5% rate reduction for all waiver and home care providers
  - 10% rate reduction for CADI and DD corporate foster care and customized living for certain individuals (the 1.5% rate reduction did not apply in these situations). Corporate foster care is defined as licensed foster care settings where the license holder does not reside in the setting.

#### **IV. Waiver Prioritization**

In 2009, legislation passed requiring DHS to establish statewide priorities for the allocation of resources for the HCBS waivers, by January 2010. The legislation also required DHS to evaluate the impact of the use of statewide priorities and to report to the legislature in this report on whether the commissioner recommends the continued use of the priorities.

The priorities identified in statute are individuals who continue to have a need for waiver services after they have maximized the use of state plan services and other funding resources, including natural supports, prior to accessing waiver services, and who meet at least one of the following criteria:

- (1) have unstable living situations due to the age, incapacity, or sudden loss of the primary caregivers;
- (2) are moving from an institution due to bed closures;
- (3) experience a sudden closure of their current living arrangement;
- (4) require protection from confirmed abuse, neglect, or exploitation;
- (5) experience a sudden change in need that can no longer be met through state plan services or other funding resources alone; or
- (6) meet other priorities established by the department.

DHS included an additional priority for individuals at high risk for institutionalization due to severe behavioral issues or intensive medical needs that jeopardize personal health, safety and welfare or pose an imminent danger of harm to others. DHS made changes to assessment documents to provide the ability to track whether individuals receiving waiver allocations met the identified priorities. The use of the statewide priorities provides consistency across the state on who receives allocations. DHS recommends the continued use of the statewide priorities.

## **V. Waiver Program Goals and Outcomes**

DHS identified two major reform goals in the January 2010 Annual Report on the Use and Availability of Home and Community-Based Services Waivers for Persons with Disabilities:

- Federal Compliance for the HCBS Waivers
- Changing Current Residential Service Models and Evaluating Housing Options

This section of the report will provide a status update on those two goals, as well as identify what aspects of these goals will be the focus for the upcoming year.

### ***Goal 1—Federal Compliance for the HCBS Waivers***

DHS submitted the CAC Waiver renewal application in November 2007 to CMS. In its review of this application, CMS identified two areas in which Minnesota was out of compliance with federal requirements:

- County-negotiated rates, which creates a concern about disparity in the availability of waiver services from county to county
- The use of lead agency contracts as the mechanism for establishing and monitoring waiver provider qualifications and service standards.

CMS' concerns about the CAC Waiver renewal application identified the need for consistent, statewide procedures to determine rates, establish provider standards and permit greater participant choice of providers. CMS asserted that Minnesota was out of compliance with federal requirements by delegating the responsibility of establishing rates and managing contracts to lead agencies.

In order to renew the CAC Waiver, DHS submitted to CMS a detailed plan with timelines to ensure consistent, statewide provider standards for all HCBS waivers and to establish statewide rate setting methodologies for disability HCBS waivers.

In 2009, the legislature provided authorization and funding to develop rate setting and provider enrollment structures in Minnesota. Subsequently, DHS engaged numerous internal and external stakeholders to assist in the development of the new rate setting methodologies and provider enrollment processes. Legislation required for these new processes will be proposed during the 2013 session, including implementation in January 2014 with a phased in approach for some aspects.

### ***Goal 2— Changing Current Residential Service Models***

There has been an effort over the past several years to shift the service model for residential services toward the development of more individually designed living arrangements that give an individual more control and more choices about where and with whom to live, and are typically less expensive.

## **Component Overview and Progress**

There are several components of this effort, including:

- A moratorium on new child and adult corporate foster care licenses, with some exceptions, passed during the 2009 legislative session. Corporate foster care settings are

## Use and Availability of Home and Community-Based Waivers for Persons with Disabilities

settings where the license holder does not reside in the setting. This is a more expensive model of residential service. While it is a valuable service, many people are able to live more independently or in alternative settings. The primary intent of the moratorium was to assure ongoing sustainability of the waivers for people with disabilities. During the 2011 special session and 2012 session, additional legislation was passed that required the department to decrease the capacity of corporate foster care settings using a statewide needs determination process.

- Various grants appropriated by the legislature for local planning, technology, case consultation, evaluation, and consumer information infrastructure to assess the use of technology as an alternative to services in corporate foster care settings. The grants are intended to help support individuals in their own homes with less reliance on the more expensive models of residential services.
- A contract with the Arc of Minnesota to assist individuals with disabilities in finding and managing their own housing. The grants that pay for this effort were made available through legislation that passed during the 2008 session. As of March 1, 2012, 389 people moved into homes of their own with Housing Access Services. The Department will be expanding the Housing Access Coordination, currently available through all of the disability HCBS waivers, to include the more robust supports provided through Housing Access Services. The Department is also exploring ways to make this type of service available to individuals who do not receive services through the HCBS waivers.
- Implementation of the Money Follows the Person (MFP) Demonstration Program Grant. Minnesota is one of the thirteen states awarded grants in 2011 and joins 29 other states and the District of Columbia already operating MFP programs. Minnesota will leverage the federal funds to improve community services and support people in their homes rather than institutions through the five years of the grant. First year funding for Minnesota is \$13.4 million. Participation in this program will help DHS:
  - Continue to rebalance its long-term care system away from dependence on institutional care to achieve a sustainable balance of institutional and community-based services
  - Provide more individualized care for some of Minnesota's most vulnerable residents
- Defining home and community based settings for purposes of receiving HCBS waiver services. The Department was working internally to develop a definition of home and community based settings across populations, based on the proposed CMS rules on this topic, with some modifications to address specific concerns in Minnesota. During the 2012 session, language passed that included a definition in statute that applied to the disability waivers.

## Future Efforts

DHS will be focusing efforts in this area on the implementation of Money Follows the Person and the Medical Assistance Reform, which was authorized during the 2011 special session. Several of the components mentioned above are being evaluated through the development of the Medical Assistance Reform proposal, which will be released for public comment in June 2012.

## **Outcomes**

The efforts DHS is undertaking related to housing and residential services will expand options available to individuals, as well as achieve long-term sustainability for the waiver programs. The sustainability will be achieved by providing services in less expensive residential settings.

## **VI. Description of Waiver Reports**

Minnesota Statutes § 256B.0916 calls for the submission of information for each county or county partnership on the topics on the following pages. The sources for these reports include MMIS Screening and Service Agreement Data, the Waiver Management Systems, and the Continuing Care Management Reporting System (CCMRS).

### ***A. Reports on the DD Waiver***

#### **DHS Public Reporting System**

DHS has developed an on-line public reporting system to replace many of the reports on the individuals waiting for services. The reports are updated quarterly and available by county. DHS will continue to develop the reports and add more to the on-line tool. The reports can be accessed on this website - [http://www.dhs.state.mn.us/dhs16\\_159977](http://www.dhs.state.mn.us/dhs16_159977).

As of August 17, 2011, there were a total of 3,554 individuals waiting for the DD waiver. Approximately 3,000 of the individuals identified as waiting are under age 22, living at home with their parents with the majority likely receiving school services. Almost all on the waiting list are receiving at least one Medicaid or state-funded service.

The statewide reports are included in the appendices for each of the following:

- Appendix 1: DD waiver waitlist by current service and residence
- Appendix 2: DD waiver waitlist by current services, age and waiver need index
- Appendix 3: DD waiver waitlist by planned service and residence
- Appendix 4: DD waiver waitlist by residence, age and waiver need index

When screening an individual, a lead agency case manager discusses with the person and/or the person's legal representative how soon they require DD Waiver services. The discussion is based on the needs of the person and his or her support system. The person chooses whether they need waiver services:

- Within 0 to 12 months (Waiver Need Index 001)
- Within 13 to 36 months (Waiver Need Index 002)
- At 37 months or later (Waiver Need Index 003)

This is the Waiver Need Index. When determining a person's Waiver Need Index, the case manager is instructed in the DD Screening Document Codebook to discuss with the person his or her preferred timeframe. The case manager should not make a decision on timeframe based on perceived waiting lists or anticipation of future waiver allocations.

## **DD Waiver Funds Allocated but Not Used**

Appendix 5 details the amount of funds allocated but not used in the DD Waiver for Calendar Year (CY) 2008, 2009 and 2010. The table details for each county:

- Total dollars allocated to a county in a given year
- Total dollars spent on services by the county in that year
- Difference between the dollars allocated and the dollars spent
- Percentage difference between dollars allocated and dollars spent

Because Medicaid providers have a full year after providing a service to bill, some services provided in CY 2010 have not yet been billed. The table provides data available through November 1, 2011, for services provided during CY 2010.

Each county or county alliance was required to submit a document detailing their policies and procedures for management of their DD Waiver allocation, with updates as changes in policy occurs. The rationale included:

- Budget reserves needed to meet anticipated and unanticipated changes in current participant needs within the budget year
- Analysis of historical spending data and trends
- Demographics of its current waiver population
- Recent changes in law or other service programs that could increase demand for waiver services among current participants.

DHS addresses large reserves by factoring them into the methodology to determine the number of new allocations a county will receive. DHS collects and maintains a copy of each county's policy and procedure guidelines, including the county's planned reserve. Specific county reserve guidelines are available from DHS upon request. Beginning in January 2010, DHS instituted statewide allocation priorities, as directed by legislation that passed during the 2009 session (see section IV for specific information on the statewide allocation priorities).

## **Number of Additional Persons Served on the DD Waiver within Existing Allocations**

Appendix 6 presents the number of additional people who were served through this capacity in calendar years (CY) 2008, 2009 and 2010 as of October 1, 2010, for each county. It is important to note that this report does not take into account the number of people who leave the waiver every year. Counties manage their DD Waiver allocation in an aggregate model. Within this model, counties can serve additional persons through increased capacity within their existing allocations.

## ***B. Reports on BI, CAC, and CADI Waivers***

### **People Receiving BI, CAC or CADI Waiver Services by Primary Diagnosis and Age**

Appendix 7 provides a summary by county and statewide of the age and diagnosis of the number of people receiving services through the BI, CAC and CADI waivers.

### **People Screened but Not Yet on Program for BI, CAC or CADI Waiver(s) by Primary Diagnosis and Age**

Appendix 8 summarizes the number of people by county and statewide who have been screened and are waiting for services on the BI, CAC and CADI waivers.

### **People Residing in a Nursing Facility by Primary Diagnosis and Age**

Appendix 9 provides a summary by county and statewide of this information.

### **BI, CAC, and CADI BI Aggregate Waiver Funds Allocated But Not Authorized**

Appendix 10 details the amount of funds allocated but not authorized in the BI, CAC and CADI waivers aggregate allocation for fiscal years (FY) 2009, 2010 and 2011. Because Medicaid providers have a full year after a service is provided to bill for services, some services provided in FY 2011 have not yet been billed. The table provides data available through October 1, 2011, for services provided during FY 2011. The table provides the following details for each county:

- Total dollars allocated to a county in a given year
- Total dollars authorized on services by the county in that year
- Difference between the dollars allocated and the dollars authorized
- Percentage difference between dollars allocated and dollars authorized
