

Lessard-Sams Outdoor Heritage Council

Final Accomplishment Plan Report

Date: August 31, 2011

Program Title: **Accelerated Prairie Grassland Restoration and Management (P13)**

Manager's Name: Bill Penning

Title: Farmland Wildlife Program Leader

Organization: Minnesota Department of Natural Resources

Address: 500 Lafayette Road

City: St. Paul

State: Minnesota

Zip: 55155

Telephone: 651-259-5230

Email: bill.penning@state.mn.us

Fax: 651-297-4961

Funds Recommended: \$1,700,000

Legislative Citation and Appropriation Language:

ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(a)

Outcomes

The Minnesota Department of Natural Resources Accelerated Prairie Grassland Restoration and Management Program had a successful first round of funding from the Legacy Funds. The program worked through the growing pains and obstacles in getting a new program up and operational and was successful in enhancing nearly 5,800 acres of prairie and grasslands in eight of the ecological subsections of Minnesota. A contractor base has been established for this type of work statewide that needs to be evaluated and expanded on for future appropriations.

Maintenance

These restorations and enhancements will occur on public lands (primarily Wildlife Management Areas) which are owned in fee title by the state. Long-term maintenance will be incorporated into DNR's regular planning and maintenance schedule. The new LSOHC funded WMA Roving Crews will also be utilized in maintaining these projects through prescribed burning and other maintenance activities. It should be noted, however, that current levels of normal DNR funding for these activities are insufficient to manage the entire WMA system. Therefore, additional management funds will likely be requested from LSOHC in the future.

Sustainability

These restorations and enhancements will be sustained by incorporating them into DNR's regular planning and maintenance schedule. The new LSOHC funded WMA Roving Crews will also be utilized in sustaining these projects through prescribed burning and other maintenance activities. It should be noted, however, that current levels of normal DNR funding for these activities are insufficient to manage the entire WMA system. Therefore, additional management funds to sustain these projects will likely be requested from LSOHC in the future.

Program Summary Information

The Minnesota Department of Natural Resources Accelerated Prairie Grassland Restoration and Management Program completed enhancement projects on a total of 5,785 acres on WMA's located throughout the various prairie habitats within Minnesota under this appropriation. Despite a slow start, two bad winters and one spring we accomplished 79% of our total acreage goal and spent 80% of the appropriation. These projects primarily consisted of woody vegetation management and conversion of crop and brome fields to prairie.

The somewhat controversial Roadsides component of this program was never initiated and the \$250,000 designated originally for this project was redistributed via an amended accomplishment plan to complete secondary projects that had been proposed and approved but were not funded.

The Wildlife Contract Specialist position was hired in August, 2010. This position was originally proposed as a ½ time (.5 FTE) position over the two years of the appropriation. Due to the late start of this position during the 2 year appropriation funding cycle this position became a full time position for one year. The Contract Specialist provided 1,896 hours of contract and project management services to the Minnesota Department of Natural Resources Section of Wildlife for both the ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(a) and ML 2010, Ch.361, Art.1, Sec. 2, Subd. 2(a). appropriations.

Initial site development (IDP) on newly acquired WMA's was originally targeted to restore/enhance about 1,500 acres at a cost of approximately \$300,000. We were initially operating under the understanding that we would have 4 years to complete the necessary development projects versus the 2 years to complete the other enhancement and restoration projects. Late in the grant cycle it was determined that these funds would expire on June 30, 2011 and were only available for the first 2 years of this appropriation. Most of the projects planned for completion using these funds needed more than 2 years for implementation. This change resulted in only 199 acres of habitat work for initial site development being completed. However, numerous other necessary IDP components were completed. These activities are reported in the "IDP parcel list" tab of the parcel list spreadsheet. The Accomplishment plan was amended to reallocate \$150,000 from IDP to habitat project work and where feasible these funds were used to complete secondary enhancement projects before the funding expired.

Weather was a key factor in the number of projects and acres that were completed under this appropriation. Back-to-back severe winters' of 2009-2010 and 2010-2011 limited equipment access to sites. Much of the woody vegetation removal was planned and contracted out to be completed during the winter months when the ground was frozen to minimize the impact to the existing prairie. Unable

to complete this work during the winter led to numerous contract cancellations, extensions, and rebids. The wet spring of 2011 also greatly impacted the number of acres completed. Many conversions were planned for the spring of 2011 with the site prep work having been completed the previous year and the seed purchased or acquired through local harvest. These sites remained too wet to plant prior to the appropriation expiring so the sites will be planted in the fall of 2011 using alternative funding or DNR staff including the DNR WMA Roving Crews.

Where appropriate, Conservation Corps Minnesota was contacted about crew availability and interest in these enhancement projects. Projects that required heavy equipment or large trees to be removed were beyond the capabilities of the Conservation Corps crews. On several projects a combination of contracted services from the private sector and Conservation Crews worked together for successful project completion. Work accomplished by the Conservation Corps tended to be at a higher cost than what was estimated or budgeted for a specific project resulting in fewer acres or fewer projects being completed with the available funds. Many enhancement projects are well suited to the labor intensive hand work that can be provided by the Conservation Corps crews. The goal would be to continue this mutually beneficial relationship well into the future.

Additional Notes:

- 1) The data that we were requested to track changed multiple times (along with formatting and precision requirements) during this initial grant phase. Unfortunately we were not able to track everything requested under these dynamic conditions and some information has therefore been aggregated. For example, tracking individual habitat projects was more challenging than we anticipated. Traditionally habitat expenditures are tracked by DNR Work Area rather than a small project by small project basis. Therefore, we were only able to provide aggregated expenditure information in Work Areas that had multiple projects. This is reflected in the final parcel list.
- 2) The ongoing controversies (at the time) regarding definitions of enhance vs restore led us to eventually treat all projects as enhancement projects. Thus we ultimately had no restoration projects although under some definitions much of what we did could have been termed restoration. We made no attempt to differentiate through project tracking.
- 3) The timeline from the passage of the Legacy Amendment to awarding the first round of grants was extremely compressed and virtually impossible to meet. I'd like to recognize that the Council did an amazing job under these difficult circumstances. Furthermore, Council staff has been extremely responsive, helpful and flexible. They have been essential in helping us navigate through uncharted waters and have done and continue to do an outstanding job.
- 4) Unpredictable weather and the fluidity of individual projects linked to a two year time frame prevented DNR from completing all of the projects and expending all available funding. We are glad to see that the Council has recognized these factors and extended timelines and provided additional flexibility in future years.

5) At the start of this project DNR recognized that there were not enough private vendors currently in the business to meet the new demands for this type of work. Therefore early contracts had minimal requirements in terms of demonstrated previous performance, performance bonds, etc. This was done on purpose to allow small and new start up contractors the ability to get into the business. For the most part these incentives failed. Nearly 50% of the original contracts were never started and had to be rebid. Weather certainly played a role but simple lack of contractor performance with no enforcement “stick” to compel compliance explains many of these failures. Since that time additional control and compliance requirements have been added to new contracts to help ensure project completion. There are two unfortunate consequences of these actions: 1) New/small vendors are less competitive, and 2) costs increase. Creating an expanded pool of qualified vendors is still an important goal and one that DNR strongly supports. However, a different approach will be required to achieve that goal.

Table B-2. Other Outcome Table

The IDP Parcel List tab lists other outcomes by newly acquired unit. Please refer to that table for additional outcomes.

Final Accomplishment Plan Report

Date: ~~October 5, 2011~~ December 6, 2011

Program Title: Green Corridor Legacy Program – Phase I

Manager's Name: Nancy Fasching

Title: Grants Officer

Organization: Southwest Initiative Foundation

Address: 15 3rd Ave NW

City: Hutchinson

State: MN

Zip: 55350

Telephone: 800-594-9480

Email: nancyf@swifoundation.org

Fax: 320-587-3838

Funds Recommended: \$1,617,000

Legislative Citation and Appropriation Language:

ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(b)

\$1,617,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with the Southwest Initiative Foundation or successor to acquire land for purposes allowed under the Minnesota Constitution, article XI, section 15, in Redwood County to be added to the state outdoor recreation system as defined in Minnesota Statutes, chapter 86A. A list of proposed fee title acquisitions must be provided as a part of the required accomplishment plan. The commissioner of natural resources must agree to each proposed acquisition. No more than five percent of this appropriation may be spent on professional services directly related to this appropriation's purpose.

Outcomes

The Green Corridor Legacy Program - Phase I protected high quality fish, game, and wildlife habitats by developing complexes or corridors of new and/or expanded MN DNR Wildlife Management Areas (WMA) and/or Aquatic Management Areas (AMA) in the Program area.

The LSOHC Lamberton WMA acquisition expanded the existing 641 acre WMA complex by 43% (277 acres) for a total of 918 acres. This acquisition enhances wildlife carrying capacity, lowers ongoing maintenance costs, and provides greater accessibility to the public. The protected areas provide much needed nesting habitat for both game and non-game wildlife species. This property also has the potential for wetland restoration.

The LSOHC Whispering Ridge AMA acquisition expanded the existing 183 acre AMA complex by 55% (101 acres) to 184 acres. This site provides benefit to wildlife and additional shoreline protection. Through this expansion, ongoing maintenance costs are lowered and greater accessibility is provided to the public.

This program incorporated the basic concepts of sustainability and ecosystem management. Minnesota has lost 99% of the original prairie and has seen dramatic declines in grassland dependent wildlife of greatest need. Traditional game & aquatic species was also affected by the decline in habitat.

The program succeeded because numerous partnerships have been developed from a wide variety of disciplines to assist in monitoring outcomes, provide long range management of the acquired lands, provide technical support, and ensure that program activities will advance the goals, objectives, and strategies of the various state-wide conservation plans and provide public transparency and input.

The Green Corridor Legacy Program approach was based on sound science concepts of plan development, setting conservation priorities, developing short and long term strategies to achieve conservation priorities, implement the strategies, and then continue monitoring the outcomes. The Green Corridor Legacy Program in consultation with area DNR managers has insured program activities conform to the various state conservation and resources plan objectives and outcomes.

Publicly owned natural resource infrastructure (e.g. WMA, AMA, etc) invigorates local and regional economies by providing outdoor recreation and tourism opportunities. New business concepts are likely to arise as a direct result of the recreational/ tourism opportunities that will be advanced and promoted by the Green Corridor Legacy Program.

Efforts to restore, protect, and enhance our wetlands, prairies, forests, and habitat for fish, game, and wildlife are timely as escalating development pressures threaten remaining natural lands and water resources on both public and private lands in the program area.

Maintenance

First, initial site restoration and development (signage, parking lots, fencing) was accomplished by this appropriation. The DNR Division of Fish & Wildlife is permanently managing these properties. Routine maintenance is managed by area DNR staff funded by their traditional sources like the Game & Fish Fund. Due to the proximity to other DNR properties, maintenance costs are less than average due to shared resources. Periodic enhancements or improvements will be funded by special funding requests. The DNR requires management plans for each project which identify periodic inspections and continuing management of the property site. These management practices include such things as; prescribed fire, weed control, and invasive tree removal. Regional partners may also support these management activities/practices by applying for state funding/grants for maintenance as needed.

Sustainability

The fee simple acquisition of these 378.27 acres is being administered by the MN DNR Division of Fish and Wildlife for management and enforcement of state laws on these acquired properties in perpetuity. This program has acquired land in fee from willing and supportive landowners and was transferred to the appropriate state agency for long-term habitat conservation, outdoor recreational access, sustainability, and monitoring. Payment in Lieu of tax (PILT) has been established by current or traditional methods. The Program Manager and DNR submitted an approved Initial Development Plan (IDP).

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2009 Final Report

Date: June 22, 2015

Program or Project Title: Prairie Heritage Fund - Acquisition and Restoration, Phase 1

Funds Recommended: \$3,000,000

Manager's Name: Eran Sandquist

Title: MN State Coordinator

Organization: Pheasants Forever

Address: 410 Lincoln Ave S

Address 2: Box 91

City: South Haven, MN 55382

Office Number: 320-236-7755

Mobile Number: 763-242-1273

Email: esandquist@pheasantsforever.org

Website: www.pheasantsforever.org

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(c)

Appropriation Language: \$3,000,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Pheasants Forever or successor to acquire and restore land to be added to the state wildlife management area system. A list of proposed fee title acquisitions and a list of proposed restoration projects, describing the types and locations of restorations, must be provided as part of the required accomplishment plan. The commissioner of natural resources must agree to each proposed acquisition. To the extent possible, prairie restorations conducted with money appropriated in this section must plant vegetation or sow seed only of ecotypes native to Minnesota, and preferably of the local ecotype, using a high diversity of species originating from as close to the restoration site as possible, and protect existing native prairies from genetic contamination.

County Locations: Brown, Chippewa, Goodhue, Lyon, Pipestone, and Watonwan.

Regions in which work will take place:

- Northern Forest
- Prairie

Activity types:

- Restore
- Enhance
- Protect in Fee

Priority resources addressed by activity:

- Wetlands
- Forest
- Prairie

Abstract:

Pheasants Forever, in cooperation with partners acquired and restored five parcels totaling 1,051 acres within Southern Minnesota and enrolled the parcels into the MNDNR WMA system. In addition, 66 acres of grassland enhancement was completed on existing WMAs.

Design and scope of work:

Working with numerous partners throughout the state of Minnesota, Pheasants Forever acquired 1,051 acres of land from willing sellers

throughout Southern Minnesota. These lands have been enrolled into the state Wildlife Management Area (WMA) System and will be protected and managed in perpetuity by the Minnesota Department of Natural Resources. In addition, these newly acquired WMAs will provide public access and recreational opportunities for ALL Minnesotans, so fundamentally important to our outdoor heritage.

More specifically, a total of 5 parcels were acquired within Brown, Goodhue, Lyon, Pipestone, and Watonwan Counties. A total of 7 landowners were presented with offers and PF was successful in securing 5 of those parcels (71% success rate). Offers to landowners were based on appraised values and seemed to be competitive with the market at the time. Most projects were closed early in the project period, and therefore the agricultural land boom of 2012 seemed to have little affect on our ability to secure parcels. Parcels were identified in conjunction with DNR wildlife professionals and based on criteria in addition to minimum WMA standards that included: habitat restoration potential, landscape scale significance, presence of significant natural communities, future expansion potential, and multiple benefit analysis.

In total, \$2,969,300 of Outdoor Heritage Funds were matched with \$862,500 of non-state funding to complete this work. Striving to build upon past investments in wildlife habitat conservation and landscape level habitat complexes that protect and sustain wildlife populations, 4 of the 5 parcels are additions to existing WMAs or are adjacent to existing permanently protected lands. All parcels acquired have been restored and/or enhanced to as a high quality as practicable. All agricultural row crops on these parcels have been restored to native grassland/wetland complexes. The grasslands were restored using a broadcast or drill seeded method with a diverse mix of native grasses and forb species. 15 acres of native prairie have been protected and all parcels have been opened for public use. In addition, 66 acres of grassland enhancements were completed on an existing WMA in Chippewa County. These restored and permanently protected acres will provide critical habitat for breeding/migrating waterfowl as reproductive and winter habitat for grassland game and non game species.

Which LSOHC state-wide priorities are addressed in this proposal:

- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

Which LSOHC section priorities are addressed in this proposal:

Prairie:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Restore or enhance habitat on public lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Northern Forest:

- Not Listed

Relationship to other funds:

- Not Listed

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

Parcels acquired are now enrolled into our 30 year history of working with DNR land managers to restore, enhance and maintain high quality habitat on our state WMA's and will continue to do so as needed.

Outcomes:

Programs in the northern forest region:

Parcel Map

Prairie Heritage Fund - Acquisition and Restoration, Phase 1

Data Generated From Parcel List

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: July 17, 2013

Program or Project Title: Accelerated Prairie Grassland Wildlife Management Area Acquisition, Phase 1

Funds Recommended: \$3,913,000

Manager's Name: Patrick Rivers
Title: Land Acquisition Consultant
Organization: DNR
Street Address: 500 Lafayette Road
City: St. Paul, MN 55155
Telephone: 651-259-5209
E-Mail: pat.rivers@state.mn.us
Organization Web Site: www.mndnr.gov

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(d)

Appropriation Language: \$3,913,000 in fiscal year 2010 is to the commissioner of natural resources to acquire land for wildlife management areas with native prairie or grassland habitats. A list of proposed fee title acquisitions must be provided as part of the required accomplishment plan.

County Locations: Dakota, Martin, Nicollet, Wright, and Yellow Medicine.

Ecological Planning Regions:

- Prairie
- Metro / Urban

Activity Type:

- Protect in Fee

Priority Resources Addressed by Activity:

- Wetlands
- Prairie

Abstract:

This program protected 810 acres of new wildlife habitat in the Prairie, Deciduous Transition, and Southeast Bluffland ecological sections of Minnesota through fee title acquisition. Title of lands acquired are held by the State and are designated as WMAs.

Activity Detail

Design and Scope of Work:

Minnesota has lost 99% of the original prairie landscape resulting in drastic declines in grassland dependent wildlife. Examples of species in greatest conservation need in the prairie include American Badger, Grasshopper Sparrow, Northern Pintail, Bobolink and Eastern Meadowlark. Prairie grasslands support populations of upland game birds such as pheasants, prairie chickens and sharp-tailed grouse and a variety of dabbling ducks when associated with prairie wetland complexes. These game populations drive local and statewide hunting recreation and economy. The DNR acquired lands in the prairie, transition moraine, and bluffland ecological sections and has or will restore the grassland complexes by planting native prairie. DNR prioritized acquisitions at sites where there is an existing habitat base in prairie grassland complexes to address habitat fragmentation and to maximize habitat benefits. Collaborative partnerships were promoted in order to acquire key lands. DNR received resolution from the County Board of Commissioners approving all WMA acquisitions .

Planning

MN State-wide Conservation Plan Priorities:

- H1 Protect priority land habitats
- H3 Improve connectivity and access to recreation

Plans Addressed:

- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN
- Minnesota DNR Strategic Conservation Agenda
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years

LSOHC Statewide Priorities:

- Address conservation opportunities that will be lost if not immediately acted on
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Prairie Section Priorities:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Metro Urban Section Priorities:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity

Relationship to Other Constitutional Funds:

- No Relationships Listed

Acquisitions that meet similar long-term goals have been funded by ENRTF.

Sustainability and Maintenance:

Lands acquired under this program have been designated as State Wildlife Management Areas under authority of the Outdoor Recreation Act of 1978. Ongoing maintenance will be accomplished through routine management activities accomplished by our network of DNR offices. Periodic enhancements will be accomplished by existing staff, CCM crews, temporary project staffing or through vendor contract using traditional habitat project funding, bonding, and future requests for funding from dedicated funding sources. Payment in-lieu of tax payments are made to the counties from biennial appropriations by the Legislature from the general fund.

Outcomes

Programs in metropolitan urbanizing region:

- No Programs Listed

Programs in prairie region:

- No Programs Listed

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2009 Final Report

Date: July 18, 2013

Program or Project Title: Bluffland Prairie Protection Initiative

Funds Recommended: \$500,000

Manager's Name: Kris Larson

Title:

Organization: Minnesota Land Trust

Street Address: 2356 University Ave. W.

City: St. Paul, MN 55114

Telephone: 651-647-9590

E-Mail: klarson@mnland.org

Organization Web Site: mnland.org

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2(f)

Appropriation Language: \$500,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with the Minnesota Land Trust or successor to acquire permanent easements protecting critical prairie and grassland habitats in the bluffs in southeastern Minnesota. A list of proposed fee title and permanent easement acquisitions must be provided as part of the required accomplishment plan.

County Locations: Fillmore, and Houston.

Ecological Planning Regions:

- Southeast Forest

Activity Type:

- Protect in Easement

Priority Resources Addressed by Activity:

- Prairie

Abstract:

This initiative protected 548 acres of habit in the bluffs region of southeastern Minnesota--an area that contains unique and ecologically important prairie, oak savanna and grassland habitat along with outstanding forested bluffs, woodlands, floodplains and cold water trout streams.

Activity Detail

Design and Scope of Work:

The Mississippi River Bluffs ecological subsection is identified in Minnesota's Comprehensive Wildlife Conservation Strategy as having the highest concentration of species in greatest conservation need in the entire State. This includes a high concentration of neo-tropical migrant birds and waterfowl, as well as reptiles, mammals, mollusks and insects. Many of these game and non-game species exist in part because of the rich tapestry of habitat types in the region-hardwood forests, floodplain wetlands, cold water streams-and the unique presence of bluff prairie, oak savanna and re-established grasslands.

This rich tapestry is threatened today by the destructive impacts of land fragmentation, bluff-top development and changes in agricultural practices. The Minnesota Land Trust has been engaged in the protection of the Bluffs for more than a decade, having preserved more than 6,000 acres of land through 42 projects, making it one of the organization's highest priorities.

The Land Trust completed four conservation easements and secured an option for a fifth. Through this program, the Land Trust also conducted landowner outreach and now has information on 20 other landowners that DNR has identified and ranked as having outstanding prairie property. Specific activities conducted under this grant included: further identifying and negotiating with these interested landowners, drafting and completing easements, documenting property conditions, and creating plans for and dedicating funds for the perpetual monitoring, management and enforcement of those easements.

The conservation easements the Land Trust negotiated with each landowner were specifically designed to protect the natural features and habitat values of that landowner's particular tract of land, including the rare goat prairie and grasslands which was the primary habitat focus of this program. The easements limited commercial, industrial and residential development and division of the property, restricted inappropriate agricultural practices and required an approved land management plan to encourage proper management of the resource.

The use of conservation easements to protect critical habitat is a widely-accepted practice which has demonstrated great results both in Minnesota and around the country. The Minnesota Land Trust has an effective track record of using easements in a similar capacity for almost 20 years, holding more conservation easements than any other private conservation organization in the state--making it one of the most experienced organizations working with the unique conservation tool.

The success of conservation easements requires an effective partnership with the private landowners. As such, the Land Trust has developed an effective conservation easement stewardship program to both prevent future impacts through encouraging voluntary compliance with the terms of the easement and to enforce and defend the easement in the unlikely case of an easement violation. The Minnesota Land Trust and conservation organizations around the country have recognized the great importance of substantially investing in stewardship activity. Our successful history of easement stewardship is one of the important factors which led to the Minnesota Land Trust being one of the first accredited land trusts in the country. The Land Trust is committed to monitoring and enforcing the conservation easements secured under this program in perpetuity and has dedicated the funding necessary to fulfill this obligation.

Planning

MN State-wide Conservation Plan Priorities:

- H1 Protect priority land habitats
- H2 Protect critical shoreland of streams and lakes
- H7 Keep water on the landscape

Plans Addressed:

- Driftless Area Restoration Effort
- Minnesota DNR Strategic Conservation Agenda
- Outdoor Heritage Fund: A 25 Year Framework
- Strategic Plan for Coldwater Resources Management in Southeastern Minnesota
- Tomorrow's Habitat for the Wild and Rare
- Minnesota County Biological Survey

LSOHC Statewide Priorities:

- Address conservation opportunities that will be lost if not immediately acted on
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Produce multiple enduring conservation benefits
- Target unique Minnesota landscapes that have historical value to fish and wildlife

LSOHC Southeast Forest Section Priorities:

- Protect forest habitat through acquisition in fee or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties
- Protect, enhance, and restore habitat for fish, game, and nongame wildlife in rivers, cold-water streams, and associated upland habitat
- Protect, enhance, and restore remnant goat prairies

Relationship to Other Constitutional Funds:

- No Relationships Listed

Sustainability and Maintenance:

The land protected will be sustained through the best standards and practices for conservation easement stewardship. Funding for easement stewardship was included in the budget and secured thanks to this grant. Minnesota Land Trust's conservation easement stewardship program includes annual property monitoring, effective records management, addressing inquiries and interpretations, tracking changes in ownership, investigating potential violations and aggressively defending in the easement in the case of a real violation.

Outcomes

Programs in southeast forest region:

- No Programs Listed

Lessard-Sams Outdoor Heritage Council

Final Accomplishment Plan Report

Date: April 21, 2011

Program Title (as it appears in appropriations law): Rum River/Cedar Creek Conservation Area

Manager's Name: John VonDeLinde
Title: Director
Organization: Anoka County Parks and Recreation
Address: 550 Bunker Lake Blvd. NW
City: Andover
State: MN
Zip: 55304
Telephone: 763-767-2860
Email: vondelinde@co.anoka.mn
Fax: 763-755-0230

Funds Recommended: \$1,900,000

Legislative Citation and Appropriation Language:

ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 2g

(g) Rum River - Cedar Creek

\$1,900,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Anoka County to acquire land at the confluence of the Rum River and Cedar Creek in Anoka County. Acquired land must remain open to hunting and fishing, consistent with the capacity of the land, during the open season, as determined by the commissioner of natural resources. This is the first of two planned appropriations for this acquisition.

Outcomes

This appropriation acquired and protected 222 acres of prairie, wetland, forest and shoreline habitat for fish, game and wildlife along the Rum River and Cedar Creek in the cities of Oak Grove and Andover and will provide additional opportunities for public fishing, hunting and wildlife conservation. With the second appropriation of \$1,900,000 in 2010 (ML 2010, Ch. 361, Art. 1, Sec. 2, Subd. 2e) an additional 328 acres was acquired and protected.

Maintenance

Protection of the total 550 acres will remain in perpetuity with Anoka County as owner. Deed restrictions have been placed on the parcels pursuant to project requirements outlined in the Agreement between the State and Anoka County.

See Attachment D: 2010 L-SOHC Appropriation Ecological Restoration Plan

Sustainability

On-going operations and maintenance of the land and restoration will be sustained following the Anoka County Parks and Recreation Comprehensive Natural Resource Management Plan and will be supported through the annual Operations and Maintenance Budget for the Parks and Recreation Department and any other funding sources available.

See Attachment D: 2010 L-SOHC Appropriation Ecological Restoration Plan

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2009 Final Report

Date: May 04, 2015

Program or Project Title: MN Forests for the Future / Upper Mississippi Project, Phase 1 & 2

Funds Recommended: \$36,000,000

Manager's Name: Richard F. Peterson
Title: Forest Legacy Coordinator
Organization: DNR
Address: 1810 - 30th St. NW
City: Faribault, MN 55021
Office Number: 507-333-2012
Mobile Number: 507-330-6291
Fax Number: 507-333-2008
Email: richard.f.peterson@state.mn.us

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 3

Appropriation Language: \$18,000,000 in fiscal year 2010 and \$18,000,000 in fiscal year 2011 are to the commissioner of natural resources to acquire land or permanent working forest easements on private forests in areas identified through the Minnesota forests for the future program under Minnesota Statutes, section 84.66. Priority must be given to acquiring land or interests in private lands within existing Minnesota state forest boundaries. Any easements acquired must have a forest management plan as defined in Minnesota Statutes, section 290C.02, subdivision 7. A list of proposed fee title and easement acquisitions must be provided as part of the required accomplishment plan. The fiscal year 2011 appropriation is available only for acquisitions that, by August 15, 2009, are: (1) subject to a binding agreement with the commissioner; and (2) matched by at least \$9,000,000 in private donations.

County Locations: Aitkin, Beltrami, Cass, Clearwater, Itasca, Kanabec, Koochiching, and St. Louis.

Regions in which work will take place:

- Northern Forest

Activity types:

- Protect in Easement
- Protect in Fee

Priority resources addressed by activity:

- Forest

Abstract:

This program/project protected approximately 187,876 acres of forest and wetlands with permanent conservation easements and 2,745 acres with fee acquisition and provides public recreational access, provides for sustainable forest management, and supports diverse habitats for a wide array of fish and wildlife species.

Design and scope of work:

This proposal will protect over 190,000 acres of private forest through the use of working forest conservation easements and fee acquisition that prevents forestland conversion and parcelization. The highest priority blocks of forest within Minnesota's forested subsections will be targeted for permanent protection. Acquisitions will prevent development, assure traditional public access for hunting and fishing, and allow for sustainable forest management. The sale of large timber company holdings in Minnesota is part of a national trend. These large blocks of forest provide critical connectivity with public conservation lands. Private and public forest lands

interact to create a working forest across the landscape that provides essential benefits Minnesotans care deeply about. The vision of the Minnesota Forests for the Future Program is to protect up to 530,000 acres of private forests over the next 25 years (see Minnesota Forests for the Future: A Strategic Report. April 2008). The current request reflects an accelerated acquisition program over the next 3-4 years in order to take advantage of a short window of opportunity to protect some of the largest, remaining blocks of private forestland in the state. Projects funded under this program will protect forests, prevent forest fragmentation and encourage forest consolidation –outcomes consistent with Minnesota Statutes 97A.056.

Which LSOHC state-wide priorities are addressed in this proposal:

- Address conservation opportunities that will be lost if not immediately acted on
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

Which LSOHC section priorities are addressed in this proposal:

Northern Forest:

- Protect forestland through acquisition or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties

Relationship to other funds:

- Not Listed

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All Minnesota Forests for the Future easements have a comprehensive stewardship and monitoring plan that provide for regular landowner contacts and annual monitoring visits to ensure that the easement properties continue to provide enduring fish and wildlife habitat benefits, public access and sustainably managed forests in perpetuity. Funds for future monitoring and stewardship work will come from the Forests for the Future Monitoring account which was funded in part through the ML 2009 appropriation. The purposes of the monitoring/stewardship plans are to prevent, detect, and document violations of the easement's terms. Funding for the monitoring/stewardship is from the Forests for the Future monitoring account. Maintenance of fee parcels will be minimum based on any reforestation needs in the future but will also include maintaining boundary lines and managing public use. Funds for fee parcels will come from the Forest Investment Management Account.

Outcomes:

Programs in the northern forest region:

- Not Listed

How will they be measured and evaluated?

The project outcomes will be measured by the public benefits of large interconnected forest blocks include greater accessibility for public recreation, enhanced fish and wildlife habitat, and sustainably managed forests that support local timber based jobs and economies.

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Data Generated From Parcel List

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: July 17, 2013

Program or Project Title: Accelerated Wildlife Management Area Acquisition, Phase 1

Funds Recommended: \$2,900,000

Manager's Name: Patrick Rivers

Title:

Organization: DNR

Street Address: 500 Lafayette Road

City: St. Paul, MN 55155

Telephone: 651-259-5209

E-Mail: pat.rivers@state.mn.us

Organization Web Site: www.mndnr.gov

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 4(a)

Appropriation Language: \$2,900,000 in fiscal year 2010 is to the commissioner of natural resources to acquire land for wildlife management areas. A list of proposed fee title acquisitions must be provided as part of the required accomplishment plan.

County Locations: Dakota, Isanti, Otter Tail, and Wright.

Ecological Planning Regions:

- Northern Forest
- Forest / Prairie Transition
- Metro / Urban

Activity Type:

- Protect in Fee

Priority Resources Addressed by Activity:

- Wetlands
- Prairie

Abstract:

This program protected and restored 734 acres of new wetland wildlife habitat in wetland complexes in Minnesota through fee title acquisition. Title of all lands acquired are held by the State and designated as Wildlife Management Area.

Activity Detail

Design and Scope of Work:

The Minnesota Statewide Conservation and Preservation Plan states that "Habitat fragmentation, degradation and loss are arguably the most important issues facing the conservation and preservation of Minnesota resources. Over 90% of Minnesota's prairie wetlands have been drained or filled, including 1,500 shallow wildlife lakes. Remaining wetlands and shallow lakes are in a degraded state and upland grass buffers have been largely converted to cropland. DNR acquired remaining and restorable wetlands and surrounding uplands in high priority wetland complexes as Wildlife Management Areas. Uplands have been or will be restored to native grassland buffers, wetlands have been or will be enhanced where possible and acquisitions will be developed to make them functional units in the outdoor recreation system. Collaborative partnerships were promoted in order to acquire key lands. DNR received a resolution from the County Board of Commissioners approving WMA acquisitions.

Planning

MN State-wide Conservation Plan Priorities:

- H1 Protect priority land habitats
- H4 Restore and protect shallow lakes
- H5 Restore land, wetlands and wetland-associated watersheds

Plans Addressed:

- Long Range Duck Recovery Plan
- Long Range Plan for the Ring-Necked Pheasant in MN
- Minnesota DNR Strategic Conservation Agenda
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years

LSOHC Statewide Priorities:

- Allow public access. This comes into play when all other things about the request are approximately equal
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Forest Prairie Transition Section Priorities:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Northern Forest Section Priorities:

- No Northern Forest Priorities Listed

LSOHC Metro Urban Section Priorities:

- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

Relationship to Other Constitutional Funds:

- No Relationships Listed

Sustainability and Maintenance:

Lands acquired under this program were designated as State Wildlife Management Areas under authority of the Outdoor Recreation Act of 1978. Ongoing maintenance will be accomplished through routine management activities accomplished by our network of DNR offices. Periodic enhancements will be accomplished by existing staff, CCM crews, temporary project staffing or through vendor contract using traditional habitat project funding, bonding, and future requests for funding from dedicated funding sources. Payment in-lieu of tax payments are made to the counties from biennial appropriations by the Legislature from the general fund.

Outcomes**Programs in the northern forest region:**

- Improved aquatic habitat indicators

Programs in forest-prairie transition region:

- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: September 12, 2013

Program or Project Title: Accelerated Shallow Lake Restorations and Enhancements, Phase 1

Funds Recommended: \$2,528,000

Manager's Name: Jon Schneider

Title: Manager - Minnesota Conservation Programs

Organization: Ducks Unlimited

Street Address: 311 East Lake Geneva Road

City: Alexandria, MN 56308

Telephone: 3207629916

E-Mail: jschneider@ducks.org

Organization Web Site: www.ducks.org

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 4(b)

Appropriation Language: \$2,528,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Ducks Unlimited, Inc. or successor to restore and enhance shallow lake habitats. Up to \$400,000 of this appropriation may be used for permanent easements related to shallow lake restorations and enhancements. A list of proposed easements and projects, describing the types and locations of easements, restorations, and enhancements, must be provided as part of the required accomplishment plan. The commissioner of natural resources must agree to each easement, restoration, and enhancement.

County Locations: Douglas, Fairbault, Grant, Lac qui Parle, Murray, Stearns, Wright, and Yellow Medicine.

Ecological Planning Regions:

- Forest / Prairie Transition
- Prairie
- Metro / Urban

Activity Type:

- Protect in Easement
- Enhance

Priority Resources Addressed by Activity:

- Wetlands
- Prairie

Abstract:

Ducks Unlimited enhanced 6,882 wetland acres through the bio-engineering and installation of water control structures on managed shallow lake outlets for Minnesota DNR, and protected 76 wetland and 103 upland acres on a shallow lake through a purchased conservation easement.

Activity Detail

Design and Scope of Work:

As some of the only wetland basins that remain in prairie Minnesota, shallow lakes and large wetlands throughout southern and western Minnesota have become degraded due to high, stable water levels, altered natural hydrology due to highly drained and intensively cultivated watersheds, lack of natural fish winterkill, and invasive fish (including carp) that have increased access and overwinter survival due to high, stable water levels and manmade drainage systems through which they can now travel. These factors combined with naturally fertile prairie soils result in turbid water conditions over prolonged periods which reduce aquatic plant and invertebrate abundance upon which wetland wildlife depend in our remaining prairie wetlands and shallow lakes. The result is degraded wetland conditions that do not provide the aquatic food resources wetland-dependent wildlife, especially waterfowl, require as they move through and attempt to breed in Minnesota. The lack of high quality, productive wetland habitat is especially problematic for diving ducks and brood-rearing ducks which are fully dependent on wetlands and shallow lakes for all of their food resources.

The huge watershed changes in Minnesota's agriculture-dominated prairie landscape that are largely beyond the control of conservationists leave agency wildlife managers with few options to improve and protect our remaining public water wetlands and shallow lakes. These tools primarily include acquiring and restoring land around our remaining wetlands and shallow lakes to buffer them from the effects of highly degraded and drained agricultural landscapes, and actively managing water levels in them to periodically induce temporary drought conditions to winterkill fish and rejuvenate the aquatic ecology of aquatic plants and invertebrates in them upon which waterfowl and other wetland-dependent migratory birds rely.

Through our Living Lakes Initiative, Ducks Unlimited (DU) strives to help Minnesota Department of Natural

Resources (DNR) and U.S. Fish & Wildlife Service (Service) to improve and protect our remaining shallow lakes and large wetland marshes. The goal of this Outdoor Heritage Fund (OHF) grant-funded program was to support DU wetland bio-engineering assistance to help the Minnesota Department of Natural Resources (DNR) and U.S. Fish & Wildlife Service structurally improve shallow lakes outlets by designing and installing new water control structures used to enhance the aquatic habitat quality of wetlands throughout southern and western Minnesota. DU biologists and engineers worked together with Minnesota DNR shallow lake program and area wildlife managers alongside Service biologists to design and construct water control structures with fish barriers that allow managers to enhance water quality and wetland habitat conditions for wildlife through temporary water level draw-downs. DU also protects private shallow lake shoreland on managed shallow lakes by securing a conservation easement held and enforced by DU.

In partnership with Minnesota DNR, DU designed and implemented eight shallow lake enhancement projects that improved 6,882 acres through the bio-engineering design and installation of water control structures and pumps equipped with fish barriers features. Minnesota DNR wildlife field staff used these structures to conduct temporary water level draw-downs to simulate natural drought conditions that winterkilled invasive fish (especially carp), consolidated sediments and nutrients, and rejuvenated the aquatic ecology of shallow lakes. These capital investments will last for decades, and will continue to be used periodically by Minnesota DNR wildlife field staff to manage and further enhance shallow lake habitat through annual state duck stamp funding.

The shallow lakes enhanced through this grant include 316-acre Jennie Lake in Douglas County, 4,076-acre Lake Christina and Lake Ina complex in Douglas County, 1,166-acre Rice Lake in Faribault County, 218-acre Ash Lake in Grant County, 165-acre Cory Lake on Hamlin WMA in Lac qui Parle County, 171-acre Round Lake on Shetek WMA in Murray County, 330-acre Smith Lake in Wright County, and 440-acre Curtis Lake in Yellow Medicine County. In addition, DU also engineered new water control structures for the Service on Rydell National Wildlife Refuge and for the Minnesota DNR on Malardi state Wildlife Management Area (WMA) that will be installed through future 2010 and 2012 OHF grants to DU after permits and funding have been secured. Finally, DU also secured a purchased conservation easement on Fish Lake in Stearns County that permanently protects 179 acres in perpetuity, which DU will annually monitor and enforce with stewardship endowment funding provided by the landowner.

Planning

MN State-wide Conservation Plan Priorities:

- H4 Restore and protect shallow lakes

Plans Addressed:

- Ducks Unlimited Living Lakes Initiative
- Long Range Duck Recovery Plan
- Managing Minnesota's Shallow Lakes for Waterfowl and Wildlife
- North American Waterfowl Management Plan
- Northern Plains Prairie Potholes Regional Shorebird Conservation Plan
- Outdoor Heritage Fund: A 25 Year Framework
- Tomorrow's Habitat for the Wild and Rare
- U.S. Fish and Wildlife Service Strategic Habitat Conservation Model
- U.S. Prairie Pothole Joint Venture Plan

LSOHC Statewide Priorities:

- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Prairie Section Priorities:

- Restore or enhance habitat on public lands
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Forest Prairie Transition Section Priorities:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Metro Urban Section Priorities:

- No Metro Urban Priorities Listed

Relationship to Other Constitutional Funds:

- No Relationships Listed

Sustainability and Maintenance:

All water control structures, pumps, and fish barriers will be constructed for the Minnesota DNR and US Fish & Wildlife Service are on land under their control, and will be managed for decades by field staff from these public wildlife agencies. Regular, periodic assessments of the shallow lake basins will be conducted by DNR Wildlife's shallow lakes program and assisted by DU field biologists to evaluate shallow lake condition and document improvements.

A financial contribution to endow annual conservation easement monitoring and enforcement was made by the private landowner from whom DU secured a conservation easement. All DU conservation easements are monitored and visited annually to ensure protected habitat is maintained.

Outcomes

Programs in forest-prairie transition region:

- No Programs Listed

Programs in metropolitan urbanizing region:

- No Programs Listed

Programs in prairie region:

- No Programs Listed

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 4(c)

Appropriation Language: \$5,600,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Pheasants Forever or successor to acquire and restore wetland and related upland habitats, in cooperation with the United States Fish and Wildlife Service and Ducks Unlimited, Inc. or successor to be managed as waterfowl production areas. A list of proposed acquisitions and a list of proposed projects, describing the types and locations of restorations, must be provided as part of the required accomplishment plan.

County Locations: Clay, Cottonwood, Douglas, Jackson, Lincoln, Otter Tail, Pope, Renville, Traverse, Waseca, and Wright.

Regions in which work will take place:

- Prairie
- Metro / Urban

Activity types:

- Restore
- Enhance
- Protect in Fee

Priority resources addressed by activity:

- Wetlands
- Prairie

Abstract:

Pheasants Forever, Ducks Unlimited, and the U.S. Fish and Wildlife Service partnered to permanently protect, restore and enhance 1,630 acres of grassland and 294 acres of wetland as Waterfowl Production Areas in Western and Southern Minnesota. All lands acquired will be owned and managed in perpetuity by the USFWS as part of the National Wildlife Refuge System and open for public recreation.

Design and scope of work:

Pheasants Forever and Ducks Unlimited, in partnership with the U.S. Fish and Wildlife Service, acquired 12 parcels of land from willing sellers totaling 1,522 acres within priority wildlife habitat complexes throughout the prairie and metro regions of the state. Partners were highly successful at securing parcels as evidenced with a 86% acquisition completion rate (12 out of 14 projects closed) because

appraisal values were competitive due to the fact most transactions were completed before the agricultural market boom in 2012. All of the acquired parcels are additions onto existing permanently protected wildlife habitat complexes creating an even larger benefit to waterfowl and the myriad of wildlife species that depend on these wetland / grassland habitats. All parcels have been donated to the U.S. Fish and Wildlife Service and are now protected and managed in perpetuity as Waterfowl Production Areas (WPA) under the National Wildlife Refuge System. Each parcel is open for public recreation, including hunting, as defined by the National Wildlife Refuge System Improvement Act.

Each acquired parcel has also been restored and/or enhanced to as a high quality as practicable to ensure the maximum amount of benefits to migratory birds and other wildlife species. Wetlands restorations of various types, including seasonal wetlands, were restored by breaking drain tile lines, filling drainage ditches, constructing earthen dams, and installing water control structures. Invasive tree removal work was completed on many of these newly acquired lands and all agricultural fields restored to grasslands were restored using a broadcast or drill seeded method with a diverse mix of native grasses and forb species. In addition, 100 acres of wetland and grasslands were restored and 302 acres of prairie were enhanced on existing Waterfowl Production Areas in Pope and Traverse Counties, MN. These restored and permanently protected acres will provide critical habitat for breeding/migrating waterfowl as reproductive and winter habitat for grassland game and non game species.

The work completed in this project has accelerated investment into permanently protected wildlife habitat complexes through the highly successful USFWS Waterfowl Production Area program. The outcomes of this project protects, maintains, and increases waterfowl and other wildlife populations within these areas. Furthermore, this work helps to improve water quality, reduces soil erosion, and provides public areas for Minnesotans to recreate in the outdoors, something so fundamental to ensure Minnesota's future outdoor heritage.

Which LSOHC state-wide priorities are addressed in this proposal:

- Address conservation opportunities that will be lost if not immediately acted on
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

Which LSOHC section priorities are addressed in this proposal:

Prairie:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Restore or enhance habitat on public lands
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Metro / Urban:

- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

Relationship to other funds:

- Not Listed

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

All lands acquired will be managed as part of the National Wildlife Refuge System.

Outcomes:

Programs in metropolitan urbanizing region:

- Not Listed

How will they be measured and evaluated?

Not Listed

Programs in prairie region:

Data Generated From Parcel List

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: August 13, 2013

Program or Project Title: Shallow Lake Critical Shoreland, Phase 1

Funds Recommended: \$450,000

Manager's Name: Jon Schneider

Title: Manager, Minnesota Conservation Programs

Organization: Ducks Unlimited

Street Address: 311 East Lake Geneva Road

City: Alexandria, MN 56308

Telephone: 3207629916

E-Mail: jschneider@ducks.org

Organization Web Site: www.ducks.org

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 4(e)

Appropriation Language: \$450,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Ducks Unlimited, Inc. or successor to protect habitat by acquiring land associated with shallow lakes. A list of proposed acquisitions must be provided as part of the required accomplishment plan. The commissioner of natural resources must agree to each proposed acquisition.

County Locations: Freeborn, and Lincoln.

Ecological Planning Regions:

- Prairie

Activity Type:

- Protect in Fee

Priority Resources Addressed by Activity:

- Wetlands
- Prairie

Abstract:

Ducks Unlimited acquired unprotected shoreland in fee-title for Minnesota DNR on two shallow lakes managed for wildlife, including 40 acres along Biggs Lake on the Shaokatan WMA in Lincoln County, and 23 acres along State Line Lake in Freeborn County.

Activity Detail

Design and Scope of Work:

As some of the only wetlands that remain in prairie Minnesota, shallow lakes and large marshes suffer from turbid water quality and often exist in a degraded ecological condition. This is primarily caused by two human-induced factors: intensively drained and cultivated agricultural watersheds that contribute excessive water runoff and nutrient loading, and over-abundant invasive fish that have improved access via drainage networks and improved ability to over winter due to high, stable water levels and infrequent fish winterkill conditions. These factors combined with naturally fertile prairie soils result in turbid water conditions over prolonged periods which reduce aquatic plant and invertebrate abundance upon which wetland wildlife depend in our remaining prairie wetlands and shallow lakes.

As a result, conservation agency wildlife managers are left with few options to improve and protect our remaining public water wetlands and shallow lakes. These tools primarily include acquiring and restoring land around our remaining wetlands and shallow lakes to buffer them from the effects of highly degraded and drained agricultural landscapes, and actively managing water levels in them to periodically induce temporary drought conditions to winterkill fish and rejuvenate the aquatic ecology of aquatic plants and invertebrates in them upon which waterfowl and other wetland-dependent migratory birds rely.

Through our Living Lakes Initiative, Ducks Unlimited (DU) strives to help Minnesota Department of Natural Resources (DNR) and U.S. Fish & Wildlife Service buffer and improve our remaining shallow lakes and large wetland marshes. This Outdoor Heritage Fund (OHF) grant funded program specifically funded DU efforts to help Minnesota DNR acquire and restore key tracts of land within approved state Wildlife Management Area (WMA) boundaries to help buffer our remaining wetlands and give DNR wildlife managers the legal riparian flowage rights they need to actively manage water levels, where needed. Through another OHF grant funded program for shallow lake and wetland enhancements, DU biologists and engineers design and construct water control structures and fish barriers that allow agency resource managers to improve water quality and habitat conditions for wildlife through temporary water level draw-downs.

However, acquiring, restoring and protecting adjacent shorelands is important to compliment the long-term

management of our remaining public water shallow lakes and wetlands. Protecting and restoring shoreland via fee-title acquisition permanently increases wildlife benefits for both upland and wetland wildlife, and also helps managers maintain improved shallow lake habitat conditions for longer periods of time. Permanent protection of shorelands along managed shallow lakes helps assure that these lakes will continue to provide excellent waterfowl and wildlife habitat into the future, and it also provides public access and gives Minnesota DNR a vested landownership stake to justify their management actions for the public good. Permanent shoreland protection also eliminates the chance of future subdivision and development, thereby reducing disturbance to wildlife and the real possibility that lake-use expectations of new shoreline owners will conflict with water level management strategies for wetland wildlife.

This OHF grant funded program allowed DU to secure fee-title land acquisitions for the Minnesota DNR to restore shoreland wildlife habitat along shallow lakes and large wetlands, and help assure management of shallow lakes are marshes for waterfowl and other wetland-dependent wildlife in the future. The OHF grant reimbursed DU for fund fee-title purchase acquisition and related professional service costs such as appraisals and boundary survey, in addition to DU staff for time spent working with private landowners, conducting initial property inspections, performing due diligence, and grant administration.

After pursuing several other tracts unsuccessfully in Murray County for Minnesota DNR where private landowners declined to sell, DU successfully acquired two tracts of land in Lincoln County and Freeborn County. DU purchased 40 acres from private landowner Remerowski adjacent to the outlet of Biggs Lake on the Shaokatan WMA in Lincoln County was purchased in fall 2011 and transferred to Minnesota DNR in late 2012. The acquisition of this shoreland represented the last private parcel needed by DNR to completely own and protect all the land around Biggs Lake, and outlet dam structure on Biggs Lake was subsequently replaced by DU with a variable-crest water control weir structure in fall 2012 via a 2012 OHF grant to DU. The land acquired was farmed in 2012 and 2013 to prepare it for prairie restoration, and will be seeded by Minnesota DNR in fall 2013 or spring 2014, depending on weather and timing of crop harvest.

DU also used funds from this grant to purchase 23 acres on State Line Lake from private landowner Brackey, including the outlet of that shallow lake as well. The outlet is a very old, dysfunctional fixed-crest dam structure owned by Freeborn County, and will be removed and replaced with a variable-crest water control structure by DU through a 2012 OHF grant to DU in fall/winter 2013. The land, along with 22 acres purchased from Brackey in conjunction using 2010 OHF grant funds, is enrolled in the USDA's Conservation Reserve Program (CRP) and was in native grasses, so no restoration was required although Minnesota DNR plans to conduct prescribed burning, forb interseeding, and possibly small wetland restoration in late 2013 and 2014. The land is being processed by the state for transfer to Minnesota DNR in late 2013 or spring 2014. Both Lincoln and Freeborn Counties were notified of these acquisitions by DU and Minnesota DNR, and both properties are open for public hunting and other compatible public outdoor recreational uses.

Although the acquisition of 100 acres of land as originally envisioned for this 2009 OHF grant was not achieved due to rapidly rising crop and land prices, the successful acquisition of these two parcels totaling 63 acres on two key shallow lakes managed by Minnesota DNR represents important shoreland protection outcomes and allowed for the replacement of two old shallow lake dam structures with new variable crest water control structures that would not have otherwise been possible had DU not acquired these two critical tracts of land for Minnesota DNR.

Planning

MN State-wide Conservation Plan Priorities:

- H4 Restore and protect shallow lakes

Plans Addressed:

- Ducks Unlimited Living Lakes Initiative
- Long Range Duck Recovery Plan
- Managing Minnesota's Shallow Lakes for Waterfowl and Wildlife
- Minnesota Prairie Conservation Plan
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years
- North American Waterfowl Management Plan
- Outdoor Heritage Fund: A 25 Year Framework
- Tomorrow's Habitat for the Wild and Rare
- U.S. Fish and Wildlife Service Strategic Habitat Conservation Model

LSOHC Statewide Priorities:

- Allow public access. This comes into play when all other things about the request are approximately equal
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Produce multiple enduring conservation benefits
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Prairie Section Priorities:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

Relationship to Other Constitutional Funds:

- No Relationships Listed

Sustainability and Maintenance:

These properties will be managed in perpetuity by the Minnesota DNR as state Wildlife Management Areas. The DNR Section of Wildlife field staff will carry out periodic management practices such as invasive species control and prescribed burning to maintain the restored grassland in a quality state as outlined in the Initial Development Plan. The state will make Payment In Lieu of Tax payments to counties as directed and funded by the legislature.

Outcomes

Programs in prairie region:

- No Programs Listed

Organization Web Site:

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 5(a)

Appropriation Language: \$4,000,000 in fiscal year 2010 is to the commissioner of natural resources for a pilot program to provide competitive, matching grants of up to \$400,000 to local, regional, state, and national organizations, including government, for enhancement, restoration, or protection of forests, wetlands, prairies, and habitat for fish, game, or wildlife in Minnesota. Up to 6-1/2 percent of this appropriation may be used for administering the grant. The funds may be advanced in three equal sums, on or after November 1, 2009, February 1, 2010, and April 1, 2010. Grantees may protect land through acquisition of land or interests in land. Easements must be permanent. Land acquired in fee must be open to hunting and fishing during the open season unless otherwise provided by state law. The commissioner of natural resources must agree to each proposed acquisition of land or interest in land. The program shall require a match of at least \$1 nonstate funds to \$10 state funds. The nonstate dollars match may be in-kind. The criteria for evaluating grant applications must include amount of habitat restored, enhanced, or protected; local support; degree of collaboration; urgency; multiple benefits; habitat benefits provided; consistency with sound conservation science; adjacency to protected lands; full funding of the project; supplementing existing funding; public access for hunting and fishing during the open season; sustainability; and use of native plant materials. All projects must conform to the Minnesota statewide conservation and preservation plan. Wildlife habitat projects must also conform to the state wildlife action plan. Priority may be given to projects acquiring land or easements associated with existing wildlife management areas. All restoration or enhancement projects must be on land permanently protected by conservation easement or public ownership. To the extent possible, a person conducting prairie restorations with money appropriated in this section must plant vegetation or sow seed only of ecotypes native to Minnesota, and preferably of the local ecotype, using a high diversity of species originating from as close to the restoration site as possible, and protect existing native prairies from genetic contamination. Subdivision 10 applies to grants awarded under this paragraph. This appropriation is available until June 30, 2013, at which time all grant projects must be completed and final products delivered, unless an earlier date is specified in the grant agreement. No less than 15 percent of the amount of each grant must be held back from reimbursement until the grant recipient has completed a grant accomplishment report in the form prescribed by and satisfactory to the Lessard Outdoor Heritage Council. As a condition of proceeding with this appropriation, the commissioner shall report on the feasibility, process, and timeline for creation of a Minnesota fish and wildlife foundation, to be modeled after the National Fish and Wildlife Foundation, and on the possibility of allowing for the administration by this entity of the conservation partners grant program. The legislative guide created in this act shall consider whether this program should be administered by the National Fish and Wildlife Foundation, the commissioner of natural resources, or some neutral third party.

County Locations: Becker, Hubbard, Isanti, Kandiyohi, Kittson, Stearns, Steele, Waseca, and Washington.

Ecological Planning Regions:

- Northern Forest
- Forest / Prairie Transition
- Southeast Forest
- Prairie
- Metro / Urban

Activity Type:

- Protect in Easement
- Restore
- Enhance
- Protect in Fee

Priority Resources Addressed by Activity:

- Wetlands
- Forest
- Prairie
- Habitat

Abstract:

This program is managed by the Minnesota Department of Natural Resources (DNR) to provide competitive matching grants of up to \$400,000 to local, regional, state, and national organizations, including government. Grant activities include the enhancement, restoration, or protection of forests, wetlands, prairies, and habitat for fish, game, or wildlife in Minnesota. A 10% non-state cash or in-kind match was required from all grantees, and was identified at the time of application.

Activity Detail

Design and Scope of Work:

CONSERVATION PARTNERS GRANTS PROGRAM

This grant program consists of two activity categories:

Category 1 - Restoration and Enhancement. For the purpose of this grant program, this work is defined as: Restore: action to bring a habitat back to a former state of sustaining fish, game or wildlife, with an ultimate goal of restoring habitat to a desired conservation condition. Enhance: action to increase the ability of habitat and related natural systems to sustain and improve fish, game or wildlife in an ecologically sound manner.

Projects funded under Category 1, Restoration and Enhancement, consists of activities that restore or enhance habitat for fish, game, or wildlife on lands permanently protected by conservation easement or public ownership. Specific activities can be found in LSOHC Habitat activity Definitions.

1. Proposed projects on public lands were approved by and coordinated with public land managers. Projects proposed for lands under permanent conservation easement were reviewed by public land managers. Proof of review or approval was submitted with the grant application.
2. Restoration and enhancement activities are considered permanent work and a conservation easement was required for private lands before work could begin. Funding for the easement/deed restriction and associated costs could be paid for with in-kind match or grant funds.
3. Grantees were responsible for all administrative requirements such as Historic Property Review, Wetland Conservation Act, Stormwater Permits, Natural Heritage Review, DNR Waters Permits, and others as appropriate. Costs for any reviews or permits were included in the grant application, either as in-kind match or requested from grant dollars. As specified in the grant agreement, grantees may, by letter, assign these duties and associated funds back to DNR, with DNR consent.
4. The Commissioner of Natural Resources approved all projects.
5. Vegetation and seed used in these projects are from ecotypes native to Minnesota, and preferably of the local ecotype, using a high diversity of species originating from as close to the restoration site as possible. Existing native prairies are protected from genetic contamination to the extent possible.
6. A restoration and management plan was prepared for all restorations, consistent with the highest quality conservation and ecological goals for the restoration site. The plans included: a. The proposed timetable for implementing the restoration, including i. site preparation, ii. establishment of diverse plant species, iii. maintenance, and iv. additional enhancement to establish the restoration; b. Identification of long-term maintenance and management needs of the restoration and how the maintenance, management, and enhancement would be financed; and c. the best available science to achieve the best restoration.
7. Grantees gave consideration to and made timely written contact with the Minnesota Conservation Corps for consideration of possible use of their services to contract for restoration and enhancement services.

Category 2 - Land Protection

• Protect: action to maintain the ability of habitat and related natural systems to sustain fish, game or wildlife through acquisition of fee title or conservation easements. For the purpose of this grant program, this work is defined as:

Acquisitions funded under Category 2 – Land protection of wetlands, prairies, forests, and habitat for fish, game, and wildlife by acquiring land through fee title or permanent easement. Lands acquired in fee title are open to the public for hunting and fishing during open seasons. Easements included stewardship provisions to perpetually monitor and enforce the conditions of the easements.

1. The Commissioner of Natural Resources agreed to each proposed acquisition of land or interest in land. For fee acquisition, the final title holder and land manager were specified. Lands that were conveyed to a public agency were donated.
2. For permanent easements, the following information was provided: a. What organization monitors the easement; b. Who the easement reverts to in the event the primary easement holder ceases to exist; c. What easement monitoring standards are used; d. Amount, funding source, and holder of the stewardship endowment dedicated to the easement; and e. Any restrictions, allowed structures, allowed activities, and reserved rights.
3. A restoration and management plan was prepared for all newly acquired lands as described in Category 1.6 above.
4. All acquisition selection processes and related transactions costs for all parties involved in the acquisition were reported to the LSOHC.
5. A Notice of Funding Restriction was recorded for each acquisition.
6. An analysis of future operations and maintenance costs for any acquired lands was provided to the LSOHC, commissioner of finance, and appropriate public agency.
7. The grantee submitted an annual report on the status of property acquired with grant funds to the LSOHC by December 1 each year.

Grantees acquiring land that was conveyed to DNR were required to follow DNR's Third Party Land Acquisition Procedures. All appraisals were done to USPAP standards. All land surveys were done to meet DNR's General Requirements for Land Surveys. Lands that were conveyed to a public agency for long-term management were brought up to the agency's minimum operating standards before being conveyed.

General Program Requirements: all grants were closed by June 30, 2013, at which time all projects were completed and final products delivered. All grant projects conformed to the terms set out in the 2009 MN Session Law Chapter 172, and addressed the priorities in the Minnesota Statewide Conservation and Preservation Plan, and Tomorrow's Habitat for the Wild and Rare. In implementing this program the DNR complied with the Office of Grants Management policies.

Grantee Match: The match requirement was 10% in nonstate cash or in-kind work, which included verifiable equipment use, donation of materials, and donation of labor. The amount and source of the match was identified at the time of application. Proof of all required and pledged grantee match was provided before the final payment was made.

Grant Process: A Request for Proposal (RFP) was posted on the DNR and LSOHC websites in August 2009. The RFP contained grant program, application criteria, application and proposal requirements, state agency contacts and grant reporting requirements. The RFP and all grant agreements incorporated appropriate principles and criteria from the 2009 LSOHC Strategic Plan.

Applications were accepted electronically, with grants selected for funding in December, 2009, and March, 2010. Maps and aerial photos showing the location of proposed projects were required, and included the name of the public land unit or private landowner, county, legal description, acres affected, and on-site and adjacent habitat types.

DNR Grants Program staff worked with grant applicants to ensure applications were complete, compiled all grant applications, and entered applications into a database. A Technical Guidance Committee selected by the Commissioner of Natural Resources ranked applications based on criteria established by the LSOHC and MN State Legislature and recommended projects and funding levels. This committee included representatives from DNR, BWSR, the University of MN, the USFWS, and other appropriate members. The Commissioner made the final decision on projects funded and funding levels.

Ranking Criteria Used:

1. Amount of habitat restored, enhanced, or protected
2. Local support
3. Degree of collaboration
4. Urgency
5. Multiple benefits
6. Habitat benefits provided
7. Consistency with sound conservation science
8. Adjacency to protected lands
9. Full funding of the project
10. Supplementing existing funding
11. Public access for hunting and fishing during the open season
12. Sustainability
13. Use of native plant materials

Every effort was made to evenly distribute the selected grants by geographic location, activity, and funding level. Once grant applications were selected, DNR Grants Program staff worked with grantees to ensure financial reviews, grant agreements, and any other necessary paperwork was completed. Work did not begin until the grant was executed.

Grant Payment:

Grant payments were administered on a reimbursement basis unless otherwise provided in the grant agreement. Periodic payments were made upon receiving documentation that the deliverable items articulated in the approved accomplishment plan had been achieved, including partial achievements as evidenced by approved progress reports. Capital equipment expenditures were not allowed.

No less than 15 percent of the amount of each grant must be held back from reimbursement until the grant recipient had completed a grant accomplishment report in the form prescribed by and satisfactory to the LSOHC.

Project reviews were completed on an annual basis by CPL staff. Grantees submitted annual accomplishment reports in the form determined by the LSOHC by September 1 of each year. These reports were based on work completed during the previous fiscal year. Reports accounted for the use of grant and match funds, and outcomes in measures of wetlands, prairies, forests, and fish, game, and wildlife habitat restored, enhanced, and protected. The report included an evaluation of these results. A map and aerial photo showing the location of the project and including the name of the public land unit or private landowner, county, legal description, and acreage was included.

MN FISH AND WILDLIFE FOUNDATION REPORT:

This report considered the feasibility, process, and timeline for creation of a Minnesota fish and wildlife foundation, to be modeled after the National Fish and Wildlife Foundation, and on the possibility of allowing for the administration by this entity of the conservation partners grant program. The legislative guide created in this act considered whether this program should be administered by the National Fish and Wildlife Foundation, the commissioner of natural resources, or some neutral third party.

Planning

MN State-wide Conservation Plan Priorities:

- H1 Protect priority land habitats
- H2 Protect critical shoreland of streams and lakes
- H3 Improve connectivity and access to recreation
- H4 Restore and protect shallow lakes
- H5 Restore land, wetlands and wetland-associated watersheds
- H6 Protect and restore critical in-water habitat of lakes and streams
- H7 Keep water on the landscape
- LU8 Protect large blocks of forest land
- LU10 Support and expand sustainable practices on working forested lands

Plans Addressed:

- Ducks Unlimited Living Lakes Initiative
- Grassland Bird Conservation Area
- Minnesota DNR AMA Acquisition Plan
- Minnesota DNR Nongame Wildlife Plans
- Minnesota DNR Scientific and Natural Area's Long Range Plan
- Minnesota DNR Strategic Conservation Agenda
- Minnesota Forest Resource Council Landscape Plans
- Minnesota Prairie Conservation Plan
- Minnesota Sustainability Framework
- Minnesota's Wildlife Management Area Acquisition - The Next 50 Years
- National Audubon Society Top 20 Common Birds in Decline
- National Fish Habitat Action Plan
- North American Waterbird Conservation Plan
- Outdoor Heritage Fund: A 25 Year Framework
- State Comprehensive Outdoor Recreation Plan
- Tomorrow's Habitat for the Wild and Rare
- U.S. Fish and Wildlife Service Strategic Habitat Conservation Model
- U.S. Prairie Pothole Joint Venture Plan

LSOHC Statewide Priorities:

- Address conservation opportunities that will be lost if not immediately acted on
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing

- and other outdoor recreation opportunities
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Prairie Section Priorities:

- Protect, enhance, or restore existing wetland/upland complexes, or convert agricultural lands to new wetland/upland habitat complexes
- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna
- Convert agricultural land to wetland/upland to protect, enhance, or restore existing habitat complexes, such as WMAs
- Restore or enhance habitat on public lands
- Protect, restore, and enhance shallow lakes
- Protect expiring CRP lands
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Forest Prairie Transition Section Priorities:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife
- Protect, enhance, and restore rare native remnant prairie
- Protect, enhance, and restore migratory habitat for waterfowl and related species, so as to increase migratory and breeding success

LSOHC Northern Forest Section Priorities:

- Protect shoreland and restore or enhance critical habitat on wild rice lakes, shallow lakes, cold water lakes, streams and rivers, and spawning areas
- Protect forestland through acquisition or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties
- Restore and enhance habitat on existing protected properties, with preference to habitat for rare, endangered, or threatened species identified by the Minnesota County Biological Survey
- Restore forest-based wildlife habitat that has experienced substantial decline in area in recent decades

LSOHC Metro Urban Section Priorities:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity
- Protect habitat corridors, with emphasis on the Minnesota, Mississippi, and St. Croix rivers (bluff to floodplain)
- Enhance and restore coldwater fisheries systems
- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

LSOHC Southeast Forest Section Priorities:

- Protect forest habitat through acquisition in fee or easement to prevent parcelization and fragmentation and to provide the ability to access and manage landlocked public properties
- Protect, enhance, and restore habitat for fish, game, and nongame wildlife in rivers, cold-water streams, and associated upland habitat
- Protect, enhance, and restore remnant goat prairies
- Restore forest-based wildlife habitat that has experienced substantial decline in area in recent decades

Relationship to Other Constitutional Funds:

- No Relationships Listed

Sustainability and Maintenance:

Grantees provided this information in their application by answering the following questions:

1. Who will be the long-term land manager?
2. Describe the short- and long-term maintenance required to sustain the habitat work you will do; and/or
3. Describe the short- and long-term work required to manage the land you will acquire.
4. Who will do this work?
5. How will this work be funded?

Outcomes

Programs in the northern forest region:

- Forestlands are protected from development and fragmentation
- Healthy populations of endangered, threatened, and special concern species as well as more common species
- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors
- Landlocked public properties have increased access for land managers

Programs in forest-prairie transition region:

- Improved aquatic habitat indicators
- Increased availability and improved condition of riparian forests and other habitat corridors
- Protected, restored, and enhanced aspen parklands and riparian areas
- Protected, restored, and enhanced nesting and migratory habitat for waterfowl, upland birds, and species of greatest conservation need
- Wetland and upland complexes will consist of native prairies, restored prairies, quality grasslands, and restored shallow lakes and wetlands
- Water is kept on the land

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Improved aquatic habitat indicators
- Protected habitats will hold wetlands and shallow lakes open to public recreation and hunting

Programs in southeast forest region:

- Healthier populations of endangered, threatened, and special concern species as well as more common species
- High priority riparian lands, forestlands, and savannas are protected from parcelization and fragmentation
- Improved aquatic habitat indicators
- Landlocked public properties have increased access for land managers
- Remnant goat prairies are perpetually protected
- Rivers, streams, and surrounding vegetation provide corridors of habitat
- Stream to bluff habitat restoration and enhancement will keep water on the land to slow runoff and degradation of aquatic habitat

Programs in prairie region:

- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Expiring CRP lands are permanently protected
- Improved condition of habitat on public lands
- Increased participation of private landowners in habitat projects
- Protected, restored, and enhanced habitat for waterfowl, upland birds, and species of greatest conservation need
- Protected, restored, and enhanced shallow lakes and wetlands
- Remnant native prairies and wetlands are permanently protected and are part of large complexes of restored prairie, grasslands, and large and small wetlands
- Water is kept on the land

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: June 09, 2014

Program or Project Title: Aquatic Management Area Acquisition, Phase 1

Funds Recommended: \$5,748,000

Manager's Name: Patrick Rivers

Title:

Organization: DNR

Street Address: 500 Lafayette Road

City: Saint Paul, MN 55155

Telephone: 651-259-5209

E-Mail: pat.rivers@state.mn.us

Organization Web Site: www.mndnr.gov

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 5(b)

Appropriation Language: \$5,748,000 in fiscal year 2010 is to the commissioner of natural resources to acquire and in fee title and easement to be added to the state aquatic management area system. Acquired land must remain open to hunting and fishing, consistent with the capacity of the land, during the open season, as determined by the commissioner of natural resources. A list of proposed fee title and easement acquisitions must be provided as part of the required accomplishment plan.

County Locations: Becker, Beltrami, Cass, Crow Wing, Fillmore, Goodhue, Houston, Hubbard, Lake, Olmsted, Otter Tail, Pine, St. Louis, Wabasha, and Winona.

Ecological Planning Regions:

- Northern Forest
- Forest / Prairie Transition
- Southeast Forest
- Prairie
- Metro / Urban

Activity Type:

- Protect in Easement
- Protect in Fee

Priority Resources Addressed by Activity:

- Habitat

Abstract:

This program permanently protected approximately 953 acres (10.3-miles) of lake and warm water stream shoreline through fee title and permanent easement acquisition and secured 73 acres (4.8-miles) of permanent habitat management easements that include angler access.

Activity Detail

Design and Scope of Work:

Aquatic Management Areas were established to protect, develop, and manage lakes, rivers, streams, and adjacent wetlands and lands that are critical for fish and other aquatic life, for water quality, and for the intrinsic biological value, public fishing, or other compatible outdoor recreational uses. AMAs provide angler or management access; protect fish spawning, rearing, or other unique habitat; protect aquatic wildlife feeding and nesting areas; and protect critical shoreline habitat, among other purposes authorized by Minnesota Statutes 86A.05, Subdivision 14.

Guiding Principles

- >Conserve critical shoreline habitat for all fish and wildlife species
- >Conserve vital fish spawning and rearing areas
- >Provide angling and management access corridors on trout and warm-water streams
- >Provide non-motorized angler access on lakes and streams

> Preserve examples of healthy shoreline habitats as maps for future restoration of disturbed sites.

Project dollars secured fee title or permanent easements on approximately 525 acres (5.2 miles) of lake warmwater stream shoreline, and leveraged about 427 acres (5.3 miles) of similar acquisition through partner funds. Project dollars also secured 73 acres (4.8 miles) of permanent habitat management easements that include angler access on designated trout streams, primarily in the Southeast and Northeast areas of the state. Overall priority was given to acquiring regionally significant fish and wildlife habitat that will build on existing shoreline habitat and provide angler and hunter access. Acquisitions occurred throughout the state, and depending on priorities, risk of development, and potential partners. Collaborative partnerships were promoted in order to acquire key lands.

County and Township governments were notified by the DNR when acquiring AMA's in their locale. Local support for AMA acquisition is usually substantial, and local groups commonly offer to help raise funds.

Note: Land acquisition for this appropriation incurred professional service expenses that exceeded the approved budget. During this appropriation, the state of Minnesota changed its billing software system. The change resulted in significant delays (9 months, July 2011- March 2012) in receiving bills and overspending the professional service budget line without prior authorization. We have created individual accounting budgets for each line item in approved budgets. This step and the now operational accounting system will prevent similar issues in the future.

Sources outside of OHF were also used to pay for professional service expenses. These leveraged dollars are noted in the budget table.

Planning

MN State-wide Conservation Plan Priorities:

- H2 Protect critical shoreland of streams and lakes
- H6 Protect and restore critical in-water habitat of lakes and streams
- H7 Keep water on the landscape

Plans Addressed:

- Midwest Glacial Lakes Partnership
- Minnesota DNR AMA Acquisition Plan
- Minnesota DNR Strategic Conservation Agenda

LSOHC Statewide Priorities:

- Address conservation opportunities that will be lost if not immediately acted on
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Target unique Minnesota landscapes that have historical value to fish and wildlife

LSOHC Prairie Section Priorities:

- No Prairie Section Priorities Listed

LSOHC Forest Prairie Transition Section Priorities:

- Protect, enhance, and restore wild rice wetlands, shallow lakes, wetland/grassland complexes, aspen parklands, and shoreland that provide critical habitat for game and nongame wildlife

LSOHC Northern Forest Section Priorities:

- Protect shoreland and restore or enhance critical habitat on wild rice lakes, shallow lakes, cold water lakes, streams and rivers, and spawning areas

LSOHC Metro Urban Section Priorities:

- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

LSOHC Southeast Forest Section Priorities:

- Protect, enhance, and restore habitat for fish, game, and nongame wildlife in rivers, cold-water streams, and associated upland habitat

Sustainability and Maintenance:

Acquired parcels were designated as Aquatic Management Areas, a unit of DNR's Outdoor Recreation System. Management and monitoring is completed on a regular basis by local Area Fish and Wildlife Staff. Conservation Easements will be monitored according to established DNR monitoring protocol. Payment in-lieu of taxes are made to the counties from biennial appropriations by the Legislature from the general fund.

Outcomes

Programs in the northern forest region:

- Forestlands are protected from development and fragmentation
- Improved aquatic habitat indicators
- Protect and provide access to priority aquatic habitats

Programs in forest-prairie transition region:

- Improved aquatic habitat indicators

Programs in metropolitan urbanizing region:

- No Programs Listed

Programs in southeast forest region:

- No Programs Listed

Programs in prairie region:

- No Programs Listed

Relationship to Other Funds:

- No Relationships Listed

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2009 Final Report

Date: August 20, 2013

Program or Project Title: Dakota County Habitat Protection, Phase 1

Funds Recommended: \$1,000,000

Manager's Name: Al Singer

Title:

Organization: Dakota County

Street Address: 14955 Galaxie Avenue

City: Apple Valley, 55124

Telephone: 952-891-7001

E-Mail: al.singer@co.dakota.mn.us

Organization Web Site:

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 5(d)

Appropriation Language: \$1,000,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Dakota County for acquisition of permanent easements. A list of proposed acquisitions must be provided as part of the required accomplishment plan.

County Locations: Dakota

Ecological Planning Regions:

- Metro / Urban

Activity Type:

- Protect in Easement

Priority Resources Addressed by Activity:

- Habitat

Abstract:

Dakota County protected 568 acres of high-quality wildlife habitat, encompassing 1.5 miles of the Cannon River, 1.5 miles of Chub Creek, 0.75 miles of the Vermillion River, 1.0 mile along the Mississippi River, and 2.2 miles along River Lake.

Activity Detail

Design and Scope of Work:

Dakota County has experienced significant residential growth over the last two decades and the most highly desirable location in suburban and rural areas are near rivers, lakes, and other natural areas. In addition, the price of agricultural crops is placing intense pressure to reduce vegetated buffers, CRP land, and other land protection efforts. As the economy improves, there will be increased pressure placed on these areas. Through the Farmland and Natural Areas Program (FNAP), Dakota County has been protecting natural areas for wildlife habitat and water quality improvements outside of the regional park system since 2004.

As a result of this Lessard-Sams Outdoor Heritage Council (LSOHC) grant, Dakota County protected 568 acres of high-quality wildlife habitat, exceeding the goal in our initial plan of 350 acres. The 568 protected acres encompasses:

- 1.5 miles of the Cannon River;
- 1.5 miles of Chub Creek;
- Over 0.75 miles of the Vermillion River;
- 1.0 mile along the Mississippi River; and
- 2.2 miles of shoreline along River Lake, a backwater lake of the Mississippi River.

Dakota County secured permanent conservation easements on all this property from six willing landowners with a separate natural resource management plan developed for each conservation easement. Below is a brief summary of each of these projects identified by the name of the landowner:

- Bakken - 44.2 acres, 7,725 feet of Cannon River frontage;
- Otte - 40.1 acres, 2,500 feet of Chub Creek;
- Jennings - 110.0 acres, 1,300 feet of Chub Creek;
- Ozmun - 30.7 acres, 3,960 feet of Chub Creek;
- Agricultural Society - 193.2 acres, 4,060 feet of the Vermillion River; and
- Macalester College - 149.6 acre, 1.0 mile of Mississippi R. frontage and 2.2 miles of frontage on River Lake, a Mississippi River backwater lake.

As with many conservation efforts, during the term of this grant there have been modifications to accommodate

evolving circumstances. To complete the above projects, Dakota County is only using \$709,083.61 of the \$1,000,000 of the LSOHC funds awarded to the County. The reason for this is that one of the projects that Dakota County had designated to be funded through this grant was to protect Marcott Lakes, a chain of high-quality inland lakes, but the project was not fully completed by June 30, 2012, the end of the grant period. While Dakota County had a binding purchase agreement with the landowner to buy a conservation easement on the property by this date, the transaction was not consummated until August 2012. In place of the Marcott Lakes project, the LSOHC funds will be used to providing funding for the Agricultural Society and Macalester College projects.

Dakota County buys conservation easements only from willing landowners. The County ensures that the landowners are comfortable with their decisions to encumber their land with conservation easements. Two of the landowners with whom Dakota County had been working in anticipation of securing conservation easements on their properties – the Wicklund and Malensek families – opted not to complete the easement process. As a consequence, these projects, which were referenced in previous reports, were not completed under the grant.

Planning

MN State-wide Conservation Plan Priorities:

- H1 Protect priority land habitats
- H2 Protect critical shoreland of streams and lakes
- H5 Restore land, wetlands and wetland-associated watersheds
- H7 Keep water on the landscape

Plans Addressed:

- Minnesota DNR Strategic Conservation Agenda
- Minnesota Sustainability Framework

LSOHC Statewide Priorities:

- Address conservation opportunities that will be lost if not immediately acted on
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

LSOHC Metro Urban Section Priorities:

- Protect, enhance, and restore remnant native prairie, Big Woods forests, and oak savanna with an emphasis on areas with high biological diversity
- Enhance and restore coldwater fisheries systems
- Protect, enhance, and restore riparian and littoral habitats on lakes to benefit game and nongame fish species

Relationship to Other Constitutional Funds:

- Environmental and Natural Resource Trust Fund

Dakota County has received ENRTF funds under the project entitled, Vermillion River Corridor Acquisition and Restoration in Dakota County.

Sustainability and Maintenance:

Each easement meets or exceeds the standards set by the Land Trust Alliance and includes a baseline report to document conditions at the time the property was encumbered with the easement. The County conducts monitoring to ensure compliance with the terms of the easements. All easements are included in a sophisticated GIS land management database. The County Attorney's Office is responsible for enforcing any significant easement violations.

For each project, Dakota County has completed a natural resource management plan with provisions to revise every five years. Landowners are responsible for any costs associated with complying with the terms of the easements and conducting management activities. Dakota County is currently working to establish a stewardship fund to provide an additional incentive for landowner management activities.

Outcomes

Programs in metropolitan urbanizing region:

- A network of natural land and riparian habitats will connect corridors for wildlife and species in greatest conservation need
- Core areas protected with highly biologically diverse wetlands and plant communities, including native prairie, Big Woods, and oak savanna
- Improved aquatic habitat indicators

Lessard-Sams Outdoor Heritage Council

Final Accomplishment Plan Report

Date: August 16, 2011

Program Title: Lake Rebecca Water Quality Improvement Project

Manager's Name: John M. Barten
Title: Director of Natural Resources Management
Organization: Three Rivers Park District
Address: 3000 Xenium Lane North
City: Plymouth
State: MN
Zip: 55441
Telephone: 763-694-7841
Email: jbarten@threeriversparkdistrict.org
Fax: 763-557-4943

Funds Recommended: \$450,000

Legislative Citation and Appropriation Language:

ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 5(e)

(e) Lake Rebecca Water Quality Improvement Project

\$450,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with the Three Rivers Park District to improve the water quality in Lake Rebecca in Lake Rebecca Park Reserve in Hennepin County. A description of the activities to enhance fish habitat in Lake Rebecca must be provided as part of the required accomplishment plan.

Outcomes

This project improved the water quality of Lake Rebecca in Lake Rebecca Park Reserve, and improved the fish habitat in the premier muskellunge brood stock lake in Minnesota. Water quality improvements were achieved through a combination of implementing manure management activities in the watershed to reduce phosphorus inflow to Lake Rebecca, control of the invasive species curly-leaf pondweed, and application of alum (aluminum sulfate) to reduce internal phosphorus loading. The in-lake phosphorus concentration, as of June 2011 was reduced to less than 40 ppb and the lake water clarity was improved to over three meters Secchi disk visibility. Visibility for game fish such as muskellunge, is significantly improved. Fewer than 70 acres of Curly-leaf pondweed were present in the lake in spring 2011 after three years of treatment. The habitat availability resulting from the decrease in the exotic curly-leaf pondweed population is being utilized by native aquatic macrophytes which are increasing in distribution and density.

Maintenance

There are no specific maintenance needs for the project outcomes. Long term management to maintain improved water quality levels are described in the Sustainability Section of this report.

Sustainability

As noted above, the 256-acre Lake Rebecca has experienced improved water clarity and replacement of invasive plants with native plant populations as a result of project implementation. Because the Park District owns the entire lake shoreline, no herbicide applications to control native plants along the lake shoreline will be done. Thus, native plant populations are expected to increase in the long term. In addition, the Park District will protect and enhance shoreline buffer areas along the lake shoreline, a practice shown to benefit native aquatic plant populations.

Three Rivers Park District works very closely with the local landowners, municipalities and watershed management organization to plan and implement water quality management programs. The Park District is continuing to work with adjacent landowners and the Pioneer Sarah Creek Watershed Management Commission to further reduce nutrient loading Lake Rebecca. In particular, efforts are underway to improve manure management on a parcel adjacent to the Regional Park. In addition, the Pioneer-Sarah Creek WMO has adopted a “non-degradation” policy to ensure long term protection of water resources as urban development increase in the lake watershed.

The curly-leaf pondweed (CLP) control component of this project will extend beyond the timeline of the available funding. Therefore, Three Rivers Park District initiated the control program in April 2009, treating 120 acres of this invasive plant. Post treatment plant surveys conducted in June, 2009 and April 2010 indicated that the initial treatment was successful in reducing CLP density. The lake area needing treatment in 2010 was significantly reduced from the 2009 treatment, and 75 acres were treated on April 28, 2010. A further reduction to 65 acres was experience in 2011. The Park District will continue to control Curly-leaf Pondweed in the lake beyond the timeframe of the grant project. 2012 expenditures for this task are estimated at \$15,000 with funding from the Park District Capital Improvement Program.

The Park District will also continue to monitor the in-lake quality and the quality of stormwater discharge to the lake. The monitoring is being completed as the first phase of a watershed wide TMDL study for the Pioneer Sarah Creek Watershed Commission. The Park District has an in-house certified laboratory and is able to collect and analyze water quality samples for this type of work. The Park District operating budget funds ongoing monitoring programs in the District.

Final Accomplishment Plan Report

Date: August 9, 2011

Program Title: **Fountain Lake Fish Barriers**

Manager's Name: **Brett Behnke**

Title: **Administrator**

Organization: **Shell Rock River Watershed District**

Address: **411 S. Broadway**

City: **Albert Lea**

State: **Minnesota**

Zip: **56007**

Telephone: **(507) 377-5785**

Email: **brett.behnke@co.freeborn.mn.us**

Fax: **(507) 377-4494**

Funds Recommended: \$ 655,000

Legislative Citation and Appropriation Language:

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA: Laws of Minnesota 2009, Chapter 172, Article I, Section 2, Subd. 5, F.

5(f) Fountain Lake Fish Barriers \$655,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with the Shell Rock River Watershed District to construct fish barriers at three locations on Fountain Lake. Land acquisition necessary for fish barrier construction is permitted. A list of proposed projects, describing the types and locations of barriers, must be provided as part of the required accomplishment plan. The commissioner of natural resources must agree to each proposed barrier.

Outcomes

As a result of the installation of the two fish barriers, one on Wedge Creek and one on White Lake, we have kept Common Carp from migrating from Fountain Lake into the shallow upstream basins. This has helped improve the water clarity and water quality in the upstream areas which are now excluded from Common Carp. Since these upstream areas are interconnected to Fountain Lake, water quality in Fountain Lake has also improved. Secchi disk readings on Fountain Lake were the best on record in 2010, averaging 2.7 feet of water clarity. Fountain Lake is now meeting the MN PCA water clarity standard of 2.3 feet.

The improved water clarity and water quality has increased the amount of aquatic vegetation in upstream Common Carp excluded lakes. Waterfowl and aquatic fur-bearers sightings have increased with the habitat improvements. Waterfowl species sighted during the fall migration included: Wood-duck, American Widgeon, Green-winged Teal, Blue-winged Teal,

Northern Shoveler, Gadwall, Mallard, Northern Pintail, Canvasback, Redhead, Ring-neck, Lesser Scaup, Common Merganser, Rudy Ducks, and Canada Geese.

Game fish species are now thriving in the Common Carp excluded lakes. Minnesota DNR fisheries staff began a new approach of stocking game fish in satellite lakes to function as nursery areas. Thru this approach it was found that Northern Pike grow extremely fast, reaching 15 inches in their first year of life, and have viable eggs. Now instead of these satellite lakes functioning as Common Carp nurseries, game fish have taken their place. Downstream lakes like Fountain and Albert Lea are seeing an increased Yellow Perch and Northern Pike population, which should only get better in the future

Maintenance

The Watershed District is a permanent municipality, funded through property taxes that will allow for continued maintenance and management of these projects. There is a yearly expense for Smith & Root's maintenance program, phone service and utilities will cost approximately \$5,000, for White Lake and Wedge Creek Fish Barriers. The District budgets yearly for the maintenance expenses.

Sustainability

The proposed projects are LONG-TERM. By controlling the fish habitat at the top of the watershed through complete eradication of the invasive species, these projects provide lasting improvements. The Watershed District is a permanent municipality, funded through property taxes that will allow for continued maintenance and management of these benefits.

The District is a permanent municipality, subject to annual independent audits, with a proven track record of successfully constructing and maintaining projects.

The District has a regular and permanent source of funding through local property taxes.

Lessard-Sams Outdoor Heritage Council

Laws of Minnesota 2009 Final Report

Date: February 02, 2015

Program or Project Title: Cold Water River and Stream Restoration, Protection, and Enhancement, Phase 1

Funds Recommended: \$2,050,000

Manager's Name: John Lenczewski

Title: Executive Director

Organization: Minnesota Council of Trout Unlimited

Address: P O Box 845

City: Chanhassen, MN 55317

Email: jlenczewski@comcast.net

Website: www.mntu.org

Legislative Citation: ML 2009, Ch. 172, Art. 1, Sec. 2, Subd. 5(c)

Appropriation Language: \$2,050,000 in fiscal year 2010 is to the commissioner of natural resources for an agreement with Trout Unlimited or successor to restore, enhance, and protect cold water river and stream habitats in Minnesota. A list of proposed acquisitions and a list of proposed projects, describing the types and locations of restorations and enhancements, must be provided as part of the required accomplishment plan. The commissioner of natural resources must agree to each proposed acquisition, restoration, and enhancement.

County Locations: Benton, Dakota, Fillmore, Goodhue, Hubbard, Olmsted, St. Louis, Wilkin, and Winona.

Regions in which work will take place:

- Northern Forest
- Forest / Prairie Transition
- Southeast Forest
- Prairie
- Metro / Urban

Activity types:

- Restore
- Enhance

Priority resources addressed by activity:

- Habitat

Abstract:

This program restored and enhanced in-stream and riparian fish and wildlife habitat in 12 watersheds across the state of Minnesota. The projects improved habitat for both game and non-game fish and wildlife species uniquely associated with cold water trout streams and provided expanded recreational opportunities for Minnesota anglers.

Design and scope of work:

As part of our ongoing program of trout and salmon habitat restoration and enhancement, the Minnesota Council of Trout Unlimited ("MNTU") identified the priority conservation projects listed below. MNTU restored or enhanced more acres and miles of stream habitat than originally targeted. We restored or enhanced 277 acres of in-stream and riparian fish and wildlife habitat in and along 21 miles of numerous Minnesota waters, including:

1. Hay Creek (Goodhue);

2. Kabekona Creek (Hubbard);
3. Lawndale Creek (Wilkin);
4. Little Rock Creek (Benton);
5. Middle Branch of Whitewater River (Olmsted);
6. Mill Creek (Fillmore);
7. Pickwick Creek (Winona);
8. Trout Run Creek (Fillmore);
9. Straight River (Hubbard);
10. Sucker River (St. Louis);
11. Vermillion River (Dakota);
12. Rush Creek (Winona).

Degraded cold water habitat is an important statewide conservation issue that requires immediate investment through habitat restoration and enhancement projects. The distinct natural resource characteristics of each ecologically distinct region of Minnesota, together with the variation in the type and magnitude of poor land uses practices in different watersheds, require that fish habitat restoration methods vary around the state. MNTU understands this and tailored projects accordingly. In the Lake Superior basin, this meant restoring in-stream cover logs; in Southeast Minnesota this meant restoring overhead bank cover, while drastically sloping soil back to remove thick sediment deposited from the uplands and restore streams' access to their floodplains; on the Straight River it meant placing whole trees in the overly wide channel to narrow and deepen it.

The projects undertaken by MNTU as part of this program were designed to accomplish a number of the following purposes: a) reduce stream bank erosion and associated sedimentation, b) reconnect streams to their floodplains to reduce negative impacts from severe flooding, c) increase natural reproduction of trout and other aquatic organisms, d) maintain or increase adult trout abundance, e) increase biodiversity for both in-stream and non-game species, f) be long lasting with minimal maintenance required, and g) improve angler access.

The results of the projects will be evaluated not only in measures of habitat restored and/or enhanced, but also through trout population assessments.

Which LSOHC state-wide priorities are addressed in this proposal:

- Address conservation opportunities that will be lost if not immediately acted on
- Address wildlife species of greatest conservation need, Minnesota County Biological Survey data, and rare, threatened and endangered species inventories in land and water decisions, as well as permanent solutions to aquatic invasive species
- Allow public access. This comes into play when all other things about the request are approximately equal
- Are able to leverage effort and/or other funds to supplement any OHF appropriation
- Are ongoing, successful, transparent and accountable programs addressing actions and targets of one or more of the ecological sections
- Ensures activities for "protecting, restoring and enhancing" are coordinated among agencies, non profits and others while doing this important work
- Produce multiple enduring conservation benefits
- Provide Minnesotans with greater public access to outdoor environments with hunting, fishing and other outdoor recreation opportunities
- Restore or enhance habitat on state-owned WMAs, AMAs, SNAs, and state forests
- Target unique Minnesota landscapes that have historical value to fish and wildlife
- Use a science-based strategic planning and evaluation model to guide protection, restoration and enhancement, similar to the United States Fish and Wildlife Service's Strategic Habitat Conservation model

Which LSOHC section priorities are addressed in this proposal:

Prairie:

- Restore or enhance habitat on public lands

Forest / Prairie Transition:

- Not Listed

Northern Forest:

- Protect shoreland and restore or enhance critical habitat on wild rice lakes, shallow lakes, cold water lakes, streams and rivers, and spawning areas

Metro / Urban:

- Enhance and restore coldwater fisheries systems

Southeast Forest:

- Protect, enhance, and restore habitat for fish, game, and nongame wildlife in rivers, cold-water streams, and associated upland habitat

Relationship to other funds:

- Environmental and Natural Resource Trust Fund

How will you sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

The habitat restoration and/or enhancement projects are designed for long-term ecological and hydraulic stability. Once they are completed we do not anticipate that there will be any significant maintenance required in order to sustain the habitat improvements for several decades. We anticipated that long-term monitoring of the integrity of the improvements and condition of vegetation will be done in conjunction with routine inspections and biological monitoring conducted by local DNR staff, MNTU members, or landowners as appropriate. This monitoring will not require separate OHF or other constitutional funding. Some subsequent cutting or treatment of invasive vegetation may be needed, and potential sources of funding and volunteer labor include MNTU, MNDNR AMA maintenance funding, and other grant funds and organizations.

Outcomes:

Programs in the northern forest region:

- Not Listed

How will they be measured and evaluated?

The ultimate measure is whether the number of larger adult trout increases in these two streams. This will be measured over time via fish population surveys conducted by the MNDNR.

Programs in forest-prairie transition region:

- Not Listed

How will they be measured and evaluated?

Whether the channel narrows and deepens over time to create deeper cover habitat for trout. DNR stream surveys will document this over time.

Programs in metropolitan urbanizing region:

- Not Listed

How will they be measured and evaluated?

The outcome of more trout will be measured over time via fish population surveys conducted by the MNDNR. The outcome of greater

angler use can be observed or quantified via a creel survey conducted by DNR.

Programs in southeast forest region:

- Not Listed

How will they be measured and evaluated?

The ultimate measure is whether the trout populations increase and/or the number of larger trout increases in these streams. This will be measured over time via fish population surveys which are periodically conducted by the MNDNR.

Programs in prairie region:

- Not Listed

How will they be measured and evaluated?

The outcome of an increased trout population will be measured over time via fish population surveys conducted by the MNDNR.
