Summary of 2013 Data

This report summarizes sentencing practices for felony sex offenses sentenced in 2013. Information on sentencing practices from 1988 to 2013 is provided in the tables in the back of the report. This report also contains information on the use of special statutory sentencing provisions.

There were 503 offenders sentenced for Criminal Sexual Conduct (CSC) offenses in 2013, which is a 7.5 percent decrease from the 544 offenders sentenced in 2012. The number of offenders sentenced for criminal sexual conduct offenses has fluctuated since 1981, peaking at 880 offenders sentenced in 1994 (43% greater than the number sentenced in 2013). The 2013 number is the lowest number of offenders sentenced for CSC since 1983. Almost all of the growth since 1981 has been in the CSC child provisions (Intra-Familial Sex Abuse (IFSA) and provisions specifying the age of the victim).

Ninety-four percent of offenders sentenced for CSC offenses received sentences that included incarceration in a state prison (38%) or local jail (56%). The 38 percent imprisonment rate in 2013 is lower than the 41 percent rate observed in 2012. In CSC cases where the Guidelines recommended imprisonment, 72 percent of offenders received an executed prison sentence. Ninety percent of offenders with a prior sex offense conviction received an executed prison sentence. The mitigated dispositional departure rate for offenders with a presumptive prison sentence was 28 percent, an increase from the 2012 rate of 25 percent. For executed prison sentences, aggravated durational departures occurred at a slightly higher rate (6%) than in 2012 (5%), while mitigated durational departures decreased from 19 percent in 2012 to 17 percent in 2013.

For first- and second-degree offenses, the offender was more likely to be a family member; for third- and fourth-degree offenses, the offender was more likely to be an acquaintance. Overall, only a small percentage (7%) of cases involved strangers.

The average pronounced sentence across all degrees increased from 128 months in 2012 to 133 months in 2013, which was the highest average duration ever observed. The average pronounced sentence for first-degree (the most serious offense category) was 185 months. Average pronounced prison sentences have increased dramatically since 1989, when recommended sentence durations under the Guidelines were doubled. The average pronounced prison sentence was 54 months in 1988. Before 2006, when the Sex Offender Grid went into effect, the previous highest average sentence pronounced was 116 months in 2003. While average prison sentences have increased dramatically since 1988, average pronounced local jail time has remained relatively consistent.

First-degree CSC offenses committed on or after August 1, 2000, are subject to a 144-month presumptive sentence enacted by the Legislature. In 2013, 96 percent of all first-degree CSC offenders sentenced (not including attempts) were subject to this presumptive sentence, an increase from the 91 percent who were eligible in 2012. No offenders sentenced in 2013 received life sentences. Two offenders received sentences that were twice the length of their presumptive sentences or more. Eight other offenders received total sentences of 360 months (30 years) or more. The Sex Offender Grid is effective for offenses occurring on or after August 1, 2006. In 2013, 476 (95%) of the 503 sex offenders were eligible for sentencing under the new grid. The Sex Offender Grid includes longer presumptive sentences for offenders with prior records and also gives greater weight to prior sex offenses.

Sex Offense Statutes & Sentencing Policy

Sex Offense Statutes: General Structure

Under Minnesota law, sex offenses are categorized into five degrees of criminal sexual conduct (CSC), with first-degree being the most serious. The classification of offenses into degrees is based on a combination of factors:

- Whether the offense involved sexual penetration or contact;
- Age of the victim and offender;
- Relationship of the offender to the victim (e.g., position of authority, significant relationship, psychotherapist, etc.);
- Degree of injury or threat of injury;
- Weapon involvement; and
- Force or coercion was involved.

(See Table 17 for the number of cases displayed by statutory provision.)

Most of the provisions of first-degree criminal sexual conduct involve penetration and personal injury, fear of great bodily harm, or the use of a dangerous weapon. First-degree criminal sexual conduct also includes offenses involving young children, regardless of whether any injury, force or weapons were involved. Second-degree offenses are similar, but involve sexual contact rather than penetration. Some non-penetration offenses involving more serious forms of sexual contact with victims who are under the age of 13¹ are first-degree offenses.

Third-degree offenses involve penetration and focus on children who are slightly older, or cases in which there was force or coercion. The use of a weapon or the threat of great bodily harm is not a necessary element of the offense. Third-degree offenses also include cases involving psychotherapists, health professionals, clergy and correctional employees. Fourth-degree offenses are similar, except that they involve sexual contact rather than penetration. Fifth-degree offenses involve repeat violations of gross misdemeanor indecent exposure offenses involving minors.

Relationship-Based Classifications

Sentencing practices differ based on the relationship between the victim and the offender. To assist in analyzing and interpreting information on sentencing patterns, sex offense cases examined for this report were assigned to the following categories, based on the statute of conviction:

- IFSA (Intra-Familial Sex Abuse): Conviction under a subdivision that specifies that the offender had a significant relationship to the victim.
- Other Child: Conviction under a subdivision that specifies that the victim is a minor, but does not specify that there was a significant relationship. Subdivisions that specify that the

¹ "Sexual contact with a person under 13" has a far more limited definition than simple "sexual contact." The touching must be bare, and contact between very few pairs of bodily parts qualifies. Minn. Stat. § [609.341](#), subd. 11(c).

offender was in a position of authority over the victim are included here because, in addition to parents, these offenses include persons acting in a position of authority.

- **Force/Other:** Force or a weapon was involved, or the offense involved abuse by a psychotherapist, health care professional, clergy member or members of other specified occupations. The provisions do not specify the age of the victim or the relationship of the offender to the victim. Some of the victims of these offenses are also children.

It is important to note that an offense may fit into more than one category. For example, many offenses categorized as “Other Child” or “Force/Other” involved family members (28% and 21%, respectively). Likewise, a substantial number of “Force/Other” cases involved victims under the age of 18 (28%). Figure 3 provides a complete breakdown of sex offenders sentenced since 1993 by the relationship classification.

Sentencing Guidelines for Sex Offenders

In 2006, the Commission adopted a separate Sex Offender Grid for new offenses. All first-degree completed offenses are ranked at Severity Level A and have presumptive sentences that range from 144 months² to 360 months. The Sex Offender Grid does not distinguish between first-degree contact³ and penetration.

Second- and third-degree offenses involving force are ranked at Severity Levels B and Severity Level C. The second-degree force offenses have presumptive sentences that range from 90 months⁴ to 300 months. The third-degree force offenses have presumptive sentences that range from 48 months to 180 months.

Second- and third-degree offenses not involving force, and fourth-degree offenses, are ranked at severity levels for which some offenders are recommended probation based on their Criminal History Score. Recommendations for prison begin at a Criminal History Score of 2 or 3, depending on the offense (See Sex Offender Grid, p. 48). Maximum recommended sentences range from 84 months to 140 months.

With the implementation of the Sex Offender Grid, longer sentences are recommended for offenders with a Criminal History Score of 1 or more. In addition, the Guidelines applicable to CSC offenses compute criminal history differently for sex offenses, increases the weights assigned to some prior sex offenses, and assigns two custody status points to repeat sex offenders who commit a new sex offense while on probation or supervised release for a prior sex offense.

Life Sentences for Certain Sex Offenders

Beginning in 2005, the Legislature required life sentences for offenders whose criminal behavior

² The legislatively presumed minimum sentence for first-degree CSC is 144 months. Minn. Stat. § [609.342](#), subd. 2(b); [2000 Minn. Laws Chap. 311](#), Art. 4, § 2.

³ “Sexual contact with a person under 13.” For discussion, see note 1.

⁴ The legislatively presumed minimum sentence for second-degree CSC force offenses is 90 months. Minn. Stat. § [609.343](#), subd. 2(b); [2002 Minn. Laws Chap. 381](#), § 2.

was so egregious that public safety demands incarceration for much, if not all, of their lives. See [Minn. Stat. § 609.3455](#), subds. 2, 3, & 4. Such offenses are excluded from the Sentencing Guidelines, because by law the sentence is mandatory life imprisonment. In 2013, no offenders were sentenced to life in prison under Minn. Stat. § 609.3455.

Applicable Grid

Section 3.G. of the Guidelines provides that modifications will be applied to offenders with a date of offense on or after the specified modification effective date. Therefore, the Sex Offender Grid enacted in 2006 is applicable to offenders with a date of offense on or after August 1, 2006. Of the 503 offenders sentenced for criminal sexual conduct in 2013, 476 (95%) were eligible for sentencing on the Sex Offender Grid. Table 1 provides a summary of cases by degree and applicable Grid. Ninety-one percent of first-degree offenders sentenced in 2013 were eligible for sentencing on the Sex Offender Grid.

Table 1. Distribution of Cases by Degree, Severity Level and Applicable Grid

Degree	Statutory Provisions	Cases Sentenced on Standard Grid		Cases Sentenced on Sex Offender Grid		Total Number of Cases Sentenced
		Severity Level	Number Cases Sentenced	Severity Level	Number Cases Sentenced	
First	Penetration: 609.342, all clauses	9	6 (8%)	A	71 (92%)	77
	Sexual Contact: 609.342, victims under 13 ⁵		4 (11%)		34 (89%)	38
Second	Contact with Force: 609.343 subd.1 c,d,e,f,h	8	6 (19%)	B	26 (81%)	32
	Contact with Minors: 609.343 subd.1 a,b,g	6	7 (7%)	D	87 (93%)	94
Third	Penetration: Force or Prohibited Occupation 609.344 subd.1 c, d, g-n	8	0	C	57 (100%)	57
	Penetration with Minors: 609.344 subd, 1 b,e,f	5	2 (2%)	D	117 (98%)	119
Fourth	Contact: Force or Prohibited Occupation 609.344 subd. 1 c, d, g-n	6	1 (2%)	E	42 (98%)	43
	Contact with Minors: 609.344 subd, 1 b,e,f	5	1 (2%)	F	41 (98%)	42
Fifth	Repeat gross misdemeanor offenses involving minors	4	0	G	1(100%)	1
Total			27 (5%)		476 (95%)	503

⁵ “Sexual contact with a victim under 13” was determined based on the Minnesota Offense Codes (MOCs), which accompany the charge on the complaint; see footnote 1 and “Victim Characteristics” discussion on page 10.

Presumptive Sentences over Time

Figure 1 is meant to illustrate the changes to the presumptive sentences over time at Criminal History Score 0. This includes the presumptive sentences established by the Guidelines, Sex Offender Grid and changes in legislation that mandated presumptive sentences for sex offenders. Figure 2 shows the same changes over time at Criminal History Score 6.

Figure 1. Minimum Presumptive Sentences by Degree over Time At Criminal History Score 0

Figure 2. Maximum Presumptive Sentences by Degree over Time At Criminal History Score 6

* Presumptive sentence = stayed (probationary) sentence. "12" = 12 months and 1 day.

Case Volume & Distribution⁶

In 2013, 503 offenders were sentenced for CSC offenses, a decrease of 7.5 percent from 544 offenders sentenced in 2012. As Figure 3 illustrates, the number of offenders sentenced for CSC offenses peaked in 1994 at 880 offenders. Since 2003, the number of offenders sentenced for criminal sexual conduct offenses had consistently ranged from 580 to 600. The 2013 figure was the lowest number of offenders sentenced since 1983. See Table 11 for information on the number of offenders sentenced for sex offenses since 1988.

Figure 3. Volume of Cases and Type of Offense: 1993-2013

⁶ Minnesota Sentencing Guidelines Commission (MSGC) monitoring data are offender-based, meaning cases represent offenders rather than individual charges. Offenders sentenced within the same county in a one-month period are generally counted only once, based on their most serious offense.

Type of Offense

The distribution of cases between the relationship categories has remained fairly stable since 2003. In 2013, 134 (27%) of the cases sentenced were in the “Force/Other” category, which is slightly higher than the 23 to 25 percent that were observed from 2003 to 2011. There were 86 (17%) “IFSA” cases and 283 (56%) “Other Child” offenses. In the “Force/Other” category, 126 of the 134 cases were offenses involving force; of the remaining eight cases, four involved massage therapists, three involved a correctional employees, and one involved a clergy member.

The distribution of cases among the five statutory degrees has also remained fairly consistent from year to year over the last ten years (Table 12). The percentage of first-degree cases has consistently ranged between 21 and 26 percent since 2004, except for 2010 when it dipped to a low of 18 percent. In 2013 the distribution of cases was as follows; 23 percent of the cases sentenced were first-degree offenses, 25 percent were second-degree offenses, 35 percent were third-degree offenses, and 17 percent were fourth-degree offenses. There was one felony fifth-degree offense sentenced in 2013.

Victim Characteristics

The following overview of victim characteristics for the criminal sexual conduct offenses sentenced in 2013 was derived primarily from the Minnesota Offense Codes (MOCs), which accompany the charge on the complaint. In cases for which the MOC information was unclear or missing, the information was, where possible, obtained from the statute of conviction. In 81 percent of the cases sentenced, the victims were minors: 34 percent involved victims under the age of 13; 46 percent involved victims who were between the ages of 13 and 17. Nineteen percent involved victims who were adults. Ninety-one percent of the victims were female, and nine percent were male. (See Table 15 for information on victim age.)

Table 16 displays the relationship between the victim and the offender by the offense degree and clause of conviction (clause specifying a child victim or clause specifying force or other). For first- and second-degree offenses, the offender was more likely to be a family member (52% and 53%, respectively); for third- and fourth-degree offenses, the offender was more likely to be an acquaintance (69% and 60%, respectively). As stated above, only a small percentage of cases (7%) involved strangers.

True Prior Record

Most offenders sentenced for felony-level sex offenses do not have “true prior” sex offenses in their criminal record. A “true prior” is a prior offense with a conviction date before the date of the current offense. Other priors may include multiple offenses charged in a single complaint and sentenced in successive order. Prior offenses that contribute to an offender’s criminal history score are listed on an offender’s worksheet. In 2013, six percent of sex offenders had a true prior felony sex offense listed on their sentencing worksheet. This figure varied slightly by the type of sex offense. (See Table 3 below.)

Demographic Characteristics

Sex offenders are more likely to be male than the overall offender population. Ninety-eight percent of offenders sentenced for CSC offenses were male. In comparison, 84 percent of felony offenders overall were male. A higher percentage of sex offenders are sentenced in Greater Minnesota compared to all felony offenders (Figure 4). Sex offenders are also slightly more likely to be white or Hispanic than the overall offender population and less likely to be black (Figure 5). The average age at time of offense was 32 years old for both sex offenders and the overall felony population. However, five percent of the offenders sentenced for criminal sexual conduct offenses were juveniles compared to one percent of the offenders sentenced for all felonies. Thirty percent of the offenders sentenced for criminal sexual conduct offenses were 21 and under compared to eighteen percent of the offenders sentenced for all felonies (Table 2).

**Figure 4. Distribution of Offenders by Region:
CSC Offenders Compared to All Offenders**

**Table 2. Age Range of Offenders:
CSC Offenders Compared to All Offenders**

Age Range	All Felony Offenders		CSC offenders	
Under 18	129	1%	25	5%
18-21	2,653	17%	123	25%
22-25	2,695	18%	62	12%
26-30	2,991	20%	56	11%
31-40	3,611	24%	112	22%
41-50	2,240	15%	65	13%
51 and over	999	7%	60	12%
Average Age	31.5		31.9	

**Figure 5. Distribution of Offenders by Race:
CSC Offenders Compared to All Offenders**

Sentencing Practices

The recommended sentence under the Guidelines varies by the Severity Level of the conviction offense and the offender's Criminal History Score. These differences make it difficult to interpret overall sentencing information for sex offenders. Therefore, in addition to reporting overall statistics, this section of the report presents data for presumptive commitments (cases for which the Guidelines recommended prison) and for presumptive stays (cases for which the Guidelines recommended probation) separately. Information on sentence durations is presented by Severity Level and type of sex offense.

Incarceration Rates

In 2013, the total incarceration rate for sex offenders was 94 percent; slightly below the 2012 rate of 95 percent. As seen in Figure 6, 38 percent of offenders received a prison sentence and 56 percent received local confinement. Except for 2010, the total incarceration rate has consistently exceeded 90 percent for the past 24 years. At 38 percent, the 2013 imprisonment rate, while below the 41 percent rate observed in 2012, was in line with what has been seen in recent years. (See Tables 11 and 12 for historical information on incarceration.)

The Guidelines recommended a presumptive sentence of imprisonment for 51 percent of the CSC offenses sentenced. Of these, 72 percent received a prison sentence. The imprisonment rate for offenders who had a true prior sex offense was 90 percent. Imprisonment rates for offenders with true priors were higher for those sentenced for the "IFSA" and "Force" offenses (100%) than for those sentenced for the "Other Child" offenses (84%) (Table 3).

**Table 3. Offenders with True Prior Sex Offenses:
Number of Cases and Imprisonment Rates by Type of CSC Offense**

Type of Offense	Overall		Offenders with True Prior CSC Offense(s)		
	Number of offenders	Imprisonment Rate	Number of offenders	Imprisonment Rate	Imprisonment Rate
IFSA	86	40 (47%)	3	4%	3 (100%)
Other Child	283	77 (27%)	19	7%	16 (84%)
Force	126	71 (56%)	9	7%	9 (100%)
Other	8	2 (25%)	0	---	---
Total	503	190 (38%)	31	6%	28 (90%)

Figure 6. Incarceration Rates

Sentence Durations: Prison Sentences

The average pronounced duration is presented for offenders who received executed prison sentences. In 2013, the average pronounced prison sentence was 133 months (Figure 7; Table 11), which is the longest average pronounced prison sentence ever observed. Average pronounced durations have been impacted by the implementation of the Sex Offender Grid. In 2013, a larger percentage of the offenders sentenced were eligible for sentencing based on the Sex Offender Grid (95%) than in previous.

Figure 7. Average Pronounced Prison Sentences by Degree over Time Executed Sentences by Offense

The average pronounced sentence in 2013 was 133 months (Figure 8). Offenders convicted of first-degree offenses received significantly longer sentences than those received by offenders convicted of lesser severity level offenses. The average pronounced sentence for those offenders was 185 months, an increase from the 2012 average of 181 months. For the second-degree force offenses, the average pronounced duration was 110 months, an increase from the 2012 average (108 months). Average sentence lengths also increased in 2013 from those observed in 2012 for the second-degree minor offenses (from 81 months to 101 months), the third-degree force offenses (from 70 months to 79 months), third-degree minor offenses (from 56 months to 61 months), and fourth-degree minor offenses (from 42 months to 65 months). Average sentence lengths decreased in 2013 from those observed in 2012 for the fourth-degree force offenses (from 58 months to 57 months). (See Tables 11 and 12 for historical information on past sentence durations.)

**Figure 8. Average Pronounced Prison Sentence:
Executed Sentences by Offense and Grid***

The average sentence duration is affected by both departures from the Guidelines and the use of consecutive sentences. When consecutive sentences are given for multiple current offenses, the total pronounced sentence to be served increases. For first-degree offenses, when there was no durational departures, the average pronounced sentence was 191 months for cases that did not involve consecutive sentences and 286 months for cases with consecutive sentences.

Longer than Typical Prison Sentences

There are several statutes and Guideline provisions that permit the court to impose sentences that are significantly longer than the presumptive sentence when the circumstances of the case so warrant. The Guidelines also establish presumptive sentences of 30 years (the statutory maximum) for first-degree offenders with Criminal History Scores of 6 or more. This section describes the longer prison sentences pronounced in 2012. This section also describes the life sentences pronounced since that provision was enacted.

Use of Life Sentences over Time

As mentioned above (p. 6), in August 2005, the Legislature established life sentences for certain offenders under [Minn. Stat. § 609.3455](#). For some of these provisions, the sentence mandated is life without the possibility of release. For other provisions, the court must specify the minimum time to be served before the offender can be considered for release. Table 4 displays information on sex offenders who have received life sentences since 2006. In 2013, no offenders received life sentences.

Table 4. Pronounced Life Sentences: Type of Offense and Presumptive Sentence

Year	Offense	Severity	Criminal History	# True Prior Sex Offenses	Grid Duration (months)	Pronounced Minimum to Serve (months)	Life Sentencing Provision
2006	3 rd Degree- Force or Coercion	8	2	1	68	136	Unknown
2007	1 st Degree - Fear Great Bodily Harm	9	0	0	144	144	Unknown

2012	1 st Degree- Force & Injury	A	0	0	144	144	609.3455 subd.3(a)
2012	3 rd Degree- Force or Coercion	C	7	2	180	180	609.3455 subd.4(a)1

2013 Sentences with Double the Presumptive Sentence or More

In 2013, two offenders received prison sentences that were double the length of their presumptive sentences or more. The presumptive sentences, pronounced sentences, Criminal History Score and sentence type for these cases are listed in Table 5.

One was a first-degree offense and involved an aggravated durational departure. One was a second-degree offense and involved a consecutive sentence without departure. Neither cited the “engrained offender” provision ([Minn. Stat. § 609.3455](#), subd. 3a) as a reason for departure.

A “true prior” sex offense is indicated if the offender was sentenced for a criminal sexual conduct offense before they committed the current offense.

Table 5. Sentences of Double the Presumptive Sentence or More

Offense	Severity	History	Number True Prior Sex Offenses	Grid Duration	Total Sentence	Consecutive Sentence?	Aggravated Duration
1 st Degree - Victim Under 13	A	2	0	168	360	Yes	No
2 nd Degree - Victim Under 13	D	3	0	70	196	No	Yes

2013 Sentences with Durations of 30 Years or More

Eight offenders received prison sentences of 360 months (30 years) or more that were not twice their presumptive sentences. All were first-degree offenders who had high Criminal History Scores. Information about these offenders is displayed in Table 6. Seven of the eight offenders received sentences of 360 months, for five cases, this was the presumptive sentence, for two it was the upper end of the range. One case involved consecutive sentencing and received a sentence of 432 months. None of these sentences involved an aggravated durational departure. A true prior sex offense is indicated if the offender was sentenced for a criminal sexual conduct offense before committing the current offense. Three of these offenders had true prior sex offenses. Two of these offenders were sentenced for multiple current sex offenses.

Table 6. Sentences with Durations of 30 Years or More

Offense	History	# True Prior Sex Offenses	Multiple Current CSC	Grid Duration	Total Sentence	Consecutive Sentence?	Aggravated Duration
1 st Degree - Victim Under 13	6	1	Yes	360	360	No	No
1 st Degree - Under 16-Sig. Relation	5	1	No	306	360	No	No
1 st Degree-Fear Great Bodily Harm	6	1	No	360	360	No	No
1 st Degree-Fear Great Bodily Harm	5	0	No	306	360	No	No

Offense	History	# True Prior Sex Offenses	Multiple Current CSC	Grid Duration	Total Sentence	Consecutive Sentence?	Aggravated Duration
1 st Degree - Dangerous Weapon	6	0	Yes	360	432	Yes	No

Figure 9 combines the information described in tables 5 and 6 to illustrate some of the longest sentences pronounced in 2013. There were 10 offenders who either received double the presumptive sentence or more; or a sentence of 360 months (30 years) or more. These sentences were achieved either through the presumptive sentence; or Guidelines policies that permitted aggravated durational departures or permissive consecutive sentences.

Figure 9. Significantly Longer than Presumptive Prison Sentence: Double the Presumptive or more and 360 Months or more

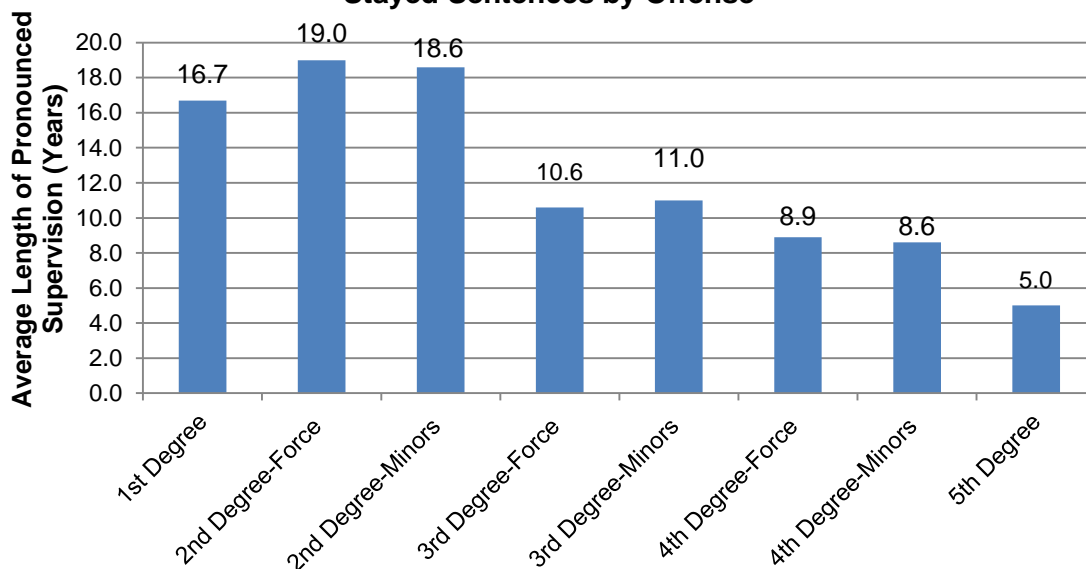

*** 7 offenders total; 2 received the top of the cell range to get 360 months (30 years).

Sentence Durations: Probation Sentences

Sixty-two percent of the CSC offenders sentenced in 2013 received a probation sentence. Of the offenders who were placed on probation, 77 percent received probation because it was the presumptive sentence and 23 percent received probation as a mitigated dispositional departure. The average pronounced period of probation for sex offenders was approximately 13 years (Figure 10). Unlike in previous years, first-degree offenders received shorter periods of probation than second-degree offenders.

Figure 10. Average Pronounced Period of Supervision (Years): Stayed Sentences by Offense

Ninety percent of offenders who did not receive an executed prison sentence received local confinement time. The average pronounced local confinement for sex offenders was 180 days, almost identical to the 181 days seen in 2012 (Table 11). The pronounced local confinement time was significantly longer for offenders convicted of offenses for which the Guidelines recommended presumptive commitment to prison (276 days) than for offenders convicted of offenses for which the Guidelines recommended a presumptive stayed sentence (151 days).

Departures from the Guidelines

The Guidelines establish a presumptive sentence for felony offenses based on the Severity Level of the conviction offense and the offender's Criminal History Score. The presumptive sentence is based on the typical case, however, the court may depart from the Guidelines when there are substantial and compelling circumstances. A "departure" is a pronounced sentence other than that recommended in the appropriate cell of the applicable Grid. There are two types of departures – dispositional and durational – as further explained below. Since the presumptive sentence is based on "the typical case," the appropriate use of departures by the courts when substantial and compelling circumstances exist can actually enhance proportionality by varying the sanction in an atypical case.

While the court ultimately makes the sentencing decision, other criminal justice professionals and victims participate in the decision-making process. Probation officers make recommendations to the courts regarding whether a departure from the presumptive sentence is appropriate, and prosecutors and defense attorneys arrive at agreements regarding acceptable sentences for which an appeal will not be pursued. Victims are provided an opportunity to comment regarding the appropriate sentence as well. Therefore, these departure statistics should be reviewed with an understanding that, when the court pronounces a particular sentence, there is commonly agreement or acceptance among the other actors that the sentence is appropriate. Only a small percent of cases (1% to 2%) result in an appeal of the sentence pronounced by the court.

Dispositional Departures

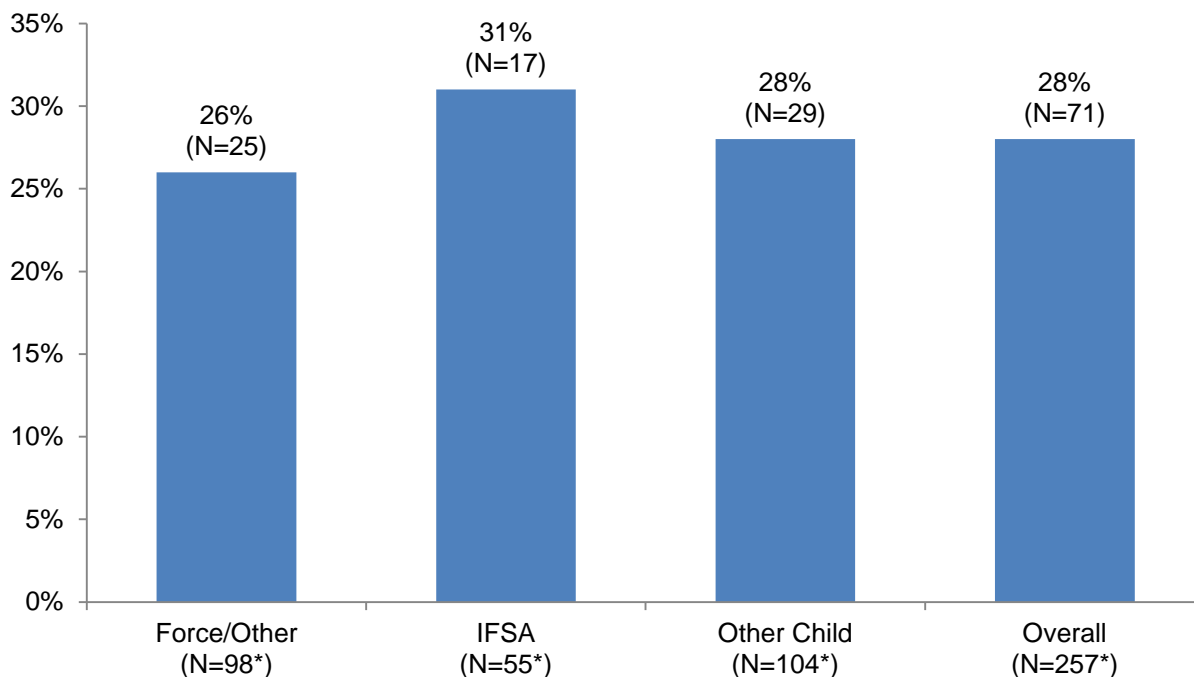

A "dispositional departure" occurs when the court orders a disposition other than that recommended in the Guidelines. There are two types of dispositional departures: aggravated dispositional departures and mitigated dispositional departures. An aggravated dispositional departure occurs when the Guidelines recommend a stayed sentence but the court pronounces a prison sentence. A mitigated dispositional departure occurs when the Guidelines recommend a prison sentence but the court pronounces a stayed sentence.

Mitigated Dispositions

Figure 11 shows mitigated dispositional departure rates for cases in which the Guidelines recommend prison ("presumptive commitments") by type of sex offense. The overall mitigated dispositional departure rate was 28 percent, an increase from the rate of 25 percent in 2012 (Table 13). Previously, rates tended to vary by offense type, with "IFSA" cases historically showing the highest rate of departure. Throughout the 1990s, the mitigated dispositional departure rate usually exceeded 33 percent, once reaching 40 percent. Since 2000, the departure rate has usually been below 30 percent. The departure rate in 2013 was slightly higher for the "IFSA" cases (31%) and slightly lower for the "Force" cases (26%) (Figure 11).

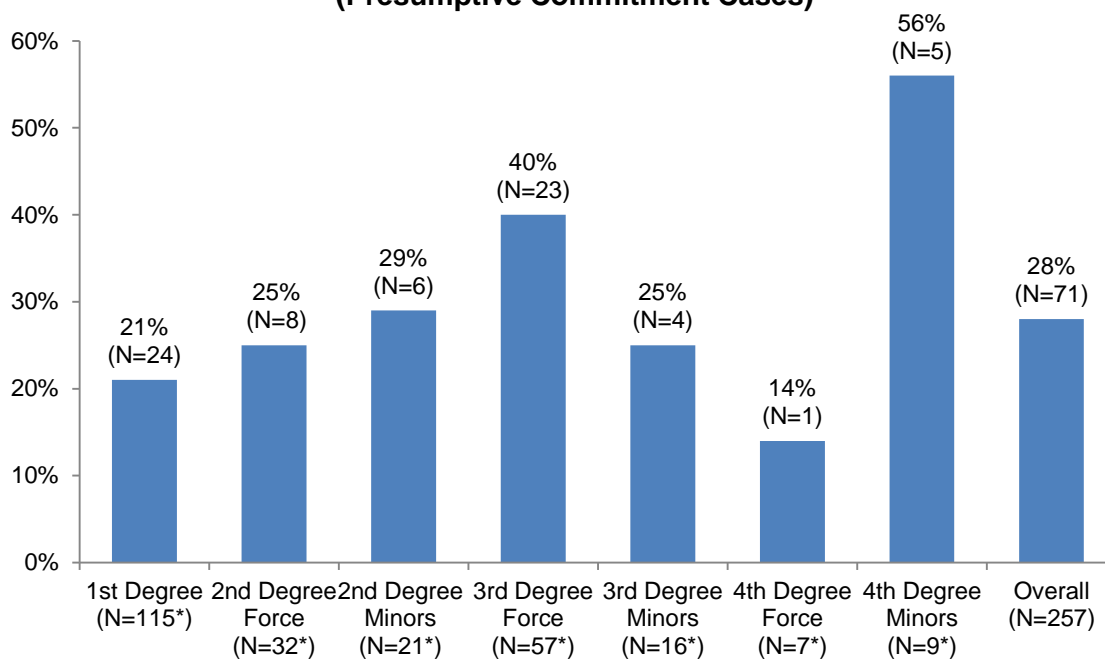

Figure 12 shows mitigated dispositional departure rates by degree. The rates were lower for the first-degree offenses and the second-degree force offenses than for the other offenses.

Figure 11. Mitigated Dispositional Departure Rates by Type of Offense (Presumptive Commitment Cases Only)

* Number of Presumptive Commitment cases.

Figure 12. Mitigated Dispositional Departure Rates: By Degree (Presumptive Commitment Cases)

* Number of Presumptive Commitment cases.

The most common reasons cited for mitigated dispositional departures typically involves placement of the offender in sex offender treatment programs, placement in other types of treatment (e.g., chemical dependency), recommendations by court services, placement of the offender on long-term probation supervision to ensure compliance with conditions, amenability to probation and remorse or acceptance of responsibility on the part of the offender. For most years, the court indicates that the victim or victim's family agreed with the departure in about 15 percent of cases; in 2013, it was nine percent. In six percent of the mitigated dispositions, the court indicated the departure was made to spare the victim from testifying (Table 7). In 75 percent of the mitigated dispositions, the court indicated that there was either a plea agreement for the departure or that the prosecutor recommended or did not object to the departure. The court reported that the prosecutor objected to the departure in about six percent of the mitigated dispositions. It should be noted that no plea information was provided by the courts in about 20 percent of the mitigated dispositions.

**Table 7. Mitigated Dispositional Departures:
Most Frequently Cited Departure Reasons⁷**

Departure Reason	Percent of Departures with Reason Cited
Amenable to Probation	61%
Amenable to Treatment	55%
Agreed by Victim/Victim's Family	9%
Prevent Trauma to Victim from Testifying	6%
Recommended by Court Services	16%
Ensure Compliance with Probation or Allow Longer Supervision	17%
Shows Remorse/Accepts Responsibility	48%
Prosecutor Objects	6%
Prosecutor does not Object	24%
Recommended by Prosecutor	23%
Plea Negotiation	63%

Aggravated Dispositions

Four of the 246 offenders recommended probation received a prison sentence, an aggravated departure rate of about two percent. In three (75%) of these cases, the offender either agreed to the departure or requested a prison sentence, usually because the offender was in prison or going to prison for another offense.

⁷ The most common reasons cited for dispositional departures, as submitted by the court and coded by MSGC staff. Up to four departure reasons and three plea agreement reasons are coded. There were 71 mitigated dispositional departures.

Durational Departures

A “durational departure” occurs when the court orders a sentence with a duration other than the presumptive fixed duration or range in the appropriate cell on the applicable Grid. There are two types of durational departures: aggravated durational departures and mitigated durational departures. An aggravated durational departure occurs when the court pronounces a duration that is more than 20 percent higher than the fixed duration displayed in the appropriate cell on the applicable Grid. A mitigated durational departure occurs when the court pronounces a sentence that is more than 15 percent lower than the fixed duration displayed in the appropriate cell on the applicable Grid. Durational departure rates are presented by offense for executed sentences only (Figure 13).

Durational departure rates are influenced by changes in presumptive sentences. Prior to 2006, the presumptive sentences for sex offenses were found on the Standard Grid. Effective August 1, 2005, the ranges on the Standard Grid were increased to allow the court to pronounce a sentence without departure that is up to 20 percent greater than, or 15 percent less than, the presumptive number of months on the Standard Grid. For offenses committed after August 1, 2006, presumptive sentences are found on the Sex Offender Grid, which has longer presumptive sentences for repeat offenders and offenders with prior criminal history.

Mitigated Durations

Seventeen percent (33) of the 190 offenders who received executed prison sentences were given shorter sentences than recommended, a decrease from 19 percent in 2012 (Table 13). First-degree offenders had the highest mitigated durational departure rate at 23 percent. The most frequently cited reasons for mitigated durational departures were: to prevent trauma to the victim from testifying (46%), and because the offender showed remorse or accepted responsibility (42%) (Table 8). In six cases (18%), the court indicated that the victim or victim’s family agreed with the departure. In 76 percent of these cases, the court indicated either that there was a plea agreement for a mitigated duration or that the prosecutor recommended or did not object to the departure. There were two cases (6%) in which the court indicated that the prosecutor objected to the mitigated durational departure. It should be noted that no plea information was provided for 18 percent of cases receiving mitigated departures.

**Table 8. Mitigated Durational Departures:
Most Frequently Cited Departure Reasons⁸**

Departure Reason	Percent of Departures with Reason Cited
Recommended by Victim/Victim’s Family	18%
Prevent Trauma to Victim from Testifying	46%
Shows Remorse/Accepts Responsibility	42%
Prosecutor Objects	6%
Prosecutor does not Object	15%
Recommended by Prosecutor	27%
Plea Negotiation	76%

⁸ The most common reasons for mitigated durational departures, as submitted by judges and coded by MSGC staff. Up to 4 departure reasons and 3 plea agreement reasons are coded. There were 33 mitigated durational departures.

Aggravated Durations

Six percent (12) of offenders who received executed prison sentences were given longer sentences than recommended, similar to the five percent rate observed in 2012, 2011 and 2010 (Table 14). The three percent rate observed in 2009 was the lowest aggravated durational departure rate ever observed for criminal sexual conduct offenses. Rates in the last four years have been lower than those observed in 2007 and 2008 (8%) and 2006 and 2005 (9% and 16%, respectively). This rate has declined somewhat since the 1990s, when rates as high as 27 percent were seen. A possible reason for some of the decline in the aggravated durational departure rate is that over time, more of the offenders sentenced for first-degree offenses and second-degree force offenses are eligible for the statutorily-set presumptive sentences. Other possible explanations for the decrease in aggravated durational departures include the implementation of the Sex Offender Grid and the impact of the U.S. Supreme Court ruling in *Blakely v. Washington*, 542 U.S. 296 (2004), holding that a defendant’s Sixth Amendment right to a jury trial was violated when the sentence imposed was below the stated statutory maximum sentence.

The most frequently reason cited for the upward durational departures (other than plea negotiation) was that the crime was committed in a zone of privacy (4 of the 12 cases). In 67 percent of these cases, the court indicated either that there was a plea agreement for a mitigated duration or that the prosecutor recommended or did not object to the departure. The court indicated that there was a plea agreement for an aggravated duration in four of the upward durational departures and that the defendant waived jury determination of aggravating factors in five of the 12 cases (Table 9). No information on the position of the prosecutor was cited in four of the aggravated durations. (For more detailed information on durational and dispositional departures over time, see Tables 13 and 14.)

Table 9. Aggravated Durational Departures: Most Frequently Cited Departure Reasons⁹

Departure Reason	Percent of Departures with Reason Cited
Victim Vulnerability	8%
Particular Cruelty	8%
Previous Victim Injury or Previous CSC Offense	8%
Position of Authority	8%
Multiple Victims or Multiple incidents per victim	8%
Crime More Onerous than Typical Offense	17%
Crime Committed in Zone of Privacy	33%
Recommended by Prosecutor	8%
Plea Negotiation	33%
Defendant Waived Jury Determination of Aggravating Factors	42%

⁹ The most common reasons cited for mitigated durational departures, as submitted by sentencing judges and coded by MSGC staff. Up to four departure reasons and three plea agreement reasons are coded. There were 12 aggravated durational departures.

¹² The CSC offenses are grouped within each degree by statutory provisions that either specify that the victim was a child or do not specify the victim's age. The "Occupation" category refers to statutes specifying the occupation of the offender e.g.: psychotherapist, health care professional, clergy, correctional employee, or special transportation service employee or if one of the specified occupations was indicated by the MOC code, regardless of how the offense was charged.

¹⁴ Standard Grid/Sex Offender Grid

The following table displays the number of offenders sentenced and sentencing practices from 2011 to 2013 by the statutory provision for which the offender was sentenced. Included are the number of cases, number of cases for which prison was the presumptive sentence, number and percent receiving an executed prison sentence, the average pronounced sentence in months, and the number and rate of mitigated dispositional departures (percent of presumptive commitments receiving probation). Life sentences are excluded from the average durations.

Table 18. Sentencing Practices for CSC Offenses by Statutory Provision; Combined Data for Cases Sentenced (2011-2013)

Offense Severity Levels ¹⁵ Presumptive Sentence with No Criminal History	Statute Number	Offense	# Cases	# Presumptive Prison	Prison Sentence Number and Rate		Av. Sent. In Months	Mitigated Dispositional Departures Number and Rate

How the Guidelines Work

To understand the data on sentencing practices, it is necessary to have a general knowledge of how the Guidelines work and what factors are used to determine the recommended sentence. Minnesota's Guidelines are based on a grid structure. The vertical axis represents the severity of the offense of conviction. The Commission has ranked offenses that are felonies under Minnesota law into eleven severity levels. Offenses for which a life sentence is mandated by statute (first-degree murder and some criminal sexual conduct offenses) are excluded from the Guidelines. A separate Sex Offender Grid is used for sentencing sex offenses with severity levels from A (most serious) to H. The horizontal axis represents the offender's criminal history and includes: variously weighted prior felony sentences; some prior misdemeanor/gross misdemeanor sentences; limited prior serious juvenile offenses; and added points for "custody status" if the offender was confined or was on probation, parole, supervised release, or conditional release, when the current offense was committed.

The recommended Guidelines sentence (presumptive sentence) is generally found in the cell of the Sentencing Guidelines Grid in which the offender's criminal history score and severity level intersect. The numbers in the cells are recommended lengths of prison sentences in months. For cells below and to the left of the solid line (the gray shaded area of the Grids), the Guidelines recommend a stayed sentence. When a sentence is stayed, the court typically places the offender on probation and may impose up to one year of local confinement (i.e., jail or workhouse). Other conditions such as fines, restitution, community work service, treatment, house arrest, etc., may also be imposed on the offender. For cells above and to the right of the solid line (the white area of the Grids), the Guidelines recommend incarceration in a state prison. When prison is the presumption, the Guidelines provide a range of 15 percent downward and 20 percent upward from a specified duration. The court may pronounce a sentence within that range without departing from the Guidelines.

The court may depart from the presumptive Guidelines sentence for reasons that are substantial and compelling. The court must state the reason(s) for departure on the record, and either the prosecution or the defense has the right to appeal the pronounced sentence. Regardless of whether or not the court follows the Guidelines, the sentence pronounced is fixed; there is no parole board to grant early release from prison. When an offender receives an executed (prison) sentence, the sentence pronounced by the court consists of two parts: a term of imprisonment equal to at least two-thirds of the total executed sentence and a supervised release term encompassing the remaining portion of the total executed sentence. The amount of time the offender actually serves in prison may be extended by the Department of Corrections if the offender violates disciplinary rules while in prison or violates conditions of supervised release. This extension period could result in the offender serving the entire executed sentence in prison. Certain offenses (such as criminal sexual conduct) have a period of conditional release attached to them. When an offender is committed to prison, the Department of Corrections places the person on conditional release for a designated term upon the offender's release from prison. Conditional release essentially extends the offender's term of supervision by the Department of Corrections upon release. The presumptive sentence cannot always be determined by simply looking at one of the sentencing Grids. The presumptive Guidelines sentence is sometimes greater than it might appear from the Grids alone, due to mandatory minimum sentences and other enhanced sentences provided by the Legislature. It is not possible to fully explain all of the policies in this brief summary. Additional information on the Sentencing Guidelines is available by contacting the Commission's office. The *Minnesota Sentencing Guidelines and Commentary* is available online at <http://mn.gov/sentencing-guidelines/>.

Standard Sentencing Guidelines Grid – Effective August 1, 2013

Presumptive sentence lengths are in months. Italicized numbers within the grid denote the discretionary range within which a court may sentence without the sentence being deemed a departure. Offenders with stayed felony sentences may be subject to local confinement.

Presumptive commitment to state imprisonment. First-degree murder has a mandatory life sentence and is excluded from the Guidelines under Minn. Stat. § 609.185. See Guidelines section 2.E. Mandatory Sentences, for policies regarding those sentences controlled by law.

Presumptive stayed sentence; at the discretion of the court, up to one year of confinement and other non-jail sanctions can be imposed as conditions of probation. However, certain offenses in the shaded area of the Grid always carry a presumptive commitment to state prison. Guidelines sections 2.C. Presumptive Sentence and 2.E. Mandatory Sentences.

¹ 12¹=One year and one day

² Minn. Stat. § 244.09 requires that the Guidelines provide a range for sentences that are presumptive commitment to state imprisonment of 15% lower and 20% higher than the fixed duration displayed, provided that the minimum sentence is not less than one year and one day and the maximum sentence is not more than the statutory maximum. Guidelines section 2.C.1-2. Presumptive Sentence.

Sex Offender Sentencing Grid – Effective August 1, 2013

Presumptive sentence lengths are in months. Italicized numbers within the grid denote the discretionary range within which a court may sentence without the sentence being deemed a departure. Offenders with stayed felony sentences may be subject to local confinement.

 Presumptive commitment to state imprisonment. Sex offenses under Minn. Stat. § 609.3455, subd. 2, have mandatory life sentences and are excluded from the Guidelines. See Guidelines section 2.E. Mandatory Sentences, for policies regarding those sentences controlled by law, including conditional release terms for sex offenders.

 Presumptive stayed sentence; at the discretion of the court, up to one year of confinement and other non-jail sanctions can be imposed as conditions of probation. However, certain offenders in the shaded area of the Grid may qualify for a mandatory life sentence under Minn. Stat. § 609.3455, subd. 4. Guidelines sections 2.C. Presumptive Sentence and 2.E. Mandatory Sentences.

12¹=One year and one day

² Minn. Stat. § 244.09 requires that the Guidelines provide a range for sentences that are presumptive commitment to state imprisonment of 15% lower and 20% higher than the fixed duration displayed, provided that the minimum sentence is not less than one year and one day and the maximum sentence is not more than the statutory maximum. Guidelines section 2.C.1-2. Presumptive Sentence.

³ Prostitution; Sex Trafficking is not subject to a 90-month minimum statutory presumptive sentence so the standard range of 15% lower and 20% higher than the fixed duration applies. (The range is 77-108.)
