Minnesota Revisor of Statutes, [revisor@revisor.mn.gov](mailto:revisor@revisor.mn.gov)

**Subject: Annual Report on Obsolete, Unnecessary, or Duplicative Rules as Required by Minnesota Statutes, section 14.05, subdivision 5**

Dear Governor Dayton, Senators, Representatives, Revisor Timmons, Director Hubinger:

Minnesota Statutes, section 14.05, subd. 5, directs the Minnesota Department of Agriculture (MDA) to report to you by December 1 of each year whether any of its rules are obsolete, unnecessary, or duplicative of other state or federal statutes or rules.

MDA has reviewed its rules and found that the following rules are or have become obsolete, unnecessary, or duplicative over the course of the last year. MDA's timetable for completing these rulemakings is by the end of 2016 through the processes outlined in Minnesota Statutes, sections 14.3895 and 14.47, subd. 6(b).

1. **1505.3070, subpart 1 B. (2).** This rule states that "[t]he area must be sloped to a sediment trap used only for the temporary collection of spilled or released pesticides. The sediment trap may not be greater than two feet deep or hold more than 109 U.S. gallons." MDA plans to remove the section of the rule that states, "or hold more than 109 U.S. gallons" because the rule requirement is unnecessary. This specific amount rule requirement is arbitrary and not based on any industry standards, it is not based on any state or federal law, it is overly restrictive to industry, and does not provide the adequate flexibility required for secondary containment/sediment trap designs. MDA will address this rule change through use of the process provided by Minnesota Statutes, section 14.3895.

2. **1513.0140, subpart 1.** Pursuant to this rule, “[e]ach system nameplate must be made of a noncorroding metal permanently attached to the system by continuous welding around its perimeter and located so as to be readily accessible for inspection.” MDA plans to remove the section of the rule that states, “by continuous welding around its perimeter” because the rule requirement is obsolete. The MDA does not and never has conducted inspections for nameplates based on how they are mounted. There are many anhydrous ammonia tanks where the nameplates are permanently attached by various means such as welding and rivets. The MDA plans to address this through the application of Minnesota Statutes, section 14.3895.
3. **1505.1100, subpart 3 D.** This rule states: “Records must be submitted to the commissioner no later than December 1 of the calendar year in which they occur.” The MDA plans to remove subpart 3 D entirely as this language no longer matches statutory language. The MDA plans to address this through the application of Minnesota Statutes, section 14.3895.
4. **1505.0960.** This rule provides that “[i]f any applicant fails to achieve a passing score on any examination, he/she shall be eligible to retake the examination after 15 days from the date of notification of failure of the first examination. If any applicant fails to achieve a passing score upon retaking an examination, he/she shall be eligible to retake the examination after 30 days from the date of notification of examination failure. A failing applicant may retake an examination no more than three times in one year. Upon submission to the commissioner in writing of specific reasons within 30 days from the date of notification of failure of third retaken examination, an appeal of the score may be made.” MDA plans to remove the section of the rule that states, “after 15 days from the date of notification of failure of the first examination. If any applicant fails to achieve a passing score upon retaking an examination, he/she shall be eligible to retake the examination after 30 days from the date of notification of examination failure.” This rule requirement slows down the license process and places limits on a person’s ability to go to work. The MDA currently issues waivers for waiting periods, but this adds unnecessary additional work for the agency. By removing this requirement an unnecessary burden will be removed from both the MDA and pesticide applicators. The MDA plans to address this obsolete rule through the application of Minnesota Statutes, section 14.47, subd. 6(b) or the process set forth in Minnesota Statutes, section 14.3895 as appropriate.
5. **1545.2050 - 1545.3170.** These rules regulate the processing of fish for human consumption. The MDA proposes to repeal these rules as duplicative and unnecessary. Fish processing is subject to the Minnesota Food Code, Minn. R. ch. 4626, as well as to the federal food and drugs rules and fishery products rules. These federal rules have been incorporated into Minnesota law by *Minnesota Statutes*, section 31.101. Each of the rules in chapter 1545 proposed to be repealed is substantively addressed by the Minnesota Food Code, the federal rules, or Minnesota Statutes, as illustrated in the attached table. MDA believes that repealing the proposed rules will eliminate confusion and streamline the regulatory process for both the regulated parties and the agency, without any detriment to food safety. MDA plans to repeal these rules using the process set forth in Minnesota Statutes, section 14.3895.
6. **1550.1255-1550.1530.** These rules pertain to bakeries. The MDA proposes to repeal these rules as duplicative and unnecessary. Bakeries are subject to the Minnesota Food Code, Minn. R. ch. 4626, as well as to the federal food and drugs rules. These federal rules have been incorporated into Minnesota law by Minnesota Statutes, section 31.101. Each of the bakery rules in chapter 1550 proposed to be repealed is substantively addressed by the Minnesota Food Code, the federal rules, or a provision of Minnesota Statutes, as illustrated in the attached table. MDA believes that repealing the proposed rules will eliminate confusion and streamline the regulatory process for both the regulated parties and the agency, without any detriment to food safety. MDA intends to use the process set forth in Minnesota Statutes, section 14.3895 to repeal these rules.

7. **1550.1540-1550.1700.** These rules contain requirements for the manufacture of nonalcoholic beverages, beer, and other malt beverages. MDA believes these rules are duplicative and unnecessary. Beverage manufacturers are subject to the Minnesota Food Code, Minn. R. ch. 4626, as well as to the federal food and drugs rules. These federal rules have been incorporated into Minnesota law by Minnesota Statutes, section 31.101. Each of the beverage rules in chapter 1550 proposed to be repealed is substantively addressed by the Minnesota Food Code, the federal rules, or Minnesota Statutes, as illustrated in the attached table. MDA believes that repealing the proposed rules will eliminate confusion and streamline the regulatory process for both the regulated parties and the agency, without any detriment to food safety. MDA plans to repeal these rules using the process contained in Minnesota Statutes, section 14.3895.

**Status of rules identified in the Minnesota Department of Agriculture's 2013 and 2014 Annual Rules Reports.**

The obsolete rules identified in MDA's 2013 and 2014 Annual Rules Reports have not yet been repealed. These rules were to be repealed by legislation that did not pass and become law. Repeal of 1562.0100 C, 1562.0300, 1510.0340 -1510.0360, and 1510-0161 are still in the planning stages. MDA will move forward with the repeal of these rules using the process set forth in Minn. Stat. 14.3895.

If you have any questions regarding this report, please contact Kimberly Middendorf, MDA Administrative Rules Coordinator (651-201-6435 or [kimberly.middendorf@state.mn.us](mailto:kimberly.middendorf@state.mn.us)).

**The cost of preparing this report.**

In compliance with Minnesota Statutes 3.197, the cost of preparing this report is as follows: Staff cost: \$2,000. This includes time for review of rules, legal research and the time to complete the report.

Sincerely,

James A. Boerboom  
Deputy Commissioner

## Food Rules Proposed for Repeal - 2015
