Lowland brush isn't an MIH, but it's coded as "97" in the "EV code" field in the stand data. That's another category that would be good to break out since it's something you can pick out on an air photo, and because of the habitat's importance to moose. Jack

Thanks Jack. I have one last question. You mentioned yesterday how in past land exchanges, you have looked at 1) upland forest, 2) lowland forest, and 3) lowland brush. Perhaps I missed it, but what MIH code would lowland brush be within? Would it be MIH 14 – Aquatic Habitats, or would that be a “N/A” like non-forested openings?

Thanks for your guidance on this.

Ryan  
 well, this isn't as useful as I remembered, but it does have a few codes on it. Jack
