CSA farms continue to be a fast-growing direct-farm marketing and production model. With many benefits to both consumers and farmers, it's easy to see why! Consumers get fresh, healthy, local food directly from the farm. Farmers have a known market for their products and income, allowing them to focus on growing food.

A CSA farm sells subscriptions or memberships to their farm, generally in late winter or early spring - before planting begins. Members pay before the season starts and then receive a weekly share of produce during the growing season, around 14-20 weeks. Most farms offer full or half shares. You can also split a share with your friends or family - but dividing the produce will be up to you! A typical share feeds veggie-loving adults. Shares are either picked up at the farm or delivered to a designated drop site. CSA farms often offer other member-only perks, like a weekly newsletter about what's in their share or on-farm visits/work days.

It's important to understand that a CSA membership involves a shared risk & reward with the farmer. You will share in the bounty of crops that do well, but also risk any crop failure.

Each CSA will vary in what they offer, how much it costs, delivery or pick up locations and the length of their season. Some meat/poultry and flower farms have adopted this CSA marketing model too. For consumers, it's important to do some research and find a farm that works for them! Keep in mind, many CSAs deliver to cities outside the one they are located. Use our drop site finder on the online Directory to quickly see some of each farm's drop sites offered.

Minnesota's strawberry season begins in southern Minnesota and gradually moves north. Northern growers typically start their season about two weeks after berries ripen in southern Minnesota. The exact timing and length of the season varies from year to year depending on the weather. Mild temperatures in the 70's and low 80's help extend the season by allowing berries to ripen at a steady pace while extreme heat can make the berries ripen faster, shortening the season.

Because picking conditions vary from farm to farm and even fluctuate from day to day depending on the weather, always call ahead or check their website/Facebook page for updates.

Minnesota strawberry season only comes once a year – so be sure to capture the wonderful flavor of fresh picked berries! Pick or buy enough pre-picked berries to last year all year long by freezing them or making them into jams and jellies. Sign up for the Minnesota Grown Pick of the Month E-Newsletter for recipes and storage tips!

Berry Nutritious

8 medium-sized strawberries contain more vitamin C than citrus fruit (like an orange)

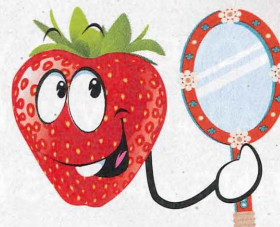

Vitamin C boosts your immune system to keep you feeling good. The high amount found in strawberries has been linked to reduced risk of cancer, suppressing the progression of tumors and maintaining healthy weight

12 or more strawberries each day helps keep your vision clear

Potassium makes strawberries good at regulating blood pressure and keeping your heart healthy

Strawberries can also slow the effects of aging and keep your skin wrinkle-free

Fun Facts

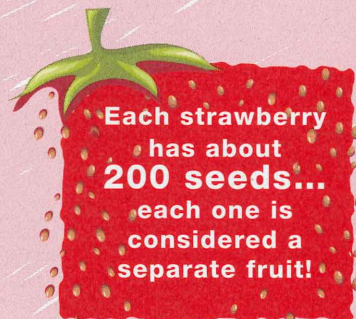

Strawberries are the first fruit to ripen in the spring. Blueberries and raspberries typically ripen just as strawberry season wraps up
keep your eye out!

The average Minnesotan eats about 5 lbs. of strawberries per year!

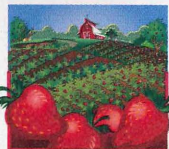

A strawberry's sweetness comes from the sun, while moisture affects the size ...
More moisture = bigger strawberries!

Each strawberry has about **200 seeds...** each one is considered a separate fruit!

Picking Tips

Call your grower ahead of time to make sure the berries haven't been picked out!

Wear comfortable shoes

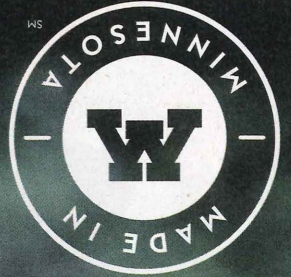

Pick with the stem and cap intact to keep berries fresh

Bring a hat, sunscreen, and water

Check if your grower provides containers or plan to bring your own

Minnesota is home to more than 600 vineyards & our Directory has a record-breaking **40 wineries** listed!

Minnesota wineries make the perfect day trip, weekend getaway, girls night out or date activity. Some wineries are available for weddings, birthday dinners, retirement parties or other events. With Minnesota's beautiful landscapes, spring, summer & fall weather, and great tasting wines – it's no wonder why these wineries are great destinations and keep expanding!

Much of the growth of Minnesota's wine industry can be attributed to the University of Minnesota, which is recognized for having one of the top wine grape programs in the United States. They have developed four outstanding cold-hardy wine grapes: Frontenac, Frontenac Gris, La Crescent & Marquette. With a state-of-the-art enology lab & research winery, the University of Minnesota is a valuable resource for an industry that has its sights set on continued growth!

To learn more about cold-hardy grape varieties or the wine industry, visit the Minnesota's Grape Growers website: www.mngrapegrowers.com

Tips to care for your fresh cut Christmas tree:

Always make a fresh cut! Remove a ½ inch disk from the bottom to help your tree absorb water.

Use a stand that fits your tree! Avoid whittling the sides of the trunk to fit the stand, the outer layers of wood help the tree take up water. Also make sure the stand can hold enough water for your tree. As a general rule, provide your tree with 1 quart of water per inch of stem diameter.

Kid-Friendly Activity

Plant a Windowsill Herb Garden

Thank you Kids Gardening for this activity!

www.kidsgardening.org/node/96404

What you need:

- Recycled containers (add holes for water drainage)
- Potting or seed-starting mix
- Herb seeds and/or plants

Procedure:

1. Visit a Minnesota Grown nursery center, greenhouse or member farm to find seeds/ seedling of your favorite herbs and a bag of potting soil. Basil, cilantro, dill, oregano, rosemary, sage, parsley or mint work well in a windowsill.
2. Select containers big enough for herb growth, around 6 to 10 inches. Check your recycling bin for potential plant pots (remember to poke holes for drainage if you use recycled bottles or containers).
3. Add potting soil or seed starting mix to the containers. If the potting mix is too dry when removed from the package, moisten the soil before adding the seeds.
4. Plant seeds or seedlings, and water them!
5. Choose a sunny, south facing window that receives 5 to 6 hours of sunlight per day. Water your herbs to keep the soil moist but not soggy. Check the moisture by pressing your finger into the top inch of potting mix. If you detect any moisture, don't water.

August 8, 2015

McLeod County Fairgrounds
Hutchinson, MN *(all weather event)*

The goodness of Garlic

Garlic has a rich history dating back as far as 6,000 years. It is among the oldest cultivated plants in the world.

Did you know that there are over 100 varieties of garlic grown in Minnesota. In Minnesota, garlic is planted in October and harvested in July.

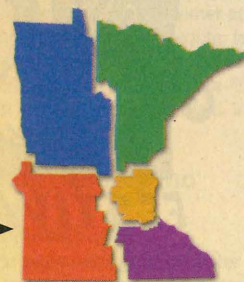

Health Benefits

Garlic is a source of a group of allyl sulfides. These compounds may be able to prevent cancer development, and support health and immune system function.
(Livestrong.com)

You can increase the health benefits you receive from garlic by letting it sit 10-15 after you've chopped it or crushed it.

Kid-Friendly Activity

Beeswax Modeling Clay

Thank you to Parent Savvy for the activity!

parentsavvy.com/articles-and-blog/281/

What you need:

- 1 c beeswax pellets (*Contact a local honey producer – page 114*)
- 3 t coconut or olive oil
- 2 t of lanolin
- Old crayons, food coloring, or powdered paint for color
- Silicone mold or cupcake pan

Procedure:

1. Set up a double boiler or fill a large pot with water and place a smaller one (for ingredients) inside of it. This will help ensure your wax will receive even heat and not burn.
2. Place all of the ingredients in double boiler or smaller pot. Over low-medium heat, stir until everything is smooth.
3. Once evenly mixed, pour wax into your mold. (1/4 full allows for quicker playtime).
4. Once it has cooled it will feel firm. The heat from your hands will soften the clay, and it will become malleable.
5. Have fun! The clay will harden if not played with, but it will not dry out!

3. Spread the underside of half of the cookies with currant jelly and sandwich them together with the plain cookie halves.
4. Mix powdered sugar and water for glaze.
5. Sprinkle with toasted chopped hazelnuts.

Kid-Friendly Activity

Wool Felting Art

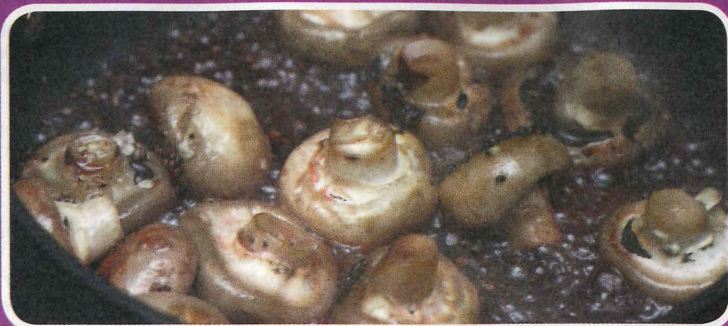

Thank you to Non-Toxic Kids for the activity!
parentsavvy.com/articles-and-blog/281/

What you need:

- Pieces of Minnesota Grown wool/roving, in various colors. (Contact a local producer – page 118)
- Squares of natural felt for the base
- Netting material
- A bar of Minnesota Grown soap (Contact a local producer– page 116)
- Bubble wrap

Procedure:

1. Lay out your design on pre-bought square(s) of felt and then onto a towel and bubble wrap.
2. Drizzle warm water and liquid soap all over the felt so it is wet, not soaking. Then lay the netting down on top of it. Take a balled up piece of bubble wrap and rub it evenly over netting for several minutes.
3. With slight pressure, rub bar soap on evenly over the surface. (The soap acts as felt glue).
4. Lay another piece of bubble wrap on top, and roll it up. You can secure this with rubber bands. Roll the bubble wrap wand 100 times. Unroll it and roll the fabric up in the other direction. Roll 100 more times.
5. Check to see if the felt is connecting and shrinking into one piece. If not, keep rolling, or unroll and rub it again with the bubble wrap ball. You can use more soap if it's not sticking, then roll again.
6. Rinse your piece off in the sink until the soap is out. Set out on a towel to dry.
7. Display your artwork!

Honey

Bees are some of the most important pollinators in agriculture. They also provide us with delicious, naturally sweet honey!

To help bees, plant bee-friendly plants/flowers and keep them clean of any pesticides. Talk with your local garden center, nursery or member for advice. You can also visit the University of Minnesota's Bee Lab online for tips and bee-friendly plants. www.beelab.umn.edu

Did you know that Minnesota is the fifth largest honey-producing state in the United States?

Did you know that the University of Minnesota has maintained an internationally-known research program on honey bees since 1918?
