AT A GLANCE

Conserve, manage natural resources

- Manage **1.3 million** acres of wildlife management areas, **185,000** acres of scientific and natural areas, and **4.2 million** acres of state forest.
- Protect lakes, rivers, and lands from invasive species.
- Protect, monitor, enhance and restore aquatic habitat on **5,400** fishing lakes and **16,000** miles of streams and rivers.
- Manage **2,800** surface-water monitoring sites.

Get people outdoors

- Operate **75** state parks and recreation areas, **54** state forest campgrounds/day use areas and **8** state waysides.
- Manage **2.4 million** license sales and **1.4 million** boat/vehicle registrations.
- Manage more than **30,000** miles of trails for hiking, biking, snowmobiles, off-highway vehicles, horseback riding and cross-county skiing.
- Manage **1,495** public water accesses, **355** fishing piers and **33** water trails.

Build the economy

- Manage fishing, hunting and wildlife-watching activities supporting **48,000** jobs and **\$3.8 billion** in economic activity.
- Manage **12 million** acres of state mineral rights contributing directly to the mining economy.
- Meet certification requirements on **5 million** acres of state forest lands that provide timber, habitat, clean water and recreational opportunities.

Serve the public

- **2,943** facilities statewide.
- Manage an annual budget of **\$500 million**.
- **4,760** Employees worked **5.6 million** hours, which equates to **2,684** full time equivalents.

PURPOSE

Our mission is to work with citizens to:

Conserve and manage natural resources;
Provide outdoor recreation opportunities; and
Provide for commercial uses of natural resources in a way that creates a sustainable quality of life.

We fulfill our mission by:

- **Conserving** the diversity of land, waters, and wildlife so citizens can enjoy the outdoors and benefit from natural resources and related industries.
- **Encouraging** citizens to get outdoors to enjoy the state's natural wonders.
- **Promoting** responsible use of resources for our collective economic benefit.
- **Managing** an outdoor recreation system that provides hunting, fishing, wildlife-watching, camping, skiing, hiking, biking, motorized recreation, and conservation education.
- **Protecting and promoting** healthy waterways and ground water.
- **Managing** state forests, mineral rights, and school-trust lands for maximum long-term economic return.

We contribute to the statewide outcomes of:

- A clean, healthy environment with sustainable uses of natural resources.
- A thriving economy that encourages business growth and employment opportunities.
- Strong and stable family and communities.
- People in Minnesota are safe.

BUDGET

Our FY 2014-15 biennial budget is approximately \$1 billion. The majority of our funding comes from recreational fees and tax revenues. Thirty-one percent of our funding is one-time, which is dedicated for specific purposes and 20 percent is pass-through grants. We operate primarily out of nine funds but approximately 39 percent of our financial activity occurs in the Game and Fish Fund and the Natural Resources Fund. This spending focuses on conserving and managing natural resources, so Minnesotans can enjoy the outdoors today and tomorrow. About 18 percent of our funding comes from the General Fund. Forty-four percent of this funding is dedicated to managing forest fires and making payments to counties and Indian tribes as required by statute and treaties. Additional Department of Natural Resources (DNR) budget information can be found at: Where Funding Comes From (http://files.dnr.state.mn.us/aboutdnr/budget/fy14-15/budget_from.pdf)

STRATEGIES

To accomplish our mission, we use the following strategies:

- 1. Conserve, enhance waters, natural lands, and fish and wildlife habitats.** We work closely with partners to conserve critical lakes, wildlife and waters by:
 - Accelerating groundwater management—monitoring, permitting, education and compliance -- to ensure sustainable use and quality.
 - Working with farmers, landowners, local officials and citizens to promote conservation of prairies, grasslands and wetlands.
 - Implementing programs to prevent and curb spread of invasive species.
 - Accelerating programs to inventory, monitor status of natural lands, waters and species.
- 2. Provide outdoor recreational opportunities.** We support a robust tourism economy and a high quality of life that attracts people and business to the state by:
 - Implementing programs such as the “I Can” series and “Learn to Hunt” that provide affordable outdoor learning experiences to beginners.
 - Increasing the use of user friendly, digital recreation information, such as new websites and mobile apps.
 - Creating and implementing a new parks and trails system plan to improve existing systems and attract future users.
- 3. Manage natural resources for sustainable economies, and communities.** Through recreation tourism, forest products, and mineral and water resources, we help generate billions of dollars a year for the state by:
 - Maintaining diverse, healthy, sustainable and productive forests that meet certification standards.
 - Researching and developing mining technologies that protect the environment.
 - Improving data management systems to provide better access and analysis of groundwater and surface water data for sustainable communities.
- 4. Achieve operational excellence in service to citizens.** We strive to continually improve services offered to citizens by:

- Increasing use of plain language and presenting information in easy-to-understand formats.
- Protecting public safety with Americans with Disabilities Act (ADA) standards at DNR facilities, parks, trails, and other facilities.
- Maintaining work standards that reinforce positive, professional conduct, promote diversity, and support staff training and development.
- Working to increase department energy efficiency and renewable energy use that reduces costs and helps the environment.
- Developing “continuous improvement” project to improve public service and customer satisfaction.

The Department of Natural Resources legal authority comes from Minnesota Statutes:

Expenditures	87	175	175	175
Water Recreation				
Expenditures	251	507	507	507
Forest Management Investment Account (FMIA)				
Expenditures	258	521	521	521
Net Fiscal Impact = (Expenditures – Revenues)	2,667	5,380	5,380	5,380
FTEs	30	61	61	61

Recommendation:

The Governor recommends additional funding for compensation related costs associated with the delivery of agency services. This amount represents an annual increase of 1.8% for General Fund compensation costs. Additionally, the proposal contains a 1.8% increase for compensation in the following funds/accounts: Game and Fish Fund/Operations, Natural Resources Fund/Minerals Management, All-Terrain Vehicles, Off-Highway Motorcycle, Off-Road Vehicle, Snowmobile, Water Recreation and Forest Management Investment Account (FMIA). The proposal also includes a 1.8% increase for compensation paid through our shared services model by the funds/accounts listed above except for the general fund.

Rationale/Background:

Each year, compensation costs rise due to labor contract settlements, and changes in employer-paid contributions for insurance, FICA, Medicare, retirement, and other factors. Absorbing this increase in compensation costs within existing agency base appropriations results in reduced staffing and/or reduced non-compensation spending.

Proposal:

The Governor recommends increasing agencies' general fund budgets for employee wage and benefit costs by 1.8% per year for FY 2016-17. Agencies were instructed to include a 1.8% increase to total compensation each year in their base budgets, based upon the compound annual compensation spending rate increase per FTE over the last ten years for executive branch employees. This recommendation is intended to allow agencies to maintain their current level of agency operations, which is equivalent to 61 FTE's in 2017.

For non-General Fund direct appropriated funds, the Governor's budget recommendations also include an adjustment of 1.8% per year, where the amount can be supported by the source of revenue. For the DNR, this includes the following funds/accounts: Game and Fish Fund/Operations, Natural Resources Fund/Minerals Management, All-Terrain Vehicles, Off-Highway Motorcycle, Off-Road Vehicle, Snowmobile, Water Recreation, and FMIA.

This proposal also incorporates funding for compensation paid through our shared service model. The shared service model is an internal billing structure that funds many of the agency's operational services that benefit all divisions such as financial management, human resources, communications, fleet, and facilities. Because we invoice divisions internally for shared services, these dollars are appropriated to the divisions. This proposal is prorated to only include the portion of shared service costs that the funds listed above would pay. No shared service costs were applied to the general fund.

Results:

This proposal is intended to allow agencies to continue to provide current levels of service and information to the public.

Statutory Change(s):

N.A.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Conservation Easement Stewardship Investment Fund, DNR Account

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Special Revenue				
Expenditures	52	52	52	52
Revenues	52	52	52	52
Net Fiscal Impact = (Expenditures – Revenues)	0	0	0	0
FTEs	.5	.5	.5	.5

Recommendation:

The Governor recommends creating an interest bearing conservation easement stewardship investment fund, which will contain separate accounts for the Department of Natural Resources (DNR) and the Board of Water and Soil Resources (BWSR). The DNR account will cover the costs of managing the DNR's new conservation easements, including costs associated with easement monitoring and enforcement. The fund will be managed by the State Board of Investment to maximize long-term gain. The proposal appropriates 5% of the funds in the DNR account per year to the DNR for conservation easement stewardship.

The proposal authorizes creation of the fund, and includes the DNR and BWSR accounts and deposit of existing conservation easement funds previously appropriated to DNR into the DNR account. Estimated revenue is based on assumed interest of 5% on existing conservation easement stewardship funds (\$1,043,840) that would be deposited upon creation of the account. It is assumed that at a minimum all the interest earned would be spent on stewardship and that a .5 FTE would be needed. Actual fiscal impacts and FTEs will depend on the number of new conservation easements acquired and the amount of stewardship funding deposited for each new easement. Spending will not exceed interest earnings.

Rationale/Background:

The DNR has acquired just over 1,000 conservation easements in the past several decades. With very few exceptions, the DNR has not sought funds at the time of acquisition for ongoing stewardship of its conservation easements. Members of the legislature, the conservation community and the Office of the Legislative Auditor have raised concerns that the DNR has not met minimum standards for monitoring some of these easements. This proposal seeks to ensure that stewardship of any new conservation easement is addressed up front at the time of acquisition through a deposit of principal into the DNR account.

The proposal would also address the DNR's inability to generate a sustainable level of interest from existing conservation easement stewardship funds. Those funds include \$750,000 from an Outdoor Heritage Fund (OHF) appropriation that was deposited in the forests for the future conservation easement account under Minn. Stat. sec. 84.68 and \$293,840 in additional unspent funds that have been appropriated from the OHF for establishment of conservation easement monitoring and enforcement funds. The \$750,000 in the forests for the future conservation easement account was intended to generate about \$30,000 per year in interest and cover the cost of stewardship of the DNR's largest conservation easement. However, the account is generating less than half of one percent interest per year, which is insufficient to cover the stewardship costs. The DNR only has the authority to deposit the other \$293,840 in low-interest accounts. It needs the ability to have these funds invested for a higher rate of return.

Proposal:

The proposal will establish the investment fund with DNR and BWSR accounts. It will also require that the DNR seek funds to be deposited into the account each time the DNR acquires a new conservation easement. Decisions about the amounts and timing of those deposits into the account will be made in the future. The proposal will also transfer the existing \$1,043,840 in stewardship funding into the new account. The account will provide stewardship funds for the DNR's largest conservation easement and other easements funded through the OHF.

The effective implementation date for fund and account creation will be the day following final enactment. Transfer of existing funds into the DNR account will occur on June 30, 2015. The requirement that the DNR seek a contribution for the account for each new

conservation easement will be effective for conservation easements acquired with money appropriated on or after July 1, 2015, and for acquisitions of conservation easements by gift that are initiated on or after July 1, 2015.

This proposal is a change to the way the DNR funds its conservation easement stewardship, and will apply to all conservation easement acquisitions going forward. Stewardship of existing easements is funded from a variety of sources, including general fund, game and fish fund and temporary Environment and Natural Resources Trust Fund (ENRTF) conservation easement stewardship funding. Some conservation easements held by the DNR are not regularly monitored because of insufficient funding.

The intended result of the proposal is to fund stewardship of all new DNR conservation easements. Through regular monitoring, the DNR will detect and address any conservation easement violations that could adversely impact the properties. The monitoring process includes regular communication with landowners. This ongoing communication will help to prevent easement violations and reduce future enforcement costs.

By enabling funds for conservation easement stewardship to be deposited into the account at the time of acquisition and invested, the proposal will prevent the problem of a future lack of funding for stewardship of new conservation easement acquisitions.

IT Related Proposals:

Of the estimated \$52,000 annual appropriation from the DNR account, \$2,000 would be used for IT services related to conservation easement stewardship.

Results:

DNR's goal is to monitor all new conservation easements through funds generated from the conservation easement stewardship account. The DNR's ability to reach this goal will depend on the amount deposited into the account and the availability of other funds.

Performance data will be collected through the DNR's land records system and Conservation Easement Management System. Results can be published on the DNR's website.

Statutory Change(s):

The proposal will create new statutory sections to establish the investment fund and accounts and to require the DNR to seek a contribution into the account for each new easement acquired. The proposal will also transfer to the DNR account funds that are currently in the forests for the future conservation easement account under Minn. Stat. sec. 84.68 and funds previously appropriated from the outdoor heritage fund for the establishment of conservation easement monitoring and enforcement funds. Finally, the proposal will repeal section 84.68.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Heritage Enhancement Increase for Rare Resources Preservation

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Nongame Wildlife Fund (2111)				
Expenditures	(273)	(273)	(273)	(273)
Revenues	0	0	0	0
Heritage Enhancement Account (2209)				
Expenditures	750	750	750	750
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	477	477	477	477
FTEs	6.5	6.5	6.5	6.5

Recommendation:

The Governor recommends an annual increase of \$750,000 in FY 2016 and FY 2017 to the Heritage Enhancement Account appropriation to provide data and technical support for the development and implementation of priority conservation work. This includes 3 FTE within Minnesota Biological Survey focused on nongame wildlife and information delivery, 1 FTE in the Conservation Management and Rare Resources program focused on habitat conservation, and 2.5 FTE in the Lakes and Rivers program focused on recovery and restoration of endangered mussels. These funds will also provide land transaction support for the Scientific and Natural Areas Program.

This increase is needed to offset decreased donations into the Nongame Wildlife Account and the resulting decrease in Reinvest in Minnesota (RIM) match, a decrease in funding from the Environment and Natural Resources Trust Fund (ENRTF), and long-term decline in General Fund support for these programs.

The Nongame Wildlife Fund appropriation must be reduced by \$273,000 per year to prevent a negative balance in the fund. Up to \$1,000,000 of the Division's Nongame Wildlife Fund appropriation is matched by RIM. The necessary Nongame Wildlife Fund appropriation reduction reduces the RIM match to \$950,000. This will result in an overall decrease of \$323,000 annually in funding for the Nongame Wildlife program efforts unless revenues to the Nongame Wildlife Fund or private donations increase.

Rationale/Background:

The Division of Ecological and Water Resources (EWR) has a number of programs and projects that are the foundation of conservation and enhancement of Minnesota's natural resources. These include Nongame Wildlife, Minnesota Biological Survey (MBS), Scientific Natural Area (SNA), and endangered mussel recovery. These programs rely on data collection, analysis and technical assistance to provide public and private entities, permit programs, environmental review, and land management organizations with up to date, technically accurate information to inform their decisions.

Examples:

- the development and implementation of the Minnesota Prairie Conservation Plan,
- Minnesota's Forest Certification process,
- the revision of the State's Wildlife Action Plan,
- the update of the state list of endangered and threatened species,
- the review of school trust lands,
- the identification of areas for parks and scientific and natural areas,
- the development of best management practices for pollinators
- the recovery of rare species
- long-term monitoring of mussel populations
- the national policy related to White nose syndrome in bats

Nongame Wildlife Program

These programs and projects have been funded from a variety of sources including the Nongame Wildlife Fund, Reinvest in Minnesota matching funds, the ENRTF and the general fund. The Nongame Wildlife Program is responsible for the conservation of over 700 wildlife species. Program activities focus on survey and monitoring, technical guidance, habitat restoration and education. The Nongame Wildlife Fund can no longer support activities at their current levels due to declining donations.

The Nongame Wildlife Fund receives revenues from donations, usually made when people file their tax returns. Up to \$1 million from the Nongame Wildlife Fund is matched annually by Reinvest in Minnesota funds. Revenues to the Nongame Wildlife fund peaked at just over \$1.2 million in 2007, but revenues for FY 2014 were \$898,000 and are predicted to be approximately \$950,000 in FY 2015. EWR does not expect revenues to return to the 2007 level in the foreseeable future. The deficit to the account will need to be addressed by reducing the programs and positions traditionally supported by the fund.

Minnesota Biological Survey (MBS)

The MBS systematically collects, interprets, monitors and delivers data on plant and animal distribution and the ecology of native plant communities and functional landscapes. The inserted map displays the current status of baseline surveys. The information collected by MBS is used extensively within the DNR and by external partners to implement conservation and management efforts that maintain and enhance biodiversity.

he work of three MBS animal survey staff is partially funded from the Reinvest in Minnesota (RIM) fund match to donations made to the Nongame Wildlife Program. The Nongame Fund can no longer continue to support all the work it has in the past due to declining donations and the subsequent decrease in RIM matching funds. A new funding source is needed to retain MBS animal survey staff.

Scientific Natural Areas Program

In addition to the funding issues above, general fund reductions and emerging issues have limited resources for other areas of priority conservation work. Regional ecologists and easement administration for the Scientific Natural Areas Program are supported primarily by the General Fund; however a long-term decline in General Fund dollars has made it difficult to continue to fund these positions. The regional ecologists provide review and input into a vast array of conservation plans and projects which have the potential to impact the environment. Land administration costs are a basic requirement for landownership and are not covered by project money which supports the work of the Scientific and Natural Areas Program.

Endangered Mussel Species

Over the last decade, the Division of Ecological and Water Resources has developed techniques to rear and reintroduce endangered mussel species and is now ready to expand that capacity into a full-scale restoration facility. Having worked cooperatively with the Army Corps of Engineers (COE) to restore Higgin's eye mussels in the Mississippi River in St. Paul (where over 20,000 juvenile Higgin's eye mussels were released since 2001), the DNR is ready to support the restoration of winged mapleleaf, another federally endangered species. The new funds being requested would help support the operation of a facility to rear endangered mussels and would leverage substantial federal funding (\$1.85 for every \$1.00 of state funds) available through the Army COE Section 206 project funds.

Mussels have emerged as a keystone group of animals in flowing freshwater as they intercept organic matter and nutrients from the water column and transfer it to the bottom where they transform it into useful nutrients that favor a more diverse and abundant insect community that in turn feeds fish. Restoration of Minnesota's mussel fauna can not only recover rare species but contribute resilience to ongoing efforts to restore clean water to the state's streams.

The map below shows the location of the collaborative Higgin's eye restoration efforts, sites where winged mapleleaf restoration would be focused, as well as eight additional rivers where 7 additional state listed mussel species could be targetted for reintroduction.

Proposal:

This proposal would increase the Heritage Enhancement appropriation by a total of \$750,000 for the following, in priority order:

- \$450,000 Minnesota Biological Survey
- \$15,000 easement administration for SNAs
- \$100,000 Regional Ecologist
- \$185,000 2.5 FTEs and facility to support the restoration of endangered mussels

This proposal also reduces the appropriation from the Nongame Wildlife account by \$273,000 per year in order to maintain a positive balance in that account. This reduction will decrease the amount of RIM funds that match the nongame appropriation by \$50,000

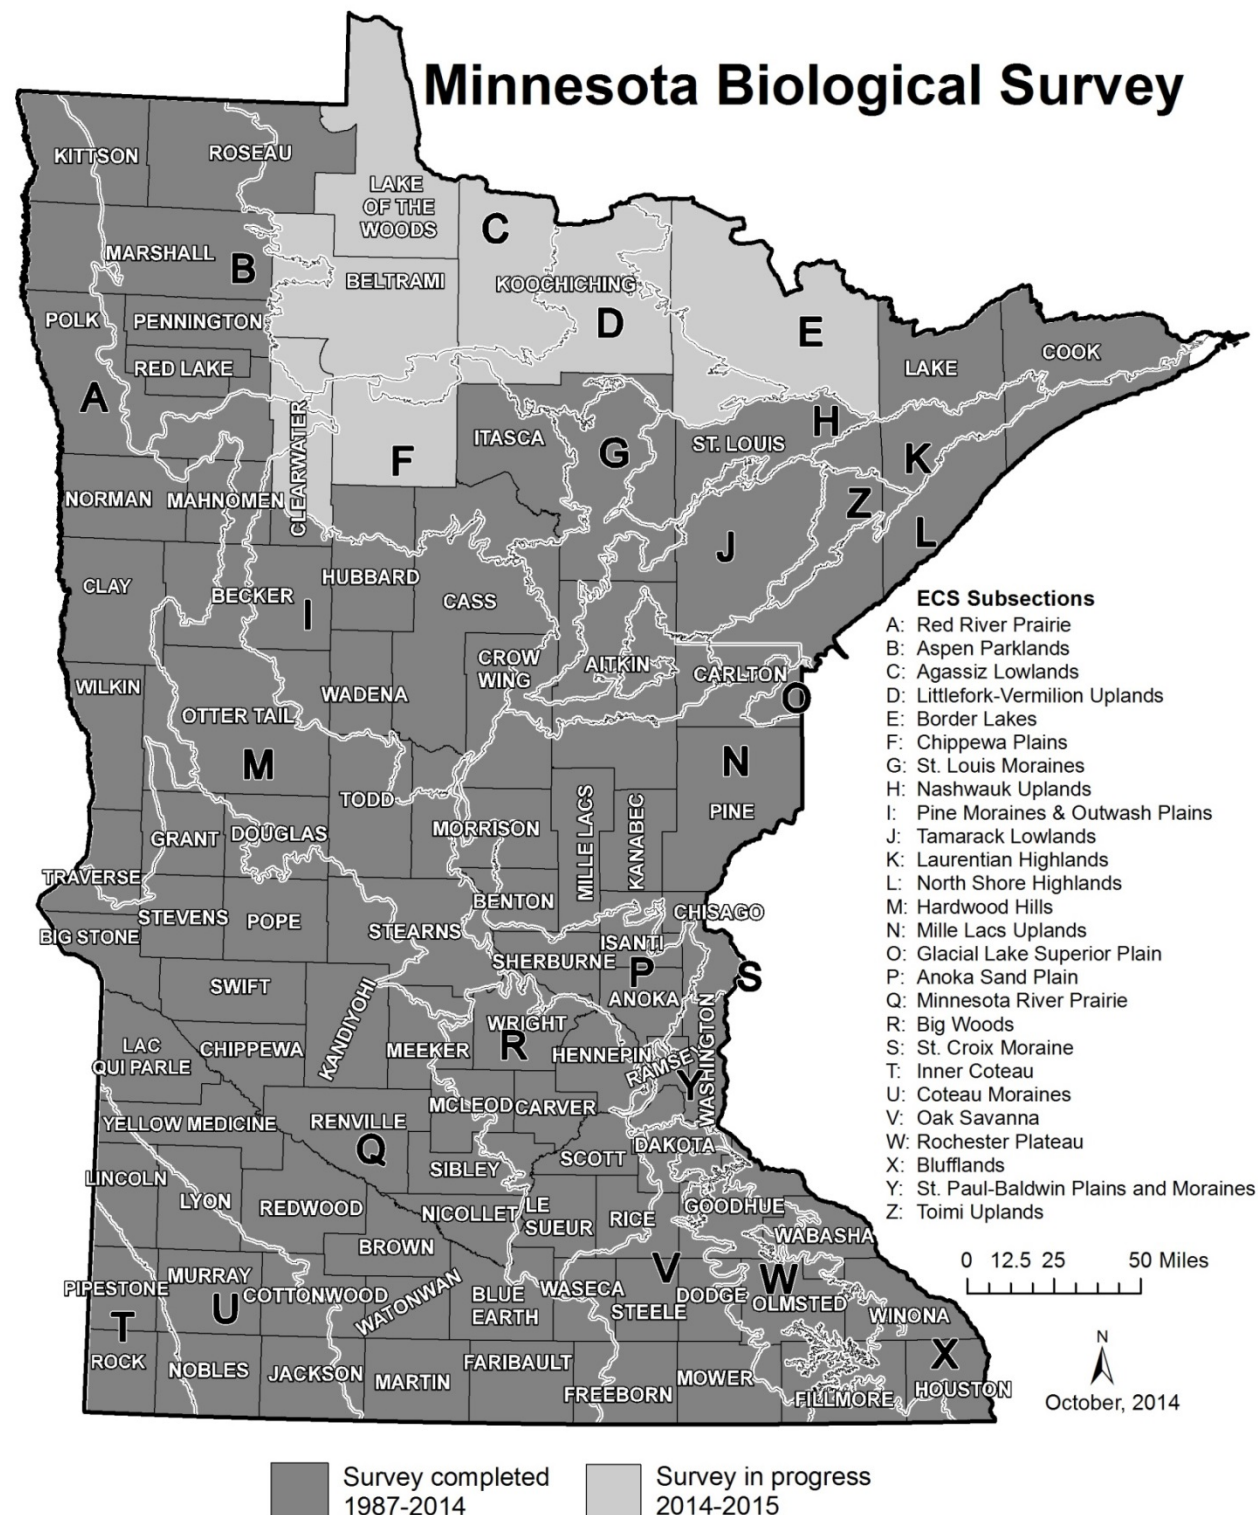

annually. The resources requested in this proposal are critical to providing needed data and technical support to priority conservation work of the state. This work is essential to sustaining the natural heritage of Minnesota.

IT Related Proposals:

Not applicable.

Results:

Maintain the Minnesota Biological Survey's collection of data on plant and animal distribution and the ecology of native plant communities and functional landscapes.

- Maintain and improve effective data management and communication of results.
- Maintain technical assistance for forest and wildlife management. Minnesota Biological Survey data and information collected by the Nongame Wildlife Program is used in all State Forest Management Plans, Analysis for Forest Certification requirements, and other priority conservation planning and recovery efforts.
- Continue monitoring of species populations, including those in the DNR's Conservation Agenda.
- Increase endangered mussel recovery efforts.

Sites where mussels could be restored using propagation from new facility in Lake City

- Ongoing Higgins' eye Mussel Reintroduction Sites, began in 2001 (Over 20,000 released) 
- Ongoing snuffbox and mucket Reintroduction Sites 
- Future mucket Reintroduction sites 
- Future fluted shell reintroductions 
- Future elktoe reintroduction 
- Future spike reintroduction 
- Future pond mussel reintroduction 

Between 1999 and 2013 over 3,000 sites were sampled for all mussels and shells. Mussels were identified by species and sorted by age. This data will help direct mussel recovery efforts.

- These measures are connected to goals 1 and 2 in "Conservation that Works;" Minnesota's waters, natural lands, and diverse fish and wildlife habitats are conserved and enhanced. These measures also help to provide an outdoor recreation system that is diverse and of high quality.

Statutory Change(s):
Not applicable.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Invasive Species

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Invasive Species Account				
Expenditures	958	958	958	958
Revenues	1,002	1,336	1,336	1,336
Net Fiscal Impact = (Expenditures – Revenues)	(44)	(378)	(378)	(378)
FTEs	8.4	8.4	8.4	8.4

Recommendation:

The Governor recommends the following changes in FY 2016 and FY 2017 impacting the Invasive Species Account:

- Increasing the watercraft surcharge by \$5 to \$10; and
- Increasing the appropriation for the Division of Ecological and Waters Resources from the Invasive Species Account by \$958,000.

These changes will maintain a positive fund balance in the Invasive Species Account and provide increased funding to meet the growing needs of the Invasive Species Program. It will also provide funding to support counties' Aquatic Invasive Species (AIS) activities and to restore habitat and native species that have been degraded by AIS. This proposal represents a 23% increase to the Invasive Species Program.

Rationale/Background:

AIS have the potential to cause serious problems in Minnesota. These nonnative species are a threat to the state's natural resources and local economies that depend on natural resources.

Most of the invasive species prevention and management activities are conducted or directed by staff from the Invasive Species Program in the Department of Natural Resources' (DNR) Division of Ecological and Water Resources. The three primary goals of the Invasive Species Program are to:

1. Prevent the introduction of new invasive species into Minnesota;
2. Prevent the spread of invasive species within Minnesota; and
3. Reduce the impacts caused by invasive species to Minnesota's ecology, society, and economy.

Prevention activities (including watercraft inspections and public education and awareness) are often undertaken in collaboration with other states, agencies, and partners with similar concerns. Prevention efforts today not only reduce the spread of invasive species, but also buy critical time needed for research and management that may provide long-term control solutions.

Due to a shortfall in existing revenue, DNR will need to support 3 FTE currently supported with Invasive Species funds to maintain current prevention efforts. In addition, the 2014 Legislature provided counties with \$4.5 million for local AIS programs which increases to \$10 million per year thereafter. DNR received one-time General Fund dollars to support county implementation of local AIS programs in the first year, which funded 3.4 FTEs. DNR will need to continue funding these positions and fund an additional 2 FTEs to support and oversee these increasing local efforts over the duration of the county funding.

Proposal:

The Invasive Species Program is funded primarily from the Invasive Species Account. Revenues to the Invasive Species Account come primarily from a surcharge on watercraft and non-resident fishing licenses and an annual transfer of \$750,000 from the Water Recreation Account. Annual expenditures from the Invasive Species Account exceed revenues from these sources, causing a projected deficit beginning in FY 2017. Without the Governor's recommended gas tax increase, the Water Recreation account also projecting a deficit beginning in FY 2016.

This proposal would maintain a positive fund balance in the Invasive Species Account while meeting the needs of the Invasive Species Program through increased revenue and appropriations. Specifically, this proposal would increase the watercraft surcharge by five dollars.

The increase in the watercraft surcharge provides a \$1,002,000 increase in revenues in the first year and \$1,336,000 each year thereafter to the Invasive Species Account. This proposal would provide an increased appropriation to fund 8.4 FTEs, including continuation of 6.4 current FTEs and 2 new FTEs. These FTEs would continue support of ongoing prevention and management efforts and add an additional support to oversee newly funded AIS work at the counties.

IT Related Proposals:

Not applicable.

Results:

- Sustain existing level of DNR AIS watercraft inspectors at priority access sites. The table below shows the number of watercraft inspected over the last three years, the hours of inspections, and inspections per hour.

DNR Inspections	2013	2012	2011
Total inspections	123,000	102,600	76,000
Total inspection hours	66,800	65,880	44,500
Inspections per hour	1.84	1.56	1.70
Inspections by DNR Region (included in total above)			
Northwest - 1	28,500	24,600	15,600
Northeast - 2	17,900	11,500	12,900
Central - 3	72,600	64,800	38,600
Southern - 4	4,000	1,700	8,500

- Engage with counties and other local governments to develop and implement AIS prevention plans. In 2013, the DNR entered into 25 delegation agreements with local units of government for authorized inspectors. The number of delegation agreements and requests for assistance with planning has increased with the new \$10 million in county aid.
- Provide training for local watercraft inspectors. In 2013, the DNR trained 298 local watercraft inspectors and this number is expected to increase substantially with the new local aid coming to the counties.
- Respond to increased need for enforcement of AIS laws.
- Restore habitat and native species that have been degraded by AIS. The table below indicates the number of permits provided to local partners to help control invasive aquatic plants in 2013.

Invasive Aquatic Plants	Number of Permits
Curly-leaf pondweed	144
Eurasian watermilfoil	85
Curly-leaf pondweed and Eurasian watermilfoil	13
Subtotal	242
Flowering rush	6
Purple loosestrife	2
Total	250

Statutory Change(s):

This proposal will require a change to M.S. 86D.415 subd. 7.

Board of Water and Soil Resources & Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Implementation of the Governor's Buffer Initiative

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Clean Water Fund				
Expenditures	2,825	2,825	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,825	2,825	0	0
FTEs	1.0	1.5	0	0

Recommendation:

The Governor recommends \$2.825 million in FY 2016 and \$2.825 million in FY 2017 from the Clean Water Fund for the Department of Natural Resources (DNR) and Board of Water and Soil Resources (BWSR) to implement the Governor's Buffer Initiative. This initiative would protect Minnesota's water resources from erosion and runoff pollution by establishing at least 50 feet of vegetation adjacent to the state's waters. Funding would provide grants for local government implementation and technical assistance and program coordination at the state level.

Rationale/Background:

Statewide, there are roughly 125,000 acres of land without vegetated buffers adjacent to Minnesota's streams, rivers and watercourses. The Board of Soil and Water Resources has estimated, in the southern and western regions of Minnesota, 64% of watercourses are not subject to any buffer requirements under current law. In addition, the Minnesota Pollution Control Agency estimates that only 43% of western and southern Minnesota's rivers and streams have vegetated buffers. Riparian buffers aid in filtering out phosphorus, nitrogen, and sediment by slowing runoff, trapping sediment, and allowing vegetation to absorb any pollutants before they enter the water. A vegetated buffer can also provide aquatic and wildlife habitat in addition to protecting and improving the quality of state waters.

Current buffer laws and rules do not require vegetated buffers where they are needed to protect water quality and existing compliance mechanisms are insufficient or ineffective. The Governor's proposal was developed by reviewing a number of studies looking at the extent of Minnesota's waters subject to current buffer requirements, and the additional buffers needed to address water quality protection. Input has also been gathered from stakeholder input meetings with agriculture interests, environment and conservation organizations, and federal, state, and local government representatives. Counties that have effectively implemented buffer initiatives were also surveyed to learn more about the elements of their successful efforts.

Proposal:

This proposal will require a 50 foot buffer of perennial vegetation adjacent to the state's perennial waters by September 1, 2016. The state's perennial waters are public waters and other watercourses with a defined bed and bank and have water flowing during the majority of the growing seasons in most years. The proposal would exempt the following areas: areas covered by a road, building or other structures; areas enrolled in the Conservation Reserve Program; public or private water access or recreational use areas; and municipalities in compliance with federal or state storm water requirements.

Under the proposal, landowners would retain use of the buffer in any way as long as permanent vegetation is maintained. In cases where a 50 foot buffer will not protect or improve water quality, landowners will be able to seek approval for an alternative practice. Landowners who have applied to financial assistance by September 1, 2016 will receive a conditional compliance waiver approved and filed by the soil and water conservation district until financial assistance is available for the buffer installation, up to September 1, 2017.

The DNR will establish and maintain an inventory map of each county that shows the waters that are subject to the buffer requirement. Following the initial phase in period for compliance, the DNR will have responsibilities for issuing enforcement orders and following up on corrective actions.

Soil and water conservation districts will be required to implement the buffer requirement including planning, technical assistance to landowners, approval of alternative practices, and tracking and reporting progress of the program.

This proposal requests \$5,650,000 in FY2016-17 from the Clean Water Fund for the DNR and BWSR as follows and summarized in the table below:

- \$400,000 per year to DNR for establishing and maintaining an inventory map of all water requiring a riparian buffer and providing guidance to local units of government for implementation of the new buffer requirements. The DNR will collect and analyze data to develop, publish, modify and disseminate maps and mapping tools to local units of government and make them available to landowners via the internet.
- \$2,425,000 per year to BWSR for grants to local governments for program implementation. Soil and water conservation districts or their delegates are required to implement the new buffer requirements. Duties include planning, map review, technical and compliance assistance to landowners, follow up on complaints, approval of alternative practices, and tracking progress of implementing the new buffer requirement.

Funding summary table

		Amount (\$000s)	State FTEs			
Agency	Activity	FY16-17	2016	2017	2018*	2019*
DNR	Buffer Program Coordination, including maps and enforcement	800	1.0	1.0	3.0	3.0
BWSR	Local program implementation	4,850	0.0	0.5	0.5	0.5
	Total	5,650	1.0	1.5	3.5	3.5

* Shown only to demonstrate ongoing activities and beginning of enforcement activities. These are not reflected in the FY16-17 budget because CWF is not a base budget funding source.

FY16-17 Biennial Budget Change Item

Change Item: Clean Water Fund

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
Clean Water Fund				
Expenditures	9,150	9,150	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	9,150	9,150	0	0
FTEs	72	72	0	0

Recommendation:

The Governor recommends \$18.3 million from the Clean Water Fund for protecting, enhancing, and restoring water quality in Minnesota's lakes, rivers, streams, and groundwater. This funding will support 72 staff (plus contracts with outside vendors and operating expenses) to contribute to a long-term partnership of Minnesota's executive branch water agencies, which include the Dept. of Agriculture, Dept. of Health, Minnesota Pollution Control Agency, Board of Water and Soil Resources, Dept. of Natural Resources, and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

The Governor's original Clean Water proposal contained \$650 thousand (FY16-17) for assessing riparian buffers. This effort has been expanded and moved into a new change item titled "Implementation of the Governor's Buffer Initiative," which is a joint proposal with the Board of Water and Soil Resources. The funding, \$325,000 per year, is now reflected in that change item.

Rationale/Background:

Water is one of the most challenging resource issues facing Minnesota over the next 50 years, and it is a key economic driver for the state's growth and development. Good information about the quality and quantity of Minnesota's lakes, rivers, streams, and groundwater is critical to ensure clean water for recreation, fish and wildlife habitat, drinking, and economic vitality. The Clean Water Fund is one of the primary sources of funding for water quality. The fund was established under Article XI, Section 15 of the Minnesota Constitution.

The Clean Water Fund is treated as a new initiative each biennium however; the Clean Water Council and the executive branch agencies agree that we need to fund long-term programs to address water quality problems. The Clean Water Fund supports about 72 FTEs within DNR working on data gathering and analysis, technical support for project implementation, and tools to help local partners target water quality improvement efforts. DNR partners with Minnesota's water agencies and local governments to fix and prevent water pollution problems and prevent groundwater over-use.

The intended results are to prevent waters from becoming impaired, to restore waters that are impaired, and to protect long-term water supplies from over use and contamination. The ultimate goal is that Minnesotans can enjoy swimming and fishing without adverse health effects. The Clean Water Fund performance report describes the efforts that State Agencies are using to improve water quality and the performance measures. The DNR supports statewide watershed assessment with flow monitoring, water level monitoring, biological surveys, and analysis of fish contaminants.

Proposal:

This proposal is part of a long term, collaborative effort that will lead to cleaner water through targeted implementation projects and programs. The foundation of the effort is comprehensive assessments of water pollution and supply problems within the state's 81 major surface watersheds and within the state's myriad groundwater sources (aquifers) and prioritized strategies to address these problems.

Minnesota's water agencies are working with local partners to check water quality and aquifer levels, and develop and implement strategies to protect and restore watersheds and groundwater. Specific parts of DNR's proposal include:

- collecting and analyzing watershed-based data in rivers, streams, and lakes;
- completing county geologic atlases to define and characterize the state's aquifers;
- aquifer level testing and modeling;
- implementing groundwater management areas;

- helping local partners plan for and implement water quality strategies;
- maintaining and updating water data;
- monitoring forest harvest; stewardship planning on private forests;
- drainage hydrology and modeling; and
- integrating data with other agencies.

IT Related Proposals:

NA

Results:

This proposal will provide funding for completion of watershed assessments and geologic atlases. Collectively, the agencies and partners are on track to complete the statewide assessment of all 81 major watersheds by 2017 (Figure 1).

Figure 1 Progress completing watershed assessments.

The DNR in partnership with the Minnesota Geological Survey is completing geologic atlases throughout the state. Atlases provide critical information for local water supply planning and water quality protection (Figure 2).

Figure 2 Statewide progress completing County Geologic Atlases.

The DNR's aquifer monitoring efforts include partnerships with other state agencies, Soil and Water Conservation Districts, and municipal water suppliers. We have 720 actively used monitoring wells and we are adding about 50 new monitoring sites per year, with a long term goal of about 7,000 wells throughout the state. We analyze water level trends in aquifers where there are at least 20 years of data, currently only 296 sites have reached 20 years of record (Figure 3).

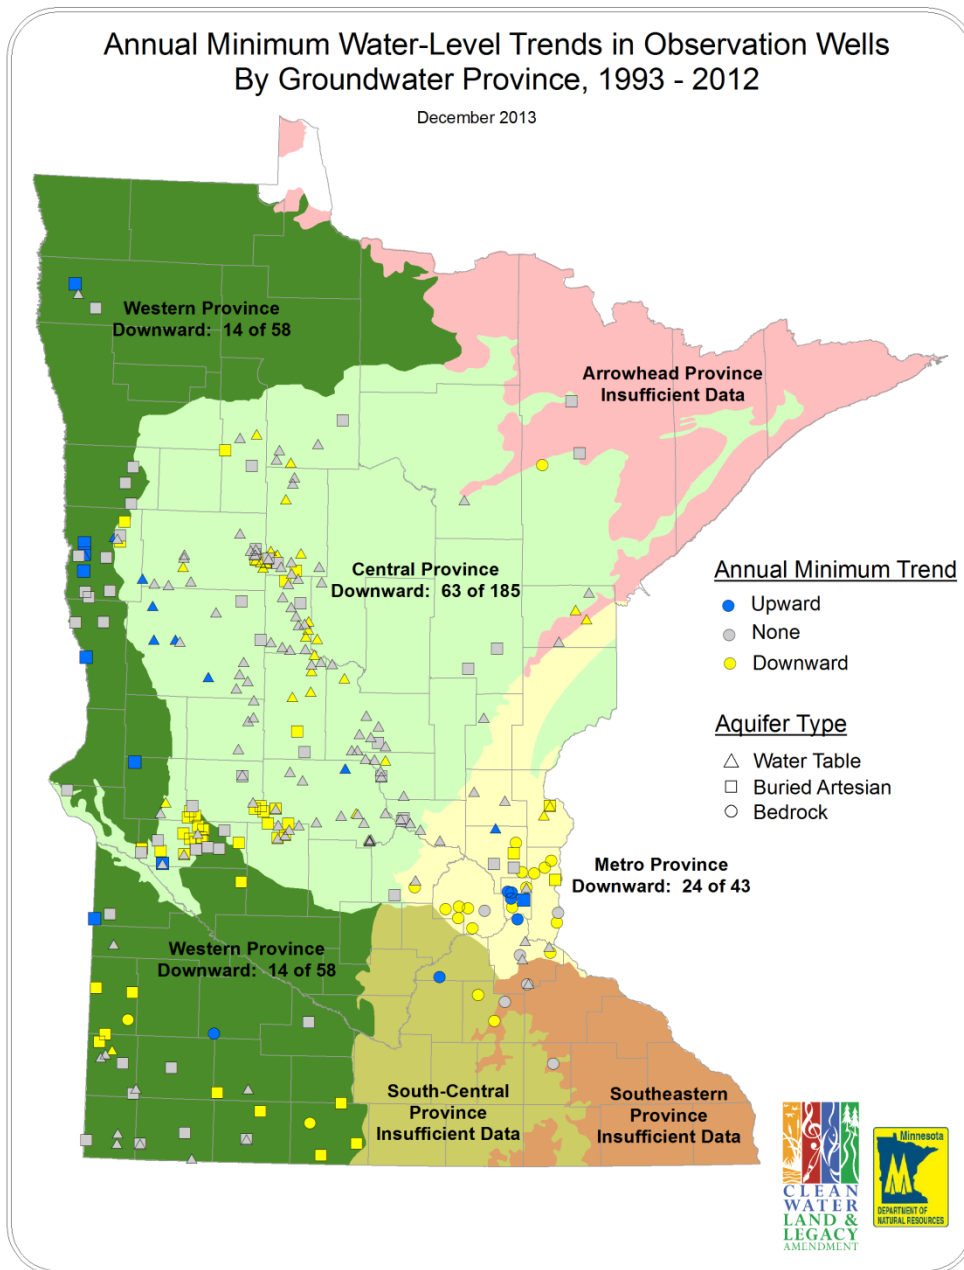

Figure 3 Statewide map showing water level trends for aquifers with monitoring data with at least 20 years of data.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item Title: Investments in Forest Management

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	2,000	2,000	2,000	2,000
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact =	2,000	2,000	2,000	2,000
FTEs	9.5	9.5	9.5	9.5

Recommendation:

The Governor recommends \$2 million in both FY 2016 and FY 2017 for investments in state forest lands to expand programs and initiate new activities in three primary areas: state forest land management, forest health, and data management and technology. Together, these targeted investments will improve the health and resiliency of Minnesota's forests, increasing the economic, social, and environmental benefits derived from this important resource. This proposal will increase the Division of Forestry's \$23.9 million annual general-fund base budget by 8 percent in FY2016 and FY2017.

Rationale/Background:

These activities are undertaken to meet the Department of Natural Resources' (DNR) land management goals, invest in school trust lands to maximize revenue, treat stands on Consolidated Conservation lands to benefit county budgets, and fulfill statutory requirements. Funding and FTEs in this proposal move forward on recommendations from the 2014 Office of the Legislative Auditor DNR Forest Management Evaluation Report. The report specifically recommends that the legislature reassess how the DNR's forest management activities are funded. The report concluded that the DNR fulfills its responsibilities to manage state forest land sustainably and for multiple uses. Consistent funding, therefore, would help the DNR maintain diverse and productive forests on state lands.

State Forest Land Management and Infrastructure

Approximately 40,000 acres per year of state forest lands are managed through commercial timber harvests. Management activities such as inventorying and stand treatments help assure that our state-administered forests are healthy, productive, and resilient. Immediate funding shortfalls predict a major decrease in these activities. This investment would both increase stand treatments (e.g., pre-commercial thinning) to improve forest vigor and increase inventory work that would return us to a 20-year inventory cycle, which is needed to implement the most effective forest management strategies for healthy and diverse forests.

This investment would also serve to meet essential road maintenance needs (e.g., grading, culvert installation, spot graveling, and emergency repair activities). These efforts will keep roads open and safe on our 2,340-mile state forest road system, which also includes 46 bridges and more than 3,000 culverts statewide.

Forest Health Protection

As new invasive forest pests and plants are introduced into Minnesota and existing infestations spread, the potential threat to long-term rural and community forest sustainability grows. Current staffing and funding levels cannot address existing infestations, let alone the expanding populations of emerald ash borer (EAB), gypsy moth, and invasive plants. For example, Minnesota has nearly 1 billion ash trees susceptible to EAB. New to Minnesota, EAB has cost other states millions of dollars to combat. Effective response to invasive pests and plants hinges on our ability to quickly detect, evaluate, and develop management strategies for outbreaks and to educate land managers, community leaders, and the public on how to prevent the movement of and manage terrestrial invasive species. At the same time, public funding to manage terrestrial invasive species has been cut by nearly 75 percent over the last seven years.

Technology to Improve Data Management

Many of the technology systems used to support forest management and tracking are outdated and in need of significant updates, as indicated in the 2014 Office of the Legislative Auditor report. To best support healthy, reliable future forests, we need to conduct a business analysis of our technology systems and create a plan for effective and cost-efficient technology solutions. This plan will guide DNR forestry technology development and investments to ensure diverse and well-managed forests in Minnesota.

The DNR currently uses paper forms and mail to deliver, receive, and process registration for 350 loggers each year. Various notifications are routinely mailed to loggers for permit signatures, payments, expiration dates, and extensions. These could be done more efficiently and cost effectively via a web-based logger registration system. Improvements are also needed to outdated software for managing firewood vendors and new software is need for terrestrial invasive species activity management and accomplishments.

Proposal:

State Forest Land Management and Infrastructure (\$1,300/\$1,300, 6.5 FTEs)

- Increase management treatments in forested stands by 2,000 acres annually.
- Inventory an additional 50,000 acres of state forest land annually.
- Provide safe state forest roads and bridges and protect state forest infrastructure investments, including repairing road damage, replacing culverts, and managing roadsides.
- Improve forest site-level guideline monitoring and associated data collection.

Forest Health Protection (\$400/\$400, 2FTEs)

- Increase capacity to respond to and manage forest health threats; increase forest health monitoring, stand evaluation, and technology transfer to minimize terrestrial invasive species effects.
- Increase survey and treatment of terrestrial invasive plants on state forest lands.
- Increase public awareness of healthy forests and engagement in preventing the spread of terrestrial invasive species through the PlayCleanGo Program.

Technology to Improve Data Management (\$300/\$300, 1 FTE)

- Create a web-based logger registration and notification system.
- Improve forest management database systems and plan future technology needs.

IT Related Proposals:

MNIT@DNR resources are needed to design and develop infrastructure and software for the logger registration system and provide input on a forestry technology systems plan. Ongoing maintenance and further software IT work is anticipated.

Results:

<i>Measure</i>	<i>Name of Measure</i>	<i>FY10-13</i>	<i>FY14</i>	<i>FY17</i>
Quantity	Acres of stand treatments	250	250	2,000
Quantity	Acres of forest land inventoried	75,000	100,000	150,000
Quantity	Miles of state forest road maintenance*	2,500	2,500	3,750
Quantity	Number of culverts replaced on state forest roads	20	20	30
Quantity	Number of harvest sites monitored and evaluated for sustainable forest management methods	N/A	N/A	100
Result	Minnesota residents, recreationists, and businesses engaged in prevention actions through PlayCleanGo campaign			
Result	FORIST system basic advancement and future technology needs identified			

*State forest road system = 2,340 miles. To ensure safety, roads might be graded and/or repaired multiple times each year dependent on road and weather conditions. Thus, miles maintained are greater than the miles in the system.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Sustainable Funding for the Minnesota Forest Resources Council (MFRC)

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	200	200	200	200
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	200	200	200	200
FTEs	1	1	1	1

Recommendation:

The Governor recommends \$200,000 in general funds annually for the Minnesota Forest Resources Council (MFRC). This funding allows MFRC to continue to operate, fulfill its core statutory mandates, and leverage over \$500,000 per year in nongeneral-fund sources for partner organizations including the Department of Natural Resources (DNR). This change constitutes a 34 percent increase for the MFRC.

Rationale/Background:

The MFRC has been broadly recognized since 1995 as a preeminent authority/clearinghouse on forestry-related issues in the state. The MFRC's value as a collaborative, consensus-based entity that advises the governor, legislature, and public agencies on sustainable forest policies and practices was reaffirmed by the legislature in 2014 when it streamlined and updated the Sustainable Forest Resources Act (Minnesota Statutes, chapter 89A) and extended the council's responsibilities from 2017 to 2021. The Sustainable Forest Resources Act requires the MFRC to maintain policy, site-level, and landscape programs, which it has done since the late 1990s. Sustainable funding levels are required to assure the MFRC's ability to meet statutory requirements through 2021.

The MFRC's FY2015 annual general-fund appropriation is \$200,000 lower than in 2009. Reductions occurred from 2009 through 2012 and in total, represent a 25.6 percent annual decrease from \$780,000 to \$580,000 in FY2015. The core statutory mandates and program demands have not changed. In addition, the executive branch and the legislature often task the council with special projects without providing additional funding. Coupled with the loss of funding, salary and fringe increases for council staff along with inflation have impacted MFRC's budget to the point where its operations will not be sustainable at current funding levels in FY2016.

To address these budget reductions, the MFRC has reduced essential staff, eliminated general-fund contributions to partner organizations, and reduced contracting, numbers of in-person meetings, travel, and training. More cost-saving measures are not possible without significantly affecting the MFRC's overall performance and continuing to compromise its ability to fulfill its core statutory mandates.

Since 2010, MFRC staff members have been the main authors of \$2.7 million in federal, private, and nongeneral-fund state grants focused on sustainable forest management and protection, with the DNR as the main grant recipient. This proposal would provide the MFRC with the ability to leverage future nongeneral-fund grants at a similar or enhanced rate (\$0.5+ million per year). The proposal would also help DNR maintain dual certification under the Sustainable Forestry Initiative (SFI) and Forest Stewardship Council (FSC) programs and result in a 50 percent increase in the rate at which MFRC landscape plans are updated (these plans include 4 million-acre to 7 million-acre landscape areas and provide a context for federal, state, county, and private operational forest management plans).

Proposal:

This initiative provides increased funding to an existing program. The initiative assures that the MFRC will have an adequate general-fund budget to operate over the next four years to:

1. Continue to advise the governor, legislature, and federal, state, county, and local agencies on sustainable forest policies and practices. Particular focus will be placed on addressing existing and emerging threats to forest health and implementing recommendations to the DNR commissioner, other state agencies, the governor, and the legislature that will enhance the primary forest products industry's global competitiveness following the completion of those recommendations in December 2014.

2. Maintain and enhance forest management guidelines that are used by public and private forest ownerships statewide and play a major role in DNR's compliance with dual certification requirements under the SFI and FSC programs. Conduct effectiveness evaluations to identify efficient guideline practices and application techniques.
3. Update three forest landscape plans (1.5 times the rate of previous plan updates).
4. Leverage \$0.5+ million per year of federal, nongeneral-fund state, and private grant dollars for partner organizations (including the DNR) to promote sustainable forest management and protection statewide.

IT Related Proposals:

Results:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY 10-15</i>	<i>FY 16-19</i>
Dollars	Annual nongeneral-fund grants (1)	\$0.5 million	\$0.5+ million
Quality	Legislative Auditor's Forest Management report (2)	p. 47-54	Help DNR maintain dual certification
Quantity	# Forest landscape plans updated per year (3)	0.50	0.75

- (1) From FY2016-19, MFRC staff will be the main authors of \$2+ million of federal, nongeneral-fund state, and private grant dollars for partner organizations (including the DNR) to promote sustainable forest use and protection statewide and support attainment of the first three goals in the DNR's Conservation That Works.
- (2) Office of the Legislative Auditor, DNR Forest Management Evaluation Report, August 2014, Summary, p. ix:
"Independent, third-party forest management certification and use of [MFRC] best-practice guidelines also support management for multiple uses over the long term (pp. 40, 49)." Same report, p. 53: "Both SFI and FSC forest certification audits cite DNR's implementation of the council's site-level guidelines as evidence supporting their certification criteria and forest management objectives ... MFRC guidelines are compatible with and complement third-party certification. In addition to comments in the SFI and FSC audit reports, some DNR staff told us the state's implementation of the guidelines plays a major role in the department's compliance with certification requirements." (italics added)
- (3) From FY2016-19, three forest landscape plans will be updated, compared with two forest landscape plans that were updated from FY2012-15. No landscape plan updates were needed in FY2010-11.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Parks and Trails Operations and Maintenance

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	3,600	3,600	3,600	3,600
Revenues	0	0	0	0
Natural Resources Parks Revenue (2106) Fund				
Expenditures	1,000	1,300	1,300	1,300
Revenues	1,000	1,300	1,300	1,300
Net Fiscal Impact = (Expenditures – Revenues)	3,600	3,600	3,600	3,600
FTEs	30	32	32	32

Recommendation:

The Governor recommends \$3.6 million in FY 2016 and \$3.6 million in FY 2017 from the general fund to operate and maintain Minnesota's state parks and recreation areas as premier outdoor recreation destinations. In addition, the Governor recommends increasing State Park user fees to offset the costs of operating state parks in the Natural Resources Fund - State Parks Account. This request represents a 4 percent increase to the Parks and Trails Division. DNR has developed a system plan that will ensure that future investments focus on Minnesota's most important natural resources and highest-quality recreational opportunities.

Rationale/Background:

Over the past decade, funding to operate the parks has not kept pace with increased visitorship and the increased costs of serving them. Without new operating funds, camping and lodging will be closed at most parks for a significant portion of the year (loss of 40,000 camping and lodging nights), facilities (bathrooms, contact stations, visitor centers) will be closed, and more than 154,000 hours of staff time will be reduced. In addition, this reduction in operations will lead to a loss of \$3.8 million in revenue annually.

In order to manage increased costs over the past decade, DNR reduced services and increased user fees. They shortened camping seasons, started to co-manage parks, and reduced visitor services, such as cleaning and mowing. In addition, DNR increased some user fees, such as \$1/night on campsites and \$1/bundle on firewood. Recently implemented efficiencies, including staffing reductions, have stretched to the breaking point our capacity to manage Minnesota's system of state parks and recreation areas. The legislature has authorized a number of new units and facilities in recent years, including Lake Vermilion State Park, that requires staffing and support. Without additional funding, the quality of service and visitor experience will decline.

State parks and recreation areas support a healthy population and economy. Research shows that outdoor recreation in natural settings contributes to visitors' physical and mental health. Minnesota state parks and recreation areas represent 32 of the top 50 tourist attractions in Minnesota, making state parks a cornerstone of the tourism industry. In addition to meeting basic customer service and operational needs, Minnesota state parks and recreation areas also need to offer relevant services and amenities to attract the next generation of outdoor recreation enthusiasts. The new system plan will direct investments toward activities, facilities and lodging options that inspire people to get outdoors.

Proposal:

This proposal provides funding to:

- "Keep the doors open" to prevent additional reductions to park operations and guest services. The majority of these hours are for seasonal staff at the most used parks during the busiest times of the year. These staff will be maintaining facilities and providing guest services (e.g., cleaning bathrooms, providing campground security, staffing visitor centers).
- Address associated costs of operating a state park system such as facilities, fleet (e.g. trucks, tractors, watercraft), fuel, and supplies and equipment.
- Manage cultural and natural resources and offer outdoor programming that will maintain quality outdoor recreation experiences in Minnesota's 75 state parks and recreation areas.
- Work with outside partners to implement new revenue-producing concepts, which will further increase the Natural Resources funds available for operations and maintenance at parks.

In addition, this proposal would allow for an increase in annual vehicle permit fee to increase by \$5 from \$25 to \$30 and daily vehicle permit fees to increase by \$1 from \$5 to \$6 to generate an estimated \$1.3 million annually. These funds would offset increases in the State Parks Account. These fees have not increased in more than a decade.

IT Related Proposals:
Not applicable.

Results:

- **Quantity:** Sustain quality experiences for 8.7 million annual visitors and attract new, younger and more diverse visitors to mirror Minnesota’s changing demographics.
- **Quality:** Provide “unforgettable” experiences that result in high visitor satisfaction.
- **Result:** Minnesotans will be healthier, happier and more fit; Minnesota’s tourism economy will continue to thrive; more special places will be preserved; and more people will be connected to the outdoors.
- **What we will measure:** We will collect visitor satisfaction data, permit and camping sales data, number of visitors attending interpretive programs, number of acres managed and number of special species preserved.

The popularity of Minnesota state parks is on the rise, as illustrated by the increase in annual and daily permit sales, but funding for cleaning, mowing and other visitor services (as measured in operations hours funded) has declined since FY09.

Statutory Change(s):
MS85.055

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Water Recreation Account

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
Water Recreation Account				
Expenditures	1,900	3,100	3,100	3,100
Revenues	0	0	0	0
Net Fiscal Impact =	1,900	3,100	3,100	3,100
FTEs	5	9	9	9

Recommendation:

The Governor recommends an ongoing appropriation from the Water Recreation Account in the Natural Resources Fund of \$1.9 million in FY 2016 and \$3.1 million in FY 2017 to the Department of Natural Resources (DNR). This funding will help DNR continue to provide access to public waters with quality boat launching facilities. This change represents a 16% increase in expenditures from this account. This increased appropriation is possible through the Governor's gas tax proposal, which will result in approximately \$5.7 million additional annual revenue to the Water Recreation Account.

Rationale/Background:

The Water Recreation Account is funded primarily from registration and titling of boats and the unrefunded gas tax attributable to motorboat use. Without the gas tax proposal, the fund has a \$1.4 million gap between projected revenues and projected expenditures each year and a projected deficit beginning in FY 2016.

With over 2.5 million acres of rivers and lakes, Minnesota is renowned for its abundant water recreation opportunities. The state leads the nation in the number of registered boats per capita, with 809,000 registered boats in 2014. Boat registration rates have remained strong for a decade, but costs of managing water recreation programs now exceed revenue due to inflation and changing program demands.

The Water Recreation Account directly supports boaters, paddlers, anglers and riparian residents with facilities, services, and information.

- The Division of Parks and Trails manages over 1,500 public water access sites on Minnesota's lakes and rivers. Boating studies consistently show both watercraft length and motor sizes have increased and that demand for improved facilities, including longer launch ramps, boarding docks, restrooms and more parking are desired. The division also maintains 4,500 miles of state water trails on 32 designated rivers and Lake Superior; the largest state water trail system in the nation. Channel maintenance and basic maintenance of rest areas, campsites, and portages has been limited while interest and demand in paddling has increased.

Inflationary impacts over time have reduced ability of the department to meet the needs of the program.

Proposal:

The recommended increased revenue from the gas tax will correct a \$1.4 million gap between revenues and expenditures and will allow increased funding for renewal of existing boat access sites that are in poor condition and do not meet current standards or best management practices.

Funds will be used to:

- Support operations and maintenance of the water recreation system.
- Capture federal Dingell-Johnson Sport Fish Restoration Act funds used to acquire, develop and maintain the system of public boating accesses, safe harbors and state water trails.
- Increase boating access site rehabilitation including:
 - Improve degraded boat ramps, parking lots and access roads.
 - Implementation of best management practices to minimize the effects of storm water runoff and erosion, to buffer shoreline areas, and to restore native vegetation at boating access facilities. This will enhance water quality.
 - Upgrading facilities to American with Disabilities Act (ADA) design standards.
- Prevent the spread of aquatic invasive species by adding boat clean-and-drain areas to public boat access sites.

IT Related Proposals:

NA

Results:

- A thriving water recreation-based economy.
- Healthier lakes and cleaner water.
- Satisfied recreational boaters.
- Public trust that government will take care of infrastructure and provide access to public waters is maintained.
- Key measure:

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>CY 2013</i>	<i>Goal</i>
Access	Improve Boat Access and Water Trail Facilities	10-30/year	30-50/ year

Water Rec Account Projection without New Gas Tax

Water Rec Account Actual FY2007-13, Projected FY2014-17

Statutory Change(s):

Not applicable.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Snowmobile Operations and Maintenance

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Natural Resources Fund (2101)				
Expenditures	225	225	0	0
Revenues				
Net Fiscal Impact = (Expenditures – Revenues)	225	225	0	0
FTEs	2	2	0	0

Recommendation:

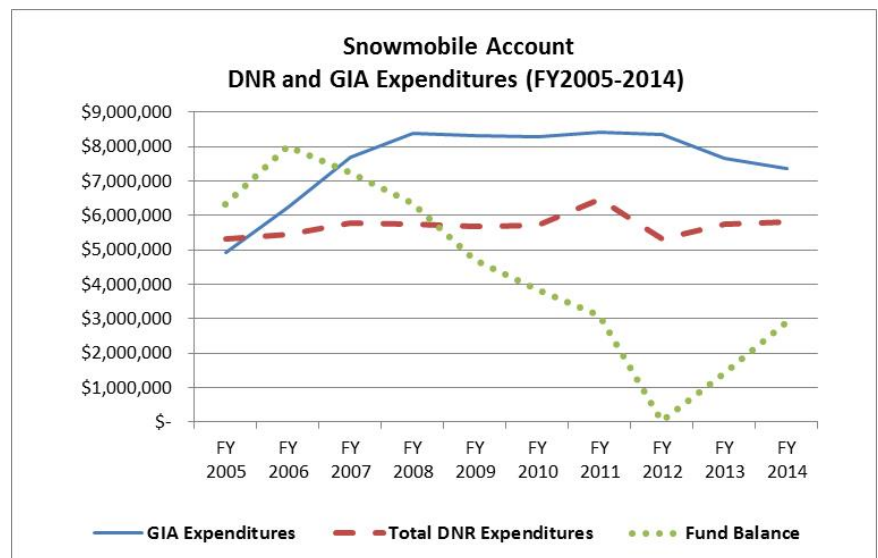

The Governor recommends an appropriation increase of \$225,000 in FY 2016 and FY 2017 for the snowmobile account within the Natural Resources Fund. This increase will go to the DNR Division of Parks and Trails to help sustain a high-quality snowmobile trail system in Minnesota, and prevent service reductions in state trail grooming and maintenance. The DNR will continue to partner with the Minnesota United Snowmobilers Association (MnUSA) to seek long-term funding solutions for the snowmobile account.

Rationale/Background:

The snowmobile account has experienced challenges in recent years due to a structural deficit and a low-snow winter in FY 2012. Both the DNR and the Grant-in-aid (GIA) program need funds to keep up with the rising costs of fleet, fuel, grooming and trail maintenance.

DNR is currently working with MnUSA to discuss long-term funding needs and potential ways to increase revenue. In the meantime, this proposal provides immediate relief for a DNR funding gap in FY 2016 and FY 2017.

Minnesota's 22,000 miles of snowmobile trails are an essential part of the state's quality of life, tourism, and economic development. More than 21,000 miles of the system are maintained by local snowmobile club volunteers supported by GIA funding. DNR manages the GIA program, as well as core state snowmobile trails.

The last fee increase occurred in 2006. Because fee revenues have remained flat and grooming and maintenance costs are increasing, DNR is not able to maintain trails at the levels users expect and best practices suggest. Snowmobile clubs around the state are also experiencing similar pressures related to fleet and grooming. DNR has already taken steps to become as efficient as possible with snowmobile operations, following a decade of essentially flat funding. We regularly examine staffing, the aging groomer fleet, and approaches to trail grooming and maintenance. Without this appropriation increase, DNR will have to reduce services in trail grooming and maintenance; this will diminish trail quality and likely affect snowmobile tourism, including local businesses that rely on snowmobilers during the winter season.

Proposal:

This proposal increases the DNR appropriation by \$225,000 each year to allow the DNR to complete trail management activities necessary to sustain high-quality snowmobile trails. This funding will be directed toward core operations related to labor, fleet and grooming costs. This is one-time funding, which 1) continues the partnership between the DNR and MnUSA to manage and maintain a high-quality snowmobile trail system in Minnesota and 2) provides an interim step to shore up basic snowmobile operations while we work together to address future funding needs.

IT Related Proposals:

Not applicable.

Results:

- Maintain Minnesota's outstanding system of snowmobile trails so that they contribute to the state's cultural and economic vitality.
- Sustain work with the GIA snowmobile clubs and have the resources necessary to maintain and groom state trails to a safe and enjoyable standard.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY2010</i>	<i>FY2014</i>
Quantity	Miles of Snowmobile Trails Groomed and Maintained (GIA and DNR).	22,023* miles	22,112* miles

*Total miles fluctuate slightly each year due to re-routing of some GIA trails.

FTEs	28	29	0	0

Recommendation:

The Governor recommends 40 percent of the Parks and Trails Legacy Fund each fiscal year (approximately \$17.237M for FY16 and \$18.067M for FY17) for the Department of Natural Resources (DNR) to advance goals from the 25-year Parks and Trails Legacy Plan within Minnesota state parks and trails. The focus of the work includes connecting people to the outdoors, acquiring land and creating opportunities, taking care of what we have, and coordinating with partners.

In FY14-15, the DNR was allocated 40 percent of the Legacy Fund (\$16.821M in FY14 and \$16.953M in FY15). FTEs will remain at the same level as FY14-15 biennium.

Rationale/Background:

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for improving parks and trails statewide. The DNR uses the Legacy Fund to help establish a 21st century state park and trail system that attracts future generations to experience the outdoors, while supporting the economic vitality of surrounding communities and ensuring the protection of the state's unique resources.

The DNR, the Metropolitan Council, and greater Minnesota are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. The DNR continues to support a percentage distribution of "40-40-20," where 40 percent is allocated to the DNR, 40 percent to the Metropolitan Council, and 20 percent to greater Minnesota. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and has been recommended for three biennia. It is supported by the three implementing agencies and Minnesota's Legacy Advisory Committee, and remains the best approach for allocating the Parks and Trails Legacy Fund.

Proposal:

The DNR will continue to advance the four main goals associated with the 25-year Parks and Trails Legacy Plan:

- **Connect People to the Outdoors.** We continue to promote and provide innovative programs and special events that educate, interpret and build outdoor stewardship skills. For example, the I Can! series reaches out to young families and new park and trail users to teach camping, climbing, archery and more. Each year, we reach 300,000 participants through interpretive programs and 2,000 visitors through skill-building programs in camping, climbing and paddling.
- **Acquire Land, Create Opportunities.** We will pursue high-priority acquisitions that provide important connections and/or preserve priority important natural and cultural resources. New development and rehabilitation projects create new recreation opportunities with potential to increase state park and trail use.
- **Take Care of What We Have.** We will ensure high-quality outdoor recreational experiences through infrastructure renewal and increased accessibility. This will include, for example, new and enhanced campgrounds, trail bridges, and energy efficiency projects. We also manage and restore natural landscapes within the state park and trail system.
- **Coordinate with Partners.** While agencies and organizations can do a great deal of Legacy work on their own, ultimately we are striving to provide a seamless system of parks and trails in Minnesota. Coordination and cooperation are needed to do everything from providing information to park and trail users to better connecting the statewide, metro and greater Minnesota parks and trails. The DNR will continue to coordinate with implementing agencies and seek guidance from the Legacy Advisory Committee.

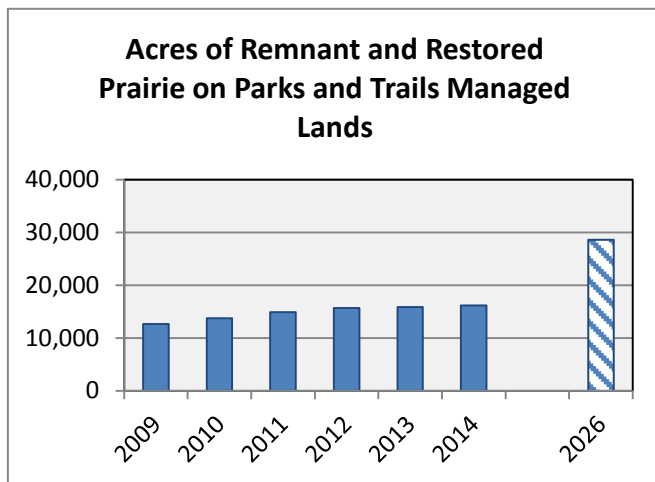

IT Related Proposals:

NA

Results:

In keeping with the strategic directions set forth in the Parks and Trails Legacy Plan, the DNR has expanded and improved outdoor recreation opportunities across the state. Key indicators of success include:

- **More people are getting outdoors.** State park permit sales, overnight stays and program participation have all increased significantly since 2009. Overall attendance at interpretive programs has increased 37 percent since 2009, and Legacy-funded staff led the programs for half of those participants in 2013.
- **New opportunities and acquisitions exist at Minnesota state parks and trails.** Over the past five years, Legacy-funded acquisitions have increased the total acres of parkland and the total miles of state trails. Legacy funding has also made a number of important development projects possible. For example, since 2009 the DNR has:
 - Improved accessibility at 12 state parks and trails.
 - Constructed a trail center and a new visitor center (leveraged with bonding).
 - Built camper cabins in two state parks.
 - Upgraded electrical service at 51 campsites and added 50 amp service in 106 campsites at four state parks.
 - Built a new 6 mile state park bike trail.
 - Constructed seven yurts in three state parks.
 - Constructed two RV sanitation stations.
 - Installed 14 renewable energy systems.
 - Replaced picnic tables and added accessible fire rings to 75 recreation units (includes forest recreation areas).
 - Converted two historic buildings into lodging.
- **Native landscapes and aging structures have been restored.** Since the initiation of Legacy funding, the pace of native plant restoration at state parks and trails has increased 59 percent, prescribed burning has increased 34 percent and control of invasive plants has increased by more than 90 percent. In addition, Legacy funds have been used to make improvements to our aging infrastructure and to reinvigorate visitor services. More than a third of the 300 bridges on state trails are over 100 years old, and we've used Legacy funding to repair or replace 43 of them since 2009.

Statutory Change(s):

NA

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Parks and Trails Legacy – Greater Minnesota

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
Parks and Trails Legacy Fund				
Expenditures	\$8,618	\$9,033	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	\$8,618	\$9,033	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends 20 percent of the Parks and Trails Legacy Fund each fiscal year (approximately \$8.618M for FY16 and \$9.033M for FY17) for a Parks and Trails Legacy Grant Program for greater Minnesota. This funding will provide grants to local governments to connect people to the outdoors, help create new parks and trails, and maintain existing ones.

A portion of the total appropriation may be used for administering the grants, including up to 4.5 percent for the Greater Minnesota Regional Park and Trail Commission (GMRP&TC) to maintain an Executive Director and necessary support functions, and up to 2.5 percent for the Department of Natural Resources (DNR) to manage the grants according to standards consistent with the Minnesota Office of Grants Management. In FY14-15, DNR was allocated 20 percent of the Parks and Trails Legacy Fund (\$8.410 M in FY14 and \$8.477M in FY15) for a competitive grant program and legislatively designated grants for greater Minnesota. In FY16-17, GMRP&TC will provide leadership for the grant program, while DNR will continue to provide contract management services.

Rationale/Background:

The Clean Water, Land, and Legacy Amendment created the Parks and Trails Fund, which is an important source of funding for parks and trails statewide.

The DNR, GMRP&TC and the Metropolitan Council are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. The implementing agencies continue to support a percentage distribution of “40-40-20,” where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent for GMRP&TC, as well as approximately 1 percent allocated “off the top” for coordination. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and has been recommended for three biennia. It is supported by the three implementing agencies and Minnesota’s Legacy Advisory Committee, and remains the best approach for allocating the Parks and Trails Legacy Fund.

The 2013 Legislature established the GMRP&TC to advance system planning in greater Minnesota and to provide recommendations to the legislature for grants funded by the Parks and Trails Legacy Fund. The scope of this work is for parks and trails of regional significance in counties and cities outside the seven-county metropolitan area (Minnesota Statutes, 85.536).

This grant program will help create a seamless system of outdoor recreation across the state. It plays a critical role for enhancing outdoor recreation participation in greater Minnesota, conserving important natural features, and contributing to local economic benefits around the state.

Proposal:

- This proposal is a change to an existing program.
 - To date, the DNR has led and managed the “Parks and Trails Legacy Grant Program” for greater Minnesota.
 - FY14-15 was a period of transition: the commission was beginning its work and creating system plans, while DNR coordinated with the commission and continued to manage the grant program.
 - In FY16-17, the commission will formally lead the grant program by guiding the planning and grant selection for greater Minnesota based on the results of its public engagement process in six districts across the state.
 - The commission will provide recommendations to the legislature for greater Minnesota parks and trails grants.
 - The DNR will continue to work closely with the commission and provide contract management for funded projects, as well as technical assistance to grant applicants and recipients.

- This funding will directly provide for a competitive grant program that will help achieve the goals of the 25-year Parks and Trails Legacy Plan, including connecting people to the outdoors, acquiring land and creating opportunities, taking care of what we have, and improving coordination across outdoor recreation providers.

IT Related Proposals:

NA

Results:

This program will provide grants to local governments to create and maintain outdoor recreation opportunities of regional or statewide significance in greater Minnesota. Performance measures include:

- the number and type of grants;
- dollars awarded;
- results achieved (e.g., acres acquired, parks and trails developed, and satisfaction of park and trail users); and
- economic trends and benefits resulting from local parks and trails.

Since 2010, greater Minnesota Legacy funds have been used to acquire more than 1,000 acres of parkland. These important acquisitions, most in rapidly growing areas, provide the land for new recreational opportunities.

Results and performance measures under the grant program can vary based on the types of projects submitted and selected for funding. This makes it difficult to set targets for acres acquired, trails miles developed, etc. For example, land acquisition value per acre is significantly different based on the location of the property and the highest use of the property. The same amount of acquisition dollars allocated each year may result in a wide variance in the actual acres acquired.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>FY10/11</i>	<i>FY12/13</i>	<i>FY14/15</i>	<i>Estimated FY16/17</i>
Quantity	Number of grants	38	41	12	20-40
Results	Regional Park Acres Acquired	202	608	500	300-500
Results	Trails Miles Developed and/or Rehabilitated	117	171	54	100-200

Currently grant outcomes are measured on the DNR's website at:

[Grant Outcomes \(http://www.dnr.state.mn.us/grants/outcomes/index.html\)](http://www.dnr.state.mn.us/grants/outcomes/index.html).

The commission will continue to report grant outcomes through the DNR website and/or the Legislative Coordinating Committee (LCC) Legacy website.

Statutory Change(s):

NA

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Parks and Trails Legacy – Coordination Among Partners

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
Park and Trail Legacy Funds				
Expenditures	536	555	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	536	555	0	0
FTEs	1	1	0	0

Recommendation:

The Governor recommends that \$536,000 for FY16 and \$555,000 for FY17 (slightly more than 1 percent) are allocated “off the top” of the Parks and Trails Legacy Fund to advance a coordinated approach for:

- Integrated research;
- Development and management of web-based systems;
- Support for the Parks and Trails Legacy Advisory Committee;
- Restoration evaluation; and
- Other priority coordination needs such as youth involvement and connecting underrepresented audiences.

The products and benefits of this change item are shared among the Department of Natural Resources, Greater Minnesota Regional Parks and Trails Commission, and the Metropolitan Council. The responsibility for coordinating, planning and communicating are also shared to ensure that these benefits meet the needs of the three entities.

Through a coordinated approach, we can create a seamless and integrated system of parks and trails, a high priority for citizens participating in the Legacy planning process. Park and trail users want an integrated information source and integrated system of regional parks and trails so that they can quickly and easily find information and opportunities that provide desired experiences. Integrated approaches to research and evaluation are also needed.

Rationale/Background:

The three implementing agencies are working together to advance a more coordinated approach to achieve outcomes for the Parks and Trails Legacy Fund. All three continue to support a percentage distribution of “40-40-20,” where 40 percent is allocated to the DNR, 40 percent to Metropolitan Council, and 20 percent to Greater Minnesota. This percentage distribution was agreed to by a 2011 Parks and Trails Legacy Funding Work Group, and was recommended for three biennia.

The state and regional parks and trails system is made up of different providers across the state funded by numerous sources. This complex network poses a challenge to state and regional providers interested in meaningful coordination, as well as end users who seek quality, connected and accessible opportunities.

Coordination is essential to achieve the vision laid out in the Parks and Trails Legacy Plan and to ensure that the principles the public developed for the use of Legacy Funds are achieved. Effective coordination results in wise use of funds and may result in cost savings.

A major goal for all outdoor recreation providers is to increase the per capita participation in nature-based outdoor recreation. The primary driving factor behind this trend is a decline in involvement among young adults and their children, for older adults, urban individuals and communities of color.

Coordinated research information and evaluation should help in our joint efforts to increase outdoor recreation participation.

Proposal:

This request builds on previous appropriations from the Park and Trail Legacy Fund related to coordination and research.

- *Research* – Standardized coordinated research is needed across the three systems in order to understand who is using the state and regional park and trail system, where they are coming from, and their satisfaction with facilities and programs. Currently, the three systems use different methodologies to answer different questions. Information about use and satisfaction

that can be compared across systems is needed to make decisions about future investments. Research is critical to ensuring Minnesotans' expectations for use of the Park and Trail Legacy Fund are being met.

- *Web-based systems* – One of the goals in the *Parks and Trails Legacy Plan*, under the strategic direction of “*Coordinate Among Partners*” is enhanced, integrated and accessible information for park and trail users. Partners have already been coordinating on the development of an integrated web site that gives users the ability to do trip planning, create customized maps, use print-on-demand services and interface with smartphones. Accessing information about desired park and trail experiences through an integrated web site will be a service for park and trail users. This proposal will build on that effort.
- *Support for the Legacy Advisory Committee* - The mission of the Parks and Trails Legacy Advisory Committee (LAC) is to “*champion the 25 year Parks and Trails Legacy Plan by providing recommendations to enhance promotion, coordination, and accountability throughout implementation of the plan.*” (<http://www.legacy.lleg.mn.ptlac>).
- The LAC was created as a part of the implementation of the 25-year *Parks and Trails Legacy Plan*. Committee members advise the convening sponsors (Greater Minnesota Regional Parks and Trails Commission, Metropolitan Council, and the Department of Natural Resources) on the implementation of the Legacy Plan. The committee is comprised of volunteers who travel from around the state. Reimbursement for travel expenses and support for their work makes participation possible for a diversity of Minnesotans.
- *Restoration evaluation* – Evaluation of natural resource restoration projects across all four Legacy Funds will determine progress towards achievement of restoration goals. A significant amount of Legacy Funds have been invested in restoration projects and an assessment of progress will guide future investments and assess achievement of restoration goals. This proposal will help achieve legislative mandates for restoration evaluation.
- *Other priority coordination needs such as joint marketing and youth involvement, and equity* - Other priority coordination needs such as joint marketing and youth involvement, and connecting racially and ethnically diverse audiences need a coordinated effort as well.

IT Related Proposals:

NA

Results:

- Improve performance for achieving the goals of the 25-year *Parks and Trails Legacy Plan*.
- Increase effectiveness and efficiency of Parks and Trails Legacy Funds.
- Specific results include:
 - Develop an integrated user-friendly website.
 - Develop and implement a standard survey tool and methodology for implementation across state and regional parks and trails.
 - Hold six Legacy Advisory Committee meetings per year with the completion of an annual work plan designed to monitor and evaluate and recommend how to implement the Parks and Trails Legacy Plan.
 - Complete restoration evaluations and an assessment of the acres of natural resource sites improved.
 - Increase engagement among youth and diverse audiences.

Statutory Change(s):

NA

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Fish and Wildlife Enhancement and Reinvestment Initiative

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Game and Fish Fund (2200)				
Expenditures	5,443	5,075	1,893	1,893
Revenues	3,145	2,926	645	645
Net Fiscal Impact = (Expenditures – Revenues)	2,298	2,149	1,248	1,248
FTEs	7	7	7	7

Recommendation:

The Governor recommends appropriating \$5.443 million in FY 2016 and \$5.075 million in FY 2017 of existing dollars from the game and fish fund to accelerate fish and wildlife populations, habitats, and facilities work that further enhances fishing, hunting, and other wildlife-related recreation. This initiative will also assure that the state fully captures our increased apportionment of federal excise taxes under the Wildlife Restoration Act (aka Pittman-Robertson), which have doubled in recent years.

Rationale/Background:

The Minnesota Constitution prescribes that hunting and fishing and the taking of game and fish shall be forever preserved and shall be managed by law and regulation for the public good (Article XIII, Sec. 12). The Department of Natural Resources (DNR) is the state agency with primary responsibility for this management. This initiative is addressing indicators of declines in populations of some key species and habitats and indicators of likely future declines in participation in fishing and hunting.

Hunting, fishing and wildlife watching generate over \$3 billion in retail expenditures in Minnesota each year. Fishing alone results in \$2.4 billion in annual retail expenditures in the state, generating over \$250 million in state and local general tax revenues. The game and fish fund, derived primarily from fishing and hunting license fees and federal excise taxes on fishing and hunting equipment, provides the fiscal foundation for protecting the state's strong hunting and fishing heritage and supporting fish and wildlife management. Currently, the fish and wildlife management function of the DNR is based largely on the game and fish fund and receives no general funds.

In recent years we have benefitted from a surge in federal excise taxes due to growing interests in recreational shooting, resulting in an increased state allocation of potential earnings. Minnesota's apportionment of wildlife restoration dollars has gone from about \$11 million in 2012 to \$23 million in 2014. To earn these federal dollars, we must first spend state dollars and then submit for a 75 percent reimbursement. Without this initiative, there is a high risk that Minnesota will turn back federal dollars, which has never happened in this state since the inception of the program in 1937.

Proposal:

This proposal addresses four areas critical to fish and wildlife conservation and Minnesota's hunting and fishing heritage: 1) Enhanced fisheries management and monitoring to help sustain Minnesota's water-based recreation, resources and economy; 2) Accelerated angler and hunter recruitment and retention through improved stakeholder delivery; 3) Improved fish and wildlife recreation through accelerated management of public hunting and fishing facilities and improved services to customers; and 4) Accelerated wildlife population and habitat monitoring and management.

1) Enhanced fisheries management and monitoring to help sustain Minnesota's water-based recreation, resources and economy (FTE = 6, FY16 \$725 / FY17 \$725 / FY18 \$775 / FY19 \$775)

This initiative will bolster existing fisheries habitat management, population assessment and management, and harvest monitoring programs which have experienced declines in capacity in recent years. The per capita rate of participation in fishing in Minnesota is second only to Alaska, and to a large extent, the character of Minnesota is defined by its lakes, rivers and quality of its fishing. Minnesota attracts more than 266,000 nonresident anglers and their families annually, driving an important tourism and local community economy, yet our ability to provide high quality angling experiences is declining.

Specifically, this initiative will enhance or accelerate the following fisheries program activities:

- Fish harvest: partially restore creel survey capacity beyond the large lakes.
- Fish habitat: enhance aquatic habitat planning and implementation; provide capacity for long-term monitoring of aquatic management areas and easements.
- Monitoring: enhance capacity for survey work on warm water rivers and streams, conduct long-term monitoring efforts (i.e. Sentinel Lakes).

2) Accelerating angler and hunter recruitment and retention through improved stakeholder delivery (FTE = 0, (FY16 \$165 / FY17 \$165 / FY18 \$65 / FY19 \$65 / PR Revenue (FY 16 \$74 / FY 17 \$74))

This initiative builds on the recently completed report by the Commissioner's Council on Hunting and Angling Recruitment and Retention. This report examines hunting and angling participation trends, the process of becoming a hunter and angler, and proposed actions that address declines in outdoor recreation participation. The council was composed of hunting, fishing, conservation and recreation organizations. During council meetings it became apparent that many organizations and their chapters would benefit from a broader, deeper, and more research-based understanding of what it takes to get youth and adults engaged in hunting and fishing. To that end, this initiative proposes an Angler/Hunter Recruitment and Retention Academy that would train key agency, non-government organizations, and leaders of angling and hunting organizations in best practices and most effective recruitment and retention methods, including how to create meaningful evaluations. In conjunction with training, recruitment and retention support materials will be produced.

The academy, among other things, will bring focus on how organizations can enhance their own recruitment and retention efforts or support the following council recommendations:

- Developing and supporting youth after school sporting clubs.
- Implementing angler/hunter marketing campaigns targeted at adults.
- Delivering "learn-to" fish and hunt skills programs & workshops for adults.
- Providing family-oriented hunting and fishing sampler events.
- Creating a web-based recruitment/retention clearinghouse.
- Promoting a reverse mentoring program.

3) Improved hunting and fishing and wildlife recreation through accelerated management of public hunting and fishing facilities and services to customers (FTE = 0 FY16 \$1,778 / FY17 \$1,615 / FY18 \$670 / FY19 \$670 / PR Revenue (FY16 \$1,232 / FY17 \$1,112 / FY18 \$419 / FY19 \$419))

This initiative provides for enhanced fishing, hunting and wildlife recreation experiences through improvement of facilities, access and customer service. There is a backlog of demand for maintenance and improvement of facilities on Wildlife Management Area (WMA) and Aquatic Management Area (AMA) public hunting and fishing lands. There is also an increasing demand for good information that is readily available through multiple media and platforms.

This initiative would accomplish the following:

- Improve and maintain WMA facilities and habitat to standards, including recreational access, facilities maintenance, and site cleanup.
- Protect state investments through completion of conservation easement baseline reports, regular monitoring of all easements, and assessment and development of management plans for Aquatic Management Areas.
- Complete comprehensive WMA/AMA system plans and complete ten year plans for two "major" WMA units in the state.
- Enhance and maintain the Wildlife and Aquatic Habitat Management Application (WAHMA) enterprise information system being built for capture, querying, planning and reporting on information related to WMA/AMA management and maintenance.

4) Accelerated wildlife population and habitat monitoring and management (FTE = 1, FY16 \$2,775 / FY17 \$2,570 / FY18 \$383 / FY19 \$383 / PR Revenue (FY16 \$1,839 / FY17 \$1,740 / FY18 \$226 / FY19 \$226))

This initiative accelerates wildlife population and habitat activities to benefit a wide range of prairie, forest, and open land species throughout Minnesota. Specifically it will provide resources to facilitate implementation of actions from the Governor's Pheasant Summit and will accelerate or enhance:

- Implementation of the Prairie Plan, including work with local technical teams and landowners and implementation of the Pheasant Summit Action Plan elements. Implementation of the Prairie Plan and actions from the Governor's Pheasant Summit will involve increased effectiveness of Local Technical Teams (LTTs), facilitating work with landowners, and improved data to inform management.
- Forest and brushland habitat management. DNR wildlife managers provide the primary source of expertise and dollars to specifically enhance forest habitats for wildlife and wildlife related recreation. The forested part of the state accounts for approximately 28% of the overall deer harvest and is the primary hunting area for 35% of all deer hunters. Minnesota's remaining moose population, ruffed grouse, and fisher and pine marten are all found only in this part of the state. Currently, there is a backlog of forest wildlife habitat enhancement projects.
- Data collection and analyses for wildlife populations and habitat relative to climate and land use trends; research impacts of environmental chemical and other contaminants on upland birds; conduct research on prairie chickens, spruce and sharp-tailed grouse, waterfowl, pheasants, furbearers, bear, wolf, squirrel, elk, deer, moose, shallow lakes, and WMA users.
- Population surveys for wolf, moose and deer. This initiative would provide for conducting a statewide wolf survey annually (previous schedule was every five years); refining moose population monitoring and estimation methodology; and recalibrating deer models on a more frequent basis. Wolf and deer requests are ongoing; moose is FY 2016-17 only.
- Collaboration, partnerships and customer service: improve coordination and collaboration with internal and external partners; provide technical assistance to other agencies and partners for doing aquatic habitat work; and improve customer information and assistance.

IT Related Proposals:

This initiative may result in MN.IT service requirements for an enterprise information system for WMA/AMA data and reporting needs. (Anticipated costs: FY16 \$285, FY17 \$285, FY18 \$100, \$FY19 \$100)

Results:

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Expanding Shooting Ranges

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Game and Fish (2200)				
Expenditures	500	500	500	500
Revenues	366	366	366	366
Net Fiscal Impact = (Expenditures – Revenues)	134	134	134	134
FTEs	1.5	1.5	1.5	1.5

Recommendation:

The Governor recommends \$500,000 in FY 2016 and \$500,000 from FY 2017 from the Game & Fish Fund to enhance shooting facilities for archery and to provide expanded range opportunities for the public. The range funding is necessary to satisfy a growing interest in recreational target archery, and to provide for expanded public shooting ranges for recreational target shooting. This initiative represents an increase in the base game and fish fund budget and will also help to capture Minnesota's full apportionment of federal Wildlife Restoration Act (Pittman-Robertson Act - PR) dollars deriving from federal excise taxes on arms and ammunition.

Rationale/Background:

As a result of the 2014 legislative session, the DNR is currently administering \$2.1 million in trap shooting range grants. No administrative funding was provided to manage these grants.

Youth and adult archery hunting licenses have increased significantly in recent years. The Department of Natural Resources (DNR) Archery in the Parks programming has been extremely popular as has the state's National Archery in the Schools Program (NASP). NASP is a collaborative undertaking between DNR and local schools to establish two-week archery units in nearly 400 Minnesota schools reaching approximately 180,000 annually. While this growth in archery has been taking place, some municipalities have been restricting shooting archery in backyards and on private property while others have been more open to embracing archery ranges and parks. Given the current popularity of archery, the bottom line is that people need a place to shoot and the demand far outpaces the supply of suitable shooting venues. Establishing, enhancing and rehabilitating ranges at state, regional, or city parks, local recreation centers, or local schools are perfect solutions to this problem.

In terms of demand for more general shooting opportunities, the number one shooting range request DNR gets from the public is for simple unstaffed ranges where they can go sight in a firearm or shoot recreationally with their kids. We need more sites like the range in Pillsbury State Forest, which are designated and designed to accommodate self-directed clay target, rifle and handgun shooting.

Proposal:

This initiative will enhance staff capacity and expertise to administer that program as well as to expand programs and assistance for other shooting sports in the state in response to increased demands for this type of recreation. This will be accomplished through amending the Minnesota Laws of 2014 appropriation to include authority to use up to 2.5 percent for administrative grants support (0.5 FTE) and by adding staff capacity (1 FTE) for technical and programmatic support to expand shooting programs and opportunities.

In addition, the initiative will establish, enhance, and rehabilitate target archery shooting facilities and, unstaffed, basic shooting ranges on suitable state or other public lands.

The results include increased shooting range grants and range development activities, increased public archery ranges and shooting opportunity, and more unstaffed ranges where citizens can safely shoot recreationally. This will create outcomes of increased access to recreational archer and recreational firearms target shooting opportunities and increased satisfaction of this segment of outdoor recreationists.

IT Related Proposals:

Not applicable.

Results:

If funded, this will be a new shooting sports program and position. No data exists at this time for the first 3 metrics below. There will be several archery range grants awarded and administered in FY 2015 (less than \$50,000 total).

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quantity	Estimated number of participants utilizing ranges /rehabilitated/enhanced/established through grants administered by Shooting Range Coordinator	N/A	N/A	N/A
Quantity	Number of public archery ranges /rehabilitated/enhanced/established	N/A	In Process	FY 15
Quantity	Improvements to unmanned basic firearms ranges established on State Forests or State Wildlife Management Areas ¹	N/A	1	2013-present

Statutory Change(s):

An amendment to Minnesota Session Laws Chapter 312 will be required to allow up to \$50,000 of previously appropriated funds to be used for administering the program. No other statutory changes are required.

Heritage Enhancement Account					
Expenditures	29	13	26	26	26
Net Fiscal Impact = (Expenditures – Revenues)	568	255	510	510	510
FTEs	5.5	2.5	4	4	4

Recommendation:

The Governor recommends \$568,000 in FY2015, \$255,000 in FY 2016 and \$510,000 in FY 2017 be appropriated to the Department of Natural Resources (DNR) to cover the increase in the employer paid portion of the State Patrol Retirement Plan. The FY 2015 amount also includes a one-time \$313,000 for a three percent pay increase in FY 2014 that will provide back-pay to employees of the Minnesota Law Enforcement Association (MLEA) bargaining unit.

Rationale/Background:

The 2013 Legislature approved adjustments to the State Patrol Retirement Plan (which includes Conservation Officers), increasing the employer paid contribution 1.5 percent on July 1, 2014 (FY 2015) and an additional 1.5 percent increase after June 30, 2016 (FY 2017). These increases have a fiscal impact of \$255,000 in FY 2015 and FY 2016 and a permanent impact of \$510,000 in FY 2017 and beyond. At the time these adjustments were made, the Legislature also provided supplemental funding for some, but not all, state agencies with staff in the State Patrol Retirement Plan to off-set the employer paid contribution increases. DNR was not provided supplemental funding to off-set these adjustments to the retirement plan. Minnesota Law Enforcement Association Settlement: As part of the contract settlement, MLEA members were awarded back-pay of three percent in FY 2014 totaling \$313,000.

Proposal:

The cumulative effect of the increased employer contribution rate has a direct impact in the number of full-time equivalents (FTEs) the agency has the capacity to carry. The impact is equivalent to 5.5 FTEs in FY 2015, 2.5 FTEs in FY 2016, and 4 FTEs in FY 2017 and beyond. Without the requested increase, vacant stations will negatively impact DNR's capacity to provide game and fish protection, recreational safety and enforcement, natural resource protection, and public safety, as well as to respond to increasing demands for enforcement of invasive species, water appropriation, and other natural resource protection laws.

Results:

Resource protection, public safety, youth safety education programs, and response times to calls for service will be maintained at current levels.

Statutory Change:

Not applicable.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Delivery of Natural Resources Law Enforcement

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019

Expenditures	57	87	114	114
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	1,004	1,523	2,009	2,009
FTEs	7.5	11	14	14

Recommendation:

The Governor recommends \$1.1 million for FY 2016 and \$1.7 million for FY 2017 be appropriated to the Department of Natural Resources (DNR) to deliver natural resource law enforcement services on a statewide basis by restoring positions and right-sizing staff to meet the current and evolving demands for natural resource protection in the state. This request is seven percent of the Division of Enforcement's overall budget and nine percent of the base funding used for this specific purpose.

Rationale/Background:

The role of the Division of Enforcement is to ensure that the natural resources of the state are protected. As new natural resource challenges emerge or existing natural resource issues evolve, resource managers, policymakers, and the public look to the division to ensure that our resources are protected and new laws and regulations are followed. Many of these new challenges are very different from traditional responsibilities of Conservation Officers of protecting hunting and fishing resources. And with the continuing expansion of hunting and fishing opportunities (e.g., crane season, teal season, August goose season, year-round fishing pressure, bow fishing, expanded spearing seasons), the demands on the division's Conservation Officer workforce far exceed the capacity of the workforce to meet these needs.

The division recently completed a strategic plan, which will guide their actions and investments over the next ten years. As part of their recent strategic planning process, the division examined staffing needs necessary to meet effective law enforcement services on a statewide basis. Stakeholder input into this process recommended working in partnership with both new and traditional stakeholder and user groups and partner agencies on voluntary compliance efforts as well as broadening natural resource law enforcement work to include work on emerging issues, such as aquatic invasive species, ground water management, and water quality protection. This initiative serves to address the demand for increased natural resource enforcement services.

Proposal:

Funding allocated under this proposal will fill field conservation officer vacancies. Filling those staffing vacancies will be an integral part of providing consistent natural resource law enforcement services on a statewide basis. In FY 2016 these funds will be used to increase staffing by hiring 7.5 conservation officers to fill a portion of these vacancies. In FY 2017 these funds will be used to hire an additional 3.5 conservation officers to fill the balance of the vacancies. The 2018-19 funds brings the number of new conservation officers up to 14, reducing the number of vacant field stations to approximately 10.

IT Related Proposals:

Not applicable.

Results:

Compliance rates, response to calls for service, numbers of public outreach contacts, by supporting a diverse conservation workforce, and reaching resource management objectives can be measured to evaluate if Division staffing is sufficient.

Statutory Change(s):

Not applicable.

Department of Natural Resources

Division: Enforcement

Change Item: Aviation Services Rightsizing

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	870	130	0	0
Game and Fish Fund				
Expenditures	1,330	220	0	0
Net Fiscal Impact = (Expenditures – Revenues)	2,200	350	0	0
FTEs	0	0	0	0

Recommendation:

The Governor recommends \$2.2 million in FY 2016 and \$350,000 in FY2017 be appropriated to the Department of Natural Resources (DNR) to restructure the DNR's aviation fleet.

Rationale/Background:

The Division of Enforcement has an aviation program that provides flight services to other DNR programs and tribal natural resource agencies and also to support public safety within the state. This work is performed at an hourly rate to reimburse expenses associated with operating the program. The hourly rate does not include a rate for replacement of aviation assets. The aviation unit primarily provides flight services related to wildlife survey and census work that ensure sustainable management of our natural resources. However, the aviation unit also provides for search and rescue to protect public safety and survey and patrol work to protect wetlands and other critical resources.

Over time, survey work has gravitated towards the use of rotary aircraft over traditional fixed-wing aircraft. The division's initial rotary fleet was given to DNR through a military surplus program, which included two operational rotary aircraft and two non-operational rotary aircraft to be used for parts. The maintenance schedule for the operational aircraft will require significant investment to keep them flying. The 'parts' aircraft have been stripped of all useable parts. DNR is currently working with our public safety partners (Minnesota State Patrol) on a "Better Government" project that will reduce the total number of helicopters required by the two agencies by sharing helicopter and other aviation resources and increasing program efficiencies for the two agencies.

Proposal:

In FY 2016, DNR will sell two aged rotary aircraft and two non-flying rotary aircraft used for parts and purchase one replacement aircraft that meets DNR's aviation needs. In FY 2017, DNR will replace an aged fixed-wing aircraft with amphibious floats with a new aircraft.

IT Proposals:

Not applicable.

Results:

Maintaining a safe, reliable aviation fleet with the appropriate size aircraft enables the DNR to accomplish missions safely and efficiently.

Statutory Change(s):

Not applicable.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Citizen Engagement in Natural Resources

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	500	500	500	500
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	500	500
FTEs	1	1	2	2

Recommendation:

The Governor recommends \$500,000 in FY 2016 and \$500,000 in FY 2017 to improve the operational capabilities of the Department of Natural Resources' (DNR) web-based programs so citizens can readily access information, products and services. The funding will be used to develop a modernized web platform and new digital content that will complement an enhanced social media presence. People will be able to more easily access a suite of DNR web-based products, services, natural resources information, and mobile applications within a secure environment.

Rationale/Background:

Technology and the advent of social media are changing the face of public-sector communication and service delivery. No longer bound by hours of services, mail or paper, customers expect easy online access and to be able to find the information they want, when they want it and in formats that meets their needs. They also want to communicate with us in modern, easy-to-use formats that allows for prompt response.

As one of the largest electronic information and license distribution government networks in the Midwest, DNR needs to be prepared to provide information and services that best meets our customers' needs within a data privacy and protection environment. The DNR is the state's trusted source for natural resources information as demonstrated by:

- The DNR's website gets more than 2 million visits annually.
- Approximately 1.5 million anglers and 500,000 hunters annually buy their licenses from electronic point-of-sale portals.
- DNR's website supports approximately 25,000 pages of information; more than 55 million hits in FY14.
- DNR's Parks and Trails Division make about 80,000 park reservations through its electronic reservation system.
- Minnesota Conservation Volunteer magazine, the DNR's primary publication, has more than 100,000 subscribers.
- DNR's Information Center handles approximately 200,000 email, telephone, and walk-in requests annually.
- There are more than 40,000 users of the DNR's social media channels, including Facebook and Twitter.

By expanding the DNR's use of web-based channels, mobile applications and social media, new and nontraditional outdoor users will be encouraged to explore outdoor activities on public parks, trails, forests, recreation areas and hunting and fishing areas.

The DNR website is built on old software and hardware that must be replaced. It poses security risks and, since the software is old, staff must spend time creating pages that would be easy to produce with modern software. When building the new website, agency and MN.IT staff will create pages that work well on mobile devices and will eliminate outdated and under utilized pages. This will require a lot of staff time, but the benefit will be refreshed content that better informs and engages citizens. The new website will also need additional staff positions to support it.

Proposal:

A new website provides lots of new opportunities to reach citizens and encourage them to enjoy the Minnesota outdoors. The initiative includes a budget for creating new mobile applications and web pages that allow citizens, when they plan their vacations, to see the beauty of our state parks and trails. DNR hopes to design mobile applications that make it easier for hunters, anglers, snowmobilers, and others to discover and enjoy state lands and other recreation opportunities.

Social media sites such as Facebook and Twitter present an important opportunity to communicate one-on-one with Minnesota citizens. While the DNR has been making use of these tools for several years, they believe they could do much more. Establishing a new position to oversee and expand these efforts will allow us to reach more citizens.

DNR web content has evolved with the growth in programs and technology. As a result, the web has become highly specialized and is difficult for customers to use -- even more difficult for DNR to manage. This proposal provides resources to refresh the content and to establish a framework for the governance of the vast amount of data available on our website.

A new website also will allow the DNR to better understand and deliver what our customers want. Citizens should be able to tell them what information and services they are interested in so that the DNR can provide them what they want. Better information on what people want will also help the department understand how to reach and engage citizens they currently don't serve. DNR envisions a website that not only allows DNR to engage citizens, but also for citizens to engage with the department in meaningful ways. This could include mobile information access, trail condition reporting, license wizard, park finder and My DNR User personalization.

To accomplish these goals, additional work needs to be done to DNR's website and IT infrastructure. Modernization of the website and its content management platform needs to occur first. This proposal includes:

- Modern Web Platform: design, build, and maintain modern web platform for DNR, workflow and information security, infrastructure management.
- Content Management: refresh high priority content, implement plain language, and develop maintenance procedures and policies for keeping the content current for customers.
- Modern Citizen Engagement - management and application development (includes mobile applications, web channels, web customization, web-friendly applications, new social media channels and condition reporting).

IT Related Proposals:

This proposal includes elements provisioned through IT services. DNR would rely on MN.IT Services@ DNR to provides services to the project (contracts, IT staff consulting and project management, etc.).

Results:

- **Quantity:** DNR estimates 2.8 million individual *people* visited its website from 6 million different devices between Aug 2013 and Sep 2014. It tracks the number of visits from mobile, tablet, and traditional PC visits.
- **Quantity:** In the past five years, the number of visits to DNR websites has been increasing. The percentage of visits on mobile and tablet devices has increased from 5% of all visits in 2010 to 39% of all visits between January and September 2014.
- **Quality:** Individuals are accessing DNR websites from many different devices (example: Home PC, Work PC, mobile phone, and tablet) and the type of information they search for differs depending on the device. Mobile visits tend to be shorter, with visitors looking for specific information. Tablet and PC vists tend to be longer and the information sought may be general or specific.
- **Result:** The number of visits and type of device used will continue to be tracked, and websites that focus on outdoor recreation will be optimized for use on mobile devices. Success will be measured by significantly increasing availability and use of these mobile friendly websites.

Statutory Change(s):

Not applicable.

Department of Natural Resources

FY16-17 Biennial Budget Change Item

Change Item: Legal Support Costs

Fiscal Impact (\$000s)	FY 2016	FY 2017	FY 2018	FY 2019
General Fund				
Expenditures	500	500	0	0
Revenues	0	0	0	0
Other Funds				
Expenditures	0	0	0	0
Revenues	0	0	0	0
Net Fiscal Impact = (Expenditures – Revenues)	500	500	0	0
FTEs	2	2	0	0

Recommendation:

The Governor recommends \$500,000 in FY 2016 and \$500,000 in FY 2017 be appropriated to fund legal support costs to defend agency decisions on water management, environmental, and other issues. Supplemental funding gives the agency the ability to defend its natural resources decisions whether in federal or state court, contested case hearings, mediation and other venues without imposing undue hardship on existing division budgets.

The request is the equivalent of two (2) full time in-house attorneys, legal services from the Minnesota Attorney General's Office (AG), and other expenses. This request is based on the agency's recent cost experience.

Rationale/Background:

The DNR's mission is to work with citizens to conserve and manage the state's natural resources, to provide outdoor recreation opportunities, and to provide for commercial uses of natural resources in a way that creates a sustainable quality of life. This mission brings together diverse groups who may disagree with DNR's decisions. Environmental regulatory decisions, permits and leasing, or other types of decisions are challenged through the court system in most cases.

The DNR is currently involved in several large, complex litigations and anticipates several other very large lawsuits that will require litigation over the biennium. DNR has a difficult time finding funds to adequately defend the agency's response to these legal challenges because of the high costs for expert witnesses and staff, attorneys, Attorney General's Office, court time, and defense preparation. This is particularly true in cases which are controversial because the DNR will be challenged regardless of the decision. The DNR is increasingly dependent on dedicated funding sources from the state – the agency's share of general fund as a part of the budget continues to diminish. General Fund dollars are dedicated to programs and services aligned with the agency's mission that aren't funded elsewhere. In addition, the DNR does not have the ability to seek damages or reimbursement for these costs from project proponent, plaintiffs or defendants except in very rare cases. This means that the DNR must reduce or eliminate program funding in order to cover these costs. Providing special appropriations for these large and unexpected legal costs has precedent. An example is an appropriation that the legislature provided to defend the 1837 Treaty Rights lawsuit that was eventually heard by the U.S. Supreme Court in the 1990s.

Proposal:

This proposal funds two positions within the agency to provide legal counsel to support the agency on the anticipated lawsuits and additional funding for the attorney general's office, contracted legal support and other costs.

IT Related Proposals:

Not applicable.

Results:

DNR has a strong legal team to support the agency on legal challenges.

<i>Type of Measure</i>	<i>Name of Measure</i>	<i>Previous</i>	<i>Current</i>	<i>Dates</i>
Quality	Funding Integrity – other general fund resources are not directed away from DNR program priorities for this work	N/A	N/A	
Results	Agency Decision – agency decisions are sustained	N/A	N/A	

Statutory Change(s):

The agency is seeking authority to hire legal counsel and authority to contract for legal services.

Program: Lands and Minerals

http://www.dnr.state.mn.us/lands_minerals/index.html

AT A GLANCE

- Collected **\$74 million** in revenue from state-owned land and mineral resources in FY2014.
- Ranked **first** in the nation for iron ore production.
- Issued **six** permit amendments in FY2014 for expansion of existing mining operations.
- Completed **140** acquisitions of land and interests in land.
- Calculated in lieu of tax payment of **\$31 million** for distribution to local government in 2014.
- Managed **12 million** acres of state-owned mineral rights.
- Managed real estate activities for **5.4 million** acres of state-owned land.

PURPOSE & CONTEXT

The Division of Lands and Minerals manages all state-owned mineral rights and provides real estate services for the Department of Natural Resources (DNR) managed lands.

We ensure that mining is designed to protect natural resources and that sites are properly reclaimed for future use once mining is complete. The mineland reclamation activity promotes a healthy environment with sustainable use of natural resources.

The revenue from leasing of state surface lands and mineral rights goes to the school districts throughout the state, the University of Minnesota and its students, as well as local towns, cities, and counties.

SERVICES PROVIDED

We meet our goals through three bodies of work:

Minerals Management

- We gather mineral resource information to encourage further exploration and investment. We maintain a drill core library of past exploration and drillings that provide geological insight into future sites. We map the location of sand and gravel to identify future resources and aid in local planning. We issue state mineral leases through public sales and negotiations.
- We review all exploration plans to ensure environmental protection criteria are met and conduct field inspections of the exploration activity on state and private lands. Exploration companies are searching for valuable deposits of copper, nickel, platinum, palladium, and other precious metals.
- We closely monitor iron ore being removed from the state lands. We verify volumes, collect the revenues due, and distribute them to schools, the university trust, and local communities.

Mineland Reclamation

- We issue permits to mine that are needed before metallic mineral mining operations may start on any land. We ensure permits include conditions to protect the environment, preserve natural resources, and to plan for future use of the land. Amendments or other modifications to the permit to mine are issued for expansions and changes in operating plans.
- We inspect mining operations to ensure compliance with the permit and to monitor ongoing reclamation and environmental protection activities.
- We conduct environmental research to better understand potential mining impacts and to evaluate new ways to reduce impacts.

Real Estate Management

- We acquire land through purchase and donation for outdoor recreation and natural-resource protection. We sell some lands to raise revenue for schools and to dispose of land no longer needed for natural resource purposes. We trade some land with other units of government or private parties to consolidate landholdings or to obtain land better suited for natural resources.
- We issue licenses for utilities to cross state lands and waters. We issue road easements for crossing state land and water. We issue leases for hunting cabins, boathouses, towers, agriculture, access to private property and other uses.
- We conduct surveys to address boundary issues prior to an acquisition, to accurately post the boundaries for existing outdoor recreation units and before extensive development such as a water access site or campground.
- We provide direction on monitoring of conservation easements and enforcement of terms and conditions. We review and decide whether to approve the proposed sale of certain tax forfeited land by the counties. We review and decide whether to approve the exchange of tax forfeited land with other entities, subject to final approval by the Land Exchange Board.

- We work with counties to develop land record data and calculate annual payments in lieu of taxes.

RESULTS

Quantity Performance Measure: Minerals management - Annual Mineral Leasing Revenue. Mineral revenue has increased significantly in recent years. This chart shows that revenue has increased. The orange line shows that while the tons mined has also increased, the tonnage mined is not the sole factor for the increase in revenue. Other factors include a higher commodity value for iron ore and our success in negotiating higher royalty rates.

Results Performance Measure: Mineland reclamation. In the past 4 years we have issued 15 new or amended permits totaling 3,293 acres. We have reclaimed 890 acres of previously mined lands for future use.

Quantity Performance Measure: Real estate management. The division of Lands and Minerals is responsible for negotiating the land acquisition for the DNR. The graph shows the results that more acquisitions are being completed each year; meeting department needs and interests (FY12 reflects a reduction in work completed due to the government shutdown).

The legal authority for the Division of Lands and Minerals Program come from The Office of the Revisor of Statutes:

Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84, 84A, 84C, 85, 86A, 89, 92-94, 97A, 103I and 477A.)

Program: Ecological and Water Resources

<http://www.dnr.state.mn.us/eco/index.html>

<http://www.dnr.state.mn.us/waters/index.html>

AT A GLANCE

In FY 2014 we:

- Conducted **123,000** watercraft inspections for aquatic invasive species.
- Issued **994** new water appropriation permits and **743** new permits for activities affecting public waters.
- Added **1,200** acres to existing Scientific and Natural Areas and **455** acres in prairie easements.
- Installed or upgraded stream flow monitoring equipment at **49** new locations and continued stream flow monitoring at **258** streams.
- Completed **one** and worked on another **eight** County Geologic Atlases for a total of **21** completed statewide.
- Removed **78** buildings from flood plains to prevent flood damage.
- Reached **80** percent completion of the state's Biological Survey.

PURPOSE & CONTEXT

The Ecological and Water Resources Division promotes and delivers integrated land and water conservation to ensure healthy surface water, groundwater, and contributing landscapes.

We provide critical information and regulatory oversight to state and local governments and landowners to foster natural resources stewardship and enhance recreational and economic uses.

Our customers include local governments, conservation organizations, businesses, landowners and all citizens who benefit from healthy natural resources.

SERVICES PROVIDED

Our work is divided into three categories:

1. Inventory, monitoring, and analysis

- We collect and deliver information on ground and surface water, lake and stream habitat, rare plants and animals, and maintain flood-warning gages.
- We ensure that quality environmental information is available for current and future generations, which maintains a high quality of life and safety.
- We work to make sure state and local governments have access to this information so they make good decisions regarding development and natural resource protection.

2. Conservation assistance and regulation

- We ensure recreation, habitat and water quality are maintained by regulating proposed alterations to lakes, wetlands, rivers and streams.
- We provide regulatory and technical oversight to local governments for shoreland, floodplains, and Wild and Scenic Rivers.
- We regulate water use to provide for sustainable surface water and ground water supplies as our population grows.
- We provide oversight of state's dams so they operate safely and protect the public and natural resources.
- We engage in environmental review to identify potential impacts of projects and help ensure permitting addresses those impacts.

3. Ecosystem management and protection

- We manage and prevent the spread of aquatic and terrestrial invasive species that threaten the state's lakes, rivers, wetlands, forests, and prairies, and the economies that depend on them.
- We manage Scientific and Natural Area and native prairie bank programs, nongame wildlife, and help protect habitat to improve conditions for native species. Nongame wildlife is important to the state's ecosystems and recreational enjoyment of the outdoors.
- We protect threatened and endangered species to prevent state extinctions.

RESULTS

Quantity Performance Measure: Number of new groundwater monitoring well installations and repairs (50 per year goal). We have met or nearly met our goal for new installations and repairs every year since 2009. The number of new wells we can drill in a year varies by the depth required and the complexity of the installation.

Quality Performance Measure: Number of water permits and percent acted on within 150 days. As the number of permit applications has increased by 60% over the past 3 fiscal years (FY), our ability to make timely decisions has declined slightly.

Results Performance Measure: Number of new lake infestations of zebra mussels due to overland spread (the spread of zebra mussels by inwater equipment or watercrafts). Minnesota has had 5 or fewer new overland zebra mussel infestations every year despite the increasing number of infested lakes. Once in a lake zebra mussels can also spread to downstream waters, which is why limiting overland spread is important.

The legal authority for the Ecological and Water Resources Program comes from Minnesota Statutes: Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84, 84D, 86A, 97A, 103B-103H, 115B and 116G).

Program: Forestry

Activity: Forest Management

<http://www.dnr.state.mn.us/forestry/index.html>

AT A GLANCE

- Manage **58** state forests covering 4.2 million acres for clean water, wildlife habitat, quality timber, outdoor recreation, and biological diversity.
- Provide **30 percent** of the state's wood fiber that keeps Minnesota's forest products industry strong.
- Maintain **2,360** miles of forest roads that provide access for recreation, general public use, fire protection, forest management, and timber production.
- Reforest **11,500** acres annually by aerial seeding and hand-planting seedlings.
- Maintain forest management certification on **5 million** acres of Department of Natural Resources (DNR)-administered lands as determined by criteria set out and enforced by the Forest Stewardship Council and Sustainable Forestry Initiative.
- Prepare forest management plans for private landowners on **70,000** acres annually through a network of DNR, county, and private consulting foresters.
- Engage **45,000** students annually in outdoor education activities at **125** statewide school forest sites.

PURPOSE & CONTEXT

Our goal is to help sustain a quality of life by improving the productivity, health, diversity, accessibility, and use of forests. Healthy forests provide clean water, wildlife habitat, biodiversity, and forest-related products.

Healthy forests ensure the state's natural areas remain productive, ecologically healthy, and beautiful in the face of wildfires, land-use pressures, climate change, and invasive plants, insect pests, and diseases.

Our forest products industry relies on a sustainable state timber supply. The industry provides 62,400 jobs and economic benefits worth \$16.1 billion. Well-managed forests also provide economic benefits from tourism and outdoor recreation activities like hunting, hiking, riding, and birdwatching.

Forest management is important to forest landowners, conservation groups, hunters, anglers, and other outdoor enthusiasts, school teachers, students, loggers and other forest operators, forest industry employees, and forestry professionals.

SERVICES PROVIDED

To achieve our goals, we:

- **Manage state forest lands** to improve their health and productivity so they provide clean water, abundant wildlife habitat, a sustainable supply of timber, and outdoor recreation opportunities. We lead forest management and policy development aimed at ensuring Minnesota forest lands (public and private) are sustained and enhanced. We support the commercial use and public enjoyment of forests by maintaining public forest roads and recreational trails.
- **Provide technical assistance to communities and private landowners** through training sessions, printed and online materials, and one-on-one visits to encourage them to keep their forests and lands healthy and intact in the face of development pressure, a changing climate, and growing populations of invasive species.
- **Develop and distribute forest information** to help Minnesotans prepare for and prevent insect and disease infestations and understand how forest resources benefit people, the environment, and the economy.
- **Implement the Sustainable Forest Resources Act** (*Minnesota Statutes*, Chapter 89A) to gather and incorporate diverse perspectives on forest management, use, and protection.
- **Manage school trust lands** to maximize long-term economic returns to the Trust using sound conservation practices.

RESULTS

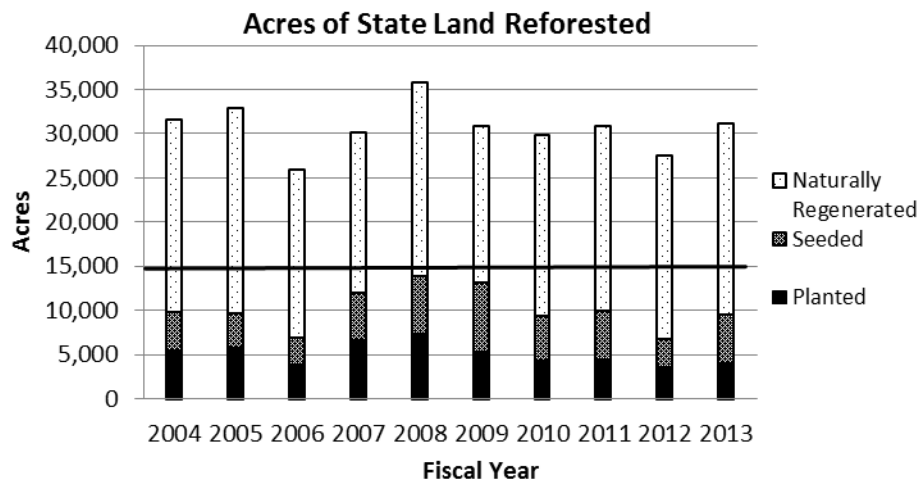

Quantity Performance Measure: Cords of wood offered for sale on state lands.

The state owns 24 percent of Minnesota's forest land, which is a significant source of raw materials for forest product industries and energy production. Our goal is to maintain the wood offered at public auction at a minimum level of 800,000 cords per year. Timber harvests have a similar effect as the natural disturbances of the past (e.g., wildfires), helping us efficiently and economically provide sustainable timber, wildlife habitat, clean water, and recreational opportunities.

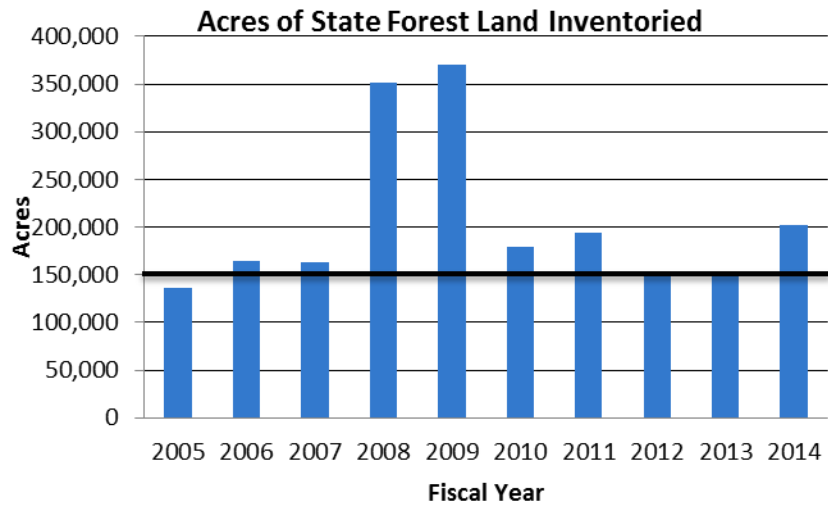

Results Performance Measure: Acres of state land reforested.

We must reforest the same number of acres as we harvest (Minnesota Statutes, section 89.002, subdivision 2). This is done by planting seedlings, spreading seed by air, and where possible, allowing the forest to grow back on its own (natural regeneration). Reforesting harvested acres each year depends on what tree species is best for a site. If pine should reforest a site, then we plant seedlings for best results. If we want a lowland conifer species like black spruce, we do aerial seeding. For aspen growth, we allow natural regeneration to occur. For best reforestation results, we should be planting or seeding 15,000 acres per year. We also protect an average of 5,800 acres of young trees like pine from deer and other animals per year.

Quantity Performance Measure: Acres of state forest land inventoried.

The DNR must maintain an up-to-date inventory of state forest lands, including tree species, age, size, and potential productivity to determine timber supply, management targets, and research needs. Our goal is to inventory 150,000 acres per year. DNR foresters and hired consultants perform the on-the-ground inventory work.

Note: Solid line indicates goal of 150,000 acres.

The legal authority for the forest management activity comes from Minnesota Statutes:
Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (88, 89, 89A, and 90)

Program: Forestry
Activity: Firefighting

<http://www.dnr.state.mn.us/forestry/index.html>

AT A GLANCE

- Respond to **1,200** wildfires annually.
- Issue **65,000** burning permits annually.
- Respond in **20** minutes or less to wildfires where we are the first responder.
- Protect at least **95 percent** of structures threatened by wildfires.
- Hold the nation's largest fire prevention outreach event at the State Fair where **500** firefighters and volunteers present fire prevention activities.
- Maintain **six** wildfire protection plans through the Firewise Program to help **318** communities reduce burnable materials around homes and communities.
- Coordinate emergency response activities and equipment and maintain cooperative agreements with national and local partners.
- Provide out-of-state firefighting assistance through the Minnesota Interagency Fire Center.

PURPOSE & CONTEXT

The Division of Forestry provides wildfire protection on 45.5 million acres of public and private land. We do this job by:

- Protecting against loss of life by wildfire;
- Reducing loss of property and natural resources;
- Responding to fire and natural disaster emergencies in Minnesota and cooperating with federal and regional firefighting organizations by staffing national fire incidents;
- Preventing wildfires through education, regulation, and an open-burning permit system;
- Using prescribed fires as a tool to reduce burnable materials in natural areas.

Wildfire is a natural part of the environment that can damage natural resources. With more people living in suburbs and rural areas, wildfire protection is critical to protecting people, property, and natural resources. Our protection efforts serve landowners, homeowners, businesses, rural fire departments, other emergency response partners, and natural resource managers.

State authority over wildfire management began in the early 1900s after devastating wildfires destroyed Hinckley, Baudette, Chisholm, and Cloquet. In 1976 the Legislature created an open appropriation account to fund fire suppression efforts, and today the Department of Natural Resources (DNR) is responsible for state wildfire suppression costs.

SERVICES PROVIDED

We protect against the loss of life, property, and natural resources from wildfire and enhance natural resource management through:

- **Prevention**—providing educational information and activities, regulating open burning, enforcing state wildfire and open-burning laws, investigating arson on wildlands, and helping homeowners, developers, and cities identify and reduce the risk of wildfires around their homes and communities through the Firewise program.
- **Presuppression**—training firefighters and support personnel, operating the Minnesota Interagency Fire Center, maintaining partnerships and aid agreements with other fire protection agencies, tracking statewide availability of specialized ground and aerial suppression equipment, and maintaining an emergency communications network.
- **Suppression**—locating wildfires with aerial patrols, public reports, and lookout towers; seasonally relocating firefighting resources to shorten response times; and controlling the spread of wildfires to minimize their damage. Suppression efforts require trained firefighters, support personnel, and aerial and ground-based equipment.
- **Prescribed burning**—using fire intentionally to prepare sites for reforestation; control insects, diseases, and invasive plants; improve wildlife habitat; maintain natural plant communities; reduce the risk and severity of wildfires; and provide valuable fire suppression training.

RESULTS

Quantity Performance Measure: Fires and acres burned.

Wildfire danger levels relate to the weather. A long-term drought from 2011 to 2013 meant high wildfire danger and longer wildfire seasons. During those years, DNR and firefighting partners remained in “high-alert” status over the summer and into the fall to handle the dangerous fire conditions. During this time, Minnesota also exchanged firefighter and equipment support with state, federal, and provincial partners. These reciprocal working relationships continue to be a critical resource for reducing wildfire costs. The need for wildfire protection is unpredictable from year to year but can be a significant workload when weather patterns are dry.

Number of Wildfires 2005 - 2014

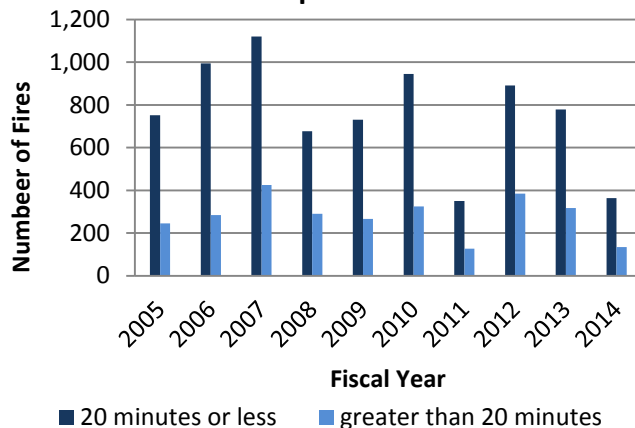

Acres Burned by Year

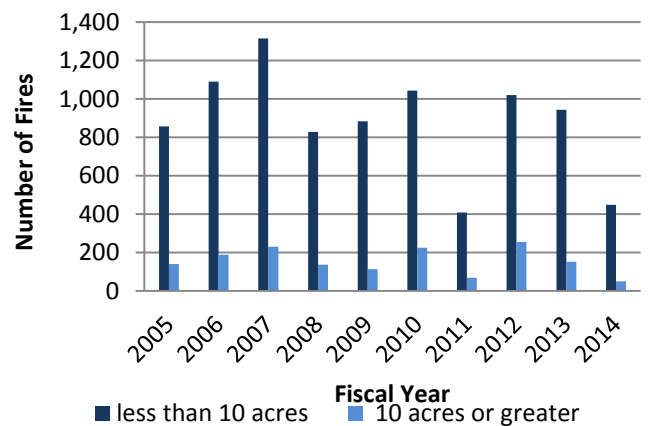

Quality Performance Measure: Wildfire size and response times.

The success of our wildfire suppression strategy is due to aggressive initial attack. Our goal is to keep wildfires small—under 10 acres—and respond to them within 20 minutes. Once a wildfire escapes initial attack, suppression costs and damages increase at a rapid rate.

Fire Response Time

Number of Fires by Acreage per Year

The legal authority for the firefighting activity comes from Minnesota Statutes: Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (88.01-88.46)

Program: Parks and Trails

Activity: Parks and Trails Management and Operations

http://www.dnr.state.mn.us/parks_trails/index.html

AT A GLANCE

- Operate **66** state parks, **9** state recreation areas, **8** state waysides and nearly **5,000** campsites.
- Maintain more than **4,100** miles of hiking/biking/motorized trails and **22,000** miles of snowmobile trails.
- Maintain forest recreation areas including **20** campgrounds and **18** picnic/beach areas.
- Maintain **1,495** public water accesses, **355** fishing piers, **33** state water trails.
- Contribute to Minnesota's **\$11 billion** tourism/hospitality industry with **32** of the top **50** Minnesota tourist attractions.
- Restore and maintain **240,000** acres of natural lands and help preserve **285** rare species.
- Steward **62** historic districts, nearly **600** historic structures and more than **900** archaeological sites.
- Deliver **10,000** outdoor educational programs to **286,000** participants.

- Owners of 818,000 registered watercraft who have access to our water resources through DNR boat ramps to water trails;
- Hikers, bikers, skiers; and
- Local communities, which receive about \$230 million each year from park visitor spending.

PURPOSE & CONTEXT

The vision of the Department of Natural Resources (DNR) Parks and Trails Division is to create unforgettable park, trail, and water recreation experiences that inspire people to pass along the love of the outdoors to current and future generations.

State parks and trails make citizens' lives better by connecting them to nature, helping them stay healthy and fit, strengthening local communities and economies, and conserving the state's special places and resources.

We serve out-of-state visitors and residents alike. We offer outdoor recreational opportunities within 30 miles of most people in the state. We serve:

- 8.7 million state park visitors (18 percent are out-of-state);
- Owners of 477,000 registered snowmobiles and off highway vehicles;

SERVICES PROVIDED

Our work is divided into four categories:

We connect people to the outdoors through our state parks, trails, forest recreation areas, and water recreation. Our naturalist and outreach programs are aimed at experienced and beginner outdoor enthusiasts. We offer skill-building programs so first-timers can explore the outdoors in a safe, engaging way. We appeal to outdoor enthusiasts with an eye toward innovative facilities and amenities (such as modern electronic pay stations and unique yurts) and popular recreational opportunities like mountain biking, and paddle boarding.

We acquire land and create new recreational and conservation opportunities. We focus acquisition and development on conserving the state's rich natural and cultural history, and meeting future recreation demand. We plan ahead to meet the emerging needs of outdoor enthusiasts and use technology to attract and retain outdoor recreation users.

We take care of what we have and the people we serve. Our visitors want high quality customer service, facilities and amenities. With this in mind, we invest Legacy funds to make improvements to our aging infrastructure and reinvigorate visitor services. We also manage unique natural resources for public enjoyment and long-term conservation.

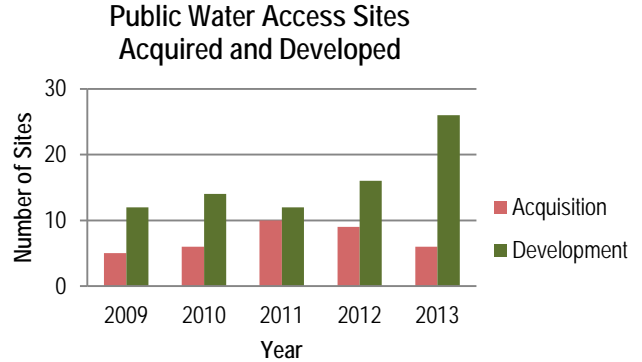

We work with partners. We connect with outdoor recreation partners to provide a seamless outdoor recreation system at the local, regional, state and federal level. About 25 percent of our budget is devoted to grant programs that pass funding through to local governments to meet near-home outdoor recreation opportunities (see Parks and Trails Community Partnerships narrative).

RESULTS

Quantity Performance Measure: Number of State Park permit sales. The popularity of state outdoor recreation assets is on the rise, as illustrated by the increase in one-day and year-round permit sales (below). State parks and trails helps support healthy communities.

Quantity Performance Measure: We maintain public water accesses, state water trails, fishing piers and shore fishing sites. In recent years, our focus has shifted to improving existing water accesses for public safety, storm-water runoff, and boat-cleaning areas.

Quality Performance Measure: Miles of improved surfaces for bicycling have nearly doubled since 2000, increasing from 330 in 2000 to 624 in 2013. Our expanding trails system provides social and economic benefits to the local communities.

Results Performance Measure: We conduct prescribed burns, restore native plant communities, and manage invasive species on more than 15,000 acres annually. We manage approximately 16,200 acres of remnant/restored prairie, with a target of 28,600 acres by 2026.

These measures illustrate just a handful of the outcomes we achieve through our Parks and Trails Management and Operations. More measures and trends can be found at: [State Parks and Trail Studies](http://www.dnr.state.mn.us/aboutdnr/reports/pat/index.html) (<http://www.dnr.state.mn.us/aboutdnr/reports/pat/index.html>).

The legal authority for the Parks and Trails Management and Operations Program comes from Minnesota Statutes: 86A.05 (State parks, state recreation areas, state trails, water access sites) (<https://www.revisor.mn.gov/statutes/?id=86A.05>)

Program: Parks and Trails

Activity: Community Partnerships

<http://www.dnr.state.mn.us/grants/recreation/index.html>

AT A GLANCE

Deliver more than **350** grants totaling more than **\$25 million** annually to local governments and organizations for parks and trails. These include:

- **72** grants for acquisition and development of local parks and trails;
- **180** grants for snowmobile trail maintenance and grooming;
- **65** grants for off-highway vehicle trail development and maintenance; and
- **40** grants for ski trail maintenance and grooming.

Aid in the development of local trail systems throughout the state by administering grants to volunteer organizations. This "grant in aid" (GIA) system now, includes:

- Over **21,000** miles of GIA snowmobile trails;
- Over **1,500** miles of off-highway vehicle trails; and
- Over **700** miles of cross-country ski trails.

PURPOSE & CONTEXT

The Parks and Trails Community Partnership program works to provide grants to organizations and local governments to help create new parks and trails and maintain existing ones.

By creating a seamless system of outdoor recreation, local and regional parks and trails complement the state system and contribute to Minnesota's overall outdoor recreation goals.

Community partnerships benefit:

- Local communities that receive grants and whose economies benefit from trail-associated spending.
- Trail users, including 216,000 snowmobile riders and 276,785 off-highway vehicle riders, and over 19,000 cross-country skiers.

Community parks and trails partnerships help provide for thriving local economies. Recreational trail users contributed \$2.4 billion in total trip-related spending, which generated \$206 million in state and local taxes, and accounted for 31,000 jobs in Minnesota in 2008.

SERVICES PROVIDED

We provide grants to local governments and organizations for parks and trail acquisition, development, rehabilitation, grooming maintenance and operations. We administer a variety of grant programs focusing on outdoor recreation, regional parks and trails, local trail connections, as well as Grant-in-Aid (GIA) programs for snowmobile, off-highway vehicle, and cross-country ski trail users. We manage federal programs such as the Federal Recreational Trail Program and the Land and Water Conservation Fund.

Our grant-administration services include managing the grant programs; providing information and customer service to grant recipients; ensuring a fair and efficient process for grant selection; ensuring financial accountability; and building partnerships with local, regional, state and federal programs.

RESULTS

Quality Performance Measure: Miles of New Local Trail Connections Developed

We aim to achieve high satisfaction among grant recipients while meeting state and federal grant management standards. Our goal is for grants to contribute to a comprehensive outdoor recreation system in Minnesota.

The Local Trail Connections Program is one example where we facilitate new trail connections. These trail segments may be relatively short in length, but are often necessary to create a seamless trail system that meets local needs. These trail segments may create connections to where people live (such as residential areas within cities or entire communities) and/or to significant public resources (such as historical areas, parks and/or other trails).

Quantity Performance Measure: Trail Miles Cooperatively Developed and Maintained

We also manage the Grant in Aid (GIA) program, a cost-sharing system of snowmobile, off-highway vehicle, and cross-country ski trails. The GIA trail system has grown by more than 2,000 miles in five years, from 20,634 miles in FY2009 to 22,968 miles in FY2014. This program relies on groups or clubs, with the support and participation of local governments. We provide financial and technical assistance and overall GIA program management. Together, we develop and maintain a much larger trail system than any one group could deliver.

Additional measures are available on DNR's grant outcomes website at: [DNR Grant Outcomes Reporting: Minnesota DNR](http://www.dnr.state.mn.us/grants/outcomes/index.html) (<http://www.dnr.state.mn.us/grants/outcomes/index.html>)

The legal authority for the Parks and Trails Community Partnerships Program comes from Minnesota Statutes: Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84.83, 84.794, 84.803, 84.927, 85.019, 85.43, and 85.535).

Program: Fish and Wildlife

Activity: Fish and Wildlife Management

<http://www.dnr.state.mn.us/fishwildlife/index.html>

AT A GLANCE

- Manage more than **1.3 million** acres of state-owned wildlife management areas and **930 miles/45,000** acres of aquatic management areas.
- Protect, monitor, enhance, and restore aquatic habitat for **5,400** fishing lakes and **16,000** miles of fishable streams and rivers in Minnesota.
- Manage **61** wildlife and **28** sport fish game species.
- Provide services to **1.5 million** licensed anglers, **580,000** licensed hunters and trappers, and **1.6 million** wildlife watchers.
- Protect, enhance, and restore habitats by infusing **\$8 million** in competitive matching grants to nonprofit organizations or local governments in metro and greater Minnesota.

PURPOSE & CONTEXT

The Fish and Wildlife Division manages fish and wildlife populations, their habitats, and use of these public resources, including fishing, hunting, and trapping.

Our goal is to sustain healthy populations of fish and wildlife, high quality recreational opportunities, and vibrant local economies.

In partnership with citizens, we protect and restore natural lands, lakes, and streams, monitor harvested species, anticipate and respond to new challenges, and promote the state's hunting and fishing heritage.

Hunters, anglers, and wildlife viewers and photographers benefit from diverse, abundant species, accessible public lands, and high quality recreational experiences.

Access to natural lands and participation in outdoor recreation offer personal health benefits and maintain Minnesota's hunting and fishing heritage—benefitting current and future generations. This benefits Minnesota's economy including rural communities by supporting more than 48,000 jobs and generating \$3.8 billion in annual statewide expenditures.

SERVICES PROVIDED

Our work is divided into four categories:

1. **Fish and wildlife population monitoring and management:** To ensure high quality fishing, hunting, trapping and wildlife watching, we monitor and manage fish and wildlife populations for the benefit of citizens.
 - We conduct surveys to:
 - monitor fish and wildlife populations trends
 - inform management decisions, including harvest regulations,
 - assess values and attitudes of anglers, hunters, and landowners and to evaluate changes in participation and resource use.
 - We use research to understand and predict changes in fish and wildlife populations and to inform management decisions.
 - We raise and stock walleye, muskellunge, northern pike, trout, salmon, and other game fish species to enhance or restore fish populations in lakes and streams or to establish new fishing opportunities.
 - We monitor and manage diseases to reduce risk of outbreaks and high fish and wildlife losses.
 - We reduce human-wildlife conflicts by monitoring wildlife damage and providing assistance to property owners and growers to prevent or reduce damage.
2. **Habitat protection, enhancement, and restoration:** To help sustain healthy, productive fish and wildlife populations, we:
 - Manage more than 1.3 million acres of wildlife and aquatic habitat;
 - Contribute to improved habitat management on other public and private lands through technical and financial assistance;
 - Acquire lands through purchase or donation to add high priority parcels to the system's land base which are then enhanced or restored;
 - Enhance and restore grasslands and prairie; conduct prescribed burns and remove woody vegetation to enhance prairies; restore and enhance wetlands; manage forest stands; conduct wildlife lake assessments; improve fish spawning areas; protect and enhance aquatic habitats; and remove dams and restore functions to aquatic systems; and

- Provide public awareness and access to state lands through posting boundaries, providing parking lots and walking trails, and providing maps (digital and paper) and other user information.
3. **Technical assistance, public participation, planning, and coordination:** Citizen understanding and support is critical to healthy environments. We improve citizen engagement through roundtables, workshops, public input, county and state fairs, customer surveys, web surveys, and other tools. We work with private landowners and local government units to help them improve habitat in grasslands, forests, wetlands, lakes and streams.
 4. **Outreach, recruitment, retention, and communication:** We work with partners to provide information and educational opportunities that encourage outdoor recreation and sustain or increase participation in fishing and hunting. This work includes: mentored hunts, the National Archery in the Schools program, skills-based training, youth and women's programs, direct engagement of Southeast Asian and other under-represented communities, MinnAqua, Becoming An Outdoors Woman/Family program, and Fishing In the Neighborhood.
We communicate to citizens large volumes of information about fish and wildlife populations, habitats, and recreational opportunities. We communicated this information through print media, our website, social media, mobile devices, and video.

RESULTS

Quantity Performance Measure: Annual WMA and AMA Acres Acquired

The Department of Natural Resources (DNR) manages more than 1.3 million acres of Wildlife Management Areas (WMA) and Aquatic Management Areas (AMA) to provide high quality wildlife and fish habitat for sustainable and healthy fish and wildlife populations and related recreational opportunities including hunting, angling, and wildlife watching.

Results Performance Measure: Loss of Acres Enrolled in Federal Farm Bill Program

The Prairie Plan recognizes that grassland in agricultural regions are some of the state's most imperiled habitats. Despite modest gains to permanently protect these lands through state programs, there is a net loss in conservation lands enrolled in federal farm programs.

Results Performance Measure: Moose population in northeast Minnesota. The Fish and Wildlife Program monitors populations of numerous species to document population trends and identify management issues.

Results Performance Measure: Cisco catch per net since 1970. Cisco (or tullibee) are an important forage fish for walleye, northern pike, and muskellunge. Cisco are an early indicator of environmental changes impacting cool water lakes due to their sensitivity to water temperatures and oxygen levels.

Quantity Performance Measure: New license purchases. Although fishing and hunting participation rates are higher in Minnesota than nationwide, overall rates are declining. Angling and hunting activities directly fund state fish and wildlife management through license purchases and federal equipment excise taxes. Outreach efforts focus on recruiting and retaining citizens interests in healthy fish and wildlife populations, habitat, and recreation.

The legal authority for the Fish and Wildlife program comes from the following Minnesota Statutes: Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (17, 84, 84C, 84D, 86A, 97A, 97B, and 97C)

Program: Fish and Wildlife

Activity: Licensing

<http://www.dnr.state.mn.us/rlp/index.html>

AT A GLANCE

Service to the public

- Manage **2.4 million** license sales for hunting, fishing, and other activities, and **1.4 million** registrations for recreational boats and vehicles.
- Provide an electronic license purchasing system operated for license agents and DNR License Center.
- Engage **1,600** Minnesota businesses as point-of-sale agents for hunting and fishing licenses and **188** registration and titling agents.
- Answer more than **100,000** customer and license agent telephone questions annually.
- Collect **\$65 million** in receipts annually.
- Process more than **400,000** pieces of mail annually.

PURPOSE & CONTEXT

The Department of Natural Resources (DNR) licensing center serves citizens seeking licenses, registration and titling. To fulfill this work, we also serve licensing agents, deputy registrars, and DNR managers.

We provide services in an efficient and cost effective manner, including web, telephone, and mobile-device options.

Vehicle and watercraft registration and titling helps recreation managers regulate watercraft, snowmobile, ATV and other recreational vehicles. It also provides revenue for development of recreational trail systems, public water access, lake and river improvements, management of aquatic plants, and boat and water safety programs.

Electronic Licensing System (ELS) data is used to analyze recreational trends and participation.

We support local economies by making licenses available at 1,600 point-of-sale locations statewide.

SERVICES PROVIDED

We are responsible for the development, implementation, and maintenance of the statewide Electronic Licensing System (ELS). We provide easy access for outdoors enthusiasts to purchase hunting and fishing licenses at any of the 1,600 ELS agent locations. Customers can also purchase by phone, mobile-device, and online. We have a walk-in service counter in St. Paul that provides service to customers for all types of license, registration and titling transactions.

We are responsible for commercial licenses for businesses such as minnow dealers, game farms, shooting preserves, and we manage the lottery system for turkey, antlerless deer, bear, and elk seasons.

We issue all watercraft registration and titles and the registration of all-terrain vehicles (ATVs), snowmobiles, off road vehicles (ORVs), and off-highway motorcycles (OHMs) through the web-based ELS.

We distribute a variety of DNR-related materials. This includes hunting regulations, fishing regulations, waterfowl supplements, boating guides, snowmobile regulation and off-highway vehicle regulations.

RESULTS

Quantity: Number of Angling and Hunting Licenses Sold Electronically. Minnesota trends are stable while national participation trends are declining. Trends are influenced by weather conditions, populations, and length of season.

Number of Angling and Hunting Licenses Sold Electronically

Quantity: Number of Registered Recreational Vehicles. All motorized recreational vehicles are licensed by the Licensing section and support natural resource management for state trails, boat access, and enforcement training. Recreational interests change over time and are impacted by weather conditions.

Number of Registered Recreational Vehicles

The legal authority for the Licensing Program comes from the following Minnesota Statutes:
 Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (17, 84, 84C, 84D, 86B, 97A, 97B and 97C)

Program: Enforcement

<http://www.dnr.state.mn.us/enforcement/index.html>

AT A GLANCE

- **185** Conservation Officers.
- Certified **36,700** students in safety education programs by working with **4,400** volunteer instructors in all counties of the state.
- Connecting with people through **1,300** outreach opportunities.
- Administered **300** state & federal grants to user groups and local law enforcement agencies for education and enforcement of motorized recreational vehicle laws & regulations.
- Optimize technology to deliver relevant educational formats for today's learner & make efficient use of staff time.

PURPOSE & CONTEXT

As the primary conservation law enforcement agency in Minnesota, we fulfill the Department of Natural Resources (DNR) mission by protecting natural resources and public safety. Protecting public safety is our highest priority. Our role in protecting natural resources has grown from traditional game and fish enforcement to broader natural resource protection responsibilities that affect quality of life and economic sustainability. We achieve compliance with laws and regulations through education, outreach, and law enforcement.

Our 10-year strategic plan addresses how we will accomplish our work in the face of new, broad trends. A decline in outdoor recreation participation means a decline in licenses and permit revenue, which impacts the funding for traditional enforcement activities. At the same time, there are increasing demands for enforcement of invasive species, water appropriation, and other natural resource protection laws.

SERVICES PROVIDED

Our work includes education, outreach, and law enforcement in four areas:

1. Fish and Game Protection and Education

- We work with recreational and commercial users to protect fish and game populations.
- We manage youth and adult hunting safety education programs.
- We recruit new users through outreach opportunities and shooting range development.

2. Recreational Safety and Enforcement

- We work with motorized and non-motorized recreational users to enforce recreational laws and regulations.
- We deliver recreational motorized safety education.

3. Natural Resource Protection

- We enforce regulations related invasive species, wetland protection, water appropriation, water quality, solid waste, timber theft, and air quality.
- We work with other regulatory agencies to educate user groups on the state's natural resource laws and regulations.

4. Public Safety

- As licensed peace officers, we work within the emergency management system to provide mutual-aid assistance in response to disasters, search and rescue, and law enforcement.

RESULTS

Quantity Performance Measure: Number of Minnesotans Certified in Firearms Safety and Hunter Education Programs.
Outreach opportunities continue to increase the number of women certified in firearms safety/hunter education programs.

Firearm Safety and Hunter Education

The legal authority for the Enforcement Program comes from Minnesota Statutes:

Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84.028, 84.081, 97A.201, 103G.2372, 115.071, 116.073, 138.40, and 626.84)

Program: Operations Support

Activity: Operations Support

<http://www.dnr.state.mn.us/aboutdnr/commissioner/index.html>

AT A GLANCE

- Direct budget and accounting policy for effective use of approximately **\$500 million** per year
- Manage Federal Emergency Management Agency (FEMA) public assistance grants for damage to DNR properties and facilities from natural disasters
- Manage **\$70 million** in pass through grants
- Provide human resource services to approximately **4,760** employees, which is the number of individuals that were paid at any one time during the Fiscal Year. (This equates to 2,684 full-time equivalent employees).
- Manage **2.9 million** square feet of office space at over **200** site locations statewide.
- Manage **5,000** pieces of fleet equipment made up of approximately **1,600** on-road vehicles, **1,700** off-road vehicles, and **1,700** trailers and attachments.

PURPOSE & CONTEXT

We support and provide administrative leadership to the Department of Natural Resources (DNR). DNR works hand-in-hand with Minnesotans to create a better future for our state. DNR uses the best available science to make informed decisions and deliver conservation services in partnership with others. We ensure the DNR mission is carried out in an integrated and efficient manner through leadership and services.

We are focused on operational excellence and continuous improvement by maintaining an agency-wide performance system and focusing on operational efficiencies. This effort results in better conservation service delivery, improved the health and safety of Minnesotans, and a new generation of conservation leaders.

The budget reflects the agency investment in IT services provided by MN.IT Services@ DNR. Services extend outside of the organization and benefit other units of government, businesses, conservation partners, the public and others for outreach, recreation, and other natural resources purposes

SERVICES PROVIDED

We provide services to DNR's central office and regional managers, supervisors, employees, the general public, local communities, partners and other government operations. DNR's Regional Operations include northwest, northeast, central and southern regional offices, with headquarters in Bemidji, Grand Rapids, St. Paul and New Ulm. Services include:

- Leadership and direction for the department and management of regulatory and government relations activities.
- Leadership and assistance for Regional Offices for interdisciplinary delivery of DNR services at the local level, including:
 - Coordination of natural resources management programs in the regions
 - Technical assistance and outreach
 - Emergency preparedness and disaster response (non-fire emergency)
- Leadership and management of integral business services to the DNR as set forth in Minnesota statute such as: accounting; contracting and budget; data practices; planning and performance management; fleet; facilities and asset management; publication of regulations and other information; state employment, labor relations and state retirement; safety; human rights and accessibility. Leadership and management for developing and maintaining the IT infrastructure at DNR to support daily activities

RESULTS

Results Performance Measure: Light Vehicle Fuel Consumption and Renewable Energy Generation. This chart shows an increase in the amount of renewable energy generated by DNR's renewable energy systems and an overall decrease in light vehicle fuel consumption. Cutting overall energy use and increasing the use of renewables is a key agency priority.

Light Vehicle Fuel Consumption and Renewable Energy Generation

*A new fleet data system was implemented part way through FY12, so data is incomplete or not available for that year.

Quality Performance Measure: Grants Unit Customer Survey Results – FY 2012 and 2013. The grants unit was recognized with a Commissioner's Award for improving relationships with customers over time. About 91 percent of respondents were satisfied or very satisfied with overall customer service, while 96 percent were satisfied or very satisfied with the ability of grants specialists to resolve problems.

Grants Unit Customer Survey Results - FY12 and FY13

(% = Satisfied or Very Satisfied; RR = Reimbursement Requests; RM = Reimbursement Manual)

The legal authority for the Operations Division comes from the Minnesota Constitution and following Minnesota Statutes and Minnesota Constitution:

Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84.01, 84.025, 84.0856, 84.0857 and 16A.055)

Program: Operations Support

Activity: Trust Land Management

http://www.dnr.state.mn.us/aboutdnr/school_lands/index.html

AT A GLANCE

- Deposited over **\$60 million** in the Permanent School Fund during the FY12-13 biennium.
- Deposited over **\$19 million** in the Permanent University Fund during the FY12-13 biennium.
- Completed a highest and best use inventory of the School Trust Land asset in FY2013.
- Collaborated with US Forest Service to complete the federally required feasibility analysis of proposed BWCAW land exchange.

PURPOSE & CONTEXT

Minnesota has two large educational trust funds: the Permanent School Fund (School Trust) and Permanent University Fund (University Trust). Both provide long-term funding source for the state's education.

The Department of Natural Resources (DNR) manages the real property asset for both the School Trust (2.5 million acres) and the University Trust (26,500 acres). We also manage one million acres of severed mineral interests (Subsurface rights) for the School Trust and 21,000 acres for the University Trust. Severed mineral rights happen when the state sells or conveys land to another owner but retains ownership of the land, including minerals, below the surface.

Trust fund revenues are generated from the development of mineral resources, forest management, and real estate transactions. Revenue is deposited into respective trust funds. Interest and dividends from the funds' investment funds' principal support K-12 public schools and fund three University endowments: student scholarship, minerals research, and an endowed chair account. As trustee, we have a fiduciary obligation to manage the School Trust lands and University Trust lands for the trust beneficiaries. This includes a responsibility to ensure efficient, effective management, with reasonable operating costs. DNR certifies its operating costs related to forestry and real estate management annually, and receives direct appropriations to administer the mineral interests from the minerals management account.

SERVICES PROVIDED

DNR manages both the School Trust and University Trust for the benefit of educational trusts and endowments that support Minnesota's K-12 and college students. DNR management produces annual revenues from School Trust and University Trust assets such as mineral resources, forest products, real property transitions and recreational fees. We centralized school trust land management with the creation of the School Trust Land Administrator. The Administrator oversees all DNR management activities to ensure compliance with goals and objectives of the Permanent School Fund and Permanent University Fund.

The Forestry and Lands and Minerals divisions oversee day-to-day management of School Trust and University Trust revenue-generating activities. These activities include ferrous and non-ferrous mineral lease administration; forest product sales, reforestation and forest health; surface resource extraction leases – construction aggregates, peat, and wild rice; recreational fees – forest campground fees, grant-in-aid trail permits and other recreational leases; and real estate transactions – utility licenses, easements, land sales and other types of uses.

RESULTS

Quantity Performance Measure: School Trust Revenues FY 2002-14. During the last decade the DNR's operating costs have remained relatively constant while revenues have increased resulting in increased net deposits as depicted below in the School Trust Revenue graph.

School Trust Revenues FY2002-FY2014

The legal authority for the Operations Support Division-Trust Land Management comes from the following Minnesota Statutes: Revisor's Office-Statutes (<https://www.revisor.mn.gov/statutes/>) (84.027, 89.17, 93.2236, 127A.31, and 137.022)

FY16-17 Federal Funds Summary

U.S. Fish and Wildlife Service, 15.623	Wildlife NAWCA Waterfowl, wetlands and waterfowl habitat work		\$35	\$25				
U.S. Fish and Wildlife Service, 15.611	Fed Hip (Harvest Information Program) Grant, gathering hunter harvest information through surveys			\$43				
U.S. Fish and Wildlife Service, 10.025	USDA Animal and Plant Health Inspection Service Wildlife, Chronic Wasting Disease research		\$2					
U.S. Fish and Wildlife Service, 10.025	USDA Animal and Plant Health Inspection Service Fish- fish disease research			\$29				
Dept. of Agriculture, Farm Service Agency, 10.093	Voluntary Public Access & Habitat Incentive Program (VPA-HIP), Provide a pilot program for hunting opportunities on private lands in SW MN.		\$88	\$694	\$969	\$802	No	

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	2014 Actuals	2015 Budget	2016 Base	2017 Base	State Match or MOE Required?	FTEs
Dept. Of Interior/U.S. Fish and Wildlife Service, 15.608	Riparian Habitat, staff time for working on the acquisition of trout streams in NE MN		\$73					
Dept. of Commerce, National Oceanic and Atmospheric Administration, 11.407	Inter-jurisdictional Fisheries Act, Work with statistical and modeling experts at the Quantitative Fisheries Center (QFC) at Michigan State University to provide quantitative methods and models for fish community and population dynamics.		\$0	\$36	\$30	\$10	No	
Dept. of Commerce, National Oceanic and Atmospheric Administration, 11.463	GLRI Phase I Radio Tower Bay Restoration Project, Remove pilings, pylons, and waste slab-wood, from Radio Tower Bay, to achieve restoration of the Bay and work towards delisting as an Area Of Concern.		\$137	\$239	\$100	\$100	State Match Required	
Dept. of Commerce, National Oceanic and Atmospheric Administration, 11.463	St. Louis River Restoration Initiative Implementation Partnership, Work with partners in the St. Louis River Estuary to remove debris, restore shoreline and improve fish habitat.		\$0	\$4,100	\$1,829	\$500	State Match Required	
Dept. of Commerce, National Oceanic and Atmospheric Administration, 11.463	Great Lakes Habitat Restoration Grant under the Great Lakes Restoration Initiative Area of Concern	New	\$0	\$0	\$750	\$750	State Match Required	
Environmental Protection Agency, 66.469	St. Louis River Area of Concern Remediation to Restoration Support Projects- Knowlton Creek	New	\$0	\$0	\$600	\$100		
Dept. of Interior, Fish and Wildlife Service, 15.608	Fisheries Federal Agreements, River restoration project on the Root River in Houston County, Minnesota.		\$47	\$146	\$10	\$0	State Match Required	
Dept. of Interior, Fish and Wildlife Service, 15.608	Midwest Glacial Lakes Partnership, Refine data models on a subset of managed fish lakes in 8 states for habitat quality and protection potential.		\$0	\$13	\$0	\$0	State Match Required	

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	2014 Actuals	2015 Budget	2016 Base	2017 Base	State Match or MOE Required?	FTEs
Dept. of Interior, Fish and Wildlife Service, 15.655	Estimating numbers of breeding sandhill cranes in NW Minnesota, Conduct helicopter surveys to estimate the numbers of sandhill cranes breeding in northwest Minnesota. Count and classify all cranes observed during surveys flown in a DNR helicopter. ENDS 9/30/14.		\$34	\$53	\$75	\$25	State Match Required	
Dept. of Interior, Fish and Wildlife Service, 15.655	Webless Migratory Game Bird Program, 2 new grants - one for woodcock work, one for prairie bird work. Applications due 11/14/14.	New	\$0	\$0	\$0	\$0	State Match Required	
Dept. of Interior, Fish and Wildlife Service, 15.657	Interstate Island - Habitat Enhancement in St. Louis River AOC, Maintain and monitor the tern colony on the island. raise the blowout area on the island to a higher elevation and improve the substrate in the area for shorebirds.		\$0	\$76	\$70	\$5	State Match Required	
Dept. of Interior, Fish and Wildlife Service, 15.699	Eastern Tallgrass Prairie and Big Rivers Landscape Conservation Cooperative, Develop a rigorous monitoring framework for measuring the success of the MN Prairie Conservation Plan conservation efforts through time.	New	\$0		\$0		State Match Required	
	Fish and Wildlife Program Total:		\$439	\$5,528	\$334,433	\$2,392		
Environmental Protection Agency, Office of the Administrator, 66.700	Fed Agreements Pesticide Enforcement, monitor on behalf of the Dept. of Agriculture the application of pesticides to aquatic systems in MN to ensure that products are used appropriately and safely		\$5	\$73				
Federal Emergency Management Agency, 97.045	Cooperating Technical Partners FFY10, Increase local involvement in the production, development, and maintenance of Digital Flood Insurance Maps (DFIRMS) and develop non-regulatory products to help local governments reduce		\$302					3
Commerce/ National Oceanic and Atmospheric Administration, 11.419	Coastal Zone Management, MISC FFY11. Coastal Zone Management, Program requires a balance between economic development & resource protection within the coastal zone. Projects must preserve, protect, develop, & where possible, restore & enhance coastal resources.		\$98					

Federal Agency and CFDA #	Federal Award Name and Brief Purpose	New Grant	2014 Actuals	2015 Budget	2016 Base	2017 Base	State Match or MOE Required?	FTEs
Federal Emergency Management Agency, 97.045	Cooperating Technical Partners FFY11, Increase local involvement in the production, development, and maintenance of Digital Flood Insurance Maps (DFIRMS) and develop non-regulatory products to help local governments reduce		\$40					
Federal Emergency Management Agency, 97.045	Cooperating Technical Partners FFY12, Increase local involvement in the production, development, and maintenance of Digital Flood Insurance Maps (DFIRMS) and develop non-regulatory products to help local governments reduce		\$45					
U.S. Fish and Wildlife Services, 15.608	Manage Invasive Species, for activities related to preventing aquatic invasive species		\$401					3
Homeland Security, 97.041	FFY12 Dam Safety, the National Dam Safety Program improves the safety of dams in the United States and strives achieve the key objective of "national dam safety hazard reduction. The National Dam Safety Program implements the Department of Homeland Security and PPD-8 objective of hazard mitigation, to develop and maintain those capabilities necessary to reduce the loss of lives and property by lessening the impact of the failure of dams.		\$54					1
Federal Emergency Management Agency, 97.023	Community Assistance Program-State Support Services Element FFY 2013, Provide technical assistance to National Flood Insurance. Program communities to monitor and evaluate performance of floodplain management activities.		\$152					1
Commerce/ National Oceanic and Atmospheric Administration, 11.419	Coastal Zone Management MLSC FFY2013. Coastal Zone Management, Program requires a balance between economic development & resource protection within the coastal zone. Projects must preserve, protect, develop, & where possible, restore & enhance coastal resources.		\$587	\$146	\$146	\$146		3

Narrative

Federal funds are accepted at the DNR when they support the mission, strategies, goals and objectives found in the DNR's Strategic Conservation Agenda. The Federal Funds Summary Table below lists anticipated revenues for incoming federal funds, their use, number of FTE positions needed to implement, and whether funds are new and require a state match and/or maintenance of effort. Federal funds include discretionary continuing programs, funds based on funding formulas, competitive grants, and project grants.

Federal Fund accounts include:

1. Incoming federal grant or federal cooperative agreement revenue deposited directly to a federal (3000 fund) account.
2. Federal grant or cooperative agreement revenue passed through another state agency to the DNR. If the federal funds are passed through another state agency that other state agency has also included this amount in their budget.

Outgoing grants funded from federal dollars are estimated throughout the spending period of the grant, rather than estimated in the first year of the grant award. Estimates are based on the best federal funding information available at the time this report is prepared. Most new federal awards that impact state fiscal years 2016-2017 have not yet been confirmed. Therefore, we used historical trend information from recent years to estimate future revenues, as well as any knowledge of changing funding levels or trends that may impact future awards.

Specific funding level changes or trends by division include:

- Fish and Wildlife: Department of Interior Fish and Wildlife Service "Estimating number of sandhill cranes in Northwest Minnesota" ended.
- Forestry: CRP/Equipment FFY 2013 & FFY 2014 appropriations were combined with a begin project date of September 1, 2014. These two projects make up a \$700,000 increase.

Major state funding is required related to the federal awards listed in this summary as most grants are implemented on a reimbursement basis and may require a state match or a maintenance of effort.
