

St. Paul Teachers' Retirement Fund Association

Actuarial Valuation as of July 1, 2017

December 21, 2017

Ms. Jill E. Schurtz, Executive Director
St. Paul Teachers' Retirement Fund Association
1619 Dayton Avenue, Room 309
St. Paul, MN 55104-6206

Dear Ms. Schurtz:

We are pleased to present the report of the actuarial valuation of the St. Paul Teachers' Retirement Fund Association ("Fund") as of July 1, 2017. This report provides, among other things, the required annual contribution rate of the Fund for the Plan Year commencing July 1, 2017 and ending on June 30, 2018, according to prescribed assumptions.

The valuation was based upon information furnished by the Fund staff, concerning Retirement Fund benefits, financial transactions, plan provisions and active members, terminated members, retirees and beneficiaries. Their efforts in furnishing the materials needed are gratefully acknowledged. We checked for internal and year-to-year consistency, but did not audit the data. We are not responsible for the accuracy or completeness of the information provided by the Fund.

The report has been prepared at the request of the Fund's Board of Trustees in accordance with Section 356.215 of the Minnesota Statutes as well as the Standards for Actuarial Work established by the State of Minnesota Legislative Commission on Pensions and Retirement. To the best of our knowledge, this report is complete and accurate, and has been prepared in accordance with prescribed assumptions and generally accepted actuarial principles and practices. This report is intended for use by the Fund and those determined or approved by the Fund's Board of Trustees. This report may be provided to parties other than the Fund only in its entirety and only with the permission of the Board. GRS is not responsible for unauthorized use of this report.

The required contribution rate of 22.16% of pay shown on page 20 was designed to comply with Minnesota Statutes. Users of this report should be aware that contributions made at that rate do not guarantee benefit security. Please note that, given the importance of benefit security to any retirement system, we encourage all retirement systems to consider implementing funding programs that provide for contributions in excess of the levels listed in their valuation report.

The contribution rate in this report is determined using the actuarial assumptions and methods disclosed in Section 4 of this report. This report includes risk metrics on page 8, but does not include a robust assessment of the risks of future experience not meeting the actuarial assumptions. Additional assessment of risks was outside the scope of this assignment. We encourage a review and assessment of investment and other significant risks that may have a material effect on the plan's financial condition.

This valuation assumed the continuing ability of the plan sponsor to make the contributions necessary to fund this plan. A determination regarding whether or not the plan sponsor is actually able to do so is outside our scope of expertise and was not performed.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law. Due to the limited scope of our assignment, we did not perform an analysis of the potential range of such future measurements.

This report should not be relied on for any purpose other than the purpose described in this report. Determinations of financial results associated with the benefits described in this report in a manner other than the intended purpose may produce significantly different results.

Actuarial assumptions, including discount rates, mortality tables and others identified in this report, are prescribed by Minnesota Statutes Section 356.215, the Legislative Commission on Pensions and Retirement (LCPR), and the Board of Trustees. These parties are responsible for selecting the plan's funding policy, actuarial valuation methods, asset valuation methods, and assumptions. The policies, methods and assumptions used in this valuation are those that have been so prescribed and are described in the Actuarial Basis of this report. The Fund is solely responsible for communicating to GRS any changes required thereto.

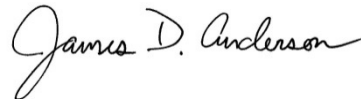

This report has been prepared by actuaries who have substantial experience valuing public employee retirement systems. Bonita J. Wurst and James D. Anderson are Members of the American Academy of Actuaries (MAAA) and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. The signing actuaries are independent of the plan sponsor.

We will be pleased to review this report with you at your convenience.

Respectfully submitted,

Bonita J. Wurst, ASA, EA, FCA, MAAA

James D. Anderson, FSA, EA, MAAA

BJW/JDA:rmn:dj

Other Observations

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if there are no changes in benefits or contributions and all actuarial assumptions are met (including the assumption of the plan earning 8.0% on the actuarial value of assets), it is expected that:

- (1) The unfunded actuarial accrued liabilities will increase in the short-term but will be fully amortized after approximately 40 years, and
- (2) The funded status of the plan will continue to increase towards a 100% funded ratio.

Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with regard to any funded status measurements presented in this report:

- (1) The measurement is inappropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations; in other words, of transferring the obligations to an unrelated third party in an arm's length market value type transaction.
- (2) The measurement is dependent upon the actuarial cost method which, in combination with the plan's amortization policy, affects the timing and amounts of future contributions. The amounts of future contributions will most certainly differ from those assumed in this report due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement in this report of 100% is not synonymous with no required future contributions. If the funded status were 100%, the plan would still require future normal cost contributions (i.e., contributions to cover the cost of the active membership accruing an additional year of service credit).
- (3) The measurement would produce a different result if the market value of assets were used instead of the actuarial value of assets.

Discount Rate Assumption

In a 2017 analysis of long-term rate of investment return and inflation assumptions, GRS suggested that an investment return assumption in the range of 7.12% to 7.95% would be reasonable. The current assumed rate, which is mandated by Minnesota Statutes, is 8.00% and is at the upper end of the reasonable range. This report also concluded that the probability of exceeding the current 8.00% assumption over 20 years is only 38%. Please see the draft report, St. Paul Teachers' Retirement Fund Association 5-Year Experience Study, dated November 14, 2017 for additional information.

Professional standards require GRS to evaluate this assumption each year. If an assumption is deemed unreasonable based on current information, we would have to qualify the work that we do for the Fund.

GRS believes the 8.00% return rate is within the reasonable range for this valuation as of July 1, 2017, but cautions the Fund that declining capital market and inflation expectations may result in 8.00% being deemed unreasonable for future valuations. In such an instance we would still comply with statutes and produce the valuation based upon 8.00%, but Actuarial Standards would require us to issue a "qualified" report.

GRS previously recommended reducing the investment return assumption to 7.50%, and the Fund has proposed legislation to enact this recommended assumption change. Although the proposed legislation passed the Minnesota House and Senate during 2017, the legislation was vetoed by the Governor. Reducing the investment return assumption remains a priority for the Fund.

If a lower investment return rate were used in this valuation instead of 8.00%, the unfunded liability and the contribution deficiency would be higher than shown in this report. Note that estimated results based on a 7.0% discount rate are shown on page 6.

Summary of Valuation Results

This report sets forth the results of the actuarial valuation of the St. Paul Teachers' Retirement Fund Association ("Fund") as of July 1, 2017. The purposes of this valuation are:

1. To develop the Actuarially Determined Contribution (ADC) rates.
2. To compare the ADC rates with the current funding policy in place.
3. To review the funding status of the Fund.

The funding status, in basic terms, is a comparison of the Fund's liabilities to assets expressed as either an unfunded liability (i.e., the difference between the assets and liabilities) or as a ratio of assets to liabilities. This comparison can be measured in various ways. Fund liabilities are dependent on the actuarial assumptions and actuarial cost method. Fund assets can be measured at market value, book value, or some variation to smooth the fluctuations that invariably occur from year to year. The Actuarial Value of Assets is determined from market value with investment gains and losses smoothed over a five-year period.

Contribution Rates

The required contribution rate (as defined in Section 356 of Minnesota Statutes) decreased slightly, from 22.44% of pay for the fiscal year ending June 30, 2017, to 22.16% of pay for the fiscal year ending June 30, 2018. The statutory contribution rate increased from 21.52% of payroll to 21.64% of payroll. The contribution shortfall decreased from 0.92% of pay as of July 1, 2016 to 0.52% of pay. In dollar terms, the deficiency was reduced from \$2.5 million to \$1.5 million per year. On a market value of assets basis, statutory contributions are deficient by 0.66% of pay.

Current statutory contributions are not sufficient to fully amortize the unfunded actuarial accrued liability over the remaining statutory amortization period of 25 years. Based on current statutory contributions, the actuarial value of assets, and other methods and assumptions described in this report, the unfunded liability is expected to increase in the short-term but be fully amortized after approximately 40 years.

Assets and Liabilities

On an actuarial value of assets basis, the funding ratio increased from 63.25% at July 1, 2016, to 64.45% at July 1, 2017.

Total actuarial liabilities increased from \$1,592.6 million to \$1,611.2 million. One of the key assumptions in the valuation is the date COLAs are expected to be paid. In the prior valuation, a 2% COLA was expected to be paid in approximately 39 years and a 2.5% COLA was expected to be paid in 50 years. For the 2017 valuation, a 2% COLA is expected to be paid in 25 years and the 2.5% COLA is expected to be paid in 35 years. This earlier recognition of assumed COLA increases was the primary reason for the increase in actuarial liabilities.

As shown in the table on the following page, on a market value of assets basis, the funding ratio increased from 60.26% at July 1, 2016, to 64.07% at July 1, 2017. This increase was primarily due to exceeding the 8% investment return target for the prior fiscal year.

Summary of Valuation Results

Market Value of Assets Basis

A 5-year smoothed value of assets, used to determine both the funded status and required contribution level, reduces the volatility of the valuation results. As of July 1, 2017, the actuarial value of assets was 100.6% of market value.

The following table shows the July 1, 2017 valuation results, on both a market value and smoothed actuarial value basis:

| Results as of July 1, 2017 | | |
|--------------------------------------|------------------------|---------------------------|
| | Market Value of Assets | Actuarial Value of Assets |
| Actuarial Accrued Liability | \$1,611.2 million | \$1,611.2 million |
| Value of Assets | \$1,032.2 million | \$1,038.5 million |
| Unfunded Actuarial Accrued Liability | \$ 579.0 million | \$ 572.7 million |
| Funded Ratio | 64.07% | 64.45% |
| Statutory Contribution Rate | 21.64% of pay | 21.64% of pay |
| Required Contribution Rate | 22.30% of pay | 22.16% of pay |
| Deficiency | 0.66% of pay | 0.52% of pay |

Changes Reflected in the Valuation

Assumption Changes

Combined Service Annuity Assumption

Updated loading factors to account for members with Combined Service Annuities (CSA) were approved by the Legislative Commission on Pensions and Retirement (LCPR) based on an analysis completed by the LCPR actuary and documented in a report dated October 2016. The prior CSA assumptions were based on a 2001 study performed by a prior actuary. The factors were updated as follows:

- Active members: Reduced from 2% for member liability if hired after June 30, 1989 (7% for members hired prior to July 1, 1989) to 0%.
- Deferred Vested members: Reduced from 30% to 20%.
- Non-vested Terminated members: Reduced from 30% to 9%.

Summary of Valuation Results

COLA Assumption

Minnesota Statutes were revised in 2014 to establish a process for setting a COLA assumption for purposes of preparing actuarial valuations. Pursuant to this legislation, if the plan has not yet reached the statutory funding ratio threshold triggering payment of a 2.0% or 2.5% COLA, the actuary must perform a projection to determine whether the plan is expected to attain the funding ratio threshold in a timeframe that is actuarially meaningful, and if so, the expected change to a 2.0% or 2.5% COLA rate must be reflected in the liability calculations.

We performed a projection of liabilities and assets, using the 2017 valuation results as a baseline and assuming future experience follows the valuation assumptions prescribed in Minnesota Statutes. In addition, the projection utilized the following methods and assumptions:

- Future investment returns of 8.00%
- Open group; stable active population (new member profile based on average new members hired in recent years)
- The COLA is assumed to be 1.0% per year until the funding ratio threshold required to pay a 2.0% COLA is reached and is assumed to be 2.0% per year until the threshold required to pay a 2.5% COLA is reached
- Current statutory contribution levels including scheduled increases

Based on these assumptions and methods, the projection indicates that this plan is expected to attain the funding ratio threshold to pay the 2.0% COLA in approximately 25 years, and the funding ratio threshold to pay the 2.5% COLA in approximately 35 years. The liabilities in this report are based on the assumption that the COLA will equal 1.0% through 2041, 2.0% for 2042 through 2051, and 2.5% for all years thereafter. This is only an assumption; not a guarantee of benefits to be paid. Actual timing will depend upon actual experience.

Plan Changes

There have been no plan changes since the previous valuation as of July 1, 2016.

Summary of Valuation Results

Effects of Changes (Actuarial Value of Assets Basis)

The combined impact of the changes described above was to decrease the accrued liability by \$8.2 million and decrease the required contribution by 0.12% of pay, as follows:

| | Results as of July 1, 2017 (\$000s) | |
|--|-------------------------------------|-------------------------------|
| | Prior to Changes | Reflecting Assumption Changes |
| A. FUNDING RATIOS | | |
| 1. Accrued Liability Funding Ratio | | |
| a. Current Assets | \$ 1,038,467 | \$ 1,038,467 |
| b. Actuarial Accrued Liability | 1,619,387 | 1,611,208 |
| c. Funding Ratio | 64.13% | 64.45% |
| 2. Projected Benefit Funding Ratio | | |
| a. Current and Expected Future Assets | \$ 1,771,640 | \$ 1,773,650 |
| b. Current and Expected Future Benefit Obligations | 1,850,927 | 1,847,501 |
| c. Funding Ratio | 95.72% | 96.00% |
| B. REQUIRED CONTRIBUTIONS - CHAPTER 356 | | |
| 1. Normal Cost | 8.87% | 8.93% |
| 2. Supplemental Contribution Amortization | 13.08% | 12.90% |
| 3. Allowance for Administrative Expenses | 0.33% | 0.33% |
| 4. Total | 22.28% | 22.16% |

Participants

Active membership increased 0.5% during fiscal year 2017 from 3,534 to 3,550 (figures include members on leave of absence). The level of member contributions received during the year also increased.

Total participants receiving benefits under the Fund, including disabled retirees, beneficiaries, and alternate payees, increased 3.4% during fiscal year 2017 from 3,723 to 3,851. Total expenditures for these benefits increased from \$111.2 million to \$112.8 million during fiscal year 2017, or 1.4%.

Asset Valuation Method

The method used to develop the Fund's Actuarial Value of Assets, as set out in the LCPR Standards for Actuarial Work, is as follows: In years when Fund assets earn above the assumed rate (i.e., experience gain) or below the assumed rate (i.e., experience loss) the gain (or loss) will be recognized over five years. This approach both removes volatility of the Fund's level of required contributions and ensures the Fund's assets will track the market value of assets.

Summary of Valuation Results

(Dollars in Thousands)

Experience Analysis

The experience analysis provides a comparison of actual experience to projected experience based on the actuarial assumptions over the past year. Overall, the Fund had an experience gain of \$16.2 million. In general, salary increases were slightly smaller than predicted under the current valuation assumption and produced an actuarial gain of \$145,000. Additionally, demographic experience resulted in an experience gain of \$8.2 million.

The Fund also experienced an experience gain due to investments. The market value of Fund assets returned 13.93% (net of fees) for the year ended June 30, 2017, greater than the 8.00% assumption. However, only 20% of this asset gain was recognized in the actuarial value of assets. Investment gains from previous years were recognized this year and resulted in a gain of \$8.0 million on the actuarial value of assets. The rate of return on the actuarial value of assets for 2017 is 8.8%.

The changes in unfunded actuarial accrued liabilities are shown in Table 10 in Section 3.

Summary of Valuation Results

(Dollars in Thousands)

Sensitivity Tests

During the 2017 legislative session, the Legislative Commission on Pensions and Retirement (LCPR) enacted a new sensitivity disclosure requirement for the Fund's 2017 valuations. Per the LCPR's requirement, we have calculated the liabilities associated with the following scenarios:

- 1) 7% interest rate assumption
- 2) 9% interest rate assumption
- 3) 1.0% post-retirement benefit increase for all future years (no COLA trigger)
- 4) 2.5% post-retirement benefit increase for all future years (no COLA trigger)

In each case, all other assumptions were unchanged from those used to develop the final valuation results in this report. Note that we believe the 9% interest rate assumption is an unrealistic long term assumption.

| | Final Valuation Assumptions | Final Valuation Assumptions with | | | |
|---|-----------------------------------|----------------------------------|-------------|-----------|-----------|
| | | 7% interest | 9% interest | 1% COLA | 2.5% COLA |
| Normal Cost Rate, % of Pay | 9.0% | 11.2% | 7.3% | 8.6% | 9.6% |
| Amortization of Unfunded Accrued Liability, % of Pay | 12.9% | 15.5% | 10.4% | 12.5% | 17.3% |
| Expenses (% of Pay) | 0.3% | 0.3% | 0.3% | 0.3% | 0.3% |
| Total Required Contribution, % of Pay | 22.2% | 27.0% | 18.0% | 21.5% | 27.2% |
| Contribution Sufficiency/(Deficiency), % of Pay | (0.5)% | (5.2)% | 3.6 % | 0.3 % | (5.6)% |
| Accrued Liability Funding Ratio (AVA basis) | 64.5% | 57.9% | 71.2% | 65.2% | 57.5% |
| Actuarial Accrued Liability (in millions) | \$1,611.2 | \$1,794.7 | \$1,457.5 | \$1,593.4 | \$1,807.6 |
| Unfunded Accrued Liability (in millions) | \$ 572.7 | \$ 756.2 | \$ 419.0 | \$ 554.9 | \$ 769.1 |

Notes pertaining to numbered columns:

- (5) The Funded ratio is the most widely known measure of a plan's financial strength, but the trend in the funded ratio is much more important than the absolute ratio. The funded ratio should trend to 100%. As it approaches 100%, it is important to re-evaluate the level of investment risk in the portfolio and potentially to re-evaluate the assumed rate of return.
- (6) and (7) The ratio of Retiree liabilities to total accrued liabilities gives an indication of the maturity of the system. As the ratio increases, cash flow needs increase, and the liquidity needs of the portfolio change. A ratio on the order of 50% indicates a maturing system.
- (8) and (9) The ratios of liabilities and assets to payroll gives an indication of both maturity and volatility. Many systems have ratios between 500% and 700%. Ratios significantly above that range may indicate difficulty in supporting the benefit level as a level % of payroll.
- (10) and (11) The portfolio standard deviation measures the volatility of investment return. When multiplied by the ratio of assets to payroll it gives the effect of a one standard deviation asset move as a percent of payroll. This figure helps users understand the difficulty of dealing with investment volatility and the challenges volatility brings to sustainability.
- (12) The ratio of unfunded liability to payroll gives an indication of the plan sponsor's ability to actually pay off the unfunded liability. A ratio above approximately 300% or 400% may indicate difficulty in discharging the unfunded liability within a reasonable time frame.
- (13) and (14) The ratio of non-investment cash flow to assets is an important measure of sustainability. Negative ratios are common and expected for a maturing system. In the longer term, this ratio should be on the order of approximately -4%. A ratio that is significantly more negative than that for an extended period could be a leading indicator of potential exhaustion of assets.
- (15) and (16) Investment return is probably the largest single risk that most systems face. The year by year return and the 5-year geometric average give an indicator of the realism of the systems assumed return. Of course, past performance is not a guarantee of future results.

SECTION 1

ASSET INFORMATION

Assets of the Plan

The cost value of the plan assets decreased from \$838.7 million as of June 30, 2016 to \$818.7 million as of June 30, 2017. The market value of the plan assets increased from \$959.7 million as of June 30, 2016 to \$1,032.2 million as of June 30, 2017. The expected return on assets using the valuation investment return rate assumption of 8.0 percent was \$75 million. The actual plan experience showed a return on assets of \$128.7 million. Twenty percent of the asset return above the expected \$75 million is recognized as an actuarial gain in the development of the actuarial value of assets. The recognized gain from the current year, along with the portion of prior gains and losses recognized this year, results in an overall gain of \$8.0 million on the actuarial value of assets.

The 2014 and 2017 asset gains as well as the 2015 and 2016 asset losses (investment returns that fell above (gain) or below (loss) the expected return - amounts shown on the next page) will be recognized incrementally over the next four years. As of July 1, 2017, there are slightly more unrecognized asset losses than gains, and the Actuarial Value of Assets (AVA) is only slightly higher than the Market Value of Assets (MVA).

Table 1 shows the composition of assets as of June 30, 2017 and the development of the actuarial value of assets as of June 30, 2017. Table 2 details the development of asset values during fiscal year 2017.

¹ Includes members not valued in prior valuation who repaid refunds or otherwise restored prior service.

² Includes alternate payees of retired participants (42), disabled participants (1), and survivors (1).

SECTION 3

FUNDING STATUS

Table 8
Actuarial Balance Sheet
as of July 1, 2017
(dollars in thousands)

| | |
|---|---------------------|
| A. CURRENT ASSETS (TABLE 1; Line F.4) | \$ 1,038,467 |
| | |
| B. EXPECTED FUTURE ASSETS | |
| 1. Present Value of Expected Future Statutory Supplemental Contributions* | \$ 498,890 |
| 2. Present Value of Future Normal Costs | 236,293 |
| 3. Total Expected Future Assets | <u>\$ 735,183</u> |
| | |
| C. TOTAL CURRENT AND EXPECTED FUTURE ASSETS | <u>\$ 1,773,650</u> |
| | |
| D. TOTAL CURRENT AND EXPECTED FUTURE BENEFIT OBLIGATIONS | <u>\$ 1,847,501</u> |
| | |
| E. CURRENT AND FUTURE UNFUNDED ACTUARIAL LIABILITY (D - C) | \$ 73,851 |

* Includes the effect of scheduled employee and employer contribution increases and supplemental state contributions.

Table 9

Determination of Unfunded Actuarial Accrued Liability (UAAL) and Supplemental Contribution Rate as of July 1, 2017 (dollars in thousands)

| | Actuarial Present Value of Projected Benefits | Actuarial Present Value of Future Normal Costs | Actuarial Accrued Liability |
|---|--|---|-----------------------------------|
| A. DETERMINATION OF ACTUARIAL ACCRUED LIABILITY (AAL) | | | |
| 1. Active Members* | | | |
| a. Retirement Benefits | \$ 635,767 | \$ 172,486 | \$ 463,281 |
| b. Disability Benefits | \$ 13,751 | \$ 5,338 | \$ 8,413 |
| c. Surviving Spouse and Child Benefits | \$ 9,245 | \$ 3,207 | \$ 6,038 |
| d. Vested Withdrawals | \$ 36,648 | \$ 41,163 | \$ (4,515) |
| e. Refund Liability Due to Death or Withdrawal | \$ 2,989 | \$ 14,099 | \$ (11,110) |
| f. Total | \$ 698,400 | \$ 236,293 | \$ 462,107 |
| 2. Deferred Retirements | \$ 77,599 | \$ 0 | \$ 77,599 |
| 3. Former Members without Vested Rights | \$ 2,812 | \$ 0 | \$ 2,812 |
| 4. Annuitants | \$ 1,068,690 | \$ 0 | \$ 1,068,690 |
| 5. Total | \$ 1,847,501 | \$ 236,293 | \$ 1,611,208 |
| B. DETERMINATION OF UNFUNDED ACTUARIAL ACCRUED LIABILITY (UAAL) | | | |
| 1. Actuarial Accrued Liability (A.5) | | | \$ 1,611,208 |
| 2. Current Assets (Table 1; Line F.4) | | | \$ 1,038,467 |
| 3. Unfunded Actuarial Accrued Liability (B.1 - B.2) | | | \$ 572,741 |
| C. DETERMINATION OF SUPPLEMENTAL CONTRIBUTION RATE** | | | |
| 1. Present Value of Future Payrolls Through the Amortization Date of June 30, 2042*** | | | \$ 4,440,299 |
| 2. Supplemental Contribution Rate (B.3 / C.1) | | | 12.90% |

* Includes members on leave of absence.

** The amortization of the unfunded actuarial accrued liability (UAAL) using the current amortization method results in initial payments less than the "interest only" payment on the UAAL. Payments less than the interest only amount will result in the UAAL increasing for an initial period of time.

***Calculated using 8.0% annual investment return rate.

SECTION 4

ACTUARIAL METHODS AND ASSUMPTIONS

Table 12

Actuarial Methods and Assumptions as of July 1, 2017

I. ACTUARIAL COST METHOD

An Actuarial Cost Method is a set of techniques used by the actuary to develop contribution levels under a retirement plan. The Actuarial Cost Method used in this valuation for all purposes is the Entry Age Actuarial Cost Method. Under this Method, a Normal Cost is developed by amortizing the actuarial value of benefits expected to be received by each active participant (as a level percentage of pay) over the total working lifetime of that participant, from hire to termination. Years of Service for valuation purposes was provided by the Retirement Fund. Age as of the valuation date was calculated based on the dates of birth provided by the Retirement Fund. Entry Age for valuation purposes was calculated as the age on the valuation date minus the years of service on the valuation date.

To the extent that current assets and future Normal Costs do not support participants' expected future benefits, an Unfunded Actuarial Accrued liability ("UAAL") develops. The UAAL is amortized over the closed statutory amortization period ending June 30, 2042 using level percent-of-payroll assuming payroll increases of 4.00% per annum. The total contribution developed under this method is the sum of the Normal Cost and the payment toward the UAAL.

II. CURRENT ACTUARIAL ASSUMPTIONS

The assumptions were last updated for the July 1, 2017 valuation as a result of an analysis of Combined Service Annuity assumptions completed by the LCPR Actuary and documented in a report dated October 2016. Other assumptions are based on an experience study for the five-year period of July 1, 2006 to June 30, 2011, as well as a legislated change to the investment return assumption effective July 1, 2015.

An experience study for the 2011 to 2016 period is currently in process. This report recommends many changes to demographic assumptions, expected to be effective at a future date.

A. Demographic Assumptions

Mortality:

1. Healthy Mortality*:

- a. Male: RP-2000 Combined Mortality Table for males projected with Scale AA to 2020 set back 1 year
- b. Female: RP-2000 Combined Mortality Table for females projected with Scale AA to 2020 set back 3 years

2. Disabled Mortality:

- a. Male: RP-2000 Disabled Life Mortality Table for males
- b. Female: RP-2000 Disabled Life Mortality Table for females

* Mortality rates were adjusted to include margin for future mortality improvement as described in the table name above.

Asset Value: The actuarial value of assets is smoothed by using a five-year average market value.

Table 12

Actuarial Methods and Assumptions as of July 1, 2017

C. Other Assumptions

| | |
|---|---|
| Marital Status: | It is assumed that 75% of male members and 60% of female members have an eligible spouse. The male spouse is assumed to be two years older than the female spouse. Married members are assumed to have two dependent children. |
| Deferred Benefit Commencement: | Basic Plan members who terminate vested are assumed to commence benefits at age 61. Coordinated Plan members are assumed to commence benefits at age 62. If the member is already past the assumed deferral age, the member is assumed to commence benefits one year from the valuation date. |
| Administrative Expenses: | Prior year administrative expenses (excluding investment expenses) are expressed as a percentage-of-payroll and then applied to current projected payroll. |
| Refund of Contributions: | All employees withdrawing after becoming eligible for a deferred benefit take the larger of their contributions accumulated with interest or the value of their deferred benefit. Account balances for deferred members accumulate interest until the assumed benefit commencement date and are discounted back to the valuation date. |
| Allowance for Combined Service Annuity: | 20.0% load on liabilities for former, vested members. 9.0% load on liabilities for former, non-vested members. |
| Missing Salary and Salary Minimums: | Active members with reported salaries of \$100 or less were assumed to have the average non-zero active salary. Active members with salaries less than those reported at the prior valuation date are valued using their prior salary amount. Active members who have been hired within one year of the valuation date have had their pay annualized by dividing by months of service credited, not to exceed the average non-zero active salary. For members on leave of absence at valuation date who were not on leave at the prior valuation date, the prior year's valuation pay was used. |
| Missing Data for Deferred Vested Members: | Deferred vested members without a reported benefit and without salary information were assumed to have a final average salary of \$40,000. |
| Decrement Timing: | Retirement and Termination: end of valuation year – consistent with retirements and terminations occurring at the end of the school year. Death and Disability: middle of valuation year. |
| Eligibility Testing: | Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur. |
| Service Credit Accruals: | It is assumed that members accrue one year of service credit per year. Exact fractional service is used to determine the amount of benefit payable. |

Table 12

Actuarial Methods and Assumptions as of July 1, 2017

Valuation of Future Post-Retirement Benefit Increases: If the plan has reached the funding ratio threshold required to pay a different benefit increase, Minnesota Statutes require the benefit increase rate to be reflected in the liability calculations. If the plan has not yet reached the funding ratio threshold required to pay a benefit increase, Minnesota Statutes require a projection to be performed to determine the expected attainment of the funding ratio thresholds, and the expected payment of benefit increases must be reflected in the liability calculations.

Supplemental Contributions: 1996 legislation provides for a variable amortization aid contribution paid annually on July 15. We assumed the annual amortization aid contribution will equal \$838,000, which was the actual contribution for the most recent fiscal year. Additionally, according to 1997 legislation, annual supplemental contributions currently equal to \$2,827,000 are scheduled to be paid on October 1. According to 2014 legislation, the State of Minnesota will make annual additional supplemental contributions of \$7,000,000 on October 1. The contributions described herein will continue until the plan is 100% funded or until June 30, 2042, whichever occurs earlier.

Projected Annual Payroll Calculation: The census data as of July 1, 2017 reflects retirements and terminations occurring during the months of May and June; however, it does not necessarily reflect the replacements hired to fill their positions who may have hire dates in August and September. We assumed that May and June retirements are replaced by members coming in at the B.A. entry salary level of \$44,759; and the Projected Annual Payroll for the fiscal year ending June 30, 2018 includes this replacement salary amount.

Changes in Actuarial Assumptions Since the Prior Valuation: The Combined Service Annuity (CSA) loads on liabilities were changed as follows:

| | Active Pre-89 | Active Post-89 | Vested Terminated | Non-Vested Terminated |
|---------|------------------|-------------------|----------------------|--------------------------|
| Prior | 7.0% | 2.0% | 30.0% | 30.0% |
| Current | 0.0% | 0.0% | 20.0% | 9.0% |

The assumed cost-of-living adjustments were changed from 1.00% per year through 2054; 2.00% beginning 2055; 2.50% beginning 2066 to 1.00% per year through 2041; 2.00% beginning 2042; 2.50% beginning 2052.

| 2016 | 10.00% | 9.75% | 3.64% |
| 2017 | 10.00% | 10.00% | 3.64% |

PARTICIPANTS

Professional Educators first employed prior to July 1, 1978 by schools in the City of St. Paul or St. Paul College whose position requires a license from the Minnesota Department of Education, who are not covered under the Social Security Act.

ACCREDITED SERVICE

Service which has been verified and accredited by the Association for the purpose of determining contributions and benefits (may include service earned while working outside of St. Paul Public Schools, previous St. Paul service, military service and governmental service).

ALLOWABLE ST. PAUL SERVICE

Service earned as a licensed educator in the St. Paul Public Schools, in the St. Paul College, or as an employee of the Association. Also includes service credited after receipt of payment as required, for licensed educators on leave.

SALARY

Total compensation earned during a school year (July 1 to June 30) excluding lump sum payments for unused leave at termination and employer-paid insurance coverage.

AVERAGE SALARY

Average of the highest five years of salary during the last 10 years of St. Paul service while making contributions or while disabled.

Summary of Benefit Provisions for Basic Members as of July 1, 2017

NORMAL RETIREMENT BENEFIT

Eligibility

Attainment of age 65 and 5 years of Accredited Service.

Benefit

2.50% of Average Salary for each year of Accredited Service.

EARLY RETIREMENT BENEFIT

Eligibility

Attainment of age 55 and 5 years of Accredited Service.

Benefit

The greater of the following benefits:

- 2.00 percent of Average Salary per year of Accredited Service, subject to a maximum of 40 years with a 0.25% reduction for each month the member is under age 65. If the member has 25 years of Accredited Service, the reduction is taken from age 60, therefore no reduction is required if the member is age 60 or older. No reduction is taken if age plus years of Accredited Service totals at least 90.
- 2.50 percent of Average Salary per year of Accredited Service, subject to a maximum of 40 years, reduced for each month the member is under age 65 using linear interpolation of the table listed below.

| <u>Age at Retirement</u> | <u>Under Age 62 or Less Than 30 Years of Service</u> | <u>Age 62 or Older with 30 Years of Service</u> |
|--------------------------|--|---|
| 55 | 0.5376 | |
| 56 | 0.5745 | |
| 57 | 0.6092 | |
| 58 | 0.6419 | |
| 59 | 0.6726 | |
| 60 | 0.7354 | |
| 61 | 0.7947 | |
| 62 | 0.8507 | 0.8831 |
| 63 | 0.9035 | 0.9246 |
| 64 | 0.9533 | 0.9635 |
| 65 | 1.0000 | 1.0000 |

Summary of Benefit Provisions for Basic Members as of July 1, 2017

DISABILITY RETIREMENT BENEFIT

Eligibility

Total and permanent disablement before attaining age 65 and 5 years of Accredited Service.

Benefit

If the member is under age 65, 75 percent of the member's annual contract salary less any Social Security and Workers' Compensation benefits payable until age 65. At age 65, a normal retirement benefit is calculated using the projected service and average salary as if the member had continued to teach in their position held at the time of disability. Members age 65 or older at time of disability receive a normal retirement benefit.

DEFERRED RETIREMENT BENEFIT

Eligibility

5 years of Accredited Service.

Benefit

Benefit computed under law in effect at termination and payable as a normal or early retirement benefit. For members hired on or before June 30, 2006, the benefit is augmented at 3.00 percent compounded annually from the 1st of the month following termination until the January 1st after turning age 55 and then augmented at 5.00 percent compounded annually from that date to July 1, 2012. For members hired after June 30, 2006, the benefit is augmented at 2.50 percent compounded annually from the 1st of the month following termination to July 1, 2012. Augmentation for all members, regardless of hire date, changed to 2.00 percent as of July 1, 2012 for the portion of benefit deferral which occurs after June 30, 2012.

ACTIVE SURVIVOR BENEFIT (Family Benefit)

Eligibility

Active member with three years of Accredited Service.

Benefit

- Children's Benefit: 25 percent of the maximum Bachelor of Arts salary for the year in which the member died for each eligible child up to a maximum of two. Benefits are paid until the child attains age 18, or 22 for full-time students.
- Spousal Benefit: 15 percent of the maximum Bachelor of Arts salary for an eligible spouse who has legal custody of an eligible child. Spousal benefits cease when the spouse remarries, dies, or elects the regular survivor benefit. Electing the regular survivor benefit does not disqualify the child from receiving the family benefit.

Summary of Benefit Provisions for Basic Members as of July 1, 2017

SURVIVOR BENEFIT (Active or Retired Member)

Eligibility

Active member or retired member with five years of Accredited Service. A surviving spouse must have been married to the member for three years at the earlier of his death or retirement.

Benefit

Retirement benefit earned at the time of death or retirement, whichever is earlier, reduced by the use of one hundred percent joint survivorship tables, based on the ages of the member and survivor at the time of retirement.

REFUND OF CONTRIBUTIONS

Eligibility

Termination or death where no annuity is payable, or prior to age 55, if a refund of contributions is chosen in lieu of an annuity.

Benefit

Member contributions with 6.00 percent interest accrued before July 1, 2011 with 4.00 percent accrual thereafter.

REEMPLOYED ANNUITANTS

The School District shall make the regular employer contribution and additional employer contribution, plus a supplemental contribution equal to 2.5% of salary, on behalf of any retired member who is reemployed by the School District. Reemployed annuitants do not accrue additional benefits.

NORMAL FORM OF RETIREMENT BENEFITS

Unreduced annuity payments made until the death of the member, with a 100 percent Joint & Survivor adjusted pension payable to the surviving beneficiary.

BENEFIT INCREASES

If the Accrued Liability Funding Ratio, based on Actuarial Value of Assets, as determined by the two consecutive and most recent actuarial valuations are:

Less than 80 percent for two consecutive years, the COLA: 1.00 percent

Between 80 percent and 90 percent for two consecutive years, the COLA: 2.00 percent

If at least 90 percent for two consecutive years, the COLA: 2.50 percent

CHANGES IN PLAN PROVISIONS

There have been no changes in plan provisions since the prior valuation.

Summary of Benefit Provisions for Coordinated Members as of July 1, 2017

STATUTORY CONTRIBUTIONS

Statutory contribution rates for members and their employers are shown as a percent-of-pay below.

| <u>Contribution After June 30,</u> | <u>Member</u> | <u>Employer Regular</u> | <u>Employer Additional</u> |
|------------------------------------|---------------|-----------------------------|--------------------------------|
| 2014 | 6.50% | 5.50% | 3.84% |
| 2015 | 7.00% | 6.00% | 3.84% |
| 2016 | 7.50% | 6.25% | 3.84% |
| 2017 | 7.50% | 6.50% | 3.84% |

PARTICIPANTS

Professional educators in the public schools of the City of St. Paul, excluding charter schools, whose position requires a license from the Minnesota Department of Education, and who are covered under the Social Security Act and make contributions to the St. Paul Teachers' Retirement Fund Association, are covered under the Coordinated Plan.

ALLOWABLE SERVICE

Service earned as a licensed educator in the St. Paul Public Schools, in the St. Paul College, or in certain charter schools, or as an employee of the Association. Also includes service credited after receipt of payment as required, for licensed educators on leave. Service is granted on a proportional basis for part-time teachers.

SALARY

Total compensation excluding lump sum payments for unused leave at termination and employer-paid insurance coverage.

AVERAGE SALARY

Average of the highest five successive years of salary while making contributions. In cases where the Allowable Service is less than five years, Average Salary is based on the Allowable Service years.

NORMAL RETIREMENT BENEFIT

Eligibility

Three years of Allowable Service. The eligibility age is 65 for those hired before July 1, 1989 and the earlier of eligibility for full Social Security retirement benefits to a maximum of age 66 for those hired on or after July 1, 1989. A Proportionate Retirement Annuity is available at Normal Retirement Age with one year of Allowable Service.

Benefit

1.70 percent of Average Salary for each year of Allowable Service rendered before July 1, 2015 and 1.90 percent of Average Salary for each year of Allowable Service rendered after June 30, 2015.

Summary of Benefit Provisions for Coordinated Members as of July 1, 2017

EARLY RETIREMENT BENEFIT

Eligibility

Attainment of age 55 and 3 years of Allowable Service.

Benefit

Members hired before July 1, 1989 are eligible for the greater of the following benefits. Members hired after July 1, 1989 are eligible for the benefits shown in item (b):

- a) For the first ten years of Allowable Service, 1.20 percent of Average Salary for each year of Allowable Service rendered prior to July 1, 2015, plus 1.40 percent of Average Salary for each year of Allowable Service rendered after June 30, 2015. Additionally, for each subsequent year of Allowable Service in excess of ten years, 1.70 percent of Average Salary for each year rendered prior to July 1, 2015, plus 1.90 percent of Average Salary for each year rendered after June 30, 2015. There is a reduction of 0.25 percent for each month the member is under age 65, or under age 62 with 30 years of Allowable Service. No reduction applies if the age plus years of service totals at least 90.

- b) 1.70 percent of Average Salary per year of Allowable Service rendered before July 1, 2015 and 1.90 percent of Average Salary for each year of service rendered after June 30, 2015 reduced for each month the member is under the Normal Retirement Age using linear interpolation of the factors in the table listed below.

| Normal Retirement Age: Age at Retirement | Under Age 62 or Less Than 30 Years of Service | | Age 62 or Older with 30 Years of Service | |
|---|--|--------|---|--------|
| | 65 | 66 | 65 | 66 |
| 55 | 0.5376 | 0.4592 | | |
| 56 | 0.5745 | 0.4992 | | |
| 57 | 0.6092 | 0.5370 | | |
| 58 | 0.6419 | 0.5726 | | |
| 59 | 0.6726 | 0.6062 | | |
| 60 | 0.7354 | 0.6726 | | |
| 61 | 0.7947 | 0.7354 | | |
| 62 | 0.8507 | 0.7947 | 0.8831 | 0.8389 |
| 63 | 0.9035 | 0.8507 | 0.9246 | 0.8831 |
| 64 | 0.9533 | 0.9035 | 0.9635 | 0.9246 |
| 65 | 1.0000 | 0.9533 | 1.0000 | 0.9635 |
| 66 | | 1.0000 | | 1.0000 |

Summary of Benefit Provisions for Coordinated Members as of July 1, 2017

DISABILITY RETIREMENT BENEFIT

Eligibility

Total and permanent disablement and three years of Allowable Service with service earned within the current fiscal year and at least two years of Allowable Service since the last interruption in service.

Benefit

Calculated as a normal retirement benefit payable for life without reduction for early commencement. At normal retirement age, the benefit converts from a disability benefit to a retirement benefit. The disability benefit is reduced by any Workers' Compensation benefits payable.

DEFERRED RETIREMENT BENEFIT

Eligibility

Three years of Allowable Service.

Benefit

Benefit computed under law in effect at termination and payable as a normal or early retirement benefit. For members hired on or before June 30, 2006, the benefit is augmented at 3.00 percent compounded annually from the 1st of the month following termination until the January 1st after turning age 55 and then augmented at 5.00 percent compounded annually from that date to July 1, 2012. For members hired after June 30, 2006, the benefit is augmented at 2.50 percent compounded annually from the 1st of the month following termination to July 1, 2012. Augmentation for all members, regardless of hire date, changed to 2.00 percent as of July 1, 2012 for the portion of benefit deferral which occurs after June 30, 2012.

SURVIVOR BENEFIT (Active Members)

Eligibility

Active member with three years of Allowable service. A surviving spouse is defined as the person legally married to the member at the time of death. If none, a dependent child who is the legal child of the member, who is less than 20 years of age and unmarried.

Benefit

Retirement benefit earned at the time of death with choices for either a reduced for 100 percent joint survivorship, or 5-, 10-, 15-, or 20-year term certain. The benefit is available immediately upon application. Actuarial reductions assuming 2.5% augmentation for the calculation of the survivorship portion of a 100 percent joint and survivor benefit are actuarially determined based on the member's and survivor's ages at the death of the member.

Early retirement reductions apply to the survivor benefit based on the member's age when deceased. If the deceased member had not yet attained age 55 at time of death, the additional early retirement reduction from age 55 to the age of the member at death applies at only one-half of the actuarial rate.

Summary of Benefit Provisions for Coordinated Members as of July 1, 2017

REFUND OF CONTRIBUTIONS

Eligibility

Termination or death where no annuity is payable or a refund of contributions is chosen in lieu of an annuity.

Benefit

Member contributions with 6.00 percent interest accrued until July 1, 2011 with 4.00 percent accrual thereafter.

REEMPLOYED ANNUITANTS

The School District shall make the regular employer contribution and additional employer contribution, plus a supplemental contribution equal to 2.5% of salary, on behalf of any retired member who is reemployed by the School District. Reemployed annuitants do not accrue additional benefits.

NORMAL FORM OF RETIREMENT BENEFITS

Straight life annuity. Actuarially equivalent options are available to provide post-retirement beneficiary or survivor benefits.

BENEFIT INCREASES

If the Accrued Liability Funding Ratio, based on Actuarial Value of Assets, as determined by the two consecutive and most recent actuarial valuations are:

Less than 80 percent for two consecutive years, the COLA: 1.00 percent

Between 80 percent and 90 percent for two consecutive years, the COLA: 2.00 percent

If at least 90 percent for two consecutive years, the COLA: 2.50 percent

CHANGES IN PLAN PROVISIONS

There have been no changes in plan provisions since the prior valuation.
