

Lessard-Sams Outdoor Heritage Council Laws of Minnesota 2016 Final Report

Date: July 27, 2018

Program or Project Title: Protect (Acquire) Key Forest Habitat Lands in Cass County - Phase VII

Funds Recommended: \$500,000

Manager's Name: Kirk Titus
Title: Land Commissioner
Organization: Cass County
Address: PO Box 25
City: Backus, MN 56435
Office Number: 218-947-7501
Email: kirk.titus@co.cass.mn.us

Legislative Citation: ML 2016, Ch. 172, Art. 1, Sec. 2, Subd. 3(f)

Appropriation Language: \$500,000 the second year is to the commissioner of natural resources for an agreement with Cass County to acquire land in fee in Cass County for forest wildlife habitat or to prevent forest fragmentation. A list of proposed land acquisitions must be provided as part of the required accomplishment plan.

County Locations: Cass

Regions in which work was completed:

- Northern Forest

Activity types:

- Protect in Fee

Priority resources addressed by activity:

- Forest

Summary of Accomplishments:

This project protected 277 acres of forest wildlife habitat in central Minnesota through fee title acquisition of key forest tracts. The title of the acquired lands will be held in fee by Cass County without a PILT obligation.

Process & Methods:

The central Minnesota region, especially areas in Cass County from Brainerd-Baxter to Walker, has and will continue to see some of the fastest population growth in the state. This growth has led to increased demands from use of this area, its natural resources and related public land base is needed to support this growth. Development of these private industrial parcels has resulted in the loss of Jack Pine Barrens in the landscape of Cass County. Industrial forest tracts held by Potlatch are currently being sold to private developers. These lands often provide access to existing public lands for resource management, are in-holdings in otherwise unfragmented landscapes, create contiguous wildlife corridors, and protect larger blocks of land especially useful for stand level management of habitat.

These key industrial forest tracts (i.e. in-holdings in large public land tracts, management access issues) are being considered or currently being offered for sale by a large industrial forest owner (Potlatch Corp) in this area. Market conditions and a willingness by this industrial forest owner to sell at this time is an opportunity that should be addressed now since it is narrow and may close at any time. The strategy is to acquire land that completes existing habitat corridors. The land acquired has existing forest access roads that have been used for management access for years. The sale of these lands to private individuals has already resulted in the loss of access for resource management on public lands and conversion from forest to agricultural use. The acquired lands were not being

pursued for convenience of management.

The acquired parcels play a key role in future management plans of the Jack Pine Barrens including the role of fire as a management tool. The loss of these parcels to private ownership would have resulted in lost access and possibly loss of forest land. Management of adjacent public lands would have been limited to frozen ground conditions which eliminates management tools such as site preparation, aerial seeding and prescribed burning for Jack Pine regeneration. This type of management requires year round access to existing public lands in the Jack Pine barrens landscape as well as protecting habitat in and around the surrounding areas.

The Cass County Forest Resource Management Plan directs the County to acquire land of this nature whenever possible to protect the management access. The Cass County Comprehensive plan requires no net loss of acres of public land and local unit of government input on all purchases and land sales. This project met the requirements of both plans and required stakeholder's input as part of the project. All purchases in this project were supported by both the County and Townships.

The Carder 160 parcel adjoins approximately 8,500 acres public land that provides a large contiguous block of wildlife corridor and habitat. This acquisition also permanently protects over 1,200 feet of undeveloped shoreline on the Boy River. This parcels adjoins other county managed lands at the Deep Portage Reserve where a recent bird count study was completed. From Dr. Gerald Niemi's report, "the results of the counts in 2016 reveal a diverse avifauna at Deep Portage, including five species defined by Audubon Minnesota as stewardship species in Minnesota and four species identified by the Minnesota Department of Natural Resources as Species of Greatest Conservation Need". Study results included 47 different bird species and nearly a thousand individuals were observed during a 3 day period on the one square mile plot. Niemi also reports that "Forest management at the site should be reviewed to determine how this management has facilitated or maintained such a high population of Golden-winged Warbler as well as several other species of concern in Minnesota". This acquisition supports the habitat needs of 47 different bird species.

Likewise, the Powers 40 acquisition adjoins the same 8,500 acres of public land as described above.

The May Potlatch 40 is a located less than 10 miles away from the rapidly developing area of Brainerd-Baxter. This key acquisition consolidates a 640 acre block of wildlife habitat while guaranteeing a permanent public access for hunting and forest management purposes.

The Bullmoose 40 parcel is surrounded by county managed land on 3 sides and is located in the middle of a 16,000 block of public managed land in Bull Moose Township. This parcel provides wildlife habitat for species like black bear, timberwolf, bobcat and pine martin.

The Cass County Land Department has been in business for over 60 years. The staff of professional foresters over 140 years of natural resource management experience. The County managed forest lands have been certified to the Forest Stewardship Council forest certification standard since 2000. This certification is a rigorous third-party audit of the counties forest management practices and operations and insures to residents, taxpayer and visitors that these forest lands are managed in a sustainable manner.

Cass County continues to show a proven record of success. Since the county was awarded its first grant in 2010, this final report marks the seventh closed Outdoor Heritage Fund grant. This is a program that performs because of our accountability to the local taxpayers.

How does the request address MN habitats that have: historical value to fish and wildlife, wildlife species of greatest conservation need, MN County Biological Survey data, and/or rare, threatened and endangered species inventories:

This request is targeting land that has been historically open to public hunting and fishing or land that has been used to access public land that has been open to public hunting and fishing. The request also targets lands with a high potential for rare, threatened and endangered species. These species include but are not limited to the Northern Long Eared Bat and the Blanding's Turtle.

Describe the science based planning and evaluation model used:

The science based planning and evaluation model used for selecting parcels comes from the Forest Resource Management Plan. Parcels are selected based on location, access, habitat, and the support of local units of government.

Explain Partners, Supporters, & Opposition:

All of the acquisitions had the support from the local township boards.

Additional Comments:

Exceptional challenges, expectations, failures, opportunities, or unique aspects of program

Not Listed.

Other Funds Received:

- Not Listed

How were the funds used to advanced the program:

Not Listed

What is the plan to sustain and/or maintain this work after the Outdoor Heritage Funds are expended:

The Cass County Land Department manages all County Administered lands under our Forest Resource Management Plan. This management plan requires that operations are maintained from revenue generated from timber sales. Cass County has a long history of covering our operation costs with timber revenue. The lands acquired will be managed under this same plan. These lands are not eligible for PILT payments. MN Statute 477A.11 defines lands that are eligible as being held by the state in fee or tax forfeited. The acquired lands for this project will be held in fee by Cass County and therefore are not eligible for PILT payments. There will be no ongoing cost to the State of MN for the acquisition of these lands. Based on 2017 operating costs, future maintenance costs will be approximately \$5.06 per acre per year.

Explain the things you will do in the future to maintain project outcomes:

Year	Source of Funds	Step 1	Step 2	Step 3
2019	Cass County	Incorporated parcels into County geographic information system		
2020	Cass County	Complete forest inventory	Update forest work plan	
2021	Cass County	Manage timber resource as plan directs		
2022	Cass County	Plant trees as needed		

Outcomes:

The original accomplishment plan stated the program would

Programs in the northern forest region:

- Landlocked public properties have increased access for land managers *We measure this outcome by the number of miles of public property line that are eliminated, the number of land locked public land acres that are opened to the public, and the number of acres of public land that are opened for year round management access.*

How will the outcomes be measured and evaluated?

Forest habitat protection is measured by acres of land purchased, acres of existing public land made accessible, miles of waterfront habitat protected, and miles of property line eliminated. This project has provided permanent protection to over 277 acres of forest habitat land, year round forest management access to an existing 600 acres, protected 1,200 feet of shoreline habitat, and eliminated 1.5 miles of public property line. The projected also provided habitat corridors for numerous endangered and threatened species including Northern Long Eared Bat, Blanding's Turtle, and the Golden Winged Warbler.

Budget Spreadsheet

Final Budget line item reallocations are allowed up to 10% and do not need require an amendment to the Accomplishment Plan

Total Amount: \$500,000

Budget and Cash Leverage
