Key Notes:

- This grant is administered by Second Harvest Heartland on behalf of the six Feeding America food banks who serve MN. Each food bank is responsible for distributing the food to the counties they serve.
- The milk funds are allocated up front to food banks based on food insecurity rates in the counties they serve. Milk is procured by each food bank separately.
- The entirety of the produce funds were spent by all six food banks in just the first four months of the funds. Whereas these funds used to last nearly three quarters, all six food banks have seen an unprecedented demand for fresh produce through the hunger relief system.

Key Notes:

- F2F funds are tracked based on when product is received from growers and producers. However, distributions by county are tracked when the product is physically sent out to the community. When product is received in one quarter and distributed out during the next quarter, it results in a discrepancy in this report. This can be seen in Q2, where there was no new protein product sourced with F2F funds, but protein distributions are seen in a few counties from product that the food banks received in September (Q1).
- Approximately 141,864 gallons of milk were purchased to distribute to the community with the grant funds spent during Q2.
- In Q2 566 agencies were served across 87 Minnesota counties.
- Second Harvest Heartland continues to utilize a new milk vendor this year with a lower price, after administering a competitive bidding process, allowing the organization to distribute more milk with the existing milk funds.
