Pursuant to Section 6.12 of the Tribal-State Compact for Control of Class III Video Games of Chance on the Fond du Lac Band of Lake Superior Chippewa Reservation in Minnesota (hereafter "Band"), the State of Minnesota, by and through its Commissioner of Public Safety, and the Band agree as follows:

Section 6.10(2) is amended to read as follows:

(2) Software Requirements for Percentage Payout.

(a) Games Not Affected by Player Skill.

Video games of chance with game outcomes not affected by player skill shall payout a minimum of 80 percent and not more than ~~95~~ 100 percent of the amount wagered, including replays. For the video game of keno and other similar games, the theoretical payout percentage requirements apply to each number of spots marked, but in no instance less than 75 percent for each wager.

(b) Video Games That Are Affected by Player Skill.

Video games that are affected by player skill, such as draw poker and blackjack, shall payout a minimum of 83 percent and no more than ~~98~~ 100 percent of the amount wagered, including replays. This standard is met when using a method of play which will provide the greatest return to the player.

Section 6.10(3) is deleted in its entirety and replaced with the following:

(3) Odds. ~~Minimum Probability Standard for Maximum Payout.~~

~~Each video game of chance must have a probability of obtaining the maximum payout which is greater than 1 in 17,000,000 (ONE IN SEVENTEEN MILLION) for each play.~~

The odds of achieving any explicitly advertised award shall occur at least once in every 100 million games. However, an allowance shall be made for any advertised award that exceeds this odds requirement, provided that the game artwork prominently displays the actual odds of that

award to the player. This rule shall apply to all wager categories that can win the advertised awards. In the context of odds, an award shall be defined to be a credit prize, a multiplier, entry into a bonus game or feature, etc.
