An Equal Opportunity Employer December, 2000

The Minnesota State Board of Investment (SBI) is pleased to present its report for the fiscal year ending June 30, 2000.

Investment Environment

A strong economic environment, positive corporate earnings, and a continuance of high levels of cash flows contributed to a sixth consecutive year of positive performance for the U.S. markets although stock and bond returns were lower than historical averages. The Wilshire 5000 Stock Index increased 9.5%. With rising long-term interest rates and poor performance in the corporate sector for the 12 month period, the U.S. bond market, as measured by the Lehman Brothers Aggregate Bond Index, provided a gain of 4.6%.

The performance of international stock markets was strong during the year. Developed markets were ahead of the U.S. market and historical averages. The Morgan Stanley Capital International index of Europe, Australasia and the Far East (EAFE) gained 17.2% for the twelve months ending June 30, 2000. The markets of developing countries, or "emerging markets", increased by 9.5% during the fiscal year.

SBI Results

Within this investment environment, the returns of the retirement assets under the Board's control were again positive:

- The Basic Retirement Funds gained 10.5% during fiscal year 2000. The Funds benefited from their high U.S. stock exposure as well as strong returns from international equities. (See page 9)
- The Post Retirement Fund advanced 8.6% for the year. The gain, combined with strong returns in prior years, will provide a lifetime post retirement benefit increase of 9.5% for eligible retirees. (See page 12)

On June 30, 2000, assets under management totaled \$53.2 billion. This total is the aggregate of several separate pension funds, trust funds and cash accounts, each with different investment objectives. In establishing a comprehensive management program, the Board develops an investment strategy for each fund which reflects its unique needs. The primary purpose of this annual report is to communicate the investment goals, policies and performance of each fund managed by the Board. Through the investment programs presented in this report, the Minnesota State Board of Investment will continue to enhance the management and performance of the funds under its control.

Sincerely,

Howard Bisher

Governor Jesse Ventura, Chair State Auditor Judith H. Dutcher State Treasurer Carol C. Johnson Secretary of State Mary Kiffmeyer State Attorney General Mike Hatch

Investment Advisory Council

The Legislature has established a seventeen member Investment Advisory Council to advise the Board and its staff on investment-related matters.

- The Board appoints ten members experienced in finance and investment. These members traditionally have come from the Minneapolis and St. Paul corporate investment community.
- The Commissioner of Finance and the Executive Directors of the three statewide retirement systems are permanent members of the Council.
- Two active employee representatives and one retiree representative are appointed to the Council by the Governor.

The Council has formed three committees organized around broad investment subjects relevant to the Board's decision-making process: Asset Allocation, Stock and Bond Managers and Alternative Investments.

All proposed investment policies are reviewed by the appropriate Committee and the full Council before they are presented to the Board for action.

Introduction

The Minnesota State Board of Investment is responsible for the investment management of various retirement funds, trust funds and cash accounts. On June 30, 2000, the market value of all assets was \$53.2 billion.

Constitutional and Statutory Authority

The Minnesota State Board of Investment (SBI) is established by Article XI of the Minnesota Constitution to invest all state funds. Its membership is also specified in the Constitution and is comprised of the Governor (who is designated as chair of the Board), State Auditor, State Treasurer, Secretary of State and State Attorney General.

All investments undertaken by the SBI are governed by the prudent person rule and other standards codified in *Minnesota Statutes*, Chapter 11A and Chapter 356A.

Prudent Person Rule

The prudent person rule, as codified in Minnesota Statutes Section 11A.09, requires all members of the Board, Investment Advisory Council, and SBI staff to "...act in good faith and ... exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom." Minnesota Statutes Section 356A.04 contains similar codification of the prudent person rule applicable to the investment of pension fund assets.

Authorized Investments

In addition to the prudent person rule, *Minnesota Statutes* Section 11A.24 contains a specific list of asset classes available for investment, including common stocks, bonds, short term securities, real estate, private equity,

and resource funds. The statutes prescribe the maximum percentage of fund assets that may be invested in various asset classes and contain specific restrictions to ensure the quality of the investments.

Investment Policies

Within the requirements defined by state law, the State Board of Investment, in conjunction with SBI staff and the Investment Advisory Council, establishes investment policies for all funds under its management. These investment policies are tailored to the particular needs of each fund and specify investment objectives, risk tolerance, asset allocation, investment management structure and specific performance standards.

The Board has adopted guidelines concerning investments in stock markets outside the U.S. The guidelines do not prohibit investment in any market, but do require that additional notification and/or presentation be provided to SBI staff or the SBI Administrative Committee in certain cases (refer to page 46 for more information on these guidelines).

The Board, its staff, and the Investment Advisory Council have conducted detailed analyses of each of the funds under the SBI's control that address investment objectives, asset allocation policy and management structure. These studies guide the on-going management of these funds and are updated periodically.

Important Notes

Readers should note that the SBI's returns in this report are shown *after* transactions costs and fees are deducted. Performance is computed and reported after all applicable charges to assure that the Board's focus is on true net returns.

Due to the large number of individual securities owned by the funds managed by the SBI, this report contains only summarized asset listings. A complete list of securities is available upon request from the State Board of Investment.

Funds Under Management

Market Value June 30, 2000

Basic Retirement Funds

\$21.2 billion

The Basic Retirement Funds contain the pension assets of the currently working participants in eight statewide retirement plans:

tiorpants in eight state wide retirement plans.	
Teachers Retirement Fund	\$8.317 billion
Public Employees Retirement Fund	5.039 billion
State Employees Retirement Fund	4.686 billion
Public Employees Police and Fire Fund	2.582 billion
Highway Patrol Retirement Fund	287 million
Correctional Employees Fund	279 million
Judges Retirement Fund	26 million
Public Employees Correctional Fund	10 million

Post Retirement Fund \$20.8 billion

The Post Retirement Investment Fund is composed of the reserves for retirement benefits to be paid to retired employees. Life-time retirement benefit increases are permitted based on both inflation and investment performance.

Supplemental Investment Fund

\$1.8 billion

The Supplemental Investment Fund includes assets of the state deferred compensation plan, the unclassified state employees retirement plan, other defined contribution retirement plans, and various retirement programs for local police and firefighters. Participants may choose among seven separate accounts with different investment objectives designed to meet a wide range of participant needs and objectives.

8	,	
Income Share Account	stocks and bonds	\$662 million
Common Stock Index Account	passively managed stocks	428 million
Growth Share Account	actively managed stocks	334 million
Bond Market Account	actively managed bonds	112 million
Fixed Interest Account	stable value investments	88 million
Money Market Account	short-term debt securities	87 million
International Share Account	non-U.S. stocks	51 million

Non-Retirement Funds \$2.4 billion

\$0.8 billion

Assigned Risk PlanThe Minnesota Workers Compensation Assigned Risk Plan provides worker compensation insurance for companies unable to obtain coverage through private carriers.

Permanent School Fund \$0.6 billion

The Permanent School Fund is a trust established for the benefit of Minnesota public schools.

Environmental Trust Fund \$0.3 billion

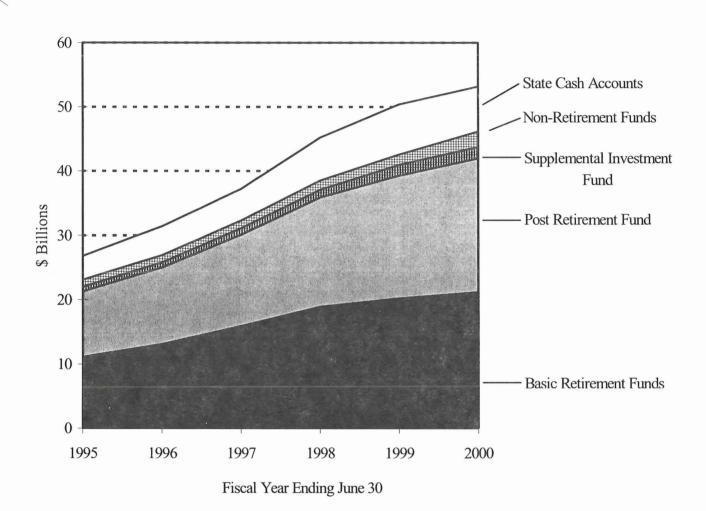

The Environmental Trust Fund is a trust established for the protection and enhancement of Minnesota's environment. It is funded with a portion of the proceeds from the state's lottery.

Tobacco Prevention Fund \$0.4 billion

The distributions from the Tobacco Prevention Fund are used by the Commissioner of Health to fund public health initiatives.

Funds Under Management Medical Education Fund \$0.3 billion The distributions from the Medical Education Fund are used for medical education at the University of Minnesota medical school. State Cash Accounts \$7.0 billion These accounts are the cash balances of state government funds, including the Invested Treasurers Cash Fund, transportation funds, and other miscellaneous cash accounts. Assets are invested in high quality, liquid debt securities. Total Assets Under SBI Management \$53.2 billion

Growth in Assets Fiscal Years 1996 - 2000

The "Combined Funds" represent the assets of both active and retired public employees who participate in the defined benefit plans of three state-wide retirement systems: Teachers Retirement Association (TRA), Public Employees Retirement Association (PERA) and the Minnesota State Retirement System (MSRS). On June 30, 2000, the Combined Funds had a market value of \$42.0 billion.

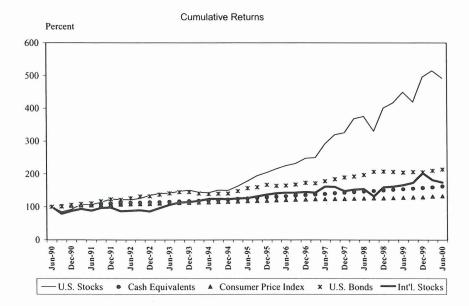

The Combined Funds are so named because they represent the combined assets of both the Basic Retirement Funds (the funds for active employees) and Post Retirement Fund (the fund for retired employees). Unlike most other public and corporate pension plans, the assets of active and retired employees are separated under statute and therefore managed and accounted for separately. More information on the structure and performance of the Basic and Post Funds is contained in the following chapters.

While the Combined Funds do not exist under statute, the Board finds it instructive to review asset mix and performance of all defined benefit pension assets under its control. This more closely parallels the structure of other public and corporate pension plan assets and therefore allows for more meaningful comparison with other pension fund investors. The comparison universe used by the SBI is the Master Trust portion of the Trust Universe Comparison Service (TUCS). This universe contains information on public and corporate pension and trust funds with a balanced asset mix and over \$1 billion in size.

It is important to note that the historical data on the Combined Funds presented in this report reflect only the Basic Retirement Funds through fiscal year 1993. Both the Basic and Post Funds are included thereafter.

This distinction is necessary due to the very different asset allocation strategies employed by the two funds in the past. The Basic Funds have always been managed to maximize total rates of return over the longterm and, therefore, its asset allocation has historically included a substantial stock segment. In contrast, until the post retirement benefit increase formula was changed in 1993, the Post Retirement Fund was managed to maximize current income which necessitated a large commitment to bonds. As a result, the investment goals of the two funds were incompatible for analytical purposes until fiscal year 1994.

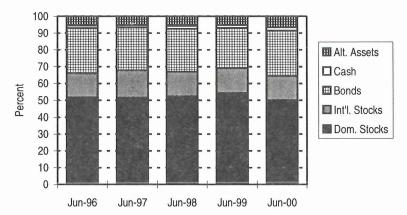

Figure 1. Performance of Capital Markets FY 1991-2000

Asset Allocation

As illustrated in Figure 1 on the prior page, historical evidence strongly indicates that common stocks will provide the greatest opportunity to maximize investment returns over the long-term. As a result, the Board has chosen to incorporate a large commitment to common stocks in its asset allocation policy for the retirement funds. In order to limit the short run volatility of returns exhibited by common stocks, the Board includes other asset classes such as bonds and alternative investments in the total portfolio. These assets diversify the Funds and reduce wide fluctuations in investment returns on a year to year basis. This diversification should not impair the Funds' ability to meet or exceed their actuarial return targets over the long-term.

Figure 3. Historical Asset Mix FY 1996-2000

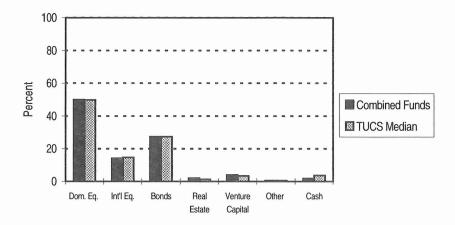

Asset Mix Compared to Other Pension Funds

Comparisons of the Combined Funds' actual asset mix to the median allocation to stocks, bonds and other assets of the funds in TUCS on June 30, 2000 are displayed in

Figure 2. It shows that the Combined Funds were overweighted in alternative assets (real estate, private equity and resource investments) relative to the median allocation in TUCS and underweighted in their allocation to cash. Historical data on the Combined Funds' asset mix is shown in Figure 3.

		wiedian
	Combined	Allocation
	Funds	in TUCS*
Domestic Equity	50.1%	49.8%
International Equity	14.2	14.6
Bonds	27.3	27.4
Real Estate	2.0	1.2
Private Equity	4.0	3.4
Other**	0.6	0.6
Cash	1.8	3.6

^{*} Represents the median allocation by asset class, and does not add to 100%.

Return Objectives

The Combined Funds are evaluated relative to three total rate of return objectives:

- Provide Real Returns. Over a ten year period, the Combined Funds are expected to produce returns that exceed inflation by 3-5 percentage points on an annualized basis.
 - Over a five year period, the Combined Funds are expected to outperform the return of the median fund in a representative universe of other large public and corporate pension and trust funds with a balanced asset mix of stocks and bonds. As noted earlier, the universe used by the SBI is the Master Trust portion of TUCS and includes funds with assets of more than \$1 billion. All funds in TUCS report their returns gross of fees. For

^{**} Other reflects the Resource investments in the Combined Funds; and, all other assets in TUCS.

purposes of the TUCS comparison, the SBI returns are ranked on a gross of fees rather than a net of fees basis.

 Exceed Market Returns. Over a five year period, the Combined Funds are expected to outperform a composite of market indices weighted using the asset mix of the Combined Funds.

Investment Results

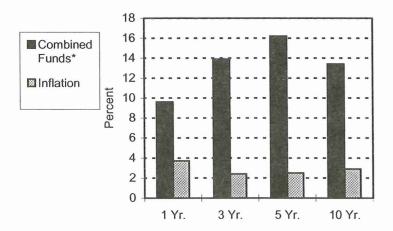

Comparison to Inflation

Over the last ten years, the Combined Funds exceeded inflation by 10.5 percentage points, an amount well in excess of the return objective cited above. Historical results compared to inflation are shown in Figure 4.

Comparison to Other Funds

While the SBI is naturally concerned with how its returns compare to other pension investors, universe comparison data should be used with great care. There are two primary

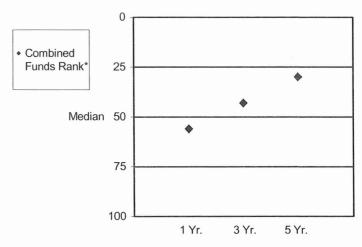

Figure 4. Combined Funds Performance vs. Inflation

			Annualized		
	1 Yr.	3 Yr.	5 Yr.	10 Yr.	
Combined Funds*	9.6%	13.9%	16.2%	13.4%	
Inflation	3.7	2.5	2.5	2.9	

^{*}After fees. Includes Basic Funds only through 6/30/93, Basic and Post Funds thereafter.

Figure 5. Combined Funds Performance Compared to Other Pension Funds

	Annualized		ed
	1 Yr.	3 Yr.	5 Yr.
Combined Funds			
Percentile Rank in TUCS*	56 th	43 rd	30^{th}

^{*}Compared to public and corporate plans greater than \$1 billion, gross of fees.

reasons why such comparisons will provide an "apples-to-oranges" look at performance:

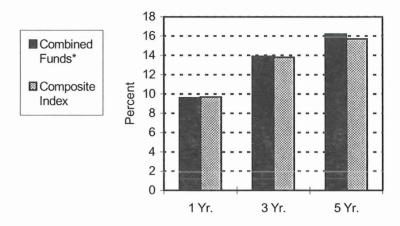

- Differing Allocations. Asset allocation has a dominant effect on returns. The allocation to stocks among the funds in TUCS typically ranges from 20-90%, a very wide range for meaningful comparison. In addition, it appears that many funds do not include alternative asset holdings in their reports to TUCS. This further distorts comparisons among funds.
- Differing Goals/Liabilities.
 Each pension fund structures its portfolio to meet its own liabilities and risk tolerance.
 This may result in different choices on asset mix. Since asset mix will largely determine investment results, a universe ranking may not be relevant to a discussion of how well a plan sponsor is meeting its long-term liabilities.

With these considerations in mind, the performance of the Combined Funds compared to other public and corporate pension funds with over \$1 billion in assets in the Master Trust portion of TUCS is displayed in Figure 5 on the previous page. It shows that the Combined Funds have ranked in the third quartile of the comparison universe over the last one year period and in the top half of the comparison universe over the last three and five year periods.

Comparison to Market Returns

The Combined Funds' performance is also evaluated relative to a composite of market indices which is weighted in a manner that reflects the actual asset allocation of the Combined Funds. Performance results and a breakdown of the composite index are shown in Figure 6. The Combined Funds exceeded the composite index by 0.5 percentage point over the last five years and therefore met their stated performance goal. The Funds exceeded the composite index by 0.1 percentage point over the last three years but trailed the composite index by 0.1 percentage point over the most recent fiscal year. These results are largely a measure of value added or lost from active management after all fees and expenses have been taken into consideration.

Basic Retirement Funds

The Basic Retirement Funds accumulate the retirement assets of public employees during their working years. On June 30, 2000, the Funds covered more than 322,000 active employees and had a market value of \$21.2 billion.

Figure 7 identifies the eight different retirement funds which comprise the Basic Funds. The Basic Funds invest the pension contributions that employees and employers make to defined benefit pension plans during the employees' years of active service.

Investment Objectives

The State Board of Investment (SBI) has one overriding responsibility with respect to its management of the Basic Funds: to ensure that sufficient funds are available to finance promised benefits at the time of retirement.

Actuarial Assumed Return

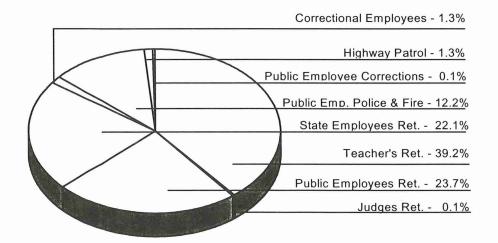

Employee and employer contribution rates are specified in state law as a percentage of an employee's salary.

The rates are set so that contributions plus expected investment earnings will cover the projected cost of the initially promised pension benefits. In order to meet these projected pension costs, the Basic Retirement Funds must generate investment returns of at least 8.5% on an annualized basis, over time.

Time Horizon

Normally, pension assets will accumulate in the Basic Retirement Funds for thirty to forty years during an employee's years of active service. This provides the Basic Funds with a long investment time horizon and permits the Board to take advantage of the long run return opportunities offered by common stocks and other equity investments in order to meet its actuarial return target.

Figure 7. Composition of Basic Funds as of June 30, 2000

Return Objective

The Board measures the performance of the Basic Retirement Funds relative to a composite of market indices that is weighted using their long-term asset allocation policy. The Basic Funds are expected to exceed their composite index over a five year period. *Performance is reported net of all fees and costs* to assure that the Board's focus is on its true net return.

Asset Allocation

The allocation of assets among stocks, bonds, alternative investments and cash can have a dramatic impact on investment results. In fact, asset allocation decisions overwhelm the impact of individual security selection within a total portfolio. The asset allocation of the fund is under constant review. No significant changes were made during fiscal year 2000.

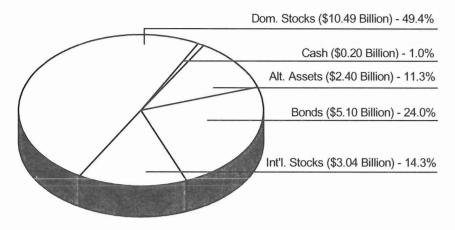

Long-Term Allocation Policy

Based on the Basic Funds' investment objectives and the expected long run performance of the capital markets, the Board has adopted the following long-term asset allocation policy for the Basic Funds:

Domestic Stocks	45%
International Stocks	15
Bonds	24
Alternative Assets	15
Unallocated Cash	1

Basic Retirement Funds

Figure 8. Asset Mix as of June 30, 2000

Notes: Percentages may differ slightly due to rounding of values.

Uninvested portions of the allocation to Alternative Assets are held in Domestic Stocks.

It should be noted that the unfunded allocation to alternative investments in the Basic Funds is held in domestic stocks until it is needed for investment. As a result, the actual amount invested in domestic stocks was above its long-term target.

Figure 8 presents the actual asset mix of the Basic Funds at the end of fiscal year 2000. Historical asset mix data are displayed in Figure 9.

Total Return Vehicles

The SBI invests the majority of the Basic Funds' assets in common stocks (both domestic and international). A large allocation is consistent with the investment time horizon of the Basic Funds and the advantageous long-term risk-return characteristics of common stocks. Including international stocks in the asset mix allows the SBI to diversify its holdings across world markets and offers the opportunity to enhance returns and reduce the risk/volatility of the total portfolio. The rationale underlying the inclusion of private equity (e.g., venture capital) is similar. However, the relatively smaller size of the private equity market presents a practical limit to

the amount that may be invested in this asset class.

The Board recognizes that this sizable policy allocation to common stock and private equity likely will produce more volatile portfolio returns than a more conservative policy focused on fixed income securities. It is understood that this policy may result in quarters, or even years, of disappointing results. Nevertheless, the long run return benefits of this policy are expected to

compensate for the additional volatility.

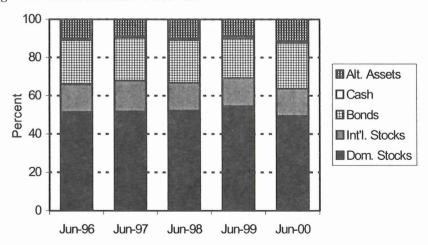

Diversification Vehicles

The Board includes other asset classes in the Basic Funds both to provide some insulation against highly inflationary or deflationary environments and to diversify the portfolio sufficiently to avoid excessive return volatility.

Real Estate and resource (oil and gas) investments provide an inflation hedge that other financial assets cannot offer. In periods of rapidly rising prices, these assets have appreciated in value at a rate at least equal to the inflation rate. Further, even under more normal financial conditions, such as low to moderate inflation, the returns on these assets are not highly correlated with common stocks. As a result, their inclusion in the Basic Funds serves to dampen return volatility.

The allocation to *bonds* acts as a hedge against a deflationary economic environment. In the event of a major deflation, high quality fixed income assets, particularly long-term bonds, are expected to protect principal and generate significant capital gains. And, like

Figure 9. Historical Asset Mix FY 1996-2000

Basic Retirement Funds

real estate and resource funds, under normal financial conditions, bonds help to diversify the Basic Funds, thereby controlling return volatility.

Investment Management

All assets in the Basic Retirement Funds are managed externally by outside money management firms retained by contract. In order to gain greater operating efficiency, the Basic Funds share the same domestic stock, international stock, and bond managers with the Post Fund.

More information on the structure, management and performance of these pools of managers is included in the **Investment Pool** section of this report.

Investment Performance

As stated earlier, the Basic Funds are expected to exceed the return of a composite of market indices over a five year period. Performance

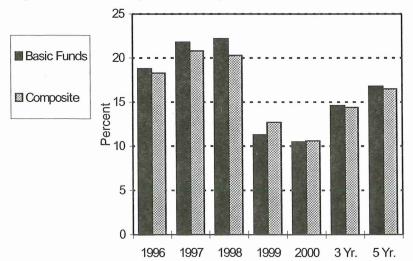

relative to this standard will measure two effects:

- The ability of the managers selected by the SBI, in aggregate, to add value to the returns available from the broad capital markets.
- The impact of the SBI's rebalancing activity. The SBI rebalances the total fund when market movements take the stock or bond segments above or below long term asset allocation targets. This policy imposes a low risk discipline of "buy lowsell high" between asset classes on a total fund basis.

For the five year period ending June 30, 2000, the Basic Funds out-performed the composite index by 0.3 percentage point annualized. The primary contributors to the value added came from outperformance by the international stock pool and a

higher than policy allocation to domestic equities. Actual returns relative to the total fund composite index over the last five years are shown in Figure 10.

Figure 10. Basic Funds' Performance vs. Composite Index FY 1996-2000

						Annualized	
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.
Basic Funds	18.8%	21.8%	22.2%	11.3%	10.5%	14.6%	16.8%
Composite Index	18.3	20.8	20.3	12.7	10.6	14.4	16.5

The assets of the Post Retirement Fund are used to finance monthly annuities to retired public employees. These annuities may be adjusted upwards over the life of a retiree based on a formula that reflects both inflation and investment performance. On June 30, 2000, the Post Fund had a market value of \$20.8 billion and more than 106,000 retiree participants.

The Post Retirement Fund includes the assets of retired public employees covered by nine statewide retirement plans; the eight plans which participate in the Basic Retirement Funds as well as the Legislative and Survivors Retirement Fund.

Benefit Increase Formula

The retirement benefit increase formula of the Post Retirement Fund is based on a combination of two components:

Inflation Component. Each year, retirees receive an inflation-based adjustment equal to 100% of inflation, up to a maximum specified in statute. The inflation component is granted regardless of investment performance. The cap is necessary to maintain the actuarial soundness of the entire plan. It is the difference between the return assumption for the Basic Funds, and the return assumption for the Post Fund.

The return assumption in the Basic Funds is 8.5%. The return assumption for the Post Fund was 5.0% through fiscal year 1997. In fiscal year 1998, the return assumption for the Post Fund was changed to 6.0%. This means the cap on the inflation adjustment was 3.5% for fiscal years 1993-1997. From fiscal year 1998 forward, the inflation cap will be 2.5%. Retirees were

given a one time permanent adjustment in their pension to compensate them for the reduction in the inflation adjustment cap.

Investment Component.

Each year, retirees can also receive an investment-based adjustment, provided net investment gains are above the amount needed to finance the Post Fund's actuarial assumption and the inflation adjustment. Investment gains and losses are spread over five years to smooth out the volatility of returns. In addition, all accumulated investment losses must be recovered before an

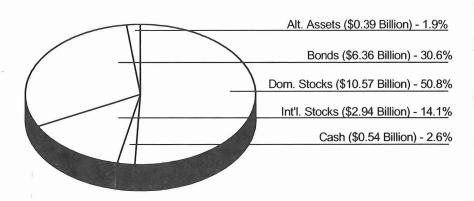

investment-based adjustment is granted.

Investment Objective

Time Horizon

The time horizon of the Post Fund is 15 to 20 years and corresponds to the length of time a typical retiree can be expected to draw benefits. While this is shorter than the time horizon of the Basic Funds, it is still sufficiently long to allow the Board to take advantage of the long run return opportunities offered by common stocks in order to meet its actuarial return target as well as to finance retirement benefit increases.

Figure 11. Asset Mix as of June 30, 2000

Notes: Percentages may differ slightly due to rounding of values.

Uninvested portions of the Alternative Assets allocation are held in Bonds.

Post Retirement Fund

Return Objective

The Board measures the performance of the Post Retirement Fund relative to a composite of market indices using its long-term asset allocation policy. The Post Fund is expected to exceed its composite index over a five year period. *Performance is reported net of all fees and costs* to assure that the Board's focus is on true net return.

Asset Allocation

The current long-term asset allocation for the Post Fund is as follows:

Domestic Stocks	50%
Int'l. Stocks	15
Bonds	27
Alternative Assets	5
Unallocated Cash	3

The Post Fund's year-end asset mix is presented in Figure 11 on the previous page. Historical asset mix data are shown in Figure 12.

The SBI invests the majority of the Post Fund's assets in *common stocks* (both domestic and international). A large allocation is consistent with the moderately long time horizon of the Post Fund and the advantageous long term risk-return characteristics of common stocks. Including international stocks in the asset mix allows the SBI to diversify its holdings across world markets and offers the opportunity to enhance returns and reduce the risk/volatility of the total portfolio.

As with the Basic Funds, the Board recognizes that this sizable allocation will be likely to produce more volatile portfolio returns than a more conservative policy focused on fixed income securities. It is understood that this policy may result in quarters, or even years, of disappointing

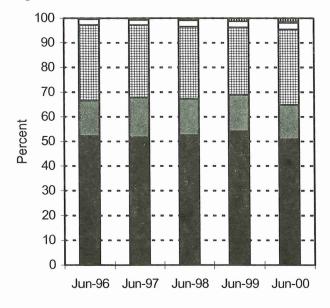

results. Nevertheless, the long run return benefits of this policy are expected to compensate for the additional volatility. The asset allocation is under constant review. No substantial change occurred during fiscal year 2000.

Diversified Vehicles

The Board includes other asset classes in the Post Fund both to provide some insulation against highly deflationary environments and to diversify the portfolio sufficiently to avoid excessive return volatility.

The *bonds* in the Post Fund act as a hedge against a deflationary economic environment. In the event of a major deflation, high quality fixed income assets, particularly long term bonds, are expected to protect principal and generate significant gains. And, under more normal financial conditions, bonds diversify the Post Fund, thereby controlling return volatility on a year-to-year basis.

Figure 12. Historical Asset Mix FY 1996-2000

Yield oriented alternative invest*ments* provide the opportunity for higher long term returns than those typically available from bonds yet still generate sufficient current income to be compatible with the objectives of the Post Fund. Typically, these investments (e.g. business loan participations, mortgage loan participations and income producing private placements) are structured more like fixed income securities with the opportunity to participate in the appreciation of the underlying assets. While these investments may have an equity component, they display a return pattern more like a bond. As such, they will help reduce the volatility of the total portfolio but should also generate higher returns relative to more traditional bond investments.

Post Retirement Fund

While the Board made several commitments to yield oriented alternative investments during the year, the market value of the alternative segment was only 1.9% of the total fund on June 30, 2000. The Board expects this percentage to increase gradually over the next three to five years. Until appropriate vehicles are identified, the uninvested portion of the alternative asset allocation is held in bonds. As a result, the actual amount invested in bonds was above its long-term target.

Investment Management

In order to gain greater operating efficiency, the Basic and Post Funds share the same domestic stock, bond and international stock managers.

More information on the structure, management and performance of these pools of managers is included in the **Investment Pool** section of this report.

Investment Performance

Total Fund Performance

As stated earlier, the Post Fund is expected to exceed the return of a composite of market indices over a five year period. The Post Fund's performance exceeded its composite market index by 0.6 percentage point for the most recent five year period.

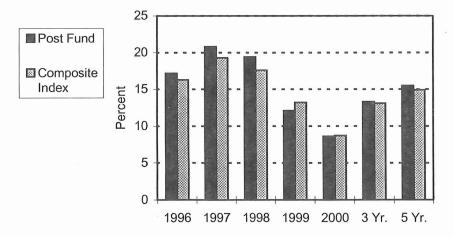

Actual returns relative to the total fund composite index over the last five years are shown in Figure 13.

Benefit Increase

The Post Fund will provide a benefit increase of 9.5% for fiscal year 2000 payable beginning January 1, 2001. As noted earlier, this increase is comprised of two components:

— Inflation component of 2.5% which is the maximum increase allowed by law. The increase in the Consumer Price Index for wage earners (CPI-W) for the twelve months ending June 30, 2000 exceeded 2.5%. (This is the same inflation index used to calculate increases in Social Security payments).

Figure 13. Post Fund's Performance vs. Composite Index FY 1996-2000

						Annualized	
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.

1993	6.0	
1994	4.0	
1995	6.4	
1996	8.0	
1997	10.1	
1998	9.8	
1999	11.1	
2000	9.5	

- * Payable beginning January 1, of the following calendar year.
- ** Benefit increase granted under the previous formula.
- This represents a portion of 7.0% This represents a portion of the market value increase that exceeds the amount needed to cover the actuarial assumed rate of return (6.0% beginning FY98) and the inflation adjustment.

Benefit increases for the past ten years are shown in Figure 14. Prior to fiscal year 1993, the benefit increase formula was dependent on the level of excess realized income generated by the Post Fund.

More detail on the calculation for the fiscal year 2000 benefit increase is included in the **Statistical Data** section.

To gain greater operating efficiency, external managers are grouped into several "Investment Pools" which are segregated by asset class. The various retirement funds participate in one or more of the pools corresponding to their individual asset allocation strategies.

The Basic Retirement Funds, Post Retirement Fund and Supplemental Investment Fund share many of the same stock and bond managers. This is accomplished by grouping managers together, by asset class, into several Investment Pools. The individual funds participate in the Investment Pools by purchasing "units" which function much like shares of a mutual fund.

This investment management structure allows the State Board of Investment (SBI) to gain greater operating efficiency within asset classes and to keep management costs as low as possible for all participants.

Domestic Stock Pool

The Basic Retirement Funds have participated in the Domestic Stock Pool since its inception in January 1984. The Post Retirement Fund has participated in the Pool since July 1993. In addition, the Growth Share Account, Common Stock Index Account, and the stock portion of the Income Share Account in the Supplemental Investment Fund have utilized a portion of the Pool.

As of June 30, 2000, the dollar value of each fund's participation in the Pool was:

Basic Funds \$10.5 billion (active, passive and semi-passive)

Post Fund \$10.6 billion (active, passive and semi-passive)

Growth Share
Account \$334 million (active and semi-passive)

Common Stock Index Account \$428 million (passive)

Stock portion of the Income Share Account \$401 million (passive)

Management Structure

The SBI uses a three-part approach to the management of the Domestic Stock Pool:

Active Management. At the end of fiscal year 2000, approximately 34% of the Domestic Stock Pool was actively managed by a group of external money managers. The assets allocated to each of eight managers ranged from \$440 million to \$2.0 billion.

In addition, the actively managed segment of the Pool includes five managers in the SBI's Emerging Manager Program. Emerging Managers have portfolios of \$60 to \$170 million which, in aggregate, gives the Emerging Manager Program about the same weight as an average single manager in the active manager program.

 Semi-Passive Management. At the end of fiscal year 2000, approximately 33% of the Domestic Stock Pool was managed by a group of three semi-passive external money managers with portfolios of approximately \$2.4 billion each.

Passive Management. At the end of fiscal year 2000, approximately 33% of the Stock Pool was managed passively by a single manager with a portfolio of \$7.4 billion.

The goal of the Domestic Stock Pool is to add value to the asset class target which is the Wilshire 5000 Investable. Each active manager is expected to add incremental value over the long run relative to a customized benchmark which reflects its unique investment approach or style.

This type of active manager structure can result in misfit or style bias. "Misfit" can be defined as the difference between the aggregate benchmarks of the active managers and the asset class target. Some examples of misfit that the SBI could experience are the following:

- an over-exposure to mid and small-capitalization stocks and an under-exposure to large capitalization stocks;
- an over-exposure to growth oriented stocks and an underexposure to value oriented stocks; or
- an over-exposure to the consumer non-durable sector and an under-exposure in the utility sector.

The SBI attempts to compensate for active manager misfit through the use of a completeness fund. A "completeness fund" is so named because it is intended to fill in, or complete, any areas of market exposure that are not being covered by the aggregate benchmarks of the active managers. This strategy is designed to allow the value added by individual active managers to benefit the total Domestic Stock Pool. It should also result in a decrease in the volatility of returns for the entire Domestic Stock Pool relative to the asset class target since it negates the impact of style bias within the active manager group.

The SBI's completeness fund had been passively managed since it was first introduced in October 1990 until December 1994. During fiscal year 1995, the completeness fund moved from being entirely passively managed to a structure that was half passive/half semi-passive. At the start of fiscal year 1996, the completeness fund was allocated entirely to semipassive management. Semi-passive approaches provide the potential to outperform the completeness fund benchmark, but also incorporate procedures that constrain the level of risk/volatility relative to the benchmark.

During fiscal year 1997, several current active managers modified their investment processes in order to increase the probability of producing value added in their portfolios. Five managers (Alliance, Forstmann, Franklin, Lincoln, and Oppenheimer) were asked to increase the level of active risk in their portfolio resulting in a reduction in the number of issues held at any one time. During fiscal year 2000, Brinson was asked to eliminate investments in small postventure companies (about 7% of their portfolio) and to increase the active risk in their portfolio as well. In effect, these managers now hold more concentrated portfolios and make

larger bets on their "best" stock ideas.

A description of each domestic stock manager's investment approach is included in the **Investment Manager Summaries** section.

FY 2000 Changes

The asset class target for the Domestic Stock Pool was changed from the Wilshire 5000 to the Wilshire 5000 Investable as of July 2000. Following Board approval, the target was also restated for fiscal year 2000. The Wilshire 5000 Investable adjusts the Wilshire 5000 for liquidity and investability constraints as well as restrictions specific to the State of Minnesota (currently tobacco) and is a quarterly buy/hold portfolio. It is a more appropriate benchmark for a large institutional investor such as the SBI.

In fiscal 2000, there were several changes in the Emerging Manager Program. In July 1999, Cohen

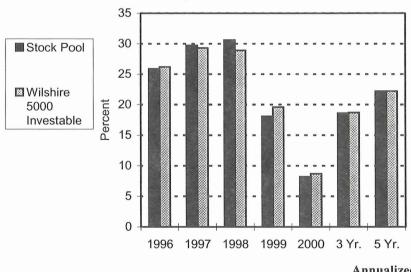

Klingenstein & Marks graduated to the Domestic Manager Program.

During June 2000, two managers (Compass Capital and Wilke/Thompson Capital) were terminated. Effective July 2000, seven new managers were hired (Artemis, Bay Isle, Earnest Partners, Holt-Smith & Yates, Next Century Growth, Peregrine Capital and Voyageur Asset Management), and the mandate for an existing manager (Winslow Capital) was transitioned from large cap to small cap.

Investment Performance

A comprehensive monitoring system has been established to ensure that the many elements of the Domestic Stock Pool conform to the SBI's investment policies. Customized performance benchmarks have been developed for each active, emerging and semi-passive stock manager. These benchmarks enable the SBI to evaluate the managers' results, both individually and in aggregate, with

Figure 15. Domestic Stock Pool Performance FY 1996-2000

					Annualized		
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.
Stock Pool	25.9%	29.7%	30.6%	18.1%	8.2%	18.6%	22.2%
Wilshire 5000	26.2	29.3	28.9	19.6	8.6	18.7	22.2
Investable*							

^{*} Reflects Wilshire 5000 as reported prior to FY 2000.

respect to risk incurred and returns achieved.

Two primary long run *risk objectives* have been established for the domestic stock managers:

- Investment Approach. Each manager (active, emerging, semi-passive, or passive) is expected to hold a portfolio that is consistent, in terms of risk characteristics, with the manager's stated investment approach. In the short run, the active stock managers may depart from their risk targets as part of their specific investment strategies.
- Diversification. The passive and semi-passive managers are expected to hold highly diversified portfolios, while each active domestic stock manager is expected to hold a less diversified portfolio.

The domestic stock managers successfully fulfilled their long-term risk objectives during fiscal year 2000. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained levels of diversification that were appropriate to their respective active, semipassive and passive approaches. The Board's return objectives for its active and semi-passive stock managers are measured against the performance of customized indices constructed to represent a manager's specific investment approach. This type of custom index is commonly referred to as a "benchmark portfolio." A benchmark portfolio takes into account the equity market forces that at times favorably or unfavorably impact certain investment styles. Thus, an individual custom benchmark is a more appropriate return target against which to judge a manager's

Figure 16. Domestic Stock Manager Performance FY 2000

	Actual Return	Benchmark Return
Active Managers		
Alliance Capital Management	23.2%	15.6%
Brinson Partners	-20.8	12.8
Cohen Klingenstein & Marks	9.0	15.9
Forstmann Leff Associates	12.9	10.7
Franklin Portfolio Associates	8.6	2.9
GeoCapital	40.1	26.2
Lincoln Capital Management	18.6	17.4
Oppenheimer Capital	0.3	6.2
Semi-Passive Managers		
Barclays Global Investors	3.5	2.6
Franklin Portfolio Associates	1.6	2.6

^{*} Includes Emerging Manager Program, see below.

Figure 17. Emerging Manager Performance FY 2000

	Actual Return	Benchmark Return	
CIC Asset Management	-17.1%	-6.0%	
New Amsterdam Partners	22.1	17.5	
Valenzuela Capital Partners	1.0	-0.7	
Winslow Capital Management	29.6	27.6	
Zevenbergen Capital	28.3	47.2	

performance than a broad market index.

Individual active managers are expected to exceed their custom benchmark by 0.50-1.00 percentage point annualized, over time. The semi-passive managers are expected to exceed their benchmark by 0.15-0.30 percentage point, over time, and the passive manager is expected to track its index within ± 0.10

percentage point annualized, over time.

In aggregate, the Domestic Stock Pool underperformed the Wilshire 5000 Investable by 0.4 percentage point for the fiscal year. The active and semi-passive components underperformed their respective benchmarks, however the passive component outperformed its target. Relative to their aggregate

benchmarks, the active manager group's underperformance was due to an overweight in value oriented stock issues and an underweight in high priced technology and internet stocks that outperformed during the first half of the fiscal year. The semi-passive managers underperformed due to an overweight in value oriented stock issues during a period when growth stocks performed well. The passive segment outperformed due to positive tracking during the year. Figure 15 provides more detail on the historical performance of the entire pool.

While the returns for the Pool slightly trailed the returns available from the domestic stock market, individual manager performance relative to their respective benchmarks was mixed. Five active managers outperformed their benchmarks while three underperformed. One of the three semi-passive managers outperformed the completeness fund benchmark and the passive manager outperformed its target, the Wilshire 5000 index. Individual manager performance for fiscal year 2000 is shown in Figure 16.

Performance data for the individual managers in the Emerging Manager Program are presented in Figure 17. The emerging managers also had mixed performance for the fiscal year. Three managers outperformed their benchmarks and two managers underperformed.

Historical information on individual manager performance and portfolio characteristics is included in the **Statistical Data** section. Section II of the Annual Report provides **Summarized Asset Listings** for each manager and the Pool in aggregate.

Bond Pool

The Basic Retirement Funds have participated in the Bond Pool since its inception in July 1984. The Post

Retirement Fund has participated in the Pool since July 1993. In addition, the Bond Market Account in the Supplemental Investment Fund has utilized portions of the Pool since July 1986.

As of June 30, 2000, the dollar value of each fund's participation in the Pool was:

Basic Funds \$5.1 billion (active and semi-passive)

Post Fund \$6.4 billion (active and semi-passive)

Bond Market \$112 million Account (active and semi-passive)

Investment Management

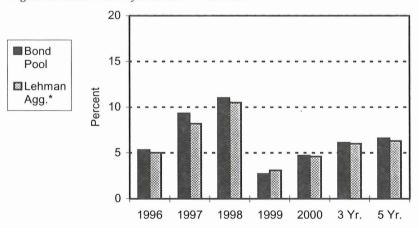

The SBI uses a two-part approach for the management of the Bond Pool:

 Active Management. No more than one-half of the Bond Pool will be actively managed. At the end of fiscal year 2000, approximately 48% of the Bond Pool was actively managed by a group of seven external money managers with portfolios of \$250 million to \$1.5 billion each.

— Semi-Passive Management. At least one-half of the assets allocated to the Bond Pool will be managed by semi-passive managers. At the end of fiscal year 2000, approximately 52% of the bond segment was invested by three managers with portfolios of approximately \$2.0 billion each.

The group of *active* bond managers was selected for its blend of investment styles. Each active manager has the goal of adding incremental value to the Lehman Aggregate Bond Index by focusing on high quality fixed income securities across all sectors of the market. The managers vary, however, in the emphasis they place on interest rate anticipation and in the manner in which they approach issue selection

Figure 18. Bond Pool Performance FY 1996-2000

						Annu	alized
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.
Bond Pool	5.3%	9.3%	11.0%	2.7%	4.7%	6.1%	6.6%
Lehman Aggregate*	5.0	8.2	10.5	3.1	4.6	6.0	6.3

^{*} Lehman Brothers Aggregate Bond Index.

and sector weighting decisions. In keeping with the objective of utilizing the Bond Pool as a deflation hedge, the active managers are restricted regarding the duration of their portfolios. This requirement is designed to prevent the total Pool from assuming an excessively shortlived position and thus, severely diluting its deflation hedge capacity. In addition, the duration restriction helps to avoid extreme variability in total returns. The SBI constrains the duration range of the active managers' portfolios to a band of plus or minus two years around the duration of the Lehman Aggregate. Semi-passive managers' portfolios are constrained to plus or minus 0.2 years around the duration of the Lehman Aggregate. The active bond managers focus on high quality (BBB or better) rated bonds. Some managers have been granted authority to invest a limited portion of their portfolios in BB and B rated dollar denominated debt or in non-dollar denominated issues. The managers

use this additional authority on a tactical basis.

The goal of the semi-passive managers is to add incremental value to the Lehman Brothers Aggregate Bond Index through superior bond selection and sector allocation. The managers essentially match the duration and maturity structure of the Lehman Aggregate. Semi-passive managers seek to add value by exploiting perceived mispricings among individual securities or by making alterations in the sector weightings within the portfolio. Although the managers seek to exceed the performance of the index, the possibility exists that the semipassive approach may slightly underperform the target index during some periods.

A description of each bond manager's investment approach is included in the **Investment Manager Summaries** section.

FY 2000 Changes

During fiscal year 2000, two active managers (Credit Suisse and Investment Advisers) were terminated by the Board. The Board also hired three new active managers (Deutsche Asset Management, Dodge & Cox, and Metropolitan West). As of June 30, 2000, there are seven active and three semi-passive managers in the bond pool.

Investment Performance

The SBI constrains the risk of the active bond managers' portfolios to ensure that they fulfill their deflation hedge and total fund diversification roles. As noted earlier, the managers are restricted in terms of the duration of their portfolios and the quality of their fixed income investments. The active and semi-passive bond managers successfully fulfilled their long-term risk objectives during fiscal year 2000. The managers constructed portfolios consistent with their stated investment approaches and maintained appropriate levels of quality and duration.

The *returns* of each of the Board's bond managers are compared to the Lehman Aggregate. Due to the broad diversification of each manager, customized benchmarks are not deemed necessary for the bond managers at this time. Individual active managers are expected to exceed the target by 0.25 percentage point annualized, over time, and each semi-passive manager is expected to exceed the target by 0.10 percentage point annualized, over time.

In aggregate, the Pool exceeded the Lehman Aggregate benchmark by 0.1 percentage point for the recent fiscal year. Relative to the benchmark, the Pool was helped by an overweighting in the corporate and mortgage sectors. The Pool's slightly longer duration relative to the benchmark also helped performance over the fiscal year.

	Actual Return	Benchmark Return
Active Managers		
American Express Asset Mgmt.	4.8%	4.6%
Deutsche*	4.5	4.3
Dodge & Cox*	3.7	4.3
Metropolitan West*	1.9	4.3
Morgan Stanley	4.6	4.6
Standish, Ayer & Wood	3.0	4.6
Western Asset Management	5.6	4.6
Semi-Passive Managers		
BlackRock Financial	5.2	4.6
Goldman Sachs Asset Mgmt.	4.9	4.6
Lincoln Capital Management	4.5	4.6
Aggregate Bond Pool	4.7	4.6
Asset Class Target		
Lehman Aggregate	4.6	

Performance over longer periods has been positive, exceeding the benchmark by 0.1 percentage point annualized over the three-year period and 0.3 percentage point over the five year period ended June 30, 2000. In general, the decision to hold portfolios with a modestly longer duration than the benchmark, overweight spread sectors and underweight treasuries accounted for the outperformance over the longer term.

The relative performance of the active managers retained by the Board over the entire fiscal year was mixed; two of the active managers exceeded the benchmark, one matched the benchmark, while one lagged the benchmark. Two of the three semi-passive managers added value during fiscal year 2000, while one lagged the benchmark.

Figure 18 shows historical performance for the entire Pool. Individual manager performance for fiscal year 2000 is shown in Figure 19.

Historical information on individual manager performance and portfolio characteristics is included in the **Statistical Data** section. Section II of this report provides **Summarized Asset Listings** for each manager and the Pool in aggregate.

International Stock Pool

The SBI began its international stock program in October 1992. The Basic Retirement Funds have participated in the International Stock Pool since its inception. The Post Retirement Fund began utilizing the Pool in October 1993. The International Share Account in the Supplemental Investment Fund has participated in the Pool since September 1994.

On June 30, 2000, the dollar value of each fund's participation in the International Stock Pool was:

Basic Funds \$3.0 billion (active and passive)

Post Fund \$2.9 billion (active and passive)

International
Share Account \$51 million (active and passive)

Management Structure

The SBI uses a two part approach to the management structure of the International Stock Pool:

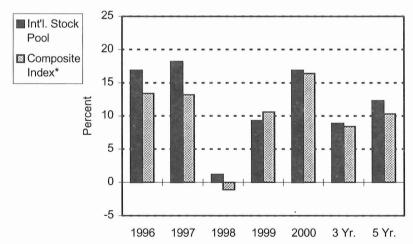

Active Management. The target is to have at least one-third of the International Stock Pool managed actively. At the end of fiscal year 2000, approximately 66% of the Pool was actively managed by a group of 11

external managers with portfolios ranging from \$70 to \$700 million each. Eight of these managers manage portfolios in the developed markets and three manage portfolios in the emerging markets.

— Passive Management. The target is to have at least one-third of the International Stock Pool managed passively. At the end of fiscal year 2000, approximately 34% of the International Stock Pool was passively managed by a single manager.

As of July 1, 1999, the SBI began using the combined market capitalization weights of the Morgan Stanley Capital International (MSCI) index of Europe, Australasia and the Far East Free (EAFE Free) and the MSCI Emerging Markets Free index as target weights for the developed versus emerging markets within the International Stock Portfolio. Eight

Figure 20. International Stock Pool Performance FY 1996-2000

Composite Index*	13.4	13.2	-1.1	10.6	16.4	8.4	10.3

^{*} EAFE Free through 4/31/96. Composite of EAFE-Free and Emerging Markets Free since 5/1/96.

of the active managers invest entirely in developed markets, and use a variety of investment approaches in an effort to maximize value added to the EAFE Free index, over time. These managers address currency management as part of their investment process. Their views on currency may be factored into their country and security selection, or they may explicitly hedge currency exposure on an opportunistic basis. Three of the 11 active managers invest entirely in emerging markets. They are expected to add incremental value, over time, relative to the MCSI Emerging Markets Free index of markets in

developing countries throughout the world.

The *passive* manager in the International Stock Pool designs its portfolio to consistently and inexpensively track the EAFE Free index. A portion of the currency exposure of the index fund was managed in a dynamic hedging program designed to avoid currency losses during periods of US dollar strength. The *currency overlay* program was terminated as of December 1999.

A description of each international stock manager's investment approach

is included in the **Investment Manager Summaries** section.

FY 2000 Changes

During fiscal year 2000, the Board terminated the currency overlay program and hired four active developed market managers:
American Express Asset
Management, Blairlogie Capital
Management, INVESCO Global
Asset Management, and Montgomery
Asset Management.

Investment Performance

Similar to the Domestic Stock Pool, two long term *risk objectives* have been established for the international stock managers:

- Investment Approach. Each
 manager (active or passive) is
 expected to hold a portfolio that
 is consistent with the manager's
 stated investment approach.
- Diversification. While the index manager is expected to hold a well diversified portfolio which closely tracks its target index, each active manager is expected to hold a less diversified portfolio.

The international stock managers successfully fulfilled their long-term risk objectives during fiscal year 2000. In general, the managers constructed portfolios consistent with their stated investment approaches and maintained appropriate levels of diversification.

The Board's *return objectives* for the international stock program are stated relative to the Morgan Stanley Capital International (MSCI) indices. The indices are capitalization weighted and measured in U.S. dollar terms, with currencies unhedged.

Individual active managers are expected to exceed their index by at least 1.00 percentage point annualized, over time, and the index

Figure 21. International Manager Performance FY 2000

- * New managers retained in February 2000.
- ** Marathon's performance is measured against a custom benchmark since inception.
- *** Includes impact of currency overlay gain/loss. During fiscal year 2000, Record Treasury Management detracted 0.2% from the total program.
- **** The asset class target is comprised of the EAFE Free and Emerging Markets Free (EMF) indices. The weighting of each index fluctuates with changes in market capitalization.

manager is expected to track its index by ± 0.50 percentage point, annually. The currency overlay program had been expected to add value to the passively managed portion of the pool in periods when the US dollar strengthened relative to major currencies. The actual value added by the currency overlay program was correlated to the US dollar's rise in any given period.

Performance results for the International Stock Pool are shown in Figure 20, (on page 20). In aggregate, the Pool outperformed the target for the year by 0.5 percentage point.

Performance over the last three and five year periods exceeded the benchmark by 0.5 and 2.0 percentage points annualized, respectively.

Individual manager performance during fiscal year 2000 is shown in Figure 21. The fiscal year proved to be a period of significant market volatility driven by high valuations in the first half of the fiscal year in technology and telecommunications, followed by a significant market correction in technology in the second half of the fiscal year. The relative performance of the four developed market managers retained by the Board for the entire year was highly favorable. These four active EAFE managers outperformed the EAFE Free index, which returned 17.1% for the year. Only one of the three emerging market managers outperformed the MSCI Emerging Markets Free index, which returned 9.5% for the year. The passively managed portion of the program exceeded the EAFE Free index by 0.4 percentage point for the year. The currency overlay program slightly detracted from returns of the International Stock Pool.

More information on the performance and portfolio composition of individual managers is included in the **Statistical Data** section. Section II of this report provides

Summarized Asset Listings for each manager and the Pool in aggregate.

Alternative Investment Pools

Like the stock and bond segments, alternative assets (private equity, real estate and resource fund investments) are also managed on a pooled basis. However, due to the nature of these investments, separate pools have been established for the Basic and Post Retirement Funds and each fund owns 100% of the assets in its respective pool.

Statutory Constraints

The statutory constraints regarding the SBI's investments to alternative assets are the same in both the Basic and Post Funds:

- Real Estate. State statutes
 authorize investments in real
 estate through commingled
 funds, limited partnerships and
 trusts, including real estate
 investment trusts (REIT's).
 Regardless of its form, each
 investment must involve at least
 four other participants and the
 SBI's investment may not
 exceed 20% of a given
 investment.
- Private Equity. By law, the SBI is authorized to invest in private equity through limited partnerships and corporations. As with real estate investments, each private equity investment must involve at least four other investors, and the Board's investment may not exceed 20% of a particular partnership or corporation.
- Resource Funds. The SBI invests in oil and gas partnerships specifically structured for pension funds and other tax-exempt investors. As

with real estate and private equity investments, there must be four other investors and the Board may invest no more than 20% of a partnership's total capital.

Alternative Investments Basic Funds

The Basic Retirement Funds began making investments in alternative assets in the early 1980's. Given their long investment time horizon, the Basic Funds are especially well suited to alternative investments that are equity oriented and focus on long-term capital gains. As a result, up to 15% of the Basic Retirement Funds are targeted for alternative investments at market value, and up to 20% at market value plus unfunded commitments. A breakdown of the segment is shown in Figure 22. As of June 30, 2000, the market value of current alternative investments was \$2.4 billion, or 11.3% of the Basic Funds.

Descriptions of each of the Basic Funds' alternative investments are included in the **Investment Manager Summaries** section.

Real Estate Pool

By investing in several open-end and closed-end commingled funds, the Basic Funds have created a large core portfolio of real estate that is broadly diversified by property type, location and financing structure. The core portfolio is expected to earn at least real estate market returns.

The broad diversification of the core portfolio enables the SBI to select less diversified, special orientation managers for the remaining portion of the real estate segment. With their more focused approach to real estate management, these funds offer the ability to enhance the return earned by the core portfolio.

Prospective real estate managers are reviewed and selected based on the manager's experience, investment strategy and performance history.

During fiscal year 2000, the SBI continued to review real estate investments for possible inclusion in the pool.

Private Equity Pool

The Basic Funds maintain a private equity portfolio that is broadly diversified across three dimensions: location, industry type and stage of development of individual portfolio companies. Prospective private equity managers are reviewed and selected based, primarily, on the manager's experience, investment strategy, diversification potential and performance history.

During fiscal year 2000, the Board approved and closed on commitments with Vestar Capital Partners IV, Crescendo Ventures IV, GTCR Golder Rauner Fund VII, Welsh Carson Anderson Stowe IX, and Fox Paine Capital II. The SBI will continue to review and add new private equity investments, as attractive opportunities are identified, to replenish commitments that will expire within the next five years.

Resource Fund Pool

The oil and gas partnerships in the Basic Retirement Funds concentrate their investments in producing properties and oil service interests that are diversified geographically and/or geologically. Resource investments are selected based on the manager's experience, investment strategy and performance history.

During fiscal year 2000, the SBI continued to review resource investments for possible inclusion in the Pool.

Investment Performance

The SBI reviews performance of its *real estate* investments relative to inflation, as measured by changes in the Consumer Price Index (CPI).

During fiscal year 2000, the SBI's real estate pool exceeded the rate of inflation (SBI real estate 9.2%; CPI 3.7%). Comparisons over the last five years show that the real estate pool exceeded the rate of inflation (SBI real estate 12.9% annualized; CPI 2.5% annualized).

The SBI's *private equity* pool provided a 43.1% return in fiscal year 2000 and 30.9% annualized over the last five years. The *resource* (oil and gas) pool returns are 27.8% for the year and 12.3% annualized over the last five years.

At this time, benchmarks have not been established for the private equity and resource fund managers. The long-term nature of these investments and the lack of comprehensive data on the returns provided by the resource and private equity markets preclude comprehensive performance evaluation. In the future, as markets

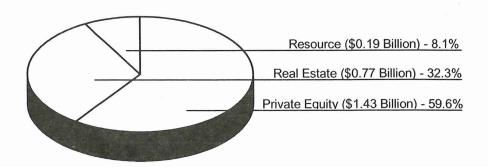

for these asset classes become more institutionalized, the SBI hopes to integrate appropriate performance standards for these assets into its performance analysis.

Alternative Investments Post Fund

The Post Retirement Fund made its first commitment to alternative assets during fiscal year 1994. The Post Fund has a somewhat shorter investment time horizon than the Basic Funds and therefore is best suited to investments that will generate a fairly high level of current income. The Board has allocated up to 5% of the Post Retirement Fund to vield-oriented alternative investments at market value, and up to 10% at market value plus unfunded commitments. As of June 30, 2000, the market value of the Post Fund's alternative investments was \$389 million, 1.9% of the Post Fund.

Descriptions of each of the Post Fund's alternative investments are included in the Investment Manager Summaries section. Yield-oriented investments (e.g. business loan participations, mortgage loan

Figure 22. Basic Funds' Alternative Investments as of June 30, 2000

Note: Percentages may differ slightly due to rounding of values.

participations, and income producing private placements) provide additional vehicles to obtain both higher yield and long-term capital appreciation.

Typically, these investments are structured more like fixed income securities with an opportunity to participate in the appreciation of the underlying assets. While these investments may have an equity component, they display a return pattern more like a bond. As such, they will help to reduce the volatility of the total portfolio, but should also provide the opportunity to generate higher returns relative to bonds.

During fiscal year 2000, the Board approved and closed on five yield-oriented commitments for the Post Fund: Citicorp Mezzanine Partners III, Windjammer Mezzanine and Equity II, DLJ Investment Partners II, GS Mezzanine Partners II, and Merit Energy Fund D. The SBI will continue to review additional investments for the Post Fund in order to move closer to the market value allocation target in future years.

The SBI's yield-oriented investments provided a 13.8% return for the year and 13.3% annualized return over the last five years.

A listing of individual investment funds can be found in the **Statistical Data** Section.

The Supplemental Investment Fund is a multi-purpose investment program that offers a range of investment options to state and local public employees. The Fund serves approximately 45,000 individuals who participate in defined contribution or supplemental retirement savings plans. On June 30, 2000, the market value of the entire Fund was \$1.76 billion.

The different participating groups use the Supplemental Fund for a variety of purposes:

- It functions as the sole investment manager for all assets of the Unclassified Employees Retirement Plan, Public Employees Defined Contribution Plan and Hennepin County Supplemental Retirement Plan.
- It is one of the investment vehicles offered to public employees as part of the State's Deferred Compensation Plan, as well as the Individual Retirement Account Plan and College Supplemental Retirement Plan offered by Minnesota State Colleges and Universities (MnSCU).
- It serves as an external money manager for a portion of some local police and firefighter retirement plans.

Fund Structure

A wide diversity of investment goals exists among the Supplemental Fund's participants. In order to meet those needs, the Supplemental Fund has been structured much like a "family of mutual funds." Participants may allocate their investments among one or more accounts that are appropriate for their needs, within statutory requirements and rules established by the participating organizations.

Participation in the Supplemental Fund is accomplished through the purchase or sale of shares in each account.

Fund Management

The Supplemental Fund offers seven different investment options (See Figure 23). The objectives, asset allocation, management and performance of each account in the Fund are explained in the following sections.

Share Values

Each account in the Supplemental Fund establishes a share value and participants may buy or sell shares monthly, based on the most recent share value. In the Income Share Account, the Growth Share Account, the Common Stock Index Account, the International Share Account and the Bond Market Account, shares are priced monthly based on the market value of each account. Individuals measure the performance of these accounts by changes in share values, which in turn are a function of the income and capital appreciation (or depreciation) generated by the securities in the accounts.

In the Money Market Account and the Fixed Interest Account, share values remain constant and the accrued interest income is credited to the accounts through the purchase of additional shares at predetermined intervals.

Figure 23. Accounts in the	e Supplemental Investment Fund
Income Share	a balanced portfolio of U.S. common stock, fixed income, and cash.
Growth Share	an actively managed portfolio of U.S. common stocks.
Common Stock Index	a passively managed portfolio of U.S. common stocks.
International Share	a portfolio of both actively and passively managed non U.S. stocks.
Bond Market	a portfolio of both actively and semi-passively managed fixed income securities.
Money Market	a portfolio of short-term, liquid debt securities.
Fixed Interest	a portfolio of guaranteed investment contracts (GIC's) and GIC type investments which offer a fixed rate of return for a specified period of time.

The investment returns shown in this report are calculated using a time-weighted rate of return formula. These returns are net of investment management fees and transaction costs. They do not, however, reflect any administrative expenses deducted by the retirement systems to defray their own administrative costs.

The distribution of assets in the Supplemental Investment Fund as of June 30, 2000 are shown by Account in Figure 24 and by Plan in Figure 25.

Figure 24. Composition by Account as of June 30, 2000

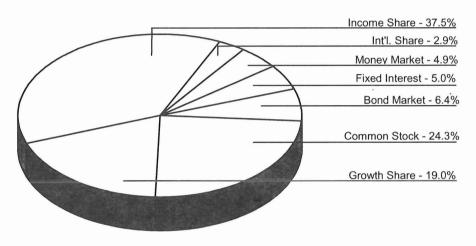

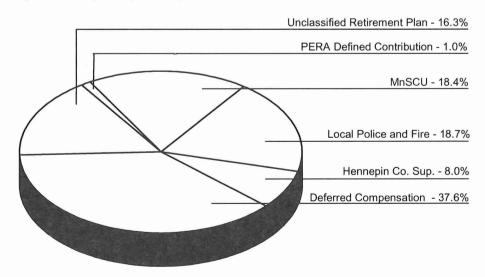

Figure 25. Participation by Plan as of June 30, 2000

Income Share Account

Objective

The Income Share Account resembles the Basic and Post Retirement Funds in terms of investment objectives. The Account seeks to maximize long-term inflation-adjusted rates of return. The Income Share Account pursues this objective within the constraints of protecting against adverse financial environments and limiting short run portfolio return volatility.

The SBI invests the Income Share Account in a balanced portfolio of common stocks and fixed income securities with the following long-term asset mix: 60% domestic common stocks, 35% bonds, 5% cash equivalents.

Domestic common stocks provide the potential for significant long-term capital appreciation, while bonds provide both a hedge against deflation and the diversification needed to limit excessive portfolio return volatility.

At the close of fiscal year 2000, the value of the Income Share Account was \$662 million.

Management

The Income Share Account's investment management structure combines internal and external management. SBI staff manage the fixed income segment. The common stock segment is managed externally as part of a passively managed index fund designed to track the Wilshire 5000. The manager for this portion of the Account is Barclays Global Investors.

Performance

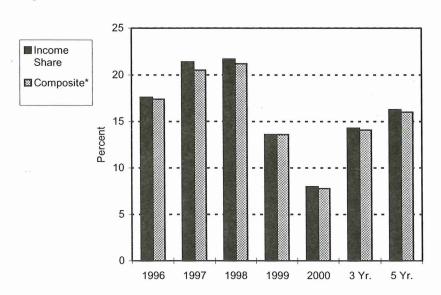

Similar to the other SBI funds which utilize a multi-manager investment structure, the Board evaluates the

performance of the Income Share Account on two levels:

- Total Account. The Income
 Share Account is expected to
 exceed the returns of a
 composite of market indices
 weighted in the same proportion
 as its long term asset allocation.
- Individual Manager. The
 passive stock manager is
 expected to track closely the
 performance of the Wilshire
 5000. The internal bond manager
 for the Account is expected to
 exceed the performance of the

Lehman Brothers Aggregate Bond Index. The Income Share Account provided a return of 8.0% for fiscal year 2000, exceeding its composite index by 0.2 percentage point. Over the most recent five years, the Income Share Account has exceeded its composite by 0.3 percentage point. Figure 26 shows a five year history of performance results.

Figure 26. Income Share Account FY 1996-2000

						Annualized		
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.

Composite*	17.4	20.5	21.2	13.6	7.8	14.1	16.0	

^{*60%} Wilshire 5000/35% Lehman Brothers Aggregate Bond Index/5% 3 Month T-Bill Composite.

Growth Share Account

Objective

The investment objective of the Growth Share Account is to generate high returns from capital appreciation. To achieve this objective, the Account is invested primarily in U.S common stock.

At the close of fiscal year 2000, the value of the Growth Share Account was \$334 million.

Management

The assets of the Growth Share Account are invested by the external active and semi-passive domestic equity managers. This allocation reflects a more aggressive investment than is available through passive management. Since July 1997, these assets have been managed by the same active and semi-passive managers utilized by the Basic and Post Retirement Funds in the Domestic Stock Pool. (Prior to July 1997, the Account used only active managers.) The Account may hold a small amount of cash that represents new contributions received prior to their investment in the market and cash that may be held by the individual managers in the Account.

Performance

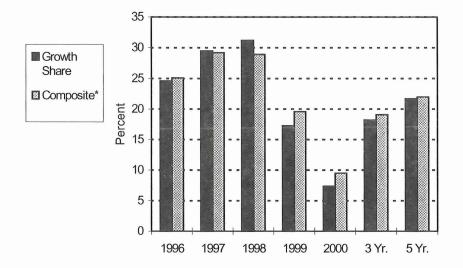

Like the Income Share Account, the Board evaluates the performance of the Growth Share Account on two levels:

Total Account. The Growth Share Account is expected to exceed the returns of the Wilshire 5000 Investable, which adjusts the Wilshire 5000 for liquidity and investability constraints as well as restrictions specific to the State of Minnesota (currently tobacco). It is a quarterly buy and hold portfolio. Individual Manager.
Performance objectives for the individual managers are described in the Investment
Pools section of this report.

The Growth Share Account provided a return of 7.4% for the fiscal year, underperforming its composite index by 1.2 percentage points. Individual manager performance relative to their benchmarks was mixed. See the discussion starting on page 15 concerning the Domestic Stock Pool. Over the last five year period, the

Account has underperformed by 0.3 percentage point annually. A five year history of performance results is shown in Figure 27.

Figure 27. Growth Share Account FY 1996-2000

						Annualized		
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.	
Growth Share	24.6%	29.5%	31.2%	17.3%	7.4%	18.2%	21.7%

^{* 95%} Wilshire 5000/5% T-Bill Composite through October 1996; 100% Wilshire 5000 from November 1996 through June 1999; and Wilshire 5000 Investable since July 1, 1999.

Common Stock Index Account

Objective

The investment objective of the Common Stock Index Account is to generate returns that track the performance of the entire U.S. common stock market as represented by the Wilshire 5000. To accomplish this objective, the SBI allocates all of the assets of the Common Stock Index Account to passively managed domestic stocks. At the end of fiscal year 2000, the Account had a market value of \$428 million.

Management

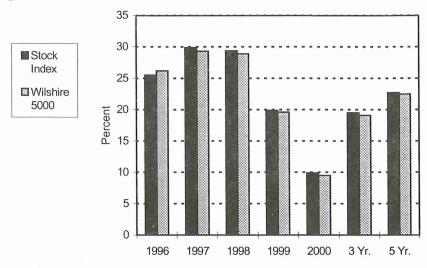

The Account participates in the passive portfolio of the Domestic Stock Pool, which is managed by Barclays Global Investors.

Performance

The performance objective of the Common Stock Index Account is to track the performance of the Wilshire 5000. The SBI recognizes that the Account's returns may deviate slightly from those of the Wilshire 5000 due to the effects of management fees, timing of new contributions and tracking error.

During fiscal year 2000, the Common Stock Index Account produced a return of 9.9%, which was 0.4 percentage point above the Wilshire 5000. Over the most recent three and five year periods, the Account has outperformed the index by 0.4 and 0.2 percentage point respectively. Total Account results for the last five years are shown in Figure 28.

Figure 28. Common Stock Index Account FY 1996-2000

						Annu	alized

Wilshire 5000	26.2	29.3	28.9	19.6	9.5	19.1	22.5

International Share Account

Objective

The investment objective of the International Share Account is to earn a high rate of return by investing in the stock of companies outside the U.S.

Typically, a majority of the Account is invested in the five largest international markets (United Kingdom, Japan, Germany, France and Switzerland). Most of the remainder is invested in other well established markets in Canada, Europe and the Pacific region. In addition, a portion of the Account is invested in developing countries or "emerging markets" around the world including those in Latin America, Asia and Africa. At the end of fiscal year 2000, the Account had a market value of \$51 million.

Management

The structure of the International Share Account combines both active and passive management. Approximately one third of the Account is passively managed and is designed to consistently and inexpensively track the return of the Morgan Stanley Capital International index of Europe, Australasia and the Far East (EAFE Free). The remainder of the Account is actively managed by a group of international stock managers who buy and sell stocks in an attempt to maximize market value. The Account uses the same active, passive, and currency overlay managers utilized by the Basic and Post Retirement Funds in the International Stock Pool.

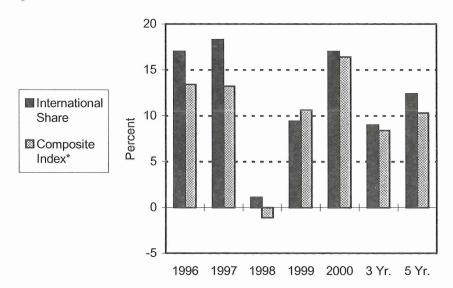

Performance

The International Share Account is expected to exceed the performance of a composite of international indices. During fiscal year 2000, the International Share Account produced a return of 17.0%, which was 0.6 percentage point above its composite index. Over the most recent three and five year periods, the international share account has exceeded its composite index by 0.6

and 2.1 percentage points, respectively.

See the discussion on performance of the international managers beginning on page 20. Total Account results since its inception are shown in Figure 29.

Figure 29. International Share Account FY 1996-2000

^{*}EAFE Free through 4/31/96; composite of EAFE-Free and Emerging Markets Free since 5/1/96.

Bond Market Account

Objective

The objective of the Bond Market Account is to earn above market returns from fixed income securities. The Account is invested primarily in investment-grade government bonds, corporate bonds and mortgage securities with intermediate to long maturities. As such, it is a more conservative investment alternative than the accounts described in the previous sections. At the end of fiscal year 2000, the market value of the Account was \$112 million.

The Account earns investment returns through interest income and capital appreciation. Because bond prices move inversely with interest rates, the Account entails some risk for investors. However, historically, it represents a lower risk alternative than the investment options that include common stocks.

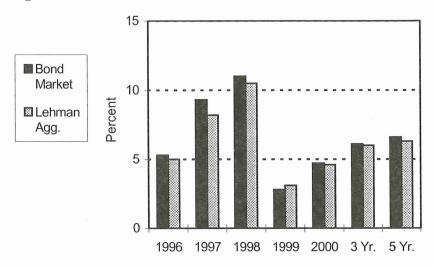

Management

The Bond Market Account invests in the Bond Pool utilized by the Basic and Post Funds. Since July 1997, the structure of the account has included active and semi-passive managers. (Prior to July 1997, the Bond Market Account used only active managers.)

Performance

The Bond Market Account is expected to exceed the performance of the bond market, as represented by the Lehman Brothers Aggregate Bond Index. For fiscal year 2000, the Account outperformed by 0.1 percentage point. For the most recent three and five year periods, the Account has outperformed by 0.1 and 0.3 percentage point annualized. See the discussion regarding bond manager performance on page 18. Total Account results for the last five years are shown in Figure 30.

Figure 30. Bond Market Account FY 1996-2000

Lehman Aggregate	5.0	8.2	10.5	3.1	4.6	6.0	6.3	

Supplemental Investment Fund

Money Market Account

Objective

The Money Market Account invests solely in short-term, liquid debt securities. The Account's investment objectives are to preserve capital and offer competitive money market returns. At the end of fiscal year 2000, the Money Market Account had a market value of \$87 million.

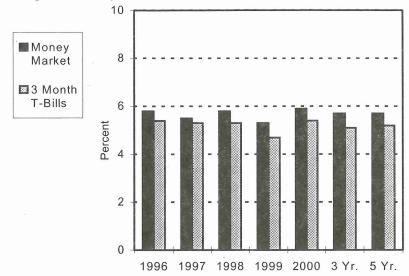

Management

The Account utilizes the same cash manager as the Basic and Post Retirement Funds, which is State Street Bank & Trust Company.

Performance

The Account is expected to produce returns competitive with those available from short-term debt securities. The Money Market Account exceeded that target in fiscal year 2000 with a 5.9% return versus a 5.4% return for the 3 Month Treasury Bill. Total account results for prior years are shown in Figure 31.

Figure 31. Money Market Account FY 1996-2000

3 Month T-Bills	5.4	5.3	5.3	4.7	5.4	5.1	5.2

Fixed Interest Account

Objective

The investment objectives of the Fixed Interest Account are to protect investors from loss of their original investment and to provide competitive interest rates using somewhat longer term investments than typically found in a money market account. At the end of fiscal year 2000, the Account totaled \$88 million.

Management

The assets in the Account are invested primarily in stable value instruments which are guaranteed investment contracts (GIC's) and GIC-type investments offered by

major U.S. insurance companies and banks with varying maturities, typically 3 to 5 years. The assets also may be invested in comparable investments offered by non-U.S. financial institutions. The interest rate credited changes monthly and reflects the blended interest rate available from all investments in the pool each month along with any cash held for liquidity purposes.

The manager for the Account is Galliard Capital Management, a unit of Wells Fargo Bank. Galliard has managed the Account since November 1994. Performance results for the Fixed Interest Account are shown in Figure 32.

Figure 32. Fix	ced Interest Account

The Minnesota Workers Compensation Assigned Risk Plan was established in 1983 to provide workers' compensation coverage to Minnesota employers rejected by a private insurance carrier. On June 30, 2000, the market value of the Plan's portfolio was \$756 million.

The Assigned Risk Plan operates as a non-profit, tax-exempt entity and is administered by the Department of Commerce. The Plan provides disability income, medical expenses, retraining expenses and death benefits, with payments being made either periodically or in lump sum.

Investment Objectives

The SBI recognizes that the Assigned Risk Plan has limited tolerance for risk due to erratic cash flows, no allowance for surplus, and generally short duration liabilities.

Therefore, the SBI has established two investment objectives for the Plan:

- to minimize mismatch between assets and liabilities
- to provide sufficient liquidity (cash) for payment of on-going claims and operating expenses

Performance relative to these objectives is measured against a composite index that reflects the asset allocation of the portfolio.

Asset Allocation

The SBI believes that due to the uncertainty of premium and liability cash flows, the Plan should be invested very conservatively.

The bond segment is invested to fund the shorter-term liabilities (less than 10 years) and the common stock segment is invested to fund the longer-term liabilities. This creates a high fixed income allocation which minimizes the possibility of a future fund deficit. The smaller stock exposure provides higher expected returns and hedges some of the inflation risk associated with the liability stream.

The actual asset mix will fluctuate in response to changes in the liability

stream projected by the Plan's actuary and further analysis by the SBI staff.

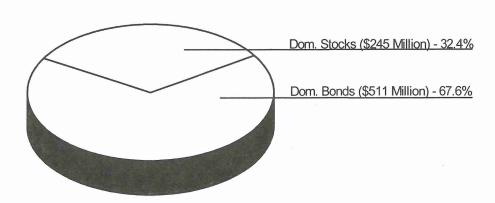

Figure 33 presents the actual asset mix of the Assigned Risk Plan at the end of fiscal year 2000. The current long term asset allocation targets for the Fund are as follows:

Domestic Stocks	20%
Domestic Bonds	80

Investment Management

Voyageur Asset Management manages the bond segment of the Assigned Risk Plan, and GE Investment Management manages the equity segment of the Plan.

Figure 33. Assigned Risk Plan Asset Mix as of June 30, 2000

Assigned Risk Plan

Bond Segment

The bond segment is designed to fund the shorter-term liabilities of the Plan with a target duration of 3 years. The segment is actively managed to add incremental value through sector, security and yield curve decisions.

Stock Segment

The stock segment is structured to fund the longer-term liabilities of the Plan. Currently, the equity segment is semi-passively managed with a broadly diversified portfolio of high quality, large capitalization companies. Prior to fiscal year 1995, the stock segment was actively managed.

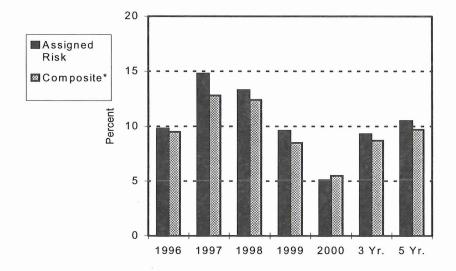

Investment Performance

Due to the focus on liability matching, the composition of the Assigned Risk Plan's investment portfolio is conservatively structured. While active management is utilized, return enhancement plays a secondary role.

The Assigned Risk Plan is measured against a composite index which is weighted to reflect the asset allocation of the Plan:

 the target for the equity component is the S&P 500.

Figure 34. Assigned Risk Plan Performance FY 1996-2000

						Ann	ualized
	1996	1997	1998	1999	2000	3 Yr.	5 Yr.
Assigned Risk	9.8%	14.8%	13.3%	9.6%	5.1%	9.3%	10.5%
Composite Index*	9.5	12.8	12.4	8.5	5.5	8.7	9.7
Stock Segment	25.2	34.4	28.9	23.7	7.0	19.5	23.5
S&P 500	26.0	34.7	30.2	22.8	7.2	19.7	23.8

Benchmark	5.6	7.7	8.1	4.7	4.8	5.8	6.2

^{*}Weighted 20% stocks, 80% bonds.

 the target for the fixed income component is a custom benchmark which reflects the duration target established for the bond segment (approximately 3 years) as well as the manager's suggested sector allocation.

During fiscal year 2000, the **bond** segment underperformed its benchmark by 0.6 percentage point. The **stock** segment underperformed its benchmark by 0.2 percentage point.

Overall, the Assigned Risk Plan provided a return of 5.1% for fiscal year 2000, underperforming its composite index by 0.4 percentage point. The stock segment was overweighted during much of the year. Due to the underperformance of stocks and bonds, the total fund underperformed its composite index for the period.

Over the last five years, the total portfolio has outperformed its composite index by 0.8 percentage point, annualized. The outperformance was attributable to the portfolio's overweighting in stocks in the last four fiscal years.

Historical performance results are presented in Figure 34.

Legislation approved during the 2000 session required the transfer of \$435 million of surplus assets from the Workers Compensation Assigned Risk Plan, effective July 2000.

Permanent School Fund

The Permanent School Fund is a trust fund created by the Minnesota State Constitution and designated as a long-term source of revenue for public schools. Proceeds from land sales, mining royalties, timber sales, lake shore and other leases are invested in the Fund. Income generated by the Fund's assets is used to offset state school aid payments. On June 30, 2000, the market value of the Fund was \$579 million.

Investment Objective

The State Board of Investment (SBI) invests the Permanent School Fund to produce a growing level of spendable income, within the constraints of maintaining adequate portfolio quality and liquidity that will assist in offsetting state expenditures on school aid.

Investment Constraints

The Fund's investment objectives are influenced by the legal provisions under which its investments must be managed. These provisions require that the Fund's principal remain inviolate. Any net realized capital gains from stock or bond investments must be added to the principal. Moreover, if the Fund realizes net capital losses, these

losses must be offset against interest and dividend income before such income can be distributed. Finally, all interest and dividend income must be distributed in the year in which it is earned.

Asset Allocation

Prior to FY 1998, the Permanent School Fund had been invested entirely in fixed income securities for more than a decade. While this asset allocation maximized current income, it limited the long term growth of the Fund and caused the income stream to lose value in inflation adjusted terms, over time.

To solve both issues, a proposal to introduce equities to the Fund's asset mix was discussed. Since this

modification would reduce short term income and have budgetary implications for the state, the consent of the executive and legislative branches was necessary.

A proposal to introduce equities was presented during fiscal year 1997. It was favorably received by the Legislature and incorporated into the K-12 education finance bill. As a result, the Fund allocation was shifted to a 50% stock/48% fixed income/2% cash allocation during July 1997.

Figure 35 presents the actual asset mix of the Permanent School Fund at the end of fiscal year 2000.

Investment Management

SBI staff manage all assets of the Permanent School Fund. Given the unique constraints of the Fund, management by SBI staff is considered to be the most cost effective at this time.

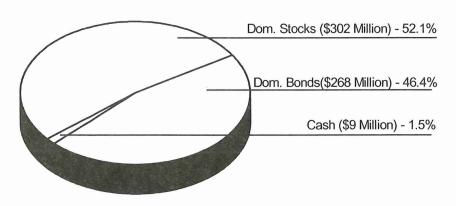

Stock Segment

The stock segment of the Fund is passively managed to track the performance of the S&P 500.

Bond Segment

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions and its performance is measured against the Lehman Brothers Aggregate Bond Index.

Figure 35. Permanent School Fund Asset Mix as of June 30, 2000

Note: Percentages may differ slightly due to rounding of values.

Permanent School Fund

Investment Performance

The *stock* segment of the Permanent School Fund outperformed its benchmark, the S&P 500, during the fiscal year by 0.2 percentage point. By investing in all the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis. The portfolio is periodically rebalanced to maintain an acceptable tracking error relative to the benchmark.

The *bond* segment outperformed its benchmark during the current fiscal year by 0.1 percentage point due to the sector weightings held and the duration of the portfolio versus the Lehman Aggregate Index.

Overall, the Permanent School Fund provided a return of 6.1% for fiscal year 2000, underperforming its composite index by 0.1 percentage point.

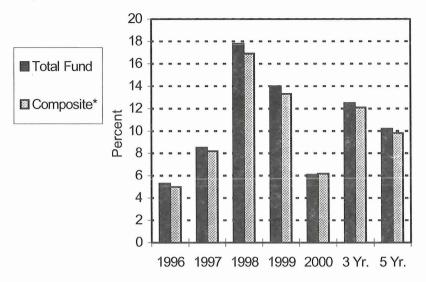

Total account results for the last five years are shown in Figure 36.

Spendable Income

Spendable income generated by the portfolio over the last five fiscal years is shown below:

Fiscal Year	Millions
1996	\$31
1997	\$30
1998	\$20
1999	\$19
2000	\$21

Figure 36. Permanent School Performance FY 1996-2000

^{* 50%} S&P 500, 48% Lehman Aggregate, 2% 3 Month T-Bills. Prior to July 1, 1998, the Fund's benchmark was 100% Lehman Aggregate.

Environmental Trust Fund

The Environmental Trust Fund was established in 1988 by the Minnesota Legislature to provide a long-term, consistent and stable source of funding for activities that protect and enhance the environment. On June 30, 2000, the market value of the Fund was \$315 million.

By statute, the State Board of Investment (SBI) invests the assets of the Environmental Trust Fund. The Legislature funds environmental projects from a portion of the market value of the Fund.

Investment Objective

The Environmental Trust Fund's investment objective is long-term growth in order to produce a growing level of spending within the constraints of maintaining adequate portfolio quality and liquidity.

Investment Constraints

In November 1998, Minnesota voters passed a constitutional amendment that continues through 2025. The amendment mandates that 40 percent of the net proceeds from the state lottery be credited to the Fund.

The amendment provides for spending 5.5 percent of the Fund's market value annually, beginning fiscal year 2000. The amendment also eliminates the accounting restrictions on capital gains and losses and the provision that the principal must remain inviolate.

Asset Allocation

During fiscal year 1994, the SBI introduced equities into the portfolio and moved to a targeted 50% allocation to domestic common stocks and 50% to bonds. This allocation was maintained through fiscal year 1999.

After the constitutional amendment was adopted, SBI staff worked with the Legislative Commission on Minnesota Resources to establish an asset allocation policy that is consistent with the Commission's goals for spending and growth of the Fund.

The SBI approved a 70% stock and 30% fixed income asset allocation which was implemented July 1, 1999. The new allocation positions the Fund for the best long-term growth potential while meeting the objective of the Fund to produce a growing level of spending.

Figure 37 presents the actual asset mix of the Environmental Trust Fund at the end of fiscal year 2000. The

current long term asset allocation targets for the Fund are:

Domestic Stocks	70%
Domestic Bonds	28
Cash	2

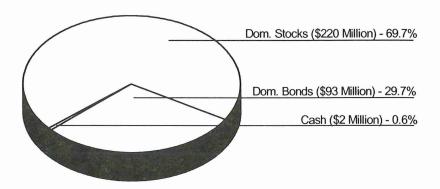

Investment Management

SBI staff manage all assets of the Environmental Trust Fund. Given the unique constraints of the Fund, along with its relatively small size, management by SBI staff is considered to be the most cost effective at this time.

Stock Segment

The stock segment of the Fund is passively managed to track the performance of the S&P 500.

Figure 37. Environmental Trust Fund Asset Mix as of June 30, 2000

Note: Percentages may differ slightly due to rounding of values.

Environmental Trust Fund

Bond Segment

The bond segment is actively managed to add incremental value through sector, security and yield curve decisions and its performance is measured against the Lehman Brothers Aggregate Bond Index.

Investment Performance

During the Fiscal Year, the *stock* segment accomplished its objective of closely tracking the return of the S&P 500 benchmark, returning 0.2 percentage point more than the S&P 500. By investing all of the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis. The portfolio is periodically rebalanced to minimize trading costs while still maintaining an acceptable tracking error relative to the benchmark.

The *bond* segment outperformed its benchmark by 0.1 percentage point due to the sector weightings held and the duration of the portfolio versus the Lehman Aggregate.

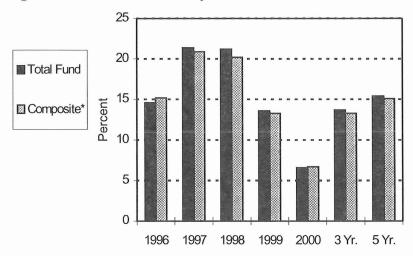

Overall, the Environmental Trust Fund provided a return of 6.6% for fiscal year 2000, underperforming its composite index by 0.1 percentage point. The fund experienced modest outperformance over the last three and five years due to the incremental value added by both the stock and bond segments. Performance results are presented in Figure 38.

Spendable Income

Spendable income generated by the Fund follows:

Fiscal Year	Millions
1995	\$5.2
1996	\$6.0
1997	\$6.8
1998	\$8.8
1999	\$9.7
2000	\$12.7

Tobacco Endowment Funds

The Tobacco Endowment Funds were established in Fiscal Year 2000 by the Minnesota Legislature to distribute the settlement proceeds from the 1998 tobacco litigation. The total settlement was \$6.1 billion with payments spread over a 20-year period. Two tobacco endowment funds were established using a portion of the proceeds already received and future payments through January 2001. One endowment fund is the Medical Education Endowment Fund and the other is the Tobacco Prevention Fund. On June 30, 2000, the market value of the Funds was \$264 million and \$421 million, respectively.

Investment Objective

The State Board of Investment invests the Medical Education Endowment Fund and the Tobacco Prevention Fund. The funds are invested to achieve the following objectives: 1) each endowment fund is to earn a minimum of five (5) percent each fiscal year; 2) the principal of each endowment fund is to remain inviolate; and 3) the entire principal contributed to each endowment fund is to be returned to the state general fund on June 30, 2015.

Investment Constraints

The investment objectives of the two Tobacco Endowment Funds, the Tobacco Prevention Fund (TPF) and the Medical Education Fund (MEF), are governed primarily by the constraints and goals for the Funds as established by statute. Annual earnings up to five percent of the market value of the Funds, measured each year at the beginning of the fiscal year for the Tobacco Prevention Fund and measured at the beginning of each quarter for the Medical Education Fund, may be distributed for expenditure. In addition, the principal of the Funds must remain inviolate. The distributions from the TPF are used by the Commissioner of Health to fund public health initiatives. The distributions from the MEF are used

for medical education at the University of Minnesota medical school.

With a change in law enacted during the 2000 Legislative session, distributions in the future will be made up to five percent of the market value for each of the Funds. The increased flexibility will allow a portion of the Funds to be invested in equities.

Asset Allocation

Effective July 1, 1999, the two endowment funds were invested in a laddered fixed income portfolio. This strategy offered the highest probability that the endowment funds would earn five percent annually while keeping the principal inviolate.

Due to the new law, effective July 1, 2000, the two endowment funds will have an asset allocation of 50 percent equity and 50 percent fixed income.

Investment Management

SBI staff manages all assets of the two endowment funds. Under the prior law, the fixed income portfolio was invested entirely in U.S. Treasury and Government Agency bonds with maturities no greater than the expiration date of the funds. The

maturities of the bonds were spread out over the entire life of the endowment funds. This strategy minimized reinvestment risk and fluctuations in the market values of the funds while adhering to the investment objectives. With the change in law, and new asset allocation, the bond portfolio will be structured to invest in a range of U.S. government, corporate and mortgage securities.

Spendable Income

Spendable income generated by the portfolio over the last fiscal year for the two funds is shown below:

Tobacco Prevention Fund Fiscal Year Millions2000 \$7.5

Medical Education Fund Fiscal Year Millions 2000 \$7.8

Closed Landfill Investment Fund

The Closed Landfill Investment Fund is a trust fund created by the Legislature to invest moneys to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. On June 30, 2000 the market value of the Fund was \$5.5 million.

Investment Objective

The investment objective of the Closed Landfill Investment Fund is to generate high returns from capital appreciation. The Fund will be used by the Commissioner of the Pollution Control Agency to pay for the long-term costs of maintaining the integrity of landfills in Minnesota once they are closed. By statute, the fund will receive an appropriation of \$5.1 million at the beginning of fiscal years 2000, 2001, 2002 and 2003. However, by statute, the assets of the Fund are unavailable for expenditure until after fiscal year 2020.

Asset Allocation

Effective July 1999, the Closed Landfill Investment Fund is invested entirely in common stock. Given the long time horizon of this Fund and the lack of need for any short or midterm withdrawals, this strategy will maximize the long-term gain of the Fund.

Investment Management

SBI staff manage all assets of the Closed Landfill Investment Fund. The assets are managed to passively track the performance of the S&P 500 index.

Investment Performance

The Closed Landfill Investment Fund outperformed its benchmark, the S&P 500, during the fiscal year by 0.2 percentage point. By investing in all the stocks in the benchmark at their index weighting, the segment attempts to track the benchmark return on a monthly and annual basis.

	2000
Total Fund	6.7%
S&P 500	6.5

Cash Management & Related Programs

The State Board of Investment (SBI) manages the cash balances in more than 400 state agency accounts with the objectives of preserving capital and providing competitive money market returns. On June 30, 2000, the total value of these accounts was \$7.0 billion.

Internal Cash Pools

The SBI invests these cash accounts in short-term, liquid, high quality debt securities on a non-leveraged basis. These investments include U.S. Treasury and Agency issues, repurchase agreements, bankers acceptances, and commercial paper. On June 30, 2000, the combined value of all agency cash balances was \$7.0 billion.

Pool Structure

Most of the cash accounts are managed by SBI staff through two pooled investment vehicles, which operate much like money market mutual funds:

- *Trust Fund Pool.* This pool contains cash balances of trust fund and retirement-related accounts that are managed internally. The Trust Fund Pool had an average daily balance of \$86.1 million during the year.
- Treasurer's Cash Pool. This pool contains cash balances from the Invested Treasurer's Cash and other accounts necessary for the operation of state agencies.
 The Treasurer's Cash Pool had an average daily balance of \$5.6 billion during the year.

Staff also manages approximately \$1 billion of assets in separately managed dedicated accounts because of special legal restrictions. The

vast majority of these assets are related to state or state agency debt issuance including debt service reserves and proceeds.

Performance

The SBI measures the performance of both pools against customized benchmarks which reflect the maturity structure of each pool.

For fiscal year 2000, the Trust Fund Pool and the Treasurer's Cash Pool outperformed their respective benchmarks. Both pools also outperformed the total return on 3 Month Treasury Bills.

Trust Fund Pool	5.9%
Benchmark	5.2
Treasurer's Cash Pool	6.0
Benchmark	5.2

3 Month Treasury Bills 5.4

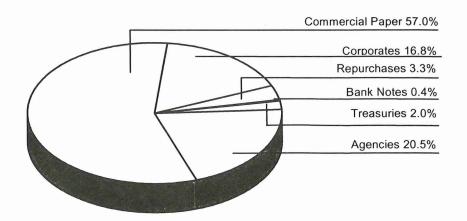

Effective January 1997, the Trust Fund Pool is measured against the IBC All Taxable Money Fund Index.

Effective January 1997, the Treasurer's Cash Pool is measured against a blended benchmark consisting of the Lehman Brother's 1-3 year Government Index for a portion of the portfolio and the IBC All Taxable Money Fund Index for the balance.

Treasurer's Cash Pool

On June 30, 2000, the Treasurer's Cash Pool was dominated by high quality commercial paper holdings. The composition of the pool is shown in Figure 39. At the end of the fiscal year, the pool had a current yield of 5.9% and an average maturity of 207 days.

Figure 39. Invested Treasurer's Cash Fund Distribution as of June 30, 2000

Cash Management & Related Programs

Securities Lending Program

The SBI participates in securities lending programs in which securities held by the SBI are loaned to banks and security dealers for a daily fee. These loans are fully collateralized. Currently, the majority of the SBI's securities lending activity is undertaken by the SBI's master custodian bank, State Street Bank and Trust. Securities lending generated additional income of approximately \$17.1 million during fiscal year 2000 for all portfolios controlled by the SBI.

Certificate of Deposit Program

The SBI also manages a certificate of deposit (CD) program in which it purchases CD's from Minnesota financial institutions. The SBI receives a market rate of return on these investments, using the average secondary CD market rate quoted by the New York Federal Reserve Bank.

The SBI's Certificate of Deposit program provides a reliable source of capital to Minnesota financial institutions, regardless of size, many of which do not have access to the national CD market. The Board designed the program so that no single institution is favored in the allocation of assets. Only the cash reserves of the retirement funds are used in the program.

During fiscal year 2000, the SBI purchased over \$339.5 million of CD's from Minnesota financial institutions. Since it began the program in 1980, the SBI has purchased over \$3.3 billion of CD's from approximately 500 financial institutions throughout the state.

Securities Repurchase Program

Since 1980, the SBI has invested in banks throughout Minnesota through the SBI's Certificate of Deposit (CD) program. In recent years, community banks throughout Minnesota have experienced an increased need for funds due to a reduction in local deposits and a reduced ability to sell investments held in bank portfolios due to changes in federal accounting requirements. The SBI created the Securities Repurchase Program to help meet the increased needs of banks throughout the state.

Under the program, the SBI temporarily buys securities such as Treasuries and Governments from banks under a repurchase agreement (repo). At the end of the agreement period, the securities are returned to the selling banks (i.e. "repurchased") and the bank pays the SBI principal and interest.

The transactions are fully collateralized and range in size from \$100,000 to \$2 million per institution. Amounts above \$500,000 are based on availability of funds and other factors such as a bank's preferred lending ranking by the Small Business Administration (SBA).

For ease of administration, the program uses the same rates, offering dates and maturity dates as the SBI's CD program.

With the support of both the Minnesota Department of Commerce and the SBA, a proposal for a pilot program was approved by the Board at its meeting in December 1995. The initial offering was made in April 1996 with 10 banks participating in the placement of \$6.5 million.

During fiscal year 2000, the SBI purchased \$18.7 million in repos from Minnesota financial institutions.

Legislative Update

Several bills of interest to the State Board of Investment were passed during the 2000 legislative session.

The SBI's administrative bill was enacted as Laws of Minnesota 2000, Chapter 392. The law contains the following provisions:

- Stock Exchanges. The new language clarifies that the SBI may invest funds in any exchange "regulated by an agency of the United States or Canadian national government". The expanded language provides the SBI with additional flexibility to invest where it can obtain the lowest cost transactions to benefit retirees and beneficiaries.
- Private Equity Investment Vehicles. The structure of investment pools that brings private equity investment opportunities to institutional investors has changed over time. The variety of legal structures has expanded. The new law broadens the statutory language to clarify that the SBI may participate in this wider variety of legal structures while at the same time leaving in place the statutory restrictions that pertain to the vehicles currently used.

These restrictions include the requirement that there be at least four other investors, that the SBI participation be no more than 20 percent and that the SBI may not engage in any activity as a limited partner that exposes the SBI to general liability.

 Closed-end Mutual Funds. The SBI has had authority to invest in open-end mutual funds. The new law authorizes the SBI to invest in closed-end mutual funds. The SBI will use the expanded authority on a selective basis to take advantage of specific opportunities as they may become available.

Investment Flexibility for the Tobacco Endowment Funds. This provision will allow the SBI to change the asset allocation of the Tobacco Endowment Funds to include equity investments. The 1999 legislation that established the two tobacco funds specified that the principal must remain inviolate and that only earnings from the funds could be used for expenditures. These restrictive provisions limited the investment options available to the SBI, resulting in the tobacco funds being invested entirely in a laddered fixed income portfolio.

At its March 2000 meeting, the Board approved a recommendation to change the asset allocation of the Funds to 50 percent equity/ 50 percent fixed income, subject to successful passage of legislation to increase investment flexibility. The restrictive provisions were removed, and the SBI implemented the new allocation effective July 2000.

The Omnibus Pension Bill gives the SBI new responsibilities for the 403(b) tax sheltered annuity employer match opportunity. Laws of Minnesota 2000, Chapter 461, Article 13 changes the SBI's responsibilities with respect to the

403(b) annuity employer match opportunity for school districts. The law repeals the subdivision requiring selection of qualified companies. Instead, the SBI is required to review the financial status and investment products of product providers who request the review and to provide the information to parties who request it

Legislative policy to remove surplus assets from the Workers Compensation Assigned Risk Plan is carried out in several different bills. Laws of Minnesota 2000, Chapter 447, Section 24 removes \$325 million of assets and requires transfer of the total to the workers compensation special compensation fund by July 10, 2000. Laws of Minnesota 2000, Chapter 490, Article 13, Section 19 removes \$110 million from the Assigned Risk Plan and requires transfer to the general fund by July 15, 2000. In addition, Laws of Minnesota 2000, Chapter 488, Article 13, Section 1 removes \$15 million from the Plan and requires transfer to the Minnesota Comprehensive Health Association by January 15, 2001.

The legislative actions leave approximately \$300 million of assets in the Assigned Risk Plan. The changes reduce the size of the equity portfolio managed by GE Asset Management and the fixed income portfolio managed by Voyageur Asset Management. The assets to be transferred into the special compensation fund will be invested in the Invested Treasurer's Cash pool.

Responsibility for Deferred Compensation Programs

The State Board of Investment (SBI) has responsibilities for several deferred compensation-related programs:

- The SBI selects investment product providers for the State Deferred Compensation Plan, an Internal Revenue Code (IRC) 457 plan administered by the Minnesota State Retirement System (MSRS).
- The SBI selects investment product providers for the Minnesota State Colleges and Universities (MnSCU) and the Minnesota Historical Society for their IRC 401(a) defined contribution retirement plans.
- The SBI reviews investment product providers for the employer match to IRC 403(b) tax sheltered annuities for K-12 teachers.

The investment product providers currently used by these programs are shown in Figure 40.

The restructured Deferred Compensation Plan took effect July 1, 1999. The SBI selected and retained six mutual funds as external stock and bond investment options and three insurance companies to jointly provide a fixed interest option.

In fiscal 2000, the SBI and MnSCU restructured the MnSCU plans. The restructuring resulted in the retention of a different set of investment product providers for the plans.

During the 2000 Session, the Legislature repealed the statutory provision requiring selection of qualified companies to provide investment products for the 403(b) annuity employer match opportunity. The new legislation directs the SBI, when requested by an investment product provider, to review the financial standing of the

company, the competitiveness of the company's investment options and returns, and the level of all charges and fees impacting those returns. The SBI will implement the new directive in fiscal 2001.

Police and Fire Fund Activity

Mergers with PERA: In 1987, legislation was enacted that establishes procedures for consolidation of local police and salaried firefighter plans with the Public Employees Retirement Association (PERA). When a merger is approved, assets are transferred from the local plan to the State Board of Investment (SBI).

By statute, the Executive Director of the SBI has authority to accept assets in-kind or to require that individual holdings be converted to cash prior to the transfer. Since the investments made by local plans are similar to those made by the SBI, most assets can be transferred at their stated market value.

Since 1987, 44 plans with total assets of \$603 million have merged with PERA. After consolidation, these assets are managed as part of the Basic and Post Retirement Funds. (Please note that there remain only three local police plans and two salaried firefighter plans that have not merged with PERA. These five plans also have the statutory authority to invest in the Supplemental Investment Fund [SIF]).

Volunteer Fire Plans Investment:

Volunteer firefighter retirement plans are not eligible to be consolidated with PERA. They may invest their assets with the SBI through the SIF. There are more than 700 local volunteer firefighter plans with investment authority.

During fiscal year 2000, an additional 16 volunteer firefighter plans selected the SIF for all or a portion of their

retirement assets. This brought the total number of plans participating in the SIF to 206 by the end of the fiscal year.

The SBI expects this growth trend to continue as volunteer firefighter plans become more familiar with the SBI and its ability to offer a variety of investment options at a low administrative cost.

Local Plan Performance Reports:

The SBI provides the local plans that participate in the SIF reports displaying their annual returns and market values from the SIF in compliance with *Minnesota Statutes*, Chapter 356. The local plans are responsible for providing their specific data to the Office of the State Auditor.

Guidelines on International Investing

As noted in prior sections of this report, the State Board of Investment (SBI) made its first international stock investments in 1992. The benefits of international investing include: increased investment opportunity, greater diversification and potential for higher return. Approximately one-half of the world's markets lie outside the U.S.

The United Kingdom, Japan, Germany and France comprise nearly two-thirds of the value of the international markets. Together with sixteen (16) other countries in Europe and the Pacific Basin, these countries comprise the developed international stock markets. Many of the emerging markets in Central and South America, Eastern Europe, Africa and Asia may require special investment considerations and/or limitations on investment.

Task Force

The Board has established an International Investing Guidelines Task Force to recommend guidelines that address these limitations as well as other concerns related to international investing.

The membership of the Task Force includes a representative of each Board member, a representative of each statewide retirement system, two private sector representatives from the Investment Advisory Council, two representatives from organized labor and one representative from environmental groups. The SBI Executive Director and the SBI's consultant are also members of the Task Force.

Guidelines

Based on information compiled from U.S. State Department reports, the Task Force has grouped countries into three broad categories as indicated below by groups I, II and III. It is important to note that the guidelines listed below do not prohibit an active stock manager from purchasing the stock of any country. Rather, they require additional notification and/or that a presentation be given by the manager regarding the firm's investment strategy for investments to countries in Groups II and III.

Group I. These countries have legal structures that generally respect the rights of workers and human rights. Because these countries have strong protections for workers and human rights, there is little concern that economic and social disruptions may occur which would have an adverse effect on financial markets. As a result, active stock managers are authorized to invest in companies domiciled in these countries without additional notification to the SBI.

Group II. These countries have legal protections for workers and human rights, but violations have been cited in the State Department reports. It is thought that violations of this type may lead to economic and social disruption in these countries, which may have an adverse effect on their financial markets. An active stock manager may, however, invest in companies domiciled in the countries shown under "Group II" if the manager believes that it would be a breach of fiduciary responsibility not to do so. If a manager chooses to invest in one or more of these markets, the manager must notify the SBI in writing.

Group III. These countries lack basic protections for workers and human rights and do not appear to be making progress in establishing an appropriate legal structure to address these issues. The potential for economic, political and social unrest is seen to be greater in these countries, which may adversely affect the stability of these financial markets. An active stock manager may, however, invest in companies domiciled in countries shown under "Group III" if the manager believes that it would be a breach of fiduciary responsibility not to do so. If a manager chooses to invest in one or more of these markets, the manager must appear before the SBI to present its reasons for the decision to do so.

Review Process

When the Task Force made its original report to the Board in December 1992, they expected that the country groupings would be updated periodically to reflect changes in the world markets. At its meeting in June 1994, the Board adopted the following review process regarding guidelines:

- Staff will review reports from the US State Department regarding worker and human rights issues and designate countries "Group I, II or III" using the existing policy guidelines recommended by the Task Force and adopted by the Board.
- Staff designations will be reviewed with the SBI Administrative Committee. This includes any movement of countries between categories as well as categorizations of any new countries that need to be added to the list of available markets.

Mandate on Northern Ireland

Requirements

In 1988, the Legislature enacted statutory provisions concerning the Board's investments in U.S. companies with operations in Northern Ireland. The statute requires the State Board of Investment (SBI) to:

- Annually compile a list of U.S. corporations with operations in Northern Ireland in which the SBI invests.
- Annually determine whether those corporations have taken affirmative action to eliminate religious or ethnic discrimination. The statute lists nine goals modeled after the MacBride Principles.
- Sponsor, co-sponsor and support resolutions that encourage U.S. companies to pursue affirmative action in Northern Ireland, where feasible.

The statute does not require the SBI to divest existing holdings in any companies and does not restrict future investments by the SBI.

Implementation

The SBI uses the services of the Investor Responsibility Research Center (IRRC), Washington D.C., to monitor corporate activity in Northern Ireland. In January 2000, the SBI held stocks or bonds in 58 of 64 corporations identified by IRRC as having operations in Northern Ireland.

The SBI filed shareholder resolutions with 5 of these corporations during the 2000 proxy season. The resolutions asked corporations to sign the MacBride Principles, to implement affirmative action programs or to report on the steps they have taken to alleviate religious or ethnic discrimination.

The voting results on four of the resolutions that made it to the ballot are shown below:

	Affirmative
Company	Vote
Baker Hughes	23.7%
Dun & Bradstreet	12.5
Interface	23.1
TJX Cos.	15.8

Tobacco Issues

At its September 1998 meeting, the Board adopted a resolution that requires each active and semi-passive equity manager to divest by September 2001 shares of any company which obtains more than 15 percent of its revenues from the manufacture of consumer tobacco products. Staff notified each active and semi-passive equity manager of the new policy.

As in the previous fiscal year, the Board received updates on the SBI's holdings of tobacco related stocks at each of its quarterly meetings.

Directives to Stock Managers

The existing policy follows many quarters of work by the Board on the tobacco issue. At its December 1997 meeting, the Board adopted a resolution requiring the SBI's stock managers to provide written justification to SBI staff if a manager chose to make new or additional purchases of stock in companies which obtain more than 50% of their revenues from the sale of tobacco.

At its June 1998 meeting, the Board took further action regarding SBI investment in tobacco-related stocks.

The first resolution required the SBI active and semi-passive equity managers to discontinue purchases of shares of any company that generates more than 15 percent of its revenue from the manufacture of consumer tobacco products. The second resolution required the SBI staff to prepare and submit to the Board a plan for divestiture of shares of any company that generates more than 15 percent of its revenue from the manufacture of consumer tobacco products held in the SBI's actively

and semi-passively managed equity portfolios.

The existing policy requiring divestment follows directly from the latter resolution.

The Board will continue to receive updates on the SBI's holdings of tobacco-related stocks and is expected to continue to monitor the issue very closely.

Shareholder Resolutions

During the 2000 proxy season, the SBI cosponsored a tobacco-related resolution at four (4) companies. The resolution requested independent testing of tobacco ads to verify that they are not youth friendly.

The resolution was submitted to RJ Reynolds Tobacco Holdings, Loews Corp., Philip Morris and UST, Inc. The resolutions gained support from a range of 3.7% to 7.9% of the votes cast.

Proxy Voting

As a stockholder, the State Board of Investment (SBI) is entitled to participate in corporate annual meetings through direct attendance or casting its votes by proxy. Through proxy voting, the Board directs company representatives to vote its shares in a particular way on resolutions under consideration at annual meetings. These resolutions range from routine issues, such as those involving the election of corporate directors and ratification of auditors, to matters such as merger proposals and corporate social responsibility issues. In effect, as a shareholder the SBI can participate in shaping corporate policies and practices.

Voting Process

The Board recognizes its fiduciary responsibility to cast votes on proxy issues. Except for the shares held by active international managers, the SBI does not delegate the duty to its external investment managers. Rather, the SBI actively votes all shares according to guidelines established by its Proxy Committee.

The Board delegates proxy voting responsibilities to its Proxy Committee which is comprised of a designee of each Board member. The five member Committee meets only if it has a quorum and casts votes on proxy issues based on a majority vote of those present. In the unusual event that it reaches a tie vote or a quorum is not present, the Committee will cast a vote to abstain.

Voting Guidelines

The Committee has formulated guidelines by which it votes on a wide range of corporate governance and social responsibility issues. Each year the Proxy Committee reviews existing guidelines and determines which issues it will review on a case-by-case basis.

Corporate Governance Issues

The voting guidelines for major corporate governance issues are summarized below:

Routine Matters. In general, the SBI supports management on routine matters such as uncontested election of directors; selection of auditors; and limits on director and officer liability or increases in director and officer indemnification permitted under the laws of the state of incorporation.

Shareholder Rights Issues. In general, the SBI opposes proposals that would restrict shareholder ability to effect change. Such proposals include instituting super-majority requirements to ratify certain actions or events; creating classified boards; barring shareholders from participating in the determination of the rules governing the board's actions (e.g. quorum requirements and the duties of directors); prohibiting or limiting shareholder action by written consent; and granting certain stockholders superior voting rights over other stockholders.

In general, the SBI supports proposals that preserve or enhance shareholder rights to effect change. Such proposals include requiring shareholder approval of poison pill plans; repealing classified boards; adopting secret ballot of proxy votes; reinstating cumulative voting; and adopting anti-greenmail provisions.

Executive Compensation. In general, the SBI supports efforts to have boards of directors comprised of a majority of independent directors, to have compensation committees made up entirely of independent directors, and to have executive compensation linked to a company's long-term performance.

Buyout Proposals. In general, the SBI supports friendly takeovers and management buyouts.

Special Cases. The Proxy Committee evaluates hostile takeovers, contested election of directors, compensation agreements that are contingent upon corporate change in control, and recapitalization plans on a case-by-case basis. In addition, the Committee may review corporate governance issues affecting companies incorporated or headquartered in Minnesota on a case-by-case basis.

Social Responsibility Issues

The voting guidelines for major social responsibility issues are shown below:

Northern Ireland. The SBI supports resolutions that call for the adoption of the MacBride Principles as a means to encourage equal employment opportunities in Northern Ireland. The SBI also supports resolutions that request companies to submit reports to shareholders concerning their labor practices or their sub-contractors' labor practices in Northern Ireland.

Tobacco and Liquor. In general, the SBI supports a variety of tobacco and liquor related resolutions including those that call for corporations to limit their promotion of tobacco and liquor products and to report on their involvement in tobacco issues.

Environmental Protection. In general, the SBI supports resolutions that require a corporation to report or disclose to shareholders company efforts in the environmental arena. In addition, the SBI supports resolutions that request a corporation to report on progress toward achieving the objectives of the Ceres Principles (formerly known as the Valdez Principles), an environmental code of conduct for corporations.

Other Social Responsibility Issues. In general, the SBI supports proposals that require a company to report or disclose to shareholders company efforts concerning a variety of social responsibility issues. In the past, these reporting resolutions have included issues such as affirmative action programs, animal testing procedures, nuclear plant safety procedures and criteria used to evaluate military contract proposals.

Summary of FY 2000 Proposals

During fiscal year 2000, the SBI voted proxies for approximately 4,700 U.S. corporations and more than 1,200 international companies.

As in past years, the issues on corporate ballots included a broad range of proposals in the *corporate governance* area, as reflected in information provided by the Investor Responsibility Research Center (IRRC), Washington, D.C.:

- Shareholders submitted 21 proposals regarding the restriction of executive compensation which were supported by an average of 8.3% of the shares voted.
- Shareholders submitted 24 proposals to redeem "poison pills" (an anti-takeover device) or submit them to shareholder vote. This proposal received average support of 57.6%.
- Five (5) proposals were submitted concerning confidential voting. These proposals received average support of 45.5%.
- Other proposals included the repeal of classified boards which were supported by an average of 55.3% of shares voted; shareholder approval of severance packages to top executives ("golden parachutes") which received support from an average of 27.9% of shares voted; cumulative voting which was supported by an average of 26.8% of shares voted; requirements for the majority of directors to be independent received support from an average of 25.9% of shares voted; and the prohibition of the repricing of underwater stock options (lowering the price of stock options whose stock price had declined) received average support of 11.2%

In the *social responsibility* area, the environment, fair employment issuesboth domestic and international, and tobacco were the major issues, as reflected in information provided by the IRRC:

- Ceres Principles resolutions received 8 resolutions with average support of 10.0%.
- Energy related issues received 4 resolutions with an average support level of 7.3%.
- Equal employment issues
 received 11 resolutions with an average support of 8.3%.
- Resolutions on a variety of tobacco-related issues were on 12 ballots with an average support of 5.3%.
- Human rights issues received 2 resolutions with an average support level of 6.6%.
- Northern Ireland issues received
 5 proposals this year with an average support of 16.2%.

Domestic Equity Program Managers

Active

Alliance Capital Management Corporation

Alliance searches for companies likely to experience high rates of earnings growth on either a cyclical or secular basis. Alliance invests in a wide range of medium to large growth companies and the firm does not tend to concentrate on one particular type of growth company over another. However, the firm's decision-making process appears to be much more oriented toward macroeconomic considerations than is the case with most other growth managers. Accordingly, cyclical earnings prospects, rather than secular, appear to play a larger role in terms of stock selection. Alliance is not an active market timer, rarely raising cash above minimal levels. They manage a concentrated stock portfolio of about 40 companies. The firm was retained by the SBI in March 1983.

Brinson Partners, Inc.

Brinson Partners is a fundamental, long-term, value-oriented investor. They model a quantifiable and theoretically justifiable estimate of intrinsic value from an owner's perspective, and then compare that value estimate to the current stock price. These resulting price/value differences, applied over a broad range of companies, then become the building blocks of the security selection process. Portfolio construction focuses on market sensitivity, common factor exposures, industry weightings, and individual stock selection. Brinson was retained by the SBI in July 1993.

Cohen Klingenstein & Marks, Inc.

Cohen Klingenstein & Marks seeks to outperform the market by focusing on two variables: economic cycles and security valuation. Within economic cycles, they believe that stocks exhibit predictable patterns that reflect changing expectations on corporate profits and interest rates. Similarly, they believe that stock prices normally reflect earnings expectations. The firm exploits short run inefficiencies through an unbiased process that relates the price of a stock to consensus earnings expectations. The firm was retained by the SBI in April 1994.

Forstmann Leff Associates Asset Management, Inc.

Forstmann-Leff uses a combination top-down, bottom-up investment approach. The top-down is based on macroeconomic analysis, including the development of industry themes and sector emphasis. The highly structured and disciplined security selection strategy is based on proprietary fundamental research, including qualitative and quantitative techniques. Based upon its macroeconomic outlook, the firm tends to purchase liquid, medium to large capitalization stocks that will benefit the most during the current phase of the market cycle. During fiscal year 1997, Forstmann Leff was asked to begin weighting their top stock ideas more heavily. The firm was retained by the SBI in March 1983.

Franklin Portfolio Associates

Franklin's investment decisions are quantitatively driven and controlled. The firm believes that consistent application of integrated multiple valuation models produces superior investment results. The firm's stock selection model is a composite model comprised of 30 valuation

measures each of which falls into one of the following groups: fundamental momentum, relative value, future cash flow, and economic cycle analysis. Franklin manages the semi-passive portfolio utilizing a similar quantitative approach as in the active portfolio they managed for the SBI.

For the *active* product, Franklin's portfolio management process adds value by focusing on buying and selling the right stock rather than attempting to time the market or pick the right sector or industry groups. During fiscal year 1997, Franklin moved the active account to a more concentrated portfolio approach. The firm now limits its holdings in the SBI account to approximately 30 to 40 issues. Franklin was retained by the SBI as an active manager in April 1989.

GeoCapital, LLC

GeoCapital invests primarily in small capitalization equities with the intent to hold them as they grow into medium and large capitalization companies. The firm uses a theme approach and individual stock selection analysis to invest in the growth/technology and intrinsic value areas of the market. In the growth/technology area, GeoCapital looks for companies that will have above average growth due to strong product development and limited competition. In the intrinsic value area, the key factors are corporate assets, free cash flow, and an unrecognized catalyst that will cause a positive change in the company. The firm generally stays fully invested, with any cash positions due to the lack of attractive investment opportunities. GeoCapital was retained by the SBI in April 1990.

Lincoln Capital Management Company

Lincoln Capital concentrates on leading, medium to large capitalization companies that have strong demonstrated and projected growth. The firm uses traditional fundamental company analysis focusing on cash flow growth and capital productivity in its stock selection process. Companies held by Lincoln generally exhibit premium price/book ratios, high return on equity, and strong balance sheets, characteristics consistent with their large cap growth style. During fiscal year 1997, Lincoln moved the SBI account to a more concentrated approach holding approximately 30 issues. Lincoln was retained by the SBI in July 1993.

Oppenheimer Capital

Oppenheimer Capital's strategy is to buy companies that are selling at a price below their determination of the company's intrinsic value. Their process is bottom-up based on fundamental analysis. Factors they look for when evaluating companies include a strong industrial or commercial position, often where there are significant barriers to entry. They look for companies that are financially sound and have a management team that is devoted to the interest of shareholders. They believe that discretionary cash flow, cash that remains after a company spends what is needed to sustain its commercial position, is a primary determinant of a firm's potential to build value for shareholders. The firm was retained by the SBI in July 1993.

Semi-Passive

Barclays Global Investors

Barclays uses a Core Alpha Model which disaggregates individual

equity returns for each of the 3500 stocks in their universe into three inputs: fundamental, expectational, and technical. The fundamental inputs look at measures of underlying company value including earnings, book value, cash flow, and sales. These factors help identify securities that trade at prices below their true economic value. The expectational inputs incorporate future earnings and growth rate forecasts made by over 2500 security analysts. The technical inputs provide a measure of recent changes in company fundamentals, consensus expectations, and performance. Estimated alphas are used in a portfolio optimization algorithm to identify the optimal portfolio that maximizes the portfolio's alpha while maintaining a risk level specified by the client. The firm was retained by the SBI for semi-passive management in January 1995.

Franklin Portfolio Associates

For the semi-passive product, Franklin adds incremental value to a benchmark by buying stocks ranked the highest and selling stocks ranked the lowest, while maintaining the portfolio's systematic risk and industry weightings at levels similar to the benchmark. Franklin attempts to allocate 75% or more of the total risk level set by the client to specific stock selection and the rest to systematic and industry risk. The firm always remains fully invested. The SBI retained Franklin as a semi-passive manager in January 1995.

J.P. Morgan Investment Management Inc.

J.P. Morgan manages a semi-passive portfolio for the SBI and believes that superior stock selection is necessary to achieve excellent investment results. To accomplish this objective, they use fundamental

research and a systematic valuation model. Analysts forecast earnings and dividends for the 650 stock universe and enter these into a stock valuation model that calculates an expected return for each security. The stocks are ranked according to their expected return within their economic sector. Stocks most undervalued are placed in the first quintile. The portfolio includes stocks from the first four quintiles, favoring the highest ranking stocks whenever possible, and sells those in the fifth quintile. In addition, the portfolio will closely approximate the sectors and style of the benchmark. The firm remains fully invested at all times. The firm was retained by the SBI in January 1995.

Passive

Barclays Global Investors

For the passive account, Barclays seeks to minimize tracking error subject to trading costs, and controls overall investment and operational risks. Their strategy is to invest across the broad market while excluding smaller, illiquid securities from the investment universe. An optimized approach is taken to security selection. Optimization effectively trades off expected tracking error with cost of trading to determine which trades should be executed. Barclays was retained by the SBI for passive management in July 1995.

Emerging Equity

CIC Asset Management, Inc.

CIC Asset Management uses a disciplined relative value approach to managing equities. The firm believes that purchasing companies at attractive prices provides superior long-term performance with lower volatility. This investment process is designed for clients who desire

equity market exposure with both incremental value added and downside protection due to reasonable dividend yields, moderate price to book values and low normalized price to earning ratios. Finally, the process provides a synergy between quantitative valuation techniques and "Graham & Dodd" fundamental analyses. CIC was retained by the SBI in April 1994.

New Amsterdam Partners L.L.C.

New Amsterdam Partners believe that investment results are evaluated by actual return, and therefore, investment opportunities should be evaluated by expected return. They believe that all valid techniques depend on forecasts of the amounts and timing of future cash flows. Thus, the firm focuses on forecasted earnings growth, yield, price-tobook ratio, and forecasted return on equity. They believe that the disciplined application of their valuation techniques in conjunction with sound financial analysis of companies, is the key to understanding and maximizing investment returns. New Amsterdam was retained by the SBI in April 1994.

Valenzuela Capital Partners, Inc.

Valenzuela Capital Partners believes that stock selection and adherence to valuation analysis are the backbone of superior performance. Their investment philosophy is mid-cap value oriented. The firm seeks companies with attractive valuations which are experiencing or beginning to experience positive changes in revenues, positive changes in gross or operating margins, and/or positive changes in financial structure. The firm believes that below market valuations provide downside protection during weak market periods. In strong markets

the portfolios will be driven by both improving earnings and multiple expansion. Valenzuela was retained by the SBI in April 1994.

Winslow Capital Management, Inc.

Winslow Capital is a fundamental, "bottom-up" investment firm with all portfolio managers acting as research analysts. They believe investing in companies that exhibit rapid, sustainable growth provides the best opportunity for achieving superior portfolio returns over the long term. The objective is to achieve a weighted average annual earnings growth rate in excess of 25%, over a 2-3 year time horizon. These companies tend to have strong balance sheets, large addressable markets, sustainable business drivers, strong management, rising margins and first mover or other market advantage. This persistency of growth is directly reflected in an attractive risk/return profile. Hands-on research includes frequent, direct communication with senior management of portfolio holdings. The research process allows implementation of their investment philosophy in all market environments and delivers superior returns with a low relative level of volatility. Winslow Capital was retained by the SBI in April 1994 to manage a large cap portfolio. This mandate has been changed to a small cap focus, effective July 2000.

Zevenbergen Capital, Inc.

Zevenbergen Capital's investment philosophy is founded on the principles that superior fundamentals drive stock price appreciation and exceptional management combined with balance sheet strength provides capital protection. The firm employs a forward looking, bottom-up investment process designed for long-term results. Portfolios are

constructed with companies presenting established and prospective revenue, cash flow and earnings growth, while diversification and risk control is accomplished through a blend of company size, expected growth rates and appropriate portfolio weightings. ZCI remains fully invested to ensure market participation. Zevenbergen was retained by the SBI in April 1994.

Portfolio statistics for each of the domestic equity managers can be found in the Statistical Data section of this report.

International Program Managers

Active Developed

American Express Asset Management

American Express Asset Management's (AEAM) objective is to identify inefficiencies in market value at the regional, country and stock level. Their investment process concentrates on identifying non-consensus market views leading to investment opportunities that they can exploit. AEAM's core international equity approach is a blend of top-down and bottom-up styles with an emphasis on large cap growth stocks. They start the decision-making process with the development of their geopolitical and macroeconomic outlook. The top-down process results in regional and country allocations. The bottom-up stage of their process begins with real-time relative valuation comparisons of the stocks in their investable universe. The most attractively priced stocks then go through in-depth fundamental analysis. American Express was retained by the SBI in February 2000.

Blairlogie Capital Management Blairlogie has developed a model that ranks countries based on a collection of current and historical data. Their quantitative analysis is enhanced with significant qualitative assessments to evaluate things a model cannot review. They continuously strive for the optimum combination of quantitative inputs and those based on the portfolio managers' judgment, but believe that objective, measurable facts must always be the starting point for making sound investment decisions. Blairlogie's approach is primarily top-down, but also incorporates bottom-up stock selection. Their process is based on an underlying objective of producing premium returns consistently above their benchmark in any market environment, while carefully controlling risk and limiting volatility. Blairlogie's portfolio is broadly diversified in international markets, in terms of both country

and stock selection. Blairlogie was

retained by the SBI in February

Brinson Partners, Inc.

2000.

Brinson is a fundamental, long-term, value-oriented investor. The focus of Brinson's fully active strategy is to pick the most attractive stocks, industries and countries. Their investment research process identifies discrepancies between a security's fundamental value and its observed market price - both across and within global equity markets. They exploit these discrepancies using a disciplined fundamental approach. Their research teams evaluate companies in their markets around the world and assign relative price/value rankings based on the present value of each company's expected future cash flows. The portfolio construction group utilizes this global network of resources to systematically develop portfolio

strategy. Currency strategies are developed separately and coordinated with country allocations. Brinson was retained by the SBI in April 1993 with an active country/passive stock mandate. In October of 1999, Brinson converted the portfolio to a fully active mandate.

INVESCO Global Asset Management

INVESCO managers believe they can add value by identifying and investing in companies whose share price does not reflect the sustainable growth potential of the company's earnings and assets. They also believe that a systematic process that identifies mis-valued companies, combined with a consistently applied portfolio design process can control the predictability and consistency of returns. Portfolios are constructed on a bottom-up basis. They select individual companies rather than countries, themes, or industry groups. This is the first of four cornerstones of their investment approach. Secondly, they conduct financial analysis on a broad universe of non-U.S. companies, with key financial data adjusted to be comparable across countries and currencies. Third, Invesco believes that using local investment professionals enhances fundamental company research. Finally, they manage risk and ensure broad diversification relative to the clients' benchmarks utilizing a statistics-based portfolio construction approach instead of utilizing country or industry constraints. INVESCO was retained by the SBI in February 2000.

Marathon Asset Management Ltd.

Marathon uses a blend of flexible, qualitative disciplines to construct portfolios which exhibit a value bias. Style and emphasis will vary over time and by market, depending on Marathon's perception of what represents the lowest risk opportunity. Since the firm believes that competition determines profitability, Marathon is attracted to industries where the level of competition is declining, and the firm will hold a sector position as long as the level of competition does not increase. At the stock level, Marathon tracks a company's competitive position relative to the attractiveness of their products or services and determines whether the company is following an appropriate reinvestment strategy for their current competitive position. Marathon was retained by the SBI in November 1993.

Montgomery Asset Management, LLC

For the developed markets account, Montgomery's international equity investing combines thorough sector and country research with a disciplined bottom-up stock selection process to identify securities with long-term projected earnings growth, attractive valuation versus applicable peers, positive business momentum and the potential to achieve minimum required returns. Montgomery believes that a consistent process, centered on accountability, sector specialization and primary, original research provides a sustainable edge in international equity investing. The SBI retained Montgomery for developed market management in February 2000.

T. Rowe Price International, Inc.

The T. Rowe Price investment approach links a broad macroeconomic framework with an

awareness of the attractiveness of individual stock opportunities within each market and sector. Stocks are selected using fundamental analysis that emphasizes growth at a reasonable price. The aim is to identify companies whose prospects are attractive on a two-year investment horizon and whose fundamental earnings growth will be above average within its industry or geographic region. Within this framework, a regional oriented team coupled with an international, sectorally oriented team will be responsible for investment decisions. Several quantitative tools are used to evaluate a security's prospects, however, it is ultimately the managers' seasoned judgment that will cause a stock to be introduced, held, or excluded from portfolios. Country and industry weightings result directly from stock selection. T. Rowe Price was retained by the SBI in November 1993.

Scudder Kemper Investments, Inc.

Scudder believes that successful international investing requires knowledge of each country's economy, political environment and financial market obtained through continuous and thorough research of individual markets and securities. The investment process focuses on three areas: country analysis, global themes and unique situations. Ideas from all three areas are integrated into Scudder's research universe. Using their own internal research, the firm seeks companies with potential for earnings and dividend growth, strong or improving balance sheets, superior management, conservative accounting practices and a dominant position in growing industries. Scudder was retained by the SBI in November 1993.

Passive

State Street Global Advisors

State Street manages an international index portfolio designed to track the Morgan Stanley Capital International Index of Europe, Australia and the Far East (EAFE Free). State Street uses a full replication strategy wherever possible to construct index modules on a country by country basis. These modules are then combined to form a portfolio which will track the entire index. State Street was retained by the SBI in October 1992.

Emerging Markets

City of London Investment Management Company Ltd.

City of London is an emerging markets specialist. The firm invests in closed-end country and regional funds to enhance performance and to ensure broad diversification within markets. They perform two levels of analysis: The first level involves compiling macro-economic data for each country in their universe, countries are then ranked nominally according to the relative strength of their fundamentals and the expected upward potential of their stock markets; the second level involves research on closed-end country and regional funds, with analysis of corporate activity, liquidation dates, liquidity and discounts to NAV. They also analyze the quality and expertise of the closed-end fund managers. Countries are then re-ranked according to the relative pricing and discounts to NAV of country specific funds. City of London was retained by the SBI in May 1996.

Genesis Asset Managers International Ltd.

Genesis is an emerging markets specialist. Genesis believes that the critical factor for successful investment performance in emerging markets is stock selection. They also believe that structural changes in emerging markets will continue to create both winners and losers in the corporate sector. Finally, they believe that following index stocks will not necessarily expose an investor to the highest returns since those stocks are typically concentrated in large capitalization companies that have already attained a certain level of recognition. Genesis identifies those countries in which structural change will most likely generate growth opportunities for business and/or where the environment is supportive of a flourishing private sector. Stock selection is based on Genesis' estimate of the value of the company's future real earnings stream over five years relative to its current price. The portfolio consists of the most undervalued stocks across all markets with emphasis on growth with value. The SBI retained Genesis in May 1996.

Montgomery Asset Management, LLC

Montgomery combines quantitative investment techniques and fundamental stock selection to take advantage of market inefficiencies and low correlations within the emerging markets. Their top-down analysis begins with a quantitative approach which evaluates historical volatility and correlations between markets. Their model identifies attractive countries which are then qualitatively analyzed for "event risk" which the model cannot take into account. Fundamental analysis is used to evaluate the financial condition, quality of management, and competitive position of each stock. Stocks will come from two

tiers: Tier 1 will be comprised of 60-100 blue chip stocks; Tier 2 will be comprised of 100-150 smaller cap stocks with substantial growth potential. Characteristics of selected stocks may include low PE's relative to internal growth rates, above average earnings growth potential, and undervalued or hidden assets. The firm was retained by the SBI for emerging market management in May 1996.

Currency

Record Treasury had managed a currency overlay program for the SBI. In its approach, Record Treasury avoids all forms of

Record Treasury Management Ltd.

Treasury avoids all forms of forecasting. Rather, the firm employs a systematic model which uses a form of dynamic hedging. The firm creates a portfolio of synthetic currency options using forward contracts. Like traditional options, Record Treasury's "inhouse options" allow the client to participate in gains associated with foreign currency depreciation. As with all dynamic hedging programs, Record Treasury will tend to sell foreign currency as it weakens and buy as it strengthens. The SBI

retained Record Treasury in

Investment voted to terminate

Record Treasury. All hedged

currencies were unhedged on

8, 1999 meeting, the State Board of

Treasury will remain under contract

until all forward contracts expire in

Portfolio statistics for each of the international managers can be found in the Statistical Data

Fixed Income Program Managers

Active

American Express Asset Management Group Inc.

American Express manages portfolios using a top-down approach ending with in-depth fundamental analysis. The firm actively manages five components of the portfolio: duration, maturity structure, sector selection, industry emphasis, and security selection. The duration and maturity structure of the portfolio are determined by the firm's economic analysis and interest rate outlook. This analysis will also identify the sectors and industry groups the firm expects to produce the best rates of return on a risk adjusted basis. American Express employs in-depth fundamental research and credit analysis combined with proprietary valuation disciplines to reconfirm industry groups and identify individual securities that will achieve superior rates of return. American Express was retained by the SBI in July 1993.

Deutsche Asset Management, Inc.

Deustche believes there are significant pricing inefficiencies inherent in bond markets and that diligent credit analysis, security structure evaluation, and relative value assessment can be used to exploit these inefficiencies. The firm avoids interest rate forecasting and sector rotation because they believe these strategies will not deliver consistent out performance versus the benchmark over time. The firm's valued added is derived primarily from individual security selection. Portfolio managers and analysts research bonds within their sector of expertise and construct portfolios from the bottom-up, bond by bond. Sector weightings are a

byproduct of the bottom-up security selection. Deutsche was retained by the SBI in February 2000.

Dodge & Cox Investment Managers

Dodge & Cox manages a high quality, diversified portfolio of securities that are selected through fundamental analysis. The firm believes that by combining fundamental research with a longterm investment horizon it is possible to uncover inefficiencies in the valuation of market sectors and individual securities. When this fundamental research effort is combined with a disciplined program of risk analysis, attractive returns are possible over the longterm. To seek superior returns, Dodge & Cox emphasizes sector and security selection, strives to build portfolios that have a higher yield than the broad bond market, and analyzes portfolio and individual security risk. Dodge & Cox was retained by the SBI in February 2000.

Metropolitan West Asset Management, LLC

Metropolitan West manages portfolios with the goal of consistently out performing the benchmark while maintaining below average volatility. Metropolitan West believes consistent out performance is gained through the measured application of five valueadded strategies: 1) limited duration shifts; 2) yield curve management; 3) security selection; 4) buy/sell execution strategies; and 5) sector rotation. The team formulates fixed income strategies based on their long-term fundamental economic outlook. This outlook is debated quarterly and revised based on cyclical and secular developments in the economy and financial markets. From this review, major themes are identified that they believe will be key in driving the economy and

Federal Reserve policy. Metropolitan West was retained by the SBI in February 2000.

Morgan Stanley Dean Witter

Morgan Stanley (formerly Miller Anderson & Sherrerd) focuses on four key decisions in structuring portfolios: interest-rate sensitivity, yield-curve exposure, portfolio credit quality, and portfolio prepayment risk. The firm is a value investor, purchasing securities they believe are relatively cheap and holding them until relative values change or until other securities are identified which are better values than those in the portfolio. Morgan Stanley is a long-term investor and is willing to purchase a portfolio that represents the best values in the market, even if the market does not recognize that value in the near future. In developing their interestrate strategy the firm relies primarily on value-based criteria to determine when markets are offering generous compensation for bearing interestrate risk, rather than trying to anticipate interest rates. Value is added in the corporate sector by selecting the cheapest corporate bonds and controlling credit risk through broad diversification and strict position limits. Mortgage securities are often used to replace U.S. Treasuries in portfolios and the firm has significant expertise in managing the prepayment risks of mortgages. Morgan Stanley was retained by the SBI in July 1984.

Standish, Ayer & Wood, Inc.

Standish seeks to add moderate but consistent value to a diverse bond portfolio primarily by uncovering undervalued, overlooked or misunderstood securities, and to a secondary degree through sector rotation while keeping the overall risk level of the portfolio comparatively low. Intensive research and credit analysis are the

driving forces in finding undervalued issues in the corporate, mortgage, and other less efficient sectors of the bond market. U.S. Treasury and agency issue holdings are minimized except during flights to quality, but provide balance to portfolio quality, maturity distribution, and liquidity. A conservative approach to interest rate anticipation is employed, therefore, portfolio risk is derived not so much from interest rate volatility as from the liquidity and credit risk of non-Treasury holdings, where the offset is higher yields and potential for appreciation. Standish was retained by the SBI in July 1993.

Western Asset Management Company

Western emphasizes the use of multiple strategies and active sector and issue selection, while constraining overall interest rate risk relative to the benchmark. Multiple strategies are proportioned so that results do not depend on one or two opportunities, and no single adverse market event would have an overwhelming effect. This approach adds consistent value over time and can reduce volatility. Long term value investing is Western Asset's fundamental approach. In making their sector decision, the firm seeks out the greatest long-term value by analyzing all fixed income market sectors and their economic expectations. Individual issues are identified based on relative credit strength, liquidity, issue structure, event risk, covenant protection, and market valuation. Western believes that successful interest rate forecasting is extremely difficult to accomplish consistently and consequently keeps portfolio duration within a narrow band around the benchmark. Western was retained by the SBI in July 1984.

Semi-Passive

BlackRock Financial Management

BlackRock manages a semi-passive index portfolio that closely tracks the Lehman Aggregate. BlackRock's strategy is a controlled-duration, sector rotation style, which can be described as active management with tighter duration, sector, and quality constraints. BlackRock seeks to add value through: 1) controlling portfolio duration within a narrow band relative to the benchmark, 2) relative value sector/sub-sector rotation and security selection, 3) rigorous quantitative analysis to the valuation of each security and of the portfolio as a whole, 4) intense credit analysis and review, and 5) the judgment of experienced portfolio managers. Advanced risk analytics measure the potential impact of various sector and security strategies to ensure consistent value added and controlled volatility. BlackRock was retained by the SBI in April 1996.

Goldman Sachs Asset Management

Goldman manages a semi-passive portfolio that closely tracks the Lehman Aggregate. Goldman manages the portfolio within a very risk-controlled framework. The firm relies primarily on sector allocation and security selection strategies to generate incremental return relative to the benchmark. To a lesser degree, term structure and very controlled interest rate anticipation strategies are also implemented. Portfolios are diversified among various sectors and individual securities. Goldman combines long-term strategic investment tilts with short-term tactical trading opportunities. Strategic tilts are based on fundamental and quantitative sector research and seek to optimize the long-term risk/return profile of portfolios. Tactical trades between

sectors and securities within sectors are implemented to take advantage of short-term market anomalies. Goldman was retained by the SBI in July 1993.

Lincoln Capital Management Company

Lincoln manages a semi-passive portfolio that closely tracks the Lehman Aggregate. Lincoln's process relies on a combination of quantitative tools and active management judgment. Explicit quantification and control of risks are at the heart of their investment process. Lincoln uses proprietary risk exposure analysis to analyze 25 interest rate factors, and over 30 spread-related factors, including those relating to credit quality, sector classification and sub-sector representations. Lincoln analyzes every bond in the index for all relevant factors, and capitalization weights the results to calculate index level risk exposures. For each interest rate factor, the portfolio is very closely matched to the index to ensure that the portfolio earns the same return as the index for any change in interest rates. For each spread factor, the portfolio can deviate slightly from the index as a means of seeking value-added. Setting active risk exposures that must fall within pre-established limits controls risk. To control credit risk, corporate holdings are diversified across a large number of issues. Lincoln was retained by the SBI in July 1988.

Portfolio statistics for each of the bond managers can be found in the Statistical Data section of this report.

Alternative Investment Managers

Basic Retirement Funds

Real Estate

Aetna Life Insurance Company Fund: RESA

Real Estate Separate Account (RESA) is an open-end commingled real estate fund managed by the Aetna Life Insurance Company. The fund was formed in 1978 and the SBI's commitment was made in 1982. The fund has no termination date; investors have the option to withdraw all or a portion of their investments. RESA invests primarily in existing equity real estate. Investments are diversified by location and type of property. On-site management of properties is contracted to outside firms or conducted by a joint venture partner.

Colony Advisors

Funds: Colony Investors II, L.P. Colony Investors III, L.P.

Colony Investors II and III are closed-end commingled real estate funds managed by Colony Capital Inc. of Los Angeles, CA. The funds' strategy is to invest in undervalued equity and debt real estate-related assets. The SBI committed to Fund II in 1994 and Fund III in 1998. Fund II is expected to terminate in 2003 and Fund III in 2008.

Equity Office Properties Trust Fund: Equity Office Properties Trust (EOP)

Equity Office Properties Trust (EOP), based in Chicago, is the successor entity to three Zell/Merrill Lynch Real Estate funds in which the SBI had prior investments. In 1997, the Zell/Merrill Lynch Real Estate funds were combined into a single

publicly traded entity and the SBI received shares in EOP. Like the original Zell/Merrill Lynch Real Estate funds, EOP focuses primarily on office property real estate investments located throughout the U.S. As a publicly-traded company, EOP has an indefinite life.

First Asset Realty

Fund: First Asset Realty Fund
First Asset Realty Fund (FAREEF),
was created by First Bank in 1981
as an open-end real estate fund and
in 1990 adopted a closed-end
format. The fund is currently in
liquidation and property sale
proceeds are being distributed to
unit holders. The SBI received this
investment through Police and Fire
Fund consolidations.

Heitman Advisory Corp. (HAC)
Funds: HAC Group Trust I
HAC Group Trust II
HAC Group Trust III
HAC Group Trust V

HAC Group Trusts are closed-end commingled funds managed by the Heitman Advisory Group. The majority of the trust investments are equity real estate. The real estate portfolios are diversified by the type and location of the properties. Heitman manages the trusts' whollyowned properties. Heitman Advisory is based in Chicago. The SBI committed to the Group Trusts in 1984, 1985, 1987 and 1991. All funds are in the process of liquidating their holdings.

LaSalle Advisors Fund: LaSalle Income Parking Fund

The Income Parking Fund is a closed-end commingled fund managed by LaSalle Advisors of Chicago, Illinois. The fund's main strategy is to acquire unleveraged parking facilities to maximize current return to the investors. The

SBI committed to the Fund in 1991. The fund is expected to terminate in 2005.

Lend Lease Real Estate Group Fund: Prime Property Fund Prime Property Fund was formed in 1973 by the New York-based Lend Lease Real Estate Group, Inc. (formerly, the Equitable Real Estate Group). The account is an open-end commingled real estate fund and the SBI's commitment was made in 1981. The fund has no termination date and investors retain the option to withdraw all or a portion of their investment. The fund makes equity investments in existing real estate and is diversified by location and property type. Management of the fund's properties is contracted to outside firms or is conducted by joint venture partners.

Rosenberg Real Estate Equity Funds (RREEF)

RREEF USA III Fund: RREEF USA III is a closed-end commingled fund managed by the Rosenberg Real Estate Equity Funds. Typically, the trust purchases 100% of the equity of its properties with cash. The trust generally does not utilize leverage or participating mortgages. Properties are diversified by location and type. RREEF's inhouse staff manages the trust's real estate properties. The firm's primary office is located in San Francisco. The SBI committed to the fund in May 1984. The Fund has reached the end of its investment term and is liquidating its property holdings.

Merit Energy Partners B, C and D were formed in 1996, 1998 and 2000, respectively, and each fund has an eight year initial term. Based in Dallas, TX, the funds will focus on resource investments in producing oil and gas properties.

Assigned Risk Plan Managers

GE Asset Management

GE Asset Management manages a semi-passive stock portfolio for the Assigned Risk Plan. They believe that style leadership cannot be predicted in the equity market and can overwhelm stock selection in the short-term. Their strategy is to neutralize the style bet and focus on fundamental, bottom-up stock selection to add value. This is accomplished by combining the expertise of three portfolio managers, each with different styles ranging from value to growth, supported by a staff of nine industry analysts. Each analyst is responsible for one or more

industries and together provide analytical coverage across the full spectrum of industries. The three portfolios are combined to create a well-diversified portfolio while maintaining a style-neutral position between value and growth. GE Asset Management was retained by the SBI in January 1995.

Vogageur Asset Management

Voyageur manages the fixed income portfolio for the Assigned Risk Plan. The main objective for the portfolio is to provide cash for the payment of workers compensation claims on the required dates. Because of the uncertainty of premium and liability cash flows, the fund is invested conservatively. Voyageur uses a top-down approach to bond selection. They focus on sector analysis and security selection. Yield curve and duration analysis are secondary considerations. Voyageur has managed the bond portfolio since 1991.

> Stable Value Manager

Galliard Capital Management, Inc.

Galliard Capital Management manages the Fixed Interest Account in the Supplemental Investment Fund. The stable value fund is managed to protect principal and provide competitive interest rates using instruments somewhat longer than typically found in money market-type accounts. The manager invests cash flows to optimize yields. The manager invests in high quality instruments diversified among traditional guaranteed investment contracts (GIC's) and alternative investment contracts with U.S. and non-U.S. financial institutions. To maintain necessary liquidity, the manager invests a portion of the portfolio in its Stable

Return Fund and in cash equivalents. The Stable Return Fund is a large, daily priced fund consisting of a wide range of stable value instruments that is available to retirement plans of all sizes. The firm was retained by the SBI in November 1994.

Stock Manager Risk Factor Exposure Glossary

The following definitions describe the risk factors that the State Board of Investment (SBI) uses in monitoring its stock managers. The terms are referred to in the Risk Factor Exposure table that follows this glossary.

SBI analysis of a stock manager's portfolio, in part, utilizes the BARRA E3 model. The BARRA model contains a number of risk factors that the SBI has found to correlate highly with a manager's investment style. That is, a manager tends to exhibit consistent exposures to many of these risk factors over time. The benchmark construction process includes identifying these persistent exposures and capturing them in the benchmark portfolio.

Factor exposures are calibrated relative to an estimation universe of the top 1,500 stocks ranked by capitalization plus smaller companies chosen to ensure a reasonable number of companies in each industry. An exposure level of 0 for a particular stock to a particular factor indicates that the stock has the same exposure as the capitalization-weighted average of the stocks in the estimation universe. Around that zero exposure, deviations are measured in standard deviation units. Thus, an exposure level of +1 indicates that the stock has a greater exposure to the factor than roughly 68% of the stocks in the estimation universe.

Beta

Forecasts the sensitivity of a stock's return to the return on the market portfolio. The BARRA E3 beta is a forecasted beta, based on a company's exposure to a number of common risk factors and industries.

Volatility (VIty.)

Captures relative volatility using measures of both longterm historical volatility and near-term volatility. Other proxies for volatility, corrections for thin trading and changes in volatility are also included in this descriptor.

Momentum (Mom.)

Indicates common variation in returns related to recent stock price behavior. Stocks that had positive excess returns in the recent past are grouped separately from those that displayed negative excess returns.

Size

Measures differences in stock returns due to differences in the market capitalization of companies.

Size Nonlinearity (Size Non.)

Describes deviations from linearity in the relationship between returns and a measure of market capitalization.

Trading Activity (Trad. Acvty.)

Measures the amount of relative trading in each stock. Stocks that are highly traded are likely to be those with greater institutional interest. Such stocks may display different returns behavior compared with those that are not widely held by institutions.

Growth

Uses historical growth and profitability measures to predict future earnings growth.

Earnings Yield (E/Y)

Combines current and historical earnings-to-price ratios with a measure of analyst-predicted earnings-to-price. Stocks with similar values of earnings yield behave in a similar fashion with respect to their returns.

Value

Distinguishes between value stocks and growth stocks using the ratio of book value of equity to market capitalization.

Earnings Variability (Earn. Var.)

Measures the variability in earnings and cash flows using both historical measures and analyst predictions.

Leverage (Lev.)

Indicates the financial leverage of a company using debt-tototal assets and other measures.

Current Sensitivity (Curr. Sens.)

Measures the sensitivity of a company's stock return to the return on a basket of foreign currencies.

Dividend Yield (Div. Yld.)

Predicts dividend yield using the past history of dividends and the market price behavior of the stock.

Average Turnover (Ave T/O)

Measures the total equity asset sales dividend by the average value of the equity assets in the manager's portfolio.

Equity Allocation (Eqty. Alloc.)

Measures the percent of the manager's total portfolio invested in common stocks, preferred stocks and convertible securities.

Bond Manager Portfolio Characteristics Glossary

The bond manager portfolio statistics glossary is designed to define terminology the State Board of Investment uses in evaluating a bond manager's investment philosophy, risk characteristics and performance data. The definitions refer to categories shown in the Portfolio Characteristics table that follows this glossary.

Number of Issues (# of Issues)

The number of different bond issues held in the manager's portfolio.

Average Quality Weightings (Avg. Qual.)

The average rating given the portfolio's securities by Moody's Corp. A security's rating indicates the financial strength of its issuer and other factors related to the likelihood of full and timely payment of interest and principal.

Coupon

The annual interest payment received on the manager's total portfolio stated as a percent of the portfolio's face value.

Yield to Maturity (Yield to Mat.)

The compounded annualized return that the manager's total portfolio would produce if it were held to maturity and all cash flows were reinvested at an interest rate equal to the yield to maturity.

Duration

A measure of the average life of the total portfolio. Duration is a weighted average maturity where the time in the future that each cash flow is received is weighted by the proportion that the present value of the cash flow contributes to the total present value (or price) of the total portfolio.

Term to maturity (Term. to Mat.)

A measure of the average life of the total portfolio. Term to maturity is the number of years remaining until the average bond in the portfolio makes its final cash payment.

Note: All attribution numbers are based on gross returns, not net returns as found in the 'front part of the report'.

Definitions:

Local Returns - The return in local currency for each country in the portfolio relative to the benchmark.

Country Selection - The portion of return that can be attributed to over/underweighting countries relative to the benchmark. Country selection will be positive if the manager has overweighted countries that performed well and underweighted countries that did not perform well.

Stock Selection - The portion of return that can be attributed to the selection of securities within a country relative to the benchmark. Stock selection will be positive if a portfolio's local country return is greater than the benchmark.

Currency Returns - The relative difference between the base currency return and the local currency return.

Currency Effect - The difference between the currency effect of a manager's unhedged portfolio and the benchmark that is caused by the timing of purchases and sales of securities and spots to cover them.

Hedging Effect - The difference between the currency return of the manager's hedged portfolio and the currency return of the unhedged portfolio.

Base Return - The return after conversion from local currencies to U.S. dollars.

Total Value Added - The difference between the portfolio's base return and the benchmark's base return.

Time-Weighted Rate of Return

In measuring the performance of a manager or fund whose investment objective is to maximize the total value of an investment portfolio, the proper measuring tool is the time-weighted total rate of return. This performance measure includes the effect of income earned as well as realized and unrealized portfolio market value changes. In addition, the time-weighted total rate of return nets out the influence of contributions made to and distributions taken from the manager or fund. These are variables over which the manager or fund generally has no control.

The calculation of a portfolio's true time-weighted return requires that the portfolio be valued every time that there is a capital flow in or out. Because most portfolios are not valued that frequently, it is usually necessary to estimate the time-weighted total rates of return by approximating the required valuations.

In 1968, the Bank Administration Institute (BAI) commissioned a study, conducted by the University of Chicago, which considered desirable methods of estimating time-weighted returns. The BAI report is considered to be the definitive work in the field of performance measurement because of the academic reputations and thorough scientific efforts of its authors.

When monthly data are available, the BAI study recommends employing a technique called the linked internal rate of return (LIRR). State Street Bank, the SBI's performance measurement consultant, calculates the LIRR by solving the following equation for R:

VB *
$$(1 + R) + \sum_{i=1}^{n} C_{i} * (1 + R)^{t_{i}} = VE$$

Where:

VB = Value of the fund at the beginning of the month

VE = Value of the fund at the end of the month

 C_i = Net cash flow on the ith day of the month

n = Number of cash flows in the month

R = Internal rate of return

ti = Time from cash flow i to the end of the period, expressed as a percentage of the total number of days in the month The internal rate of return, R, is a proxy for the true time-weighted return over the month. It approximates the interim valuations by assuming a uniform growth of the invested assets throughout the period.

The IRR's calculated for each month can be linked together to estimate the time-weighted return for a longer period. For example, given three consecutive monthly IRR's (R1, R2, and R3), the quarterly time-weighted return (TWRQ) is:

$$TWRQ = (1 + R1)*(1 + R2)*(1 + R3) - 1$$

State Street's performance methodology is also in compliance with the mandatory requirements of the Association for Investment Management and Research (AIMR).

Independent Auditor's Report

Members of the State Board of Investment and Howard J. Bicker, Executive Director

We have audited the accompanying financial statements of the State of Minnesota's Supplemental Investment Fund and the Post Retirement Investment Fund as of and for the year ended June 30, 2000, as shown on pages 104 to 109. These financial statements are the responsibility of the State Board of Investment's management. Our responsibility is to express an opinion on these financial statements based on our audit.

The financial statements present only the Supplemental Investment Fund and the Post Retirement Investment Fund of the State of Minnesota and are not intended to present fairly the financial position and results of operation of the State Board of Investment or the State of Minnesota in conformity with generally accepted accounting principles.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements of the Supplemental Investment Fund and the Post Retirement Investment Fund referred to above present fairly, in all material respects, the net assets as of June 30, 2000, and the changes in net assets and results of operations for the year then ended, in conformity with generally accepted accounting principles.

Our audit was made for the purpose of forming an opinion on the financial statements taken as a whole. The supporting schedules on pages 111-154 are presented for the purpose of additional analysis and are not a required part of the financial statements of the Supplemental Investment and Post Retirement Funds of the State of Minnesota. Such information has been subject to the auditing procedures applied in the audit of the financial statements, and in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

Members of the State Board of Investment and Howard J. Bicker, Executive Director Page 2

In accordance with *Government Auditing Standards*, we have also issued our report dated December 1, 2000, on our consideration of the Minnesota State Board of Investment's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, and contracts. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Claudia J Gudvangen, CPA

Deputy Legislative Auditor

James R. Nobles
Legislative Auditor

NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2000

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

<u>Financial Reporting Entity and Basis of Presentation:</u> This report includes financial statements for the Supplemental Investment, and Post Retirement Trust Funds of the State of Minnesota, which are administered by the State Board of Investment under authority of *Minnesota Statutes* Chapter 11A.

The financial statements presented for these funds are based on the preferred accounting practices described in the American Institute of Certified Public Accountants audit guide, "Audits of Investment Companies". These practices, and the significant accounting policies which follow, conform with generally accepted accounting principles.

Authorized Investments: Minnesota Statutes, Section 11A.24 broadly restricts investments to obligations and stocks of the U.S. and Canadian governments, their agencies and their registered corporations; short term obligations of specified high quality; international securities; restricted participation as a limited partner in venture capital, real estate or resource equity investments; and restricted participation in registered mutual funds.

Risk Categories: At June 30, 2000, all investments of the Investment Trust Funds and pooled investment accounts are in risk category 1, and are insured or registered, or are held by the state or its agent in the state's name. In addition, all security lending transactions are collateralized by at least 100% of the value of loaned securities. A State Board of Investment policy, which limits transactions to those with primary government securities dealers whose net excess capital is greater than \$200,000,000 reduces the state's investment risk for repurchase agreements.

Security Valuation: All securities are valued at market except for U.S. Government short-term securities and commercial paper, which are valued at market less accrued interest. Accrued short-term interest is recognized as income as part of "Short-Term Gain". For long-term fixed income securities the SBI uses the Merrill Lynch valuation system. This pricing service is capable of providing prices for both actively traded and privately placed bonds. For equity securities the State Board uses a valuation service provided by Financial Control Systems, Inc. The basis for determining the fair value of investments that are not based on market quotations includes audited financial statements, analysis of future cash flows, and independent appraisals.

Recognition of Security Transactions: Security transactions are accounted for on the date the securities are purchased or sold.

<u>Income Recognition:</u> Dividend income is recorded on the ex-dividend date. Interest and dividend income are accrued monthly. Short-term interest is accrued monthly and is presented as "Accrued Short-Term Gain".

Amortization of Fixed Income Securities: Premiums and discounts on fixed income purchases are amortized over the remaining life of the security using the "Effective Interest Method".

Loaning Securities: State Statutes do not prohibit the SBI from participating in security lending. As such, domestic and international corporate securities as well as certain US Government and Government Agency securities are loaned out by the State Board to banks and brokers for additional income. Collateral in the amount of 100% of the market value of the security loaned is required. The collateral held and the market value of securities on loan for the State Board as of June 30, 2000 were \$4,300,579,660 and \$4,185,766,597 respectively.

The SBI utilizes State Street Bank (SSB) to manage its Securities Lending program. SSB provides the SBI indemnification in the event a borrower defaults by failing to return a loaned security.

2. PORTFOLIO LISTING

Asset listings summarizing the securities held by these funds can be found starting on page 139 of this report. A complete listing is available by contacting the State Board's office. Fixed income and equity securities are presented at market value.

3. COST OF INVESTMENTS

At June 30, 2000, the cost of investments for the Investment Trust Funds, excluding security lending collateral, was:

Supplemental Investment Fund \$ 1,467,117,936 Post Retirement Fund \$ 19,288,376,956

NOTES TO THE FINANCIAL STATEMENTS JUNE 30, 2000

4. LOANED SECURITIES

4(a) The market value of loaned securities outstanding at June 30, 2000 was:

Supplemental Investment Fund Post Retirement Fund \$ 130,435,419 \$ 2,096,309,986

4(b) In accordance with GASB_28, Accounting and Financial Reporting for Security Lending Transactions, the amount of cash collateral is concurrently an asset and a liability at the balance sheet date.

Non-cash collateral is considered an asset and a liability only if the lender has the right to sell collateral absent of borrower default. There is no such right in our case.

4(c) In accordance with GASB_28, Accounting and Financial Reporting for Security Lending Transactions, gross lending income, borrower rebate and agent fees must be reported on the face of the Statement of Operations.

5. SUPPLEMENTAL INVESTMENT FUND

The Supplemental Investment Fund serves as an investment vehicle for the various state and locally administered pension plans. During Fiscal Year 2000 the fund included seven separate accounts with different investment objectives. Financial information on the individual accounts is shown on pages 112 to 127 of this report. Participation in the Supplemental Investment Fund accounts is determined in accordance with various statutory requirements.

6. POST RETIREMENT INVESTMENT FUND

The Post Retirement Investment Fund (POST) serves as an investment vehicle for the Defined Benefit Pension Funds of the State of Minnesota. The fund invests amounts certified by the various pension funds as reserves required for the payment of retirement benefits. Assets of the POST Fund are held in custody at State Street Bank in Boston.

Participation in the POST Fund is equal to the actuarially determined required reserves for retirement benefits as of June 30, 2000. It includes a 6% assumed income distribution, in accordance with *Minnesota Statutes* Section 11A.18, and any mortality gains or losses as determined by an independent actuary hired by the State Legislature.

Laws of Minnesota 1992, Chapter 530 changed the formula used to calculate post retirement benefit increases. The new formula contains both an inflation adjustment and an investment component and became effective for benefit increases granted January 1, 1994.

Pursuant to *Minnesota Statutes* Section 11A.18, Subdivision 9, the inflation increase is based on the change during the Fiscal Year in the *Consumer Price Index for urban wage earners and clerical workers all items index published by the Bureau of Labor Statistics of the United States Department of Labor. In addition to the inflation based increase, a portion of the June 30, 2000 net market value in excess of Required Reserves is available for distribution as an investment based benefit increase to pension fund participants in January 2001.*

The benefit increase is stated as a percentage of eligible required reserves. In accordance with statutory provisions, the amount available for the benefit increase is certified to each participating pension fund for distribution to eligible individuals. Annuitants and other individuals receiving benefits at May 31, 2000 are eligible to receive the January 1, 2001 benefit increase.

7. POOLED INVESTMENT ACCOUNTS

The State Board of Investment manages ten pooled investment accounts for the Investment Trust Funds, the Supplemental Investment Fund and the Defined Benefit Pension Funds of the State of Minnesota. Our master custodian, State Street Bank and Trust hold the assets of the pooled accounts. Financial information on these pooled accounts is shown on pages 128 to 135 of this report.

- ** Manager Terminated in Fiscal '00
- Active stock managers are compensated on a performancebased fee formula. Four fee options are available and fees earned range from zero to twice the manager's base fee, depending on the manager's performance relative to an established benchmark.
- (2) The passive stock manager, international stock managers, active bond managers and two semi-passive bond managers are compensated based on a specified percentage of assets under management.
- (3) One semi-passive bond manager is compensated on a performance-based fee formula. Fees earned range from 5 to 10 basis points of assets under management, depending on the manager's performance relative to an established benchmark.
