## INTRODUCTION

Minnesota has some of the richest cropland in the world. The agricultural products raised on its 23 million agricultural acres places Minnesota very high in overall agricultural production compared to the other 49 states.

However, approximately 2.5 million acres of cropland are categorized as "marginal." These are lands that are severely limited for crop production and are very vulnerable to wind and water erosion. These are the marginal farmland acres targeted for inclusion in the RIM Reserve Program.

The RIM Reserve Program is one of the major initiatives within the Reinvest in Minnesota Resources Act of 1986. The 1986 program goal is to retire marginal agricultural acres from crop production through limited or perpetual conservation easements. A perennial vegetative cover must be established on enrolled acres to control soil erosion, improve water quality and to develop and enhance valuable fish and wildlife habitat.

Governor Rudy Perpich signs the 1986 Reinvest in Minnesota (RIM) bill into law. Looking on (left to right) is Senator Steven Novak, Senator Randy Peterson and Representative John Rose. The signing ceremony took place in April at the Emmet D. Williams school in Roseville.

## THE RIM RESERVE PROGRAM

(Excerpt from the Soil and Water Conservation Law)

### Chapter 40.41 Purpose and Policy

It is the purposes of sections 40.41 to 40.45 to keep certain marginal agricultural land out of crop production or pasture, to protect soil and water quality and support fish and wildlife habitat. It is state policy to encourage the retirement of marginal, highly erodible land, particularly land adjacent to public waters and drainage systems, from crop production and to reestablish a cover of perennial vegetation.

### PROGRAM CRITERIA

#### Eligible Lands:

Lands that are eligible for enrollment in RIM Reserve must meet the definition of marginal croplands as approved by the Commissioner of Agriculture. These soils are inherently unproductive and are subject to significant productivity loss when eroded.

In addition, the land enrolled must meet the following criteria:

- A. Was owned by the applicant as of January 1, 1985;
- B. Is adjacent to marginal agricultural land (up to an acreage equal to the eligible cropland);
- C. Was in crop production for at least two years during the period 1981 to 1985;
- D. Is at least five acres in size or is a whole field;
- E. Is not set aside or retired under another federal or state program;
- F. Is physically possible to crop; and
- G. Does not exceed 20 percent of the landowner's total state agricultural acreage.

**Eligible Landowner:**

An applicant must be a Minnesota resident who owns eligible cropland, and qualifies as a family farmer, a family farm corporation, or an authorized farm corporation.

**Program Options:**

- A. Ten-year Easement. A lump sum payment based on 90 percent of the federal Conservation Reserve Program (CRP) payments in the area of the enrolled land.
- B. Perpetual Easement. A lump sum payment based on 70 percent of the estimated market value of the agricultural land in the township of the enrolled land.

A landowner may not receive more than \$50,000 annually in payments through the program.

Wally Bernhardson, (left) Chairman of the Soil and Water Conservation Board, discusses the RIM Reserve Program with Jim Nichols, Commissioner of the Department of Agriculture.

**Public Access:**

The landowner retains complete control over public access to RIM Reserve lands.

**Easement Restrictions:**

The following activities are prohibited on RIM Reserve lands:

- A. Crop production;
- B. Alteration of wildlife habitat;
- C. Grazing; and
- D. Spraying of chemicals or mowing except as needed to comply with noxious weed laws.

The landowner agrees that other land supporting natural vegetation owned or leased as part of the same farm operation will not be converted to agricultural crop production during the term of the easement. Examples of natural vegetative cover include trees, shrubs, permanent pasture, range and wetlands.

**Establishing Vegetative Cover:**

Approved landowners will receive up to \$75 per acre to establish a perennial grass-legume or native grass cover. Additional assistance up to \$75 per acre will be provided for approved tree and shrub plantings. Supporting conservation practices may also be installed as needed to protect and enhance the area.

**Easement Renewal:**

An expired ten-year easement may be renewed at the option of the Commissioner of Agriculture for an additional ten-year period or enrolled as a perpetual easement.

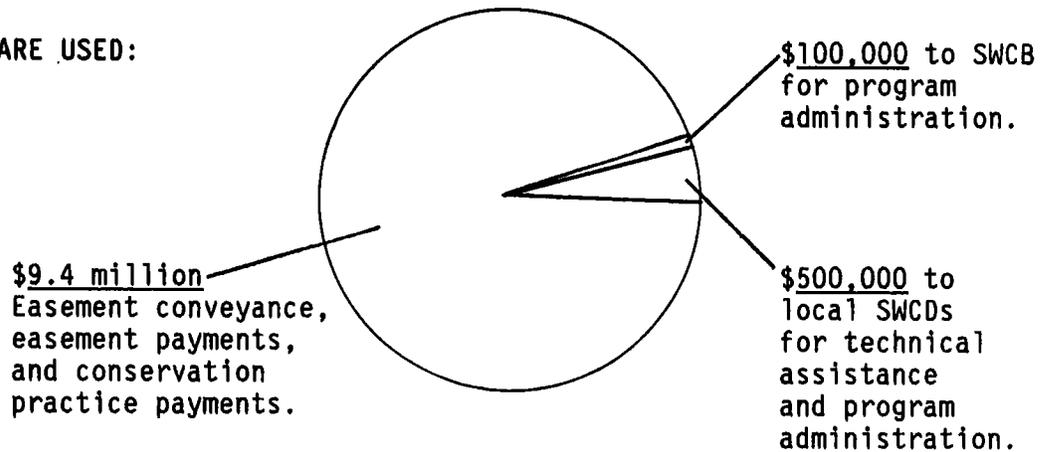

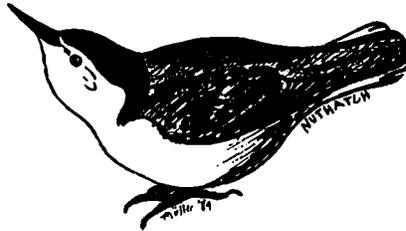

### 1986 PROGRAM FUNDING

A total of \$10 million was appropriated to the Department of Agriculture, Soil and Water Conservation Board for administration of the RIM Reserve Program and for easement payments.

#### HOW THE FUNDS ARE USED:

## Program Implementation

### Local Decision Making:

Each of the 91 Soil and Water Conservation Districts developed local RIM Reserve Screening Committees to identify the areas within the SWCD which are highest priority for RIM Reserve enrollment and to review the applications for enrollment and assign priorities to individual applications.

The local RIM Screening Committee was established by each SWCD and was chaired by a SWCD supervisor.

The following agencies were invited to participate in the local Screening Committee process:

- Minnesota Department of Natural Resources (DNR);
- Minnesota Pollution Control Agency (PCA);
- USDA - Agricultural Stabilization and Conservation Service (ASCS);
- USDA - Soil Conservation Service (SCS); and
- USDI - Fish and Wildlife Service (USFWS)

In addition, representatives of private, local and state conservation, farm and environmental organizations were sought as members of the local Screening Committee.

### Allocation of Funds:

The RIM Reserve easement funds (\$9.4 million) were allotted to each of the SWCDs according to a formula based on the following:

- Acres of marginal agricultural land;
- Land value factor; and
- Agency priorities (DNR, PCA, USFWS and SCS).

The easement allotment represented the above factors as well as a SWCB decision to establish a \$250,000 maximum allotment per SWCD. This resulted in a \$442,000 balance that was available to SWCDs documenting landowner interest in excess of available funds.

The easement allotment figure (see pages 8 and 9) represents a target amount available to each SWCD. The funds remained in the state RIM Reserve Account until the easement was conveyed. The RIM Reserve service allocation (\$500,000) to SWCDs for program administration was calculated using a \$1,250 minimum allocation per SWCD. Since SWCD personnel were directed to attend training sessions, conduct Screening Committee meetings, and promote public awareness of the program, a minimum allocation was justified. In addition to the minimum allocation, an additional amount was added based on a percentage of the easement allotment.

#### Application Period:

The application period for enrolling in the RIM Reserve Program was September 29 through October 10, 1986. Local SWCD offices were the central contact for the sign-up. Assistance was provided by the technical agencies serving on the local Screening Committees.

## Results of the Application Period

During the two-week sign-up period, a total of 2,149 applicants requested approximately \$25.5 million for retirement of nearly 60,000 acres under RIM Reserve. Approximately 21,000 acres enrolled through about 900 easements will be retired with 1986 funding. Of the over 900 easements, approximately 100 are perpetual and the balance are ten-year easements.

## Current Developments

The SWCDs currently are finalizing individual RIM Reserve easements. Although the easement process can be a rather lengthy and time-consuming process, every effort is being made to expedite the completion of easements before the spring planting season begins.

The first RIM Reserve Easement was signed in Mille Lacs County on the Mittelsteadt farm. Left to right are Shirley Mittelsteadt, owner; Hugh Price, Chair of Governor's Commission on Hunting and Fishing; Ron Nargang, Director, State Soil and Water Conservation Board; Jim Nichols, Commissioner, Department of Agriculture; Senator Chuck Davis, Princeton; Henry Mittelsteadt, owner; and Larry Shannon, Department of Natural Resources.
