UFARS SOURCES OF EXPENDITURE DATA FOR SCHOOL DISTRICT PROFILES

This table is intended for use by persons who are familiar with the Uniform Financial Accounting and Reporting System (UFARS) and its manual, Manual for the Uniform Financial Accounting and Reporting System for Minnesota Schools.

Each of the 16 expenditure categories in Profiles includes all expenditures within a defined set of funds, programs, and objects, as defined in the upper section of the table below.

The lower section of the table summarizes the funds, major program categories, and object categories used for profiles.

Catego	ories Used in the Report	Fu	nds¹	Programs ²		Objects ³

Students

Figure 1 illustrates enrollment change in the various grade levels. Total enrollment decreased through 1984-85 but has grown since that time-from 695,823 in 1984-85 to 732,425 in 1989-90-a 5.3 percent increase. As the vast majority of enrollment change in Minnesota relates to changes in births rather than migrations, these changes first show up in the elementary grades, as is observable in Figure 1 which shows secondary enrollments declining beyond 1984-85 even though total enrollments began to grow. The figure also indicates that total enrollments are projected to continue increasing. Table 1 examines enrollment change from another perspective; it indicates the percentage of districts which have experienced enrollment losses or gains during the past decade. It indicates that nearly four-fifths (79.1 percent) of all districts experienced an enrollment decline during the period.

Minnesota school districts vary greatly in the number of pupils which they enroll, as indicated in Table 2. The largest ten percent of the state's districts enroll more than half of all students; the smallest ten percent, less than one percent of students. These percentages have remained fairly constant over the decade and are reflected in very dramatic differences in the enrollment density of Minnesota school districts. The ten lowest density districts are all located in the

forested area of the northern quarter of the state and average 130 square miles in area; the ten most dense are in the Twin Cities metropolitan area and average a mere 19 square miles in area.

Minnesota, as well as the U.S. as a whole, is experiencing a growth in the proportion of pupils who are members of a minority group (see Table 3 and Figure 2). However, a number of differences between the U.S. and Minnesota are also apparent. First, is the fact that the percentage of minority enrollments in Minnesota is only

approximately one-fourth that of the nation as a whole. Second, the composition of Minnesota's minority enrollments is significantly different than for the United States. In 1986-87, Blacks constituted over half of all United States minority enrollments (54.3 percent), Hispanics one-third (33.4 percent), with Asians (9.4 percent) and Native Americans (2.9 percent) the remainder. In Minnesota, Blacks and Asians each constituted approximately one-third of minority enrollments (35.9 and 32.6 percent, respectively). Minnesota's large Asian percentage is the result of significant

in-migration of Southeast Asian refugees following the Vietnam war. Native Americans were also a significantly larger portion of Minnesota's minority enrollments (18.5 percent). By contrast, Hispanics only constituted 13.0 percent of Minnesota's minority enrollments.

Figure 3 indicates the number of students from families who are receiving AFDC payments. The percentage of these economically disadvantaged pupils has increased over the past decade and one-half.

Instructional Staff

Teachers, and other professional staff, are the primary input into the PK-12 educational process; and constitute the largest cost component of education. Figure 4 shows how the number of professional staff have varied since the 1980-81 school year; they began to increase in numbers in 1984-85 as enrollments rebounded from years of decline. The figure also indicates that Minnesota's ratio of pupils to professional staff has averaged approximately 15.2 except for the budget crisis years of 1982-83 and 1983-84 when above average numbers of staff were laid off and/or few new staff were hired by school districts.

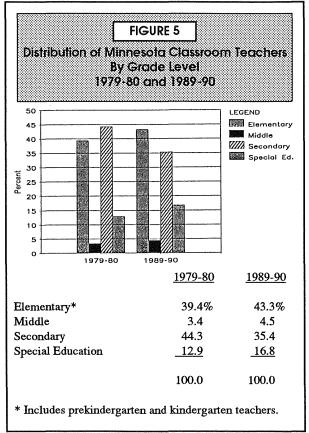

An examination of the grade level assignment of classroom teachers in Figure 5 indicates a number of changes over the past decade. In 1979-80 there were more secondary than elementary teachers (44.3 versus 39.4 percent); in 1989-90 the situation was virtually reversed (35.4 versus 43.3 percent, respectively). The proportion of teachers who specialized in instructing children who required special education services increased dramatically between 1979-80 and 1989-90 (12.9 versus 16.8 percent, respectively). Changes in special education laws, particularly service to pre-school children, accounted for much of this increase.

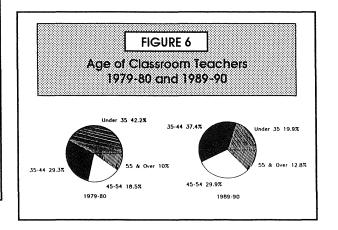

The teacher cadre aged during the past decade (see Figure 6). A significant proportion of

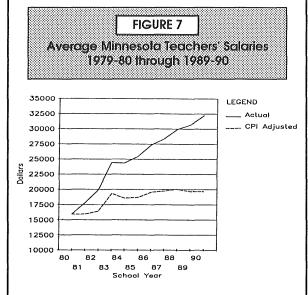

1989-90 teachers were in the age groups 45-54 (29.9 percent) and over 55 (12.8 percent). In 1979-80, these groups accounted for 18.5 and 10.0 percent, respectively. In 1979-80, over 42 percent of classroom teachers were under 35 years of age; by 1989-90 the percentage declined to only 19.9 percent.

*Source: Rankings of the States, National Education Association, various annual editions.

As shown in Figure 7, the salaries of teachers increased significantly over the past decade. The dashed line indicates that salaries increased by 23.5 percent after adjustment for growth in the consumer price index (CPI). A portion of the increase is related to aging of staff resulting in more education and years of experience—both of which are factors in the determination of a teacher's salary.

Financial

Figure 8 indicates that the sources of Minnesota school revenues have been quite constant since 1983-84; the state has contributed approximately 52 percent, local property taxes 44 percent and the federal government 4 percent. Minnesota's federal percentage is approximately two-thirds of the United States average. Another way of looking at Minnesota's PK-12 revenues is by fund. A fund can be defined as a self-contained set of accounts segregated for the purpose of a specifically defined set of activities. Table 4 shows the percent of Minnesota school district revenues by the eight UFARS funds for the school years 1980-81 and 1989-90. Significant increases in revenue were noted in the Community Service and Building Construction funds over that period.

1989-90

52

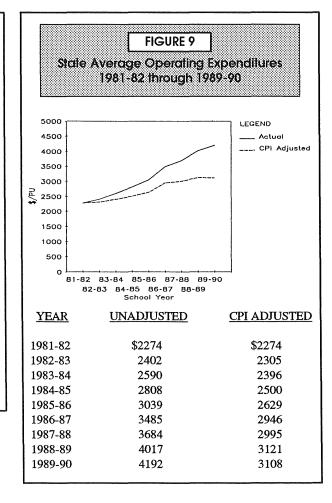

44

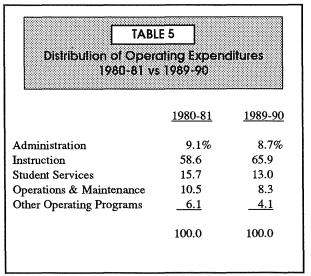

As indicated in Figure 9, statewide average operating expenditures have risen dramatically since 1981-82—by 36.7 percent after taking into account inflation as represented by the Consumer Price Index (CPI). Table 5 shows that the distribution of these expenditures varied between

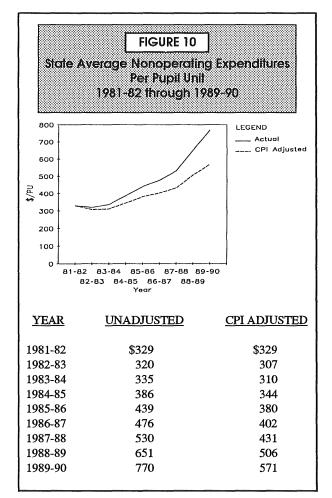

1980-81 and 1989-90 with instructional expenditures gaining vis-a-vis the other categories. An increase in the number of special education staff and rapidly increasing salary levels accounted for much of this redistribution.

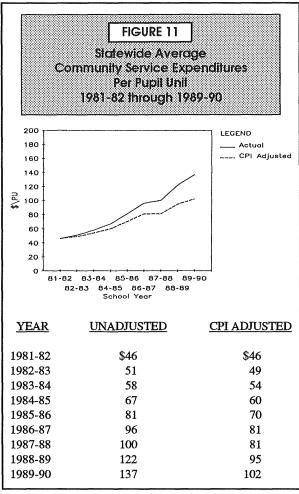

Capital Outlay, Building Construction, and Debt Service (columns 31, 32, and 33 of the report) can be described as nonoperating expenditures. As indicated in Figure 10, expenditures for these items have also risen dramatically since 1981-82. The Minnesota state legislature has increased

the state's role in school district capital finance in recent years. Included among these efforts have been 1) an increase in the number of loans made under the maximum effort school aid law and, 2) the equalization of capital expenditure revenue.

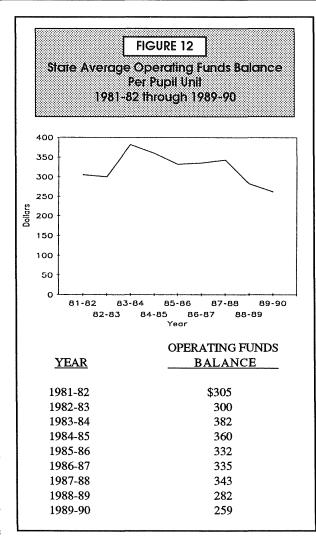

The "traditional" community service programs emphasizing recreation/sports, cultural activities and crafts were expanded beginning in the 1984-85 school year with the initiation of the Early Childhood and Family Education Program. This program was designed to improve the parenting skills of parents with pre-school aged children. In 1987-88 the Youth Development Program was added to the Community Service umbrella. This program is designed to recruit and involve school aged youth in various school/community decision-making processes. The net result of all of these efforts has been a significant growth in total Community Service Expenditures as indicated in Figure 11.

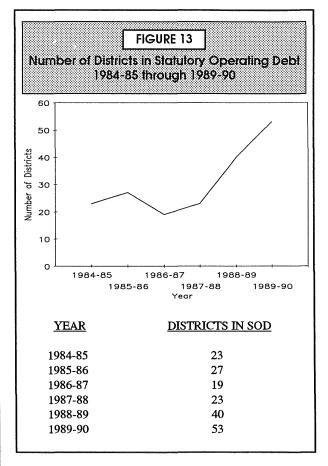

Figure 12 shows the state average operating funds balance per pupil unit for the years 1981-82 through 1989-90. The operating funds balance of a school district is a measure of undesignated

funds a district has available for day-to-day operations after the "books are closed" at the end of the school year. It can be either positive or negative. If it is negative to an extent equal to or greater than 2.5 percent of its previous year's operating expenditures, the district is in violation of the expenditure limitations. Districts in violation are required to submit a financial plan to the Commissioner of Education. Figure 13 shows that the number of districts in this situation has increased in the past six years. At the other extreme, districts with net operating fund balances in excess of \$600 per pupil unit will have their general education revenue reduced for the next school year.

Adjusted Net Tax Capacity per pupil unit is a measure of the taxable real and personal property of a school district subject to a local property tax levy. As can be observed from Figure 14 it varies significantly from district to district. Districts in the fifth percentile have, on average, one-seventh or less the property wealth per pupil unit as districts in the 95th percentile.

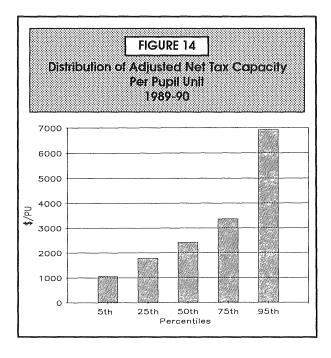

Figure 15 indicates the disparity in property wealth in another manner. It shows how average operating expenditures/pupil unit are distributed among Minnesota's pupils. Seventy percent of Minnesota pupils benefit from average operating expenditures between \$3,500 and \$4,499 per pupil unit. However, a substantial minority (13.0 percent) are enrolled in school districts with average operating expenditures of \$5,000

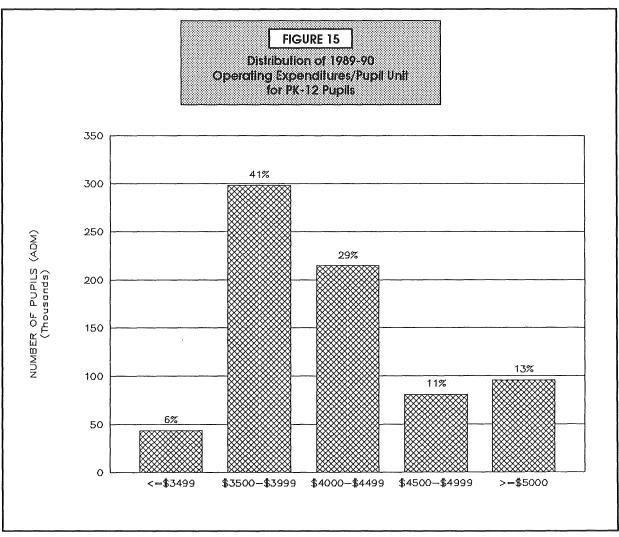

or greater per pupil unit; six percent of pupils attend districts with average operating expenditures less than \$3,500 per pupil unit.

Property tax levies have traditionally been a major source of elementary and secondary education funds, nationwide. The result of over-reliance on this method of raising education revenues has resulted in a spate of education funding lawsuits from the 70's to the present day.

The tables on pages 22 through 49 contain 38 separate statistics for each school district, county, and region in the state. Definitions of these 38 statistics are given below. All data are for the 1989-90 school year.¹

1989-90 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be in attendance to be counted in ADM, but they must be in membership (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of total resident ADM including all residents who are, a) enrolled in their home district, b) educated in another district to whom tuition is paid, or c) attending another district under the Enrollment Options law. Resident ADM counts are used in calculating property tax levy limitations. Resident membership includes:

- 1. Prekindergarten Handicapped ADM of prekindergarten students enrolled in special education programs.
- 2. Kindergarten ADM of students enrolled in kindergarten classes.
- 3. Elementary, Grades 1–6 ADM of students enrolled in grades 1–6, including students in elementary—level ungraded and special education classes.
- 4. Secondary, Grades 7–12 ADM of students enrolled in grades 7–12, including students in secondary–level ungraded and special education classes.
- 5. Total Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

- 6. Percent Minority The percentage of the district's students who are of Native American, Alaskan, Black, Asian, or Hispanic ancestry.
- 7. Percent Attendance The average ratio of days attended to days enrolled, for all students in the district.
- 8. Percent Transported The number of resident public school students transported to and from school twenty or more days, as a percentage of the district's resident pupils.²

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full-time equivalents (FTE). For example, a full-time staff member is counted as 1.0 FTE; one employed only half-time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; postsecondary personnel are excluded.

- 9. Total Staff FTE The total number of licensed professional staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
- 10. Pupil Staff Ratio The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Capacity Rates

These figures show the tax burden, expressed as a percent of tax capacity, for school district property taxes payable in 1990. Taxes payable in 1990 provide revenue for the 1990–91 school year.

- 11. Auditor Percent The actual school district tax rate as determined by the county auditor. With a rate of 5 percent, a property owner would be taxed \$5 for each \$100 of tax capacity. Because of differences in property assessment levels between counties, comparisons of auditor tax rates among districts may be misleading. This figure includes additional tax rates for special intermediate districts (287, 916 and 917) where they are part of the tax burden.
- 12. Equalized Percent This tax rate is computed by multiplying the auditor percent (item 11) by the 1989 market sales ratio. This ratio is equal to the market values, as determined by the local assessor, divided by actual selling prices. For state assessed properties, such as utilities, the ratio is 1.00.

Equalized percents are computed to compensate for varying assessment practices. Thus, when making interdistrict comparisons, these rates provide a more valid comparison.

Pupil Units (Weighted ADM)

13. Resident Pupil Units — This figure is computed by applying weightings to a district's resident average daily membership (as defined above). Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; and each secondary ADM counts as 1.35 pupil units. Resident pupil units are used in calculating the district's general education revenue and property tax levy limitations.

14. Total Pupil Units — This is a count of pupil units which adjust resident pupil units (column 13) to reflect the expenditures reported by the school districts. It includes residents attending the home district, resident students tuitioned to other school districts, nonpublic school students being served via a Shared Time program, and nonresident students who transfer in via one of the attendance options programs. Excluded are pupil units which represent student's time spent in a Postsecondary Enrollment Options institution.

Revenue Percentages

These three columns show the percentage of each district's revenues from the federal government, the state government, and local and other sources. The percentages are based on all 1989-90 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans, interfund transfers, and nonpublic flow thru revenue.

- 15. Federal The percentage of revenues from the federal government, whether paid directly or through another governmental unit.
- **16.** State The percentage of revenues from the Minnesota State government.
- 17. Local and Other The percentage of revenues from local and other sources. This category includes revenues from property taxes, interest, rent, gifts, tuition, fees, and other revenue not classified as federal or state.

1989-90 Expenditures Per Pupil Unit

Columns 18 through 33 show each district's 1989-90 expenditures in sixteen different categories, divided by total pupils units (column 14). Columns 18 through 30 include all expenditures for the indicated purpose, except capital expenditures.

- 18. District and School Administration Expenditures for the school board and for the office of the superintendent, principals, and any other line administrators who supervise staff.
- 19. District Support Services Expenditures for central office administration and central office operations not included in district and school administration (see #18). Includes expenditures for business services, data processing, legal services, personnel office, printing, and the school census.
- 20. Regular Instruction Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for cocurricular and extracurricular activities. Includes salaries of teachers, classroom aides, and coaches, and expenditures for classroom supplies and textbooks.
- 21. Vocational Instruction Expenditures in secondary schools for instruction that is related to job skills and career exploration. Includes expenditures for home economics, as well as industrial, business, agriculture, and distributive education.
- 22. Exceptional Instruction Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Includes expenditures for special instruction of students who are emotionally or psychologically handicapped, gifted and talented, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems.

- 23. Instructional Support Services Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Includes expenditures for assistant principals, curriculum development, libraries, media centers, audio—visual support, staff development, and computer assisted instruction.
- 24. Pupil Support Services Expenditures for all noninstructional services provided to students, not including transportation and food. Includes expenditures for counseling, guidance, health services, psychological services, and attendance and social work services.
- 25. Operations and Maintenance Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Includes expenditures for custodians, fuel for buildings, electricity, telephones, and repairs.
- 26. Food Service Expenditures for the preparation and serving of meals and snacks to students.
- 27. Pupil Transportation Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures.
- 28. Other Operating Programs³ Expenditures for general fund operated programs necessary to a district's operations but not assignable to other programs. These <u>can</u> include federally funded community education services, property and liability premiums, unemployment insurance premiums, principal and interest on noncapital obligations, and nonrecurring costs such as judgements and liens.
- 29. Total PK-12 Operating Expenditures The total of the eleven preceding categories of expenditures (columns 18 through 28).

This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1989-90 school year, except capital and debt service expenditures.

- 30. Community Service Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs.
- Capital Outlay All capital expenditures charged to the operating funds plus expenditures charged to the district's capital expenditure fund.
- 32. Building Construction All expenditures charged to the district's building construction fund. Expenditures are for major capital projects funded by bond proceeds, state capital loan, state facility grant or the downpayment levy.
- 33. Debt Service Expenditures for repayment of long term debt (see #37), including payments of principal and interest on bonds and capital loans.

Other Measures Per Pupil Unit

34. Operating Funds Balance — This figure is a measure of the district's financial condition at the end of the 1989-90 school year, and of how much resources are available to be used in future years. It is equal to the sum of the undesignated balances on June 30, 1990, from the four operating funds (general, food service, pupil transportation, and community service funds), excluding the amount of statutory operating debt; this balance is then divided by 1989-90 resident pupil units (column 13).

- 35. Change in Funds Balance The difference between the district's operating funds balance on June 30, 1990 (see #34 above) and on June 30, 1989, divided by 1989-90 resident pupil units. This is essentially equal to the difference between the district's 1989-90 revenues and expenditures, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues.
- 36. State and Local Operating Costs This figure, also called adjusted maintenance cost, is often used to compare overall costs of education per pupil unit that is financed through state and local funds. It is computed as follows:

Sum of all expenditures for current operation of the schools, Minus all revenue from the federal government, Minus revenue from sale of food and materials, Minus admission fees and gate receipts from school activities; This total is then divded by 1989-90 total pupil units (column 14).

- 37. Long Term Debt The amount of long term debt outstanding on June 30, 1990, divided by 1989-90 resident pupil units. Long term debt includes bonds and capital, debt service and energy loans from the state.
- 38. 1989 Adjusted Net Tax Capacity The 1989 adjusted net tax capacity of the district divided by 1989-90 resident pupil units. This figure is an indicator of the district's ability to raise revenue through local property taxes.

Footnotes

There are three exceptions to this general rule. The two tax rate statistics (columns 11 and 12) are for taxes payable in calendar year 1990; these taxes will provide revenue for 1990-91.

Adjusted net tax capacity (column 38) is based on property values in 1989; this figure will be used in computing state aids and tax levy limitations for the 1991-92 school year.

² For some school districts and some categories of students, the counts of students transported were estimated.

Most school districts included all expenditures for employee benefits in the same UFARS programs as the employees' salaries. Thus, for example, health insurance for the superintendent is included with "district and school administration" (column 18), and benefits for teachers are included with instructional programs (columns 20, 21 and 22). Other districts incorrectly reported all expenditures for employee benefits separately; for these districts, the expenditures show up in "other operating programs" (column 28). Because of this difference in accounting practices there is significant variation in the amounts reported in column 28.

DATA FOR COUNTIES, DEVELOPMENT REGIONS AND STATE

The figures listed on the next six pages are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions and for the entire state. Counties are listed by region, with the regions in numerical order.

	1989-	-90 Resid	ent Average	·	mbership	Pı	ıpil Data	a	Profess Staf		Ta Capacity		Pupil (Weighte

DATA FOR ENROLLMENT SIZE GROUPS

The table below lists totals or averages for all districts in each of ten enrollment size groups, based on 1989-90 resident average daily membership (ADM). For example, group 1 includes all districts with 199 or fewer ADM, and group 2 includes all districts with 200 to 284 ADM. Each group includes approximately ten percent of the state's school districts (i.e., 42 to 45 districts).

DATA FOR ENROLLMENT SIZE GROUPS

The chief purpose of this table is to permit easy comparisons of districts with similar enrollment. For example, a superintendent in a district with 500 pupils may want to examine the data for group 5 (465 to 609 ADM), to see how his/her expenditures compare with other districts that are of similar size.

SUMMARY STATISTICS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics.

This table may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little; ninety percent of the school districts are within the narrow range of 94.4% (5th percentile) to 97.6% (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate this use of the data.

1. A district which has total PK-12 operating expenditures (column 29) of \$4,000 per pupil unit

is very near the median value, which is \$3,991. Thus, about half the districts in the state have lower and half have higher expenditures.

2. A district with total average daily membership (column 5) of 300 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

SUMMARY STATISTICS

Lowest Value - For any specific variable, the lowest value of that variable among all 436 school districts. The table also shows the highest value for each variable.

XXth percentile - For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 18, this means that ten percent of the school districts have 18 or fewer staff members (FTE). The 25th and 75th percentile are also

called quartiles; the 10th, 20th, 30th,...through 90th percentiles are also called deciles.

Median - For any specific variable, a value chosen such that half of the school districts are below the chosen value, and half are above.

State Total - For variables 1-5 (1989-90 resident average daily membership, 9 (total staff), and 13-14 (pupil units), the state total is simply the sum of the corresponding

value for all 436 districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by sum of the denominators. For example, State total pupil-staff ratio =

State total of pupils
State total of staff

For these variables, the state total is a form of weighted average.

COOPERATIVE EDUCATION UNITS

The following six pages contain data on cooperative education units—ECSU's, ESV's, Education Districts, Special Education Coops, Vocational Education Coops, and Intermediate Districts. These units make expenditures and have as members various of the traditional districts included in the beginning of Profiles. The first page defines the

data columns. The second and third pages list the cooperative units. The last three pages provide comparative statistics for these units. The Department of Education has a listing of the traditional district membership for each cooperative education unit. For further information contact the District Data Unit at (612) 296-2400.

DEFINITION OF DATA COLUMNS

- 9. Total Staff: Identical to Column 9 defined on page 13.
- 13. Resident Pupil Units: Identical to Column 13 defined on page 14. The count is the sum of the pupil units of the member districts.

Columns 18 through 33 are identical to Columns 18 through 33 on pages 15 through 16 except that the divisor is Resident Pupil Units (Col. 13, above).

- 18. District and School Administration.
- 19. District Support Services.
- 20. Regular Instruction.
- 21. Vocational Instruction.
- 22. Exceptional Instruction.
- 23. Instructional Support Services.
- 24. Pupil Support Services.
- 25. Operations and Maintenance.
- 26. Food Service.
- 27. Pupil Transportation.

- 28. Other Operating Programs.
- 29. Total PK-12 Operating Expenditures.
- 30. Community Service.
- 31. Capital Outlay.
- 32. Building Construction.
- 33. Debt Service.
- 34. Total Expenditures: The total of Columns 29 through 33, above. Districts with zero expenditures may be indicative of a newly created entity with few, if any, expenditures or an entity whose financial data was not transmitted to the Department of Education.
- 35. Total Expenditures minus Tuition Receipts: Col. 34 less tuition fees and dues received from member districts and also less sales of materials purchased for resale—all divided by Resident Pupil Units (Col. 13). This represents the <u>net</u> expenditures of the cooperative units—expenditures <u>not</u> included in any of the traditional districts' expenditure totals.

LIST OF COOPERATIVE EDUCATION UNITS

I. Educational Cooperative Service Units (ECSU's)

Region 1: Northwest ECSU; Thief River Falls, MN

Region 3: Northeast ECSU; Virginia, MN

Region 4: West Central ECSU; Fergus Falls, MN

Region 5: ECSU 5; Staples, MN

Region 6: Southwest & West Central ECSU; Marshall, MN

Region 7: Central Minnesota ECSU; St. Cloud, MN

Region 9: South Central ECSU; North Mankato, MN

Region 10: Southeast ECSU; Rochester, MN

Region 11: Metropolitan ECSU; Arden Hills, MN

246: Central Minnesota ERDC; St. Cloud, MN

II. Elementary Secondary Vocational Computer Regions (ESV's)

Region 1: Moorhead, MN

Region 2: Duluth, MN

Region 3: St. Cloud, MN

Region 4: Marshall, MN

Region 5: Mankato, MN

Region 6: St. Paul, MN

Region 7: Roseville, MN

III. Telecommunication Districts

- 6002 Des Moines River Valley Tele-Media; Storden, MN
- 6003 East Central MN Education Cable Coop; Braham, MN
- 6006 Midstate Education Telecom Coop; Upsala, MN
- 6007 Quad County Tele Project; Remer, MN
- 6015 Northwest Education Technical Coop; Stephen, MN
- 6036 Knowledge Interact. District System; Mankato, MN
- 6037 Minnesota Valley Telenetwork; Montevideo, MN

- 6038 Sherburne-Wright Education Tech Coop; Buffalo, MN
- 6039 Southwest Minnesota Telecom; Luverne, MN
- 6040 Little Crow; Stewart, MN
- 6048 Wasioja Education Technical Coop; Dodge Center, MN

IV. Education Districts

- 6001 Valley & Lakes; Fergus Falls, MN
- 6004 Freshwater; Staples, MN
- 6008 South Central; Minnesota Lake, MN
- 6009 Chisago-Pine; North Branch, MN
- 6012 Zumbro; Stewartville, MN
- 6013 Hiawatha Valley; Winona, MN
- 6014 Runestone; Alexandria, MN
- 6016 Pomme de Terre; Ashby, MN
- 6017 Cedar River; Austin, MN
- 6018 Minnesota River Valley; Montevideo, MN
- 6019 2001; Buffalo, MN
- 6020 Border Region; Roseau, MN
- 6022 Central Lakes; Willmar, MN
- 6023 Buffalo Ridge; Ivanhoe, MN
- 6024 Northeast Minnesota; Thief River Falls, MN
- 6025 Southern River Bend; Hanska, MN
- 6026 West Central; St. Cloud, MN
- 6027 Minnesota Valley; St. Peter, MN
- 6028 Cannon Valley; Faribault, MN
- 6029 Redwood River; Morton, MN
- 6030 Camden; Balaton, MN
- 6031 Des Moines River Valley; Windom, MN
- 6032 Western Minnesota; Chokio, MN
- 6033 Northeastern; Grand Rapids, MN
- 6042 Root River; Chatfield, MN
- 6044 Meeker/McLeod County; Hutchinson, MN
- 6045 Head of the Lakes; Cloquet, MN

LIST OF COOPERATIVE EDUCATION UNITS

6259 - Wasioja; Zumbrota, MN

6383 - Benton-Stearns; St. Cloud, MN

6961 - Leaf River; Wadena, MN

6970 - Sibley County; Arlington, MN

6979 - Mid State; Little Falls, MN

6985 - Pine-to-Prairie; Red Lake Falls, MN

V. Special Education Cooperatives

230 - Southeastern Minnesota Sp. Ed. Coop; Chatfield, MN

259 - Wasioja Area Sp. Ed. Coop; Zumbrota, MN

382 - Northwest Regional Interdistrict Council; Newfolden, MN

384 - Cedar River Ed. Services Coop; Austin, MN

397 - Lake Agassiz Sp. Ed. Coop; Audubon, MN

398 - Midwest Sp. Ed. Coop; Morris, MN

870 - Southern Minnesota Sp. Ed. Coop; Wells, MN

929 - River Bend Sp. Ed. Coop; New Ulm, MN

930* - Carver-Scott Coop Center; Chaska, MN

932 - Mid Range Sp. Ed. Coop; Chisholm, MN

935 - Fergus Falls Sp. Ed. Coop; Fergus Falls, MN

937 - Crow River Sp. Ed. Coop; Hutchinson, MN

938 - Meeker-Wright Sp. Ed. Coop; Cokato, MN

939 - South Central Sp. Ed. Coop; Blue Earth, MN

978 - Minnesota Valley Coop; Granite Falls, MN

993 - Minnesota River Valley Sp. Ed. Coop; New Prague, MN

995 - Martin County Sp. Ed. Coop; Fairmont, MN

997 - Red Lake Falls Area Sp. Ed. Coop; Red Lake Falls, MN

998 - Bemidji Regional Interdistrict Council; Bemidji, MN

VI. Vocational Education Cooperatives

661 - Central Stearns; Cold Spring, MN

919 - North Country; Bemidji, MN

930* - Carver-Scott; Chaska, MN

942 - Highland; Tyler, MN

944 - Nishi-Nayawshing; Montevideo, MN

948 - Prairie Lakes; Worthington, MN

950 - East Central; Sandstone, MN

955 - Southern Polar; Barnum, MN

957 - Oakland; Cambridge, MN

963 - East Range Sec. Tech. Center; Virginia, MN

964 - Cottonwood River; Springfield, MN

966 - Wright; Buffalo, MN

969 - South Central Coop; Blue Earth, MN

970 - Sibley County; Arlington, MN

974 - Red River Valley; East Grand Forks, MN

976 - Northwest; Thief River Falls, MN

980 - Martin County; Fairmont, MN

985 - Pine-to-Prairie; Red Lake Falls, MN

990 - Agassiz Valley; Crookston, MN

6021 - G.L.H.D.C; Hutchinson, MN

6041 - B.BL.H.C.SI.ST; Cosmos, MN

VII. Intermediate School Districts

287 - Hennepin Technical College; Plymouth, MN

916 - Northeast Metropolitan Inter. Dist; White Bear Lake, MN

917 - Dakota County Intermediate District; Rosemount, MN

VIII. Secondary Cooperative Facilities Districts

6011 - Lac Qui Parle Valley; Madison, MN

6046 - Tri-District Coop; Glenwood, MN

^{* 930} is both a Special Ed. and a Vocational Ed. Cooperative
