December, 1997
Robert J. Wedl, Commissioner
Minnesota Department of Children, Families & Learning

This document was prepared and published by the staff of the Financial Management, Transportation and Accountability Team, Division of Management Assistance, Minnesota Department of Children, Families & Learning, 552 Capitol Square Building, St. Paul, Minnesota 55101.

Please Note:

Due to an error in electronic transfer by the printer, the title/heading on the data pages of this book have been printed with part of the word "Expenditures" missing. On the odd numbered pages 27 through 55 the heading reads "1995-96 Editures per Total ADM" - this should read "1995-96 Expenditures per Total ADM". On the odd numbered pages 59 through 87 the heading reads "1994-95 Editures per Total ADM" - this should read "1994-95 Expenditures per Total ADM".

INTRODUCTION

School District Profiles, 1995-96 is the twenty-fourth in a series which compares school districts in the areas of enrollment, staffing and finance. A major change from previous years is that the financial data is presented on a per average daily membership (ADM) basis rather than per pupil unit (weighted average daily membership). FY 1994-95 Profiles data on a per ADM basis is included as an attachment to this document for comparison purposes.

Interdistrict Cooperation and Consolidations

Minnesota legislation has encouraged Minnesota school districts to cooperate in the provision of educational services to ensure that all students receive adequate course offerings and to make the delivery of these courses less costly.

Academic Pairing

Laws enacted in 1979 and 1983 eliminated the requirement that every school district provide educational services for all grades. This allowed districts to enter into agreements with each other for the provision of services for particular grades. Sixty-three districts participated in academic pairing during the 1995-96 school year.

Consolidations

Declining enrollments in many districts, combined with legislated financial inducements, has resulted in a number of school district consolidations in recent years. Between the 1994-95 and the 1995-96 school years thirty-one districts combined to form fourteen new districts. These are:

1995-96 New District <u>Number & Name</u>	1994-95 Old District <u>Number & Name</u>

UFARS ACCOUNTING SYSTEM BACKGROUND

In 1976 the Uniform Financial Accounting and Reporting Standards (UFARS) Council was established by the Minnesota Legislature. The Council was charged with making recommendations to the State Board of Education for accounting standards consistent with Minnesota Statutes 121.90 through 121.917 and with Generally Accepted Accounting Principles (GAAP). The result was the UFARS Manual which brought greater accuracy and uniformity in accounting and reporting by the local educational agencies. In 1993-94 the Department of Children, Families and Learning became responsible for the UFARS System with assistance from the Accounting Guidelines Committee.

Overview of Dimensions

The Uniform Financial Accounting and Reporting Standards (UFARS) revenue and expenditure account structure consists of six dimensions. Each dimension contributes specific information about every revenue and expenditure transaction. The dimensions are Fund, Organization, Program, Finance, Object or Source, and Course. The Fund Dimension is a two digit field; the remaining five dimensions each have three digits. Thus, an entire account code contains seventeen digits. The Department of Children, Families and Learning collects data on all six dimensions; however, the course dimension has only minimal use in UFARS at this time.

Because *Profiles* displays only aggregate data, only the Fund, Program and Object dimensions are used to extract the data needed for this publication. For explanations of other dimensions in the UFARS system, please contact the Financial Management Team at (612) 297-5776.

Fund

A fund is a fiscal entity with a set of accounts that record revenues, expenditures, liabilities and assets. Each fund is segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with state and federal laws and regulations.

Minnesota schools used the following UFARS funds in 1995-96:

1. General Fund
2. Food Service Fund
3. Transportation
4. Community Service Fund
5. Capital Outlay Fund
6. Building Construction Fund
7. Debt Service Fund
8. Trust Funds
9. Agency Funds
20. Internal Service fund

Program

This dimension is used to separate all instructional and support service activities associated with public school districts. The series in the dimension are:

District and School Administration	(001-099)
District Support Services	(100-199)
Elementary and Secondary Regular Instruction	(200-299)
Vocational Education Instruction	(300-399)
Special Education Instruction	(400-499)
Community Education and Services	(500-599)
Instructional Support Services	(600-699)

Pupil Support Services	(700-799)
Sites and Buildings	(800-899)
Fiscal and Other Fixed Costs Programs	(900-999)

Object

The Object Dimension identifies the service or commodity obtained as the result of an expenditure. This is the most detailed level of expenditure reporting. The object series are:

1. Salaries and Wages (110-199)
2. Employee Benefits (200-299)
3. Purchased Services (300-399)
4. Supplies and Materials (400-499)
5. Capital Expenditures (500-599)
6. Debt Service (600-699)

7. Other Expenditures (700-799)
8. Other Financing Uses (800-899)

Profiles Expenditure Categories

As stated above, *Profiles* displays only aggregate data so only the Fund, Program and Object Dimensions are needed to extract the data for this publication. The table below describes the *Profiles* expenditure categories. The first column contains the column number from the district data section of the report, the second column contains the description of the activities included in that column, the third column identifies the funds included, the fourth column identifies the program series included, and the fifth column identifies the object series included.

Expenditure Categories

<u>Columns</u>	<u>Descriptions</u>	<u>Funds</u>	<u>Program Series</u>	<u>Object Series</u>
18.	District and School Administration	1, 8, 9	001-099	All Objects except 500-599 and 910

30.	Community Service	4	All	"
31.	Capital Outlay	5	All	All but 910 & 460*
		1, 2, 3, 4	All	500-599
32.	Building Construction	6	All	All but 910
33.	Debt Service	7	All	All but 910

* Textbook expenditures (Object Code 460) have been allocated, based on program code, into categories 18-28 to assure valid inter-year comparison.

TRENDS AND PATTERNS

Students

Minnesota PK-12 enrollment increases, which began with the 1985-86 school year, continue through 1999-2000 (see Figure 1). Enrollment in 1995-96 totaled 827,588 average daily membership (ADM), a 1.8% increase over the 1994-95 total of 812,582. The vast majority of enrollment increases are the result of resident births rather than immigration.

Minnesota's school districts vary greatly in enrollment size. The largest 10 districts, all in metropolitan areas, enrolled almost 30 percent of Minnesota's public school pupils.

Minnesota, as well as the rest of the nation, is experiencing a growth in the proportion of its population classified as minority. This minority population growth, as seen in Figure 2, shows up in school enrollments. Although Minnesota's minority enrollment percentages increased significantly from 6.1% in 1986-87 to 12.6% in 1993-94, they still constitute a relatively modest percentage of total Minnesota PK-12 public school enrollment - approximately one-third of the U.S. percentage.

FIGURE 1
Average Daily Membership; Actual and Projected
1980-81 through 1999-2000

FIGURE 2
Percent Minority Enrollments
Minnesota and United States

Year	1986-87	1993-94
USA	29.6%	33.9%
Minn.	6.1%	11.1%

The statewide 1.8% growth in 1995-96 ADM over 1994-95 ADM has not, generally, been shared throughout the state. Figure 3 shows that districts in and around the Twin Cities Metropolitan Area experienced significant growth over the past decade, as did districts around St. Cloud and between St. Cloud and the Twin Cities. In contrast, many districts in the southwest, northeast and far northwest counties of the state either grew very little or experienced declining enrollments.

Ten-Year Change in Average Daily Membership

-  Decline/Low Growth (less than or equal to 5%)
-  Moderate Growth (6-10%)
-  Average Growth (11-15%)
-  Fast Growth (>15%)

FIGURE 3
Minnesota Development Regions
Average Daily Membership
Growth between 1985-86 and 1995-96

Further, Minnesota's minority composition is quite different than that of the United States (Table 1). American Indians have always constituted a significant proportion of Minnesota's population; its Asian population became significant after the Vietnam war.

Instructional Staff

Teachers and other district staff constitute a district's largest operating cost. Figure 4 shows the number of these staff over the past decade as well as the ratio of pupils (in ADM) to licensed professional staff. This ratio has varied little over time except during periods of budgetary crises such as in the 1982-83 school year. The 1994-95 ratio of 14.9 is the lowest since 1972.

89-90	48,372	15.1
90-91	49,138	15.1
91-92	50,386	15.0
92-93	51,042	15.2
93-94	52,415	15.1
94-95	54,032	14.9
95-96	53,875	15.3

Teacher salaries are determined by negotiations between staff and their local school boards. Rapidly growing school districts usually have a higher proportion of younger, less experienced staff with fewer advanced degrees; this translates into lower average salaries than in more stable districts. Figures 6 and 7 show how age and educational attainment of teachers have changed over the decade.

FIGURE 5

Average Minnesota Teacher Salaries

Year	Unadjusted	CPI Adjusted
88-89	\$30,660	\$30,660
90-91	\$33,126	\$29,816
92-93	\$35,093	\$29,790
94-95	\$35,948	\$28,967
95-96	\$37,094	\$29,093

	85-86	95-96
BA or Less	73.3%	75.8%
Advanced Degrees	26.7%	24.2%

Revenues

School revenues come from three sources: local (predominantly property taxes), state, and federal. Figure 8 indicates that the percentage of revenue received by Minnesota school districts

FIGURE 8
Statewide Average Sources
of Revenues for All Funds
1986-87 Through 1995-96

from the three sources remained fairly constant over most of the last decade until 1991-92. In 1991-92, as a result of state budgetary problems, school districts were required to “recognize” certain levy receipts earlier than in prior years. This earlier recognition had the effect of shifting the state/local mix towards a larger local contribution. The ratio further decreased in 1992-93 but rebounded in 1993-94 to percentages which typify most of the period.

Minnesota’s four percent federal revenue percentage is less than the national average of approximately six percent. Federal funds

are typically targeted toward specific minority and disadvantaged student populations - groups which constitute a smaller proportion of Minnesota’s enrollment than is the situation nationwide.

Another way of examining Minnesota’s PK-12 revenues is by accounting fund. A fund in the Uniform Financial, Accounting and Reporting Standards (UFARS) System is a self-contained set of accounts established for either general purposes or for a specifically defined set of fiscal activities such as food service or debt redemption. Table 2 compares Minnesota school district revenues by the eight UFARS funds existing in 1985-86 and 1995-96. Over that period the proportion of revenues allocated to nonoperating funds grew dramatically, led by sizable increases in the Building Construction Fund. Concern in recent years over deteriorating school facilities and capital funding equity have been major factors in the increase in monies dedicated to Minnesota’s school facilities.

TABLE 2
Percent of Minnesota Revenues by Fund
1985-86 and 1995-96

	<u>1985-86</u>	<u>1995-96</u>
General Fund	74.2%	67.0%
Food Service Fund	4.1%	2.9%
Transportation Fund	6.3%	4.4%
Community Service Fund	2.4%	3.0%
<i>Total, Operating Funds</i>	87.0%	77.3%
Capital Expenditure Fund	4.5%	4.4%
Building Construction Fund	3.2%	10.3%
Debt Redemption Fund	5.0%	7.0%
Trust and Agency Fund	0.3%	1.0%
<i>Total Non-operating Funds</i>	13.0%	22.7%
<i>Total, All Funds</i>	100.0%	100.0%

Figure 9 indicates that statewide average operating expenditures have grown at a rate slightly exceeding inflation over most of the decade. These expenditures vary significantly from district-to-district as shown in Figure 10. Districts at the 95th percentile expended approximately 50 percent more per average daily membership than districts at the 5th percentile.

The distribution of operating expenditures by program has also changed over the decade as indicated in Table 3. The percent expended on instruction has increased significantly, increasing from 61.9% to 68.8%.

TABLE 3
Distribution of District Operating Expenditures By Program
1985-86 and 1995-96

	<u>1985-86</u>	<u>1995-96</u>
Administration	8.6%	8.3%
Instruction	61.9%	68.8%
Student Services	14.1%	12.8%
Operations & Maintenance	9.7%	7.7%
Other Operating Programs	5.7%	2.4%
Total	100.0%	100.0%

FIGURE 9
State Average Operating Expenditures
Per Average Daily Membership
1986-87 Through 1995-96

FIGURE 10
Distribution of District Operating Expenditures Per Average Daily Membership
Selected Percentiles for 1995-96

Figure 11 indicates that Nonoperating Expenditures also continued to grow at a rate exceeding inflation. Non-operating expenditures include Capital Outlay, Building Construction,

FIGURE 11
State Average Non-Operating Expenditures
Per Average Daily Membership
1986-87 Through 1995-96

and Debt Service (columns 31, 32 and 33, respectively of the district detail). Part of the rapid growth is the result of equalizing the Debt Service Levy which had the effect of providing low property value districts with additional dollars for capital needs.

Community Services

Figure 12 shows the growth in community service expenditures from 1986-87 to 1995-96. It shows that these expenditures also have grown faster than the general rate of inflation. Community education/community service programs include sports, recreation, crafts, self improvement and skills enhancement, the Early Childhood and Family Education (ECFE) program and the Youth Development Program.

Operating Funds Balance

A school district's net unappropriated operating fund balance is a measure of its financial health at the end of the school year. It can be either positive or negative. A positive balance represents a financial cushion; a negative balance means that liabilities (debts) exceed assets. Districts with a negative year-end balance greater than 2.5 percent of their prior year's operating expenditures are defined as being in violation of expenditure limitations specified by Minnesota statute and are required to submit a plan to the Commissioner of Children, Families and Learning explaining how they will eliminate the deficit.

Figure 13 (next page) shows the state average operating funds balance, as a percentage of operating expenditures for the past decade. The ratio declined dramatically until 1993-94 when a modest rebound occurred.

FIGURE 12
State Average Community Service Expenditures
Per Average Daily Membership
1986-87 Through 1995-96

FIGURE 13
State Average Operating Funds Balance
As Percent of Operating Expenditures
1986-87 Through 1995-96

Figure 14 indicates that a long term upward trend in districts who exceeded the operating debt limitation also turned around at the same time. The number of these districts decreased by approximately 45 percent between 1994-95 and 1995-96. Much of this improvement was the result of consolidations of previously out-of-compliance districts into new, more financially viable entities.

Adjusted Net Tax Capacity

A school district's Adjusted Net Tax Capacity per ADM is a measure of real and personal property subject to local property tax levy. There is great disparity in the property wealth per ADM in school districts. It is such disparity and its effect on the equitable funding of PK-12 education which has been the cause of many of the education funding lawsuits across the country. Figure 15 indicates that in Minnesota the property richest districts at the 95th percentile have over four

FIGURE 14
Number of Districts With Net Unappropriated
Operating Debt Exceeding 2 1/2% of Yearly
Expenditures 1986-87 Through 1995-96

times the Adjusted Net Tax Capacity per ADM than districts at the 5th percentile. Minnesota has taken measures in recent years to neutralize the effects of these differences.

FIGURE 15
Distribution of Adjusted Net Tax Capacity
Per Average Daily Membership
1995-96

DEFINITIONS OF DATA ELEMENTS

The tables on pages 26 through 55 contain 38 separate statistics for each school district, county, region, and size of districts in the state. Definitions of these 38 statistics are given below. All data are for the 1995-96 school year.

1995-96 Resident Average Daily Membership

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be in attendance to be counted in ADM, but they must be in membership (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the year counts as 0.5 ADM.

The ADM counts in this report are, more specifically, counts of total resident ADM including all residents who are (a) enrolled in their home district, (b) educated in another district to whom tuition is paid, or (c) attending another district under the Enrollment Options legislation. Resident membership includes:

1. **PreKindergarten Handicapped** - ADM of prekindergarten students enrolled in special education programs.

2. **Kindergarten** - ADM of students enrolled in kindergarten classes.
3. **Elementary, Grades 1 - 6** - ADM of students enrolled in grades 1 - 6, including students in elementary level ungraded and special education classes.
4. **Secondary, Grades 7 - 12** - ADM of students enrolled in grades 7 - 12, including those students in secondary level ungraded and special education classes.
5. **Total** - Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

6. **Percent minority** - The percentage of the district's students who are of Native American/Alaskan, Black, Asian or Hispanic ancestry.
7. **Percent Attendance** - The average ratio of days attended to days enrolled for all students in the district.
8. **Percent Transported** - The number of resident public school students transported to and from school twenty or more days, as a percentage of the district's resident pupils.

Professional Staff

These statistics provide information about each district's professional staff. Staff are

counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE.

9. **Total Staff FTE** - The total number of licensed professional staff employed by the district, measured in full-time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.
10. **Pupil Staff Ratio** - The average daily membership of all students (both residents and nonresidents) who were enrolled in the school district, divided by the number of professional staff (column 9).

Tax Capacity Rates

These figures show the tax burden, expressed as a percent of tax capacity, for school district property taxes payable in 1995. Taxes payable in 1996 provide revenue for the 1996-97 school year.

11. **Auditor Percent** - The actual school district tax rate as determined by the county auditor. With a rate of five percent, a property owner would be taxed \$5 for each \$100 of tax capacity. Because of differences in property assessment levels between counties, comparisons of auditor tax rates among districts may be

misleading. This figure includes additional tax rates for special intermediate districts (287, 916 and 917) where they are part of a district's tax burden.

- 12. Equalized Percent** - This tax rate is computed by multiplying the auditor percent (item 11) by the 1995 market sales ratio. This ratio is equal to the market values, as determined by the local assessor, divided by actual selling prices. For state assessed properties, such as utilities, the ratio is 1.00.

Equalized percents are computed to compensate for varying assessment practices. Thus, when making interdistrict comparisons, these rates provide a more valid comparison.

Average Daily Membership

- 13. Resident ADM** - Average daily membership of students who reside in a district.
- 14. Total ADM** - This includes residents attending their home district, resident students tuitioned to other school districts, nonpublic school students being served via a Shared Time program, nonresident students who transfer in via one of the attendance options programs, and nonresident tuition students. Excluded are the portion of a student's time spent in a

postsecondary institution via the Postsecondary Enrollment Options Program, as well as those residents who transfer to other districts via one of the Attendance Options Programs.

Revenue Percentages

These three columns show the percentage of each district's revenues received from the federal government, the state government, and local and other sources. The percentages are based on all 1995-96 revenue reported by each district, except for proceeds from sales of real property and equipment, insurance recoveries, sales of bonds, loans and interfund transfers.

- 15. Federal** - The percentage of revenues from the federal government, whether paid directly or through another governmental unit.
- 16. State** - The percent of revenues from Minnesota state government.
- 17. Local and Other** - The percentage of revenues from local sources including property taxes, fees, county apportionment, etc.

1995-96 Expenditures Per ADM

Columns 18 through 33 show each district's 1995-96 expenditures in sixteen different categories, divided by total ADM (column 14).

- 18. District and School Administration** Expenditures for the school board and

for the office of the superintendent, principals, and any other line administrators who supervise staff (includes Funds 1, 7, 8; Program Series 001-099; and all Object Series except 500-599 & 910.)

- 19. District Support Services** - Expenditures for central office administration and central office operations not included in district and school administration (see item 18). Includes expenditures for business services, data processing, legal services, personnel office, printing, and the school census. (Includes Funds 1, 7, 8; Program Series 100-199; and all Object Series except 500-599 & 910.)
- 20. Regular Instruction** - Expenditures for elementary and secondary classroom instruction, not including vocational instruction (#21) and exceptional instruction (#22), and for co-curricular and extracurricular activities. Includes salaries of teachers, classroom aides, coaches, and expenditures for classroom supplies and textbooks. (Includes Funds 1, 7, 8; Program Series 200-299; and all Object Series except 500-599 & 910.)
- 21. Vocational Instruction** - Expenditures in secondary schools for instruction that is related to job skills

and career exploration. Includes expenditures for home economics, as well as industrial, business, agriculture, and distributive education. (Includes Funds 1, 7, 8; Program Series 300-399; and all Object Series except 500-599 & 910.)

- 22. Exceptional Instruction -**
Expenditures for instruction of students who, because of atypical characteristics or conditions, are provided educational programs that are different from regular instructional programs. Includes expenditures for special instruction of students who are emotionally or psychologically handicapped, or mentally retarded; for students with physical, hearing, speech, and visual impairments; and for students with special learning and behavior problems. (Includes Funds 1, 7, 8; Program Series 400-499; and all Object Series except 500-599 & 910.)

- 23. Instructional Support Services -**
Expenditures for activities intended to help teachers provide instruction, not including expenditures for principals or superintendents. Includes expenditures for assistant principals, curriculum development, libraries, media centers, audio visual support, staff development, and computer assisted instruction. (Includes Funds 1, 7, 8; Program Series 600-699; and

all Object Series except 500-599 & 910.)

- 24. Pupil Support Services -**
Expenditures for all noninstructional services provided to students, not including transportation and food. Includes expenditures for counseling, guidance, health services, psychological services, and attendance and social work services. (Includes Funds 1, 7, 8; Program Series 700-799 except 750-770; and all Object Series except 500-599 & 910.)

- 25. Operations and Maintenance -**
Expenditures for operation, maintenance, and repair of the district's buildings, grounds, and equipment. Includes expenditures for custodians, fuel for buildings, electricity, telephones, and repairs. (Includes Funds 1, 7, 8; Program Series 800-899; and all Object Series except 500-599 & 910.)

- 26. Food Service -** Expenditures for the preparation and serving of meals and snacks to students. (Includes Fund 2; all Program Series; and all Object Series except 500-599 & 910.)

- 27. Pupil Transportation -**
Expenditures for transportation of students, including salaries, contracted services, fuel for buses, and other expenditures. (Includes

Fund 3; all Program Series and all Object Series except 500-599 & 910.)

- 28. Other Operating Programs -**
Expenditures for general fund operating programs necessary to a district's operations but not assignable to other programs. These can include federally funded community education services for students, property and liability premiums, unemployment insurance premiums, principal and interest on noncapital obligations, and nonrecurring costs such as judgments and liens. (Includes Funds 1, 7, 8; Program Series 500-599 & 900-999; and all Object Series except 500-599 & 910.)

- 29. Total PK-12 Operating Expenditures** The total of the eleven preceding categories of expenditures (columns 18 through 28). This figure includes all expenditures incurred for the benefit of elementary and secondary education during the 1995-96 school year, except capital and debt service expenditures.

- 30. Community Service -** Expenditures for recreation, civic activities, adult education, early childhood education, or similar programs which are not conducted primarily for elementary and secondary students, and for noncredit summer school programs. (Includes Fund 4; all Program Series;

and all Object Series except 500-599 & 910.)

31. Capital Outlay - All capital expenditures charged to the operating funds plus expenditures charged to the district's Capital Expenditure Fund. (Includes Funds 1, 2, 4 and 5; all Program Series; and Object Series 500-599.)

32. Building Construction - All expenditures charged to the district's building construction fund. Expenditures are for major capital projects funded by bond proceeds, state capital loans, state facility grants or the downpayment levies. (Includes Fund 6; all Program Series; and all Object Series except 910.)

33. Debt Service - Expenditures for repayment of long term debt (see # 37) including payments of principal and interest on bonds and capital loans. (Includes Fund 7, all Program Series, and all Object Series except 910.)

Other Measures Per ADM

34. Operating Funds Balance - This figure is a measure of the district's financial condition at the end of the 1995-96 school year. It is equal to the sum of the undesignated balances on June 30, 1996 from the four operating funds (general, transportation, food service, and community service),

excluding the amount of statutory operating debt. This balance is then divided by 1995-96 resident ADM (column 13).

35. Change in Funds Balance - The difference between the district's operating funds balance on June 30, 1996 (see #34 above) and on June 30, 1995 divided by 1995-96 resident ADM. This is essentially equal to the difference between the district's revenues and expenditures in 1995-96, for the four operating funds combined. Thus, a negative number indicates that the district's expenditures in the operating funds were greater than its revenues in these funds.

36. State and Local Operating Costs - This figure is also called adjusted maintenance cost. It is used to measure that portion of the overall cost of PK-12 education which is financed from state and local sources. It is computed as follows:

Sum of General, Food Service and Agency Fund expenditures;

Plus textbook expenditures from the Capital Expenditure Fund;

Minus transfers between funds;

Minus revenue from the federal government;

Minus revenue from sale of food and materials;

Minus admission fees and gate receipts from school activities;

Minus special education tuition.

This total is then divided by 1995-96 total ADM (column 14).

37. Long Term Debt - The amount of long term debt outstanding on June 30, 1996, divided by 1995-96 resident ADM. Long term debt includes bonds and capital, debt service, and energy loans from the state. Beginning with the 1994-95 school year, June 30th payables for the following are included:

- a) separation and severance pay,
- b) special assessments,
- c) capitalized levies, and
- d) compensated absences.

38. Prior Year Adjusted Net Tax Capacity - The 1995 adjusted net tax capacity of the district divided by 1995-96 resident ADM. This figure is an indicator of the district's ability to raise revenue through local property taxes.

A map of the State of Minnesota showing its 87 counties. The counties are labeled with their names. The map is divided into 11 numbered regions, each with a unique color and a number in the top left corner. The regions are: 1 (light blue), 2 (light green), 3 (light orange), 4 (light purple), 5 (light yellow), 6E (light pink), 6W (light blue), 7E (light orange), 7W (light green), 8 (light purple), 9 (light yellow), 10 (light pink), and 11 (light blue). A legend in the bottom right corner shows a white square followed by the text '87 Counties'.

The chief purpose of this table is to permit easy comparisons of districts with similar enrollments. For example, someone in a district with 600 pupils may want to examine the data for Group 4 (470 to 624 ADM) to see how his/her expenditures compare with other districts of similar size.

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics. It may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little; ninety percent of the school districts are within the narrow range of 92.1% (5th percentile) to 96.5% (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate the use of the data.

1. A district which has total PK-12 operating expenditures (column 29) of \$5,400 per pupil unit is very near the median value, which is \$5448. Thus about half the districts in the state have lower and half have higher expenditures.
2. A district with total average daily membership (column 5) of 400 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

State (Total or Avg.)	4670	61,980	382,986	372,105	821,741	12.6	93.9	83	53,653	15.2	64.19	57.58	821,741	825,432

Lowest and Highest Values. For any specific variable, the lowest value of that variable among all school districts. The table also shows the highest value for each variable.

XXth Percentile. For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 20. This means that ten percent of the school districts have 20 or fewer staff members (FTE). The 25th and 75th percentiles are called quartiles; the 10th, 20th, 30th, ... through 90th percentiles are called deciles.

Median. For any specific variable, a value chosen such that half of the school districts are below the chosen value and half are above.

State Total. For variables 1-5 (1995-96) resident average daily membership, 9 (total staff), and 13-14 (ADM), the state total is simply the sum of the corresponding value for all districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For these variables, the state total is a form of weighted average.

Example:
$$\frac{\text{State Total of Pupils}}{\text{State Total of Staff}} = \text{State Total Pupil/Staff Ratio}$$

																					</			

The chief purpose of this table is to permit easy comparisons of districts with similar enrollments. For example, someone in a district with 600 pupils may want to examine the data for Group 4 (470 to 624 ADM) to see how his/her expenditures compare with other districts of similar size.

ENROLLMENT SIZE GROUPS

The table below lists a variety of summary statistics for each of the 38 variables included in this report. The attendant definitions explain the meaning of these statistics. It may be used to better understand the distribution of a particular variable among Minnesota school districts. For example, percent attendance (column 7) varies little; ninety percent of the school districts are within the narrow range of 92.2% (5th percentile) to 96.7% (95th percentile).

The table may also be used to see how an individual school district compares with other districts in the state. Two examples illustrate the use of the data.

1. A district which has total PK-12 operating expenditures (column 29) of \$5,200 per pupil unit is very near the median value, which is \$5272. Thus about half the districts in the state have lower and half have higher expenditures.
2. A district with total average daily membership (column 5) of 360 students is between the 20th and 25th percentiles for this variable. Somewhere between 20 and 25 percent of Minnesota school districts have fewer students than this district.

Lowest and Highest Values. For any specific variable, the lowest value of that variable among all school districts. The table also shows the highest value for each variable.

XXth Percentile. For any specific variable, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile for total staff (column 9) is 19. This means that ten percent of the school districts have 19 or fewer staff members (FTE). The 25th and 75th percentiles are called quartiles; the 10th, 20th, 30th, ... through 90th percentiles are called deciles.

Median. For any specific variable, a value chosen such that half of the school districts are below the chosen value and half are above.

State Total. For variables 1-5 (1994-95) resident average daily membership, 9 (total staff), and 13-14 (ADM), the state total is simply the sum of the corresponding value for all districts listed in the report. For all other variables, the state total is computed as the sum of the numerators for all districts, divided by the sum of the denominators. For these variables, the state total is a form of weighted average.

Example:
$$\frac{\text{State Total of Pupils}}{\text{State Total of Staff}} = \text{State Total Pupil/Staff Ratio}$$
