

2020 Conference

This bipartisan interest group is open to House and Senate members. The group is studying long-term issues related to demographic changes in Minnesota; in the year 2020, it is projected that more Minnesotans will be of retirement age than school age.

Issues the group is discussing include:

- how Minnesota will pay for health care as the older population continues to grow; and
- possible changes in state priorities as the population ages.
